Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Overall rabi area is unlikely to match last year's level as sowing is almost over now for chana, lentil and pea.** Urad and moong sowing would continue. Rabi pulses area decreased by 5.74 % at 155.12 lakh ha against 165.12 lakh ha last year **as on 08th Feb-2019.** Chana area is lagging by 10.02 % at 96.50 lakh ha against 107.40 last year. Farmers have covered 1.72 % lower area under lentil so far at 16.91 lakh ha against 17.23 lakh ha last year. Pea area is up by 11.36 % at 10.43 lakh ha. Urad area is lagging by 10.83 % at 8.79 lakh ha against 9.45 lakh ha last year. Moong area too is down by 6.12% at 7.17 lakh ha against 8.36 lakh ha so far. See sowing table on page no 13 for details.
- **New chana in MP has started in limited quantity. Yield is said to be lower in initial stages** while quality is average to good. Nafed continues to sell and how long it will continue remains to be seen. Nafed may stop selling chana from March and it may push up chana price to a certain extent. In Delhi market chana may touch cross MSP level by March end. Crop condition in Rajasthan is not satisfactory and if rains / hailstorm continues, it may support chana market at current level. Stock of chana in mills is available for 15 days only, so buying is expected. Loose trade in MP's mandit is being held at Rs 3950-4000 per qtl while quality chana is being traded at Rs 475 to 4100 per qtl. Prices may dip from current level by Rs 100 more. At this level, buying seems riskless.
- **Lower crop size, ongoing procurement drive are likely to remain supportive for Tur market in the medium term.** Slight downward correction is expected as arrival from new crop starts increasing. Maharashtra Govt would procure 2.5 lakh MT tur this year. Telangana has procured 62482.56 MT, Karnataka -27530 MT, Gujarat-442.75 MT & Tamil Nadu 5.5 MT as on 14th Feb-2019. Total purchase has reached at 90460.86 MT so far. Maharashtra would start procuring from 1st March-2019. As sentiments remain firm for tur, private buying too would continue. All these factors would keep market well supported and cash market would continue to trade in the range of Rs 5000 to Rs 5400 this week. Mah would procure 2.5 lakh tonne tur this year. Burma is offering Tur at \$600 per MT basis Indian port. However, till March import is unlikely to occur due to new incoming crop.
- **Due to import restriction till March-2019 and ongoing procurement drive remain supportive for urad market** at current level despite higher import volume in past month taking advantage of stay order from Madras High Court. As rabi crop size is expected to decline, prices of urad would move up further in coming weeks. Tamil Nadu has procured 112.65 MT from rabi crop. It would start in UP and other states from next month. Despite lower crop size, cash urad market is unlikely to see any major spike as stock in domestic market is ample against weak market demand. Steady to slightly firm tone may prevail in urad market in coming weeks. It may continue to trade in the range of Rs 4200-4500 per qtl in Mumbai market. Import of Urad is not possible till 31st March as per DGFT decision. However, some importers are trying to get stay order. Overall, view is that now clearance at port would be difficult till March-2019.
- **Moong market is likely to trade steady to slightly firm in the month of February. No new crop** is due till March. So any major decline in moong market is unlikely despite ample availability of old crop in central pool and cash market. Demand from mills is weak. At current price moong may extend its loss by Rs 200 more. It may trade in the range of Rs 5400 to Rs 6000 in Jaipur market. With ending of rabi procurement drive, it may slip once again. Myanmar is offering moong at \$6850 per MT. New crop would start hitting from UP and Bihar from March end. Millers have covered their one and a half months need while demand is weak. So steady to slightly weak tone might be seen this week.
- **New crop of lentil started coming into mandi of MP and pressure is likely to build up by the end of this month.** Crop condition is good. Crop from Bihar is expected from mid March. So, some downward correction is expected at current level despite firm inner tone. Buying on dip seems riskless. Masur is being traded at Rs 4000-to 4200 per qtl.
- **Indian imported total 2.66 lakh tonne pulses in Dec, slightly higher than Nov (2.60 lakh tonne).** Out of total import the largest share was yellow pea, followed by tur and urad. In Dec India imported 82000 MT yellow pea, 73744 MT Tur and 42860 MT urad. Fig is tentative and may be slightly up. Export figure is being assessed.

- **Weather condition for pea crop is favorable. New crop will start hitting market by Feb end.** Poor quality, shrunken pea is being traded at 2600-2900 per qtl. Besides, availability of green vegetables is higher and parity for desi chana and Kabuli in comparison to pea is in favor of trades. Use of pea in besan has decreased drastically. So any major spike is unlikely in pea market in the near to medium term.

International Market:

- **Price gap between large and smaller kabuli chana has started increasing in global market** as exporters in Mexico have raised its quotes while Indian exporters are unwilling to sell sensing improvement in price in coming weeks. In US production of Kabuli chana has been pegged at 5.79 lakh tonne, up from 3.15 lakh tonne produced last year. USDA previous estimate was 5.41 lakh tonne for 2018.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **Stock of lentil and field pea is comparatively higher in Canada.** At the end of 2018 stock of lentil in Canada was 2.04 MMT and field pea at 2.5 MMT as per statistic Canada. data released on 5th Feb-2019 shows that lentil stock in Canada was down slightly from 2.11 MMT for lentil and from 2.82 MMT for Pea compared to 2017. Relatively higher stock for 2019 would continue to pressurize lentil price in world market in absence of big market like India. Trade volume remains thin.
- **Recent rains and cold wave in Punjab region of Pakistan have greatly benefitted standing chana crop** and local production of chana in Chana Production In Punjab(Pak) is likely to increase 3 to 5 Lakh Tonne due to improved weather condition. Punjab(Pak) is expected to increase by 2 lakh tonne from 3 to 5 lakh tonne this year. This means there would be no short supply of chana in Pakistan this year. Experts see chana consumption at 5.5 lakh tonne this year. So with carryover of around 0.6 lakh tonne supply side would remain at ease. Import volume would come down to one lakh tonne this year. Normally Pakistan imports 1.5 lakh tonne chana annually. Lower demand from Pakistan and India would continue to impact chickpea prices in global market.
- **Chickpea production in Canada, is expected to increase from 1.02 lakh tonne to 3.11 lakh tonne in 2018-19** due to higher yield and area. Area too is expected to reach from 68 to 179 thousand ha with expected yield of 1.77 MT per ha. Export is expected to come down from 48 to 25 thousand MT in 2018-19. Due to higher production, total supply is expected to increase from 1.51 to 3.37 lakh tonne. Export is expected to decrease from 1.16 to 1 lakh tonne in 2018-19.
- **US chickpea area seeded is estimated by the USDA at a record 0.8 million acres, up 32% from 2017-18.** Assuming average yields and abandonment, 2018-19 US chickpea production is forecast by AAFC at over 0.4 Mt, up over 35% from the previous year.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19.
- **In the US, the area seeded to lentils for 2018-19, was forecast by the USDA at less than 8 lakh acres, down nearly 30% from 2017-18** due to lower area seeded in Montana. With estimates of average yields, 2018-19 US lentil production is estimated by the USDA to rise to 4 lakh tonne, up 18% from the 2017-18 level.
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. There are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.

- Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19. It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne. As demand from global market remains weak, farmers would prefer to reduce area under pulses. Major buyers like India, are out of global market right now due to ample availability of pulses in India.**

Monthly Outlook: -Pulses are likely to trade steady to slightly weak

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 0.9 point from 135.8 in Dec to 136.7 in Jan-2019.

Pulses-Wise Scenario:

Chana

Current Scenario:

Pressure on chana continues Chana market may dip more if weather remains dry in Feb and March despite fear of lower crop size this year. In Delhi market chana is bound to trade in the range of Rs4100 to Rs 4300. Currently it is being traded at Rs4375. Demand is lower than normal expectation amid huge stock available in central pool stock. Arrival from these states are expected from 1st week of March and it may pressurize market once again. Area under chana is down bt 10.02 % to 96.55 lakh ha, down from 107 .57 lakh ha last year. So production is bound to decrease from last year from 10 lakh tonne , based on actual area decline.

All India average price for Chana increased by 0.95 percent from Rs 4303 to 4262 per qtl. Australian Chana price too moved down by 0.35% to Rs 4120 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool and improved weather condition despite lower area coverage and halted import due to higher duty. Chart trend shows downward momentum. New crop from major states like Raj, Mah is due now.

Peas (Matar):

Market Recap:

Pea market reacted over import restriction last week amid lower stock available in domestic market. However it could not sustain its firm momentum. New crop is at hand now and chana remains unsupportive for pea. Arrival of new chana from major states are due in March. So any firm move is unlikely to continue. New crop in local market too would hit mandis from Mid March.. Govt has already extended import restriction from Dec to March 2019 and it has lent some support to cash pea market amid lower stock at ports. Besides, pea in green form is available in local market and it is available at Rs15-18 per kg. Overall sentiment remains weak. Area under pea is almost 11.36% higher this year at 11.44 lakh ha.. Overall tone remains weak in the near term. Selling on higher level seems good on rise.

Current Market Dynamics & Outlook:

Pea traded at Rs 4900 in Kanpur market, almost unchanged from previous week due to weak demand and lower price for chana despite decreasing stock at port and import restriction. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Demand for besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. New crop is due too. So, firm improvement is unlikely to continue.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market still in negative zone despite slight recovery in chana price. Spread is expected to move in the negative range of 350 to 450 per quintal in Feb on relative movement in Chana and pea price. Gap may widen further as chana price may decrease further.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

New crop started coming into mandi of MP and it is expected from Bihar from March. Recent rains in major growing belt of MP and UP has provided much respite to late sown crop. So some down ward correction might be seen in lentil cash market. However, if weather turn rough and hail storm occurs in Feb, it may damage matured crop. So weather in next 10 days is very crucial for cash lentil market. Medium term sentiments remain firm so buying at dip seems good in March. Market is trading weak currently, but may move down further. Demand is weak. Cash market may trade in the range of Rs3900-4200.. Steady to slightly weak tone may prevail this week.

Current Scenario:

In the 2nd week of Feb-2019, average price in key market like Kanpur was down by 0.55 % to Rs 4250 per qtl. Prices are likely to trade steady to slightly weak in Feb to a certain extent. New crop will be available in domestic market from end Feb. New arrival started clicking in in Ganj Vasoda and Pratapgarh. So any unexpected spike is unlikely at this level. Masur may trade in the range of Rs 3900-4150 this week and may move up again Rs4500-4600 per qtl in the medium term.

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice range bound movement due to weak demand.

Pigeon Pea (Tur/Toor):

Market Recap:

News regarding ban on pulses import till 31st March-2019 and small grain size of tur in Myanmar encouraged domestic buyers/millers to buy more tur from mandis and it helped market to move up by Rs200-250 in major cash markets. Besides, procurement on MSP is expected from next week and it would remain supportive for tur market in coming weeks. Currently, millers in Jalgaon are active in Gulberga and Marathwara line. Tur of Amrawati line are being traded at Rs 5100-5250 per qtl. Early crop of Katni line is almost over now. Stock of lemon tur is decreasing. so Market may move further un By Rs 200 more from current level. Overall inner tone remains strong. At MSP level one down ward correction of Rs200 is expected. Besides, lower crop size (36.21 lakh tonne) against 38.67 lakh tonne last year may also help market to trade firm.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of higher MSP (Rs5675), import ban till March-2019 and lower crop size (36 lakh tonne). Procurement drive and stockists wait and watch policy may push up tur price further, but not before a downward correction. So buying at correction seems riskless.

Market Outlook:

Tur prices are likely to show steady to slightly weak movement in the weeks ahead as trading activities are likely to decrease due to weak demand from bulk buyers. However, fear of lower yield may push market up in the medium term. Right now downward correction of Rs 100-200 at this level is expected. Govt may procure higher quantity this year. Buying at correction is good for stake holders Standing crop in UP is in good condition. In Gulberga market new tur is being traded at Rs 5000-5400 per qtl.

Black Matpe (Urad):

Import ban and lower crop size have helped market to recover to Rs 4500-4600 and SQ at Rs 5300-5400 per qtl. There is no crop in domestic market right now and more upward momentum may continue. So, buying at correction seems good. There is not much stock in mills. However, higher availability of green vegetables have affected urad dal demand. So, Agriwatch expects market to improve once demand starts. Burma is offering urad FAQ and SQ at \$460 and \$580 per MT basis Cif at Indian ports as demand from India has decreased considerably this week.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-.4400per Qtl.) and Chennai (Rs.4500-4550Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show range bound momentum this week .

Green Gram (Moong):

Market Recap:

Moong market is likely to trade steady to slightly firm in the month of February. No new crop is due till March. So any major decline in moong market is unlikely despite ample availability of old crop in central pool and cash market. Demand from mills is weak. At current price moong may extend its loss by Rs 200 more. It may trade in the range of Rs 5400 to Rs 6000 in Jaipur market. Stake holders should not hold stock for a longer time. With ending of rabi procurement drive, it may slip once again. Myanmar is offering moong at \$680 per MT. New crop would start hitting from UP and Bihar from March end. Millers have covered their one and a half months need while demand is weak. So buy and sell strategy seems good, for moong.

. Myanmar too has decreased CiF quote from \$690 to \$680 in last one week despite lower availability in Burma.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Import- Export & Average Monthly CiF :

Month	Chickpea		Tur		Green Peas		Lentil

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in Feb.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4100 to 4400 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4200 and second target 4150 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4250	4450	4600

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4600- 5000 in this month.

Strategy: Sell on rise

Trade Recommendations: Go short around 5000 with the first target of 4800 and second target 4700 with stop loss at 5100 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4600	4700	4925	5000	5200

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 4000-4350

Strategy Sell on rise

Trade Recommendations: Sell around 4250 with the first target of 4150 and second target 4100 with stop loss at 4350 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4225	4350	4450

Tur:

Tur (at Gulbarga) Spot Market Weekly Chart:

Outlook - We expect prices to show weak movement in the coming week.

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 5000-5600

Strategy: Buy on dip

Trade Recommendations: -Go long around 5300 with the first target of 5550 and second target 5650 with stop loss at 5200 level.
