Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- Rabi pulses area decreased by 12.40 % at 101.90 lakh ha against 116.33 lakh ha last year as on 30 Nov-2018.** Chana area is lagging by 15.13% at 70.46 lakh ha against 83.02 last year. Farmers have covered 6.83% lower area under lentil so far at 12.68 lakh ha against 13.61 lakh ha last year. Pea area is lower by 6.62 % at 6.63 lakh ha. Urad area is lagging by 7.06 % at 2.37 lakh ha against 2.55 lakh ha last year. area too is lower by 13.64% at 0.76 lakh ha against 0.88 lakh ha so far. Overall area may decline further as fields are facing moisture stress and it would impact final rabi crop size. See sowing table on page no 13
- Despite ups & downs in futures market, chana cash market traded steady to slightly firm,** getting support from fear of lower crop size and decreasing stock of imported chana. Stockists are unwilling to sell chana at current price. Import remains costly and lower import from Sep-Nov hints at upward movement of market. Weather remains uncertain and moisture stress in growing regions like MP, Mah ,Kar & Raj, may affect yield of the standing crop due to improper growth of the plant. Production is likely to decrease 10 to 15 % from last year. Dec-Jan remain very crucial for chana price trend. Under current situation chana is bound to touch 5000 in Delhi market. As there is plenty of stock lying with Nafed, releasing strategy of Nafed in Dec-Jan may cap chana market beyond 5000 level. If prices shoot up beyond 5000 level, govt has option to reduce import duty to check any unexpected gains. Overall trend in chana seems firm. Buying at current prevailing price seems riskless.
- Lower tur crop size (36.21 lakh tonne) against 38.67 lakh tonne last year may help market to move further up** amid active buying in Gulberga at Rs4650-4750 from new crop. Arrival in Gulberga was recorded at 300 bags and it would pick up further from 15th Dec. Stock in central pool too has decreased considerably and supply –demand side seems balanced right now. Govt.s procurement drive is expected from 20th Dec and it would push tur price further up. Millers are active, sensing shortfall next year. Myanmar has increased quotes again by \$20 to \$570 per MT basis Indian port. Demand is good for dal and selling from private trades remains restricted ahead of new crop. Overall sentiments remains firm. India cannot import beyond 3 lakh tone upto Mar-2019. It has already imported over 2 lakh tone tur from Mar 2018 to Sep-2018. So, importers can import only 1 lakh ton more beyond March-2019. So Agriwatch expects cash market to move up from current level.
- Urad cash market traded lower due to imported stock and its selling at discounted price** at ports. Besides, higher import than allocated quota too remains bearish factor despite good demand in domestic market. Now commerce ministry has decided to check imported urad brought on the back of stay order by Madras High Court. Importers took advantage of stay order and continued to import beyond limit set by govt. So, further import in bulk volume is not possible now, as stern action may be taken against importers by commerce ministry. Re- hearing on this matter is expected on 17th Dec. Lower production prospects in rabi season, rough weather condition and procurement drive may support urad cash market once again if Madras high court's decision goes in favor of govt. In Chennai market, Urad FAQ is being traded at Rs4250 to Rs4450 per qtl. Cash market may trade steady to slightly firm in coming weeks. Demand is good from mills
- Moong market stayed steady due to lower supply in the cash market. Farmers and stockists are** unwilling to sell stock at current price amid ongoing procurement drive in various states. Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Ujbekistan is higher at around Rs 7600-7700 and Rs 6600-6700 per qtl respectively. Availability of moong in Myanmar too is lower. So millers are active in local market. However, Agriwatch expects market to decrease by Rs100-150 from current level, as mill may restrict buying for some time. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5200-5250 while Jodhpur line is being traded at Rs5500-5600. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm.
- Crop size of lentil is expected to be lower due to lower seeding, weak monsoon and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED sold 36452.57 MT of masoor at an average price of Rs 3382.09 per quintal until 16th November-2018. NAFED has balance of 197986.75 tonnes and 6953.50 tonnes

in Madhya Pradesh and Uttar Pradesh respectively. NAFED would like to sell as much quantity as it can to make space for fresh procurement in rabi season. Agriwatch expects lentils to remain in uptrend in near future.

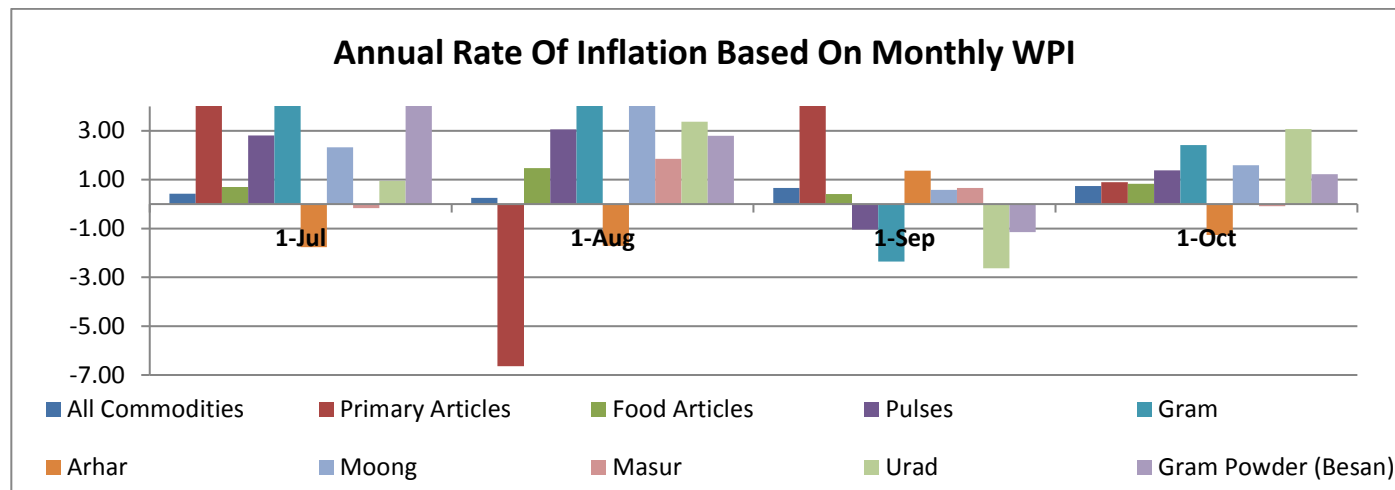

International Market:

- **Global lentil markets showed some sign of improvement led by good demand for red and green lentil in the first opening quarter and inner tone remains strong.** Due to restriction, pea import is unlikely to continue in India till Dec. As long as India maintains quantitative limits on pea imports, lentils are the cheapest pulses, which can be freely imported. Area under lentil in India is 6.83 % lower than last year to 12.68 lakh ha so far. So demand is expected to improve and it may push up price in coming weeks.
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in FY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in FY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Global field pea markets traded firm on the back of likely good buying for export, during the first quarter of 2019.** This has contributed to firming export asking prices. Market tone has also been helped by the reduction in surplus stocks because of shipments to China's livestock feed industry.
- **Lower area coverage in Saskatchewan and Alberta which contribute 96% pea production in Canada, may reduce pea production by 9 % at 3.7 million tonne for FY 2018-19.** In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US have been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current FY.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. It was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

- Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans. Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

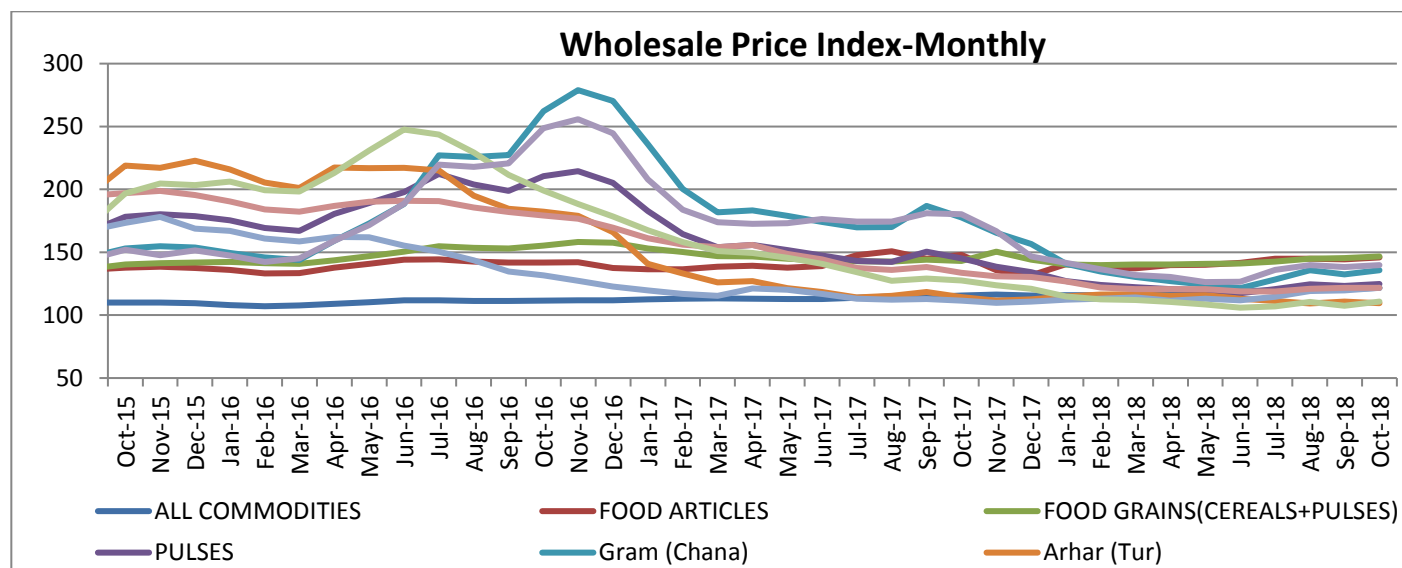

Weekly Outlook: -Pulses prices are likely to trade steady to firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1.7 point from 123.2 in Sep to 124.9 in Oct-2018.

Pulses-Wise Scenario:

Chana

Current Scenario:

Despite ups & downs in futures market, chana cash market traded steady to slightly firm getting support from fear of lower crop size and decreasing stock of imported chana. Stockists are unwilling to sell chana at current price. Import remains costly and lower import from Sep-Nov hints at upward movement of market. Weather remains uncertain and moisture stress in growing region like MP, Mah, Kar & Raj may affect yield of the standing crop due to improper growth of the plant. Production is likely to decrease 10 to 15 % from last year. Dec-Jan remain very crucial for chana price trend. Under current situation chana is bound to touch 5000 in Delhi market. As there is plenty of stock lying with Nafed, so releasing strategy of Nafed in Dec-Jan may cap chana market beyond 5000 level. If prices shoots up beyond 5000 level, govt has option to reduce import duty to check any unexpected gains. Overall trend in chana seems firm.

All India average price for Chana increased by 0.24 percent from Rs 4610 to 4625 per qtl. However, Australian Chana price moved down by 0.78 % to Rs 4595 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade firm after a slight downward correction this week.

Peas (Matar):

Market Recap:

Pea prices moved slightly down, despite decreasing stock at ports and increasing chana price. Demand was affected at higher level. As stock is lower and chana price is expected to move up, matar price too would move up in tandem with chana price. Stock available in domestic market and at ports is said to be lower than consumption till Dec. So, stake holders should buy and hold stock. Firmness in pea market depends on chana price movement. Area in MP, UP and other states is lagging by 6.62 % to 6.63 lakh ha so far. Overall tone remains firm in the medium term

Current Market Dynamics & Outlook:

Pea traded at Rs 4650-4750 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th Dec-2018. So, stake holders should buy after downward correction and hold it for the level of 5000..

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite smart gains in chana price. Spread is expected to move in the negative range of 250 to 450 per quintal in Dec on relative movement in Chana prices. Spread is likely to stay steady this week.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Lentil area is lagging behind by 6.83 % to 12.61 lakh ha so far. As stockists are unwilling to sell stock at current price, market is expected to move up further in coming weeks. India imported 58689 MT lentil in Oct against 25663.7 MT in Sep-2018. It exported 910.67 MT lentil in Oct against 1000.45 MT in Sep at an average monthly price of \$877.81 (export) & \$386.21 per MT (Import). India imported total 125022 MT lentil from Mar to Oct-2018. It exported 11665.31 MT during the same period. Global market has improved on expectation of higher demand from India. As demand is likely to improve as other pulses prices are moving up, lentil may trade firm in coming weeks.

Current Scenario:

In Nov 4th week of Nov-2018, average price in key market like Kanpur was up by 2.66 % to Rs 4041 per qtl. Prices are likely to trade steady to slightly firm in Dec to a certain extent. Other pulses too remain supportive for lentil market:

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice steady to firm movement.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur market is likely to trade up due to active buying by private traders, sensing lower than expected crop size, higher procurement ahead of Lok Sabha election(May-2019) and increasing quotes in Myanmar. Weather report too is not favorable for late sown crop. Market participants say that old stock is depleting and supply-demand side is finding balance now. As demand for dal is likely to increase, market is unlikely to trade lower. Govt would start procuring Tur at MSP, so prices of Tur may move up to the level of Rs 5000 from current level in the medium term. Sentiments in cash market remains firm. Tur in Gulberga market is being traded at Rs 4700-4800 per qtl. New crop has started hitting Sholapur and Karnataka. Pressure of new arrival is expected from mid Dec.

.India cannot import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from mar2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid festive demand and fear of lower yield may push market further up. Govt may procure higher quantity this year. Buy at correction is good for stake holders.

Black Matpe (Urad):

Urad cash market traded lower due to imported stock and its selling at discounted price at ports. Besides, higher import than allocated quota too remains bearish factor despite good demand in domestic market. Now commerce ministry has decided to check imported urad brought on the back of stay order by Madras High Court. Importers took advantage of stay order and continued import beyond limit set by govt. So, further import in bulk volume is not possible now, as stern action may be taken against importers by commerce ministry. Lower production prospects in rabi season, rough weather condition and procurement drive may support urad cash market once again. In Chennai market Urad FAQ is being traded at Rs4250 to Rs4450 per qtl. Cash market may trade steady to slightly firm in coming weeks. Demand is good from mill.

Analysing the situation, exporters in Myanmar have increased quotes to \$650&780 per MT for FAQ and SQ respectively. Agriwatch expects market to move up from current level during the period of procurement. As govt agencies have stopped auction, it too would support Urad market in coming weeks. Overall outlook remains firm for Urad.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4500-.4550per Qtl.) and Chennai (Rs.4300-4350Qtl.) noticed weak steady tone. It traded steady in Vijaywada too. Steady to firm movement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

Moong market traded steady due to lower supply in the cash market. Farmers and stockists are unwilling to sell stock at current price amid ongoing procurement drive in various states. Besides, New crop of moong from rabi season is unlikely to be available before Feb. Cost of moong from China and Ujbekistan is higher at around Rs 7560 and Rs 6600 per qtl. respectively. Availability of moong in Myanmar too is lower. So, millers are active in local market. However, Agriwatch expects market to decrease by Rs 100-150 from current level as mill may restrict buying for some times. They have fulfilled their immediate requirements. Ranchi line moong is being traded at Rs5250-5325 while Jodhpur line is being traded at Rs5570-5600. Moong in Jaipur market is being traded at Rs 5400. Overall tone in moong market remains firm. Myanmar too has increased CiF quote from \$715 to \$725 in last one week.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.
