Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Mostly cash market remained closed due to Makar Sankranti and Pongal and trading activities** will remain weak during the week under review. Normal trading is expected to resume from next week. Weak demand continued to pressurize cash market. Liquidity crunch and weak demand have capped market at current level. Improvement is expected by the end of this month. Decision on import pending in Madras high court is crucial for pulses market and is expected by 21st Jan. It may lend support to cash pulses market as court decision is likely to go in favor of govt.
- **Rabi pulses area decreased by 5.73 % at 147.91 lakh ha against 156.90 lakh ha last year as on 11th Jan-2019.** Chana area is lagging by 10.14 % at 94.61 lakh ha against 105.28 last year. Farmers have covered 1.89 % lower area under lentil so far at 16.77 lakh ha against 17.10 lakh ha last year. Pea area is up by 11.08% at 10.29 lakh ha. Urad area is lagging by 10.03 % at 6.74 lakh ha against 7.49 lakh ha last year. Moong area too is lower by 0.49 % at 4.86 lakh ha against 4.88 lakh ha so far. Overall rabi area is unlikely to match last year's level as sowing has entered the last phase now. See sowing table on page no 3 for details.
- **Tur cash market traded almost steady during the week under review despite lower size of incoming crop and ongoing procurement drive in Tamil Nadu.** Actually, market is waiting for Madras high court decision regarding pulses import. If decision comes in favor of govt, import volume would decrease to the level of set quantity and it may be almost halted till March-2019. Besides, farmers have restricted selling in open market in anticipation of higher price, while private buyers are active at current price. So, favorable decision regarding import ban may push up tur price by Rs200-to 400 from current level. Overall tone in tur market remains firm as govt.'s agencies would start procuring tur from 4th week of Jan in other states too. In Gulberga market tur is being traded at 4650 to 4900 per qtl.
- **Despite sluggish trading in cash market, urad traded steady during the week under review.** Lower crop size, restricted import quantity and pending decision of restricting urad import beyond set quota would remain supportive to urad cash market. If restriction of import continues, with the help of Madras high court decision likely soon, urad may move up by Rs200 to 400 from current level. Market expects court decision by the end of this week or on Monday (21st Jan-2019). Market has consumed maximum imported stock and pressure on price is easing now.
- **Millers active buying, procurement drive and stockists restricted release sensing uptrend have lent support to cash moong market and with restricted selling from central pool stock, moong may move up further by Rs 200 to Rs 400 per qtl from current level.** There is no any new crop due now before March-2019. So, firm bias is likely to continue. There is short supply of quality moong in cash market. Besides import is not possible as there is no parity. Moong is likely to trade steady to slightly firm in the weeks ahead. Procurement continues and Nafed in various states has procured 2.65 lakh MT as on 3rd Jan-2019 including 2,08,366.47 MT in Rajasthan, 29,136.74 MT in Karnataka, 13,375.31 MT in Telangana and 12,804.27 MT in Maharashtra including Markfed procurement.
- **Higher delivery in NCDEX in Jan, continuous selling from central pool stock and restricted buying by private trades have pressurized chana market and it may trade lower in the weeks ahead despite strong fundamental, lower size of incoming crop.** Continued cold wave in parts of chana growing region in MP is likely to affect standing crop of chana, which are under flowering stages. In Maharashtra, moisture stress is still affecting late sown crop. Area under chana is almost 10 % lower and farmers in AP are unwilling to sell new crop at prevailing market price. Chana prices have decreased due to weak demand from mills. Nafed continuous selling and weak futures. However, fundamental for chana remains firm and market is expected to recover by end Jan once again. Nafed would reserve 4 lakh MT chana stock for PDS in MP. Nafed has 15.64 lakh tonne chana in stock in MP. This week too market would continue to trade under pressure.
- **Crop size of lentil is expected to be lower due to lower seeding, deficient rains and low soil moisture.** Increase in prices of Tur will lead to a change in consumption pattern and increase demand for split Lentil. Imports are likely to increase in 2019 due to lower crop size and good demand. As per latest update, NAFED has sold 25706.27 MT of masoor at an average price of Rs 3529.79 per quintal until 1st Jan-2019. NAFED has 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh. MP has 161612.61 MT stock while UP has 7985.10 MT. NAFED may decide to restrict selling, sensing declining stock in domestic market and for supporting domestic price. Agriwatch expects lentils to remain in uptrend mode in near future.

International Market:

- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 6,167,4,668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct. This lifted export sales so far during the calendar year to 967,095, up 14% last year.** The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Lentil markets traded firm tone on the back of strong opening season export pace and a relatively positive demand outlook.** By the end of November, Canada's lentil exports pushed ahead of last year, totalling just over 588,000 metric tons (MT) between August and November, compared to around 510,000 during the same period last season.
- **Chickpea production in Canada, is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne in 2018-19** due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Supply increased slightly due to large carry-in stocks. Export has been forecast to increase to 18 lakh tonne.** To-date Mexico, United Arab Emirates and India are the top export markets. Imports are expected to be lower than the previous year due to the above average grade distribution. Carry-out stocks are expected to fall due to the increase in exports. The overall average price is forecast to fall below the levels achieved in 2017-18 due to weaker world demand, larger domestic carry-out stocks and an above average proportion of grade distribution at the No.1 or 2 grade.
- **In the US, the area seeded to lentils for 2018-19, was forecast by the USDA at less than 8 lakh acres, down nearly 30% from 2017-18** due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area, particularly in Saskatchewan and Alberta despite similar yield seen last year.** Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. The are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana.** With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

Monthly Outlook: -Pulses are likely to trade steady to slightly weak in Jan.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 5.0 point from 130.8 in Nov to 135.8 in Dec-2018.

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded lower taking clue from weak futures. However, lower area coverage has helped market to recover to some extent. Sentiment still remains weak as south Indian demand from central and north India is expected to decrease with commencement of new chana in AP. Market is likely to stay steady to slightly weak and may trade at Rs4350-4400 in Delhi market. Arrival is lower and sellers are unwilling to sell at current level. As there is much stock in central pool, any spike is unlikely despite lower incoming crop. New crop in central India is only two months away so stakeholders should release stock at every improvement. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period. Nafed continues to sell stock to release old stock burden.

All India average price for Chana decreased by 1.27 percent from Rs 4444 to 4350 per qtl. Australian Chana price too moved down by 1.15 % to Rs 4275 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool despite lower area coverage and halted import due to higher duty.

Peas (Matar):

Market Recap:

Govt has extended import restriction from Dec to March 2019 and it has lent some support to cash pea market amid lower stock at ports. It can be termed as temporary recovery. If chana trades lower, it may decrease again. Marriage season demand is off now. Besides, pea in green form is available in local market and it is available at Rs25 per kg. Overall sentiment remains weak. Area in MP, UP and other states is up by 11.9 % to 10.29 lakh ha so far. Overall tone remains weak in the near term. Selling on higher level seems good this week.

Current Market Dynamics & Outlook:

Pea traded at Rs 4925 in Kanpur market, down by Rs75 than last week due to weak demand at higher level. Market has already taken in account of impact of extension of import ban till March-2019 amid lower stock at port. Demand for besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. Import is not possible till March-2019. So, firm momentum is unlikely to continue.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 250 to 400 per quintal in Jan on relative movement in Chana and pea price. Gap may widen further as chana price may decrease further.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Increasing cold wave in masur growing belt has started affecting standing crop and if it continues this week too, it may impact yield 10 to 20 % from normal. So, next 7 days are very crucial for masur crop and its price trend. Market is trading steady currently, but may move up further if cold wave continues.

Current Scenario:

In the 2nd week of Jan-2019, average price in key market like Kanpur was up by 1.13 % to Rs 4350 per qtl. Prices are likely to trade steady to slightly firm in Jan to a certain extent. Fear of lower yield is increasing while new crop will be available in domestic market from mid Feb. Lower stock may push prices further up in domestic market.

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice steady to firm movement due to increasing fear of crop loss.

Pigeon Pea (Tur/Toor):
Market Recap:

Govt has allowed export for Tur dal and it would support cash market from Jan end. As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness Jan onward, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market, tur is being traded at Rs 4900-5000 per qtl. It may move up by Rs 100 despite increasing arrivals. However, with commencement of procurement, it would cross 5100 by mid Jan.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid stockists demand. Fear of lower yield may push market further up. However, downward correction of Rs 100 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

Weak demand for urad dal discouraged buyers to continue buying. It caused the market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt. may decide to ban illegal import completely. Burma is offering urad FAQ and SQ at \$515 and \$645 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-.5400per Qtl.) and Chennai (Rs.4350-4450Qtl.) noticed steady tone. It traded weak in Vijaywada too. Improvement might be seen in Urad market once again after slight correction .The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week .

Green Gram (Moong):
Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$760 to \$730 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Jan.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4300 to 4600 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4400 with the first target of 4300 and second target 4250 with stop loss at 4500 level.

Delhi Chana Physical:
