Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Rabi pulses area decreased by 4.99 % to 136.25 lakh ha against 143.40 lakh ha last year as on 21 Dec-2018.**Chana area is running behind by 9.19 % to 89.36 lakh ha against 98.40 last year till date. Farmers have covered 2.22 % lower area under lentil so far to 15.91 lakh ha against 16.27 lakh ha last year. Pea area is up by 10.65 % to 9.78 lakh ha. Urad area is running behind by 8.02 % to 5.28 lakh ha against 5.75 lakh ha last year. However, moong area is running up by 13.95 % to 2.59 lakh ha against 2.27 lakh ha so far. As sowing is getting delayed, area under rabi pulses unlikely to touch last year level
- **Total pulses import in Nov increased from 231826.99 to 260334.61 MT.**The highest increased was seen in Urad import which increased from 76376.59MT in Oct to 115542.2 MT in Nov. Moong import decreased from 4243.07 to only 92.2MT in Nov. Even Kidney bean import increased from 5234.45 to 8041.17 MT in Nov-2018. Higher import of urad restricted urad price in domestic market and if import continues with current volume, it would continue to cap urad price in domestic market.
- **Desi chana traded down by Rs 100 to Rs4550 at Delhi market, taking clue from weak futures.**In fact, arrivals from producing regions have drastically decreased at lower price. In Maharashtra, mills located in Jalgaon are buying chapa chana. In Indore, mills are unwilling to sell dal at decreased price. So, chana should recover from current level. Demand for Tanzanian chana is weak as importers are importing only need based quantity or against adv. order. Money crunch too has affected import volume. So, chana is unlikely to move down from current level. Stakeholders should buy at 4300-4350. Market is expected to recover soon.
- **Weak demand for dal has pressurized tur market and it decreased by Rs 50 to Rs4500.**Some mills have brought at Rs4475 against adv payment. In fact stock at ports like Mumbai, Chennai and Kolkata are decreasing fast. At present supply is from Karnataka while arrival from Kartiki crop is almost over. As price of tur in Karnataka markets are high, so there is no parity for tur in north and central India if brought from Karnataka at current price. Imported stock from Malawi, Sudan & Mozambique has already been consumed now. So, Agriwatch expects market to move up once again.
- **In Delhi market, moong from Jodhpur line is being traded at Rs5800-6000 per qtl.**Besides, there is no parity for Rajasthan moong in north India at current price. New crop is expected now only from Mar-Apr next year. Moong arrival from Kekri and Kishangarh line ended in Oct, one month before normal arrival. Maximum stock was brought by local mills there. Even parity from Jodhpur line ended with increasing price. Right now buying is on from Jaisalmer and Jalgaon line. In Delhi market, Shekhavati line average moong is being traded at Rs 5500-5700. So, any dip from current level is unlikely now.
- **Weak demand for urad dal and talk of arrival of illegal containers at Chennai ports discouraged buyers to continue buying.** It resulted market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt.'s may decide to ban illegal import completely.
- **Recent rains in MP and Chhatisgarh have provided much life support to standing masur crop.** However, lower area coverage would continue to support market as stock of Masur is decreasing continuously in major markets. Import flow too remains restricted and it would cause short supply of masur in coming months. Importers are facing money crunch and are unable to strike forward deal. Stock with MMTC too have dried up. So Agriwatch expects market to move up from current level. New crop is expected from mid Feb.
- **Stock of matar (pea) is not much to take care of emerging needs.** However, higher availability of green vegetables are affecting demand right now. Demand is only for marriage celebration. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Import ban is till December. If it continues or is extended for another three months, pea

market may trade stable to slightly weak. If import is opened, it will decrease by 200 to 300 per qtl from current level. Overall the remains weak.

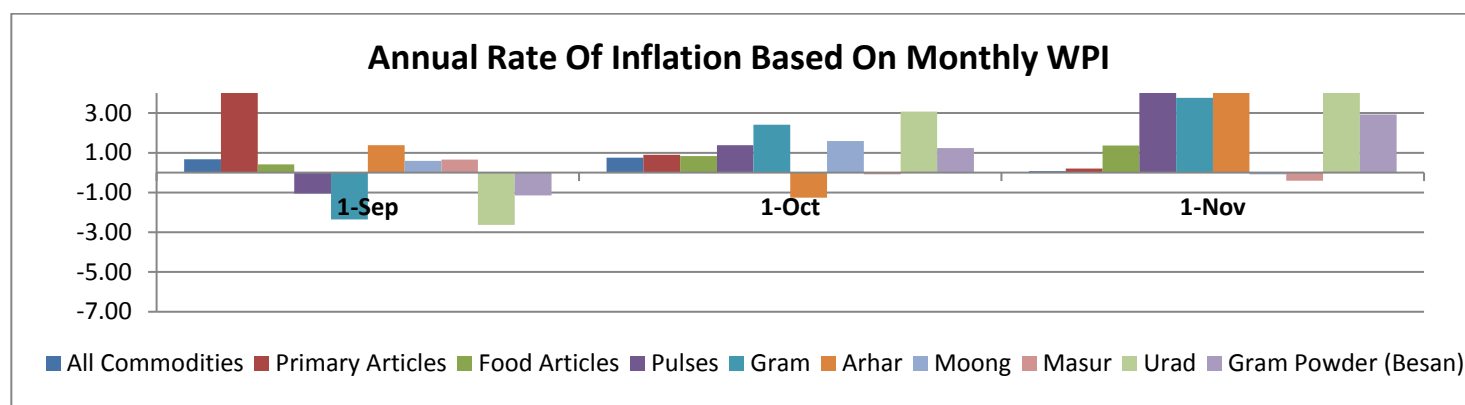

International Market:

- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Fava bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- **Global Chickpea market remains almost unaffected from final production data in Canada.** USDA data is about to be published and market participants are waiting for USDA data. Canada has produced 311,300 metric tons chickpea from 4.43 lakh acres of land. It had produced 118,600 MT last year from 2.09 lakh acres of land. Major increase was reported from Saskatchewan where production increased from 95,600 to 276,500 MT. In Alberta production has increased from 23,000 to 34,600 MT. Other states are minor producers and have grown around 200 MT.
- **As per Canadian Grain Commission update Canada has exported 1,82,800 MT field pea in the month of Oct-2018.** It does not include lentil exported in containers from non-reporting terminals. This lifted bulk export loadings for field peas to 592,3 MT so far this marketing year, down 30% from the 845,600 loaded during the same period in the previous marketing year.
- **As per Canadian Grain Commission update Canada has exported 22,700 MT lentils in the month of Oct-2018.** It is higher by 4500 MT exported in Oct-2017. Canada has exported total 1,25,400 MT lentil in current MY. It was 88,000 MT last year till date. Improvement in export sales is likely to continue in Nov & Dec too. However, bulk loading is said to be lower than Sep-2018.
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Global field pea markets traded firm on the back of likely good buying for export, during the first quarter of 2019.** This has contributed to firming export asking prices. Market tone has also been helped by the reduction in surplus stocks because of shipments to China's livestock feed industry.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **USDA production estimate for this year's crop is at higher side at 5.71 lakh MT. It is around 80 % higher than last year** when chickpea production was registered at 3.16 lakh MT. Yield and area too are higher this year with favorable weather condition. Farmers had planted a total of 853,146 acres of chickpeas this year. Out of total acreage Kabuli share was 632,482 acres, small chickpea 209,338 acres & desi 11,326 acres.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** It was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. Prices are likely to hover in the range of \$220 to \$250 per MT.

- Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

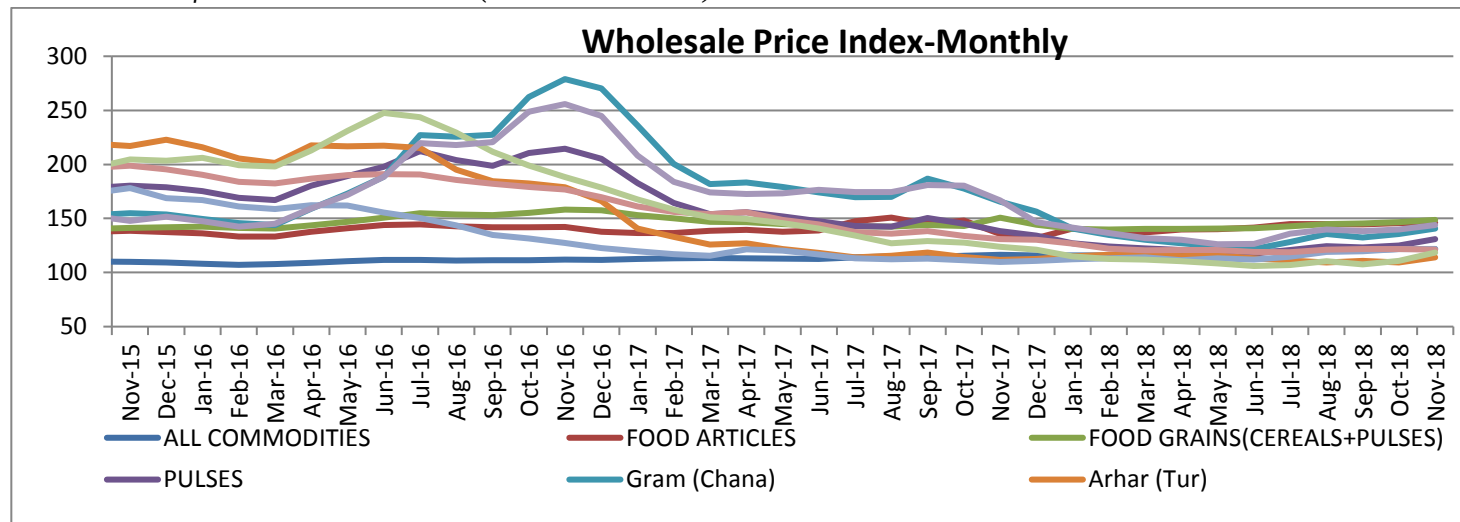

Weekly Outlook: -Pulses prices are likely to trade steady to weak

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 5.9 point from 124.9 in Oct to 130.8 in Nov-2018.

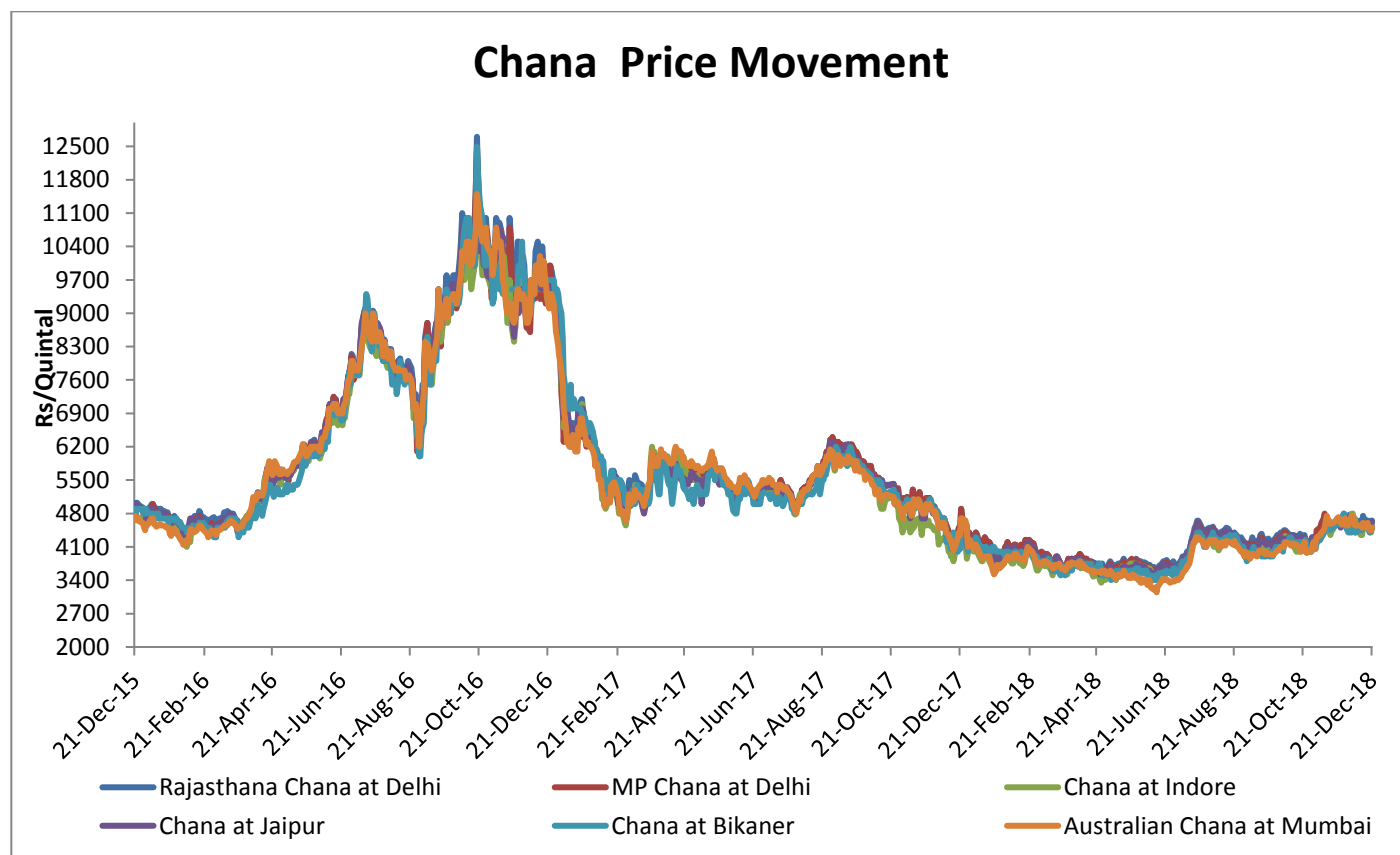

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded lower taking clue from weak futures. Market is likely to recover from this level and may stay steady at Rs4450-4550 in Delhi market. Arrival is lower and sellers are unwilling to sell at current level. As there is much stock in central pool, any spike is unlikely despite lower incoming crop. New crop is only two months away so stakeholders should release stock in parts at Rs200 recovery from current level. There is a common perception in the market that that may give good return in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period.

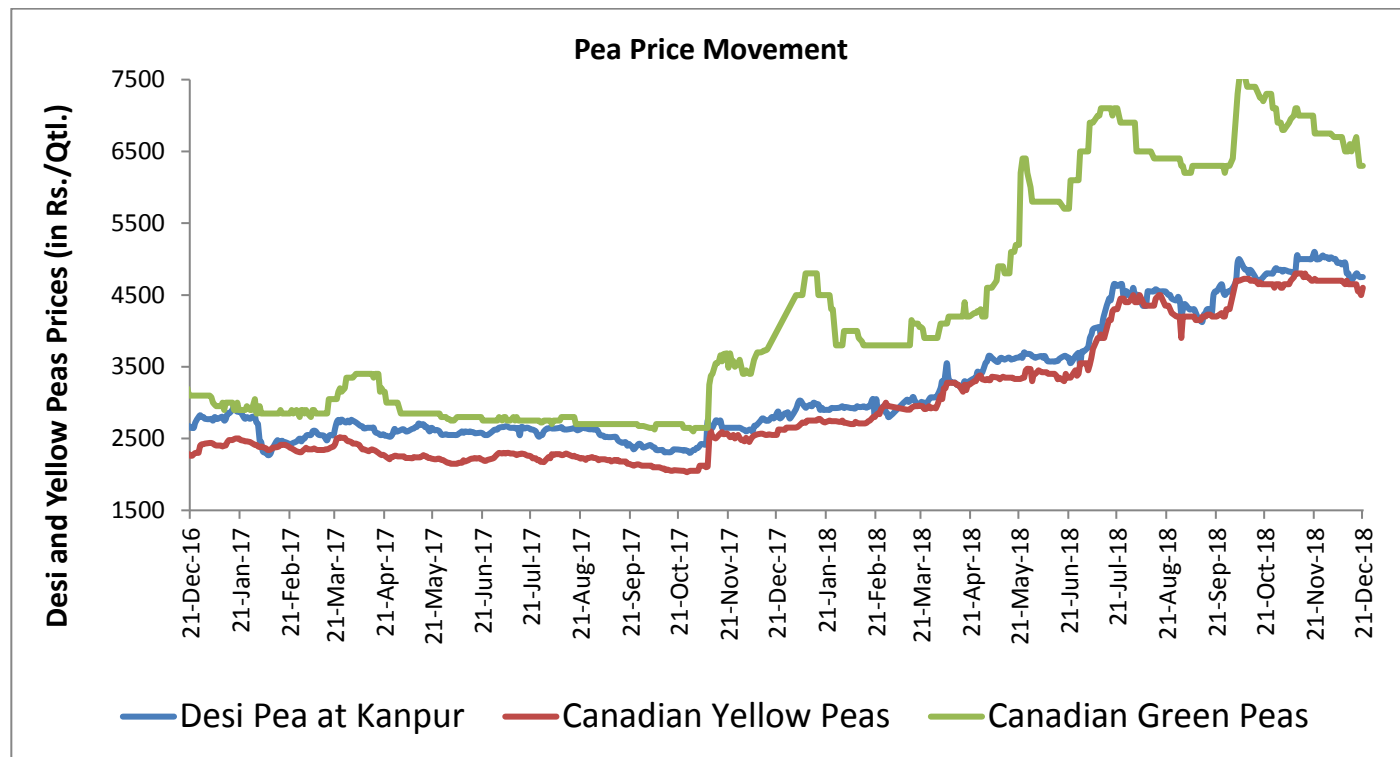

All India average price for Chana increased by 0.6 percent from Rs 4521 to 4524 per qtl. Australian Chana price too moved down by 0.88 % to Rs 4500 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound. Fundamentally, it lacks support due to higher stock in central pool stock despite lower area coverage.

Peas (Matar):

Market Recap:

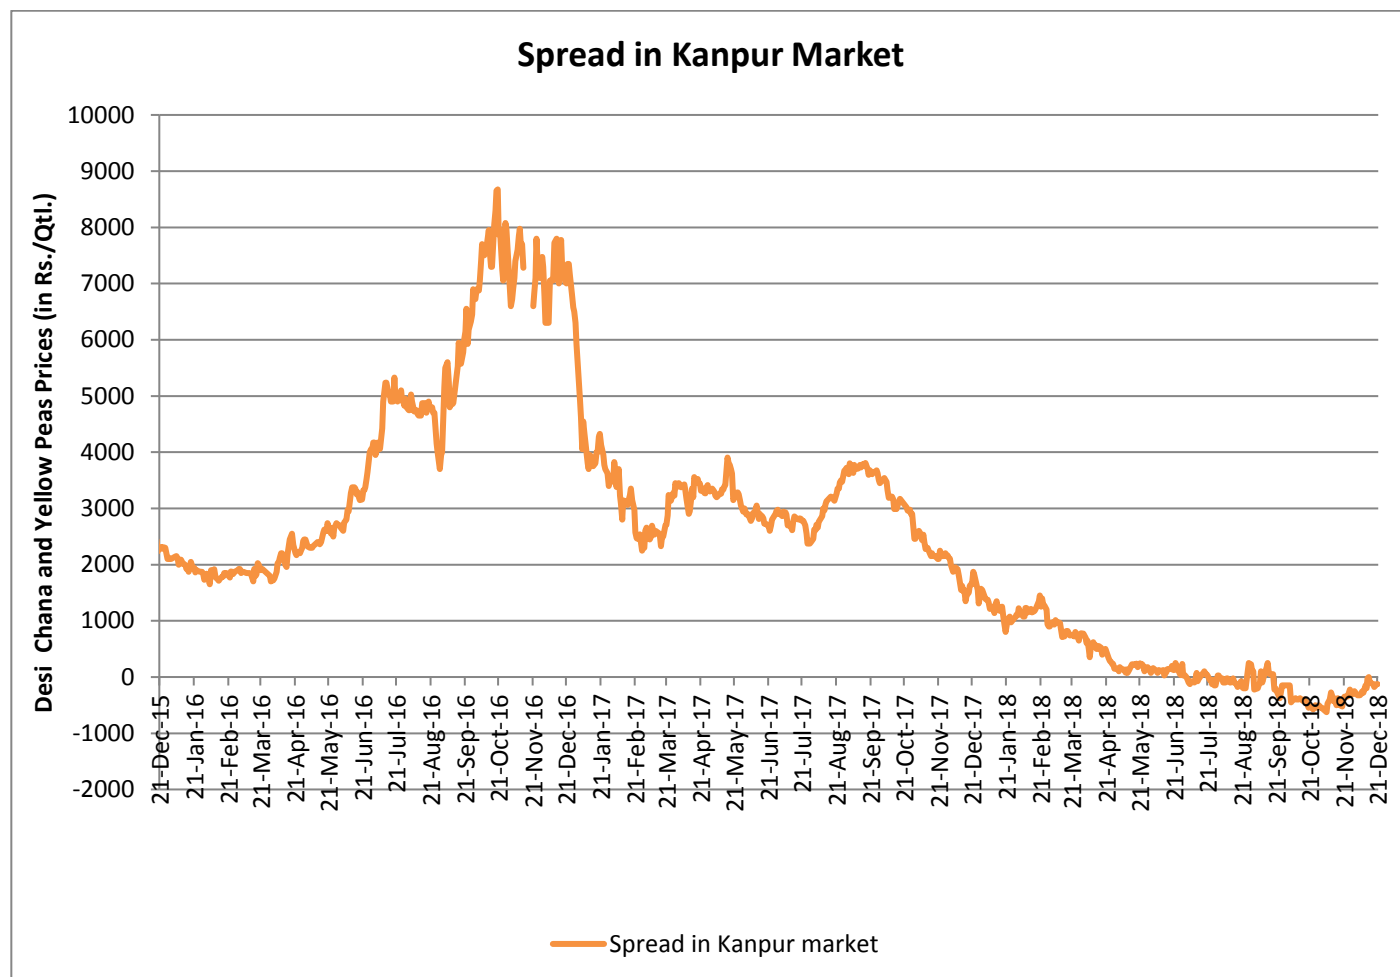

Stock of matar (pea) is not much to take care of emerging needs. However, higher availability of green vegetables are affecting demand right now. Marriage season is off now. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Import ban is till December. If it continues or is extended for another three months, pea market may trade stable to slightly firm. If import is opened, it will decrease by 200 to 300 per qtl from current level. Overall sentiment remains weak. Area in MP, UP and other states is lagging by 10.6 % to 9.78 lakh ha so far. Overall tone remains weak in the near term.

Current Market Dynamics & Outlook:

Pea traded at Rs 4600-4650 in Kanpur market, slightly lower than last week due to weak demand at current level. Higher import cost, import restriction till Dec and lower stock in domestic market may remain supportive in the medium term. In short term demand is expected to remain weak due to higher availability of green vegetable and weak chana market. Import is not possible till 30th Dec-2018. It would be important to see whether govt opens up import in Jan-2019.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 150 to 200 per quintal in Dec on relative movement in Chana price.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Weak demand from millers at current level pushed masur price up by Rs 50-75 to Rs4050-4100 per qtl. However, as new crop is almost 3 months away and stock is lower amid restricted import volume, masur may trade up from current level once again. Area coverage is lower and crop condition is not good so far. Sowing is almost over now. So Agriwatch expects market to get firmer in coming weeks.

Current Scenario:

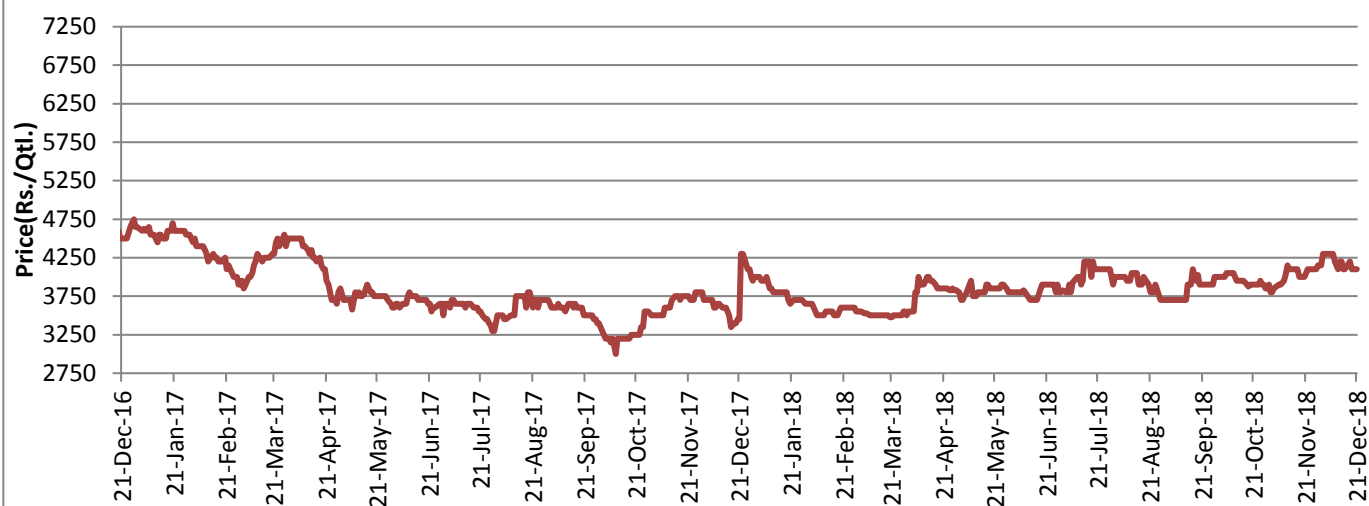

In the 3rd week of Dec-2018, average price in key market like Kanpur was down by 0.21 % to Rs 4050-4075 per qtl. Prices are likely to trade steady to slightly weak in Dec to a certain extent.

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice steady to weak movement due to weak demand ..

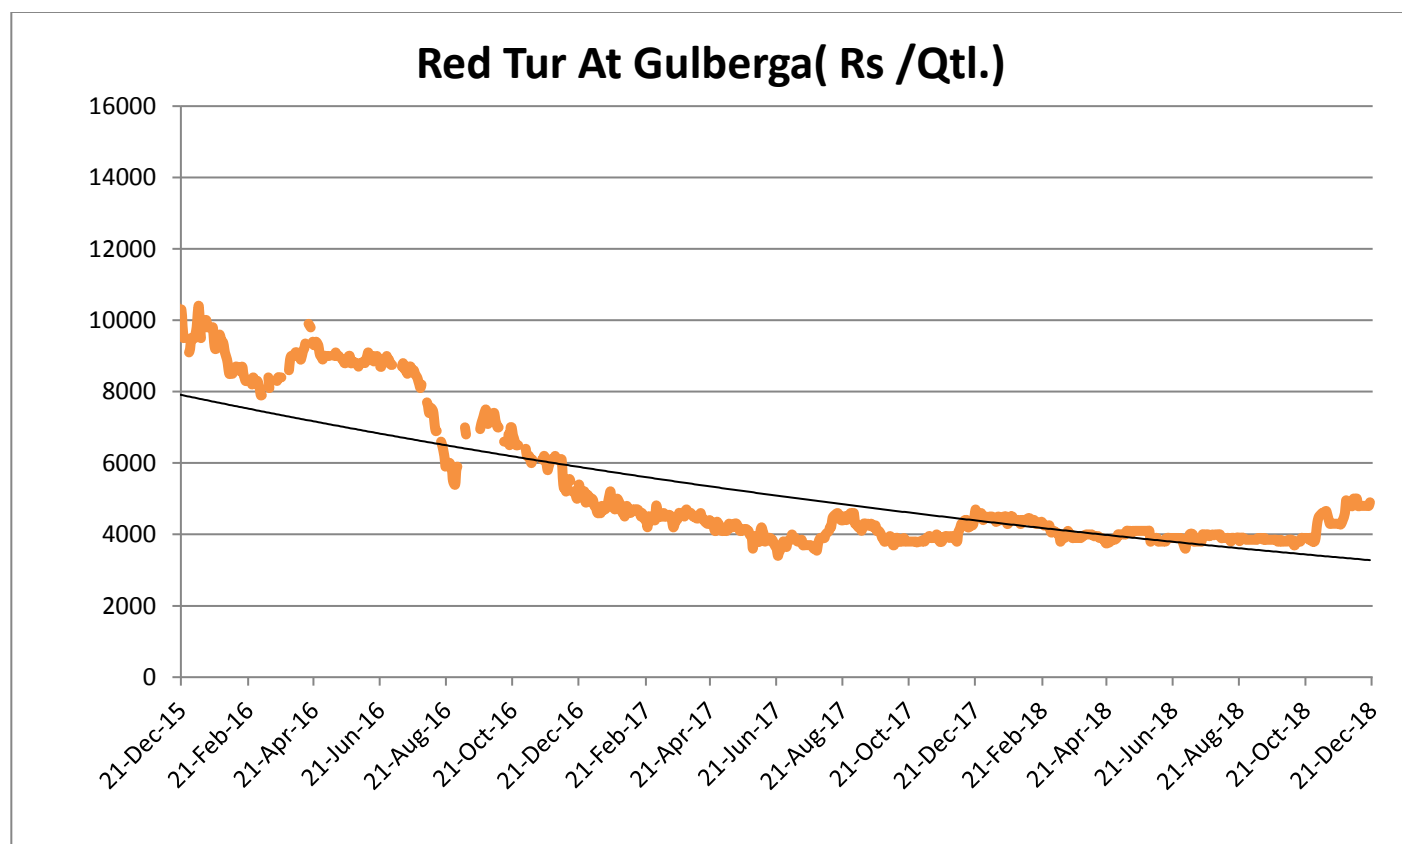

Pigeon Pea (Tur/Toor):

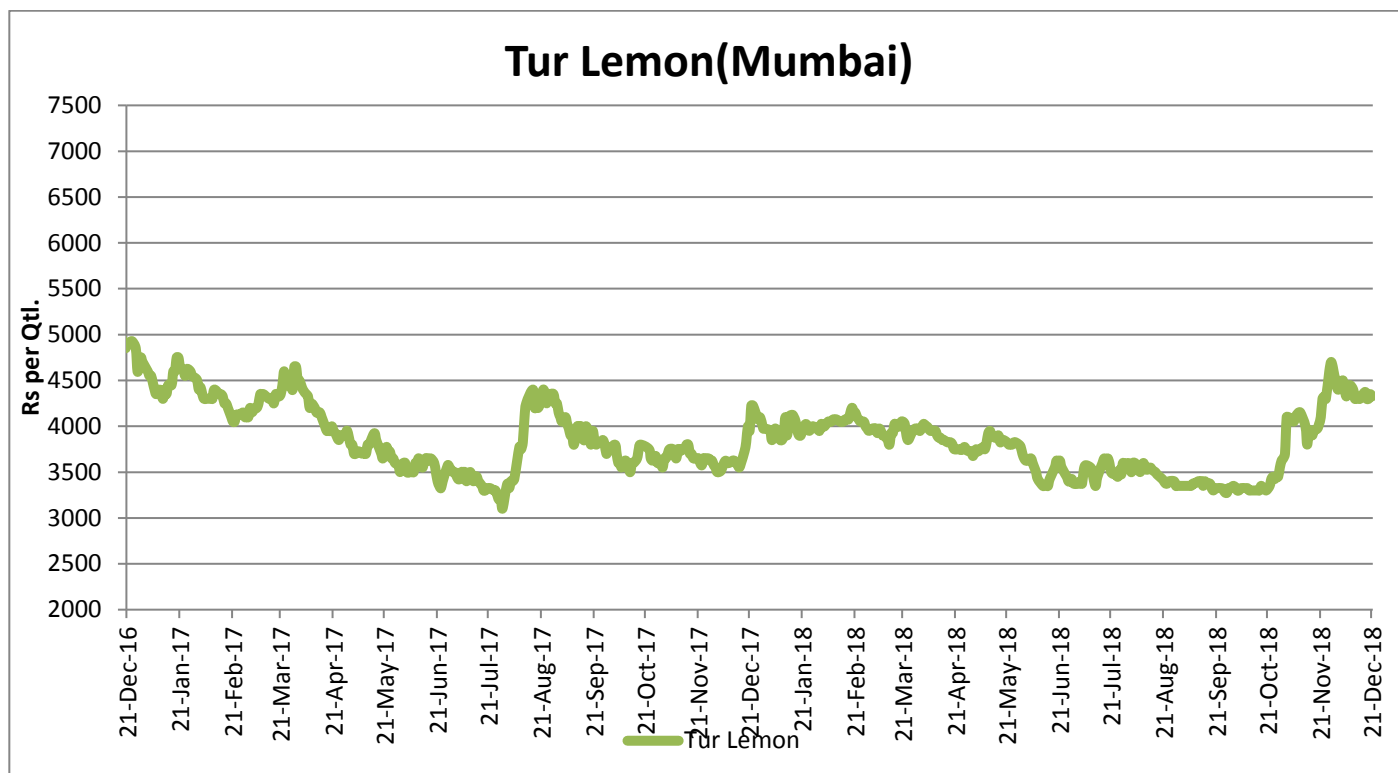

Market Recap:

Weak demand for dal has pressurized tur market and it decreased by Rs 50 to Rs4500. Some mills have brought at Rs4475 against adv payment. In fact stock at ports like Mumbai, Chennai and Kolkatta are decreasing fast. At present supply is from Karnataka while arrival from Kartiki crop is almost over. As price of tur in Karnataka markets are high, so there is no parity for tur in north and central India if brought from Karnataka at current price. Imported stock from Malawi, Sudan & Mozambique has already been consumed now. So, Agriwatch expects market to move up once again.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amidst stockists demand and fear of lower yield may push up market further. However, downward correction of Rs 100 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

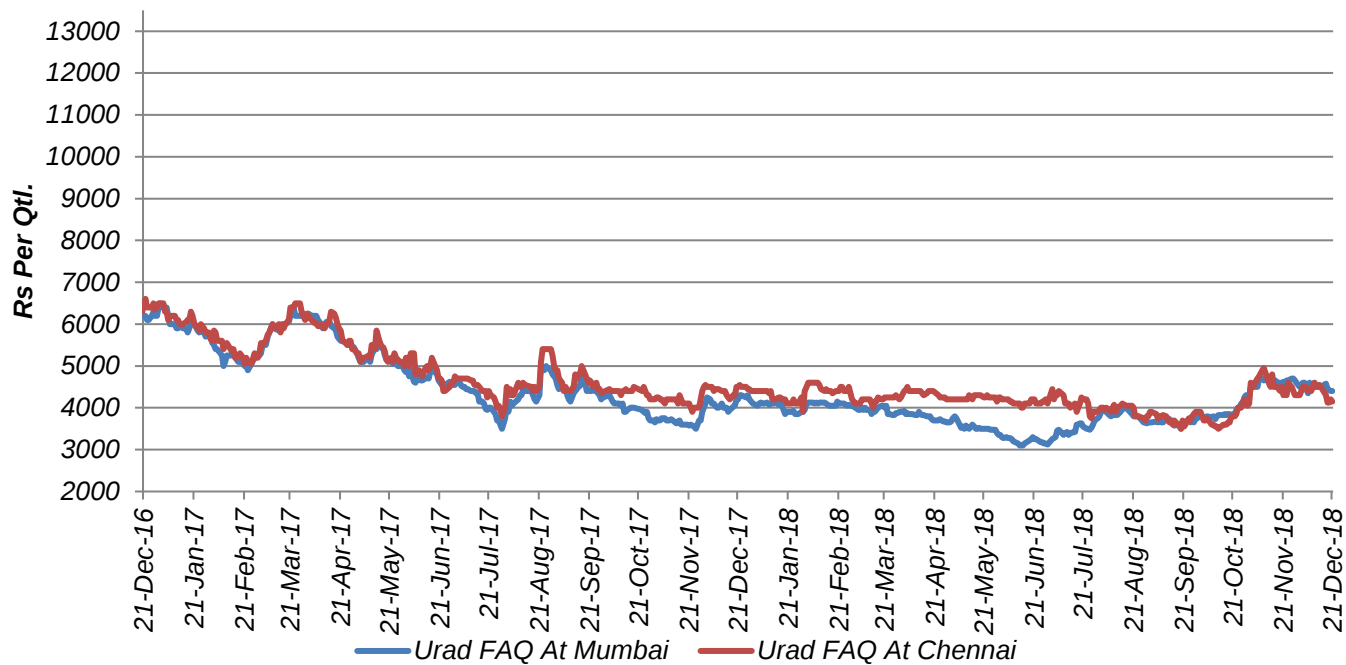

Pending decision on import and higher volume of import has affected cash market sentiments badly. If import flow continues with current pace, firmness in market is unlikely. Weak demand for urad dal and talk of arrival of illegal containers at Chennai ports discouraged buyers to continue buying. It resulted market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt.'s may decide to ban illegal import completely.

Current Market Dynamics & Outlook:

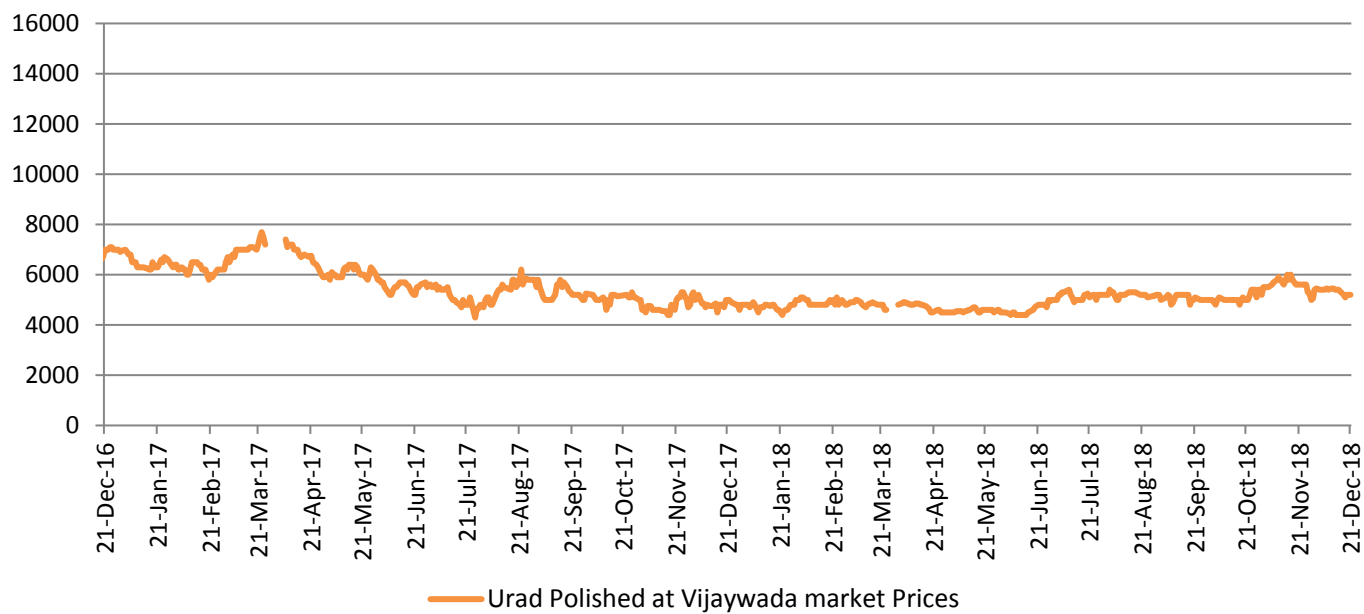

Urad FAQ at Mumbai (Rs 4400-.4450 per Qtl.) and Chennai (Rs. 4150-4250 Qtl.) noticed weak tone. It traded weak in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the price movement in different markets:-

URAD FAQ

Urad Polished at Vijaywada

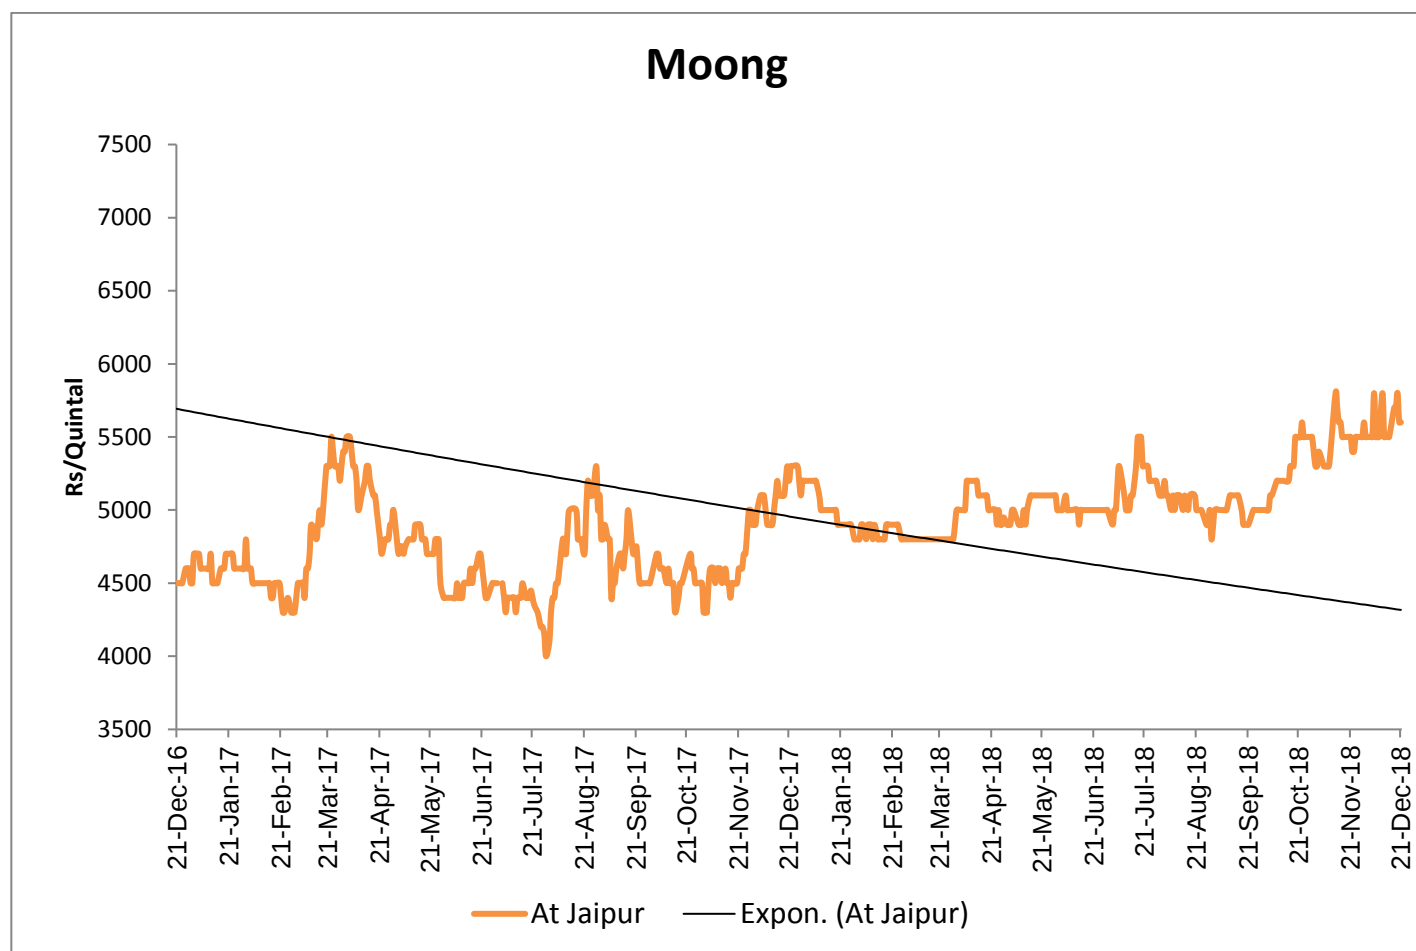

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week.

Green Gram (Moong):

Market Recap:

In Delhi market, moong from Jodhpur line is being traded at Rs5800-6000 per qtl. Besides, there is no parity for Rajasthan moong in north India at current price. New crop is expected now only from mar-Apr next year. Moong arrival from Kekri and Kishangarh line ended in Oct, one month before normal arrival. Maximum stock was brought by local mills there. Even parity from Jodhpur line ended with increasing price. Right now buying is on from jaisalmer and Jalgaon line. In Delhi market, Shekhavati line average moong is being traded at Rs 5500-5700. So, any dip from current levels is unlikely now.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Dec.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4450 to 4650 levels in this week..

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4550 and second target 4650 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4400	4450	4500	4650	4750

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4400- 4700 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4575 with the first target of 4500 and second target 4450 with stop loss at 4600 level.

Support & Resistance
