Highlights-Domestic Market:

- **Overall rabi area is unlikely to match last year's level as sowing is almost over now for chana, lentil and pea.** Urad and moong sowing would continue. Rabi pulses area decreased by 5.57 % at 149.01 lakh ha against 157.80 lakh ha last year as on 18th Jan-2019. Chana area is lagging by 9.96 % at 95.40 lakh ha against 105.95 last year. Farmers have covered 1.93 % lower area under lentil so far at 16.85 lakh ha against 17.18 lakh ha last year. Pea area is up by 10.93 % at 10.31 lakh ha. Urad area is lagging by 9.99 % at 6.75 lakh ha against 7.50 lakh ha last year. Moong area too is up by 1.82 % at 4.98 lakh ha against 4.89 lakh ha so far. See sowing table on page no 3 for details.
- **Chana cash market traded lower despite likely lower production size this year.** Weak demand at this point of time and release from central pool stock remain unsupportive to cash market fundamental in the near term. In futures market, bears are trying to pressurize cash market against prevailing fundamentals. Chana traded at Rs 4400-4450 in Delhi market. Recovery in market is expected from mid Feb. There is a common view in the market that stake holders should buy around 4200 in north Indian market. Arrival pressure in Karnataka, AP and Maharashtra from new crop is not building up. However, arrival from MP and Rajasthan is due By Feb end. Besides, Nafed selling continues. It would cap uptrend in the near term. Recent rains are considered beneficial to the late sown crop. So .steady to slightly weak market might be seen this week too.
- **After trading low, Urad price improved by Rs 75 to Rs100 and FAQ and SQ is being traded at Rs 4900-500 & 5500-5600 respectively.** Importers have stopped selling at lower price. However, market lacks active buying as millers fulfilled only their immediate needs. Traders /stockists in Chandausi line are not selling urad in forward delivery. Supply from Kota line is lower. With likely improvement in demand, urad may continue to improve from current level. However,, pending decision over import may give direction to urad market. If govt. maintains its previous strategy, urad market should improve as import would remain restricted.
- **Tur cash market is likely to trade up and it may continue to move up further by Rs200-300 per qtl. from current level.** Karnataka govt would buy Tur at Rs6100 per qtl, higher by Rs425 per qtl from MSP. Arrival in major markets is comparatively lower and private buyers are active. Only Telangana govt is procuring tur right now. Procurement in other states is likely by end Jan or mid Feb. Crop size is lower. So Agriwatch expects price to touch MSP level soon. Stockists should start releasing stock at that level. After touching MSP, higher selling might be seen, that may weaken price in March & April. Seasonal chart too shows downward move in March April. However, if weather turns rough in Feb-Mar and govt restrict import, any major downfall is unlikely. Tur may trade in between 5200-5800 in the medium term under prevailing market condition.
- **After trading low, Urad price improved by Rs 75 to Rs100 and FAQ and SQ is being traded at Rs 4900-500 & 5500-5600 respectively.** Importers have stopped selling at lower price. However, market lacks active buying as millers fulfilled only their immediate needs. Traders /stockists in Chandausi line are not selling urad in forward delivery. Supply from Kota line is lower. With likely improvement in demand, urad may continue to improve from current level.
- **Stock of poor quality moong in producing and consuming regions has come down to manageable level now and availability of this quality for mills is exhausting fast.** So, price of moong is unlikely to decrease now. Mills from Jaipur line, are buying actively in Jodhpur. there is no parity from foreign countries. So stockists have started quoting higher price and moong in cash market moved up by Rs 100 . Moong market may trade up by Rs 300-400, when demand for dhoya and chilka dal improves, expected from 15th Feb.
- **Lower area coverage and increasing fear of lower grain size of lentil have helped market to improve** and trade sentiment has turned strong now. Lower rainfall in growing region and lack of fog, have affected fruit formation in late sown crop. In some region of UP and MP, plants are drying up. Even MMTC is selling Canadian masur at Rs 4040-4050. Under prevailing condition masur market may trade firm in coming weeks. NAFED has 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh MP has 161612.61MT stock while UP has 7985.10MT. NAFED may decide to restrict selling, sensing declining stock in domestic market and for supporting domestic price. Agriwatch expects lentils to remain in uptrend mode in near future.

- **Weather condition for pea crop is favorable. New crop will start hitting market by Feb end.** Poor quality, shrunken pea is being traded at 2800-3000 per qtl. Besides, availability of green vegetables is higher and parity for desi chana and Kabuli in comparison to pea is in favor of traders. Use of pea in besan has decreased drastically. So any major spike is unlikely in pea market in the near to medium term.

International Market:

- **Global chickpea market traded almost steady and is expected to move slightly up on increasing buyers need and unwillingness to sell by stockists.** Quality issues with Argentina's crops is still there and worries about the pending size of the crop in Mexico remain supportive to the cash market fundamental. However, market participants expect global inventories to remain large relative to prospective demand through at least the end of the calendar year.
- **Chickpea export from Russia increased from 9104 (Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year at 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They bought 6,167,4,668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct. This lifted export sales so far during the calendar year to 967,095, up 14% last year.** The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Lentil markets traded firm tone on the back of strong opening season export pace and a relatively positive demand outlook.** By the end of November, Canada's lentil exports pushed ahead of last year, totalling just over 588,000 metric tons (MT) between August and November, compared to around 510,000 during the same period last season.
- **Chickpea production in Canada, is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne in 2018-19** due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **In the US, the area seeded to lentils for 2018-19, was forecast by the USDA at less than 8 lakh acres, down nearly 30% from 2017-18** due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area, particularly in Saskatchewan and Alberta despite similar yield seen last year.** Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. The are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana.** With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains

weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

Monthly Outlook: -Pulses are likely to trade steady to slightly weak in Jan.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 5.0 point from 130.8 in Nov to 135.8 in Dec-2018.

Pulses-Wise Scenario:

Chana

Current Scenario:

Overall Chana area decreased by 10 % to 95.40 lakh ha against 105.95 lakh ha last year. Major decrease in area was seen in Gujarat (42%), Maharashtra (33.4 %), Karnataka (11.3 %), AP(10.7%) and MP(3.3%). Area in Rajasthan is almost similar as last year. However, area under chana has increased in Chhatisgarh, Bihar and UP by 1.9, 11 & 4 % respectively. Sowing is almost over now and total area is lower by 10% as projected by Agriwatch in Nov. As weather is not favorable, yield is bound to decline this year. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period. Nafed continues to sell stock to release old stock burden. Arrival from major producing states like Rajasthan and MP would increase from Feb end. Pressure continues.

All India average price for Chana decreased by 0.23 percent from Rs 4343 to 4300 per qtl. Australian Chana price too moved down by 0.29% to Rs 4205 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool despite lower area coverage and halted import due to higher duty. Chana trend shows downward momentum.

Peas (Matar):
Market Recap:

Decreasing chana price remains unsupportive to cash pea market. Govt has extended import restriction from Dec to March 2019 and it has lent some support to cash pea market amid lower stock at ports. However, weak chana price and usage for besan has decreased considerably. So, current firmness can be termed as temporary recovery. If chana continue to trade lower, it may decrease again.. Besides, pea in green form is available in local market and it is available at Rs20-25 per kg. Overall sentiment remains weak. Area in MP, UP and other states is up by 10.9 % to 10.31 lakh ha so far. Overall tone remains weak in the near term. Selling on higher level seems good this week.

Current Market Dynamics & Outlook:

Pea traded at Rs 4900 in Kanpur market, down by Rs100 than last week due to weak demand and lower price for chana. Despite decreasing stock at port. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Demand for besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market despite ban on import till March-2019. So, firm momentum is unlikely to continue.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 300 to 450 per quintal in Jan on relative movement in Chana and pea price. Gap may widen further as chana price may decrease further.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Recent rains in major growing belt of MP and UP has provided much respite to standing lentil crop. Some downward correction might be seen in lentil cash market. Increasing cold wave in masur growing belt has started affecting standing crop and if it continues this week too. Weak demand at this point of time may cap uptrend for some times. Market is trading steady currently, but may move down further if one or two spells of rains occur this week. Demand is weak, but may improve with opening of weather in masur growing belt. Steady to slightly weak tone may prevail this week.

Current Scenario:

In the 3rd week of Jan-2019, average price in key market like Kanpur was down by 0.13 % to Rs 4335 per qtl. Prices are likely to trade steady to slightly weak in Jan to a certain extent. New crop will be available in domestic market from mid Feb. So any unexpected spike is unlikely at this level. Masur may trade in the range of Rs 4250 to Rs 4400 per qtl in the near term.

Market Outlook: Prices are likely to notice steady to weak movement due to increasing fear of crop loss.

Pigeon Pea (Tur/Toor):
Market Recap:

Govt has allowed export for Tur dal and it would support cash market from Jan end. As new arrivals in major markets are increasing, prices of tur may stay steady at current level. Private buyers are active and procurement drive is yet to begin, so Agriwatch expects firmness Jan onward, supported by lower crop size this year. Currently dal demand is weak and is expected to improve by Jan end. In Gulberga market, tur is being traded at Rs 4900-5000 per qtl. It may move up by Rs 100 despite increasing arrivals. However, with commencement of procurement, it would cross 5100 by mid Jan.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675) and lower crop size (36 lakh tonne). Burma is offering tur at higher price. Selling by stockists at higher level may drag price down to some extent. So buying at correction seems riskless.

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid stockists demand. Fear of lower yield may push market further up. However, downward correction of Rs 100 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

Weak demand for urad dal discouraged buyers from continued buying. It caused the market to decrease by Rs 200 to Rs 4500-4600 and SQ at Rs 5500 per qtl. There is no crop in domestic market right now and some importers are willing to buy urad by pressurizing market. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Besides, central govt. may decide to ban illegal import completely. Burma is offering urad FAQ and SQ at \$515 and \$645 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-.5400per Qtl.) and Chennai (Rs.4350-4450Qtl.) noticed steady tone. It traded weak in Vijaywada too. Improvement might be seen in Urad market once again after slight correction .The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week .

Green Gram (Moong):
Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is up by 5.42 % to 3.08 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$760 to \$730 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Jan.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4300 to 4600 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4400 with the first target of 4300 and second target 4250 with stop loss at 4500 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
