Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Rabi pulses sowing down by 10.29% as on 2nd Nov-2018 to 32.07 lakh ha.** Chana sowing has been reported at 22 against 25.94 lakh ha, Masur sowing at 3.09 against 4.17 lakh ha, Pea sowing at 2.44 against 2.66 lakh ha, urad sowing at 0.67 against 0.69 lakh ha and moong sowing at 0.25 against 0.11 lakh ha.
- **As per latest update, NAFED sold 21951.20 MT of masoor at an average price of Rs 3538.35 per quintal until 26th October '18.** NAFED has balance of 210340.75 tonnes and 9100.87 tonnes in Madhya Pradesh and Uttar Pradesh respectively. NAFED will try to sell 60 percent of its masoor stock in order to make space for procuring moong and urad in upcoming Rabi season.
- **As per Food Safety and Standards Authority of India (FSSAI) recent advice on the possible presence of herbicide glyphosate in pulses** Maharashtra FDA has started collecting samples and it would be tested as per set parameters by international agencies. The result is expected by mid Dec. Joint Commissioner of Maharashtra FDA stated if the chemical presence is found beyond set limit, then action would be taken against concerned person.
- **Tur crop is passing through flowering to fruit formation stages and early sown crop is** expected to hit market by end Nov. Stockists are active as initial report hints lower crop size in Karnataka, Maharashtra, AP & MP too. Govt expects 42 lakh tonne Tur production this year. However, incoming report hints around 10 % lower crop size this year. Private trades expects 20-25 % lower crop. Agriwatch has projected 38-39 lakh tonne crop this year. If crop continues to face drought like condition, production may decrease further. So millers in Karnataka and Maharashtra are engaged in active buying. They are buying from Nafed. In Delhi market millers are not active. They may start fresh buying once after Diwali, it may further drive price up. Overall sentiments hint towards upward momentum..
- **Commencement of moong procurement in Rajasthan, Maharashtra and other states has lent support** to moong cash market. Arrival of quality moong is much lower than expectation. Arrival of poor quality is normal. Millers are buying quality moong actively. Despite higher kharif area coverage yield is lower and quality inferior. Moong in Delhi market is being traded at Rs 5400-6000 while in Jaipur market it is being traded at Rs 5500-6000. Demand in Raj, Mah, Kar and AP is good and it would push price further up.
- **Chana arrival in Delhi market was registered at 25-30 motors. Price of Chana Rajasthan line was** quoted at Rs 4300 per qtl. There was no trade at this price. Millers are buying lower quantity based on their need. Fresh buying spree is expected after Diwali. Even south Indian market buyers are active and may prefer to buy from central pool stock as they expect price to improve in coming weeks. Lower post monsoon rainfall and moisture stress in the field may affect early sowing of chana. Overall tone remains steady to firm. Area may decline in AP, Gujarat and Maharashtra. However, ample stock in central pool may cap any unexpected spike. Sowing progress in Nov, weather condition in Dec-Jan remains very crucial for chana price.
- **Dal millers around buying, lower crop size & shortage of stock in cash market drive urad and dal price** up by Rs 150-200 in last three days. Arrival in producing region is lower by 50 % now. Besides, govt's agencies are active and procuring Urad under PSS. Urad Dhoya dal too increased by 250-300 per qtl. Emerging scenario hints uptrend to continue in urad cash market. Arrival pressure is almost over due to crop failure in Latur, Udgir, and Shivpuri-Katni line. Stock of imported urad too is lower and importers have started increasing price of urad. Urad FAQ has increased by Rs 500-550 while SQ increased by 800-900 to Rs 5400-5450 per qtl. New crops due now from Navgachhiya line. Fear of poor quality is still there. Arrival from Kota - Chandausi line too is decreasing. Analysing the situation exporters in Myanmar have increased quotes to \$500 & \$640 per MT for FAQ and SQ respectively.
- **Peas market is expected to remain weak on lower demand at higher level despite lower stock at port.** Furthermore government has increased restriction on pea until 31st December 2018.

International Market:

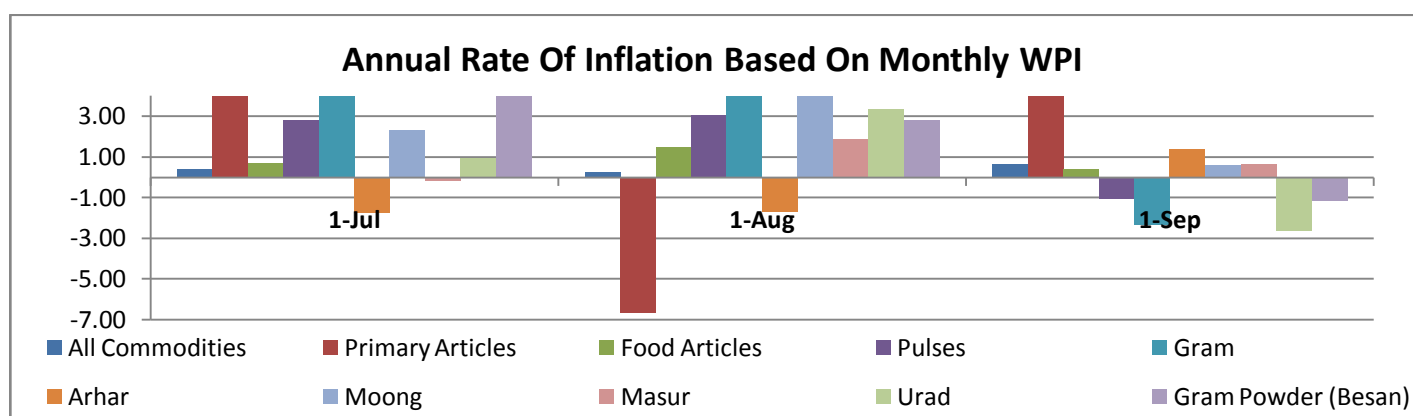

- **Chickpea market traded steady to slightly lower as supply from farmer's end was seen higher than actual demand.** Demand from North American millers/exporters remained weak. It continued to pressurize chickpea prices. Offering for farmers too have decreased. Farmers are getting 21% lower price now in comparison to mid Aug-2018. Canadian Farmers too are getting 13 % lower price during the period. As demand remains weak, any spike in global chickpea market is unlikely. Major buyers, India, remains out of the market. Range bound movement might be seen in the short term.
- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne in 2018-19.** Import has been estimated same as last year at 35,000 MT. Despite lower production carryout is expected to decrease slightly from 8.76 to 8 lakh tonne. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonne in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada.** the major difference has been seen in lentil production fig. Unofficial estimate points 23.7 lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT.** It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **As per USDA, dry bean production in U.S. is expected to fall by 6 percent to 1.23 MMT even after 20 percent decrease in sowing as yields are expected to be higher compared to last year.** Dry bean exports from U.S. have registered a 12 percent increase during September'17- June'18 compared to September'16- June'17. Top destinations included Mexico, Canada, Italy and UK.
- **Canadian chickpeas market traded unstable during the week under review as temperature in growing belts was seen at freezing point at the time of harvesting.** Around 25 % crop is yet to be harvested. Quality concern for standing crop is increasing. Market experts say that crop size may be lower than previous expectation. It may decline from 2.83 to 2.58 lakh tonne as per Canada statistics.
- **Global chickpea market traded steady during the week under review. Demand remains weak** and higher availability of medium and small chana continues to weigh on market fundamental. According to Statistics, Canada has pegged chickpea production higher by 7% to 282,800 MT against provincial agri dept. estimate of 202,400 MT for 2018-19. Other agency have estimated production at 2.64 lakh tonne against 1.02 lakh tonne in 2018-17-18. Prices are likely to move in the range of \$450 to \$480 per tonne.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** it was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Even lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.

- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August, India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with certain conditions/licence to import-according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans.** Pulses prices are lower in Myanmar as major buyers like India is almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

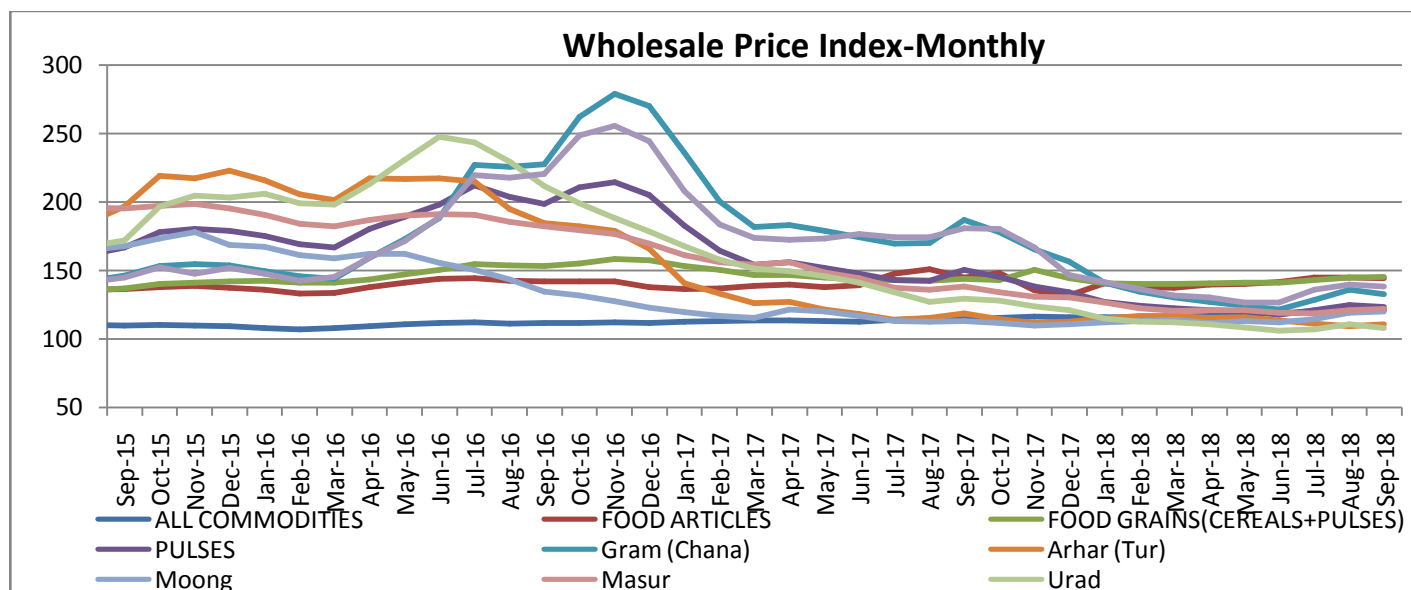

Weekly Outlook: -Pulses prices are likely to move up this week too...

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.3 point from 124.5 in Aug to 123.2 in Sep-2018.

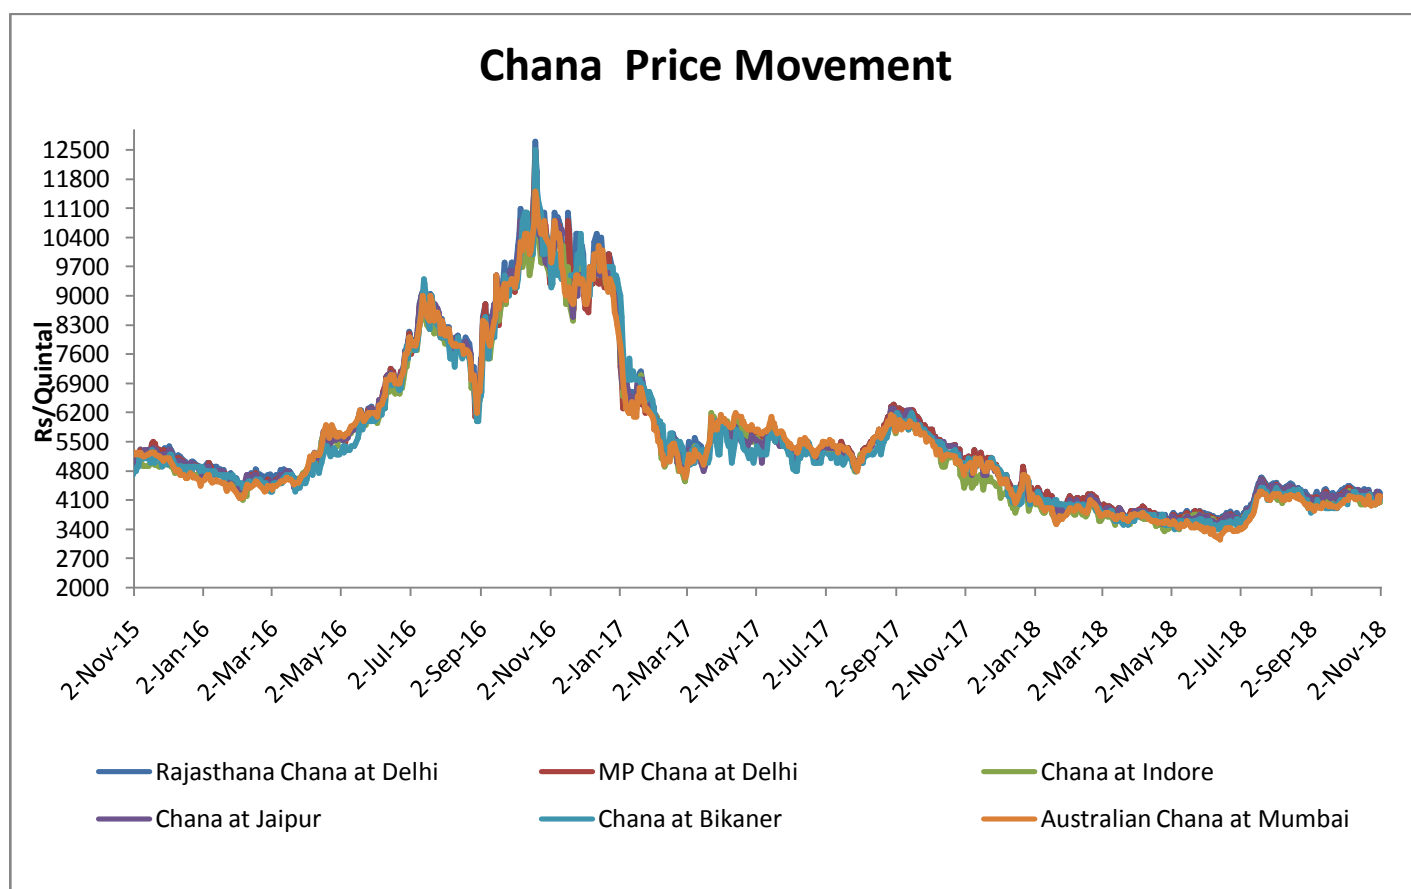

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana prices stays steady in central, south and north India. Prevailing condition hints market to improve in coming weeks as there is a fear of lower area coverage this year. If temperature continue to remain hot and dry in south India and Maharashtra, sowing would be affected and it would directly affect yields. Import is not possible at 70% import duty and lower availability in global market. Farmers stockists are unwilling to sell chana at current price. Overall outlook for chana seems firm and it may move up to the level of Rs4400-4500 per qtl. Chana is being traded at Rs4250-4275 in Delhi market..

All India average price for Chana decreased by 0.14 percent from Rs 4175 to 4200 per qtl. Australian Chana price too moved up by 1.23.% to Rs 4200 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

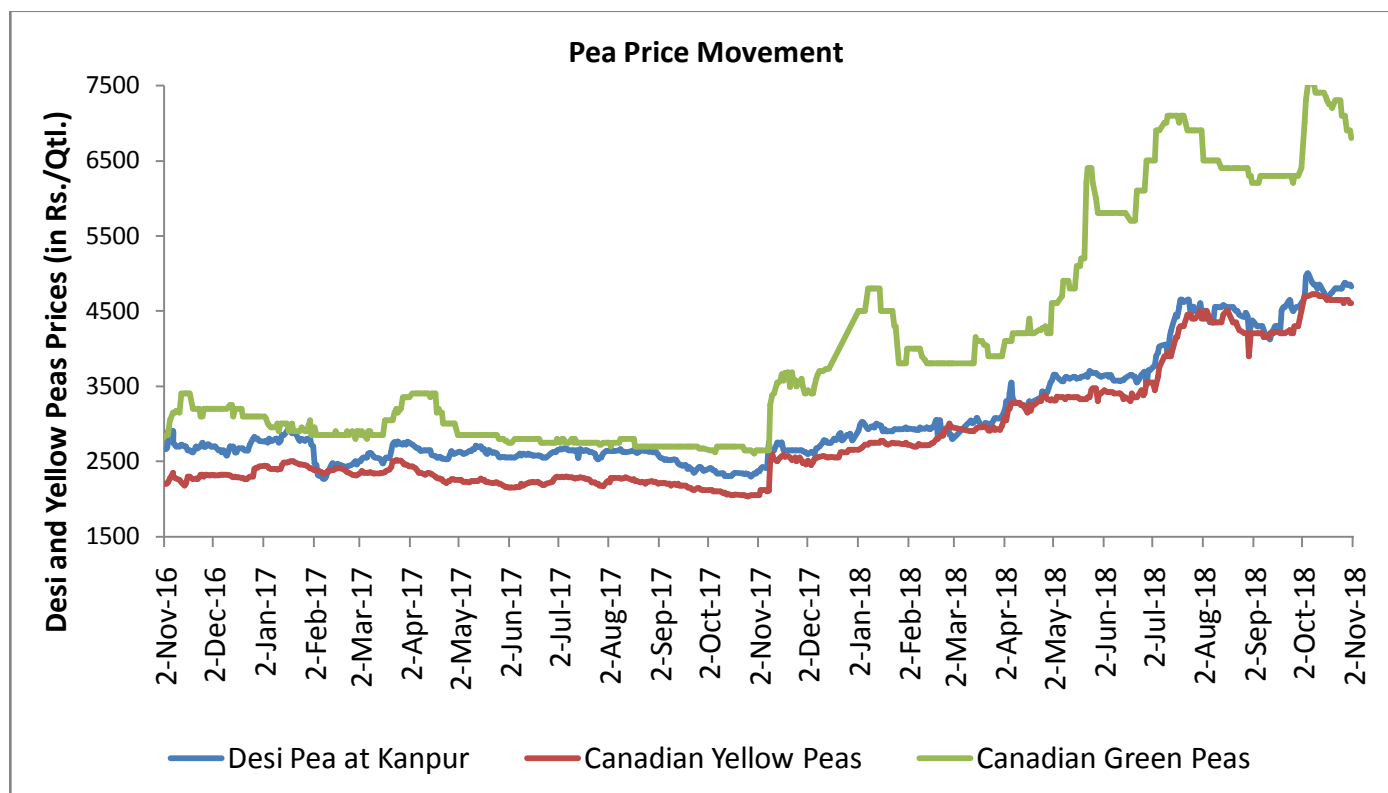

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):

Market Recap:

Pea prices could not sustain its uptrend despite decreasing stock at ports. Demand decreased at higher level and decrease in chana price too pressurized pea market. Stock available in domestic market and at ports is said to be lower than consumption till Dec. Prices may move down by Rs 100-150 more from current level as /chana dal are cheaper right now. Firmness in pea market depends on chana price movement. Stake holders should sell at current level. Area in MP and UP is lagging behind by 15 to 20% so far. However, it may pick up in Nov. Overall tone seems weak.

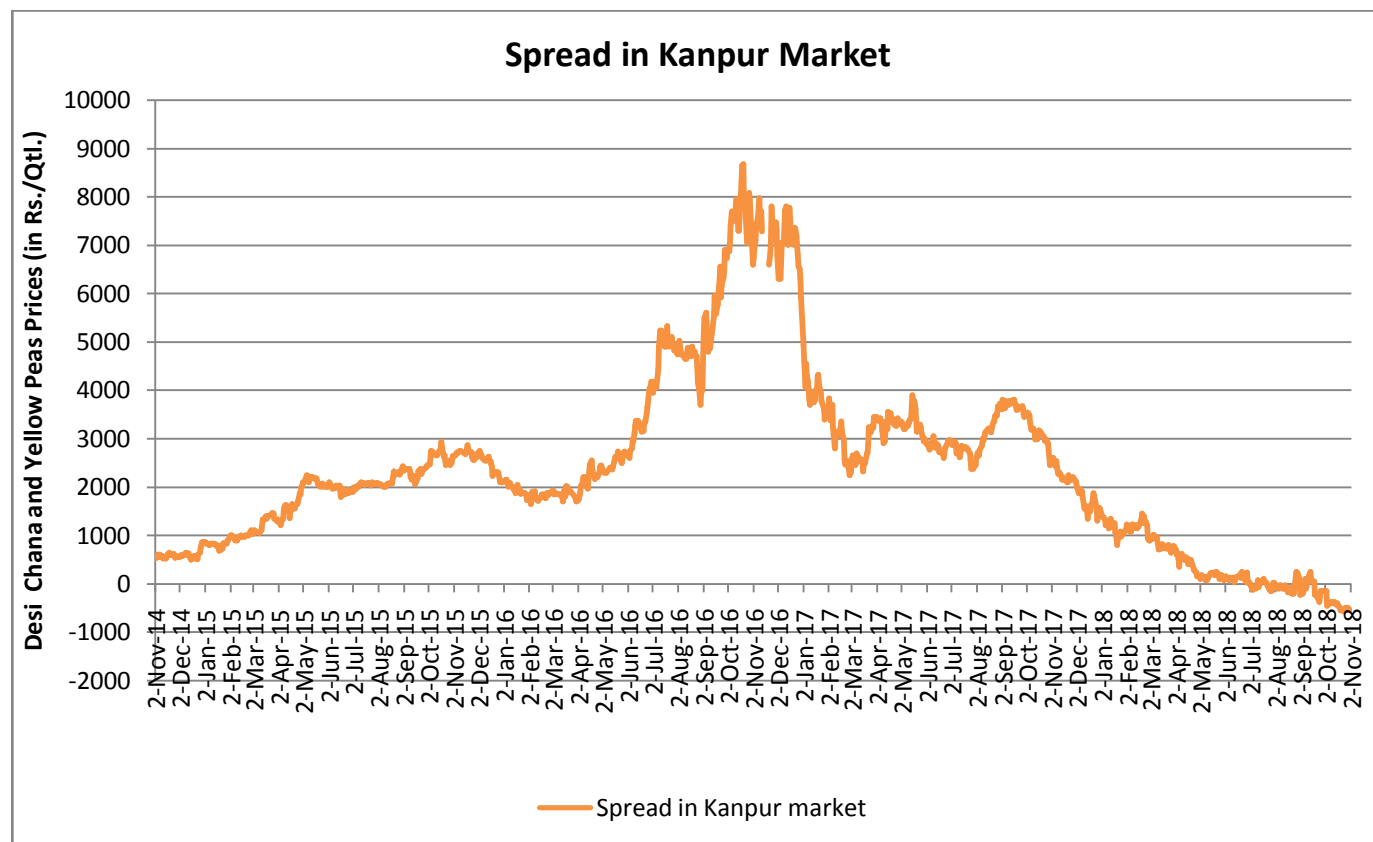

Current Market Dynamics & Outlook:

Pea traded at Rs 4800 in Kanpur market, slightly lower than last week due to lower demand at higher level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the medium term. Import is not possible till 30th Dec-2018. So, stake holders should buy after downward correction. It may move down to Rs 4600-4650 this week. Consumers have option as other pulses are ruling lower, specially chana. So any big spike is unlikely despite import restriction till Dec.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market moved smartly in negative zone due to smart gain in pea price. Spread is expected to move in the negative range of 400 to 600 per quintal in Nov on relative movement in Chana prices. Overall outlook seems steady to slightly weak.

Market Outlook: Outlook remains steady to slightly weak.

Lentils (Masoor):

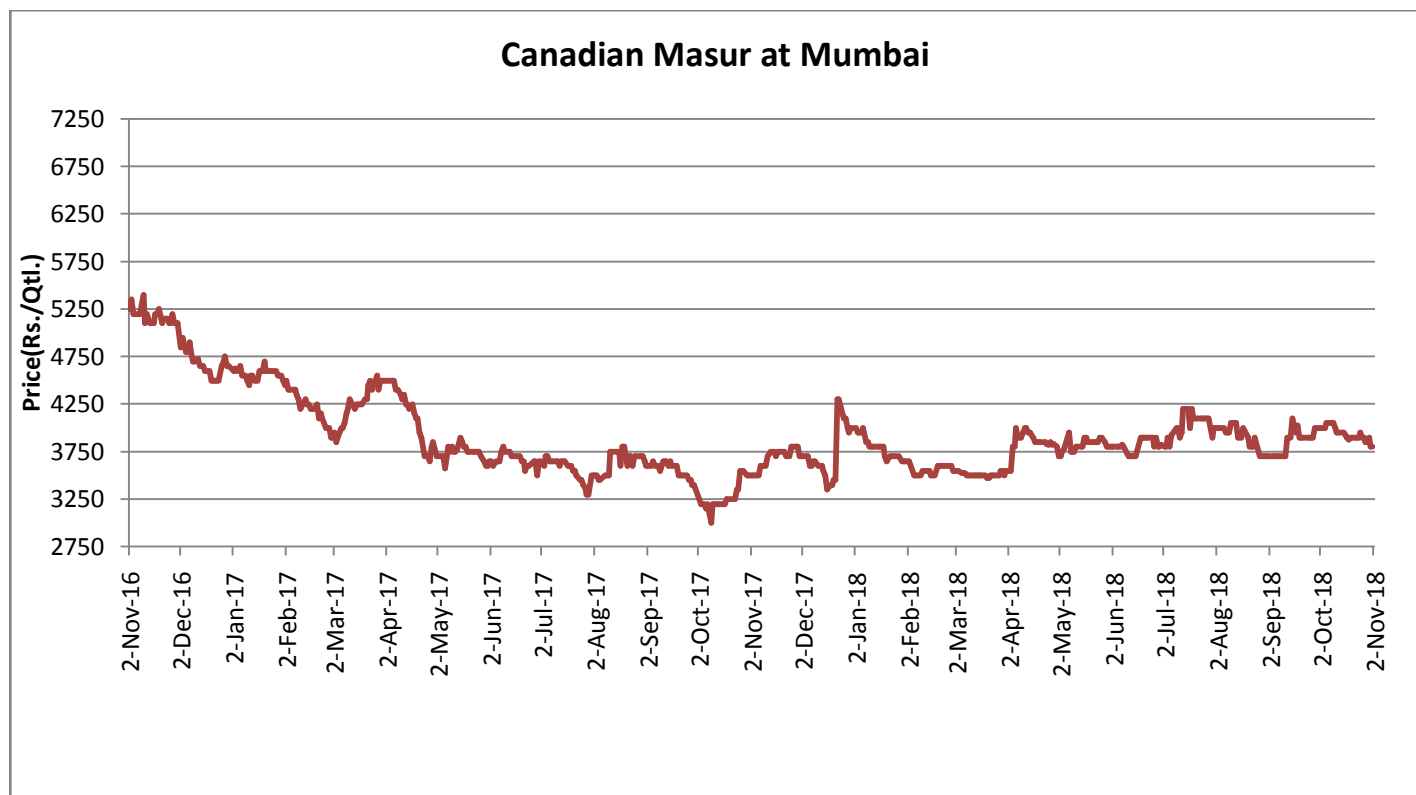

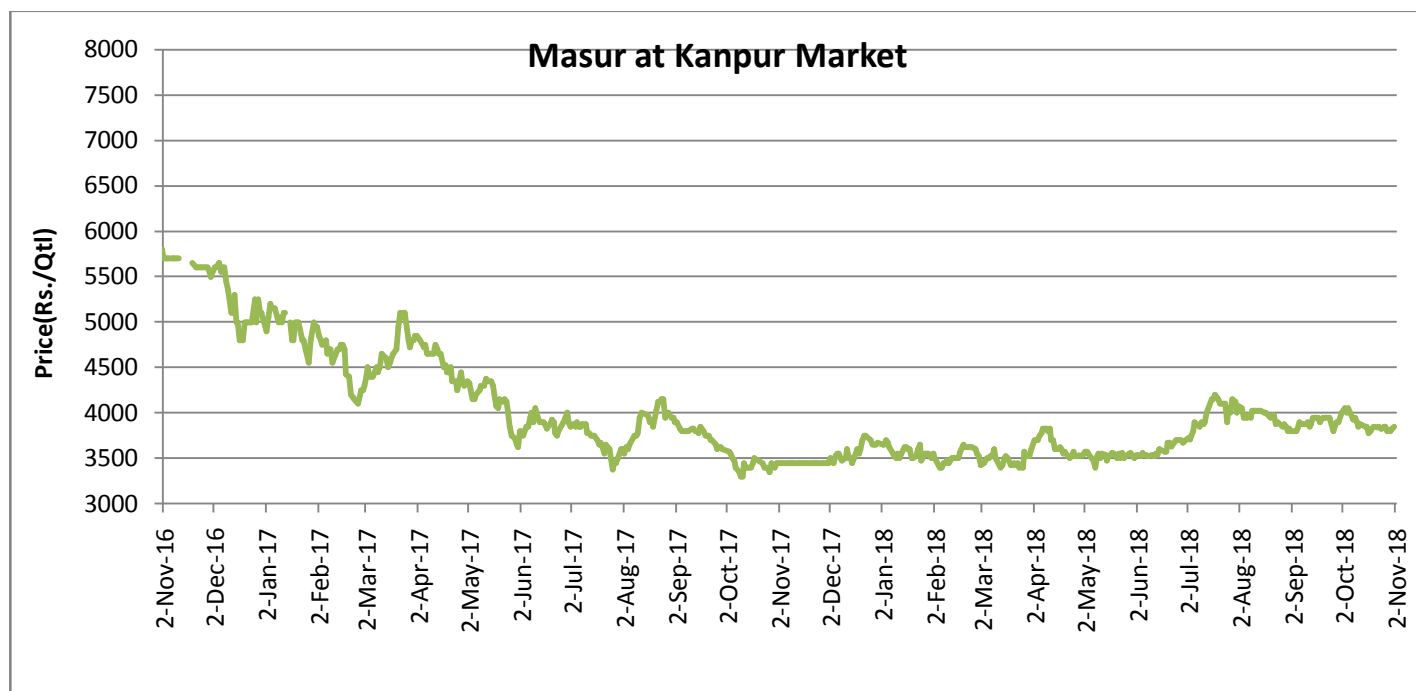

Market Recap:

Area coverage is lagging behind in the initial state of sowing. It may pick up in Nov. Masur market is likely to trade firm in coming weeks. Demand is expected to improve after Diwali. As per trade sources, India has exported 1000.45 MT of Lentil at an average FoB of \$821.65 per tonne during the month of September -2018 compared to 711.75 MT at an average FoB of \$893.78 per tonne in August-2018. Vessel (Sea Breeze) with 32350.00 tonnes of lentil is at berth for discharge. The vessel Sea Breeze is at berth since 04th October 2018. Despite continuous import, Lentil market is expected to move steady to firm on expectation of import duty hike and export incentive in Oct. Import quantity remains restricted amid hope of improvement in demand due to festive season. As there is plenty of stock lying in NAFED godowns, any major spike is unlikely. India has imported 34757.26 MT of yellow pea at an average CiF of \$274.95 per tonnes during the month of August -2018.

Current Scenario:

In Oct-2018, average price in key market Kanpur was down by 0.23 % to Rs 3800 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Nov to a certain extent.

Market Outlook: Prices are likely to notice steady to firm this week.

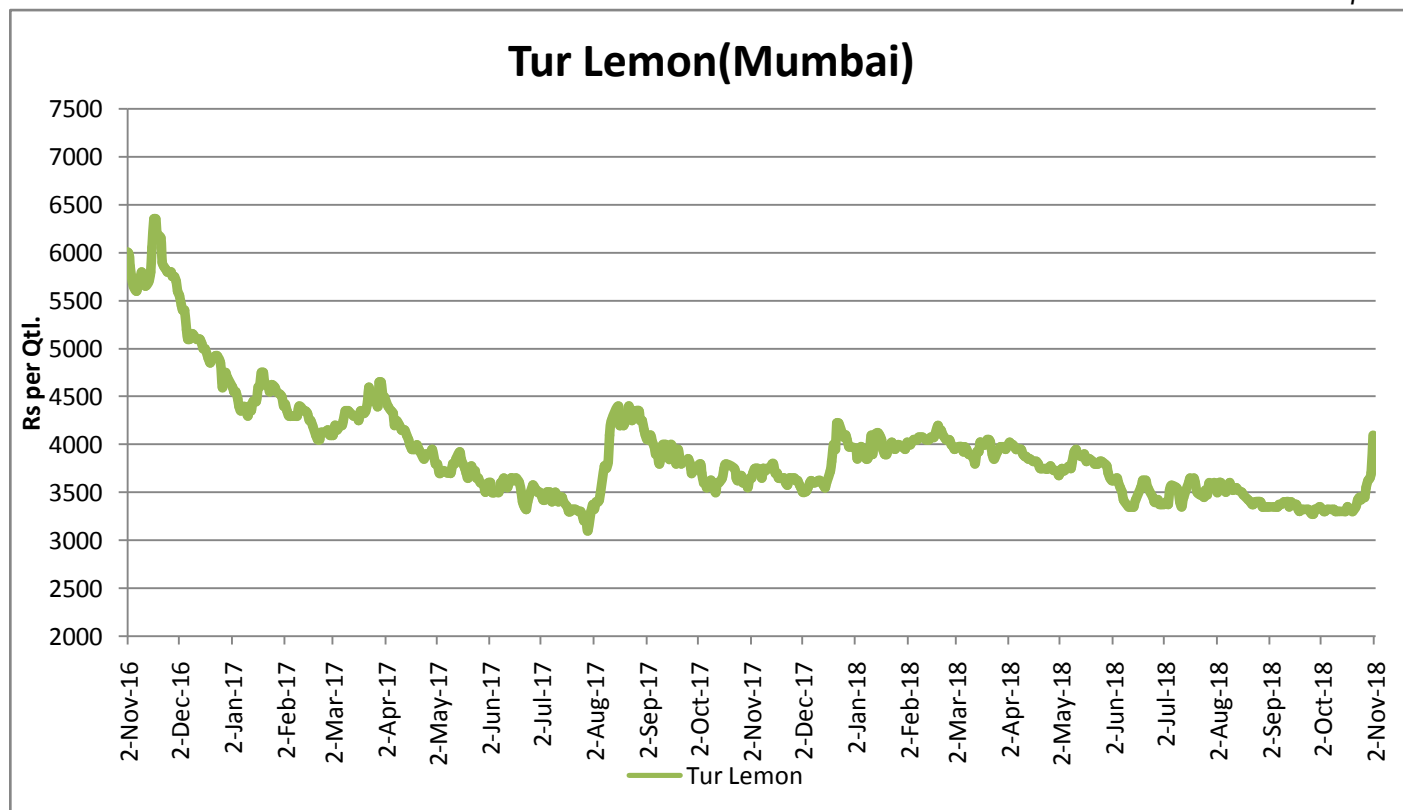

Pigeon Pea (Tur/Toor):

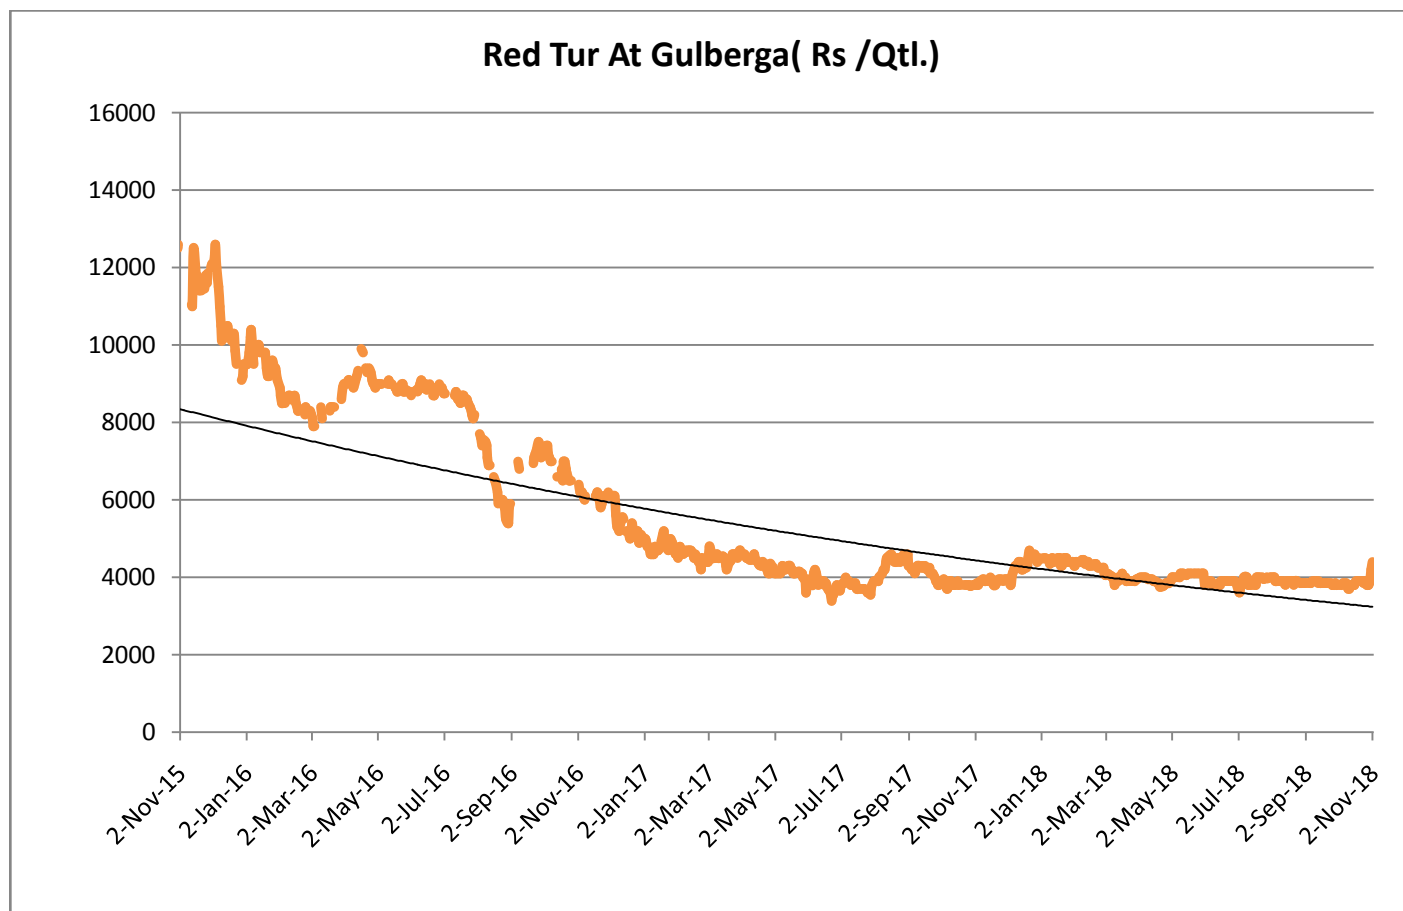

Market Recap:

Overall crop loss due to fear of lower yield is being analysed. Market expects 15-20 % lower yield this year. Tur market traded slightly up on the back of improved demand from retail market, growing fear of lower yield in Maharashtra, Karnataka and Gujarat due to moisture stress in the field. Crop is under flowering stage. Besides, higher MSP (Rs5675) for new crop, govt's intention to re-launch futures in tur and urad, likely higher export incentive (10 to 15 %) and uncertain weather condition may support tur cash market in the weeks ahead. Pressure of higher stock is coming down ahead of new crop, two months away from now. Import would be limited under restricted quota. However, any big spike is unlikely as selling from central pool stock continues. Govt would procure tur at new MSP, so private participation is expected to be lower due to huge gap between MSP and prevailing market price. Private trade retention may increase on the hope of improvement in price. Cash market is likely to stay steady to slightly firm.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675). Burma offered lemon tur new & old at \$400 per tonne basis Indian port. Linkely was offered at \$405 per tonne basis Indian port. Overall trend seems firm.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve amid festive demand. (Likely futures online trade) may support market..fear of lower yield is increasing.

Black Matpe (Urad):

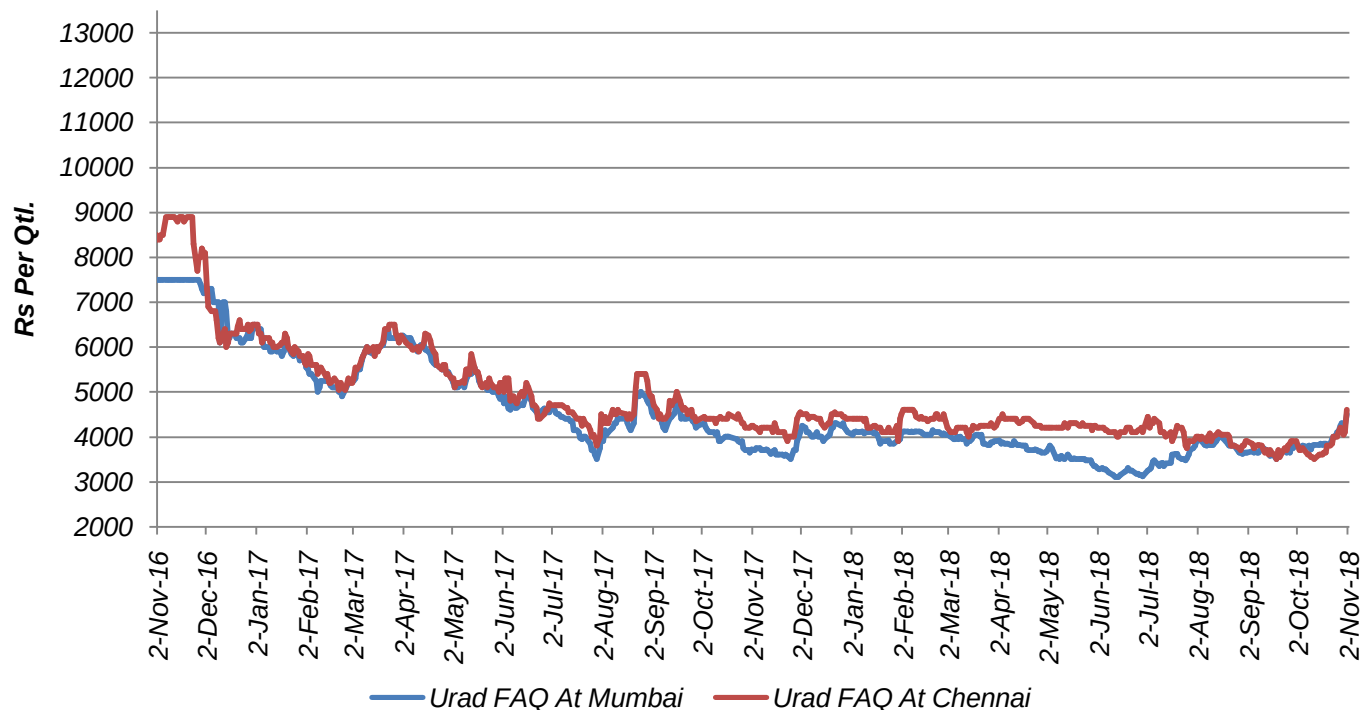

Urad arrival from kharif crop is lower by 20 % than normal expectation and there is a quality issue too with rains affected crop. As crop size is lower and procurement under price support scheme, Bhavantar Yojna is about to begin. Besides, demand is expected to improve from current level due to festive season while import volume would be limited at 1.5 lakh tonne. So Agriwatch expects market to move up from current level during the period of procurement. As govt. agencies have stopped auction, it too would support Urad market in coming weeks. Besides, futures in Urad & Tur is likely as concerned authorities seem ready to allow it once again after 2007. Now Sebi has to decide. Overall outlook remains firm for Urad.

Kharif Urad area is lagging by 8.97 lakh ha from last year to 40.37 Lakh ha as on 20th Sep-2018. Actually, major producer of kharif Urad is MP, Uttar Pradesh, Maharashtra and Rajasthan. Area is down in MP by 7.66 % to 16.52 lakh ha, it is down in Maharashtra by 22.31 % to 3.75 lakh ha and by 12.62 % to 4.72 lakh ha in Rajasthan. However, it is up by 15.44% to 6.88 lakh ha in UP. So production is expected to decrease this year from 25.47 to 24.58 lakh tonne including 5.77 lakh tonne rabi crop.

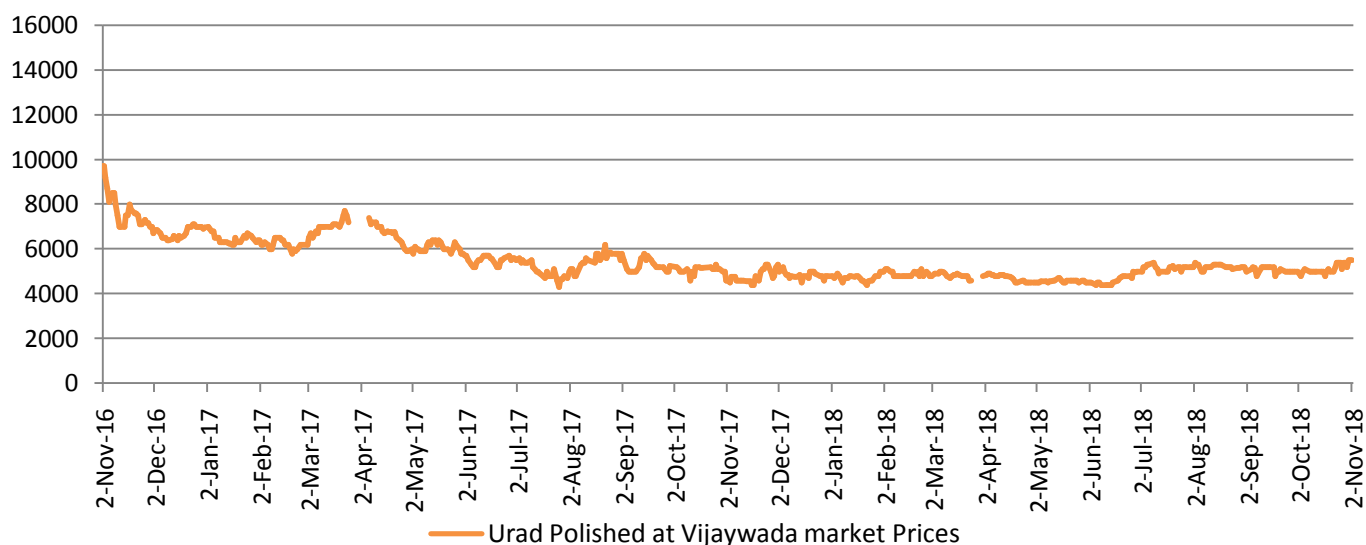

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4300-4500 per Qtl.) and Chennai (Rs.4500-4600 Qtl.) noticed firm tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market, due to improved demand at lower level. The following graph shows the price movement in different markets:-

URAD FAQ

Urad Polished at Vijaywada

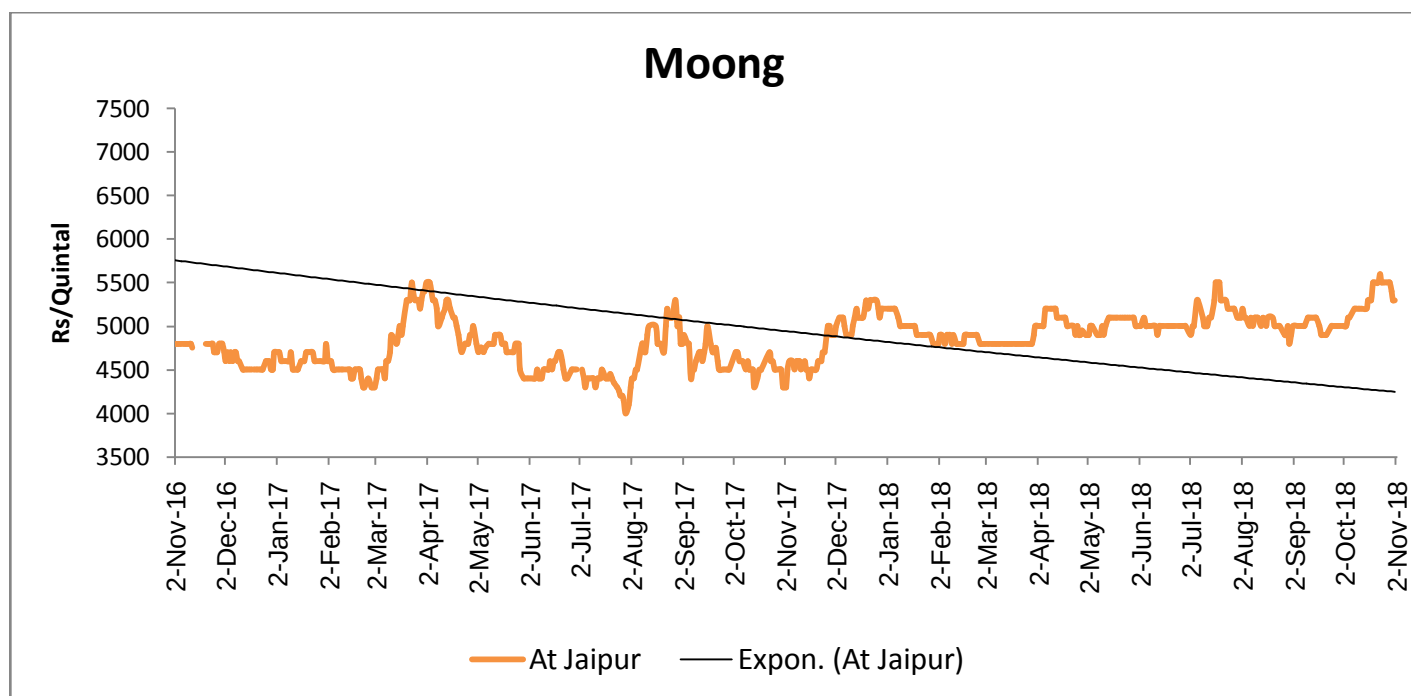

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week too.

Green Gram (Moong):

Market Recap:

Stake holders should buy after correction. Arrival pressure from kharif moong crop has not build up in major markets so far. Besides, there is a quality issue in Karnataka, Maharashtra, Rajasthan. So, arrival of quality crop is much lower than expectation. Next big crop is expected in summer from MP only. In MP, lower rainfall would not allow farmers to increase area under moong despite higher MSP (RS6975). Besides, there is good demand in moong and moong dal. Govt would procure higher quantity due to upcoming election. So moong price is unlikely to come down. Selling from central pool is expected not before mid Dec. Import is not possible beyond limit. So emerging scenario hints moong to go up from current level after slight correction. It may move up by 300 to 400 per qtl. in the near term.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Import & Average CiF:

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in Nov.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4200 to 4450 levels in this month.

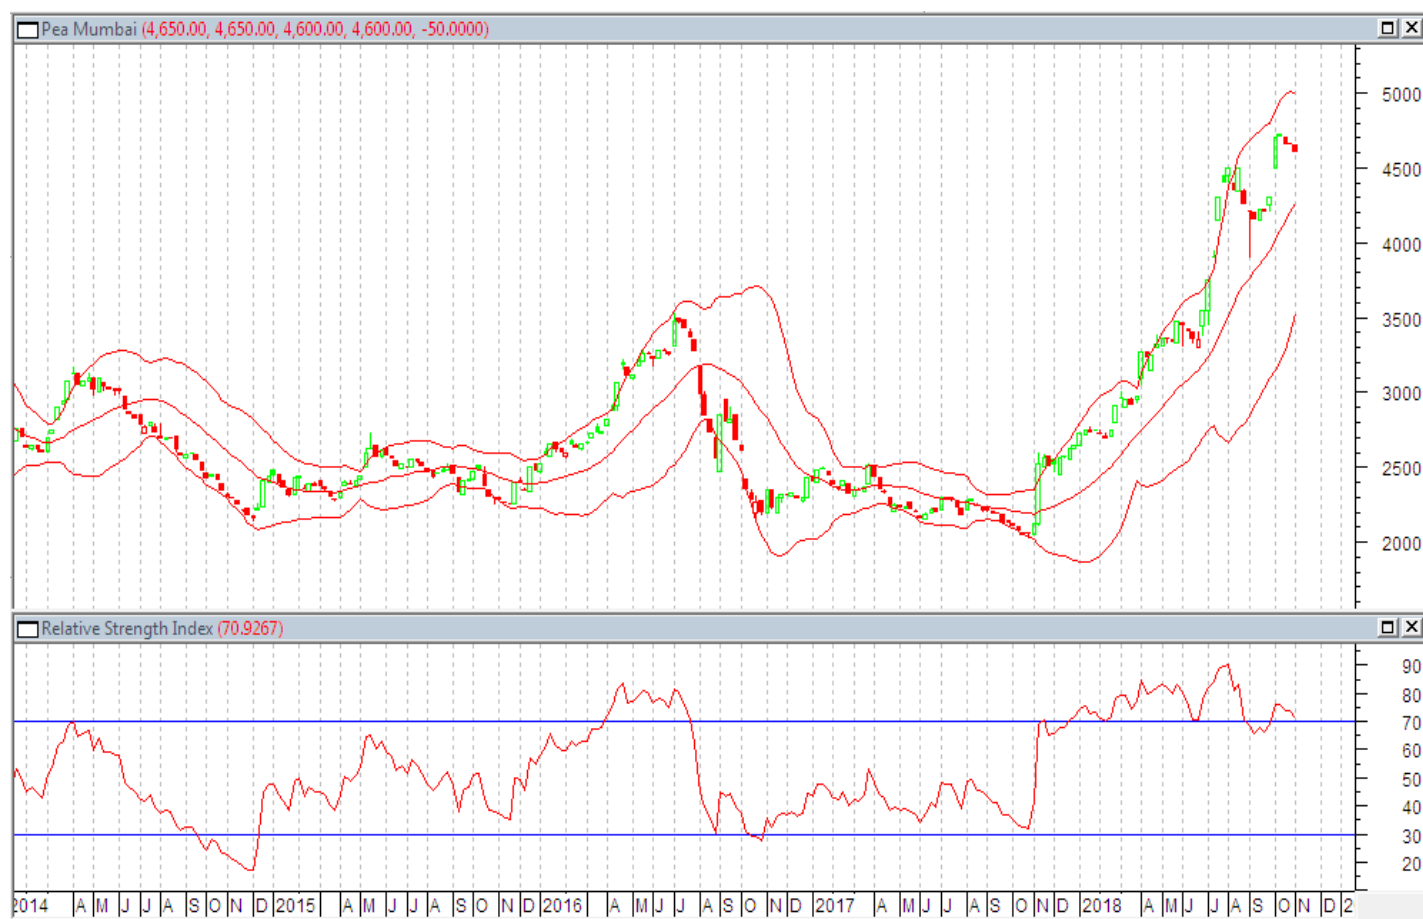

Strategy: Buy on dip

Trade Recommendations: Go long around 4150 with the first target of 4250 and second target 4300 with stop loss at 4100 level.

Delhi Chana Physical :

Support & Resistance				
S2	S1	PCP	R1	R2
3900	4100	4200	4400	4450

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement.

**Peas:****Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart**

Outlook - We expect prices to notice weak movement in this month taking clue from weak chana ,sluggish demand despite import restriction and decreasing stock at ports.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500- 4750 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4650 with the first target of 4550 and second target 4500 with stop loss at 4700 level.
