Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

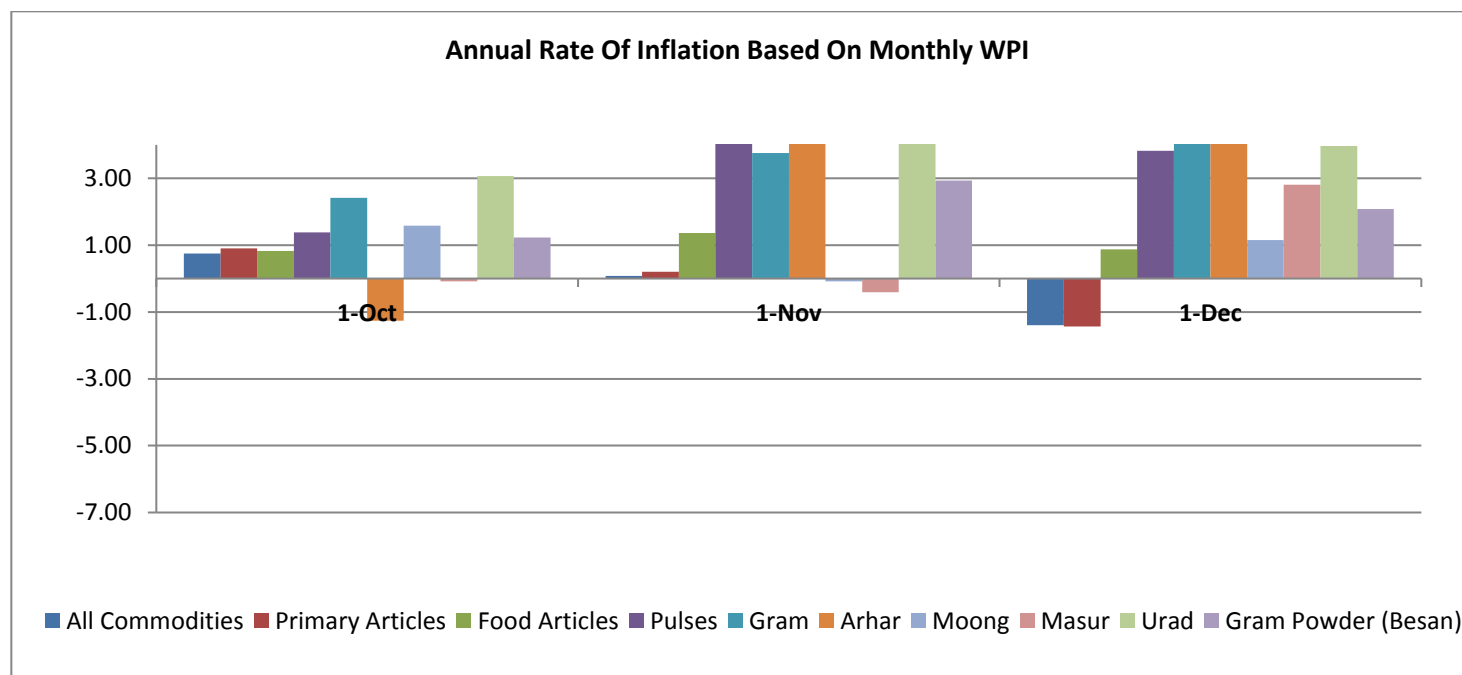

- **Overall rabi area is unlikely to match last year's level as sowing is almost over now for chana, lentil and pea.** Urad and moong sowing would continue. Rabi pulses area decreased by 5.74 % at 153.35 lakh ha against 162.70 lakh ha last year **as on 01st Feb-2019.** Chana area is lagging by 10.02 % at 96.35 lakh ha against 107.08 last year. Farmers have covered 1.72 % lower area under lentil so far at 16.90 lakh ha against 17.19 lakh ha last year. Pea area is up by 11.36 % at 10.41 lakh ha. Urad area is lagging by 10.83 % at 7.63 lakh ha against 8.56 lakh ha last year. Moong area too is down by 6.12% at 6.81 lakh ha against 7.25 lakh ha so far. See sowing table on page no 13 for details.
- **Indian imported total 2.66 lakh tonne pulses in Dec, slightly higher than Nov(2.60lakh tonne).** Out of total import the largest share was yellow pea, followed by tur and urad. In Dec India imported 82000 MT yellow pea, 73744 MT Tur and 42860 MT urad. Fig is tentative and may be slightly up. Export figure is being assessed.
- **Recent rains have greatly benefitted chana crop in Rajasthan, MP, and Chattisgarh** and pressure on chana market continues. Recovery in production in these states seems very much in sight. Besides, there is 20 lakh tonne chana in central pool, that would continue to suppress chana price in cash market. In Delhi market chana may come down to Rs 4150-4200. If weather remains wet for a week, production size would go up from 83 to 88-90 lakh tonne under prevailing condition. Overall tone in chana cash market seems bearish. Buyers/stockists should sell on rise.
- **Urad cash market trades firm on the back of import ban, lower crop size.** Urad from Shivpuri and Katni line is not coming in North India. It helped market to recover by Rs200-250 in last three-four days despite weak demand for dal. Urad from Kota and Chandausi line too Traded up by Rs 150-175. If dal demand improves, urad may move up by 200 to 300 more from current level. Stockists too have started restricting release. So overall trend for urad seems firm. Procurement is on it would remain supportive to some extent. However, higher stock in central pool would restrict any spike in urad market in the medium term. Urad in Mumbai market is being traded at Rs4550-4600.
- **News regarding ban on pulses import till 31st March-2019 and small grain size of tur in Myanmar encouraged** domestic buyers/millers to buy more tur from mandis and it helped market to move up by Rs200-250 in major cash markets. Besides, procurement on MSP is expected from next week and it would remain supportive for tur market in coming weeks. Currently, millers in Jalgaon are active in Gulberga and Marathwara line. Tur of Amrawati line are being traded at Rs 5100-5250 per qtl. Early crop of Katni line is almost over now. Stock of lemon tur is decreasing, so Market may move further up by Rs 200 more from current level. Overall inner tone remains strong. At MSP level one downward correction of Rs200 is expected. Besides, lower crop size (36.21 lakh tonne) against 38.67 lakh tonne last year may also help market to trade firm.
- **Decision of not giving clearance of Tur, Urad and Moong at custom by DGFT has helped market** to move up. Besides, procurement drive too would remain supportive for moong market. New crop is almost two months away, so, any major fall in moong market is unlikely. However, stock in central pool may cap any spike too. At higher level, demand too gets affected. So Moong market in Jaipur market may move in the range of Rs 5400-5800 in the near term. At higher level, some selling from stockists end might be seen. Currently Jaipur market is trading at Rs5500 per qtl. Tamil Nadu would procure at 16,900 tonnes moong
- **Lower area coverage and increasing fear of lower grain size of lentil have helped market to improve** and trade sentiment has turned strong now. Lower rainfall in growing region and lack of fog, have affected fruit formation in late sown crop. In some region of UP and MP, plants are drying up. Even MMTC is selling Canadian masur at Rs 4040-4050. Under prevailing condition masur market may trade firm in coming weeks. NAFED has 169597.85 tonnes in Madhya Pradesh and Uttar Pradesh MP has 161612.61 MT stock while UP has 7985.10 MT. NAFED may decide to restrict selling, sensing declining stock in domestic market and for supporting domestic price. Agriwatch expects lentils to remain in uptrend mode in near future.
- **Weather condition for pea crop is favorable.** New crop will start hitting market by Feb end. Poor quality, shrunken pea is being traded at 2800-3000 per qtl. Besides, availability of green vegetables is higher and parity for desi chana and Kabuli in comparison to pea is in favor of trades. Use of pea in besan has decreased drastically. So any major spike is unlikely in pea market in the near to medium term.

International Market:

- **Lentil markets traded firm tone on the back of strong opening season export pace and a relatively positive demand outlook.** By the end of November, Canada's lentil exports pushed ahead of last year, totalling just over 588,000 metric tons (MT) between August and November, compared to around 510,000 during the same period last season.
- **Chickpea production in Canada, is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne** in 2018-19 due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Global chickpea market traded almost steady and is expected to move slightly up on increasing buyers need and unwillingness to sell by stockists.** Quality issues with Argentina's crops is still there and worries about the pending size of the crop in Mexico remain supportive to the cash market fundamental. However, market participants expect global inventories to remain large relative to prospective demand through at least the end of the calendar year.
- **Chickpea export from Russia increased from 9104 (Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year at 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They bought 6,167,4,668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct. This lifted export sales so far during the calendar year to 967,095, up 14% last year.** The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area** and yields. Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **In the US, the area seeded to lentils for 2018-19, was forecast by the USDA at less than 8 lakh acres,** down nearly 30% from 2017-18 due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. The are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Area seeded to dry peas for 2017-18 in US is estimated by the USDA at 9 lakh acres due to a decrease in area in Montana.** With estimates of below average yields, US dry pea production is estimated by USDA to fall marginally to just over 6 lakh MT. US dry peas are expected to compete in Canadian export markets like China and the Philippines.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18.** Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.

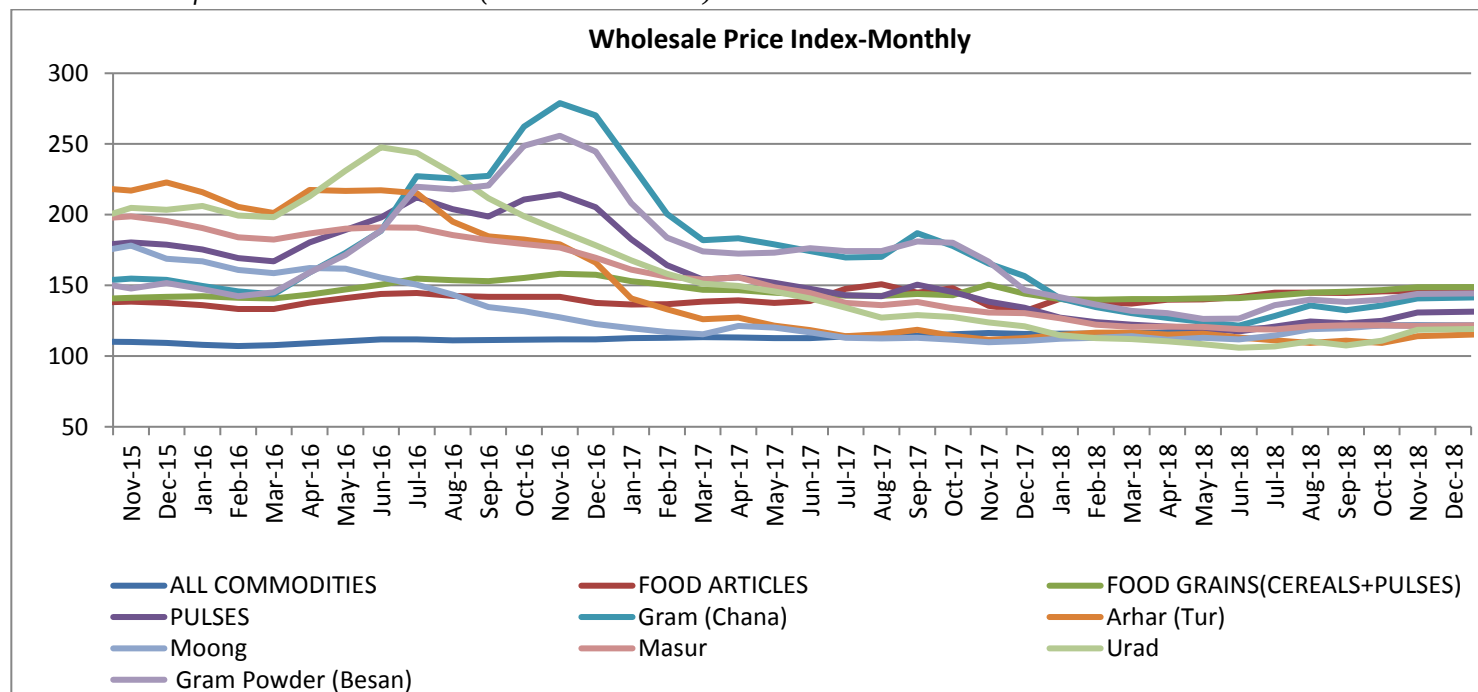

Monthly Outlook: -Pulses are likely to trade steady to slightly firm except chana and moong.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

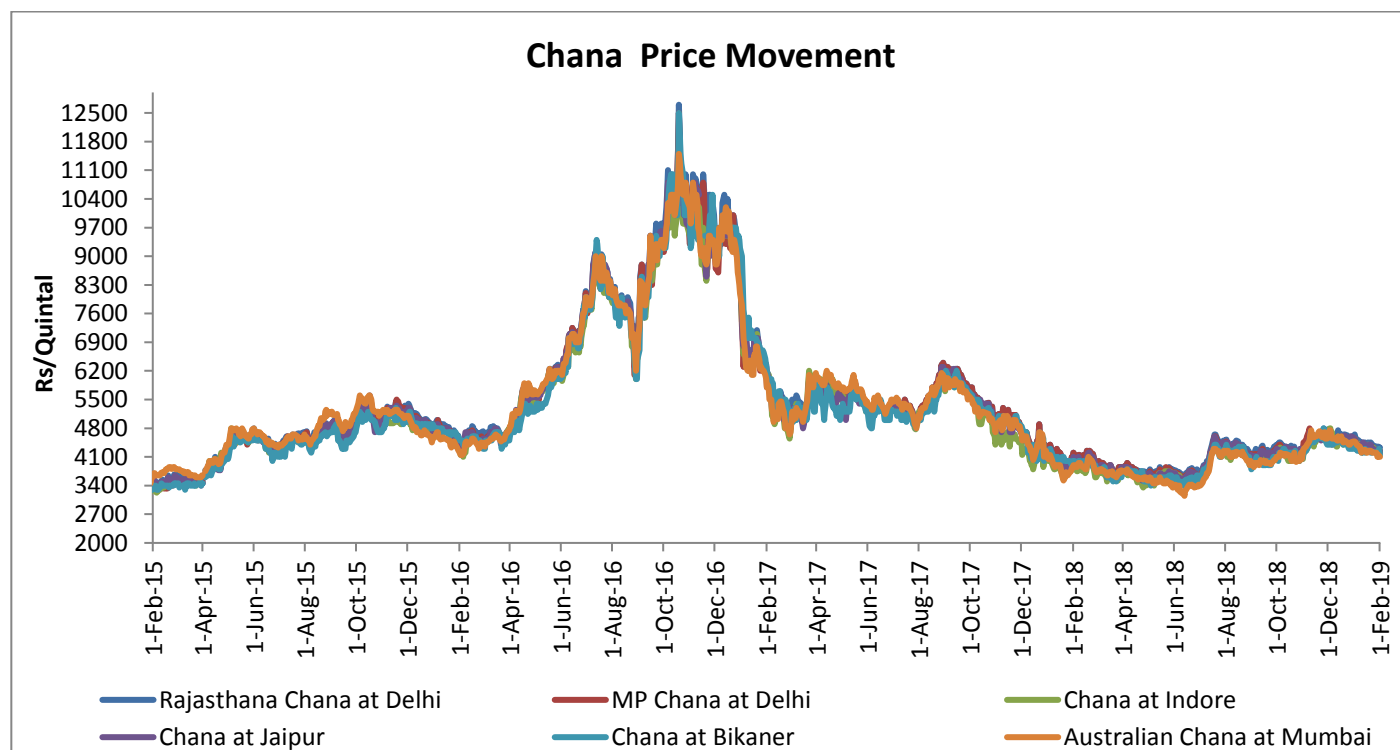

Pulses WPI increased by 5.0 point from 130.8 in Nov to 135.8 in Dec-2018.

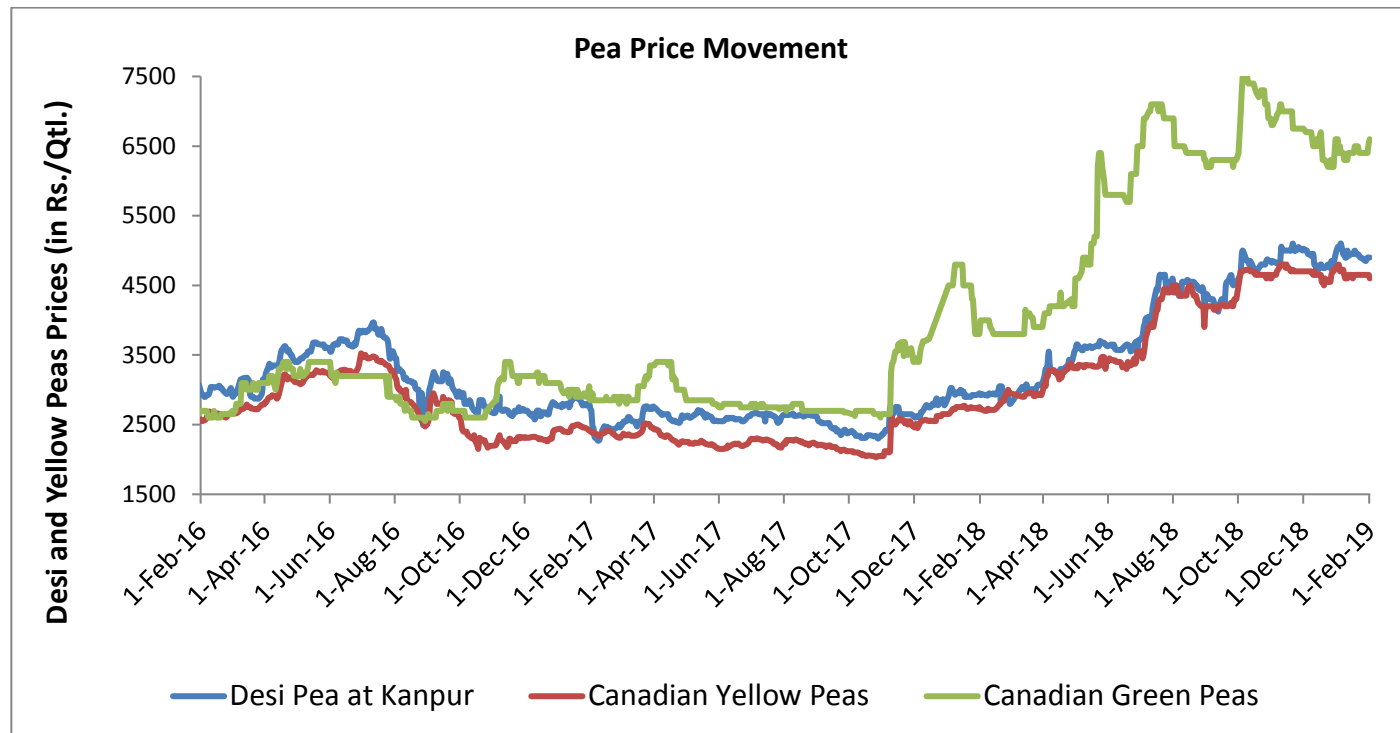

Pulses-Wise Scenario:
Chana
Current Scenario:

Overall Chana area decreased by 10.02 % to 96.35 lakh ha against 107.08 lakh ha last year. Major decrease in area was seen in Gujarat (41%), Maharashtra (33.5 %), Karnataka (11.3 %), AP(12.0%) and MP(3.3%). Area in Rajasthan is almost similar as last year. However, area under chana has increased in Chhattisgarh, Bihar and UP by 8.2, 1.9 & 4 % respectively. Sowing is almost over now and total area is lower by 10% as projected by Agriwatch in Nov. As weather turns favorable last week, production is likely to improve in MP, Raj and Chhattisgarh this year. There is a common perception in the market that market would move up in second half of the new year as impact of lower crop size due to lower area would be visible by then, not before first half. So it is better to buy new crop in the season than to hold old one for longer period. Nafed continues to sell stock to release old stock burden. Arrival from major producing states like Rajasthan and MP would increase from Feb end. Pressure continues.

All India average price for Chana decreased by 0.47 percent from Rs 4300 to 4200 per qtl. Australian Chana price too moved down by 0.2% to Rs 4175 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool and improved weather condition despite lower area coverage and halted import due to higher duty. Chana trend shows downward momentum.

Peas (Matar):
Market Recap:

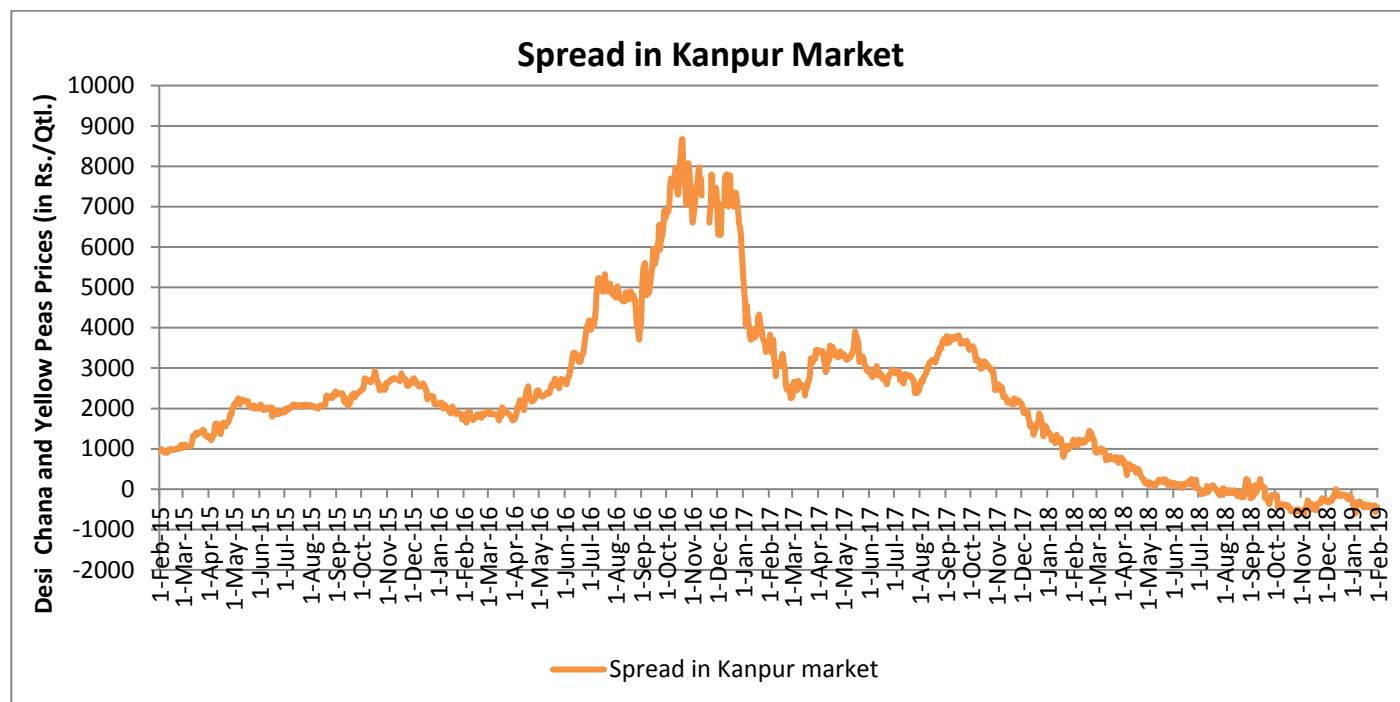

Decreasing chana price remains unsupportive to cash pea market. Govt has extended import restriction from Dec to March 2019 and it has lent some support to cash pea market amid lower stock at ports. However, weak chana price and usage for besan has decreased considerably. So, current firmness can be termed as temporary recovery. If chana continues to trade lower, it may decrease again. Besides, pea in green form is available in local market and it is available at Rs 15-18 per kg. Overall sentiment remains weak. Area in MP, UP and other states is up by 2.91 and 4.17 % to 11.04 lakh ha so far. Overall tone remains weak in the near term. Selling on higher level seems good this week.

Current Market Dynamics & Outlook:

Pea traded at Rs 4900 in Kanpur market, almost steady at previous week due to weak demand and lower price for chana. Despite decreasing stock at port and import restriction. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Demand for besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. So, firm momentum is unlikely to continue.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 250 to 450 per quintal in Feb on relative movement in Chana and pea price. Gap may widen further as chana price may decrease further.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Recent rains in major growing belt of MP and UP has provided much respite to standing lentil crop. So some downward correction might be seen in lentil cash market. Increasing cold wave in masur growing belt has started affecting standing crop and if it continues this week too it will impact yield negatively. Weak demand at this point of time may cap uptrend for some times. Market is trading steady currently, but may move down further if one–two spells of rains occur this week too.. Demand is weak, but may improve with opening of weather in masur growing belt. Steady to slightly weak tone may prevail this week.

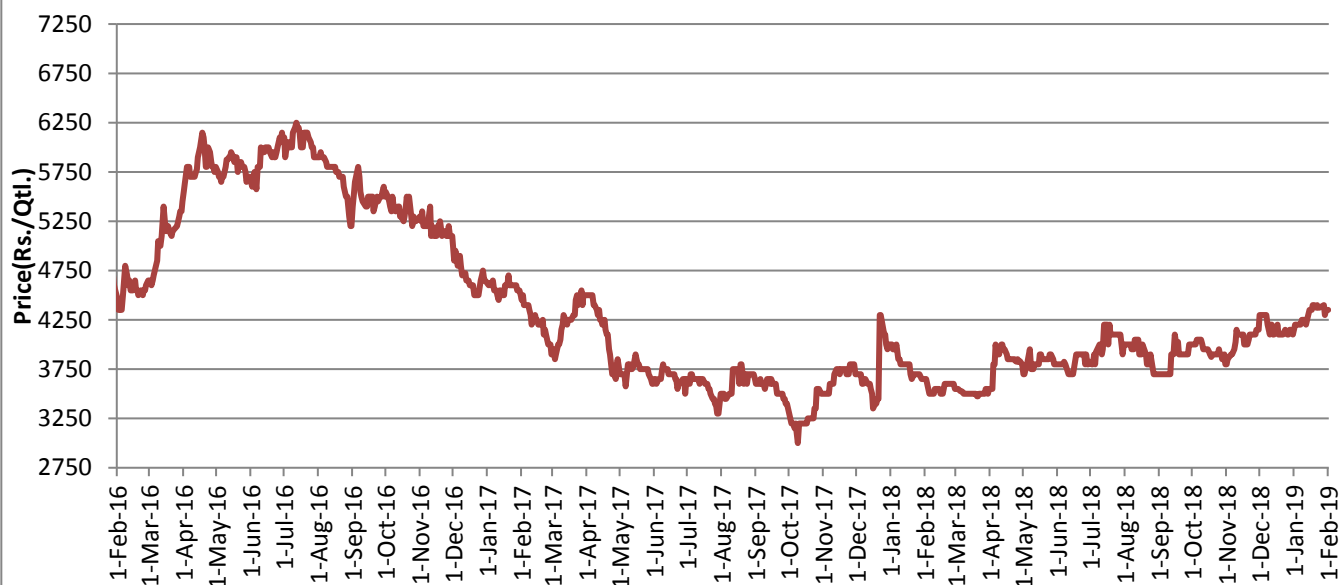

Current Scenario:

In the 4th week of Jan-2019, average price in key market like Kanpur was up by 0.18 % to Rs 4375 per qtl. Prices are likely to trade steady to slightly firm in Feb to a certain extent. New crop will be available in domestic market from end Feb. So any unexpected spike is unlikely at this level. Masur may trade in the range of Rs 4250 to Rs 4550 per qtl in the near term.

Masur at Kanpur Market

Canadian Masur at Mumbai

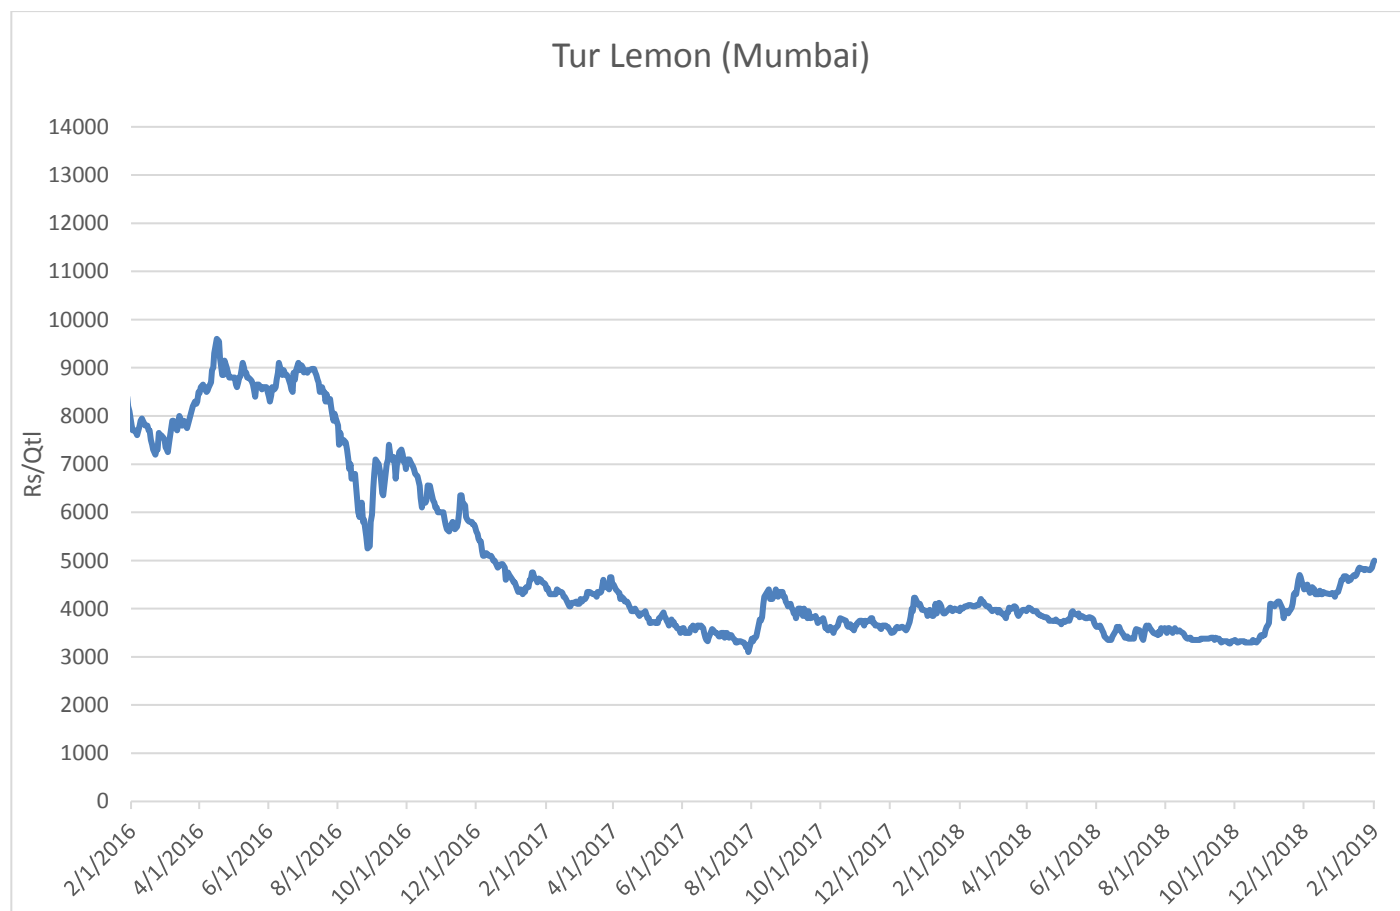

Market Outlook: Prices are likely to notice range bound movement due to weak demand.

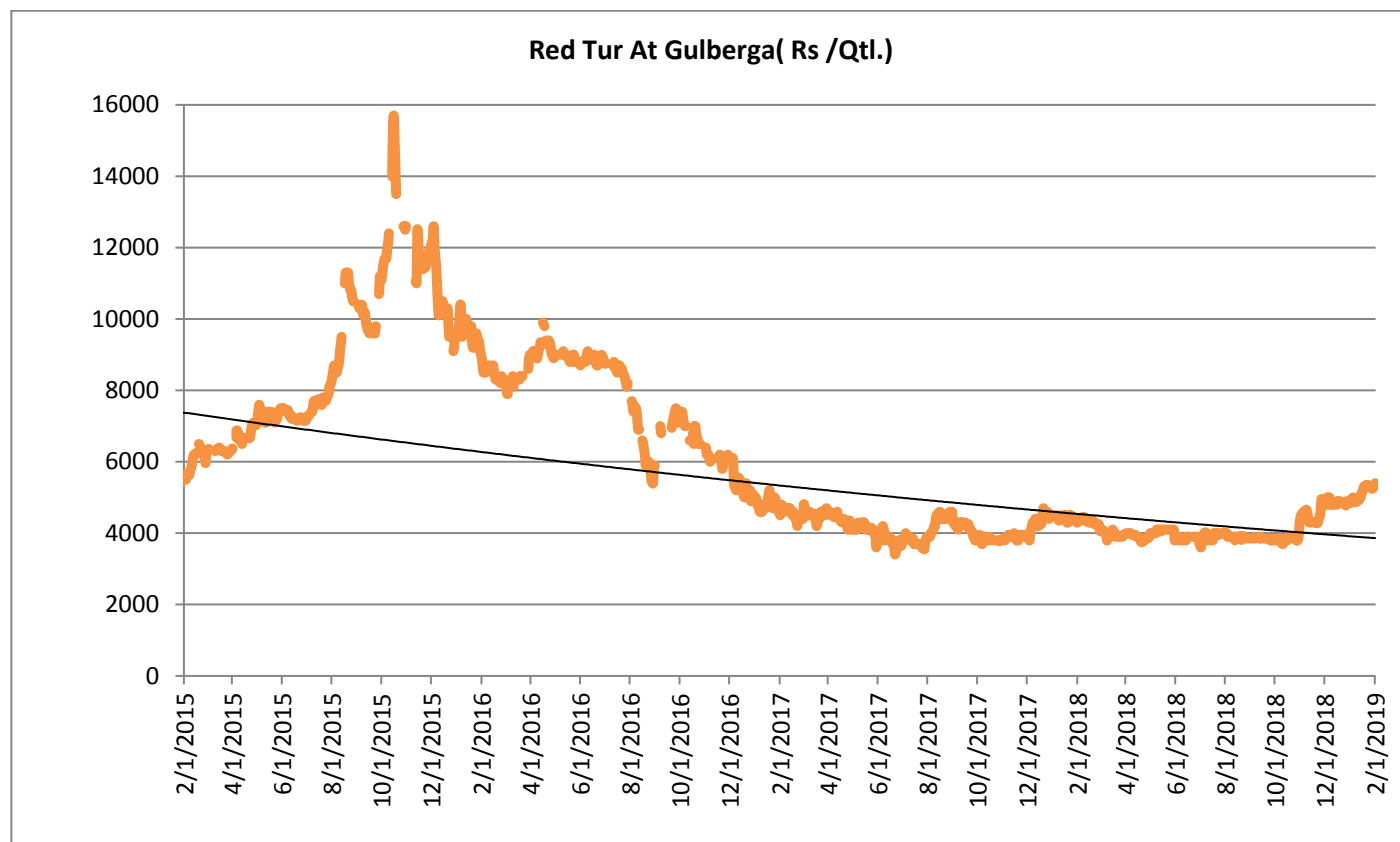

Pigeon Pea (Tur/Toor):
Market Recap:

News regarding ban on pulses import till 31st March-2019 and small grain size of tur in Myanmar encouraged domestic buyers/millers to buy more tur from mandis and it helped market to move up by Rs200-250 in major cash markets. Besides, procurement on MSP is expected from next week and it would remain supportive for tur market in coming weeks. Currently, millers in Jalgaon are active in Gulberga and Marathwara line. Tur of Amrawati line are being traded at Rs 5100-5250 per qtl. Early crop of Katni line is almost over now. Stock of lemon tur is decreasing, so Market may move further up By Rs 200 more from current level. Overall inner tone remains strong. At MSP level one down ward correction of Rs200 is expected. Besides, lower crop size (36.21 lakh tonne) against 38.67 lakh tonne last year may also help market to trade firm.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675), import ban till March-2019 and lower crop size (36 lakh tonne). Procurement drive and stockists wait and watch policy may push up tur price further.. So buying at correction seems riskless.

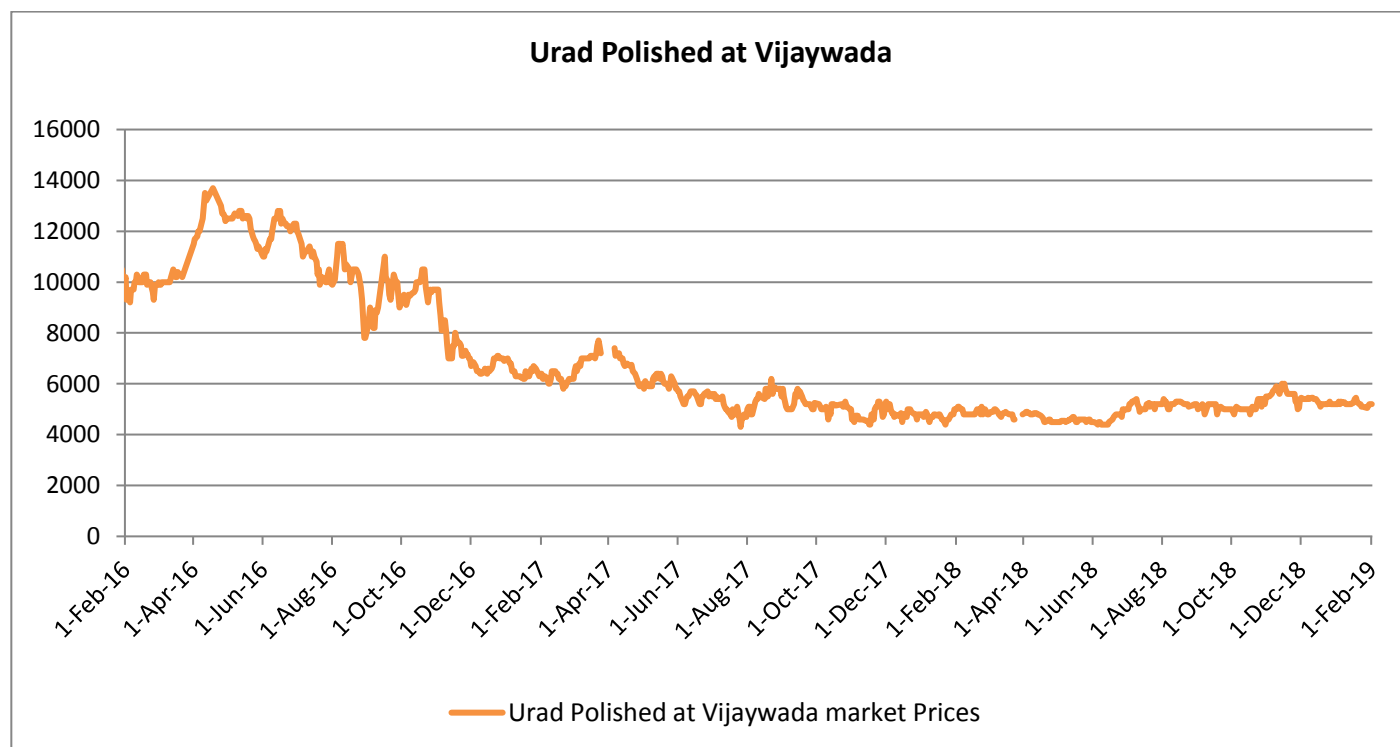

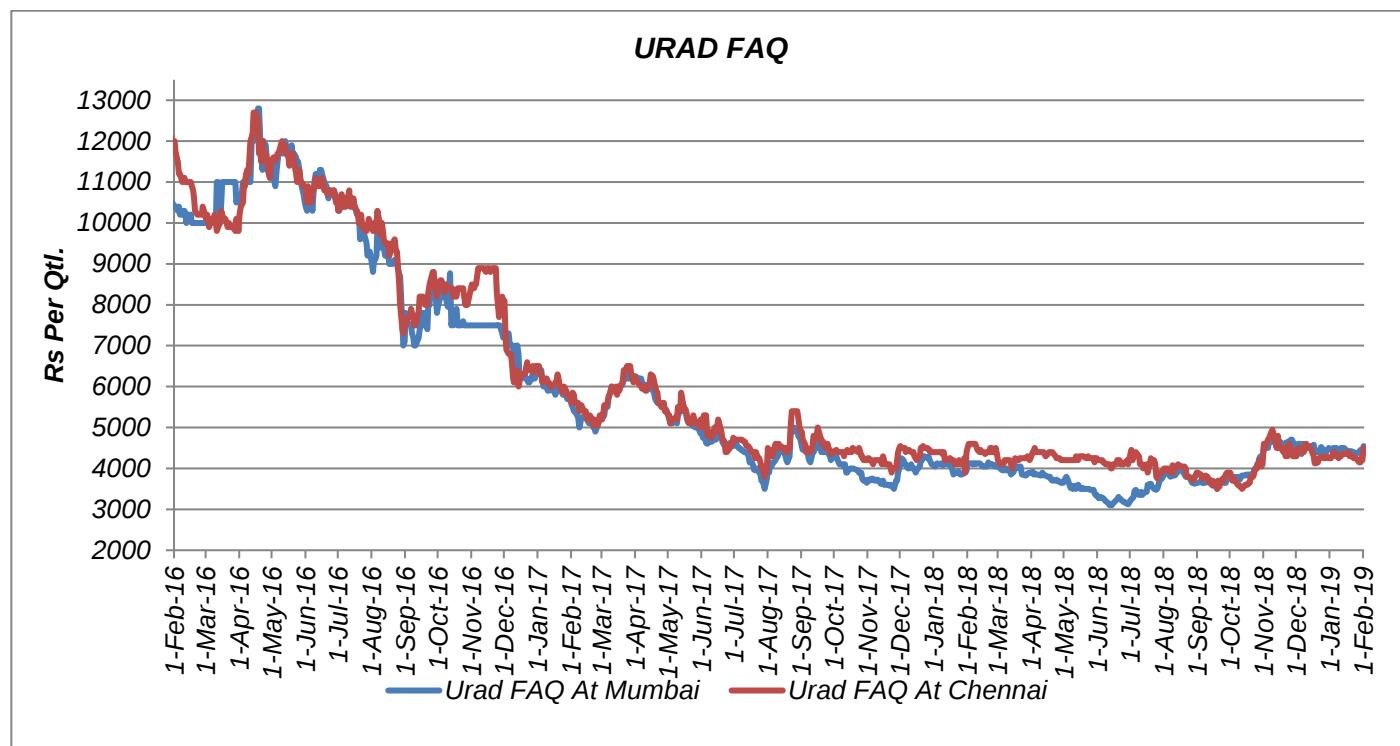

Market Outlook: Tur prices are likely to show steady to slightly firm movement in the weeks ahead as trading activities are likely to improve at lower level amid stockists demand. Fear of lower yield may push market further up. However, downward correction of Rs 100-200 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders.

Black Matpe (Urad):

Import ban and lower crop size have helped market to recover to Rs 4500-4600 and SQ at Rs 5400-5500 per qtl. There is no crop in domestic market right now and more upward momentum may continue. So, buying at current price seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. . Burma is offering urad FAQ and SQ at \$480 and \$565 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-.4500per Qtl.) and Chennai (Rs.4450-4550Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction .The following graph shows the prices movement in different markets:-

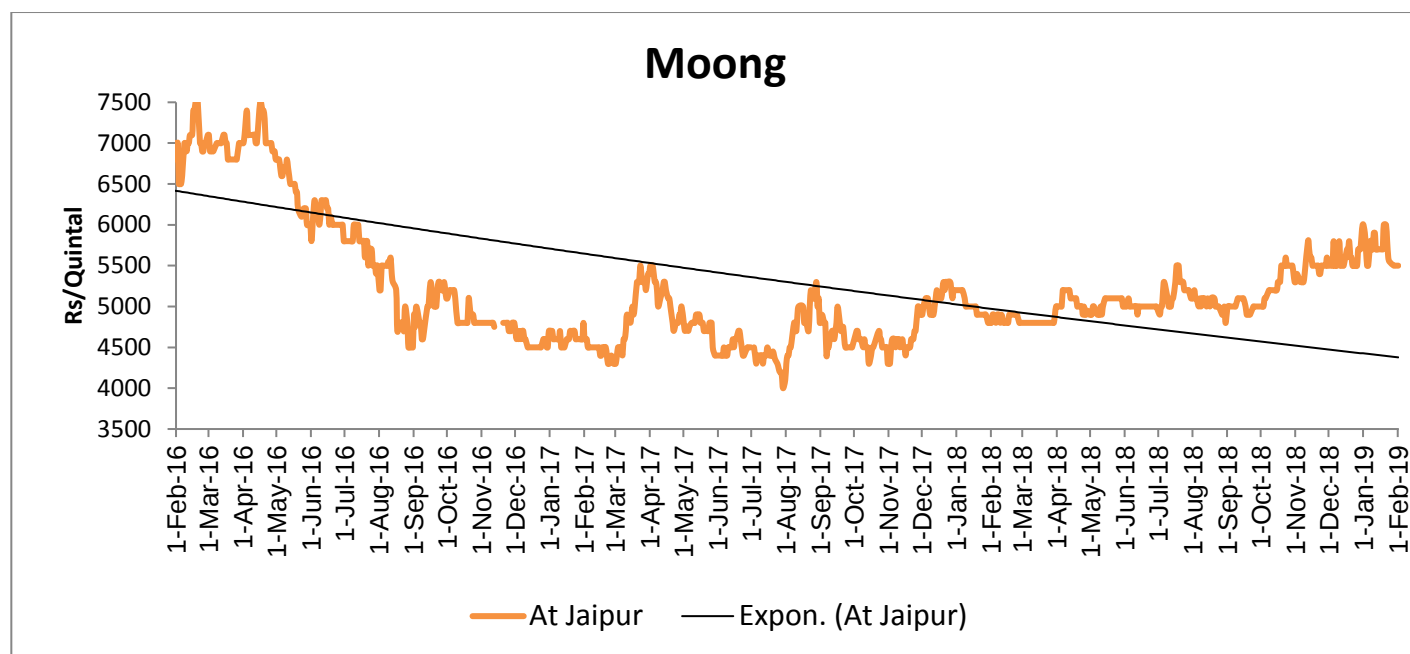

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week .

Green Gram (Moong):

Market Recap:

Demand for moong and dal was registered weak during review week and it affected firm sentiments. Higher availability of poor quality moong and its continuous supply have capped market right now. Demand is expected to improve from Jan end. Besides, area under rabi moong is down by 6.12 % to 6.81 lakh ha so far. So, any immediate spike is unlikely in the near term despite ongoing procurement drive and limited import. Steady to slightly weak tone may prevail this week in cash moong market. Myanmar too has decreased CiF quote from \$700 to \$690 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Import- Export & Average Monthly CiF :

Pulses Wise Technical Outlook For The Week:-
Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Feb.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4200 to 4400 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4250 with the first target of 4100 and second target 4050 with stop loss at 4350 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4200	4450	4600

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500- 4800 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 4750 with the first target of 4550 and second target 4500 with stop loss at 4800 level.
