Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

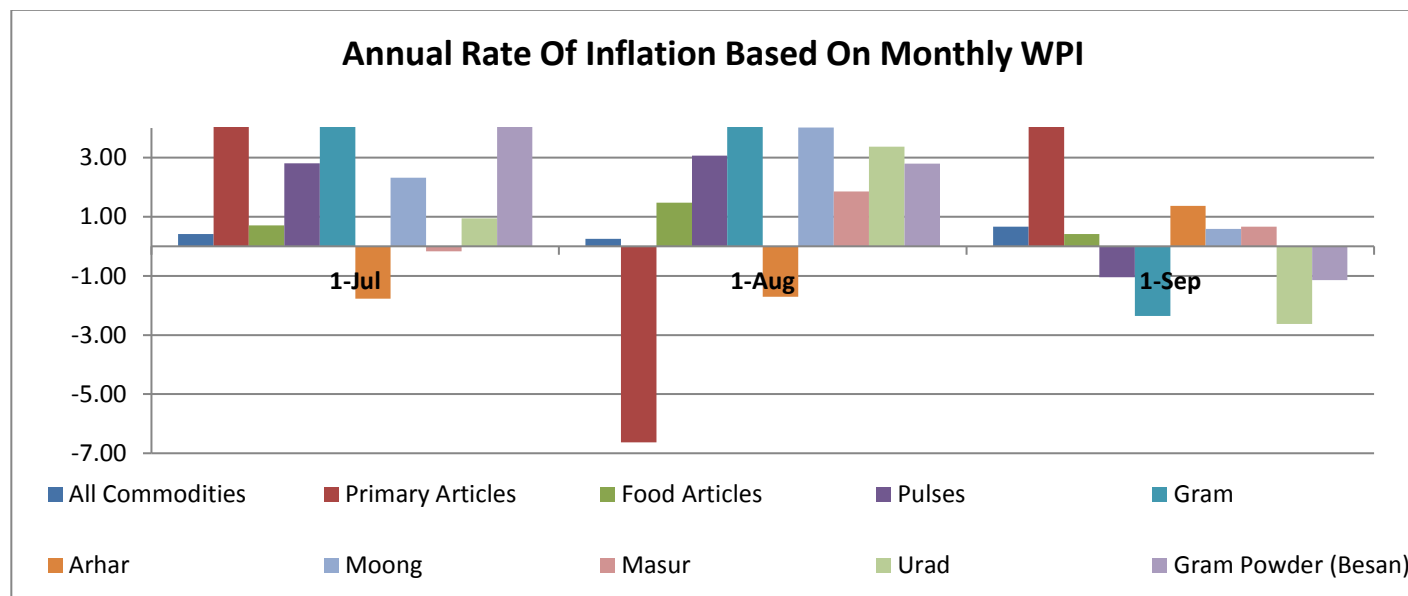

- Rabi pulses progressive sowing area coverage till 16 Nov-2018 was reported 69.96 lakh ha against normal of 141.07** in ongoing rabi season. Last year rabi acreage was 18 % higher than this year till date to 85.32 lakh ha. Chana area is running down by 21.52% to 50.23 lakh ha (last year 64.00 lakh ha). Normal area under chana is 89.45 lakh ha. Lentil area is running behind by 20.63 % to 6.81 lakh ha against 8.58 lakh ha last year till date. Normal area under lentil is 13.94 lakh ha. Even pea area is down by 12.04 % to 4.09 lakh against 4.65 lakh ha as on 16 Nov-2018. Normal area under pea is 9.34 lakh ha. However, Urad area is up by 7.69 % to 1.68 lakh ha against 1.56 lakh ha last year. Normal area under rabi urad is 8.13 lakh ha. Moong area is 30.56 % higher 0.47 lakh ha against 0.36 lakh ha so far. Normal area under rabi moong is 9.62 lakh ha.
- Stock of desi chana in Bikaner line is decreasing fast. Millers have brought maximum stock** offered in tenders at comparatively lower price from cash market. Area coverage is lagging behind and sowing condition is not good in Central, North and South India so far. Under these emerging conditions demand for chalani dal is increasing. It may drive cash market further up by 150- 250 from current level. Futures too are ruling at par with MSP. So, Agriwatch expects market to trade firm after a slight downward correction.
- Stock of urad at Indian port is down considerably and bulk import is not possible as stock in** Burma is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$630 and \$775 per MT basis Cif at Indian ports. Urad price in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets. Even supply from Katni line is lower than normal expectation. Traders-millers in Kanpur are active in Katni line. New crops far away right now so, Agriwatch expects market to improve once again.
- Tur market traded slightly lower due to selling of lemon tur by importers at lower rate.** Besides, millers too restricted buying in bulk that pushed cash market down by Rs100. But overall sentiments remain firm as incoming crop is not good yield-wise and production is bound to decline to 36-37 lakh tone this year. Nafed and other agencies would try to offload maximum stock at higher level. It would cap any hope for spike in the near term. However, medium term outlook remains firm despite import parity from Myanmar to some extent. India can't import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level.
- New crop of moong from rabi season is unlikely to be available before Feb.** Cost of moong from China and Uzbekistan is higher at around Rs 7700-7800 and Rs 6700-6800 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market and prices are increasing. However, Agriwatch expects market to decrease by Rs100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5300 while jodhpur line is being traded at Rs5800. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm. Moong procurement on MSP in many states and decision to stop selling through auction would remain supportive for moong market in Dec.
- Lentil market is expected to trade steady to firm. As of now, Import demand from Bangladesh is low as** Indian export quotes are high. Nepal is offering lentils at around \$800 per tonne for export to Bangladesh. Quality of Indian lentils is better than lentils offered by Nepal. However, there is no short supply in the market. Stake holders should buy on dip. Govt. has accepted the CACP recommendation of hike in Chana & Lentils MSP for Rabi marketing year 2019-20. Chana & Masur MSP has been increased from Rs 4400 & Rs 4250 to Rs 4620 & Rs 4475 per quintal respectively. Furthermore, an analysis of cost of production of Rabi crops shows that farmers will get a maximum return of 75.2 percent for gram and 76.7 percent for lentils.
- Peas market is expected to remain weak on lower demand at higher level despite lower stock at port.** Furthermore, government has increased restriction on pea until 31st December 2018.

International Market:

- **Global chickpea market continued to trade slightly weak due to ample availability of stock in exporters hand against actual demand from importers.** Quality issue with Canadian and some issues related to crop in Argentina could not support medium calibri chana. However, some extra demand emerged from the United States and other origins for better quality. As per Saskatchewan Agriculture estimate 58% of the province's chickpea crop will grade No 1 Canada, 37% No 2 Canada, and 5% No 3 Canada or worse. Last year, roughly 78% chickpeas graded No 1 and 22% No 2 in Canada. This means availability of poor quality crop would be higher.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Lentil Production in Canada is expected to decline by 15.31 % from 25.59 to 21.67 lakh tonne** in 2018-19. Import has been estimated same as last year at 35,000 MT. Despite lower production carryout is expected to decrease slightly from 8.76 to 8 lakh tonne. Even area is expected to decline by 14.47 % to 15.25 lakh ha. It was 17.83 lakh ha last year. Yield has been estimated to remain same as last year at 1.44 tonne per ha. Export may increase by 16.88 % to 18 lakh tonne in 2018-19. It was 15.40 lakh tonne in 2017-18. Prices are likely to hinge in the range of \$370 to 400 per MT
- **Agriculture department of Canada has estimated 1% higher yield than Statistics Canada.** the major difference has been seen in lentil production fig. Unofficial estimate points 23.7 lakh MT production for lentil, which is almost 6% higher than Statistics Canada. harvesting of all pulses is almost over now. Efforts of more export to other countries than India might be seen in coming weeks. Higher production estimate may cap uptrend in global lentil market in coming weeks
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71 % to 14.62 lakh ha in 2018-19.** it was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.
- **Myanmar exported around 7 lakh tonne pulses and beans in last six months beginning from April-2018** despite restricted buying by Indian importers. Till August, India imported pulses and beans from Myanmar under restricted quota and considering the ample availability in domestic market, India is not going to allow pulses import beyond limit with certain conditions/licence to import according to Min Ko Oo, secretary of Myanmar Pulses, Beans & Sesame Seeds Merchants Association.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually.** This year Myanmar might be able to export 12 lakh tonne pulses and beans. Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

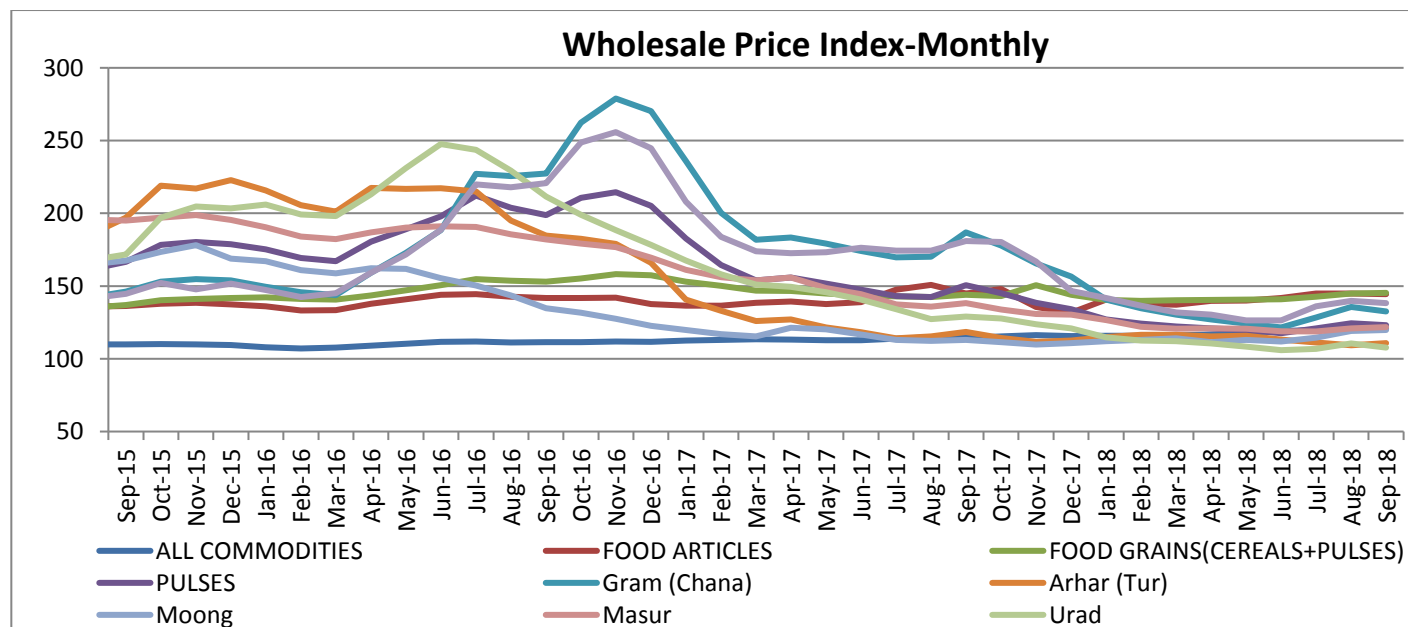

Weekly Outlook: -Pulses prices are likely to trade range bound.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 1.3point from 124.5in Aug to 123.2.in Sep-2018.

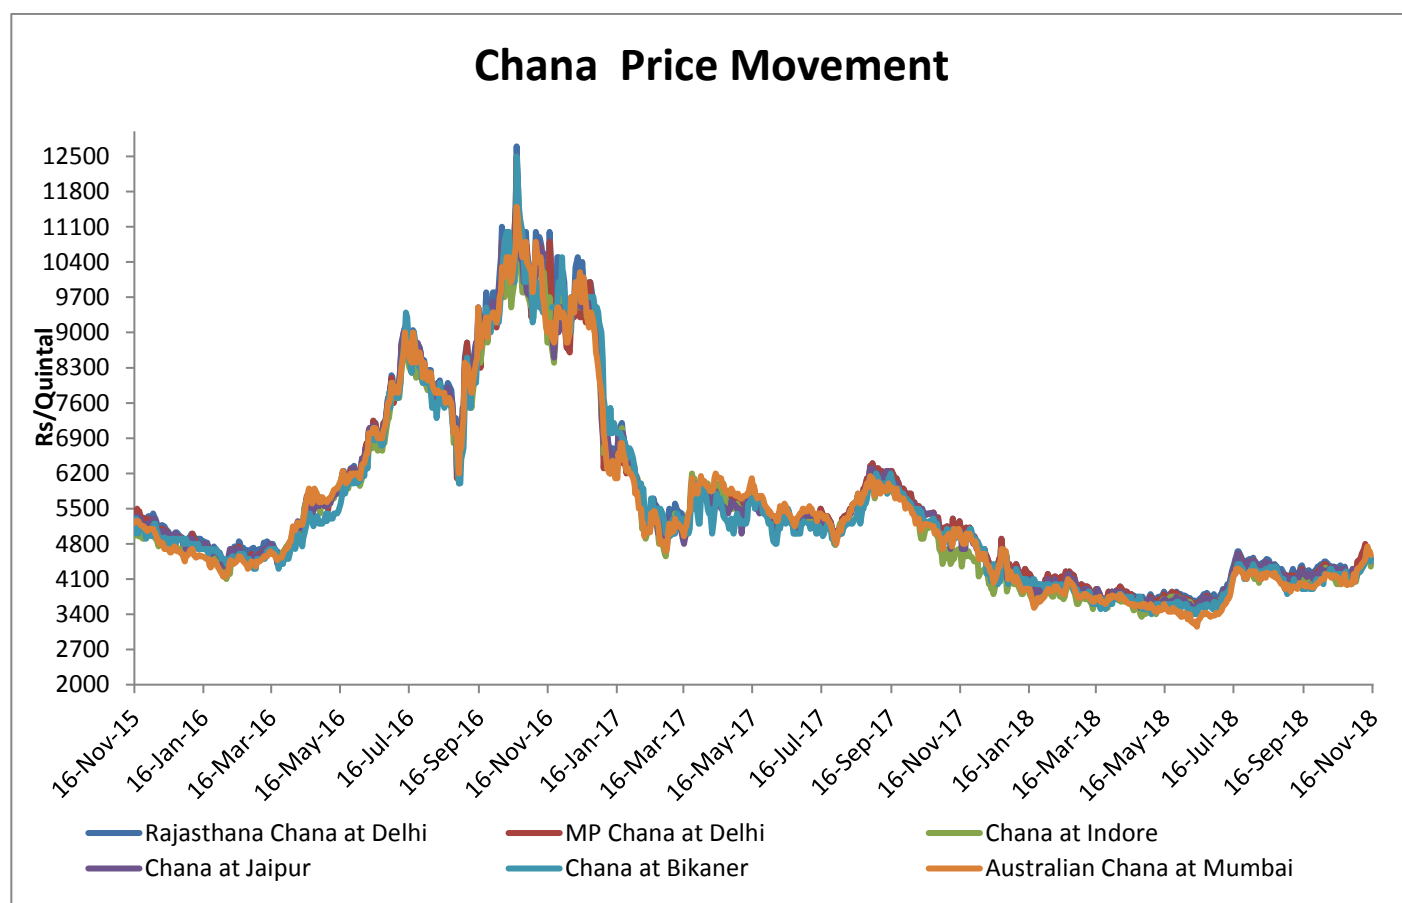

Pulses-Wise Scenario:

Chana

Current Scenario:

Stock of desi chana in Bikaner line is decreasing fast. Millers have brought maximum stock offered in tenders at comparatively lower price from cash market. Area coverage is lagging behind and sowing condition is not good in Central, North and South India so far. Under these emerging conditions demand for chalani dal is increasing. It may drive cash market further up by 150- 250 from current level after correction of Rs 100 from current level. Futures too are ruling at par with MSP. So, Agriwatch expects market to trade firm after a slight downward correction.

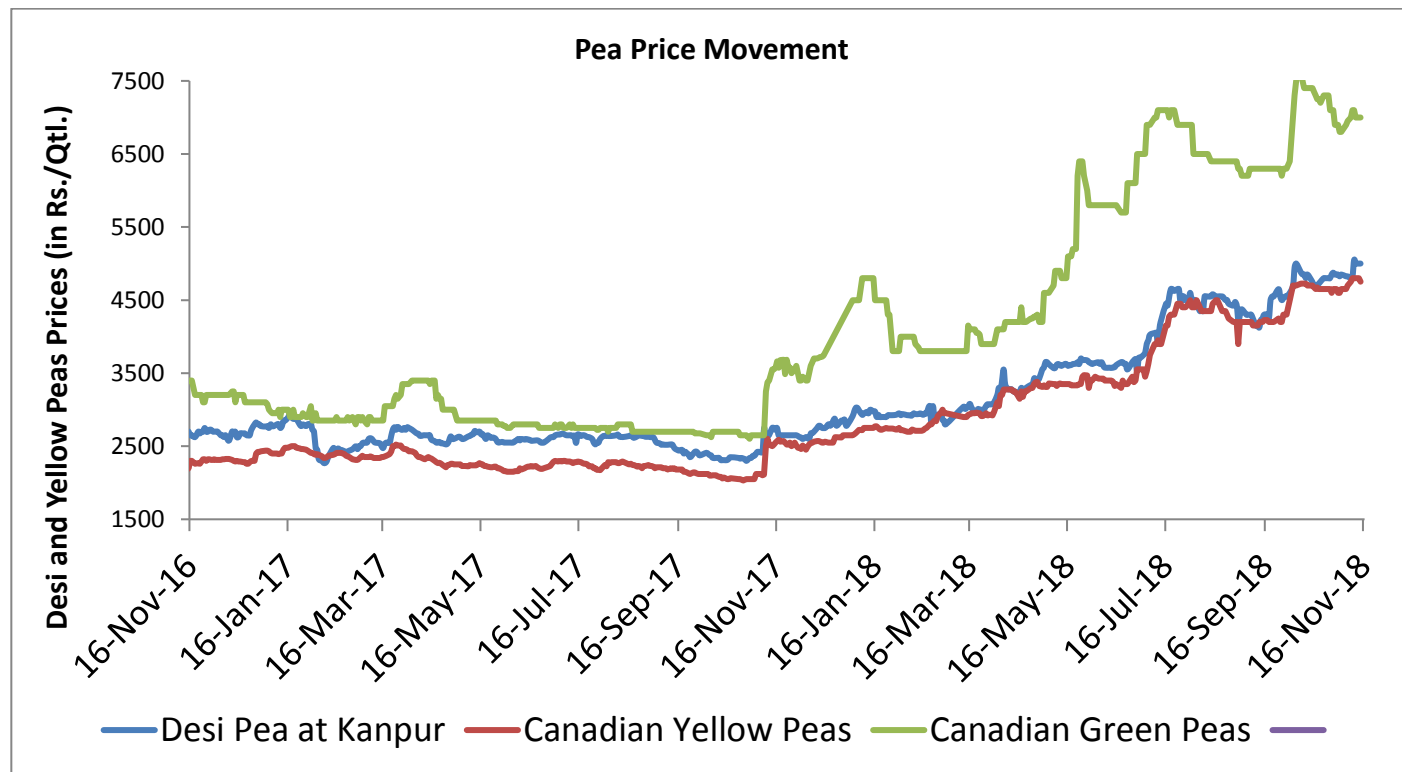

All India average price for Chana increased by 2.98 percent from Rs 4423 to 4555 per qtl. Australian Chana price too moved up by 4.60 % to Rs 4655 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade firm this week too.

Peas (Matar):

Market Recap:

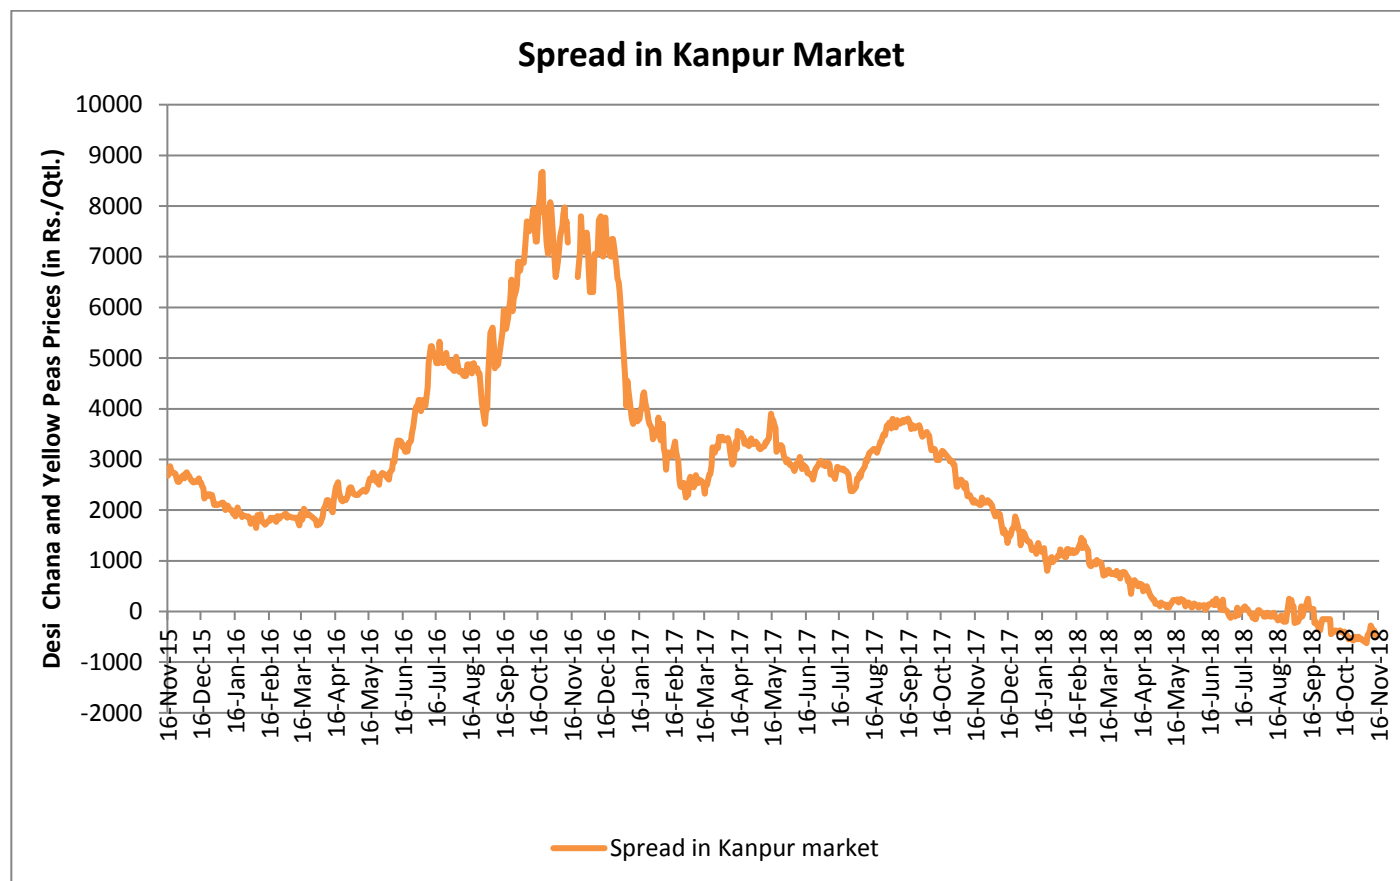

Pea prices moved slightly down despite decreasing stock at ports and decreasing chana price. Demand got affected at higher level. As stock is lower and chana price is expected to move up, matar price too would move up in tandem with chana price. Stock available in domestic market and at ports is said to be lower than consumption till Dec. So stake holders should buy and hold stock. Firmness in pea market depends on chana price movement. Area in MP, UP and other states is lagging behind by 12.04% to 4.09 lakh ha so far. Overall tone remains firm in the medium term

Current Market Dynamics & Outlook:

Pea traded at Rs 4750-4800 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th Dec-2018. So, stake holders should buy after downward correction and hold it for the level of 5000..

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite smart gains in chana price. Spread is expected to move in the negative range of 350 to 550 per quintal in Nov on relative movement in Chana prices. Overall outlook seems range bound.

MarketOutlook: Outlook remains steady to slightly weak

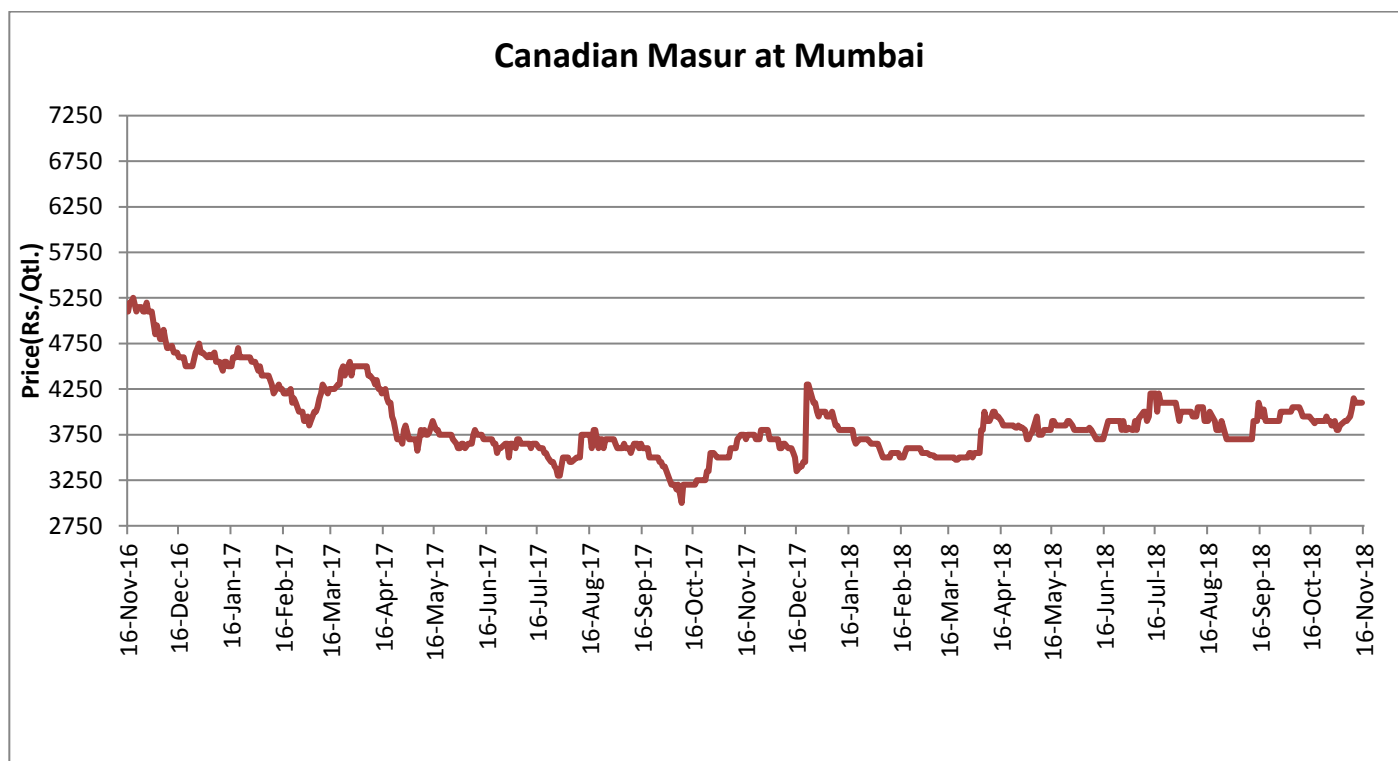

Lentils (Masoor):

Market Recap:

Area coverage is lagging behind in the initial state of sowing It may pick up in Nov. Masur market is likely to trade firm in coming weeks. demand is expected to improve in Nov As per trade Sources, India has exported 1000.45 MT of Lentil at an average FoB of \$821.65 per tonne during the month of September -2018 compared to 711.75 MT at an average FoB of \$893.78 per tonne in August-2018. Vessel (Sea Breeze) with 32350.00 tonnes of lentil is at berth for discharge. The vessel Sea Breeze is at berth since 04th October 2018. Despite continuous import, Lentil market is expected to move steady to firm on expectation of import duty hike and export incentive in Oct. Import quantity remains restricted amid hope of improvement in demand due to festive season. As there is plenty of stock lying in NAFED godowns, any major spike is unlikely.. Mediumterm outlook remains firm.

Current Scenario:

In Nov 2nd week-2018, average price in key market Kanpur was up by 0.75 % to Rs 3950-4000 per qtl. Prices are likely to trade steady to slightly firm in Nov to a certain extent. Other pulses too remain supportive for lentil market:

Market Outlook: Prices are likely to notice range bound movement.

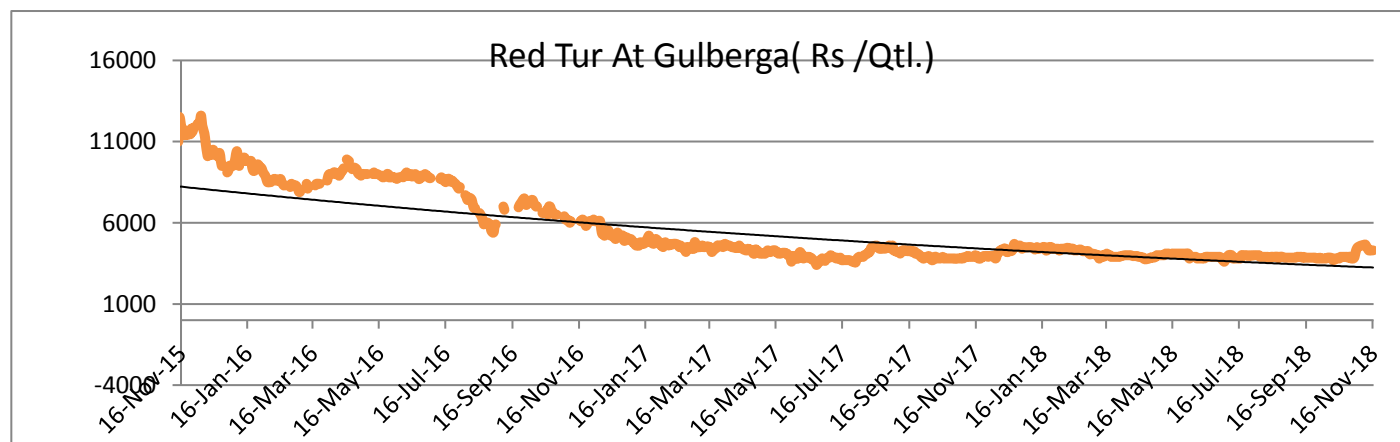

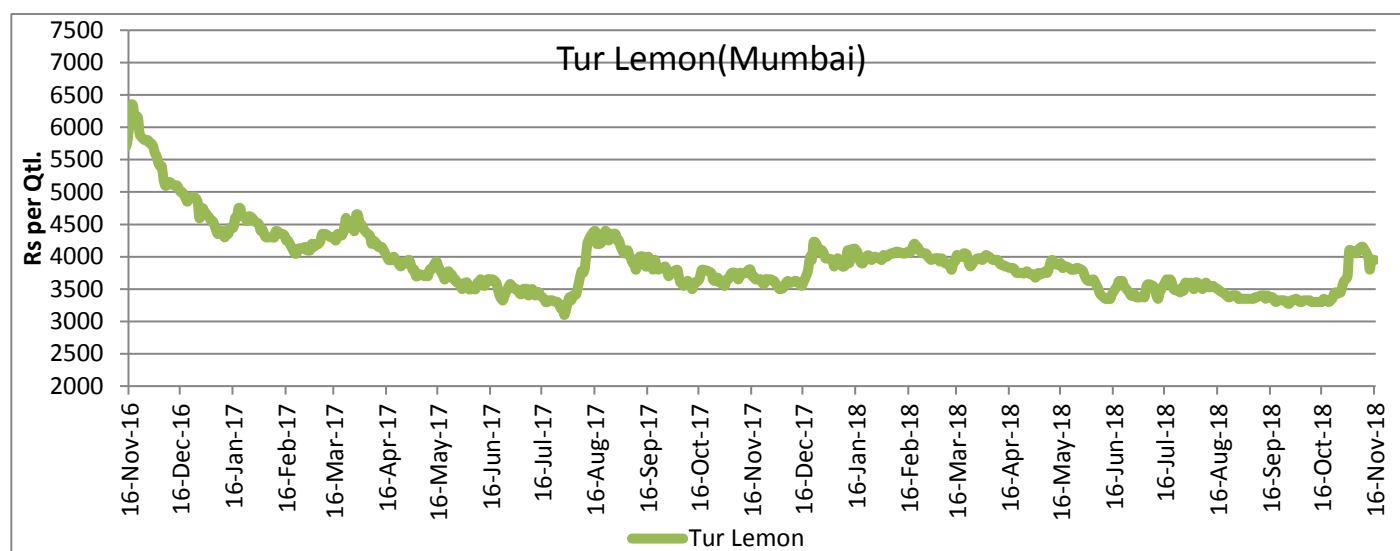

Pigeon Pea (Tur/Toor):

Market Recap:

Tur market traded slightly lower due to selling of lemon tur by importers at lower rate. Besides, millers too restricted buying in bulk that pushed cash market down by Rs100. But overall sentiments remains firm as incoming crop is not good yield-wise and production is bound to decline to 36-37 lakh tone this year. Nafed and other agencies would try to offload maximum stock at higher level. It would cap any hope for spike in the near term. However, medium term outlook remains firm despite import parity from Myanmar to some extent. India can't import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675). Burma offered lemon tur new & old at \$520 per tonne basis Indian port. Linkely was offered at \$535 per tonne basis Indian port. Overall trend seems weak

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid festive demand and fear of lower yield may push market further up. Govt may procure higher quantity this year. Buy on dip.

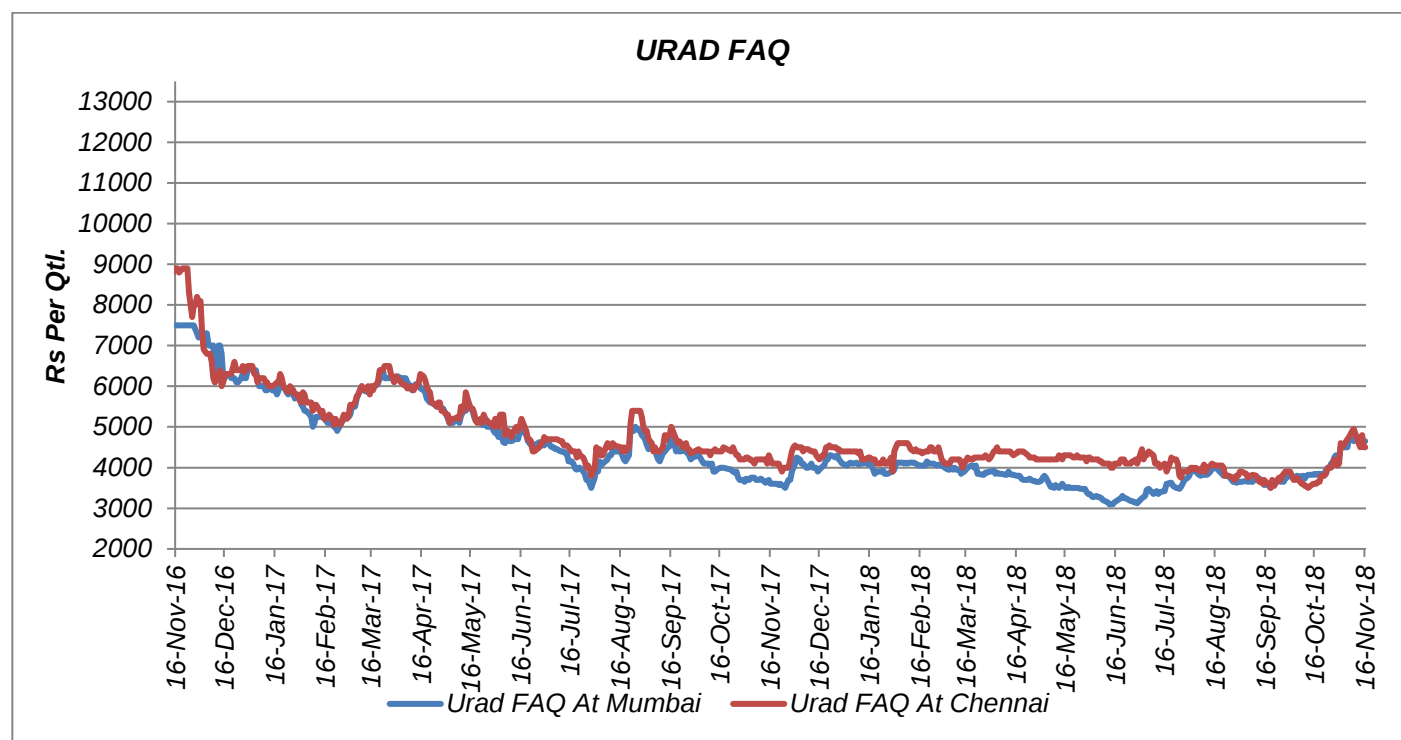

Black Matpe (Urad):

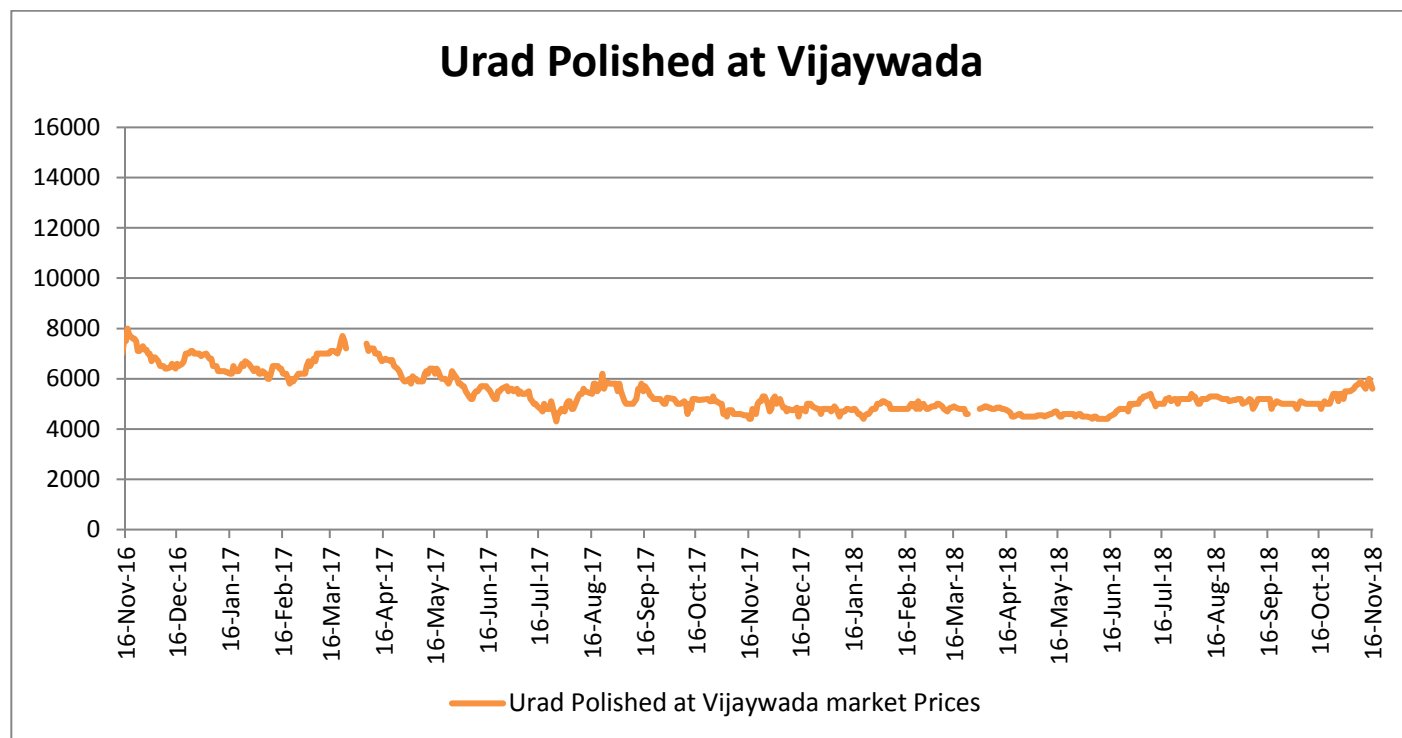

Stock of urad at Indian port is down considerably and bulk import is not possible as stock in Burma is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$630 and \$775 per MT basis Cif at Indian ports. Urad price in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets. Even supply from Katni line is lower than normal expectation. Traders-millers in Kanpur are active in Katni line. New crops far away right now so, Agriwatch expects market to improve once again. Stake holders should buy on dip.

Rabi Urad area is up by 7.63 % to 1.58 lakh ha from last year as on 16th Nov-2018. Weather remains unfavorable. So production is expected to decrease further this year amid restricted import.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4650 per Qtl.) and Chennai (Rs.4500-4550 Qtl.) noticed weak tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market once again after slight correction. The following graph shows the price movement in different markets:-

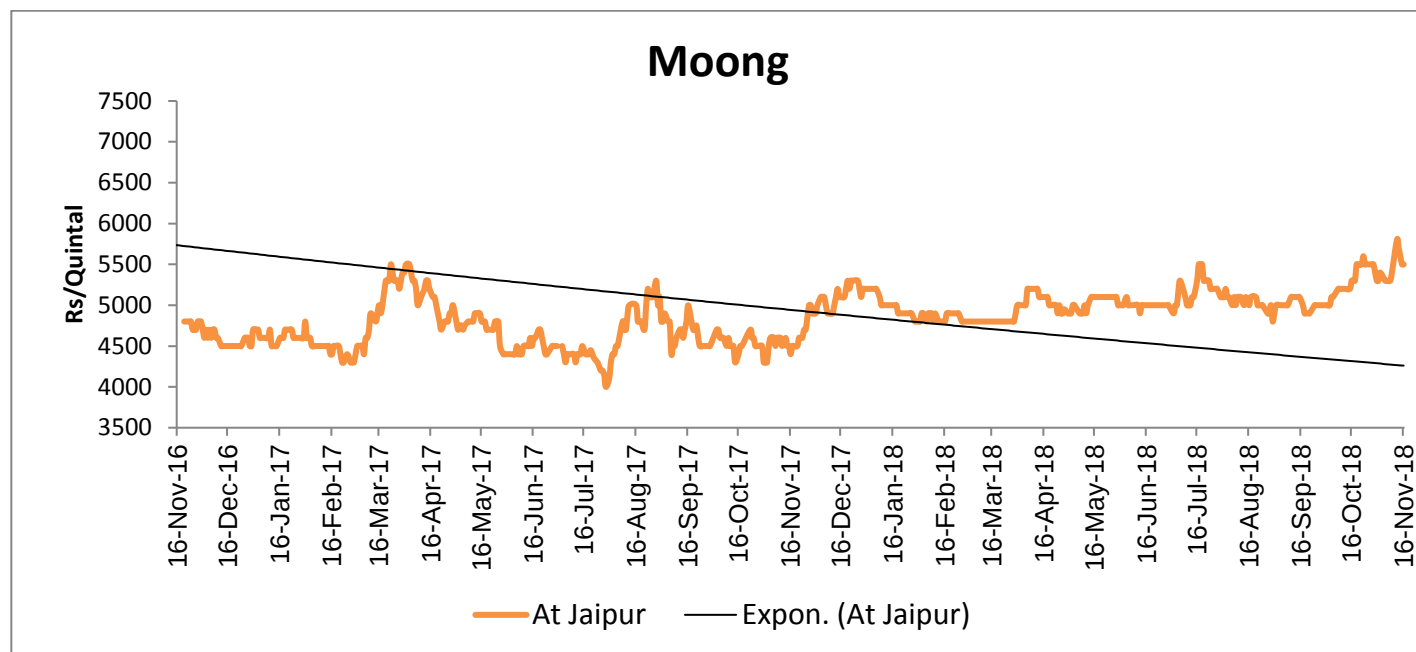

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Ujbekistan is higher at around Rs 7700-7800 and Rs 6700-6800 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market and prices are increasing. However, Agriwatch expects market to decrease by Rs100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5300 while jodhpur line is being traded at 5800. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm. Moong procurement on MSP in many states and decision to stop selling through auction would remain supportive for moong market in Dec.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Nov.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4400 to 4700 levels in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4450 with the first target of 4600 and second target 4650 with stop loss at 4400 level.

Delhi Chana Physical :

Support & Resistance				
S2	S1	PCP	R1	R2
4500	4600	4500	5000	5250

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this month taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4650- 4900 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 4700 with the first target of 4850 and second target 4900 with stop loss at 4650 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4500	4650	4750	5000	5200

**Masoor:****Desi Masoor (at Kanpur) Spot Market Weekly Chart:**

Outlook –Steady to firm movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3850-4100

Strategy: Buy on dip

Trade Recommendations: Buy around 3900 with the first target of 4000 and second target 4150 with stop loss at 3850 level.

Support & Resistance
