Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

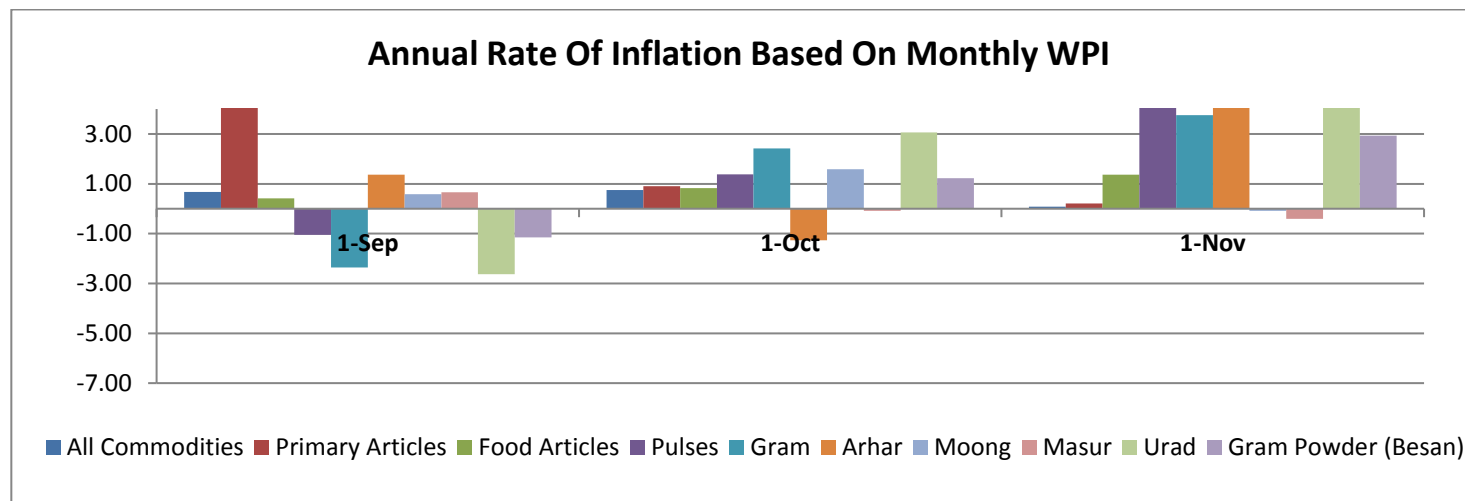

- **Rabi pulses area decreased by 6.44 % at 143.56 lakh ha against 153.44 lakh ha last year as on 4th Jan-2019.** Chana area is lagging by 10.86 % at 92.89 lakh ha against 104.21 last year. Farmers have covered 2.14 % lower area under lentil so far at 16.61 lakh ha against 16.97 lakh ha last year. Pea area is up by 10.21% at 10.10 lakh ha. Urad area is lagging by 10.17 % at 6.16 lakh ha against 6.86 lakh ha last year. Moong area too is lower by 0.44 % at 3.65 lakh ha against 3.67 lakh ha so far. Overall rabi area is unlikely to match last year's level as sowing has entered in last phase now. See sowing table on page no 3 for details.
- **Tur market is expected to trade steady to slightly firm on lower crop size of new crop, active buying by private trade and declining old stock for bulk users.** Procurement in Telangana at MSP is on and Nafed has procured 10361.30MT so far. Procurement in other states is yet to begin. It will remain supportive to tur market. In Gulberga market tur is being traded at Rs 4775 per qtl. Arrival has decreased as farmers are unwilling to sell below MSP. So, firm momentum might be seen in cash tur market. Allowing dal export may help market to recover further in coming weeks.
- **Weak demand from bulk users, over 1 lakh MT import in Nov and slower pace of procurement** pressurized cash market despite lower production, rains affected kharif crop. Besides, higher carryout too negate the effect of lower crop. Cash urad market is likely to trade range bound this week. Fresh demand from retail and bulk users are expected from Jan end. By then, Agriwatch expects market to improve once again. Govt has allowed urad dal export but its sudden impact is unlikely. Increasing fear of lower rabi production and procurement drive may help market to recover by the end of this month.
- **Moong market is likely to trade steady to slightly firm in the weeks ahead. Procurement continues** and Nafed in various states has procured 2.65 lakh MT as on 3rd Jan-2019. It has procured 208366.47 MT in Rajasthan, 29136.74 MT in Karnataka, 13375.31 MT in Telangana and 12804.27 MT in Maharashtra including Markfed procurement. The rest quantity was purchased in other states. As demand is weak, prices are likely to stay steady in coming weeks. Now new crop would be available from mid Mar, so any dip is unlikely in cash moong market. Selling from central pool would remain halted till procurement.
- Continued cold wave in parts of chana growing region in MP is likely to affect standing crop of chana, which are under flowering stages. In Maharashtra, moisture stress is still affecting late sown crop. Area under chana is almost 10 % lower and farmers in AP are unwilling to sell new crop at prevailing market price. Chana prices have decreased due to weak demand from mills and weak futures. However, fundamental for chana remains firm in the medium term and market is expected to start recovering by end Jan once again. Nafed would reserve 4 lakh MT chana stock for PDS in MP. Nafed has 15.64 lakh tonne chana in stock in MP. Buyers and sellers are inactive right now as demand for dal is weak. So stake holders should buy after a dip of Rs 100-150 more from current level. As crop size would be lower (83 lakh tonne), good return might be expected in second half of the year. Right now inner tone remains weak.
- **Crop size of lentil is expected to be lower due to lower seeding, deficient rains and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED has sold 25706.27 MT of masoor at an average price of Rs 3529.79 per quintal until 1st Jan-2019. NAFED has balance of 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh MP has 161612.61 MT stock while UP has 7985.10 MT. NAFED may decide to restrict selling, sensing declining stock in domestic market and for supporting domestic price. Agriwatch expects lentils to remain in uptrend mode in near future.
- **Central govt. has allowed to export tur, moong and urad dal from India. It may help market** to recover in the medium term. Exporters are expecting export incentives to be competitive in global market. Right now parity is not in favor of India as dal is available at very competitive price in global market. Myanmar. African countries are supply it at lower price.

International Market:

- **Chickpea production in Canada is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne** in 2018-19 due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19. Domestic use would increase from 34 to 67 thousand tonnes. Carry-out stocks are expected to rise sharply. The average price for all grades of chickpeas is forecast to fall sharply, due to higher world and Canadian stocks.
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Lentil production in Canada is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area** and yields. Large green lentil production is estimated to have risen from last year to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Supply increased slightly due to large carry-in stocks. Export has been forecast to increase to 18 lakh tonne.** To-date Mexico, United Arab Emirates and India are the top export markets. Imports are expected to be lower than the previous year due to the above average grade distribution. Carry-out stocks are expected to fall due to the increase in exports. The overall average price is forecast to fall below the levels achieved in 2017-18 due to weaker world demand, larger domestic carry-out stocks and an above average proportion of grade distribution at the No.1 or 2 grade.
- **In the US, the area seeded to lentils for 2018-19 was forecast by the USDA at less than 8 lakh acres,** down nearly 30% from 2017-18 due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. The are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana.** With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.
- **Global lentil market traded firm despite restricted trading activities due to year end holiday season.** Demand prospects remains good for new year. Exporters are expecting better demand from bulk users. Middle East would remain good prospective buyers. By the end of November, bulk movement to Turkey and other Middle East destinations totaled 38,200 metric tons (MT). During the same four month period this season, movement totaled 48,500 MT.
- **Despite improvement of planting area during rabi season in India global pea market traded firm.** Below average rainfall in December, rabi sowing may end up with previous year's level, except Chana. There is a possibility that farmers may increase sowing in first week of Jan, as cold wave in last five -six days and dew drop at night have maintained moisture level at average level. However, with such a large portion of the crop being sown late, weather conditions between January and March may be more critical in determining how much is actually produced.

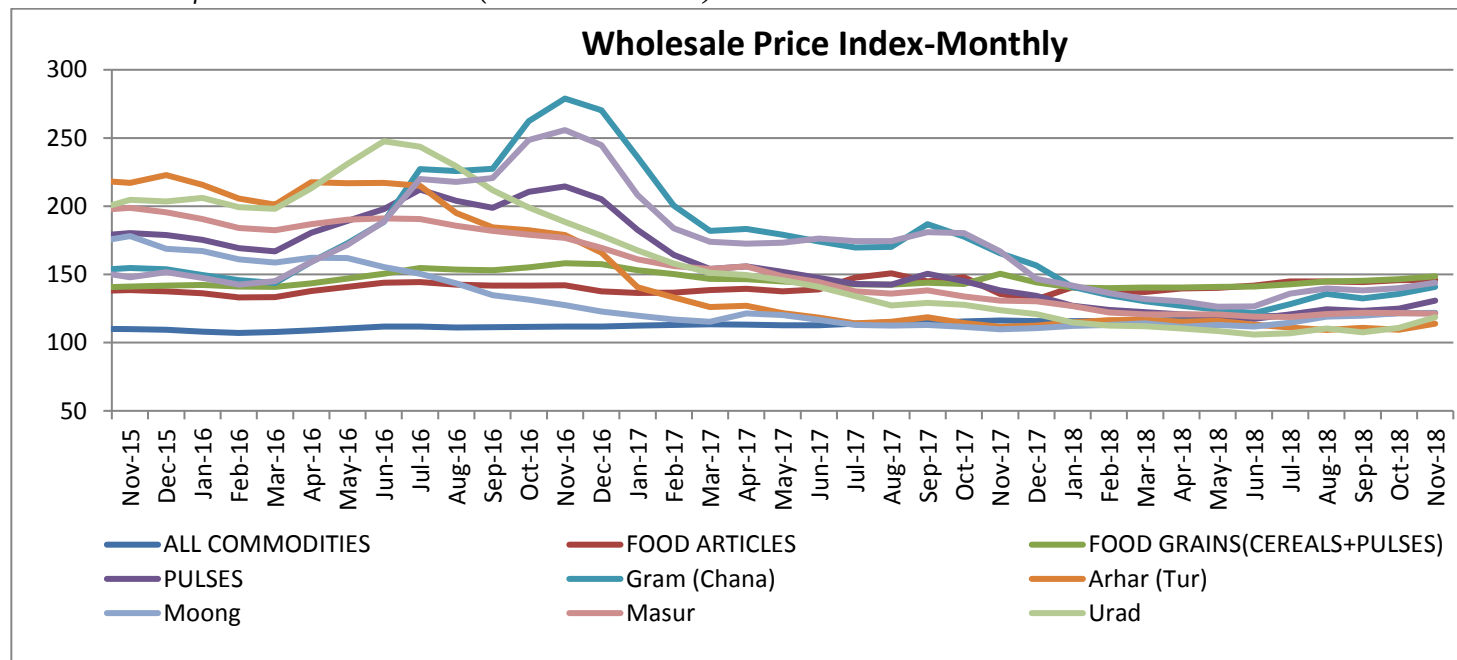

Monthly Outlook: -Pulses are likely to trade steady to slightly firm in Jan.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 5.9 point from 124.9 in Oct to 130.8 in Nov-2018.

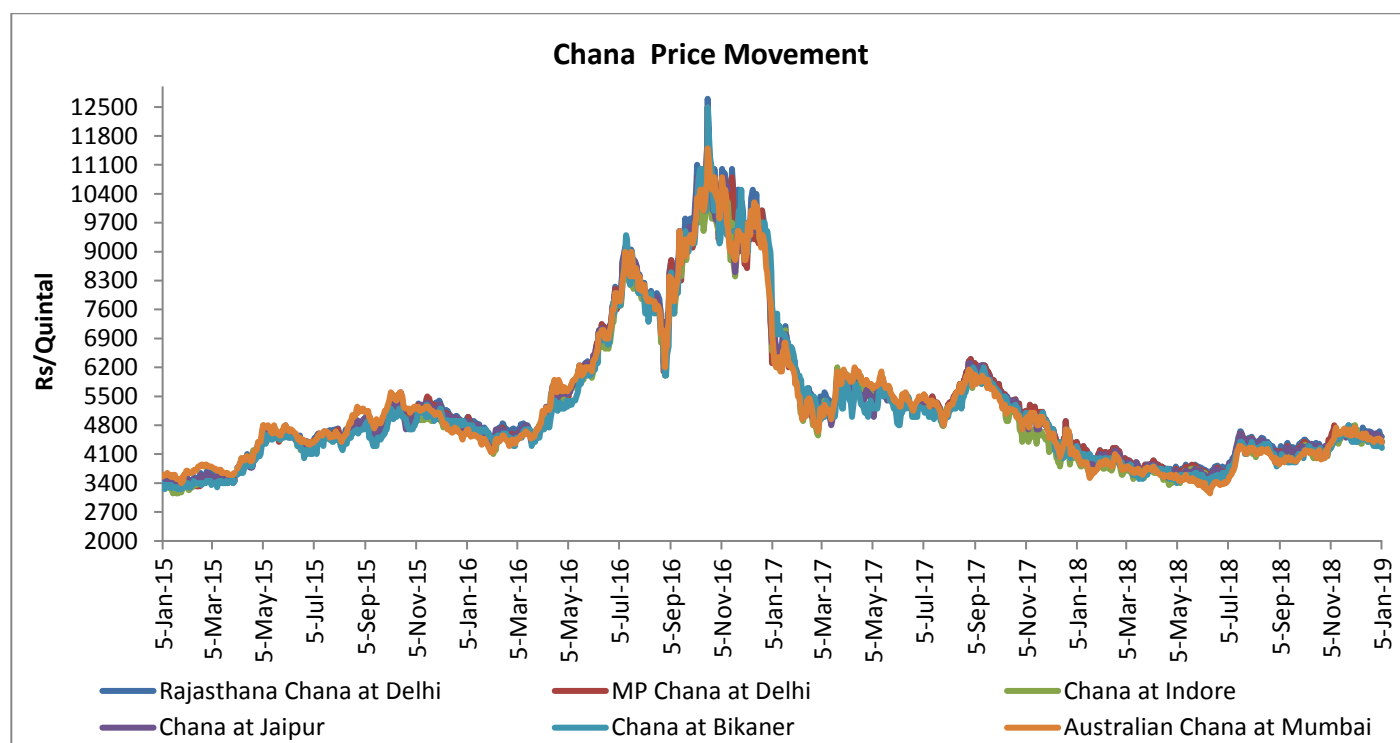

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded lower taking clue from weak futures. However, lower area coverage has helped market to recover to some extent. Sentiment still remains weak as south Indian demand from central and north India is expected to decrease with commencement of new chana in AP. Market is likely to stay steady to slightly weak and may trade at Rs 4350-4400 in Delhi market. Arrival is lower and sellers are unwilling to sell at current level. As there is much stock in central pool, any spike is unlikely despite lower incoming crop. New crop in central India is only two months away so stakeholders should release stock at every improvement. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period. Nafed continues to sell stock to release old stock burden.

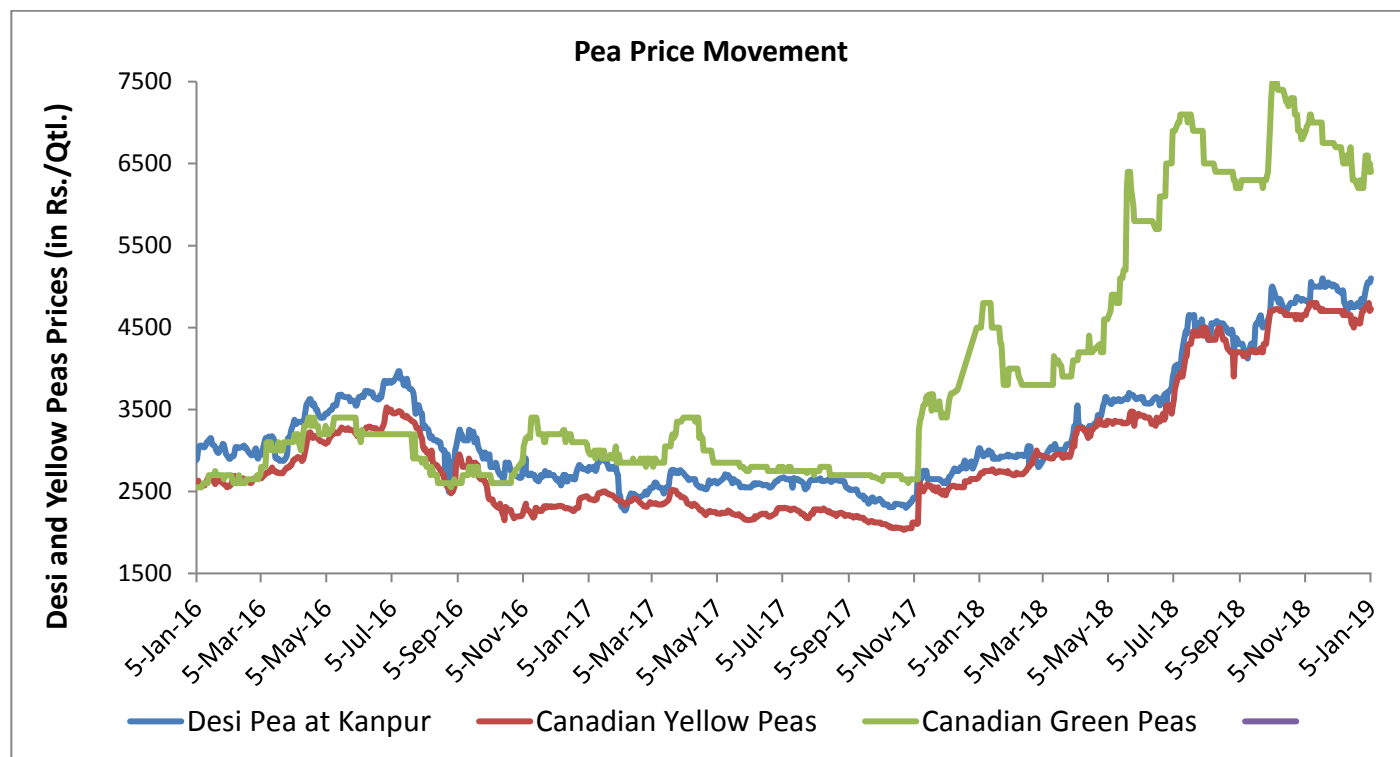

All India average price for Chana decreased by 0.35 percent from Rs 4460 to 4444 per qtl. Australian Chana price too moved down by 0.11 % to Rs 4425 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool despite lower area coverage and halted import due to higher duty.

Peas (Matar):

Market Recap:

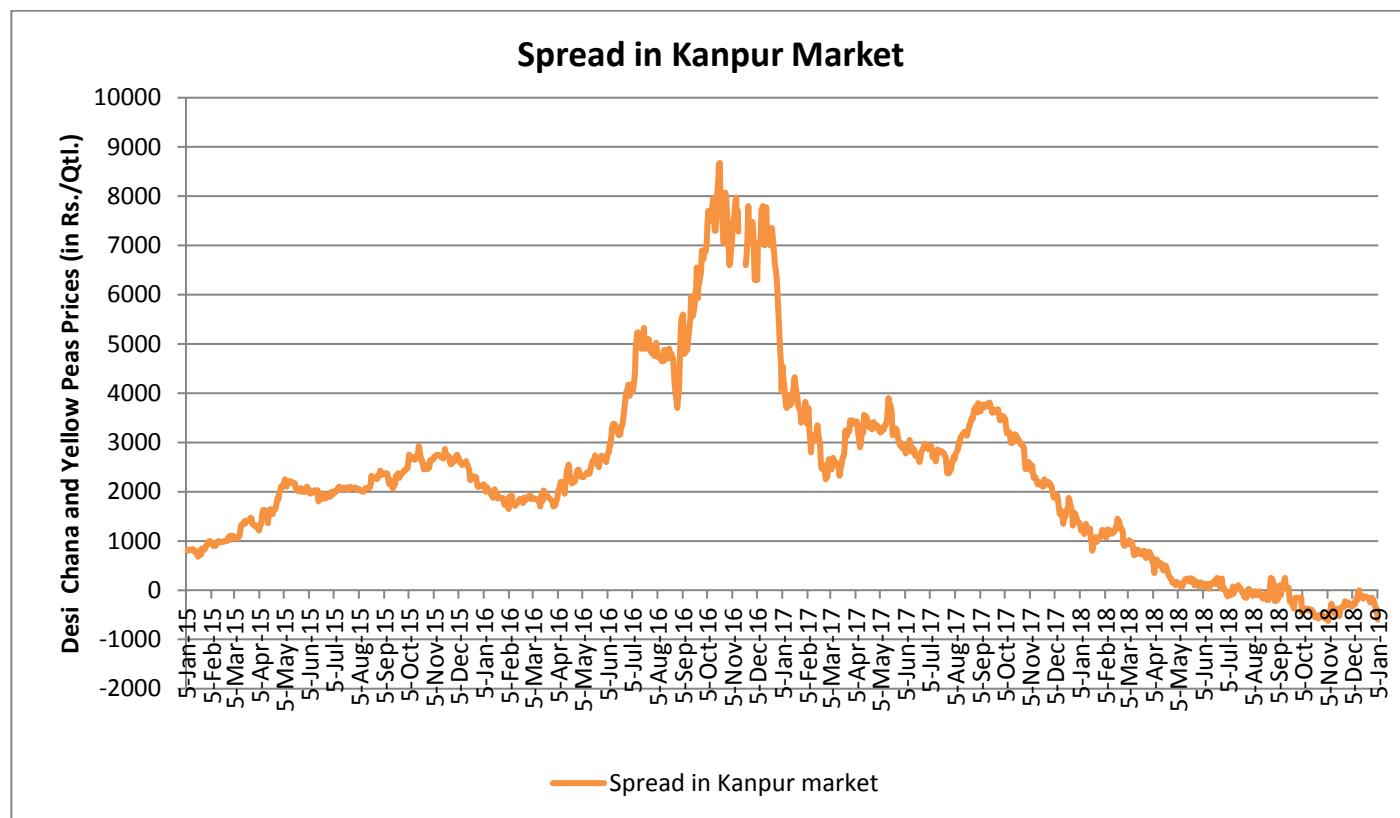

Govt has extended import restriction from Dec to March 2019 and it has lent some support to cash pea market amid lower stock at ports. It can be termed as temporary recovery. If chana trades lower, it may decrease again. Marriage season demand is off now. Besides, pea in green form is available in local market and it is available at Rs30 per kg. Overall sentiment remains weak. Area in MP, UP and other states is up by 10.21 % to 10.10 lakh ha so far. Overall tone remains weak in the near term. Selling on higher level seems good this week.

Current Market Dynamics & Outlook:

Pea traded at Rs 5100 in Kanpur market, smartly up than last week due to extension of import ban till March-2019 amid lower stock at port. Demand for besan is weak as chana is available at cheaper price. In short term demand is expected to remain weak due to higher availability of green vegetable and weak chana market. Import is not possible till March-2019. So, firm momentum is unlikely to continue.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 400 to 500 per quintal in Jan on relative movement in Chana and pea price. Gap may widen further as chana price may decrease further.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Increasing cold wave in masur growing belt has started affecting standing crop and if it continues for more 10 days, it may impact yield 10 to 20 % from normal. So next 10 days are very crucial for masur crop and its price trend. Market is trading steady currently, but may move up further if cold wave continues.

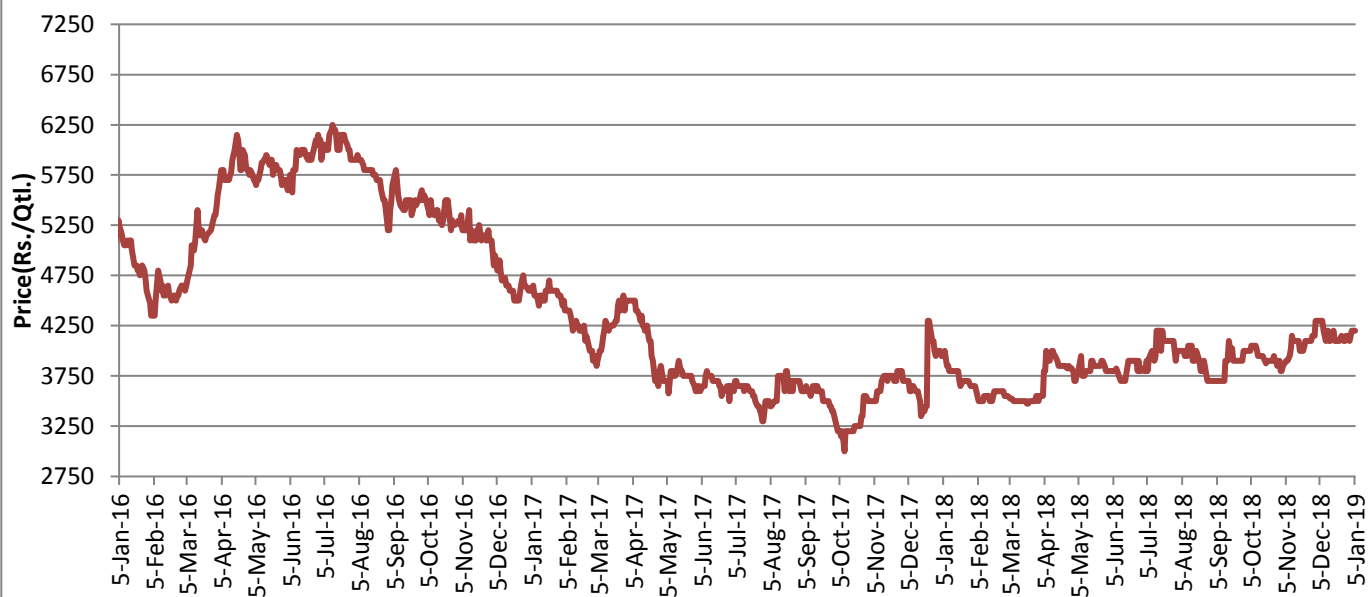

Current Scenario:

In the 1st week of Jan-2019, average price in key market like Kanpur was up by 0.76 % to Rs 4200 per qtl. Prices are likely to trade steady to slightly firm in Jan to a certain extent.

Masur at Kanpur Market

Canadian Masur at Mumbai

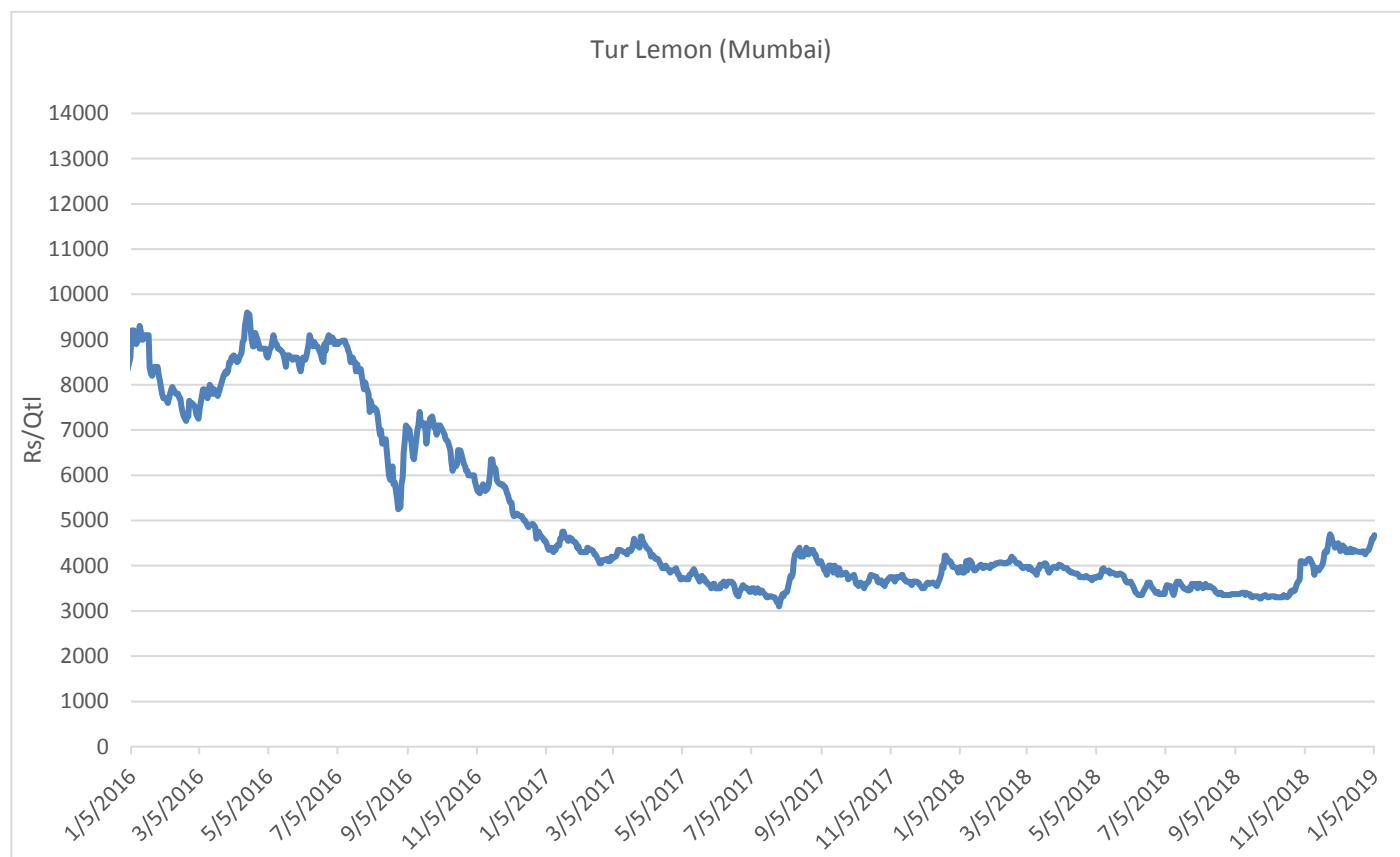

Market Outlook: Prices are likely to notice steady to firm movement due to increasing fear of crop loss.

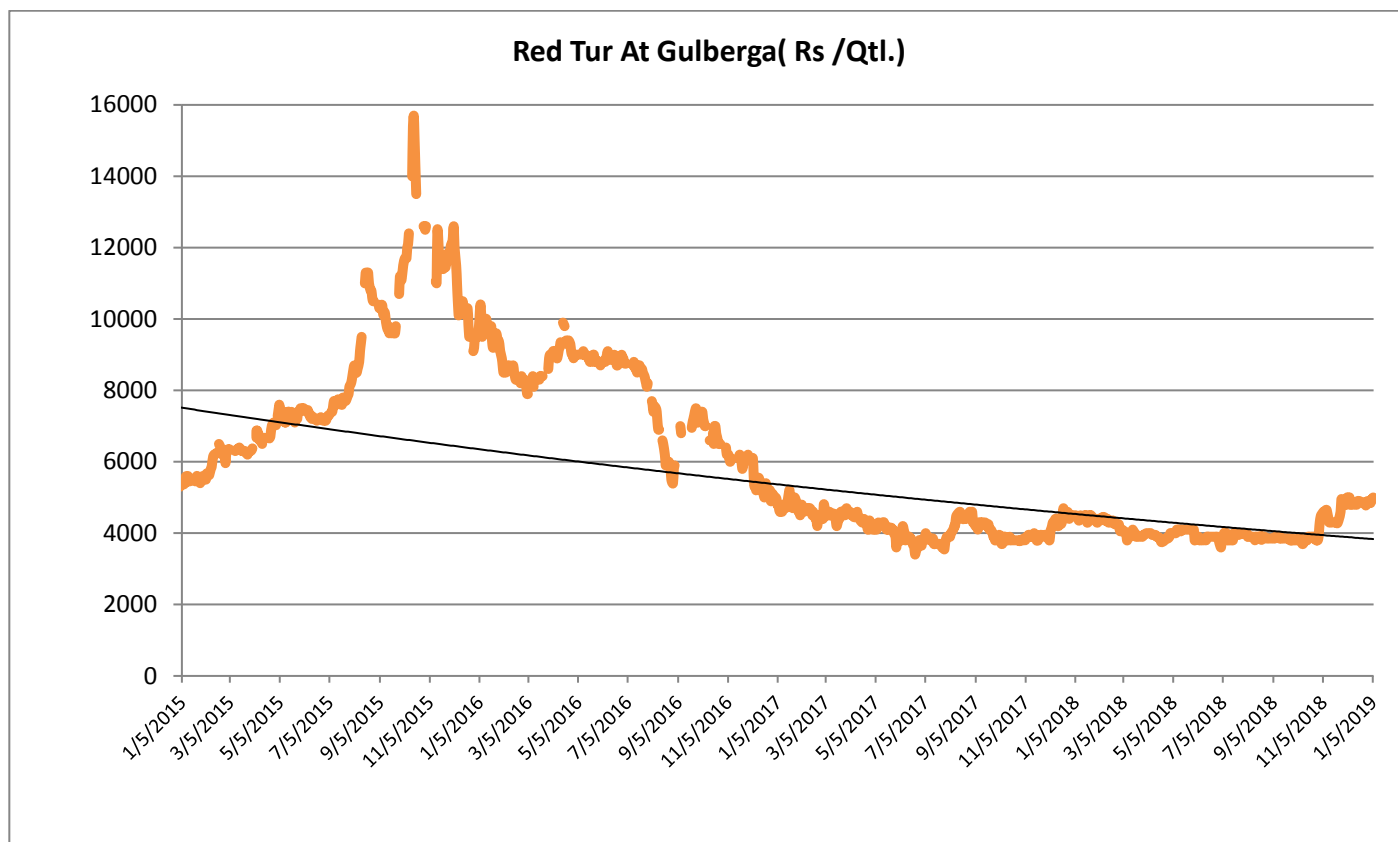

Pigeon Pea (Tur/Toor):
Market Recap:

Govt has allowed export for Tur dal and it would support cash market from Jan end. As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness Jan onward, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market tur is being traded at Rs 4900-5000 per qtl. It may move up by Rs 100 despite increasing arrivals. However, with commencement of procurement, it would cross 5100 by mid Jan.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

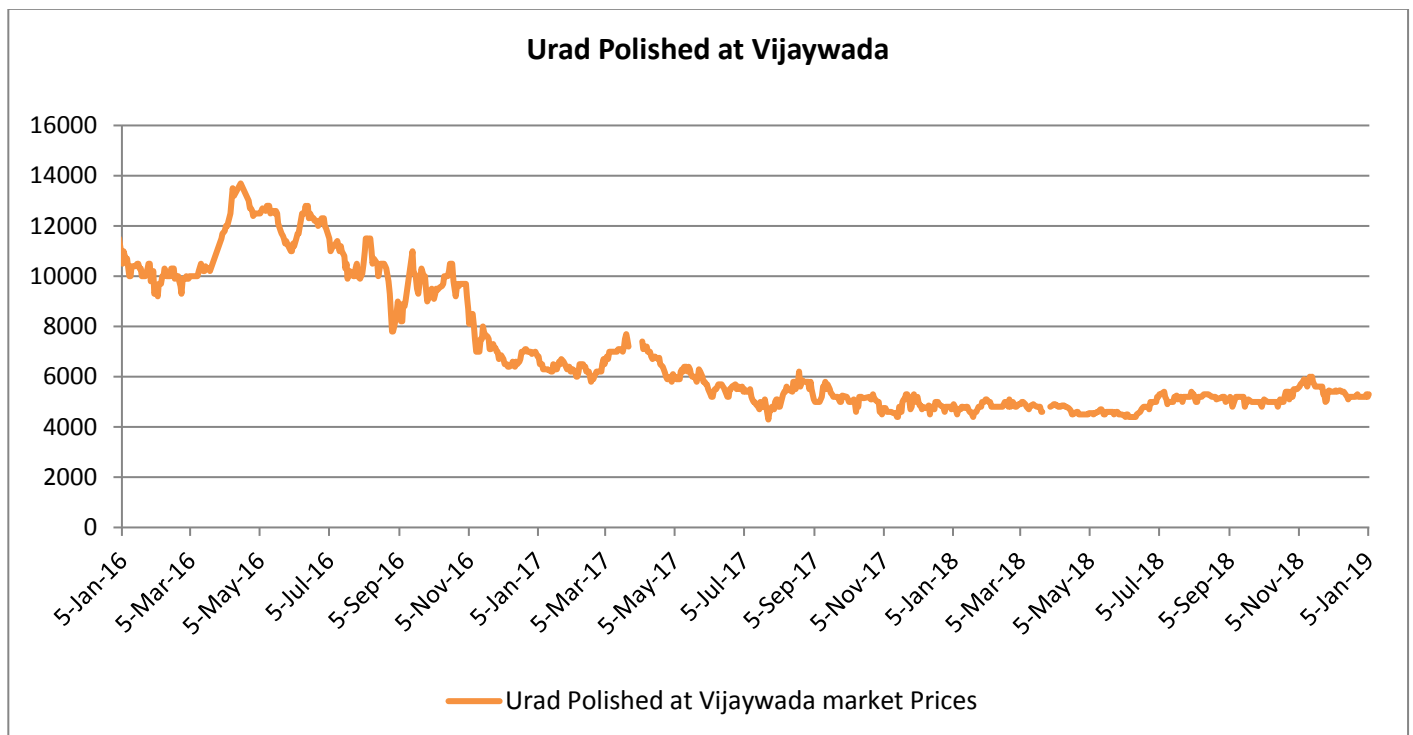

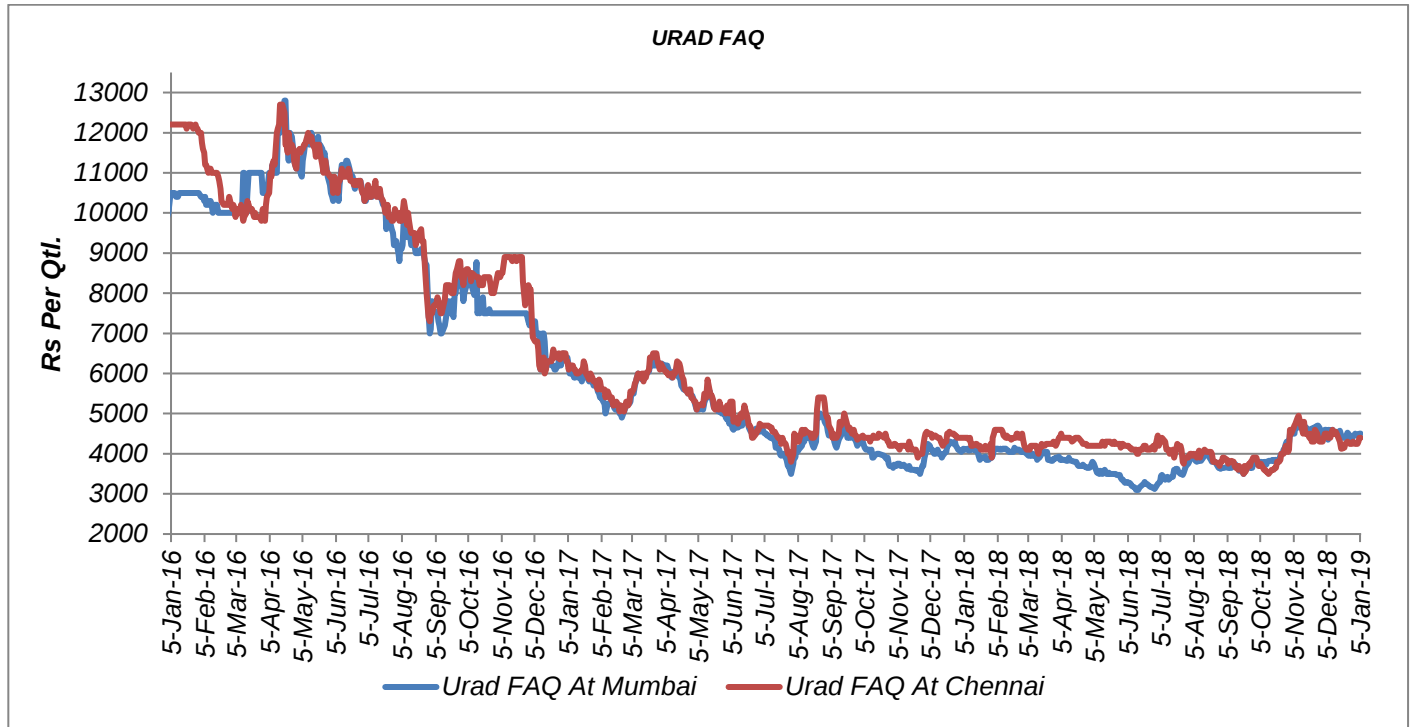

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid stockists demand and fear of lower yield may push up market further. However, downward correction of Rs 100 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

More than one lakh tonne import in Nov & around 2 lakh tonne combined in Oct- Nov impacted urad cash market negatively during last two weeks despite 8.95% lower rabi acreage. Higher import and weak demand distorted market sentiment and it decreased by Rs 200 in cash market to Rs 4300-4400 per qtl. Now, market is expected to adjust excess supply from imported stock and may find balance once again in coming weeks. This week it may trade range bound and as soon as demand improves, it would move up once again.

Current Market Dynamics & Outlook:

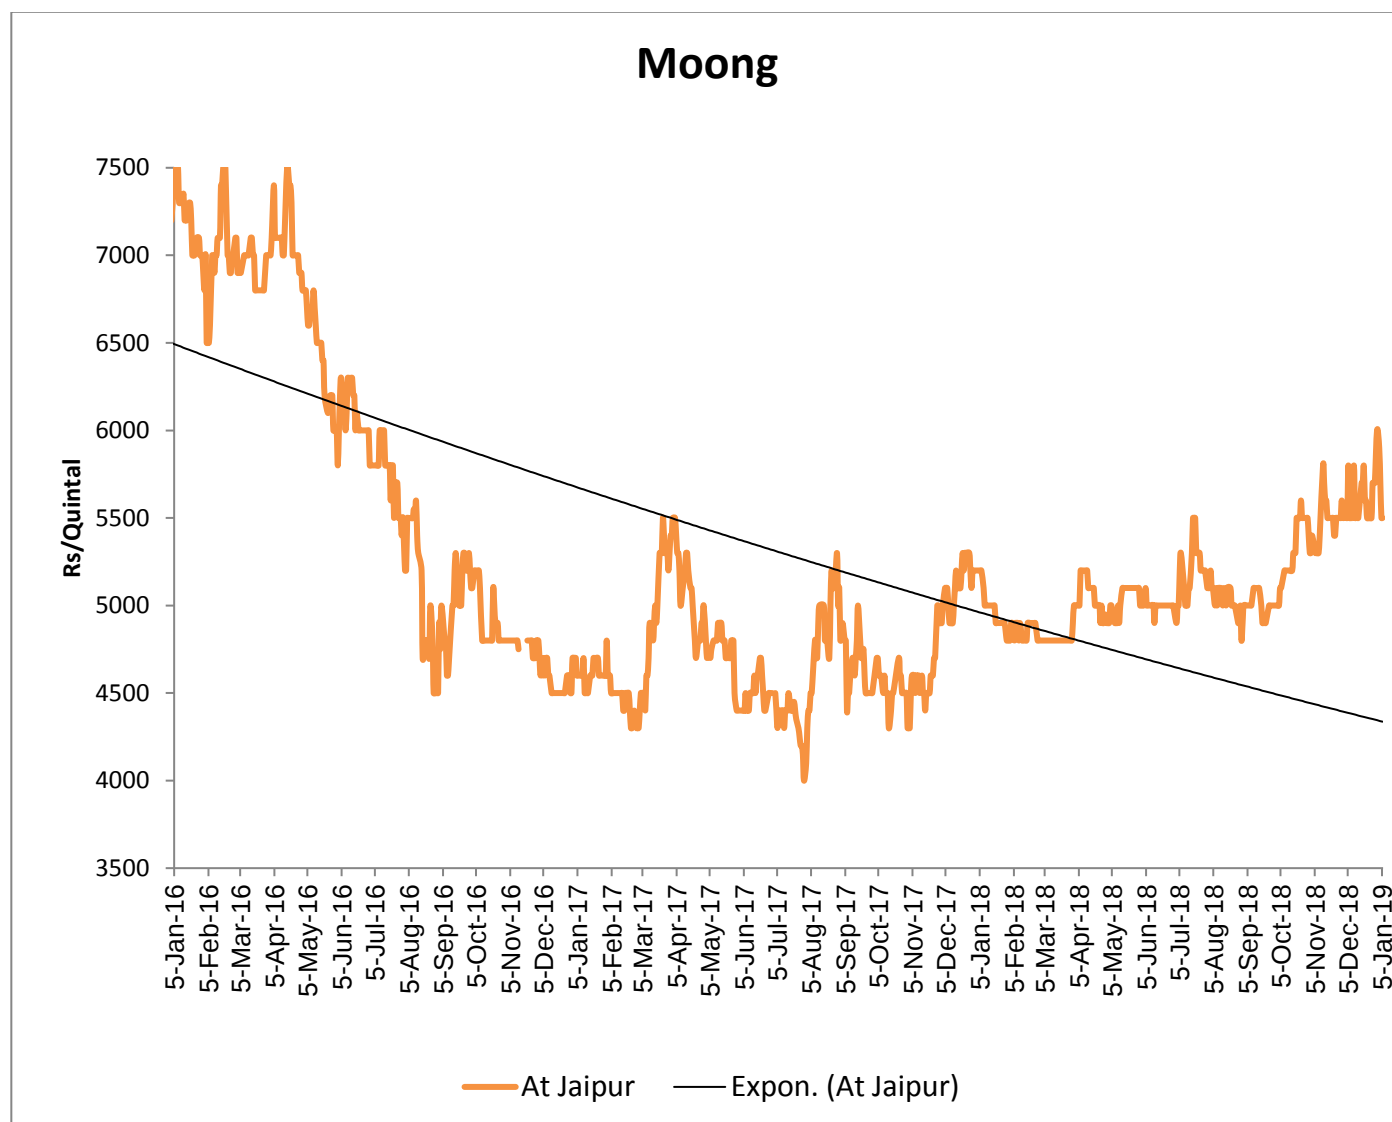

Urad FAQ at Mumbai (Rs Rs4400-.5400per Qtl.) and Chennai (Rs.4350-4450Qtl.) noticed steady tone. It traded weak in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week .

Green Gram (Moong):
Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$760 to \$730 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Jan.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4300 to 4600 levels in this week..

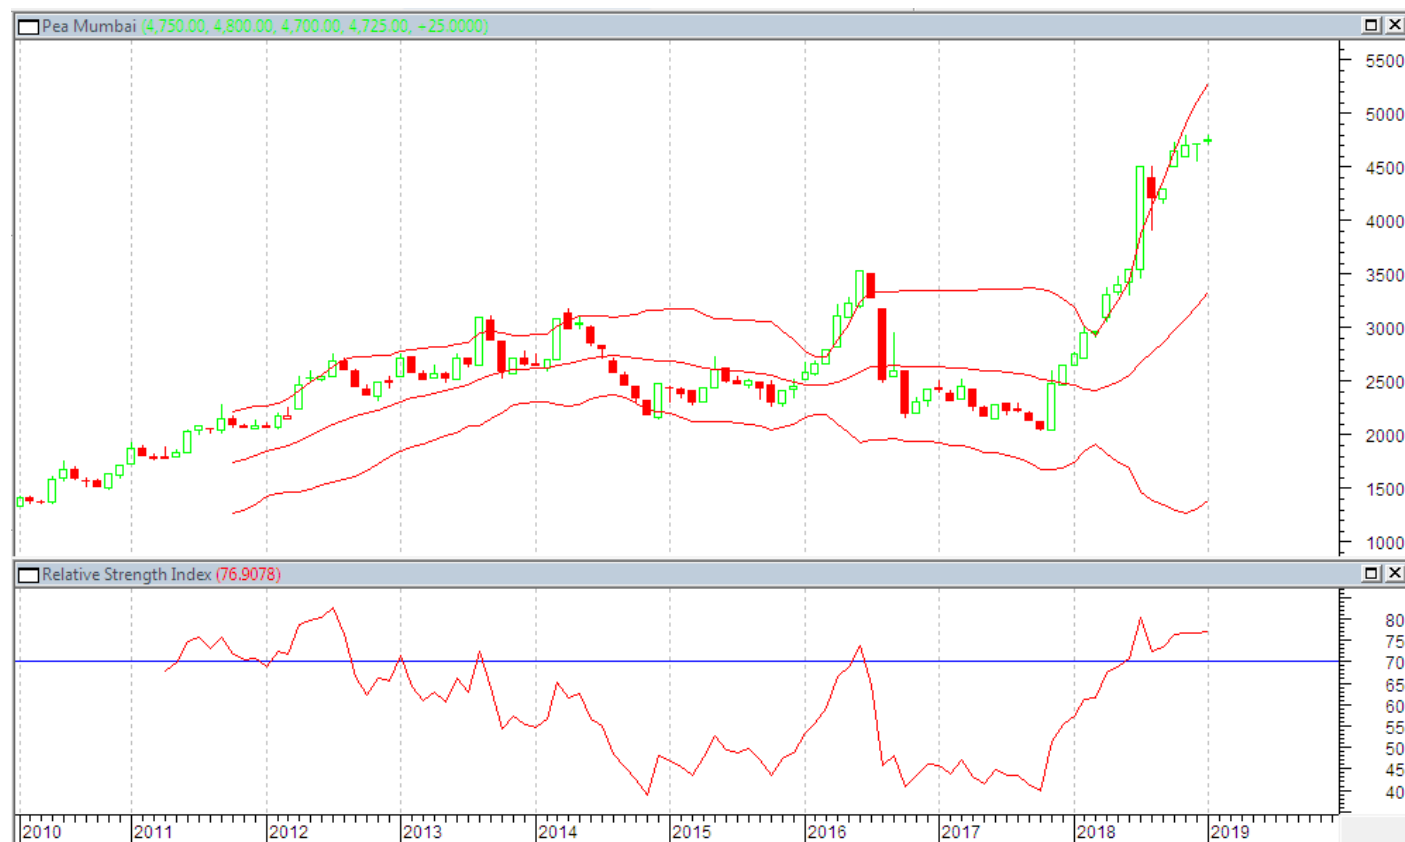

Strategy: Sell on rise

Trade Recommendations: Go short around 4500 with the first target of 4400 and second target 4350 with stop loss at 4550 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4350	4450	4600	4700

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4600- 4900 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4800 with the first target of 4600 and second target 4550 with stop loss at 4850 level.

Support & Resistance				
S2	S1	PCP	R1	R2
