Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- Rabi pulses progressive sowing area coverage till 22nd Nov-2018 was reported 88.66 lakh ha against normal of 140.84** in ongoing rabi season. Last year rabi acreage was 10.45 % higher than this year till date to 99.01 lakh ha. Chana area is running down by 12.96 % to 62.65 lakh ha (last year 71.98 lakh ha). Normal area under chana is 89.45 lakh ha. Lentil area is running behind by 9.07 % to 10.22 lakh ha against 11.24 lakh ha last year till date. Normal area under lentil is 13.77 lakh ha. Even pea area is down by 7.53 % to 5.77 lakh against 6.24 lakh ha as on 22 Nov-2018. Normal area under pea is 9.33 lakh ha. However, Urad area is up by 2.89 % to 1.78 lakh ha against 1.73 lakh ha last year. Normal area under rabi urad is 8.14 lakh ha. Moong area is 10.42 % higher 0.53 lakh ha against 0.48 lakh ha so far. Normal area under rabi moong is 9.62 lakh ha
- Tur market is likely to trade up due to private trades active buying sensing lower than expected** crop size, higher procurement ahead of Lok Sabha election (May-2019) and increasing quotes in Myanmar. Weather report too is not favorable for late sown crop. Market participants say that stock of old stock is coming down and supply-demand side is finding balance now. As demand for dalis likely to increase, market is unlikely to trade lower. Govt would start procuring Tur at MSP, so prices of Tur may move up by Rs 500 from current level in the medium term. Sentiments in cash market remains firm. Tur in Gulberga market is being traded at Rs 4200-4500 per qtl. New crop started hitting in Sholapur and Karnataka. Pressure of new arrival is expected from mid Dec. India can't import beyond 3 lakh tone upto Mar-2019. It has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level.
- Urad cash market is likely to trade up once again as buyers are active amid procurement by govt. 's agencies.** Stock of urad at Indian port is down considerably and bulk import is not possible as stock in Burma is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$630 and \$770 per MT basis Cif at Indian ports. Urad price in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets too. Even supply from Katni line is lower than normal expectation. It would continue to support cash market in coming weeks.
- Moong market stayed steady due to lower supply in the cash market.** Farmers and stockists are unwilling to sell stock at current price amid ongoing procurement drive in various states. Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Uzbekistan is higher at around Rs 7600-7700 and Rs 6600-6700 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market. However, Agriwatch expects market to decrease by Rs 100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs 5200-5250 while Jodhpur line is being traded at Rs 5700. Moong in Jaipur market is being traded at Rs 5500. Overall tone in moong market remains firm. Myanmar too has increased CiF quote from \$750 to \$760 in last one week. Availability in Burma is lower too. Overall sentiments remain firm.
- Chana area is likely to decrease as sowing is running behind amid moisture stress prevailing in the field.** Farmers have covered 13% lower area under chana to 62.65 lakh ha as on 22nd Nov-2018 against 71.98 last year till date. In AP area is 33% lower to 1.83 lakh ha against 2.76 lakh ha last year so far. Normal area under chana in AP is 4.50 lakh ha. As sowing is almost over in AP, any major change in area is unlikely. Production in AP is bound to decrease this year. Major producers like Maharashtra, Karnataka, MP and UP, it is running behind by 36.9, 18.8, 4.0 & 2.8 % to 6.55, 9.91, 26.54 & 4.23 lakh ha respectively. However, area coverage in Rajasthan increased by 1.7 % to 11.11 lakh ha. Normal area under chana is 89.45 lakh ha. Area under chana is likely to cross normal level but would be lower by 10 lakh ha from previous year. So production size is bound to decrease and it would continue to support chana price in cash market.
- Crop size of lentil is expected to be lower due to lower seeding, weak monsoon and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED sold 36452.57 MT of masoor at an average price of Rs 3382.09 per quintal until 16th November-2018. NAFED has balance of 197986.75 tonnes and 6953.50 tonnes

in Madhya Pradesh and Uttar Pradesh respectively. NAFED would like to sell as much quantity as it can to make space for fresh procurement in rabi season. Agriwatch expects lentils to remain in uptrend in near future.

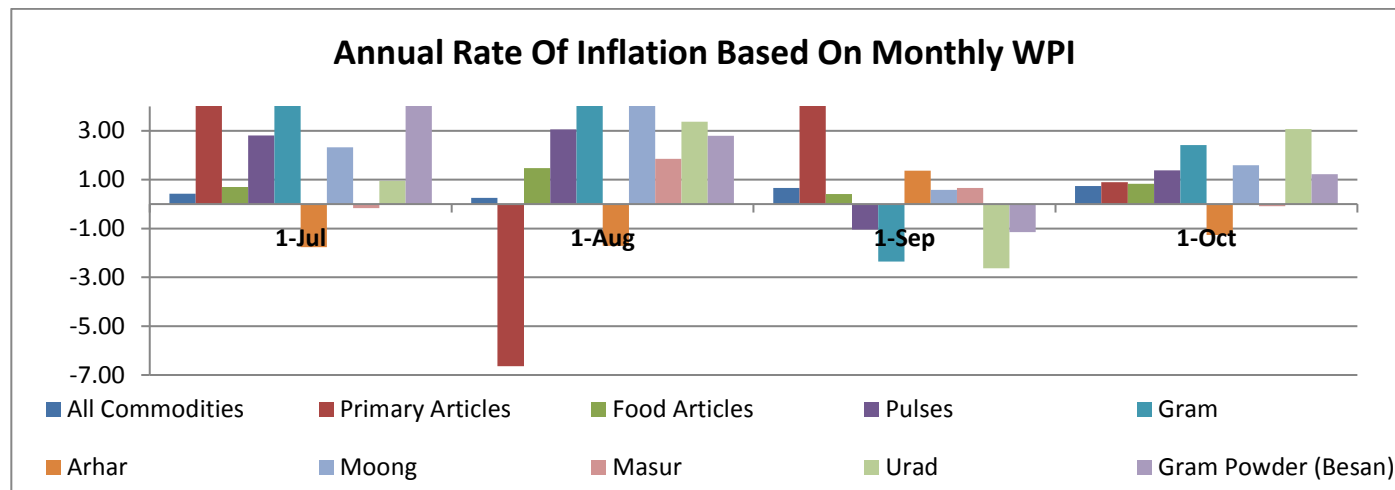

International Market:

- Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- Lower area coverage in Saskatchewan and Alberta which contributes 96% pea production in Canada,** may reduce pea production by 9 % to 3.7 million tonne for MY 2018-19. In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US has been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- Global chickpea market continued to trade slightly weak due to ample availability of stock in exporters hand** against actual demand from importers. Quality issue with Canadian and some issues related to crop in Argentina could not support medium calibre chana. However, some extra demand emerged from the United States and other origins for better quality. As per Saskatchewan Agriculture estimate 58% of the province's chickpea crop will grade No 1 Canada, 37% No 2 Canada, and 5% No 3 Canada or worse. Last year, roughly 78% chickpeas graded No 1 and 22% No 2 in Canada. This means availability of poor quality crop would be higher.
- USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. it was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India is out of global market right now due to ample availability of pulses in India.

- Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans. Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

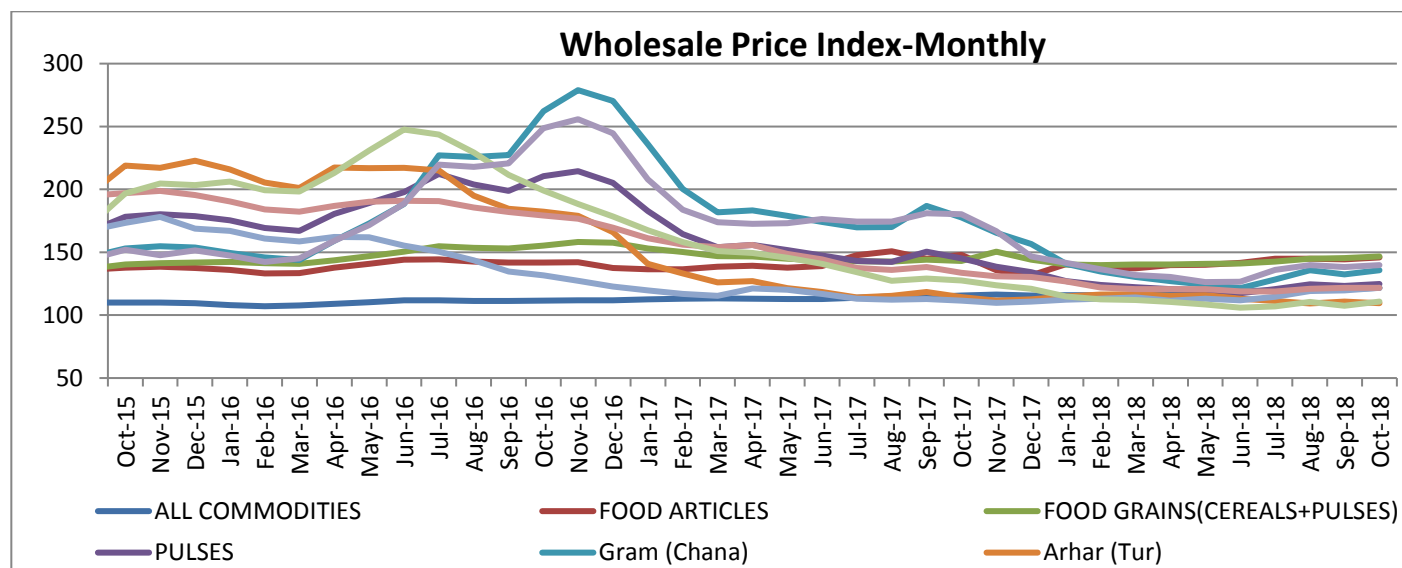

Weekly Outlook: -Pulses prices are likely to trade steady to firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1.7 point from 123.2 in Sep to 124.9 in Oct-2018.

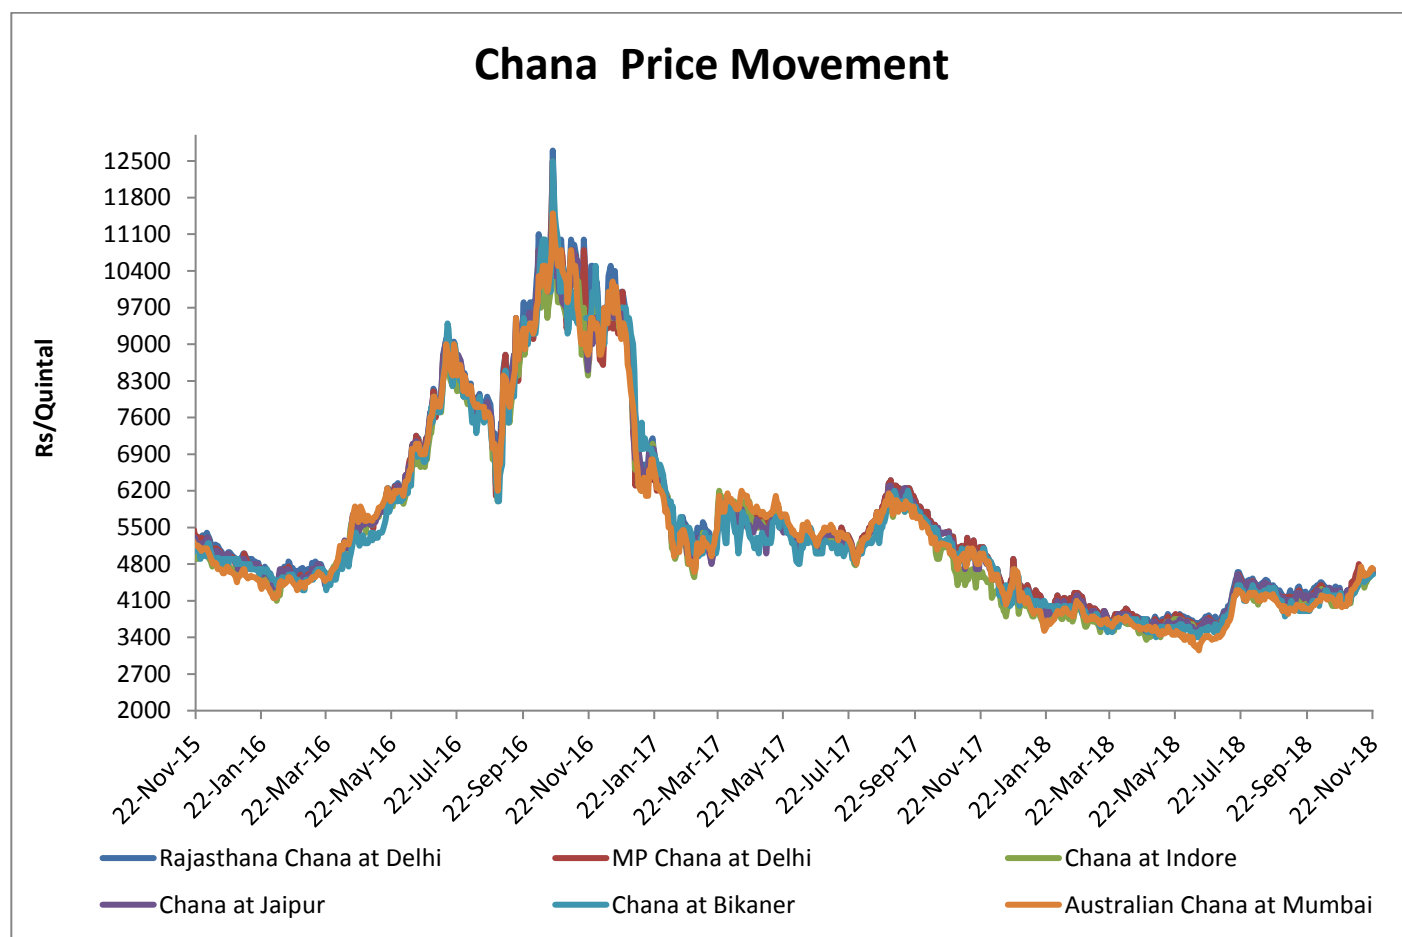

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash market traded up on the back of good demand and increasing fear of lower crop size this year. Chana area is likely to decrease as sowing is running behind amid moisture stress prevailing in the field. Farmers have covered 13% lower area under chana to 62.65 lakh ha as on 22nd Nov-2018 against 71.98 last year till date. Besides, weather condition is not good. Dec and Jan weather condition remains crucial for chana price. Import is costly due to 70% duty and govt is unlikely to decrease import duty until Lok Sabha election is over in May-2019. Overall, sentiment remains firm in Chana market. However, stock in central pool and its regular release would restrict any unexpected spike in chana market.

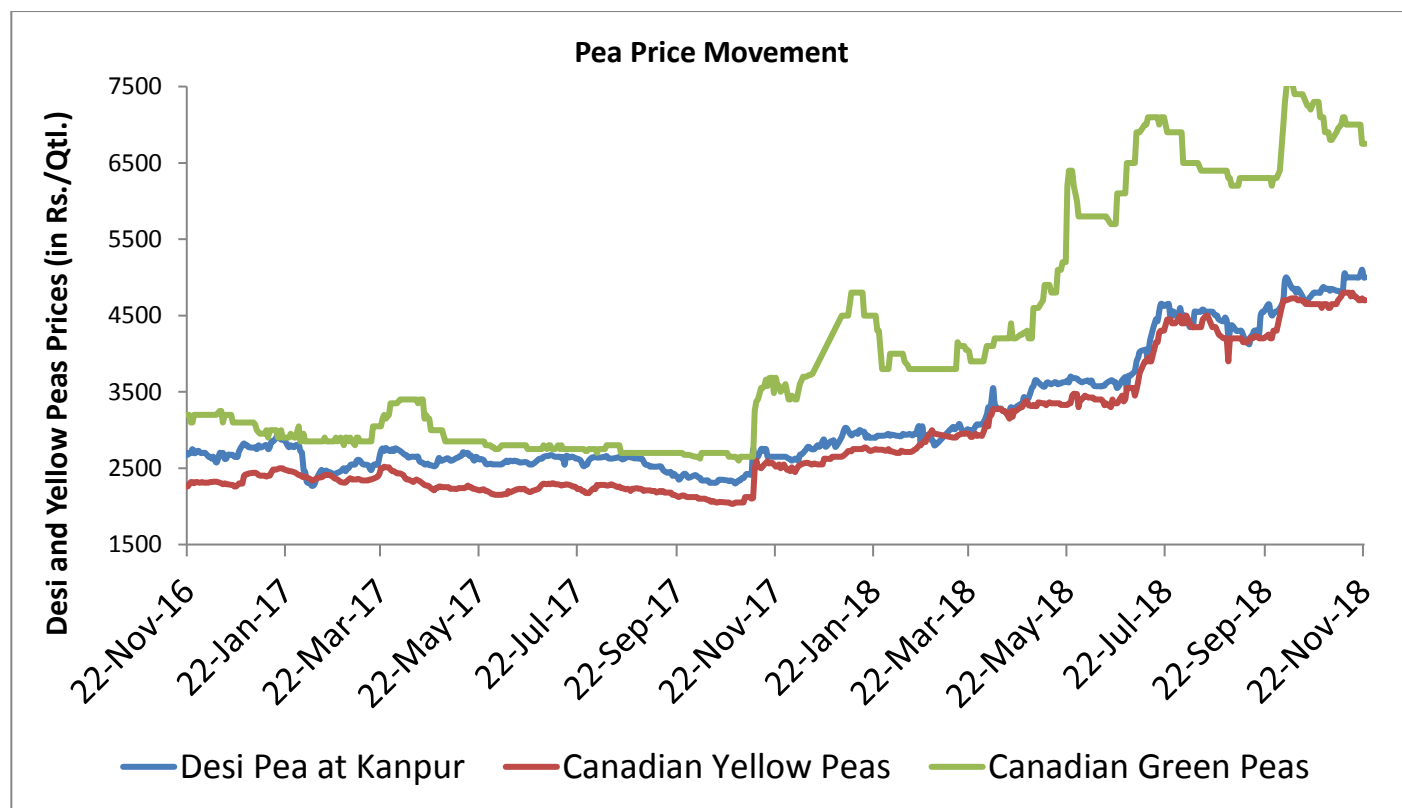

All India average price for Chana increased by 1.00 percent from Rs 4555 to 4610 per qtl. Australian Chana price too moved up by 0.60 % to Rs 4675 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade firm this week too.

Peas (Matar):

Market Recap:

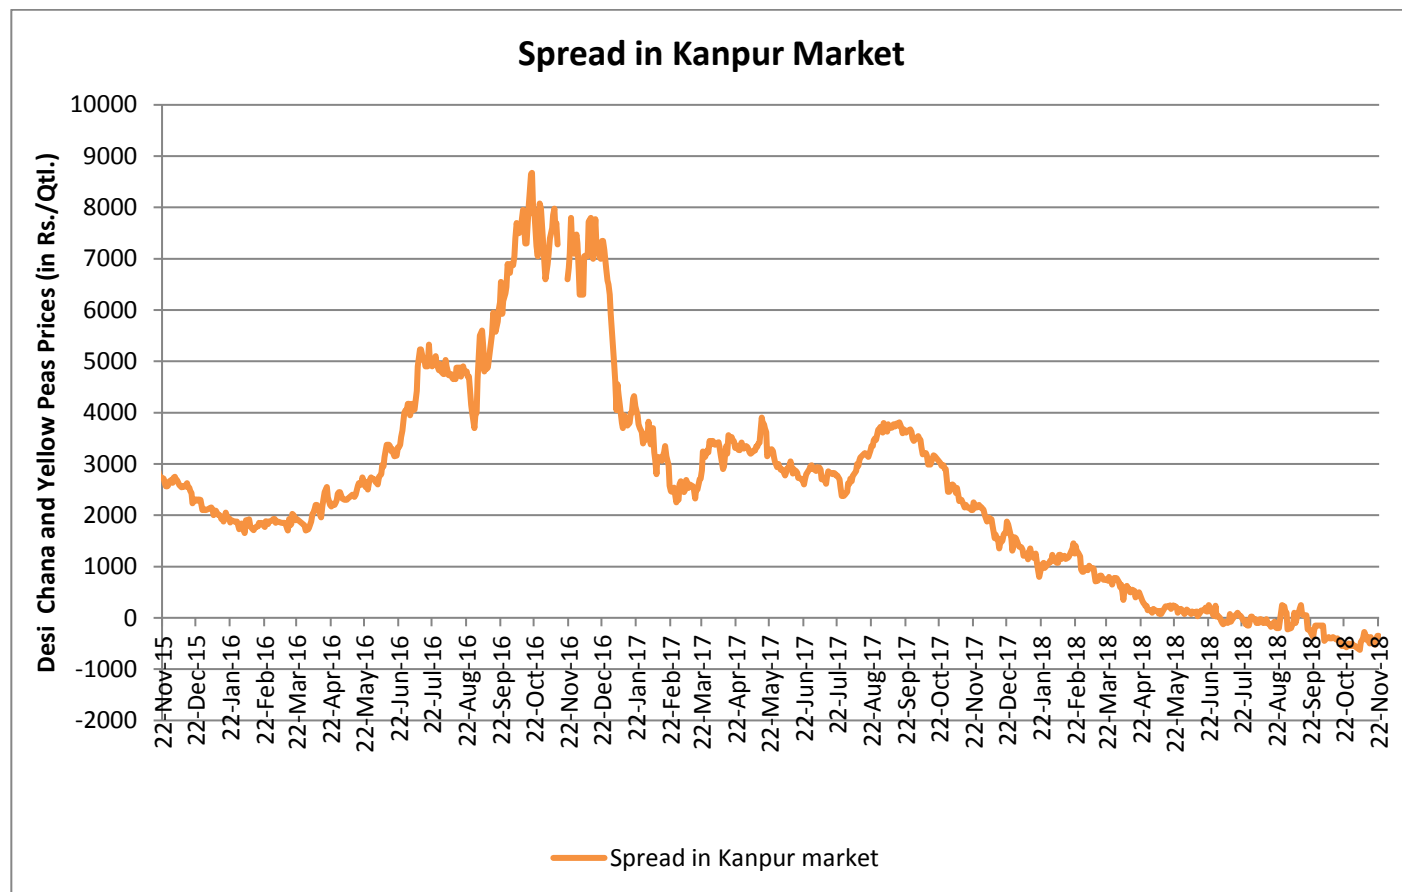

Pea prices moved slightly down despite decreasing stock at ports and increasing chana price. Demand got affected at higher level. As stock is lower and chana price is expected to move up, matar price too would move up in tandem with chana price. Stock available in domestic market and at ports is said to be lower than consumption till Dec. So stake holders should buy and hold stock. Firmness in pea market depends on chana price movement. Area in MP, UP and other states is lagging behind by 7.53% to 5.77 lakh ha so far. Overall tone remains firm in the medium term.

Current Market Dynamics & Outlook:

Pea traded at Rs 4650-4700 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th Dec-2018. So, stake holders should buy after downward correction and hold it for the level of 5000..

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite smart gains in chana price. Spread is expected to move in the negative range of 350 to 550 per quintal in Nov on relative movement in Chana prices. Spread is likely to stay steady this week.

Market Outlook: Outlook remains steady to slightly weak

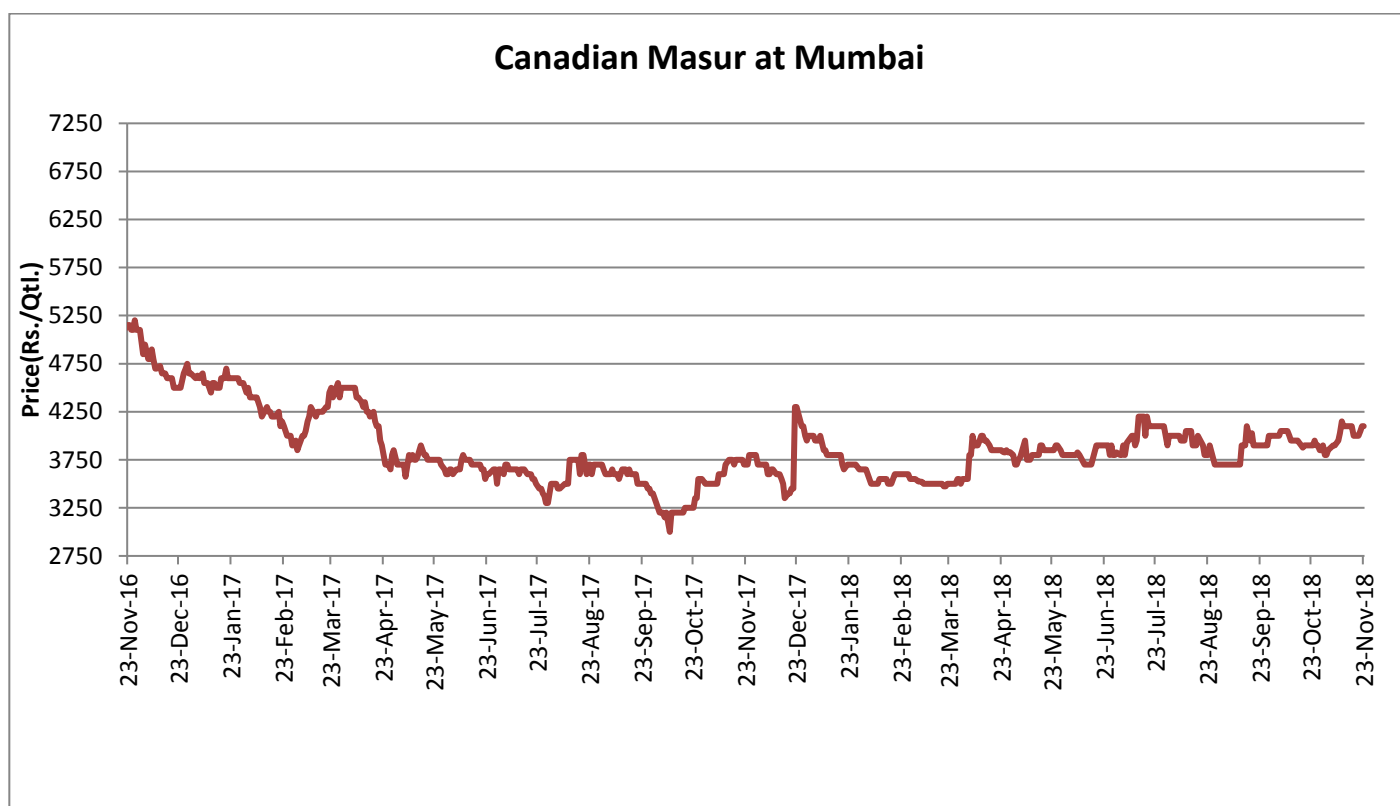

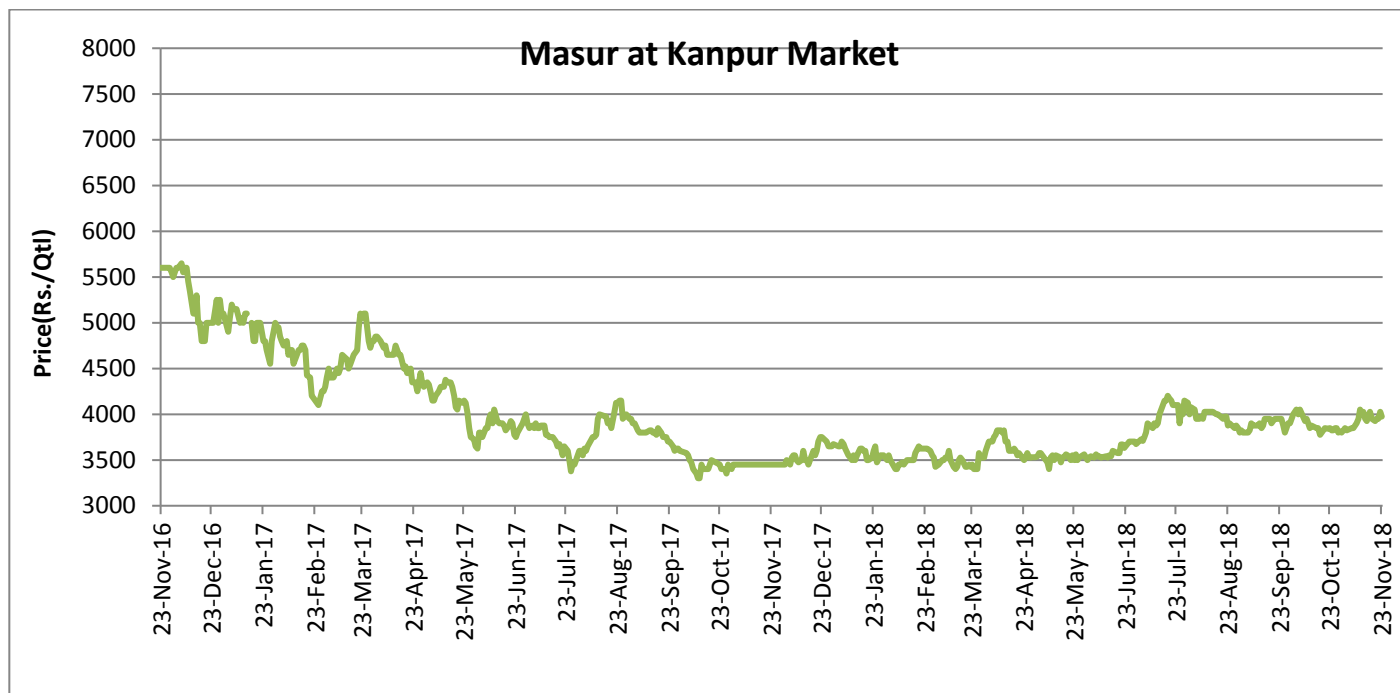

Lentils (Masoor):

Market Recap:

Lentil area is lagging behind by 9.07 to 10.22 lakh haso far. As stockists are unwilling to sell stock at current price, market is expected to move up further in coming weeks. India imported 58689 MT lentil in Oct against 25663.7 MT in Sep-2018. It exported 910.67 MT lentil in Oct against 1000.45 MT in Sep at an average monthly price of \$877.81 (export) & \$386.21 per MT (Import). India imported total 125022 MT lentil from Mar to Oct-2018. It exported 11665.31 MT during the same period. As demand is likely to improve as other pulses prices are moving up, lentil may trade firm in coming weeks.

Current Scenario:

In Nov 3rd week-2018, average price in key market Kanpur was up by 0.25 % to Rs 3975-4000 per qtl. Prices are likely to trade steady to slightly firm in Nov to a certain extent. Other pulses too remain supportive for lentil market:

Market Outlook: Prices are likely to notice steady to firm movement.

Pigeon Pea (Tur/Toor):

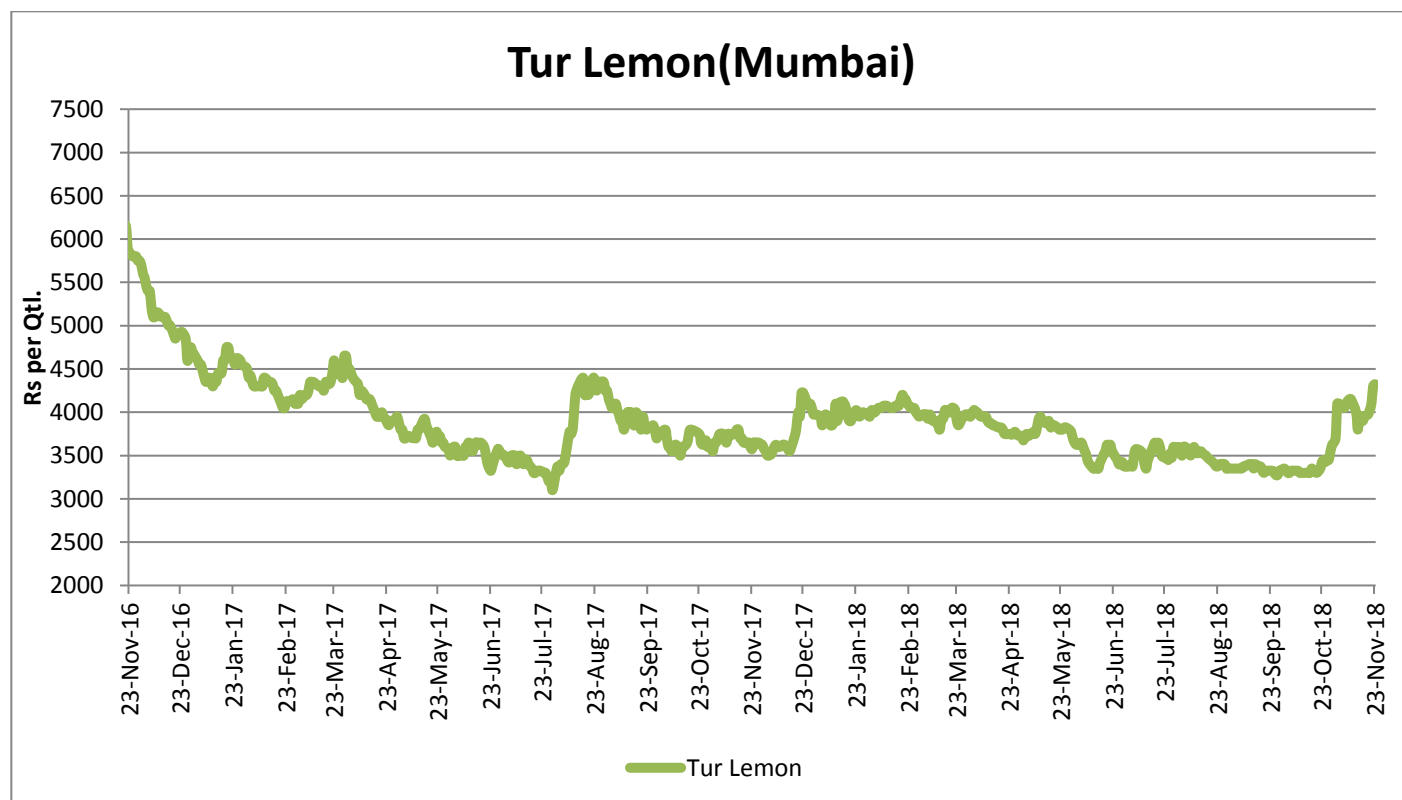

Market Recap:

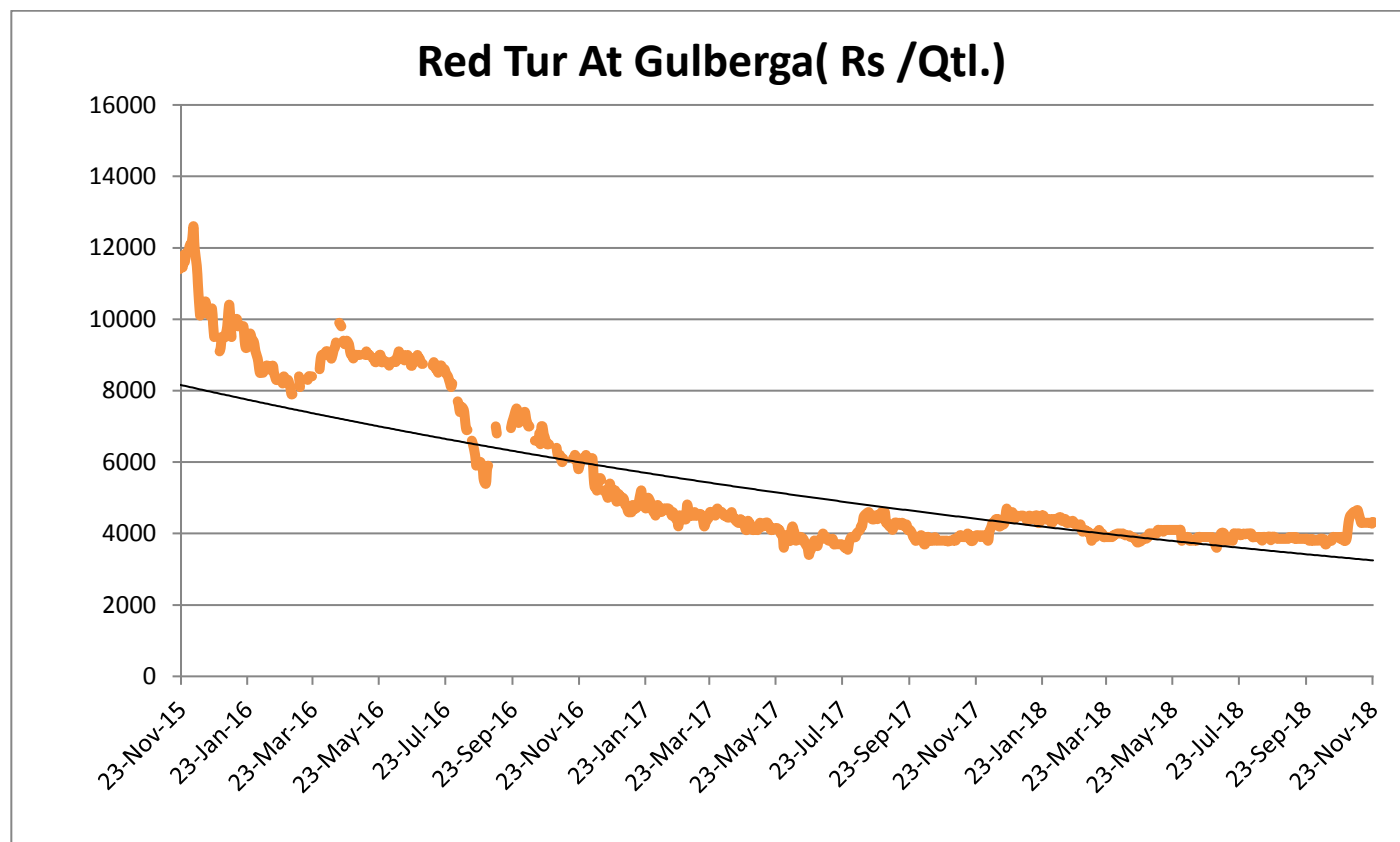

Tur market is likely to trade up due to private trades active buying sensing lower than expected crop size, higher procurement ahead of Lok Sabha election (May-2019) and increasing quotes in Myanmar. Weather report too is not favorable for late sown crop. Market participants say that stock of old stock is coming down and supply-demand side is finding balance now. As demand for dalis likely to increase, market is unlikely to trade lower. Govt would start procuring Tur at MSP, so prices of Tur may move up by Rs 500 from current level in the medium term. Sentiments in cash market remains firm. Tur in Gulberga market is being traded at Rs 4200-4500 per qtl. New crop started hitting in Sholapur and Karnataka. Pressure of new arrival is expected from mid Dec.

India can't import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs 5675). Burma offered lemon tur new & old at \$520-25 per tonne basis Indian port. Linkely was offered at \$530 per tonne basis Indian port. Overall trend seems firm.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid festive demand and fear of lower yield may push market further up. Govt may procure higher quantity this year. Buy at lower level is good for stake holders.

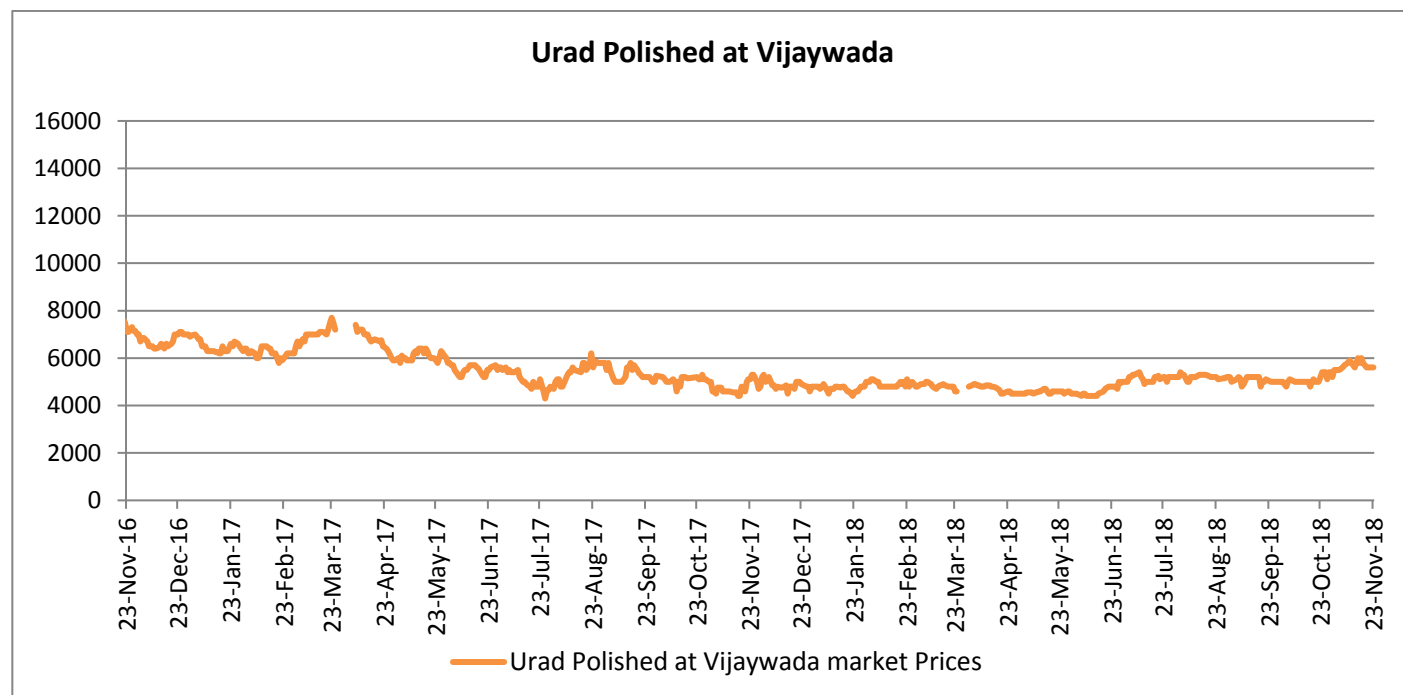

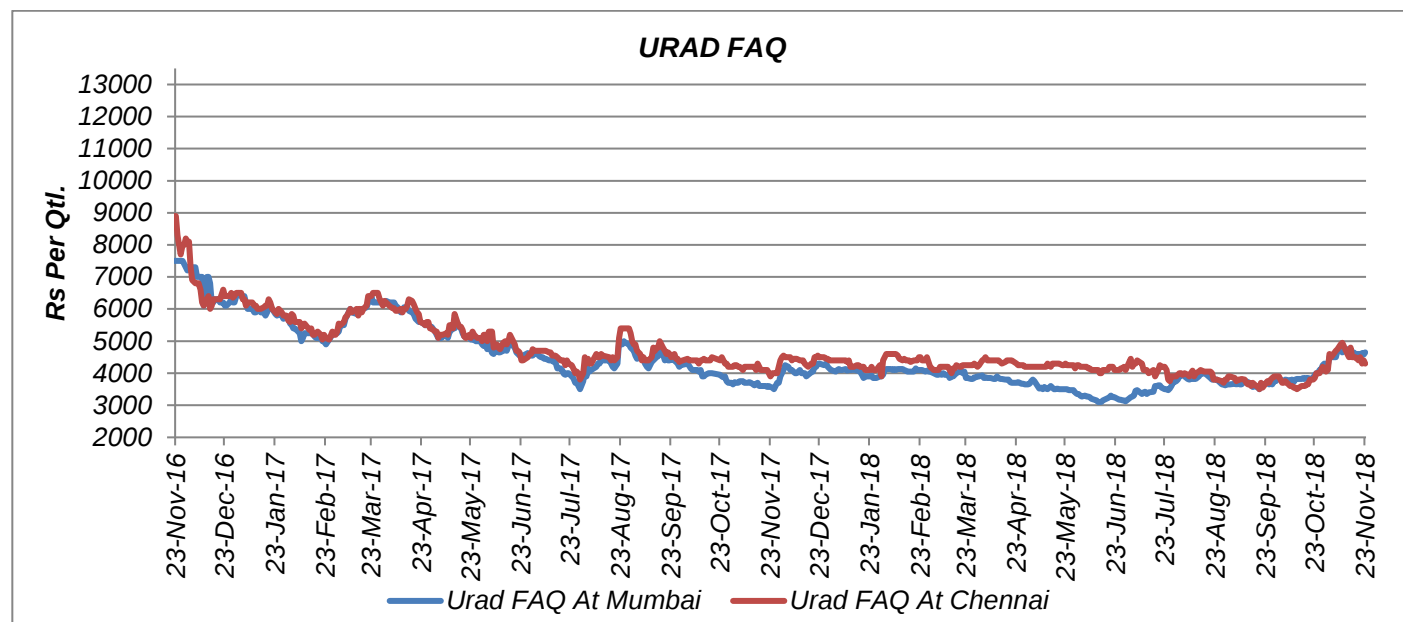

Black Matpe (Urad):

Urad cash market is likely to trade up once again as buyers are active amid procurement by govt.'s agencies. Stock of urad at Indian port is down considerably and bulk import is not possible as stock in Burma is said to be lower and quotes are increasing continuously there. Burma is offering urad FAQ and SQ at \$6350 and \$78075 per MT basis Cif at Indian ports. Urad price in Latur and Udgir line is higher and it is being consumed locally. So supply is tight in other markets too. Even supply from Katni line is lower than normal expectation. It would continue to support cash market in coming weeks. Traders-millers in Kanpur are active in Katni line. New crops far away right now so, Agriwatch expects market to improve once again. Moisture stress in the field and resultant affected sowing would remain supportive to cash market in the near to medium term.

Analysing the situation exporters in Myanmar have increased quotes to \$65045 & \$78075 per MT for FAQ and SQ respectively. Agriwatch expects market to move up from current level during the period of procurement. As govt agencies have stopped auction, it too would support Urad market in coming weeks. Overall outlook remains firm for Urad. Rabi Urad area is up by 7.69 % to 1.68 lakh ha from last year as on 22nd Nov-2018. Weather remains unfavorable. So production is expected to decrease further this year amid restricted import.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs.4650per Qtl.) and Chennai (Rs.4500-4550Qtl.) noticed steady tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week.

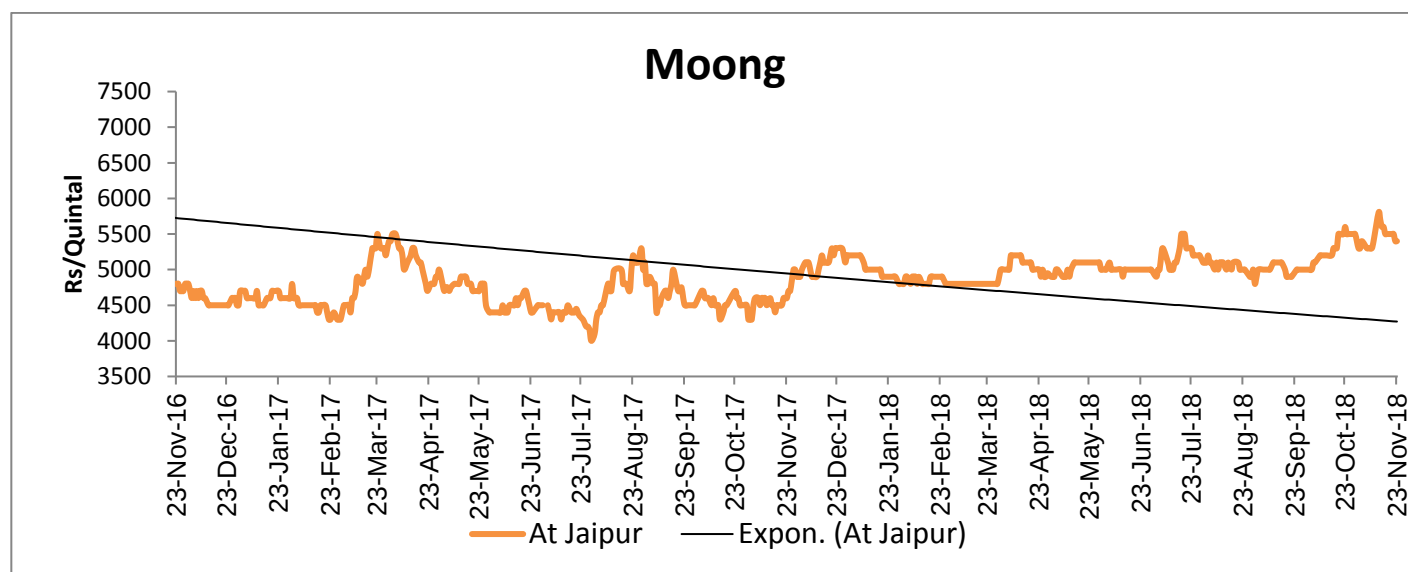

Green Gram (Moong):

Market Recap:

Moong market stayed steady due to lower supply in the cash market. Farmers and stockists are unwilling to sell stock at current price amid ongoing procurement drive in various states. Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Uzbekistan is higher at around Rs 76700-77800 and Rs 66700-67800 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market. and prices are increasing. However, Agriwatch expects market to decrease by Rs100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs52300-5250 while Jodhpur line is being traded at 57800. Moong in Jaipur market is being traded at Rs 55400. Overall tone in moong market remains firm. Moong procurement on MSP in many states and decision to stop selling through auction would remain supportive for moong market in Dec.

Myanmar too has increased CiF quote from \$7540 to \$7650 in last one week. Availability in Burma is lower too. Overall sentiments remain firm. Moong procurement on MSP in many states and decision to stop selling through auction would remain supportive for moong market in Dec.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.
