Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

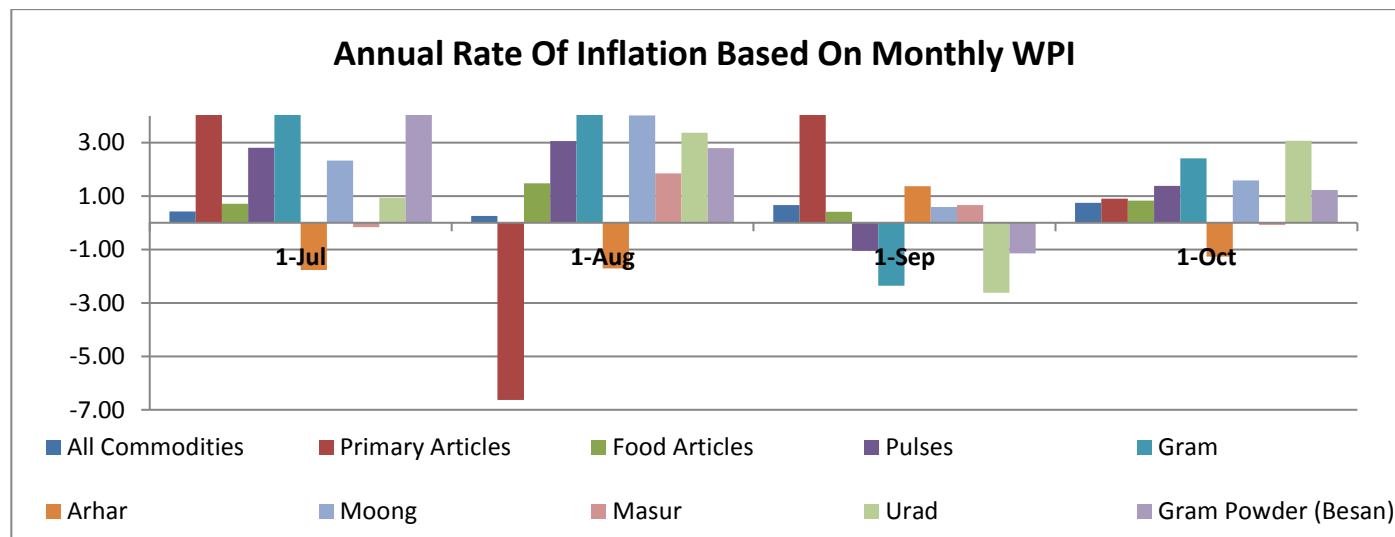

- Rabi pulses area decreased by 10.33 % at 113.69 lakh ha against 126.78 lakh ha last year as on 7th Dec-2018.** Chana area is lagging by 13.12 % at 77.27 lakh ha against 88.94 last year. Farmers have covered 5.55 % lower area under lentil so far at 13.95 lakh ha against 14.77 lakh ha last year. Pea area is lower by 4.45 % at 7.48 lakh ha. Urad area is lagging by 17.25 % at 2.98 lakh ha against 3.61 lakh ha last year. Moong area too is lower by 6.50 % at 1.14 lakh ha against 1.22 lakh ha so far. Overall area may decline further as fields are facing moisture stress and it would impact final rabi crop size. See sowing table on page no 13
- Chana cash market could not sustain its upward momentum and decreased by Rs100 in Delhi market,** taking clue from weak futures. There is no parity for import at 70% duty and 10% cess, total effective duty is 77%. Besides, Nafed has ample stock in MP and Rajasthan and its continuous selling would restrict market to get firmer beyond a certain level. As crop size is expected to be lower at 83 lakh MT this year due to lower planted area. So, any major downward correction is unlikely. New crop is expected from mid-Feb and till then major supplier would be Nafed. Price direction for chana would depend on Nafed selling quantity in Dec, Jan & Feb. If weather continues to be rough, area and yield both are expected to decline and in such a situation Nafed may retain 10 lakh tonne to control any unexpected gains in chana market. Demand for dalis good and it may help chana to move up to the level of 5000 in January-2019. Expected range is Rs4600-5000 before new crop hits the market.
- Tur market moved up on demand from millers at lower level. In Delhi market tur is being traded at Rs 4500,** up by Rs 50. In Mumbai market it is being traded at Rs4400. If it is loaded for Delhi, it would cost around Rs4700. Currently in Delhi old stock is being sold and it is depleting fast. As soon as old stock is consumed and loading from Mumbai starts, tur price would increase by Rs 300 to 400 from current level. Stake holders should buy at current price. In Mumbai sellers are unwilling to sell below 4300-4350. Arrivals yet to pick up and is expected to increase in the second half. Crop size is lower around 36 lakh tonne. If moisture stress continues, yield of late sown crop is feared to decline and final size of crop might be even lower. Buyers are active and procurement on MSP is yet to start. So, Agriwatch expects market to move up toward MSP level soon. Buying at current level seems riskless.
- This year moong arrival in major markets has not been upto the mark due to weather affected crop.** Quality too was not very convincing. Availability of quality crop is lower. Arrivals are decreasing continuously in all major markets. There is no arrival in Kishangarh-Kekri line now. Parity for moong if loaded from Shekhawati line comes to above 5500. Moong from Jodhpur line delivered price comes to Rs 5900. Demand for moong dalids weak right now and despite weak demand, moong price is being traded at higher level. Slight improvement in dal demand may drive moong price up once again. Import is not possible as there is no parity from Myanmar. New moong ids not expected before March end. So, market has to rely on local and central pool stock. Agriwatch expects market to stay steady to slightly firm. Demand would remain major price driving factor in coming months.
- Urad market is likely to trade steady at current level. Market participants are eyeing on Madras** High court decision over import. Govt is not in favor of importing Urad beyond set target. Next hearing is on 17th Dec. Higher import against set quantity (1.5 lakh tonne per year) has impacted market sentiment negatively. Urad cash market is expected to move up once again as stock in north and central India is much lower. SQ are being traded at Rs 5525 per qtl. in Delhi market. However, higher availability of green vegetables in next two months may cap any spike in cash urad market despite lower crop size and likely poor rabi crop. Overall, sentiment remains firm for Urad market.
- Planting of masur is almost over. Due to moisture stress, percentage ratio of germination seems below** average in MP and UP. Comparatively lower dew at night and prevailing foggy condition due to pollution are not congenial to standing crop. Moisture stress in the field is hampering plant growth that may ultimately affect yield. Pace of import too is very slow. So lentil market is expected to move up from current level. At 40% duty, it costs around Rs4000-4050 at port. However, ample stock in central pool would not allow market to jump suddenly. So normal firmness might be seen in coming weeks.

International Market:

- **Global lentil markets showed some sign of improvement led by good demand for red and green lentil in the first opening quarter and inner tone remains strong.** Due to restriction, pea import is unlikely to continue in India till Dec. As long as India maintains quantitative limits on pea imports, lentils are the cheapest pulses, which can be freely imported. Area under lentil in India is 6.83 % lower than last year to 12.68 lakh ha so far. So demand is expected to improve and it may push up price in coming weeks.
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Global field pea markets traded firm on the back of likely good buying for export, during the first quarter of 2019.** This has contributed to firming export asking prices. Market tone has also been helped by the reduction in surplus stocks because of shipments to China's livestock feed industry.
- **Lower area coverage in Saskatchewan and Alberta which contribute 96% pea production in Canada, may reduce pea production by 9 % at 3.7 million tonne for MY 2018-19.** In Canada, season starts from 1st August. Yellow pea production has been estimated at 2.9 million tonne while green pea production may increase 0.6 million tonne. Other pea production has been pegged at 1.85 lakh tonne. Weak Indian demand would affect export volume and it may decrease to 2.6 million tonne in 2018-19. From Aug to Sep China, B, desh and US have been main buyers for Canadian pea. Carryout stock is expected to increase from 6.6 to 9 lakh tonne for 2018-19. Average price is expected to decrease from \$265 to \$230-60 per MT in current MY.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year when chickpea production was registered at 3.16 lakh MT.** Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19. It was 16.56 lakh ha last year.** Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.
- **Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans.** Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

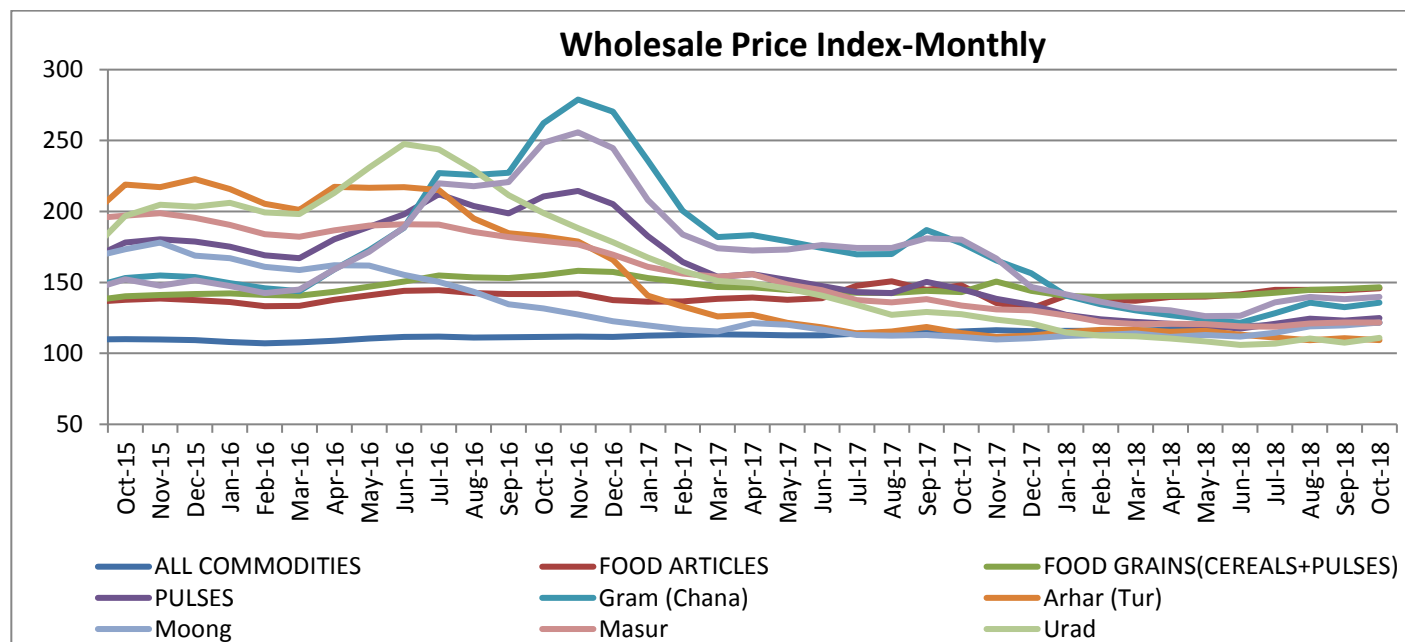

Weekly Outlook: -Pulses prices are likely to trade steady to firm.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1.7 point from 123.2 in Sep to 124.9 in Oct-2018.

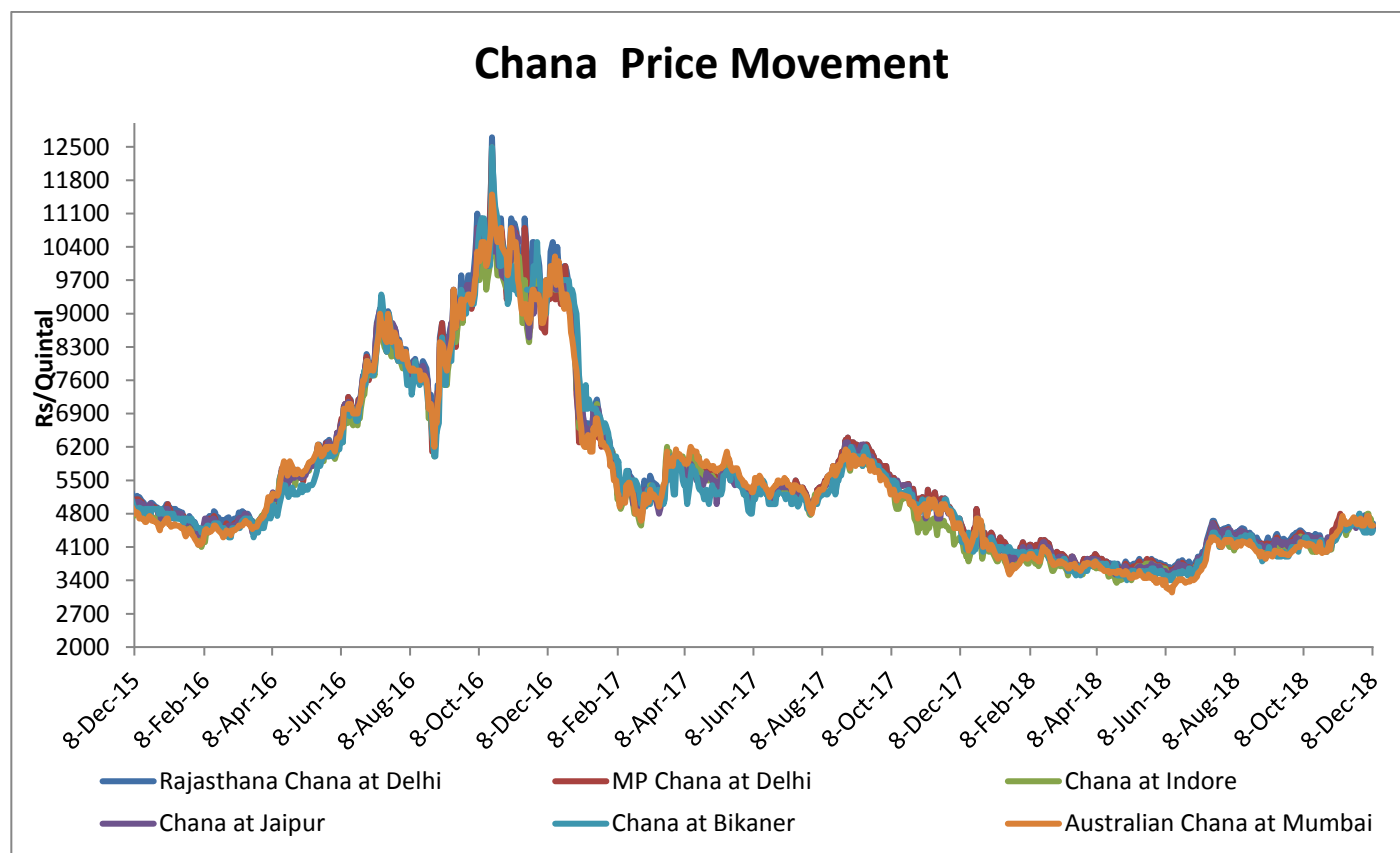

Pulses-Wise Scenario:

Chana

Current Scenario:

Despite selling through central pool stock, chana cash market traded steady taking clue from lower crop size this year and 10 % lower area coverage so far. Sowing of chana has entered in last phase and moisture stress in the field has raised concern of lower yield. Chana production is expected to decrease to 83 lakh tonne this year. There is good demand from dal millers. So any decrease from current level is unlikely despite ample stock in central pool. Chana in Delhi market is expected to rule 4550 to 4650 in Delhi market. Buying at this price seems riskless. Import is not possible at higher duty. So, stake holders should retain stock till mid Jan. New crops expected from mid Feb. In Jan chana is expected to trade 4650 to 4950 by then.

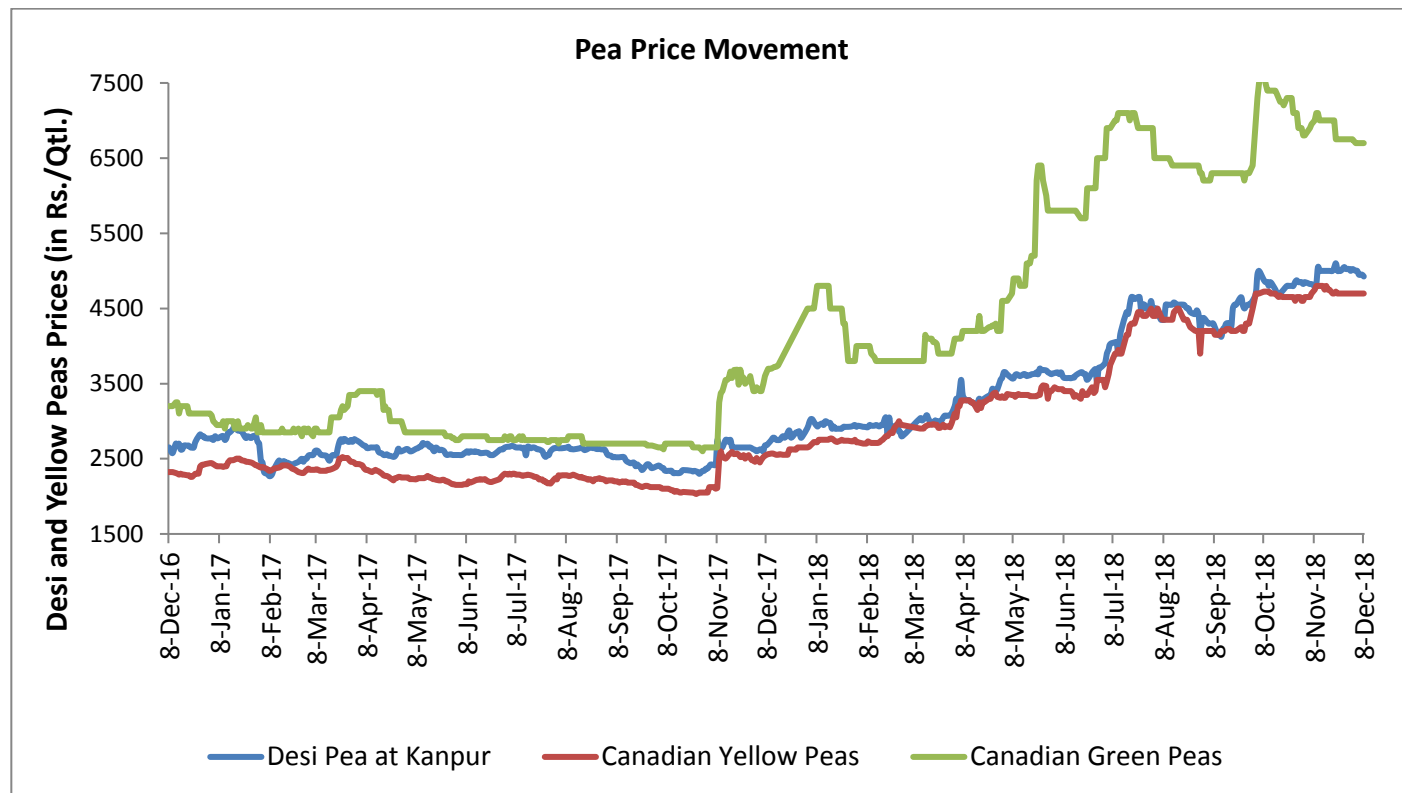

All India average price for Chana decreased by 0.64 percent from Rs 4625 to 4546 per qtl. However, Australian Chana price moved up by 0.65 % to Rs 4625 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound..

Peas (Matar):

Market Recap:

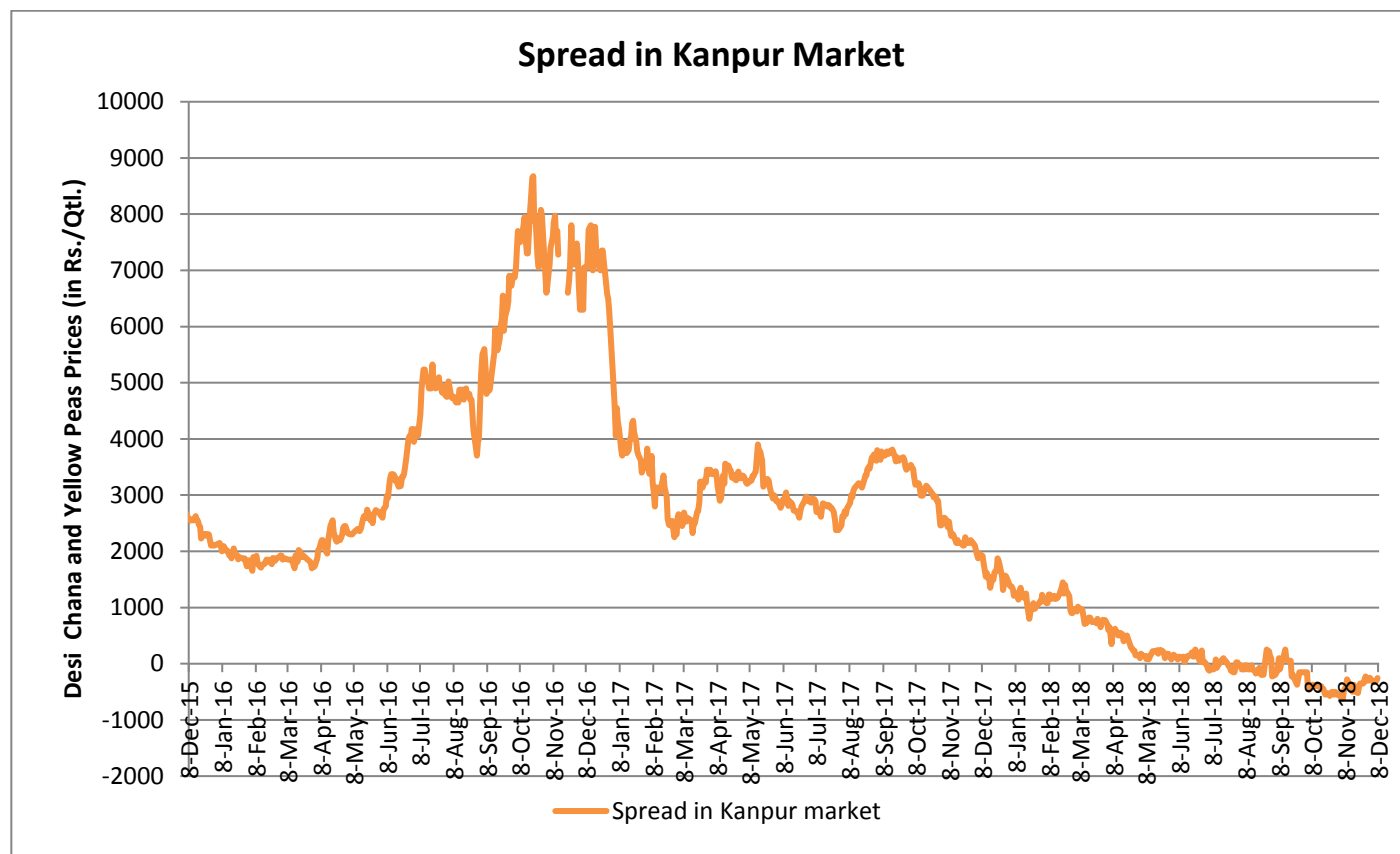

Pea prices moved slightly down, despite decreasing stock at ports amid decreasing chana price. Demand was affected at higher level. As stock is lower and chana price is expected to move up, matar price too would move up in tandem with chana price. Stock available in domestic market and at ports is said to be lower than consumption till Dec. So, stake holders should buy and hold stock. Firmness in pea market depends on chana price movement. Area in MP, UP and other states is lagging by 4.45 % to 7.48 lakh ha so far. Overall tone remains firm in the medium term

Current Market Dynamics & Outlook:

Pea traded at Rs 47000-4750 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the near to medium term. Import is not possible till 30th Dec-2018. So, stake holders should buy after downward correction and hold it for the level of 5000..

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 250 to 450 per quintal in Dec on relative movement in Chana prices. Spread is likely to stay steady in the range of 300.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Lentil area is lagging behind by 5.55 % to 13.95 lakh ha so far. As stockists are unwilling to sell stock at current price, market is expected to move up further in coming weeks. India imported 58689 MT lentil in Oct against 25663.7 MT in Sep-2018. It exported 910.67 MT lentil in Oct against 1000.45 MT in Sep at an average monthly price of \$877.81 (export) & \$386.21 per MT (Import). India imported total 125022MT lentil from mar to Oct-2018. It exported 11665.31 MT during the same period. Global market has improved on expectation of higher demand from India. As demand is likely to improve as other pulses prices are moving up, lentil may trade firm in coming weeks.

Current Scenario:

In the 2nd week of Dec-2018, average price in key market like Kanpur was down by 0.8 % to Rs 4048 per qtl. Prices are likely to trade steady to slightly firm in Dec to a certain extent. Other pulses too remain supportive for lentil market:

**Masur at Kanpur Market****Canadian Masur at Mumbai**

Market Outlook: Prices are likely to notice steady to firm movement after slight correction.

Pigeon Pea (Tur/Toor):

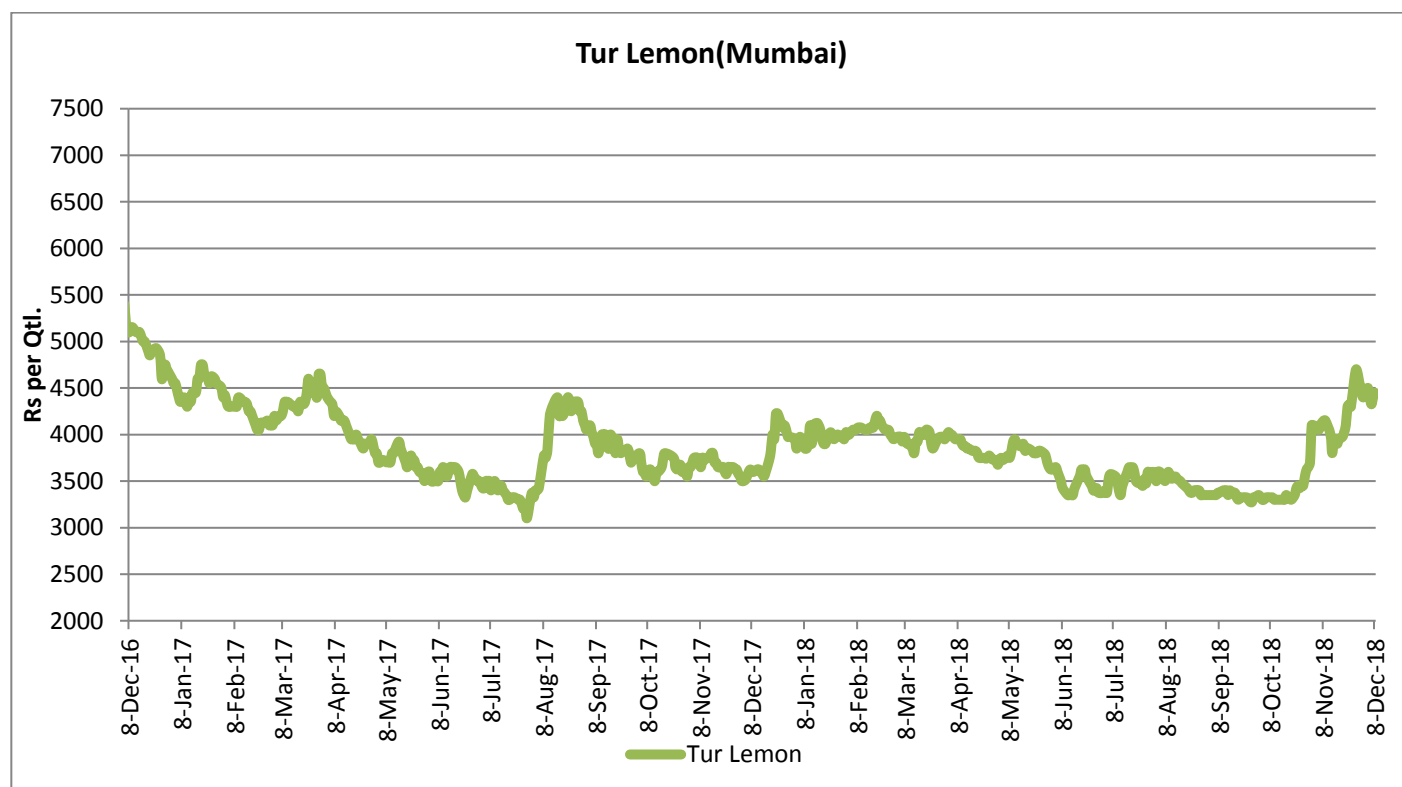

Market Recap:

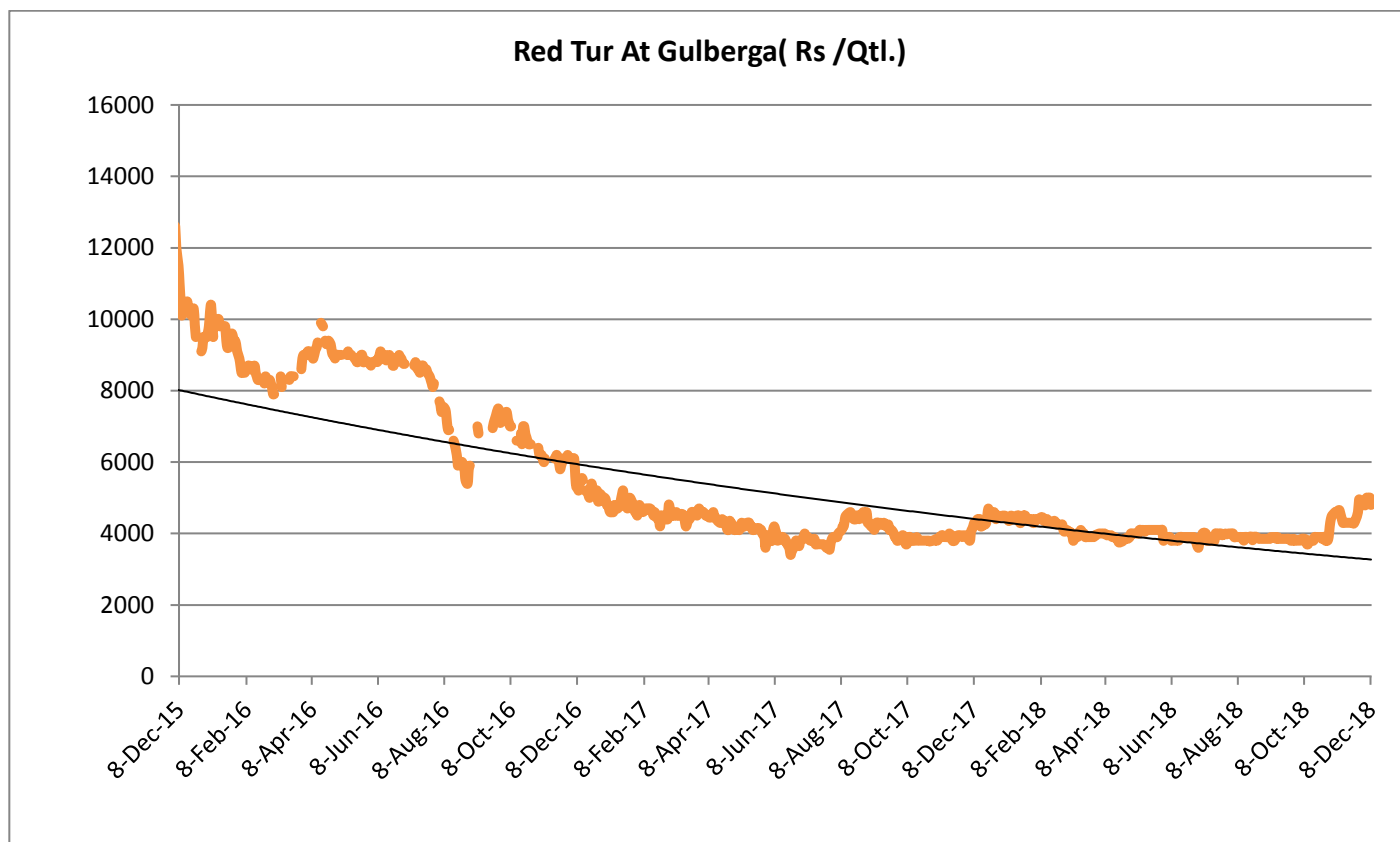

Tur market is likely to trade up due to active buying by private traders, sensing lower than expected crop size, higher procurement ahead of Lok Sabha election (May-2019) and increasing quotes in Myanmar. Weather report too is not favorable for late sown crop. Market participants say that old stock is depleting and supply-demand side is finding balance now. As demand for dal is likely to increase, market is unlikely to trade lower. Govt would start procuring Tur at MSP, so prices of Tur may move up to the level of Rs 5000 from current level in the medium term. Sentiments in cash market remains firm. Tur in Gulberga market is being traded at Rs 4700-4800 per qtl. New crop has started hitting Sholapur and Karnataka. Pressure of new arrival is expected from mid Dec.

.India cannot import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level. As per market source stock in central pool is not more than 3 lakh tonne now.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs 5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid festive demand and fear of lower yield may push market further up. However, downward correction of Rs 150 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

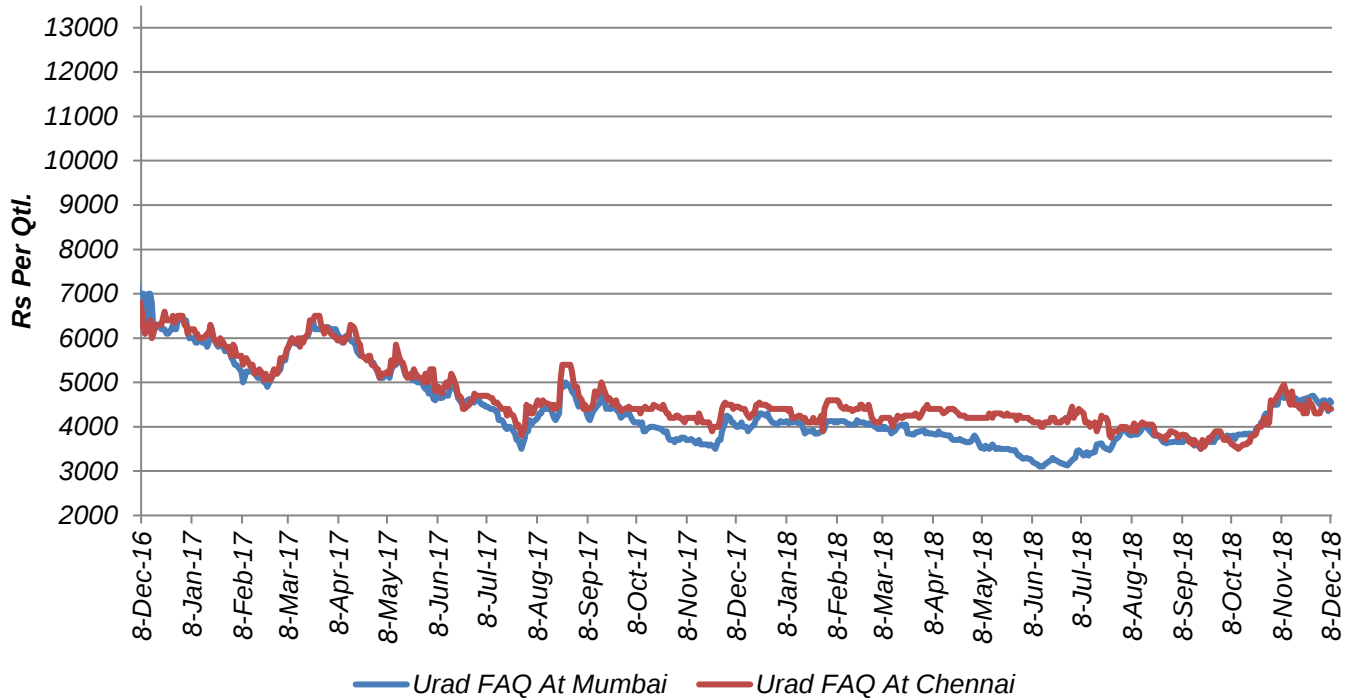

Urad market is likely to trade steady at current level. Market participants are eyeing on Madras High court decision over import. Govt is not in favor of importing Urad beyond set target. Next hearing is on 17th Dec. Higher import against set quantity (1.5 lakh tonne per year) has impacted market sentiment negatively. Urad cash market is expected to move up once again as stock in north and central India is much lower. SQ are being traded at Rs 5525 per qtl. in Delhi market. However, higher availability of green vegetables in next two months may cap any spike in cash urad market despite lower crop size and likely poor rabi crop. Overall, sentiment remains firm for Urad market. Actual market direction of urad depends on Madras high court decision. Next hearing on stay order would be on 17th Dec.

Current Market Dynamics & Outlook:

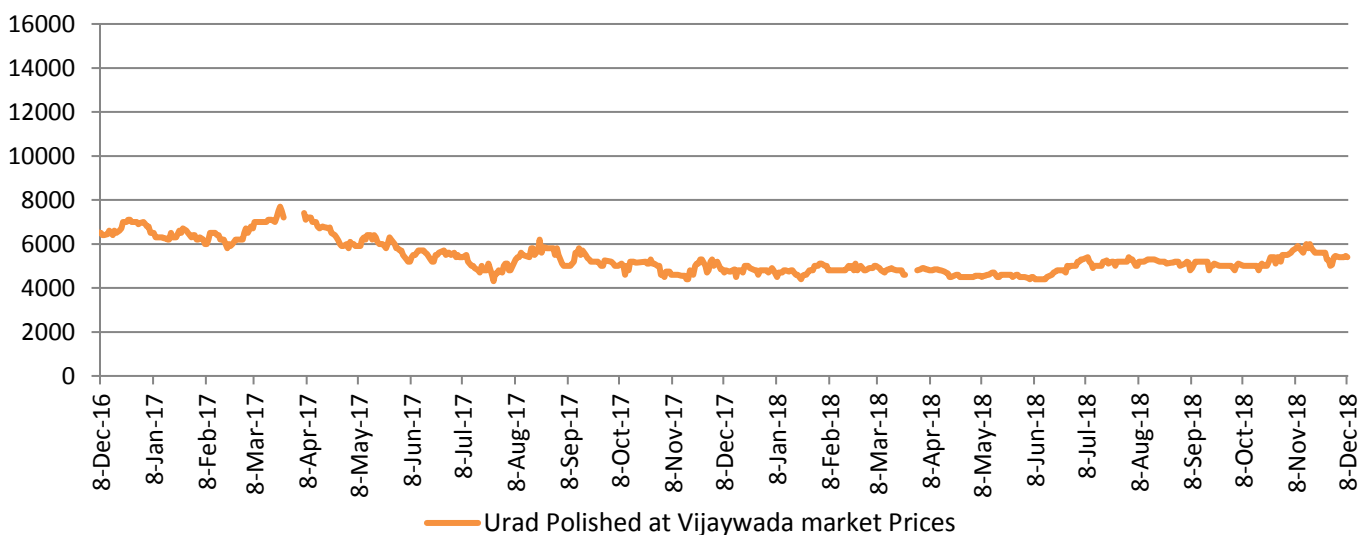

Urad FAQ at Mumbai (Rs Rs4400-.4450per Qtl.) and Chennai (Rs.4350-4450Qtl.) noticed weak tone. It traded steady in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

URAD FAQ

Urad Polished at Vijaywada

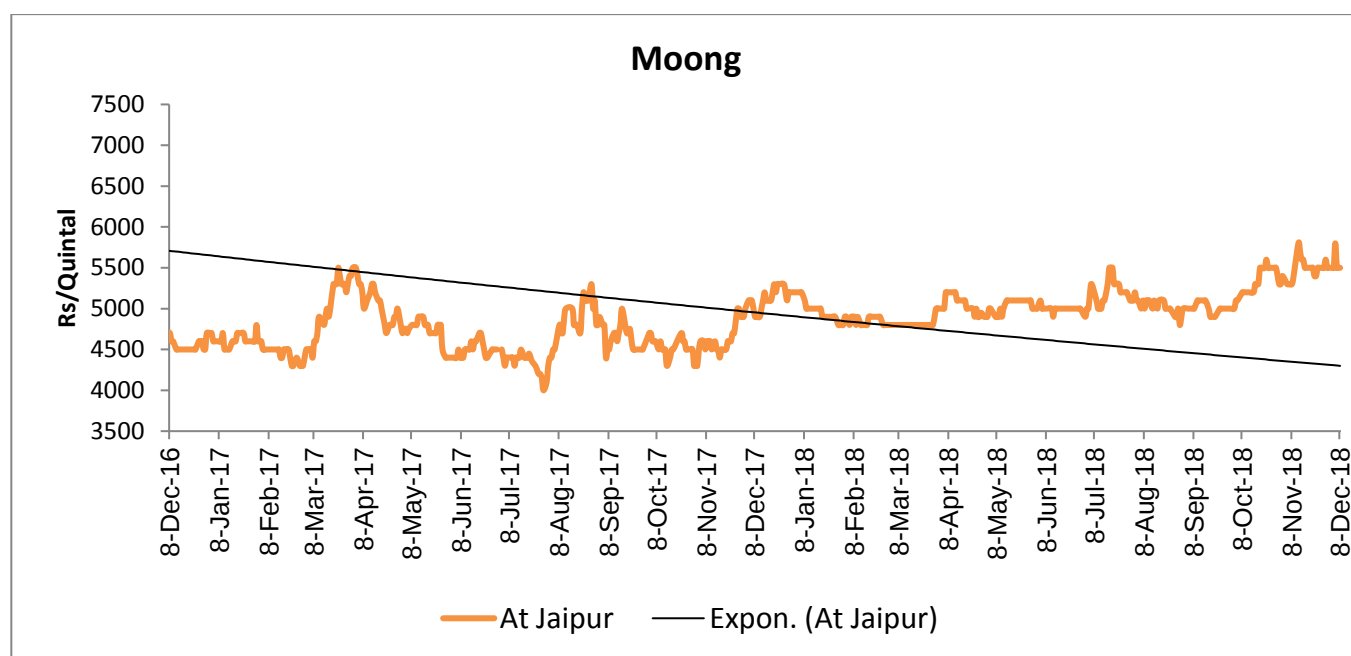

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

This year moong arrival in major markets has not been upto the mark due to weather affected crop. Quality too was not very convincing. Availability of quality crop is lower. Arrivals are decreasing continuously in all major markets. There is no arrival in Kishangarh-Kekri line now. Parity for moong if loaded from Shekhawati line comes to above 5500. Moong from Jodhpur line delivered price comes to Rs 5900. Demand for moong is weak right now and despite weak demand, moong price is being traded at higher level. Slight improvement in dal demand may drive moong price up once again. Import is not possible as there is no parity from Myanmar. New moong is not expected before March end. So, market has to rely on local and central pool stock. Agriwatch expects market to stay steady to slightly firm. Demand would remain major price driving factor in coming months.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Dec.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4550 to 4850 levels in this week..

Strategy: Buy on dip

Trade Recommendations: Go long around 4500 with the first target of 4650 and second target 4750 with stop loss at 4450 level.

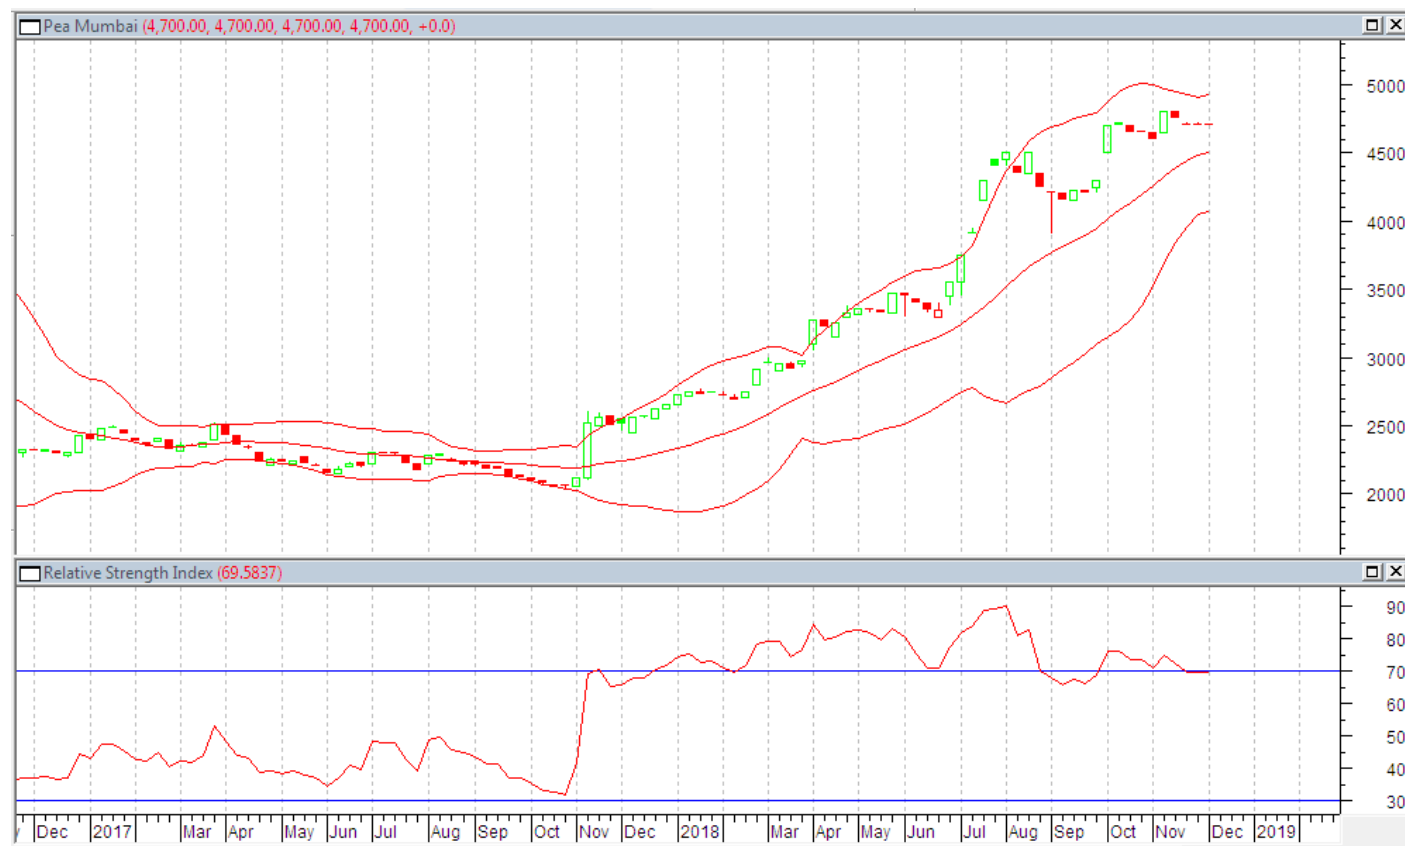

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4400	4450	4550	4750	4850

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4600- 4800 in this month.

Strategy: Buy on dip

Trade Recommendations: Go long around 4650 with the first target of 4750 and second target 4800 with stop loss at 4600 level.
