---

**Highlights-Domestic Market:**

- **Rabi pulses area decreased by 9.32 % to 125.40 lakh ha against 138.29 lakh ha last year as on 14 Dec-2018.** Chana area is running behind by 12.82 % to 83.71 lakh ha against 96.02 last year till date. Farmers have covered 4.92 % lower area under lentil so far to 15.18 ha against 15.97 lakh ha last year. Pea area is lower by 4.90% to 8.06 lakh ha. Urad area is running behind by 11.17 % to 4.26 lakh ha against 4.79 lakh ha last year. However, moong area is running up by 8.28 % to 1.83 lakh ha against 1.69 lakh ha so far. Overall area may decline further as fields are facing moisture stress and it would impact final rabi crop size.
- **Increasing fear of lower crop size big buyers are buying chana with slower pace at current price and waiting for a clear cut direction as Nafed has ample stock to offer in Rajasthan and MP.** Even NCDEX has not much stock for delivery. Futures continued to close higher during the end of last week. It helped market to recover in Delhi cash market. Taking clue from futures, dal market too closed higher. This year importers are importing limited quantity of chana from Tanzania as liquidity is weak. Dal imported in containers last fortnight has been sold out. So, Agriwatch expects market to improve further not without a correct. No dip stake holders should buy and wait.
- **Stock of lemon tur at Mumbai, Chennai, Kolkata port is not up to the mark. Pressure of Kartik crop is almost over now.** Right now supply continues from Karnataka. However, higher price in Karnataka has negate the parity for central and north India. Even mills located in Karnataka are consuming old imported stock. The main region behind it is unwillingness of traders to buy Patka dal above 6100-6200 per qtl. If central and north Indian millers buy it, its costing goes up to the level of 7300-7500. Even in Karnataka it will cost-7000-7100. It has increased lemon tur price in Mumbai at Rs4500 in last two days. Sentiments remains firm.
- **This year pressure of Rajasthan Moong was not seen in any cash market. The main reason behind it is lower supply from Kekri-Kishan garh line.** Normally, supply from this region used to continue till Dec, but this year, it started drying up from Oct end. At this line local mills remain active and brought maximum stock. Supply from Jodhpur line was continued, however, buying by Jalgaon and Jaisalmer's millers has pushed prices up. Even supply from Shekhavati line is higher at Rs5450-5550 per qtl. There is no arrival from Allahabad, Kanpur and Ranchi line now. So Agriwatch expects improvement in price as soon as demand for dal increases.
- **Recent rains in MP and Chhatisgarh have provided much life support to standing masur crop.** However, lower area coverage would continue to support market as stock of Masur is decreasing continuously in major markets. Import flow too remains restricted and it would cause short supply in masur in coming months. Importers are facing money crunch and are unable to strike forward deal. Stock with MMTC too have drying up. So Agriwatch expects market to move up from current level. New crop is expected from mid Feb.
- **Stock of matar (pea) is not much to take care of emerging needs. However, higher availability of green vegetables are affecting demand right now.** Demand is only for marriage celebration. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Import ban is till December. If it continues or is extended for another three months, pea market may trade stable to slightly weak. If import is opened, it will decrease by 200 to 300 per qtl from current level. Overall the remains weak.
- **Urad market is likely to trade steady at current level. Market participants are eyeing on Madras High court decision over import.** Govt is not in favor of importing Urad beyond set target. Next hearing is on 17th Dec. Higher import against set quantity (1.5 lakh tonne per year) has impacted market sentiment negatively. Urad cash market is expected to move up once again as stock in north and central India is much lower. SQ are being traded at Rs 5525 per qtl in Delhi market. However, higher availability of green vegetables in next two months may cap any spike in cash urad market despite lower crop size and likely poor rabi crop. Overall, sentiment remains steady. If court decision of import turns in favour of Commerce ministry, it may move up again.

**International Market:**

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- **Global Chickpea market remains almost unaffected from final production data in Canada.** USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.
- **As per Canadian Grain Commission update Canada has exported 1,82,800 MT field pea in the month of Oct-2018.** It does not include lentil exported in containers from non-reporting terminals. This lifted bulk export loadings for field peas to 592,3 MT so far this marketing year, down 30% from the 845,600 loaded during the same period in the previous marketing year.
- **As per Canadian Grain Commission update Canada has exported 22,700 MT lentils in the month of Oct-2018.** It is higher by 4500 MT exported in Oct-2017. Canada has exported total 1,25,400 MT lentil in current MY. It was 88,000 MT last year till date. Improvement in export sales is likely to continue in Nov & Dec too. However, bulk loading is said to be lower than Sep-2018.
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Global field pea markets traded firm on the back of likely good buying for export, during the first quarter of 2019.** This has contributed to firming export asking prices. Market tone has also been helped by the reduction in surplus stocks because of shipments to China's livestock feed industry.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** It was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh

ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

- Normally, Myanmar imports 12 to 15 lakh tonne pulses and beans annually. This year Myanmar might be able to export 12 lakh tonne pulses and beans. Pulses prices are lower in Myanmar as major buyers like India, are almost out of market. Besides India, Bangladesh, Pakistan, and Nepal buy beans and pulses from Myanmar

**Weekly Outlook:** -Pulses prices are likely to trade steady to weak

### Monthly Wholesale Price Index:

### Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1.7 point from 123.2 in Sep to 124.9 in Oct-2018.

## Pulses-Wise Scenario:

### Chana

#### Current Scenario:

Parity for desi chana from Bikaner to north and central India is quite higher. Stock of dal in MP is being consumed locally due to chalani demand from Indore region. However, any major spike in chana & chana dal is unlikely as market is well aware of ample availability of stock in central pool. However, buying by mills at lower level has lent support to chana cash market and Delhi chana moved up by Rs 75-100 to Rs 4600-4700 per qtl. There is parity from Rajasthan market and higher quotes in Indore line may push up chana price by 200 more from current level. At this price stockists may prefer to sell. Even offtake from Nafed would increase. It would cap uptrend once again. Standing crop report is not favorable. So any major decrease at current level is unlikely.

All India average price for Chana decreased by 0.54 percent from Rs 4546 to 4521 per qtl. Australian Chana price too moved down by 1.83 % to Rs 4540 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

**Market Outlook:** Chana may continue to trade range bound. Fundamentally, it lacks support due to higher stock in central pool stock despite lower area coverage.

## Peas (Matar):

### Market Recap:

Stock of matar (pea) is not much to take care of emerging needs. However, higher availability of green vegetables are affecting demand right now. Demand is only for marriage celebration. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Import ban is till December. If it continues or is extended for another three months, pea market may trade stable to slightly weak. If import is opened, it will decrease by 200 o300 per qtl from current level. Overall sentiment remains weak. Area in MP, UP and other states is lagging by 4.98 % to 8.06 lakh ha so far. Overall tone remains weak in the near term

### Current Market Dynamics & Outlook:

Pea traded at Rs 4650-4700 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the medium term. In short term demand is expected to remain weak due to higher availability of green vegetable. Import is not possible till 30<sup>th</sup> Dec-2018. It would be important to see whether govt opens up import in Jan-2019.

### Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of -50 to 100 per quintal in Dec on relative movement in Chana prices. Spread is likely to stay steady in the range of 100 to -50.

**Market Outlook:** Outlook remains steady to slightly weak this week.

**Lentils (Masoor):**

**Market Recap:**

Demand from millers at lower level pushed masur price up by Rs 25-35 to Rs 4125-4135 per qtl. As new crop is almost 3 months away and stock is lower amid restricted import volume, masur may trade further up from current level. Area coverage is lower and crop condition is not good so far. Sowing is almost over now. So Agriwatch expects market to get firmer in coming weeks.

**Current Scenario:**

In the 2<sup>nd</sup> week of Dec-2018, average price in key market like Kanpur was up by 0.46 % to Rs 4100 per qtl. Prices are likely to trade steady to slightly firm in Dec to a certain extent. Other pulses too remain supportive for lentil market:

**Masur at Kanpur Market****Canadian Masur at Mumbai**

**Market Outlook:** Prices are likely to notice steady to firm movement after slight correction.

## Pigeon Pea (Tur/Toor):

### Market Recap:

Parity for tur from Karnataka to central-north India is higher. Costing of Tur from Karnataka to central India would be around 5000 and for light quality tur it would be around 4800 per qtl. It has pushed up lemon tur price by Rs 100 to Rs 4450 per qtl. Tur crop in Mah is not good. So in Mah lemon tur move up by Rs 100 to Rs 4400 too. If it is brought from Mumbai, it would cost Rs 4700 in central India. Crop size is likely to be lower and may decrease below 35 lakh tonne. So, Agriwatch expects tur price to move up further by RS 150 to 200 in coming weeks. Procurement would further push up price. Old stock is depleting fast. India cannot import beyond 3 lakh tone upto Mar-2019. India has already imported over 2 lakh tone tur from Mar-2018 to Sep-2018. So, importers can import only 1 lakh tone more beyond March-2019. So Agriwatch expects cash market to move up from current level. As per market source stock in central pool is not more than 3 lakh tonne now.

### Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs 5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

### Market Outlook:

Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid festive demand and fear of lower yield may push market further up. However, downward correction of Rs 150 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders. Old stock in govt.s godown is decreasing.

### Black Matpe (Urad):

Urad market is likely to trade steady at current level. Market participants are eyeing on Madras High court decision over import. Govt is not in favor of importing Urad beyond set target. Next hearing is on 17th Dec. Higher import against set quantity (1.5 lakh tonne per year) has impacted market sentiment negatively. Urad cash market is expected to move up once again as stock in north and central India is much lower. SQ are being traded at Rs 5525 per qtl. in Delhi market. However, higher availability of green vegetables in next two months may cap any spike in cash urad market despite lower crop size and likely poor rabi crop. Overall, sentiment remains firm for Urad market. Actual market direction of urad depends on Madras high court decision. Next hearing on stay order would be on 17th Dec. decision over import is awaited.

### Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs 4300-4400 per Qtl.) and Chennai (Rs. 4350-4450 Qtl.) noticed weak tone. It traded steady in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the price movement in different markets:-

### URAD FAQ

### Urad Polished at Vijaywada

**Market Outlook:** Urad Prices are likely to show steady momentum this week.

### Green Gram (Moong):

#### Market Recap:

Arrival of moong in Raj-Mah market is lower than expectation and it is continuously coming down. Parity for moong from Raj to Delhi is higher and there is no import parity from Myanmar, Ukraine. New crop is expected not before Feb. However, weak demand for dal and supply from weak quality moong have capped uptrend in moong market right now. There is no loading from Kekri-Kishangarh line due to disparity for central region. Agriwatch expects moong price to stay steady in December and move up again in new year. By then, lower quality moong is expected to be consumed. Buying on Rs100-150 dip seems good for stake holders.

**Market Outlook:** Moong prices are likely to trade steady to slightly firm in the near term.

#### Import- Export & Average Monthly CiF :

| Month  | Chickpea |            | Tur      |            | Green Peas |            | Lentil   |            |
