Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

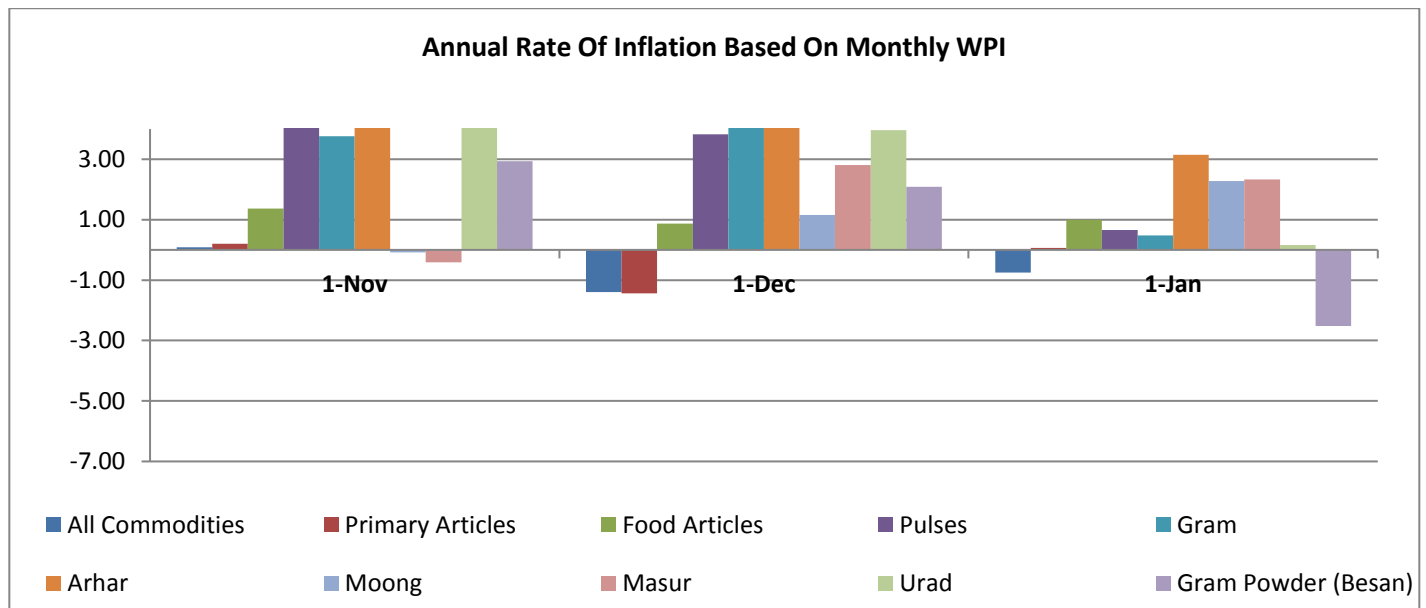

- *Despite ongoing procurement under price support scheme, tur continued to trade lower and extended its loss further by Rs 100 during the week under review. Demand from bulk users like millers and stockists is weak amid increasing arrivals in various states. Stockists have preferred to release 50% old stock and it has pressurized tur cash market. Crop size is lower around 35.5 to 36.5 lakh tonne. However, higher carryout for the ongoing season has not allowed market to spurt beyond a certain level. Currently, tur is being traded at Rs 4900 to 5200 per qtl. It may dip Rs100 more due to sluggish buying by private trades. However, medium term outlook seems bullish and once arrival pressure decreases, recovery is expected in tur cash market once again. Myanmar offers tur at \$600 per MT basis Indian ports.*
- *Urad cash market traded weak during the week under review. Demand is weak while sale of old crop by Nafed and other procurement agencies continues. Besides, there is around 20,000 MT urad is lying on ports, might be released soon as Chennai high court has ordered to release stock with condition of 10% bank guarantee. Despite lower rabi crop size, there is ample old stock available in domestic market. So supply side is at comfortable level. With this background, urad cash market is unable to get support and pressure on price continues. Agriwatch expects market to move down further by Rs 100. As stockists and farmers may refrain from selling at lower level, prices may improve once again taking support from rabi procurement drive. Near term outlook seems bearish. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade sees it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi.*
- *Moong cash market traded steady during the week under review. Weak demand and continuous sale by stockists and Nafed from central pool stock have pressurized market once again despite procurement drive for rabi season. Cash market may extend its loss further by Rs 100-200 in coming weeks. New crop from UP, Bihar and Odisha is expected by end March. So, improvement in the near term is unlikely. Moong is being traded at Rs5500 in Jaipur market. In other major markets it is being traded at Rs 5000 to 5500 per qtl. There is no parity for export while Myanmar is offering moong at \$680 per MT. Supply side seems at ease right now.*
- *Despite lower crop size of chana this year, pressure is likely to continue on chana cash market as new arrival from major growing regions like MP and Rajasthan is likely to increase from 15 March. Crop condition is good in MP and recent rains have greatly benefitted standing crop in UP. Crop size is expected to be around 85 to 88 lakh tonne as per trades estimates against govt.'s 2nd adv. Estimate of over 100 lakh tonne this year. Besides Nafed has around 18 lakh tonne stock in its custody. So, availability of chana would be higher against consumption of 90 to 92 lakh tonne. Nafed continues to sell chana while bulk buyers have restricted buying ahead of new arrival. Demand is weak. So, Agriwatch expects market to decrease further by 100 to 200 from current level. If govt. (Nafed) stops selling and procurement starts in major states, prices may recover to a certain extent. However, any big spike in chana market is unlikely. Chana in Delhi cash market might trade in the range of Rs 3900-4150 in the month of March.*
- **Govt has released 2nd Adv. estimate for foodgrains on 28.02.2019. As per the latest adv estimate** tur production has been pegged at 3.68 million tonne against target of 4.5 lakh tonne for 2018-19. For chana it has been pegged at 10.32 million tonne against target of 11.50 million tonne. Urad production has been estimated at 26.8 in kharif and 0.69 in rabi season. Total production has been pegged at 3.36 million tonne. For moong it has been pegged at 2.41 million tonne including 0.57 million tonne rabi. Lentil production has been pegged at 1.53 lakh tonne. Total pulses production has been pegged at 24.02 million tonne.
- **Lentil market is likely to stay steady to weak in near future. Crop arrival is expected to be delayed** due to rains in past week. There is no export demand from Bangladesh due to difference in buyer/seller bids. NAFED has stopped sale of masoor. Furthermore, Masoor crop is weak this year, which would lead to lower production. These developments have provided some support to domestic prices and meet shortages, if any, in MY 2019-20. Market is likely to fall by Rs 200-300 per quintal on low demand and fresh arrivals.
- **DGFT has separated HS code for moong and urad now. Before this HS code for urad and moong was 07133100.** Now it is 07133110 for urad and 07133100 for moong. It would now make it easy to quantify import-export of both commodities.

International Market:

- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small. Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.
- **Chickpea export from Argentina increased in Jan-2019 in comparison to Dec-2018 as per latest update** by Instituto Nacional de Estadística y Censos. It has exported 7,559 MT in Jan against 5233 MT in Dec. Thus total sales during the MY reached to 141309 MT. However, it is lower by 15% from last year. UAE brought 1,698 MT, followed by Spain at 1,098 MT. Others countries have brought 1,824 MT.
- **Chickpeas production in Canada is expected to decrease from 311 to 130 thousand tonne in 2019-20.** Area under chickpeas too may decline from 176 to 74 thousand ha in 2019-20. Import is expected to decline from 25 to 18 thousand tonne. Thus total supply would decrease from 350 to 343 thousand tonne. However export volume may increase from 90 to 100 thousand Tonne. Carryout stock is expected to decline from 195 to 175 thousand tonne in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT as per Statistics Canada and Agriculture.
- **Canada & US are going to object import restriction imposed by India in WTO.** As per Commerce Ministry Official, both the countries are against the quantitative cap on imports of pulses.. This, is the second objection in WTO against India. Earlier, both the countries had objected under-reporting of market price support for five varieties of pulses under the minimum support price (MSP).
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **Lentil production in Canada, is expected to decrease by 18% to 20.98 lakh tonne due to lower harvested area and yields.** Large green lentil production is estimated to have risen from last year, to 6 lakh tonne while red lentil production fell to about 12 lakh tonne. Production of the other types of lentil is estimated to have risen to 3 lakh tonne for 2018-19
- **Pea production in Canada is expected to decline from 41.12 to 35.81 lakh tonne in 2018-19 due to lower harvested area,** particularly in Saskatchewan and Alberta despite similar yield seen last year. Out of total, yellow peas production may touch 30 lakh tonne, while green pea at 4 lakh tonne. There are other varieties. Supply side has decreased slightly from 44.24 to 42.26 lakh tonne due to higher carry in. Average price may be hinged at \$240-270 per MT in 2018-19. Crop year is Aug to Jul in Canada.
- **Chickpea area in Australia is expected to decline by 70.70 % to 3.27 lakh ha in 2018-19.** It was 11.16 lakh ha in 2017-18. Production has been pegged at 3.51 lakh tonne, lower by 69.43% from last year (2017-18). Lentil area is expected to decline by 15.86% to 2.97 lakh ha in 2018-19. It was 3.53 lakh ha in 2017-18. Pea area is expected to decline by 23.42% to 1.70 lakh ha in 2018-19. Production is likely to decline by 28.03 % to 2.08 lakh tonne.

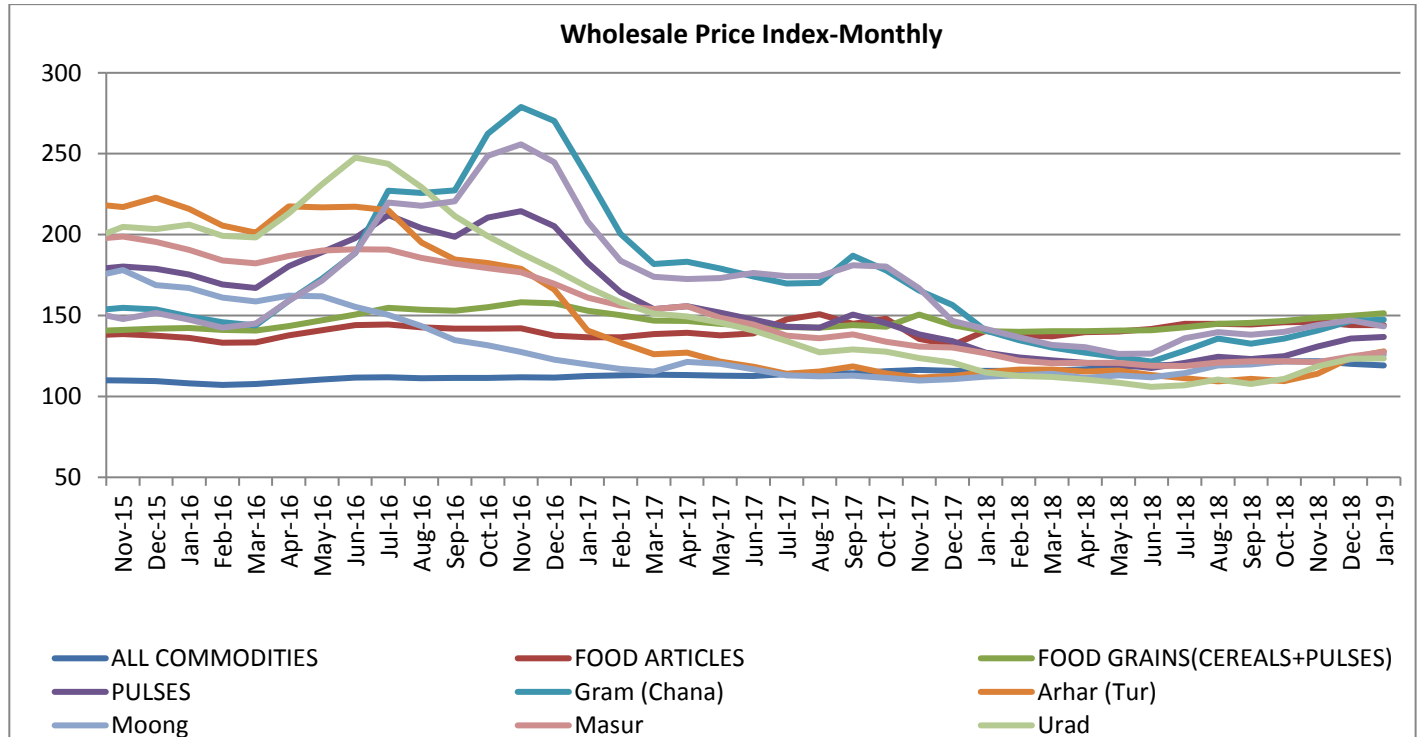

Monthly Outlook: -Pulses are likely to trade range bound.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

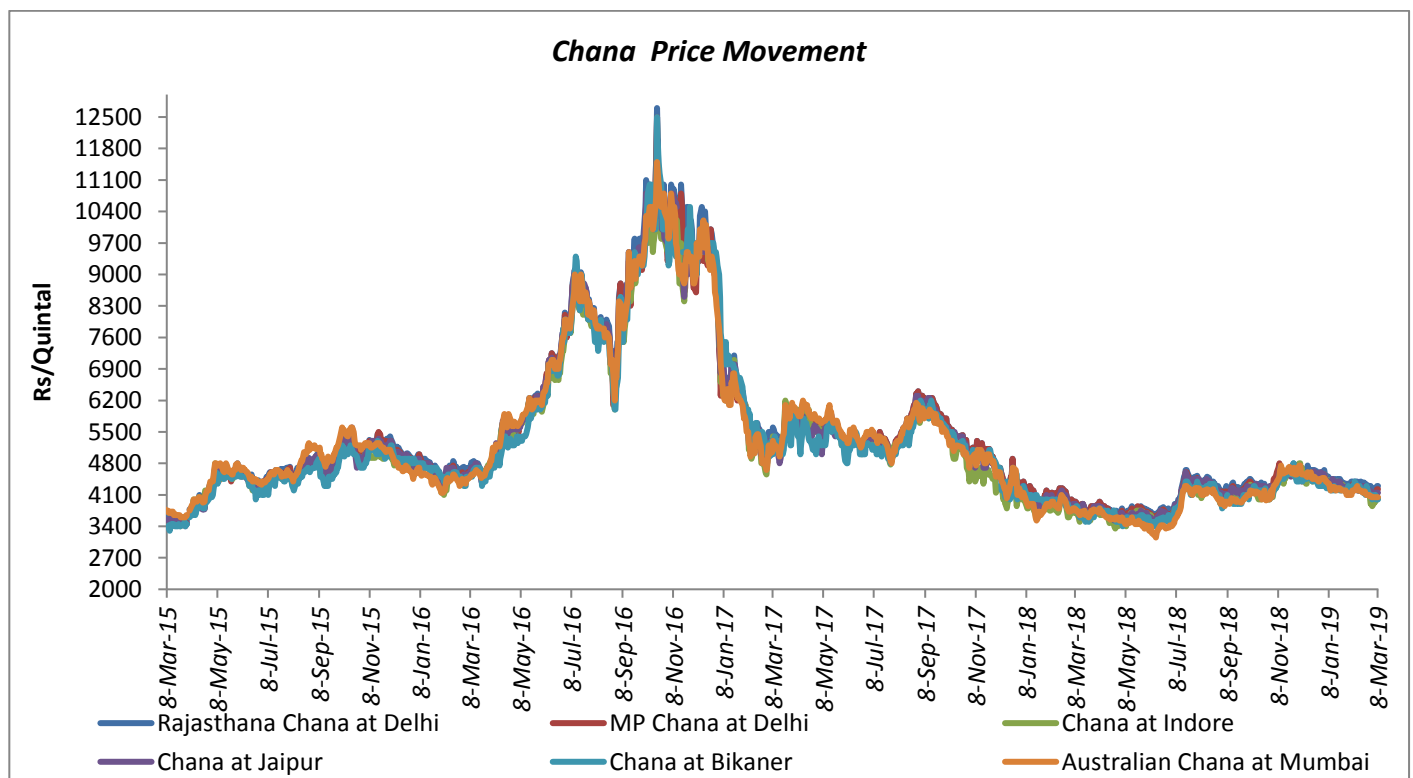

Pulses WPI increased by 0.9 point from 135.8 in Dec to 136.7 in Jan-2019

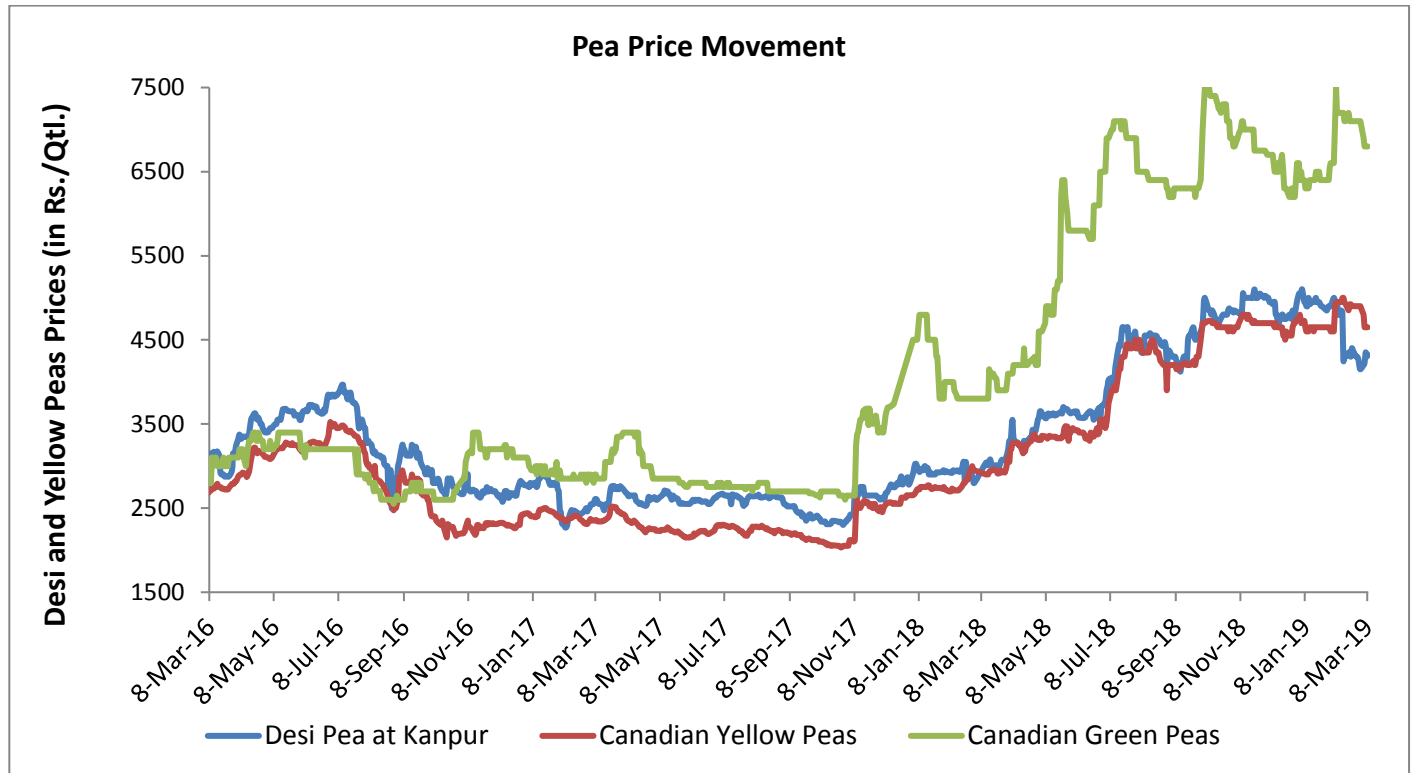

Pulses-Wise Scenario:
Chana
Current Scenario:

Despite some improvement in chana cash price and commencement of procurement in some states, market is unlikely to trade at higher level in coming weeks. New crop arrival in MP is likely to increase from next week and it may pressurize chana cash market once again. Nafed is selling chana below Rs4000 and old stock is ample to take care of existing demand despite lower crop size. In Delhi market chana is being traded at Rs4200. It may come down to 4000. Demand for besan too would decrease as mills have fulfilled its immediate demand for besan now. Overall outlook in chana market seems bearish in the short to medium term. Availability is good. In normal condition market would move to Rs4500-4600 in April/May. Import is not possible. Sudan offers chana at Rs3900 at Indian port and some buyers are active.

All India average price for Chana traded almost unchanged at Rs4125. However, Australian chana price too moved down by 0.49% to Rs 4050 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may continue to trade range bound with weak bias likely to continue. Fundamentally, it lacks support due to higher stock in central pool and improved weather condition despite lower area coverage and halted import due to higher duty.

Peas (Matar):
Market Recap:

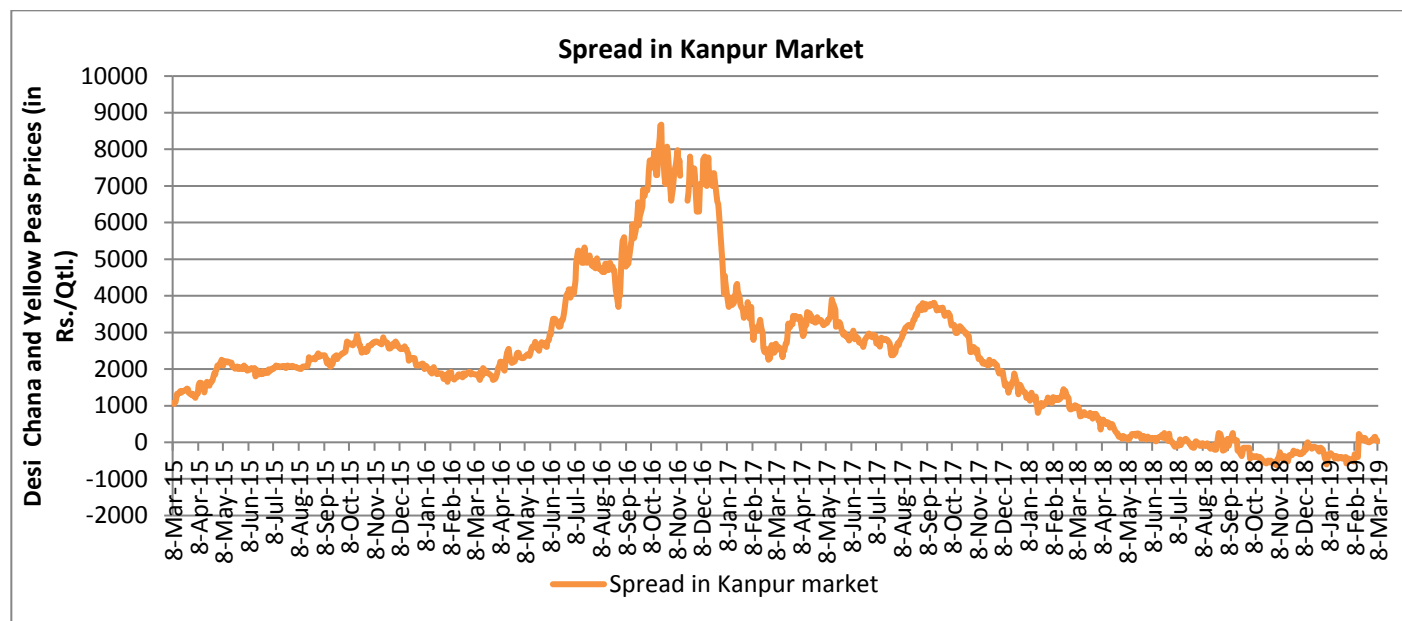

Pea market traded weak as expected last week and pressure would continue on cash market due to poor offtake and new arrivals. It would ease supply in domestic market. Pea in Mumbai market is being traded at Rs. 4650, while in Kanpur market it is being traded at Rs 4300 per qtl. As chana price is decreasing and new crop is at hand, any firm momentum in pea market is unlikely this week too. New crop in local market too would hit mandis from Mid March. Govt has already extended import restriction from Dec to March 2019 and it may help market to sustain around current level.. Besides, pea in green form is available in local market and it is available at Rs10-15 per kg. Overall sentiment remains weak. Area under pea is almost 11.36% higher this year at 10.45 lakh ha.. Overall tone remains weak in the near term. Selling on higher level seems good on rise.

Current Market Dynamics & Outlook:

Pea traded at Rs 4100-4200 in Kanpur market, almost Rs100 down from previous week due to weak demand and lower price for chana despite decreasing stock at port and import restriction. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Consumption of pea in besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. New crop has already commenced. The govt may increase import limit to 2 lakh tonne from April-2019. The move is said to be under consideration.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market, has started moving in positive zone due to decreased pea price in Kanpur market. Spread is expected to remain in the positive zone of minus Rs100 to 200 in March on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

New crop started coming into mandi of MP and Uttar Pradesh .it is expected from Bihar from mid-March.However.delayed harvesting has capped downward trend.Demand from Kolcatta and Nepal is weak and it remains un-supportive to cash lentil market. cash market. Weather for next 10 days remains very crucial for lentil market. If turns rough and hail storm occurs in mid-March, some cap on decreasing trend might be seen. Arrival might be delayed by 15 days from late sown crop. . Cash market may decrease further by Rs100 more.Demand is weak. Cash market may trade in the range of Rs3800-4000.. Steady to slightly weak tone may prevail this week.

Current Scenario:

In the 1st week of March-2019, average price in key market like Kanpur was up by 2.49 % to Rs 4060 per qtl.Prices are likely to trade steady to slightly weak in March to a certain extent. New crop will be available in domestic market from mid of this month.New arrival started clicking in Ganj Vasoda and Pratapgarh. So any unexpected spike is unlikely at current level. Masur may trade in the range of Rs 3700-4000 in the near term.

Masur at Kanpur Market

Canadian Masur at Mumbai

Market Outlook: Prices are likely to notice weak movement due to weak demand.

Pigeon Pea (Tur/Toor):

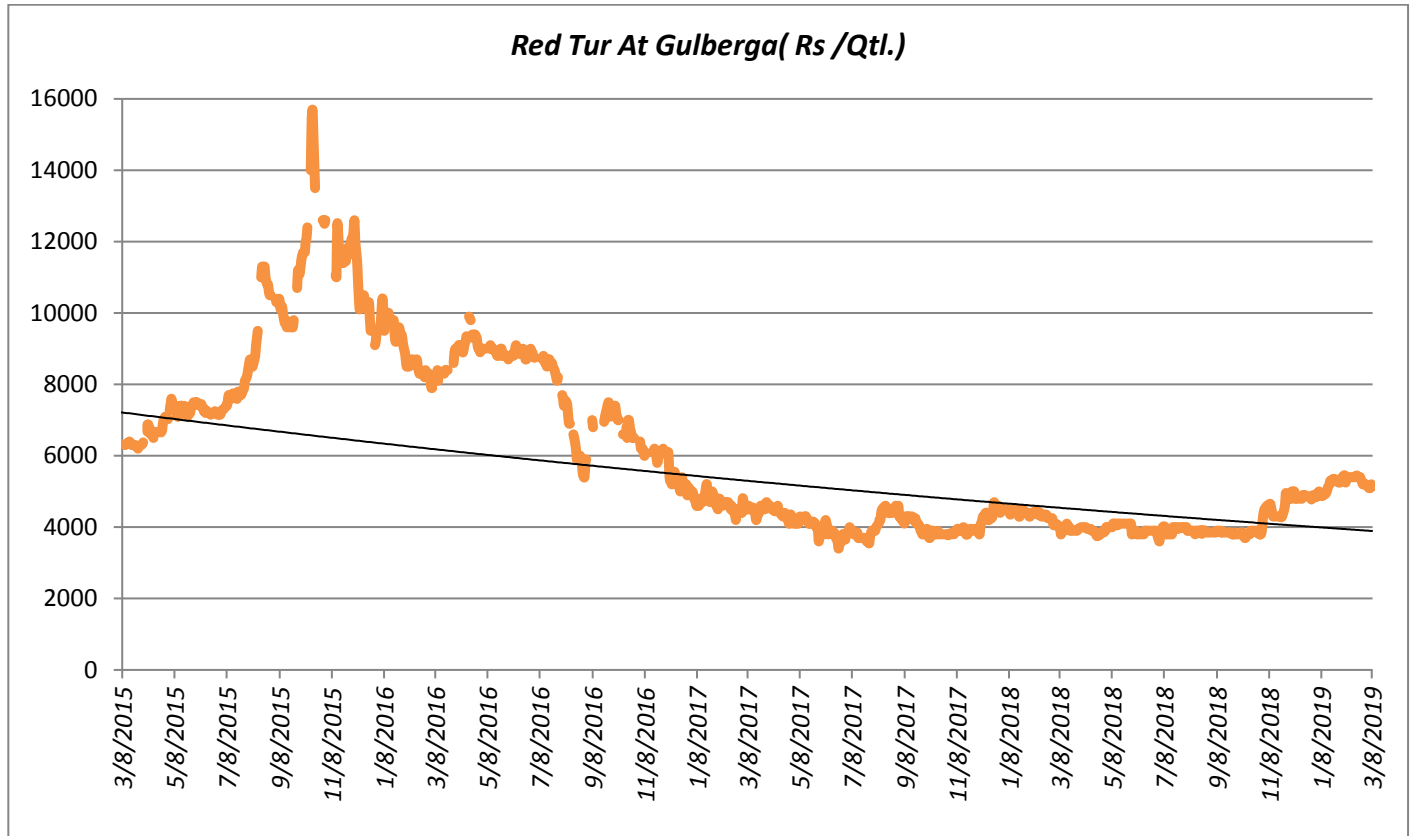

Market Recap:

Despite ongoing procurement drive and lower crop size, tur market trades under pressure due to weak demand and higher availability of old crop at lower level. Stockists are releasing old crop. Tur market may dip further, by Rs 100-150 as arrival in major markets are increasing. However, overall view for tur market remains firm and it would move up again in the medium term. In Gulberga market, Tur is being traded at Rs 5000 to 5200 while in Mumbai it is being traded at Rs 4800-5000. On going procurement drive remains supportive. Besides, lower crop size (35.21 lakh tonne) against 38.67 lakh tonne last year may also help market to trade firm in the medium term.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak due to poor demand and increasing arrival in major markets. Buying by private trade remains restricted. However, medium term outlook remains firm due to import ban till March-2019 and lower crop size (36.21 lakh tonne). Stake holders should buy on correction.

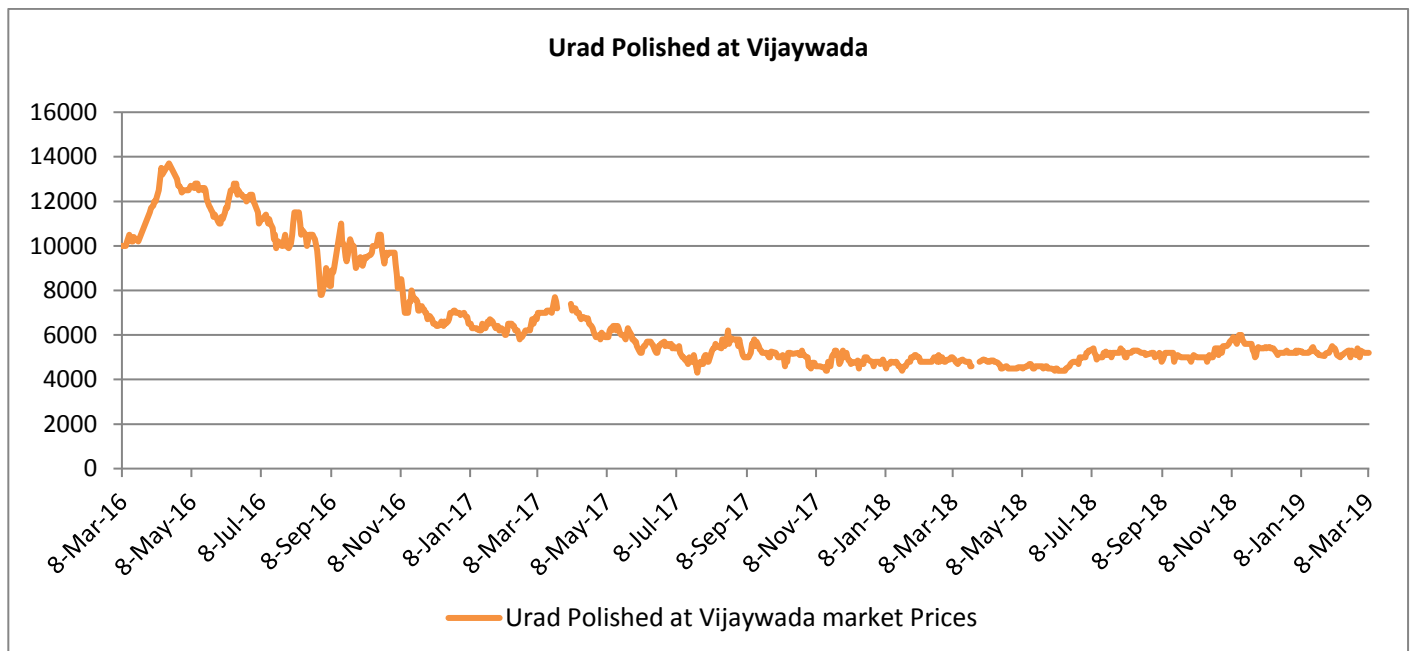

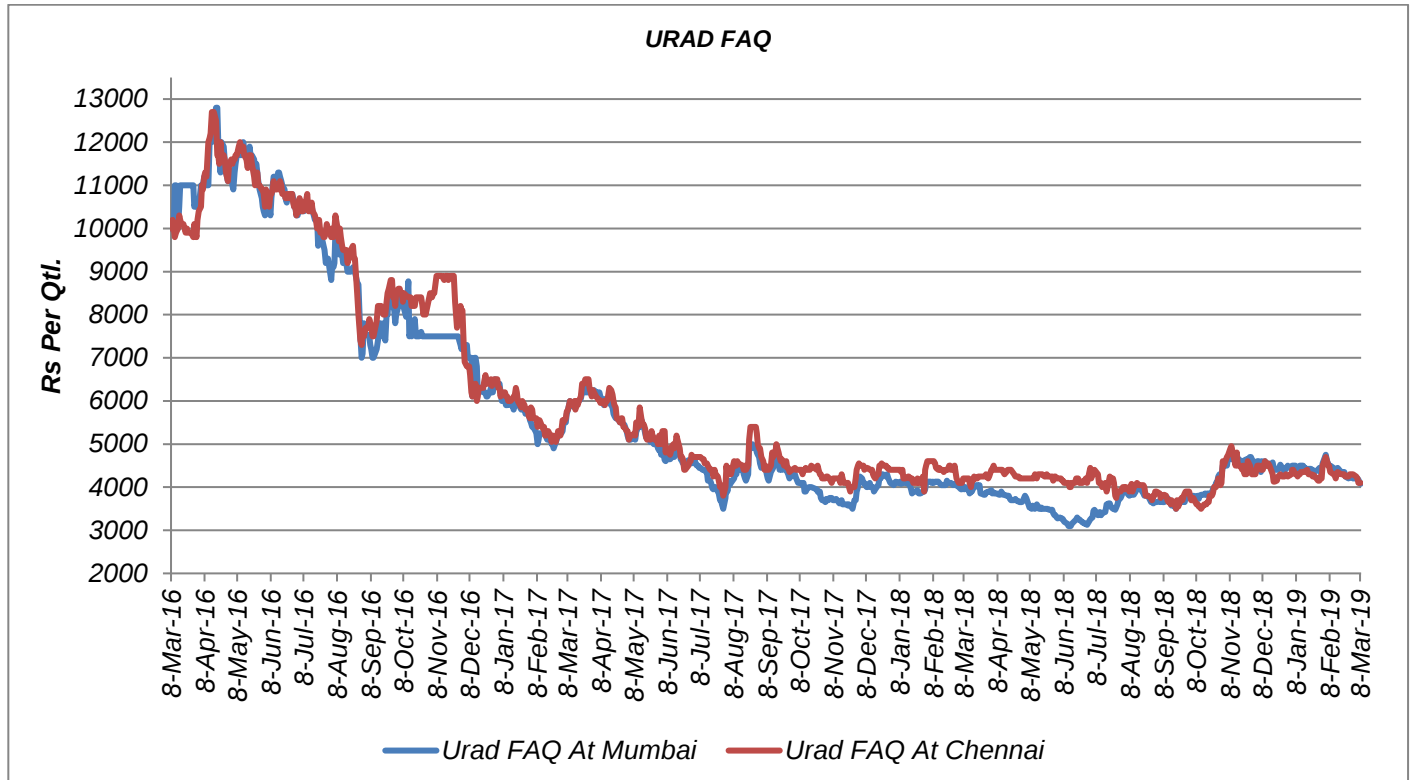

Market Outlook: Tur market may dip by Rs150 more with increasing arrivals.

Black Matpe (Urad):

Urad market traded weak during the week under review. Slackened demand from mills and higher production adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Privatetrade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks. With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs4100-4400 per qtl in various markets. In Chennai market urad is being traded at Rs4200-4250 per qtl. Burma is offering FAQ urad at \$460 & SQ at \$570 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4100-4200 per Qtl.) and Chennai (Rs.4150-4250 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase from mid March. The following graph shows the prices movement in different markets:-

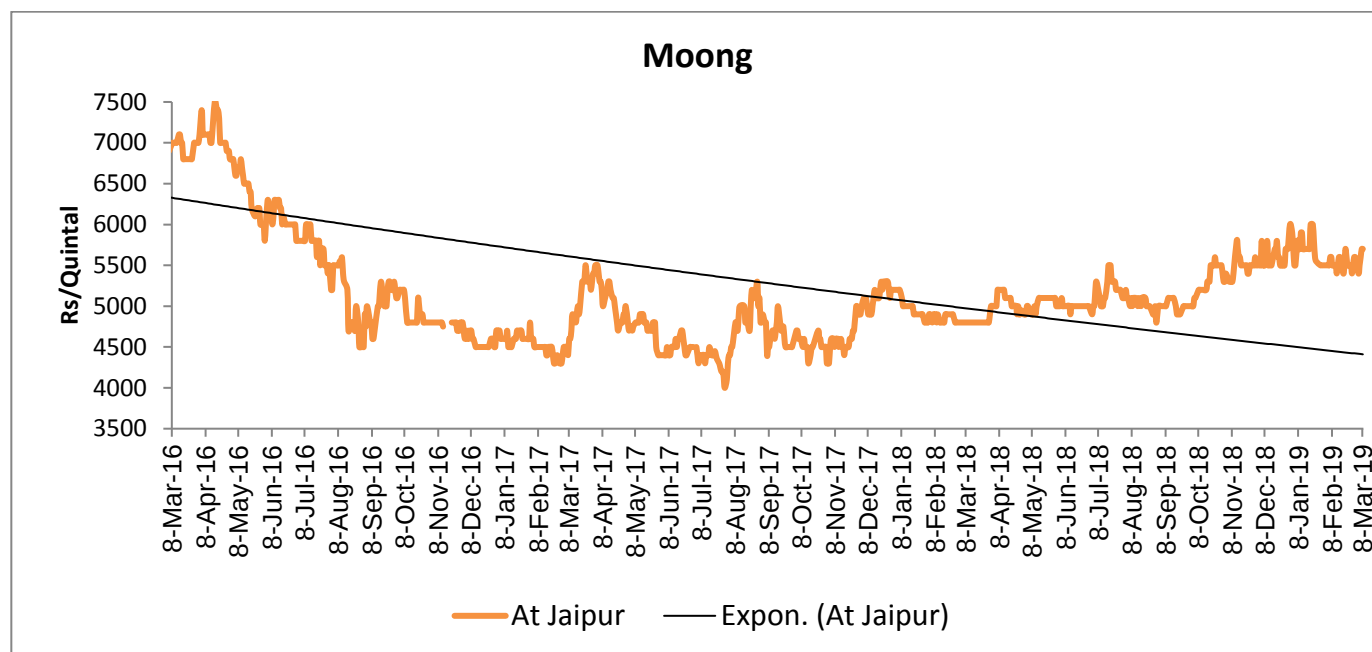

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

Demand for moong dal remains affected from cash market. Bulk buyers are unwilling to buy at higher level and fulfilling their immediate requirements. Supply side in domestic market is at ease against weak demand. So, any major jump is unlikely in moong market despite restricted supply from Rajasthan, Gujarat and MP line. Moong is being traded at Rs 5400-5500 in Jaipur market. It may dip by Rs100 more from current level. New crop from UP and Bihar is expected from March end. So steady to slightly weak tone may prevail this week too. Moong would continue to trade in the range of Rs5400 to Rs5800 in Jaipur market. Myanmar is offering moong at \$680 per MT.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in March.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4000 to 4250 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4250 with the first target of 4150 and second target 4100 with stop loss at 4275 level.

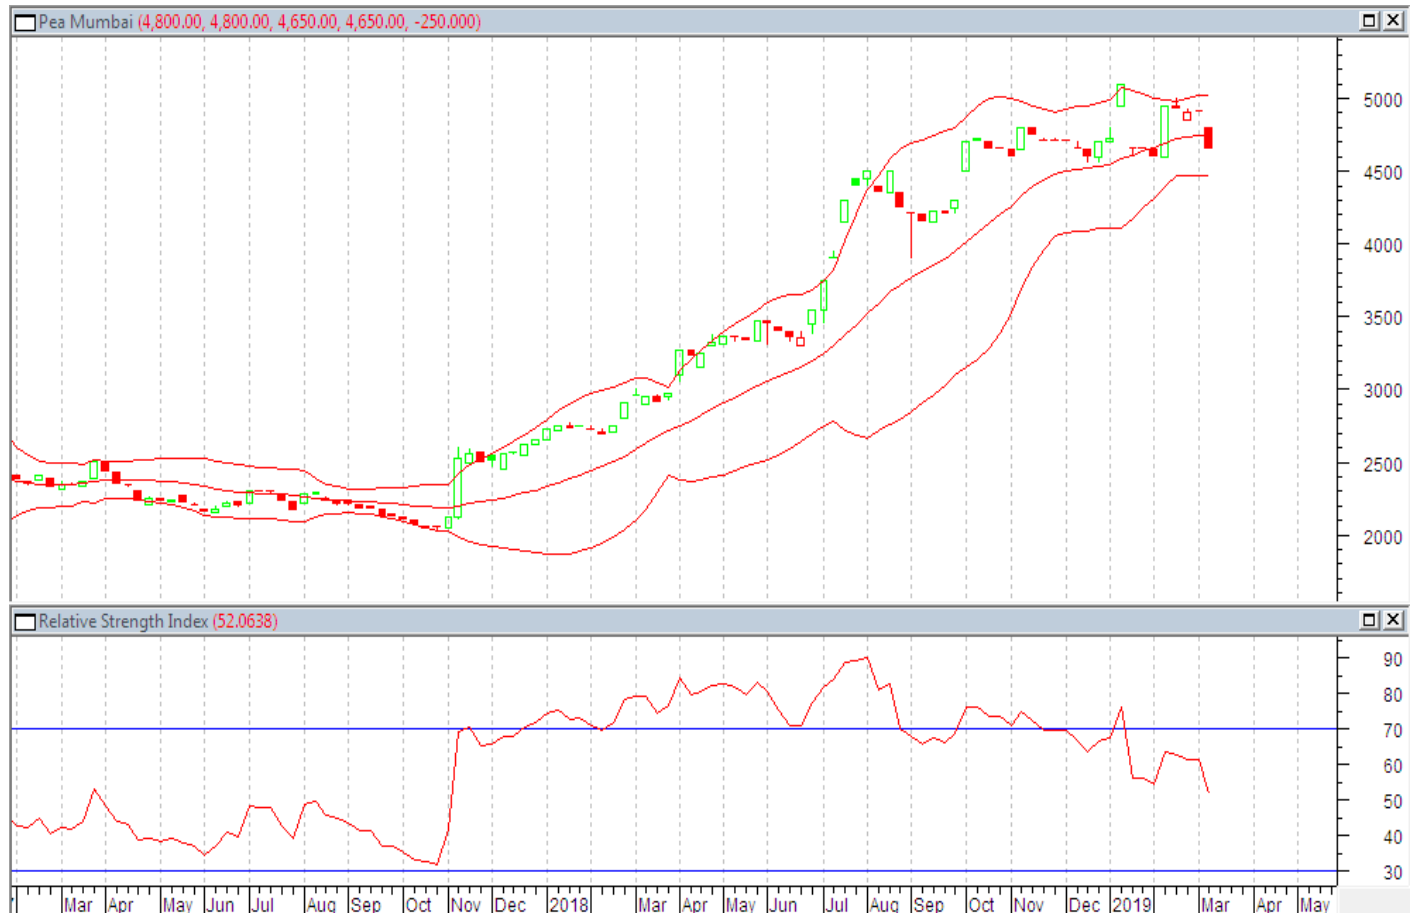

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4225	4300	4400

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500- 4700 in this week

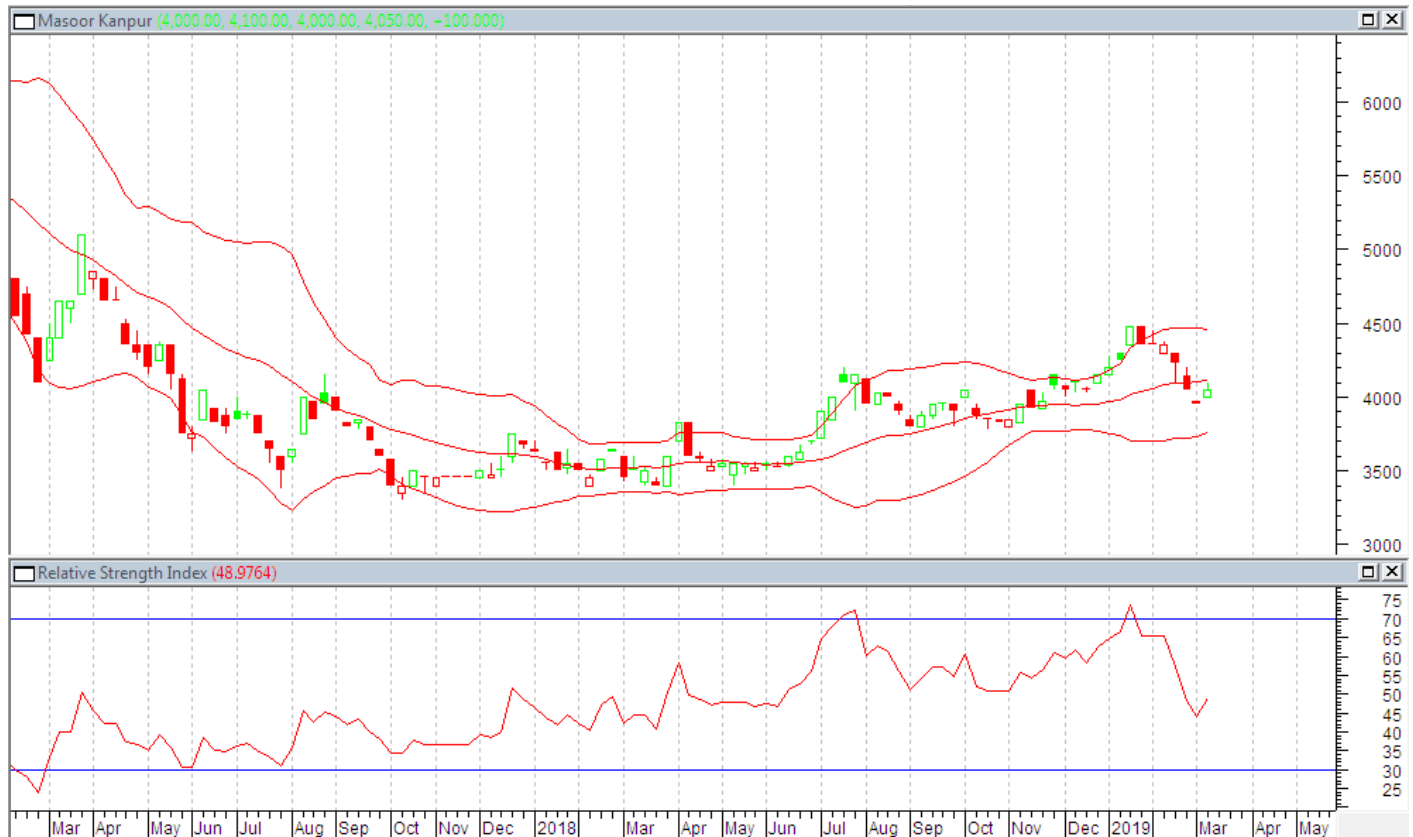

Strategy: Sell on rise

Trade Recommendations: Go short around 4700 with the first target of 4600 and second target 4500 with stop loss at 4800 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4600	4700	4650	5000	5200

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 3900-4100

Strategy Sell on rise

Trade Recommendations: Sell around 4100 with the first target of 3950 and second target 3900 with stop loss at 4200 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3800	3900	4050	4200	4350

Tur:

Tur (at Gulbarga) Spot Market Weekly Chart:

Outlook - We expect prices to show weak movement in the coming week.

- Candlestick chart denotes weak movement in the market.
- Oscillator RSI is moving down in neutral region.
- Expected price range is 4800-5200

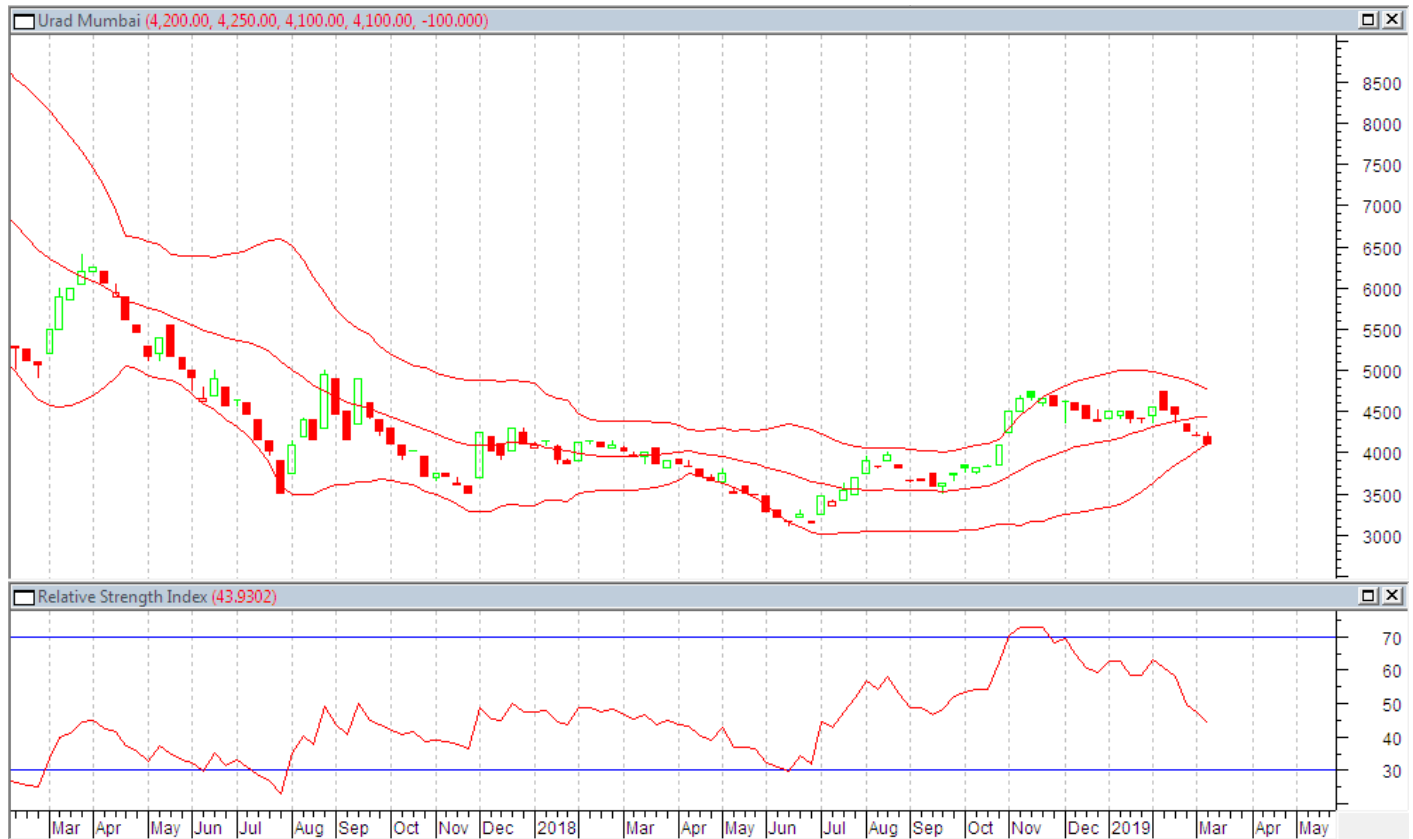

Strategy: Sell on rise

Trade Recommendations: -Go short around 5100 with the first target of 5000 and second target 4900 with stop loss at 5200 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4800	4900	5050	5350	5450

Urad

Urad FAQ- Burma Origin (at Mumbai) Spot Market Weekly Chart:

Outlook –We expect steady to slightly weak momentum in the coming week.

- Candlestick chart shows steady to weak movement in the market.
- RSI is moving up in neutral region.
- Expected price range is 3900-4300

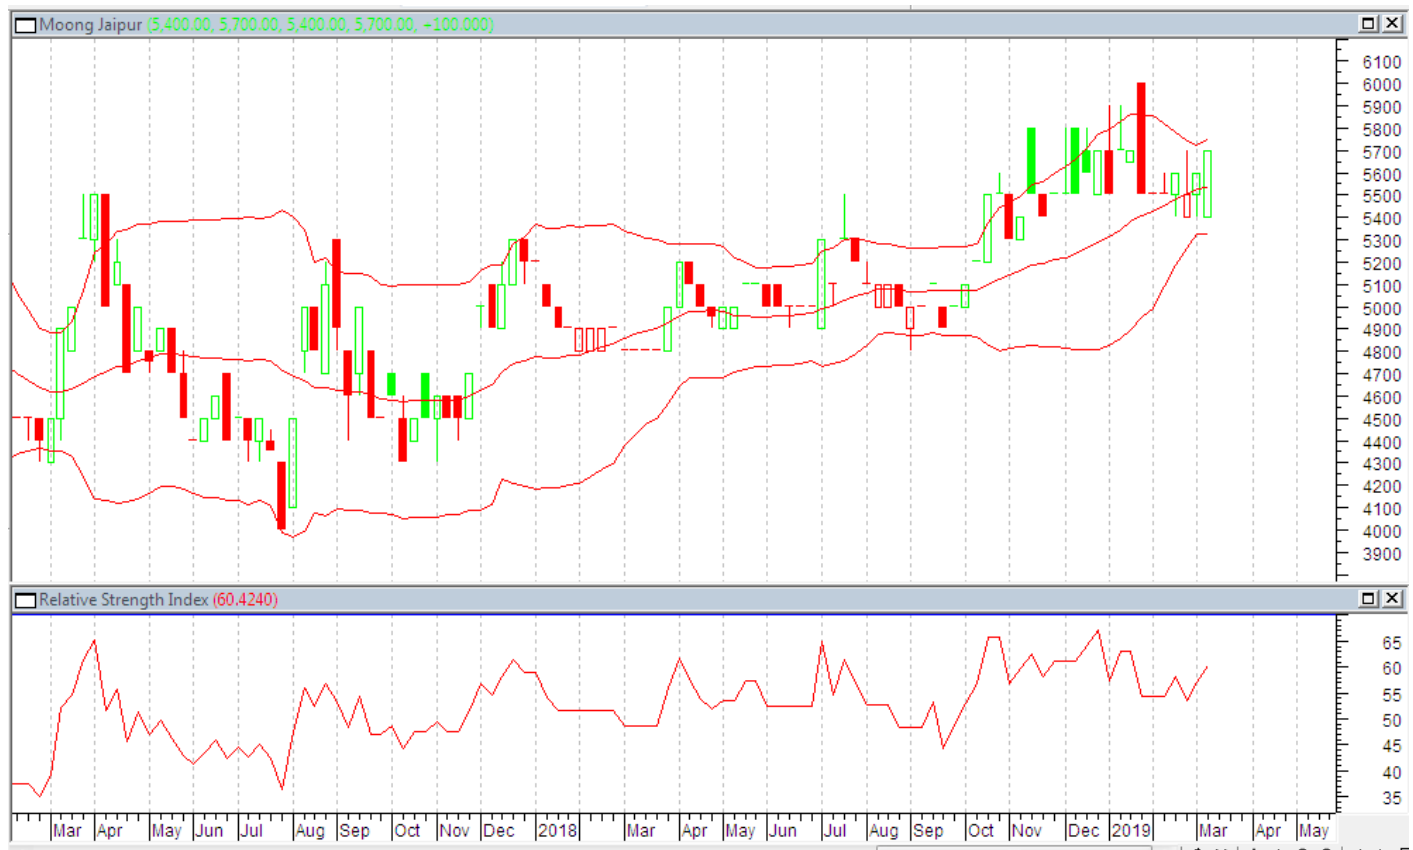

Strategy: Sell on rise

Trade Recommendations: Go short near 4150 for a target of 4000 and 3950 keeping stop-loss at 4250

Supports & Resistances
