Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

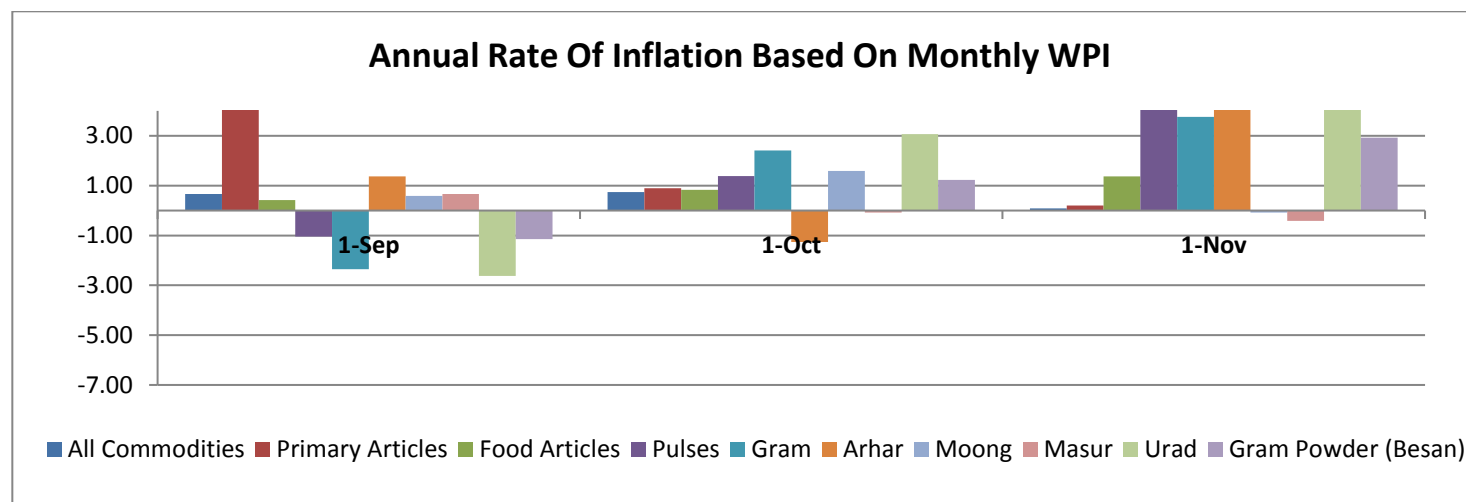

- **Rabi pulses area decreased by 6.34 % to 140.67 lakh ha against 150.19 lakh ha last year as on 28 Dec-2018.** Chana area is running behind by 10.63 % to 91.64 lakh ha against 98.40 last year till date. Farmers have covered 2.89 % lower area under lentil so far to 16.40 lakh ha against 16.89 lakh ha last year. Pea area is up by 9.12 % to 9.97 lakh ha. Urad area is running behind by 8.95 % to 5.87 lakh ha against 6.45 lakh ha last year. However, moong area is running up by 5.42 % to 3.08 lakh ha against 2.92 lakh ha so far. As sowing is getting delayed, area under rabi pulses unlikely to touch last year level.. See sowing table on page no 13. Chana area decreased by 10.63 % and it helped chana cash market to recover. However, any spike is unlikely in coming weeks.
- **Central govt. has allowed to export tur, moong and urad dal from India. It may help market** to recover in the medium term. Exporters are expecting export incentives to be competitive in global market. Right now parity is not in favor of India as dal is available at very competitive price in global market. Myanmar, African countries are supply it at lower price.
- **Govt has allowed export for Tur dal and it would support cash market from Jan end.** As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness from mid Jan, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market tur is being traded at Rs 4800-4900 per qtl. It may decrease by Rs 100 with increasing arrivals. However, with commencement of procurement, it would cross 5000 by mid Jan.
- **More than one lakh tonne import in Nov & around 2 lakh tonne combined in Oct-** Nov impacted urad cash market negatively during last two weeks despite 8.95% lower rabi acreage. Higher import and weak demand distorted market sentiment and it decreased by Rs 200 in cash market to Rs 4300-4400 per qtl. Now, market is expected to adjust excess supply from imported stock and may find balance once again in coming weeks. This week it may trade range bound and as soon as demand improves, it would move up once again.
- **Demand for moong and dal was registered weak during review week and it affected firm** sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market.
- **New chana in south India has started trickling in market. Production is likely to decrease due** to unfavorable weather condition. Sensing lower production govt. seems alert and have instructed Nafed to go slow for pulses selling. Demand for chana and dal is likely to be normal. So Agriwatch expects market to stay steady to slightly firm in coming weeks. Chana and chana dal traded lower during review week. Actually weak demand for dal pressurized dal market. However, improvement in demand is expected now once again. In Delhi market chana is being traded at 4550-4600 per qtl while dal is being traded at Rs 5600-5700 per qtl.
- **Increasing cold in masur growing belt has started affecting standing crop and if it continues** for more 10 days, it may impact yield 10 to 20 % from normal. So next 10 days are very crucial for masur crop and its price trend. Market is trading steady currently, but may move up further if cold wave continues.
- **Total pulses import in Nov increased from 231826.99 (Oct) to 260334.61 MT. The highest increased was** seen in Urad import which increased from 76376.59 MT in Oct to 115542.2 MT in Nov. Moong import decreased from 4243.07 to only 92.2 MT in Nov. Even Kidney bean import increased from 5234.45 to 8041.17 MT in Nov-2018. Higher import of urad restricted urad price in domestic market and if import continues with current volume, it would continue to cap urad price in domestic market.
- **Peas market is expected to increase by Rs 100-150 per quintal in short to medium term** as government has increased restriction on pea until 31st March 2019. As of now desi pea at Kanpur is ruling around Rs 4750 per quintal.

International Market:

- **Global lentil market traded firm despite restricted trading activities due to year end holiday season.** Demand prospects remains good for new year. Exporters are expecting better demand from bulk users. Middle East would remain good prospective buyers. By the end of November, bulk movement to Turkey and other Middle East destinations totalled 38,200 metric tons (MT). During the same four month period this season, movement totalled 48,500 MT.
- **Despite improvement of planting area during rabi season in India global pea market traded firm.** below average rainfall in December, rabi sowing may end up with previous year's level except Chana. There is a possibility that farmers may increase sowing in first week of Jan, as cold wave in last five -six days and dew drop at night have maintained moisture level at average level. However, with such a large portion of the crop being sown late, weather conditions between January and March may be more critical in determining how much is actually produced.
- **Canadian chickpeas Agriculture Division has updated chickpea production estimate for 2018-19, based on official production and ending stock estimates.** It reports production totalled 311,000 MT from 179,000 hectares, compared to 102,000 MT from 68,000 hectares last year. Exports is expected to reach 100,000 MT in 2018-19 against 116,000 MT last season and 108,000 MT the previous marketing year. Domestic use is forecast at 67,000 MT in the coming marketing year, versus 34,000 last season.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Fava bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year
- **Lentil production in Canada is expected to decrease from 25.59 lakh tonne to 22.30 lakh tonne in For MY 2018-19.** Despite lower production total supply is expected to increase from 29.09 to 31.27 lakh tonne due to better yield, at 1.48 tonne per ha against 1.44 tonne per ha last year. Despite weak demand from India, export is expected to increase from 15.40 to 19 lakh tonne in MY 2018-19. Domestic consumption has been pegged at 4.2 lakh tonne, same as last year. Carryout and stock would decrease from 8.76 to 7.35 lakh tonne. Average price for the year has been projected at \$340-370 per MT against \$475 per tonne last year. Harvested area has been pegged at 1509 thousand ha.
- **Dry pea area in Canada is expected to decline by 11.71% to 14.62 lakh ha in 2018-19.** it was 16.56 lakh ha last year. Yield is expected to increase slightly from 2.50 to 2.55 tonne per ha in 2018-19. Production is likely to decline by 11.60 % to 36.35 lakh tonne in 2018-19. It was 41.12 lakh tonne in 2017-18. Import is likely to increase from 12 to 15 thousand MT. Export is likely to decline by 6% from 30.86 to 29.00 lakh tonne in 2018-19. Domestic use is likely to increase by 30.81% to from 6.88 to 9.01 lakh tonne. prices are likely to hover in the range of \$220 to \$250 per MT.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

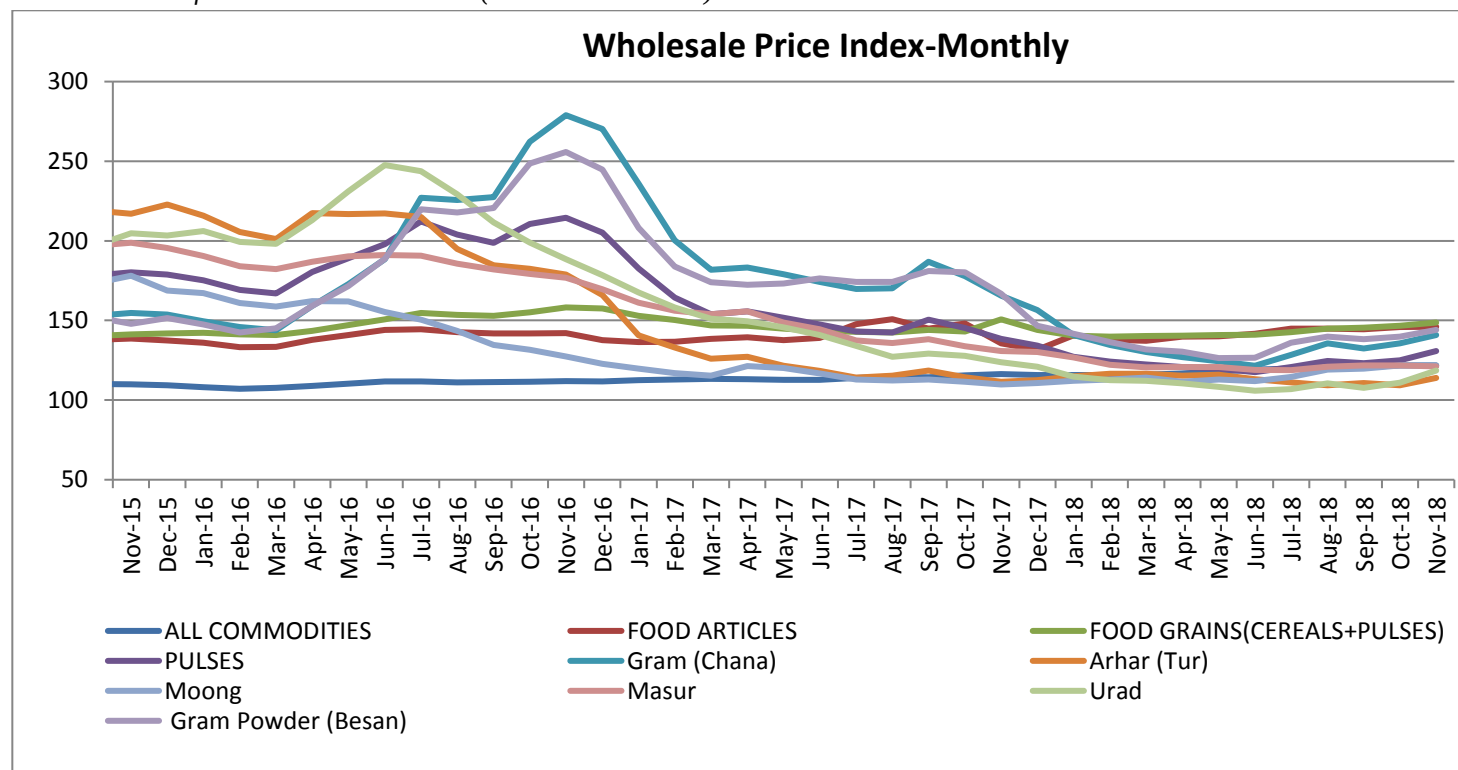

Weekly Outlook: -Pulses prices are likely to trade steady to firm

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 5.9 point from 124.9 in Oct to 130.8 in Nov-2018.

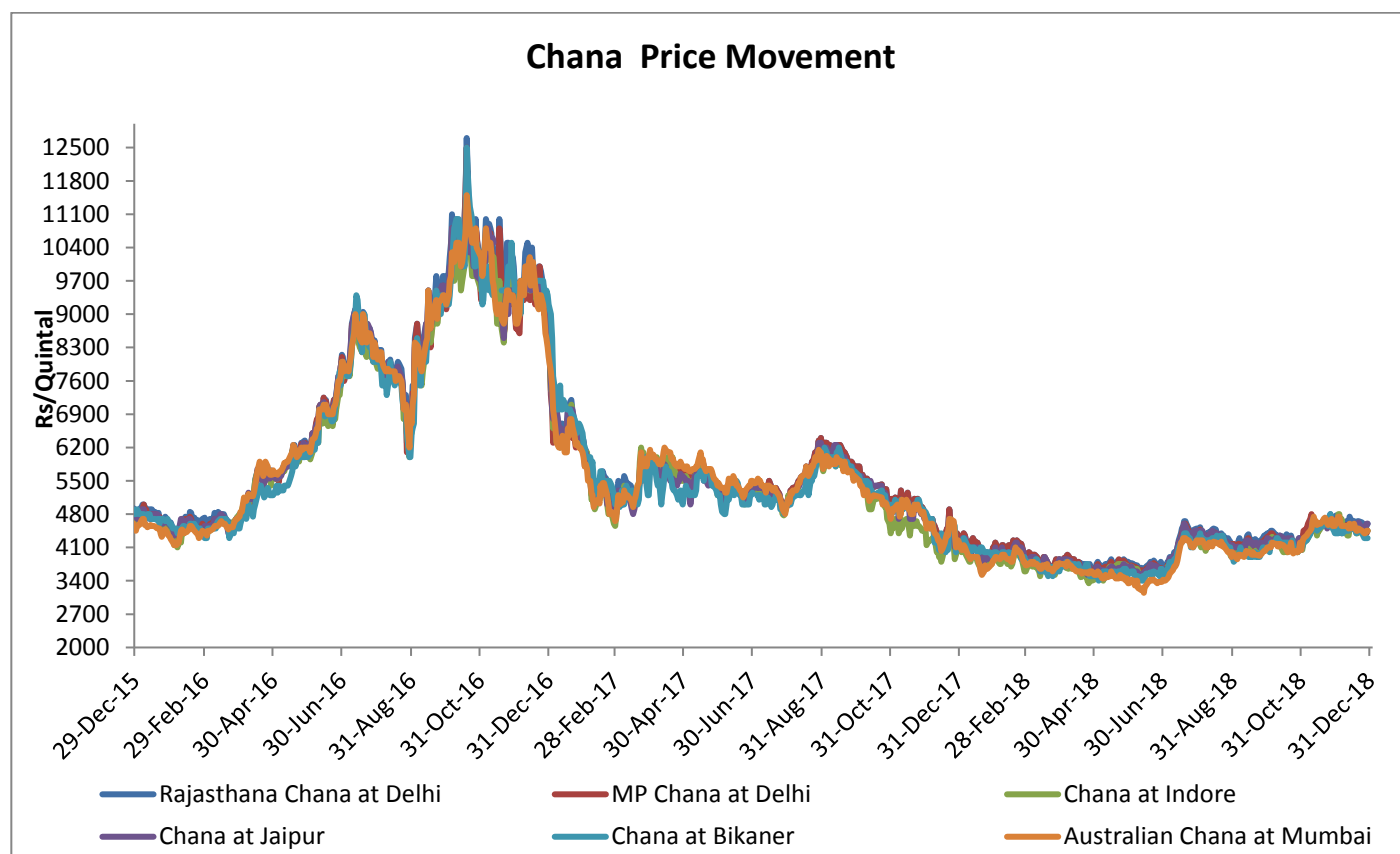

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded lower taking clue from weak futures. However, lower area coverage has helped market to recover to some extent. Sentiment still remains weak as south Indian demand from central and north India is expected to decrease with commencement of new chana in AP. Market is likely to stay steady to slightly weak and may trade at Rs4450-4550 in Delhi market. Arrival is lower and sellers are unwilling to sell at current level. As there is much stock in central pool, any spike is unlikely despite lower incoming crop. New crop in central India is only two months away so stakeholders should release stock at every improvement. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period.

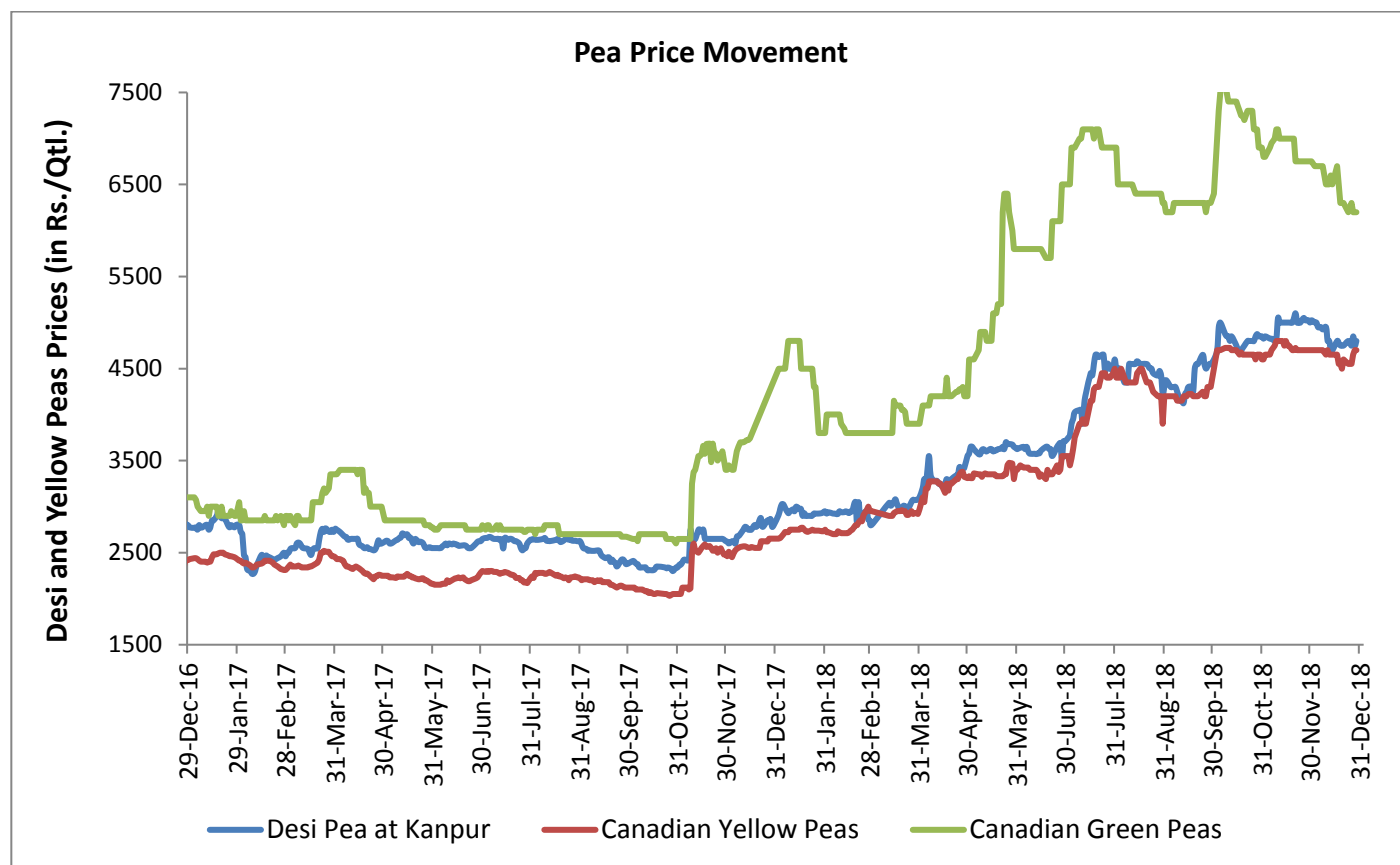

All India average price for Chana decreased by 1.41 percent from Rs 4524 to 4160 per qtl. Australian Chana price too moved down by 1.55 % to Rs 4430 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool despite lower area coverage.

Peas (Matar):

Market Recap:

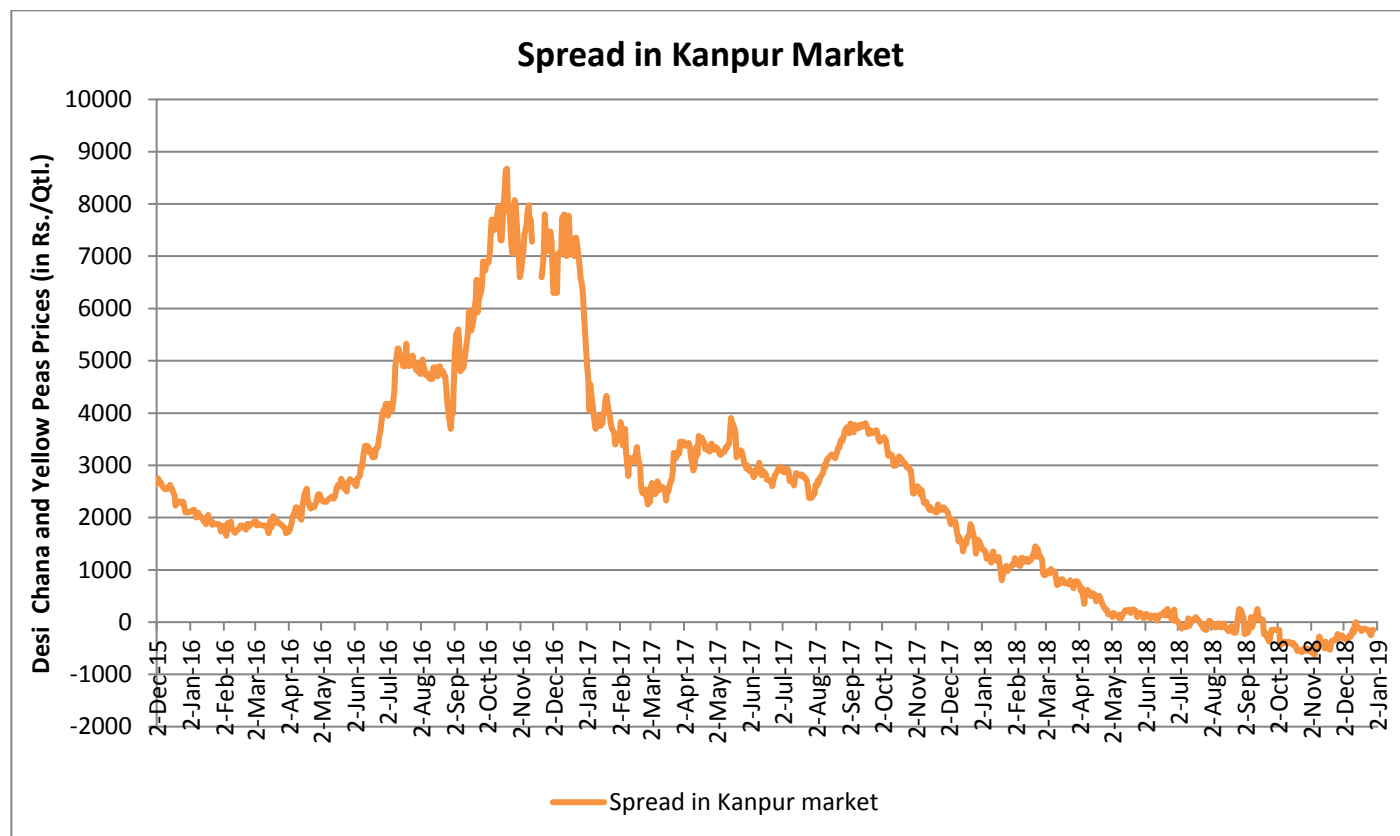

Govt has extended import restriction from Dec to March 2019 and it has lent some support to cash pea market despite lower stock at ports. It can be termed as temporary recovery. If chana trades lower, it may decrease again. Marriage season is off now. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Overall sentiment remains weak. Area in MP, UP and other states is up by 9.12 % to 9.97 lakh ha so far. Overall tone remains weak in the near term.

Current Market Dynamics & Outlook:

Pea traded at Rs 4700 in Kanpur market, slightly up than last week due to extension of import ban till March-2019. Demand for besan is weak as chana is available at cheaper price. In short term demand is expected to remain weak due to higher availability of green vegetable and weak chana market. Import is not possible till March-2019.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 150 to 250 per quintal in Jan on relative movement in Chana price. Gam may widen further.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Increasing cold in masur growing belt has started affecting standing crop and if it continues for more 10 days, it may impact yield 10 to 20 % from normal. So next 10 days are very crucial for masur crop and its price trend. Market is trading steady currently, but may move up further if cold wave continues.

Current Scenario:

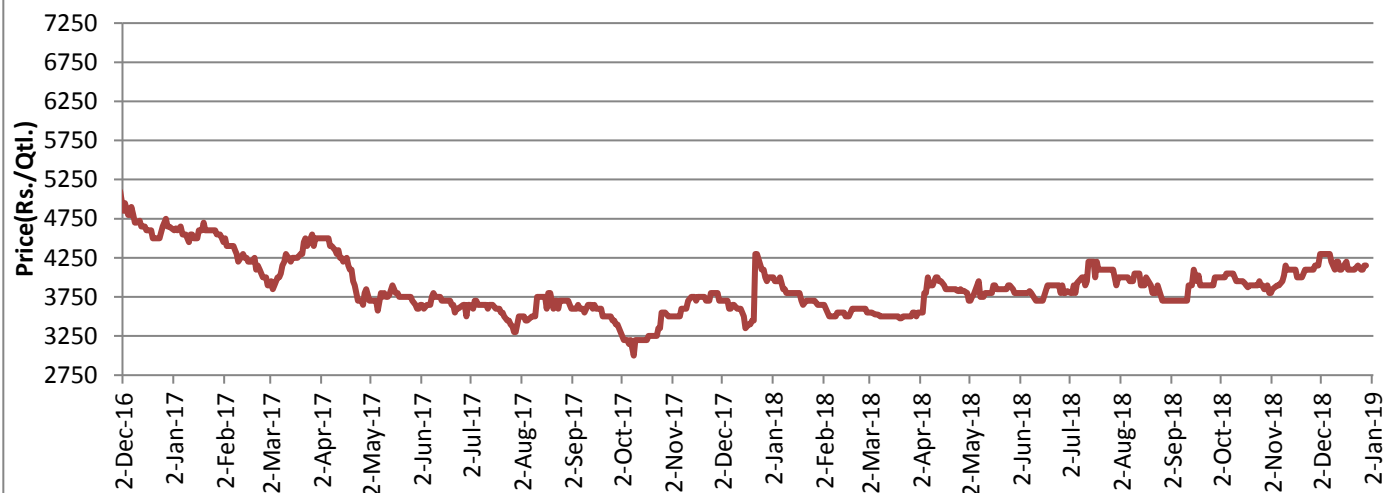

In the 4th week of Dec-2018, average price in key market like Kanpur was up by 1.41 % to Rs 4120 per qtl. Prices are likely to trade steady to slightly firm in Jan to a certain extent.

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice steady to firm movement due to increasing fear of crop loss.

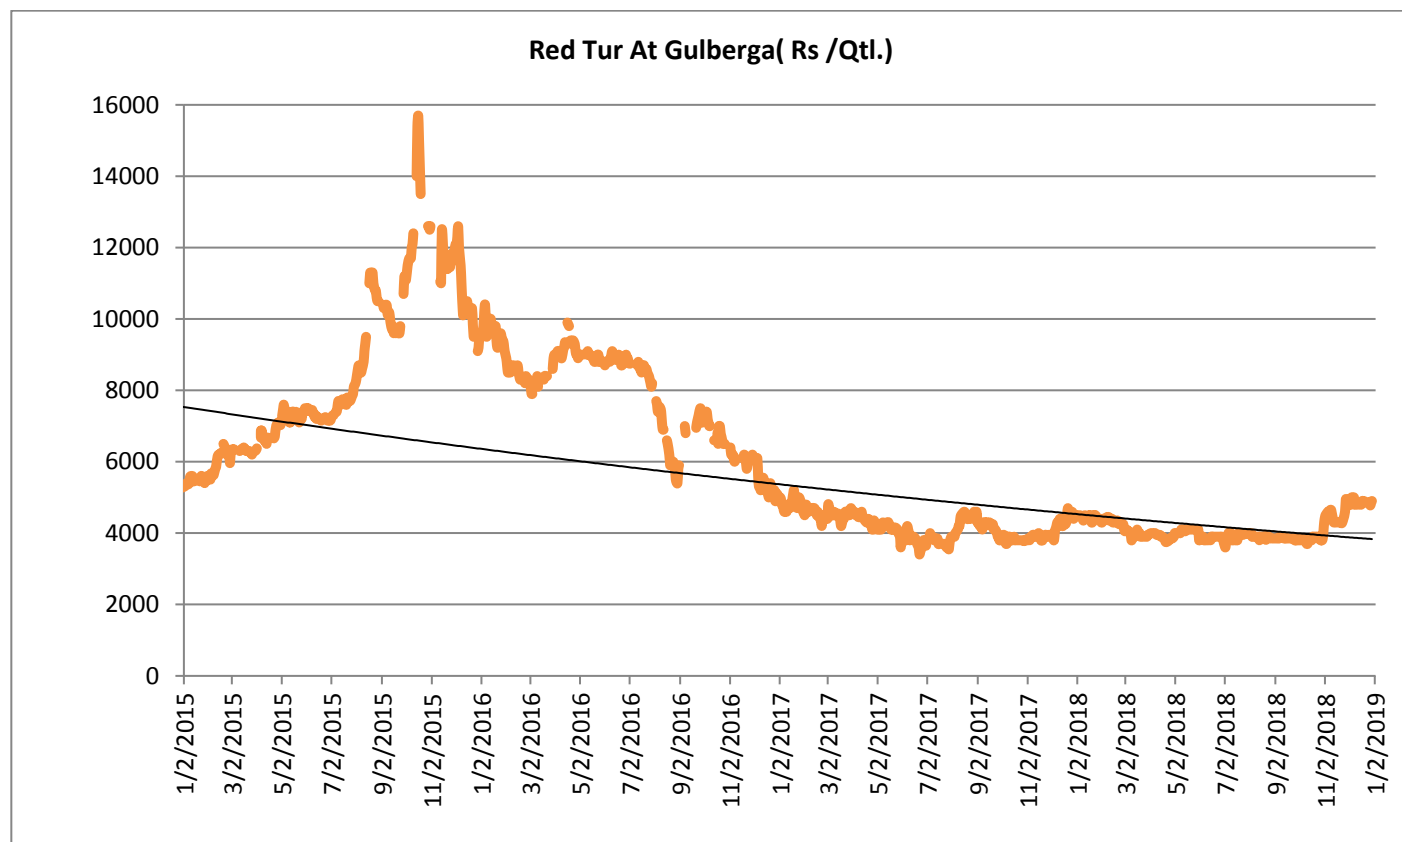

Pigeon Pea (Tur/Toor):

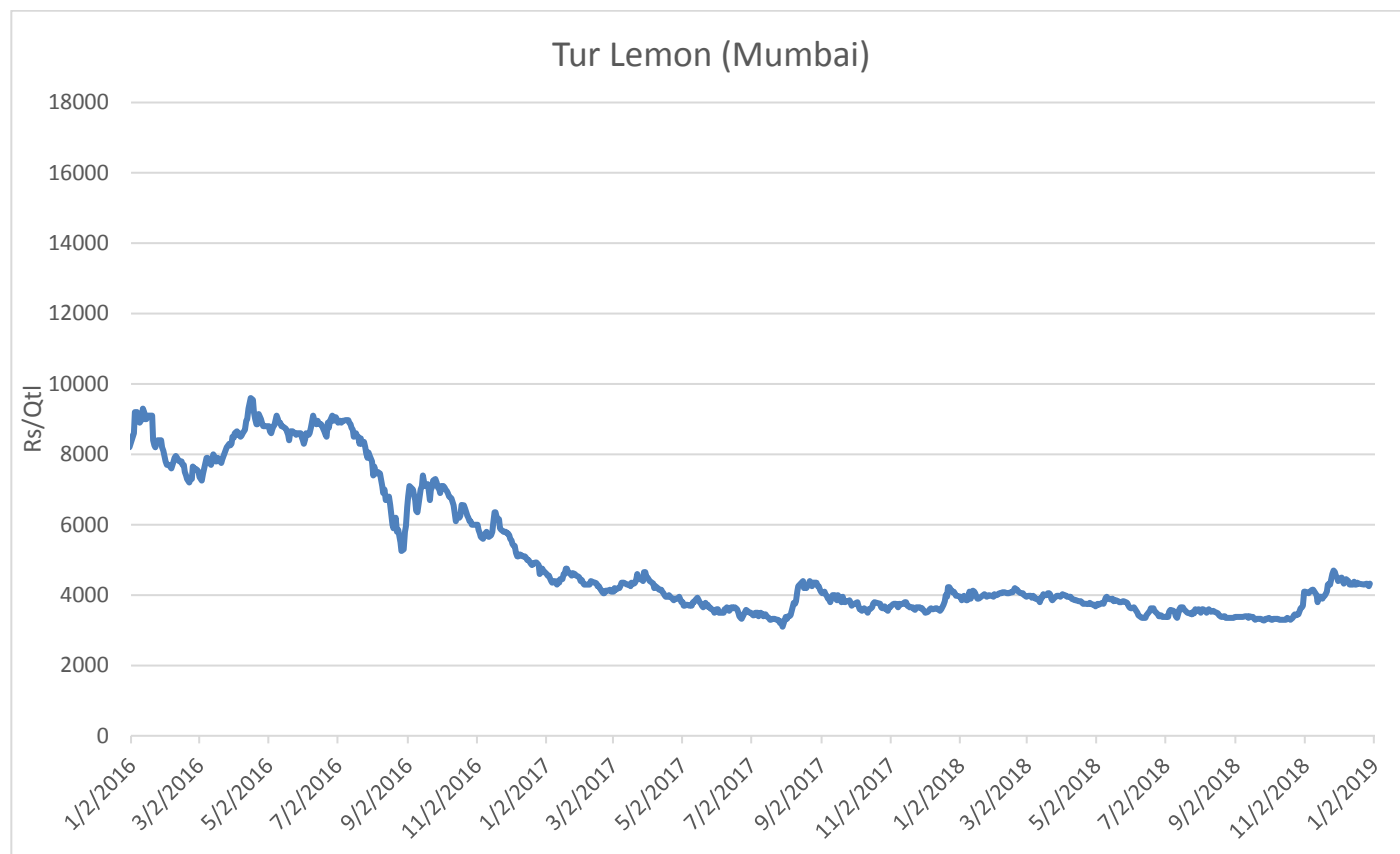

Market Recap:

Govt has allowed export for Tur dal and it would support cash market from Jan end. As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness from mid Jan, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market tur is being traded at Rs 4800-4900 per qtl. It may decrease by Rs 100 with increasing arrivals. However, with commencement of procurement, it would cross 5000 by mid Jan.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid istockists demand and fear of lower yield may push up market further. However, downward correction of Rs 100 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

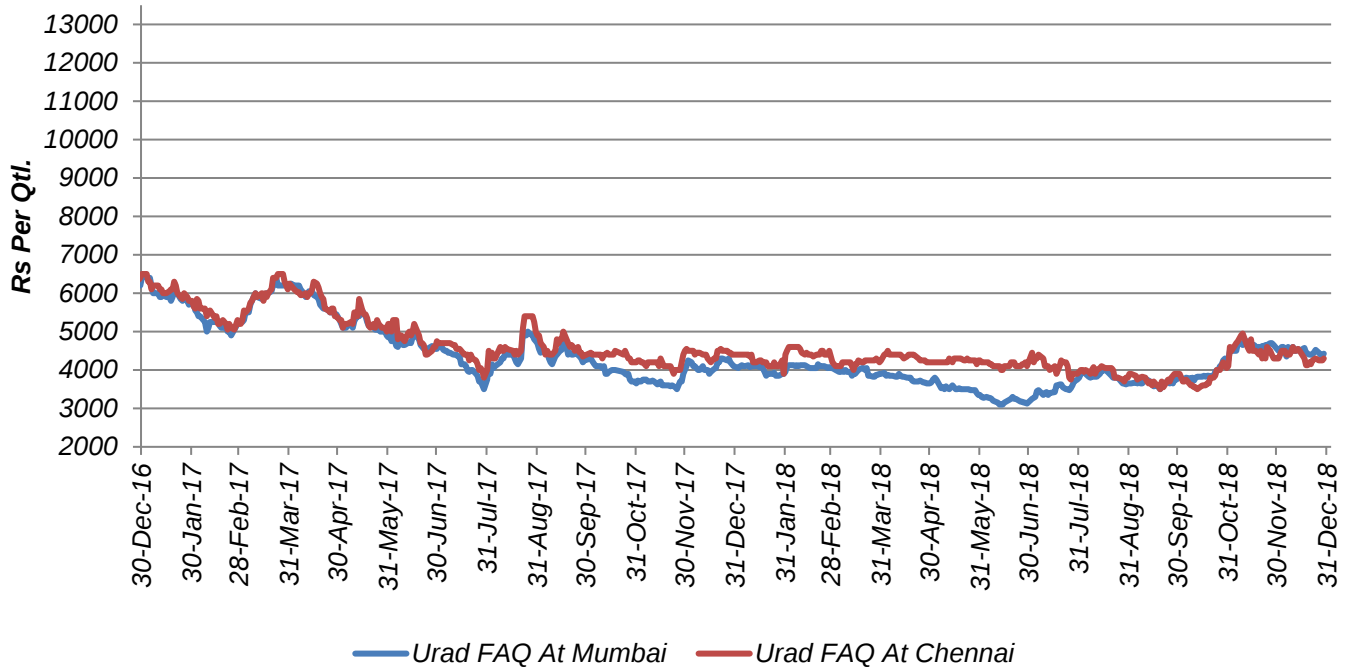

More than one lakh tonne import in Nov & around 2 lakh tonne combined in Oct- Nov impacted urad cash market negatively during last two weeks despite 8.95% lower rabi acerage. Higher import and weak demand distorted market sentiment and it decreased by Rs 200 in cash market to Rs 4300-4400 per qtl. Now, market is expected to adjust excess supply from imported stock and may find balance once again in coming weeks. This week it may trade range bound and as soon as demand improves, it would move up once again.

Current Market Dynamics & Outlook:

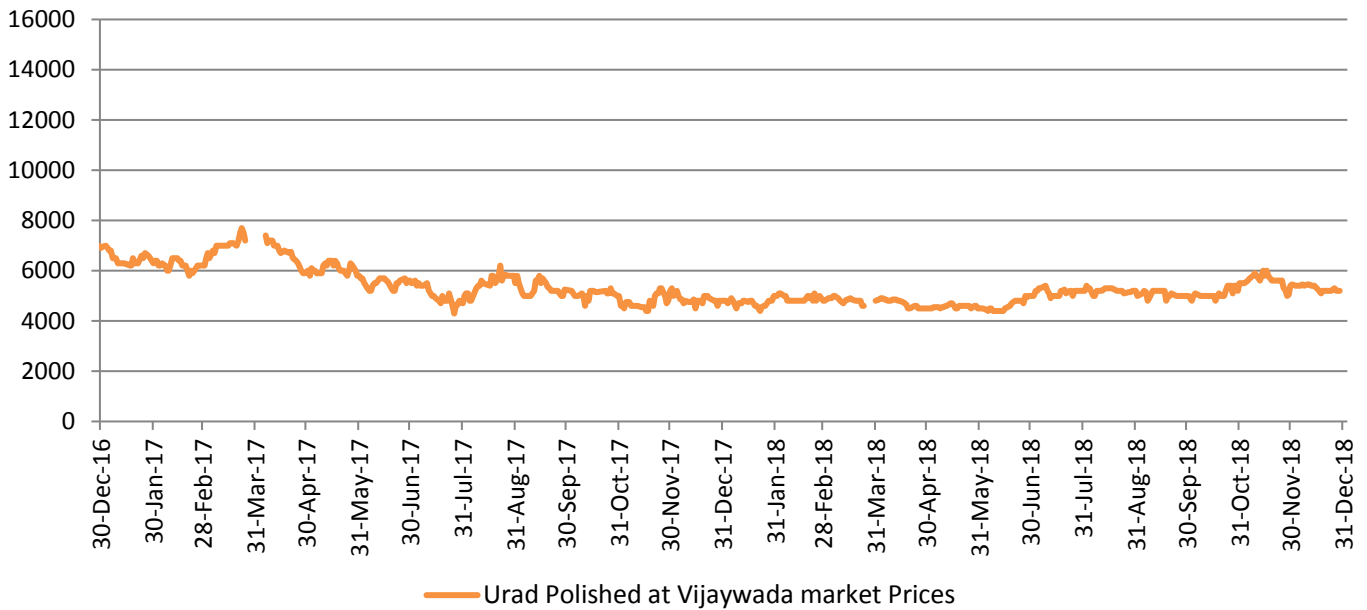

Urad FAQ at Mumbai (Rs Rs4300-.4400per Qtl.) and Chennai (Rs.4250-4350Qtl.) noticed steady tone. It traded weak in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

URAD FAQ

Urad Polished at Vijaywada

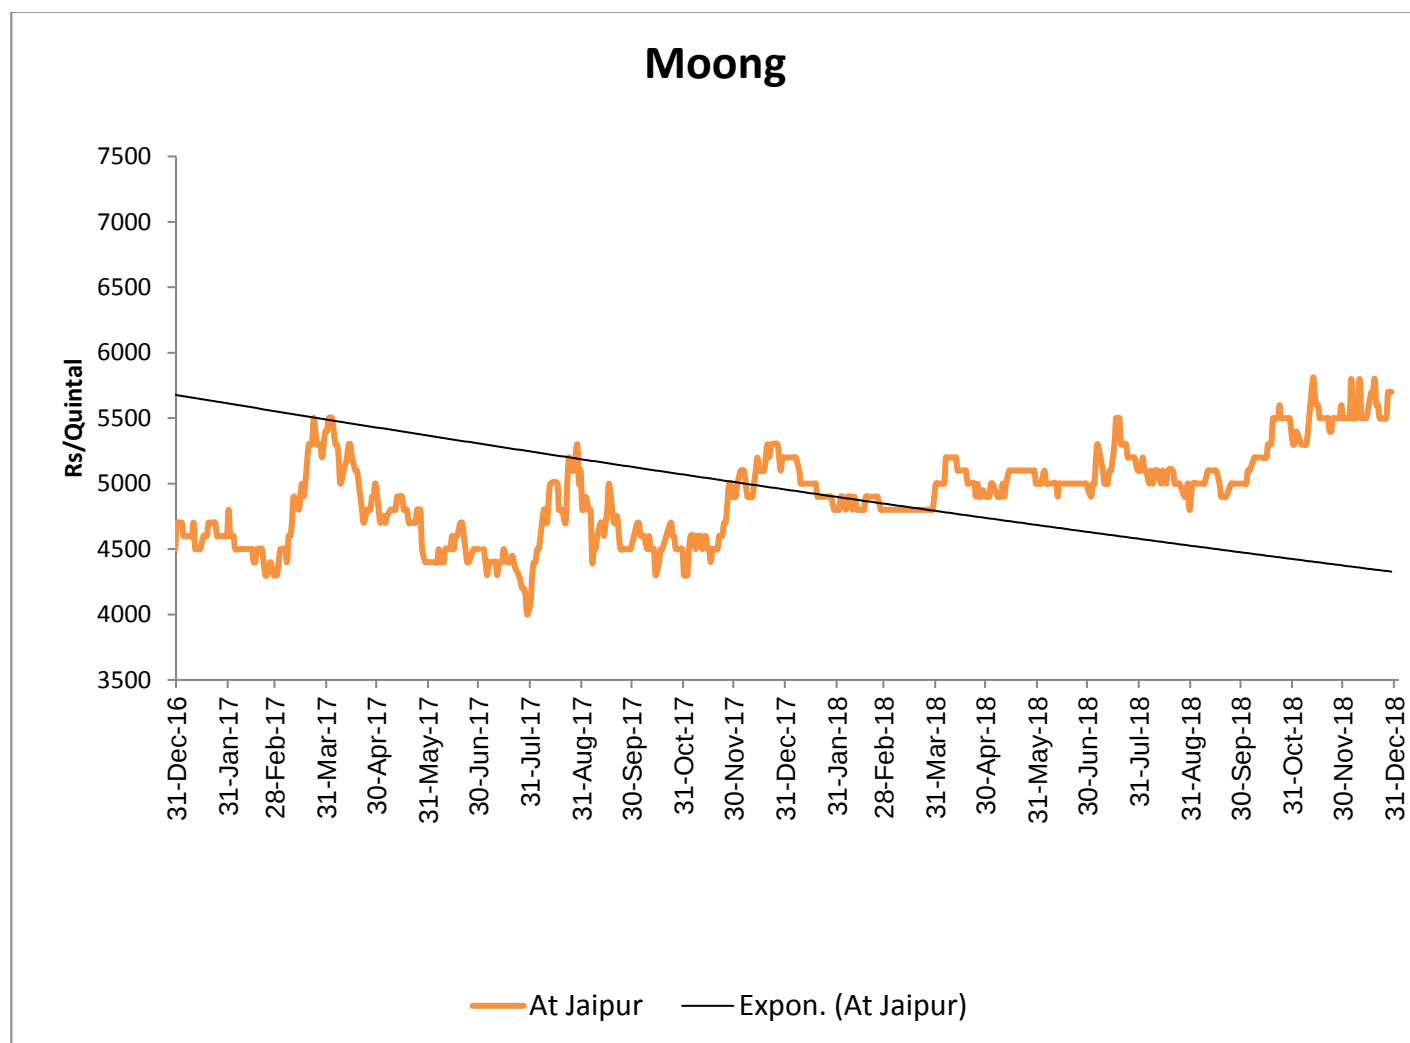

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week too

Green Gram (Moong):

Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$760 to \$730 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Jan.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4350 to 4600 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4550 with the first target of 4400 and second target 4350 with stop loss at 4600 level.

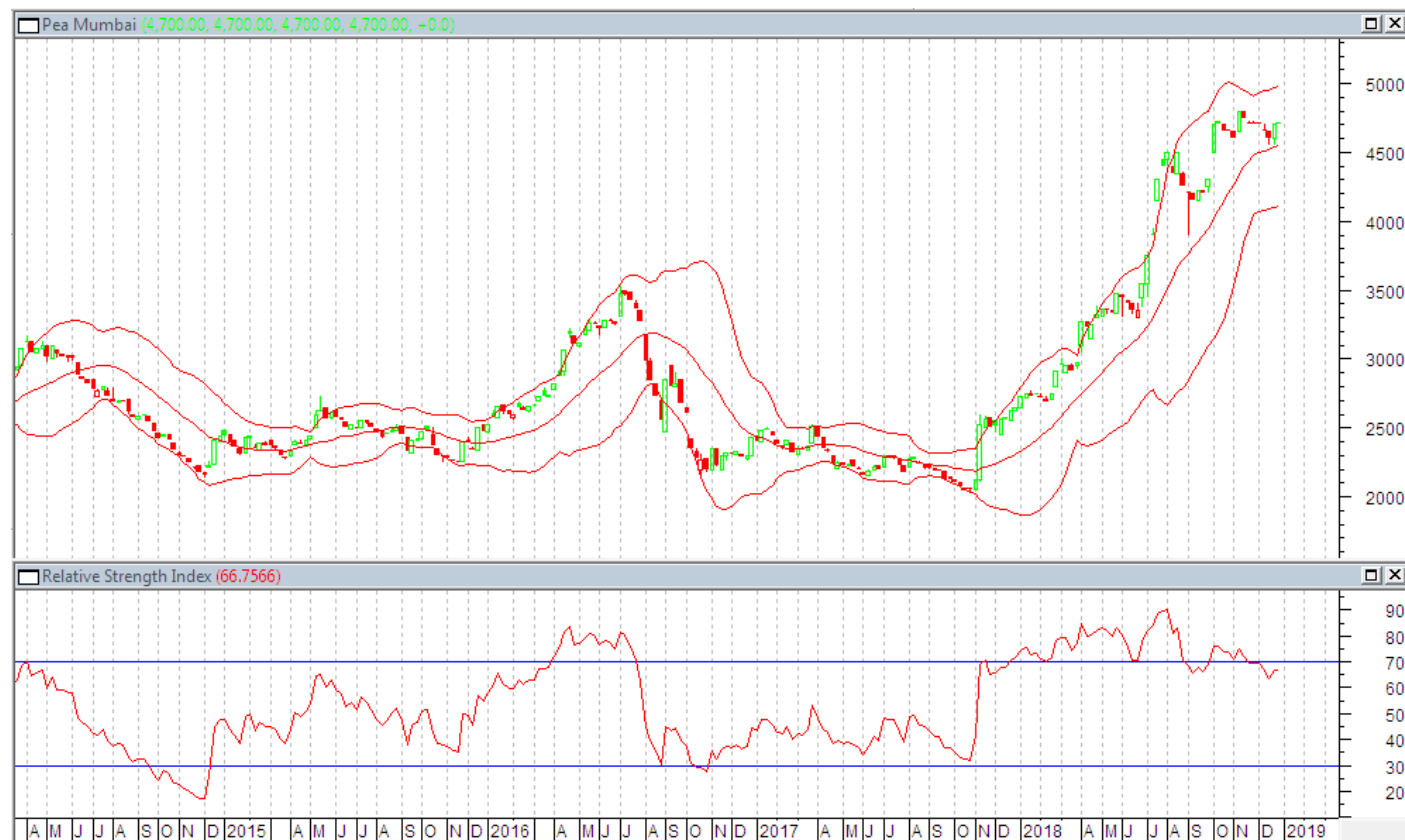

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4350	4450	4600	4700

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500- 4800 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4800 with the first target of 4600 and second target 4550 with stop loss at 4850 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4400	4550	4700	4800	5000

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to firm movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3950-4250

Strategy: Buy on dip

Trade Recommendations: Buy around 4000 with the first target of 4100 and second target 4150 with stop loss at 3950 level.
