Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Demand in cash pulses market remains weak despite lower rabi crop size.** Procurement pace on minimum support price remains slow while private buying too remains restricted. Overall scenario for pulses market remains weak in the short term. Buyers/stockiest are waiting for govt decision over import quota, expected in April-2019. There is a rumour in the market that govt may increase import quota considering lower crop size and increasing possibility of El-Nino this monsoon season, starting from June-2019. Quota for tur may be increased from 2 to 3 lakh tonne, for urad it may be enhanced from 1.5 to 2 lakh tonne. Moong import quota may be similar as last year at 1.5 lakh tonne. Availability of old stock is still higher while there is ample stock in central pool. So any spike in Indian market is unlikely in the near term.
- **Chana in cash market is being traded lower by Rs500-600 per qtl. from MSP.** New arrival in states like MP and Rajasthan has started increasing. New chana in MP is being sold at Rs4000-4050 against set MSP of Rs4650. As production is expected to decrease this year to 88/90 lakh tonne, as per trade estimate, procurement target by govt. too has been decreased this year. There is a possibility of recovery in Chana price if state procurement agencies procure higher than expected quantity. However, under prevailing market condition amid weak demand Agriwatch expects chana to move down by Rs 100-150 from current level. Stake holders should buy below Rs3800/3900 and hold it. Recovery is expected May onward.
- **Urad arrival in cash market has started declining while stockiest have started restricting** selling in the hope of improvement. Old stock is fast depleting amid improvement in demand with increasing temperature. Imported consignment too is getting costlier. Importers are active in Myanmar. Buyers from India and Pakistan are said to be active at current rate. This year urad crop in Myanmar is comparatively lower by 20/25 % due to poor yield. Total stock available in Myanmar is around 5.5 lakh tonne including 1 lakh tonne old stock. It has increased price of urad in Myanmar by \$15 to \$480 for FAQ and \$590 for SQ. There is uncertainty of incoming kharif crop, so Agriwatch expects urad market to improve in coming months. However, short term outlook look is weak.
- **Pressure on tur continues with increasing arrival from old and new stock amid weak demand.** Despite lower crop size tur market may extend its loss further by Rs 100-150. Weak demand, slower pace of procurement and availability of old stock remains unsupportive to cash market. Agriwatch expects demand to improve from mid April, by which time, maximum old stock is likely to be consumed. So, stake holders should resume buying from mid April, when crop from UP starts coming. Short term outlook for tur remains weak while medium and long term outlook seems bullish. Myanmar is offering tur at \$600 per MT basis Indian port. Crop damage in Myanmar would help market to move up in the second half of the year as supply side would be tight in Myanmar this year. Current available stock in Myanmar is said to be 1 lakh tonne. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade sees it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi.
- **Moong cash market traded slightly up with ongoing procurement drive and restricted selling from** central pool stock. Demand is from stockiest, not from millers. At higher level, market may face demand crunch. So cash moong market may see downward correction once again. New crop from UP & Bihar is due and it may put pressure on moong price. Moong in Jaipur mandi is being traded at Rs5700-5800 right now and it may decrease by Rs 200 from current level. At this level, there is no parity for export. Myanmar is offering moong at \$690 per MT. Supply side seems at ease right now.
- **Govt has released 2nd Adv. estimate for foodgrains on 28.02.2019.** As per the latest adv estimate tur production has been pegged at 3.68 million tonne against target of 4.5 lakh tonne for 2018-19. For chana it has been pegged at 10.32 million tonne against target of 11.50 million tonne. Urad production has been estimated at 26.8 in kharif and 0.69 in rabi season. Total production has been pegged at 3.36 million tonne. For moong it has been pegged at 2.41 million tonne including 0.57 million tonne rabi. Lentil production has been pegged at 1.53 lakh tonne. Total pulses production has been pegged at 24.02 million tonne.
- **Lentil market is likely to stay steady to weak in near future.** Crop arrival is expected to be delayed due to rains in past week. There is no export demand from Bangladesh due to difference in buyer/seller bids. NAFED has stopped sale of masoor. Furthermore, Masoor crop is weak this year, which would lead to lower production. These developments have

provided some support to domestic prices and meet shortages, if any, in MY 2019-20. Market is likely to fall by Rs 200-300 per quintal on low demand and new arrivals.

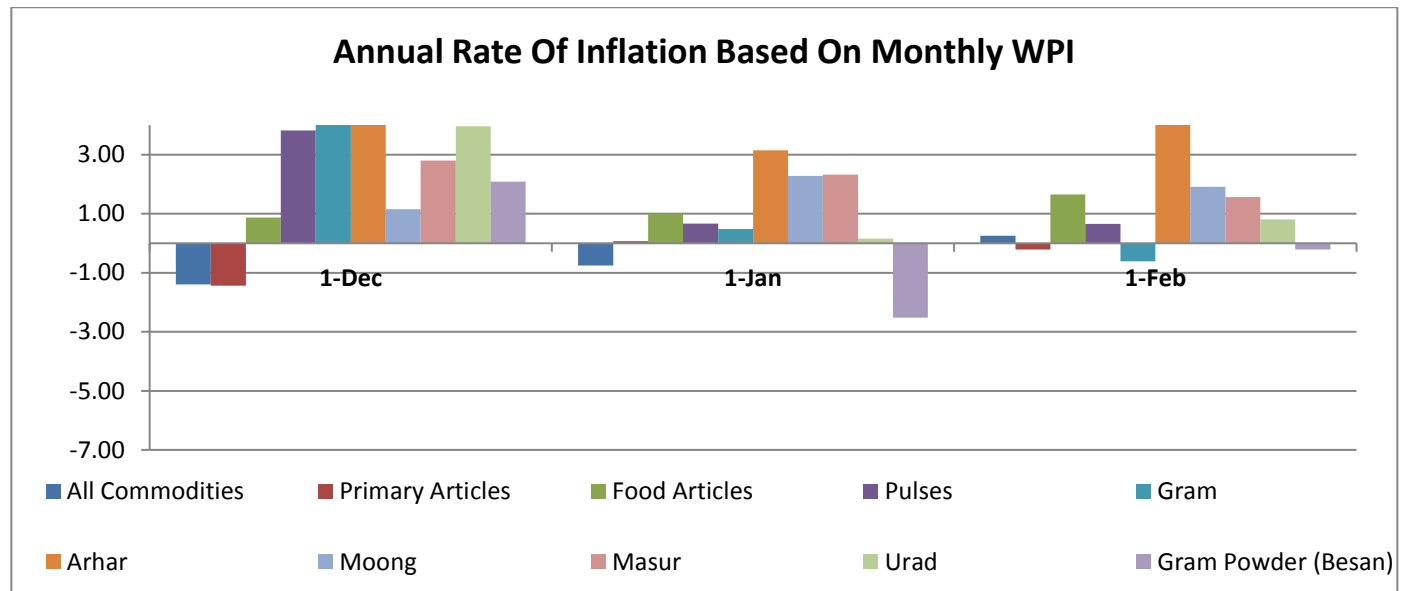

International Market:

- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT** in 2019-20 against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.
- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from

320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, chickpea production increased by 86%, while small chickpeas increased by 66%

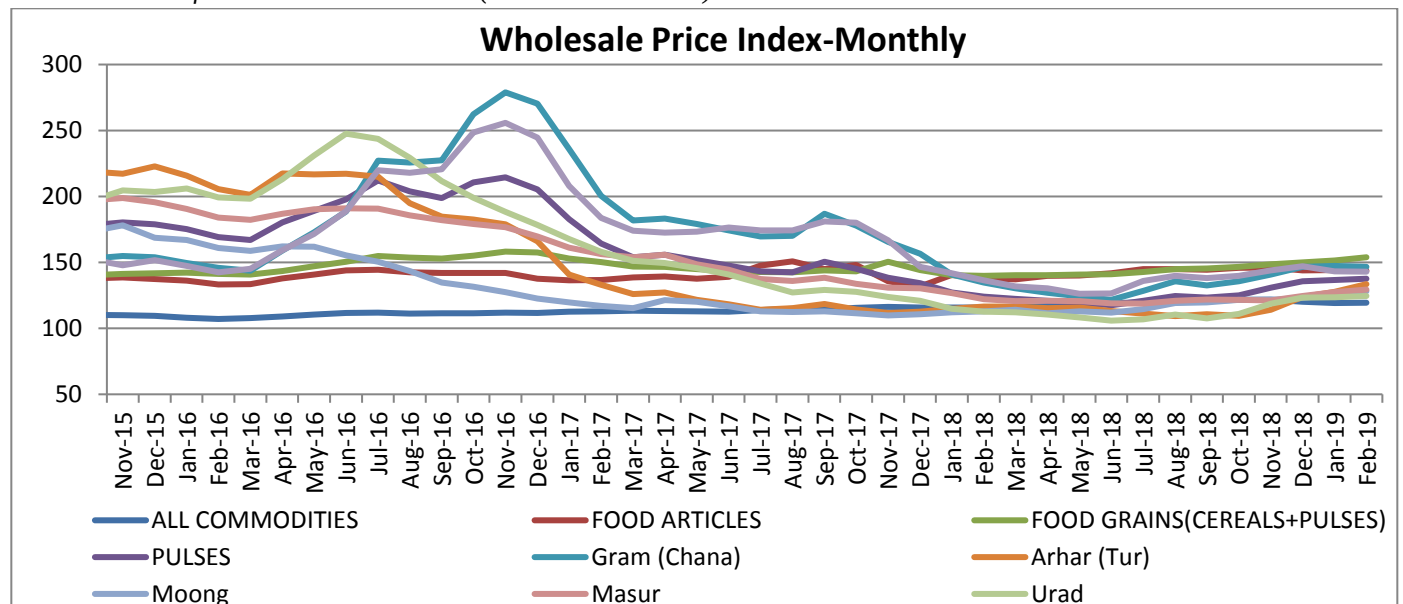

- **Weekly Outlook:** -Pulses are likely to trade steady to slightly weak..

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Pulses WPI increased by 0.9 point from 136.7 in Jan to 137.6 in Feb-2019

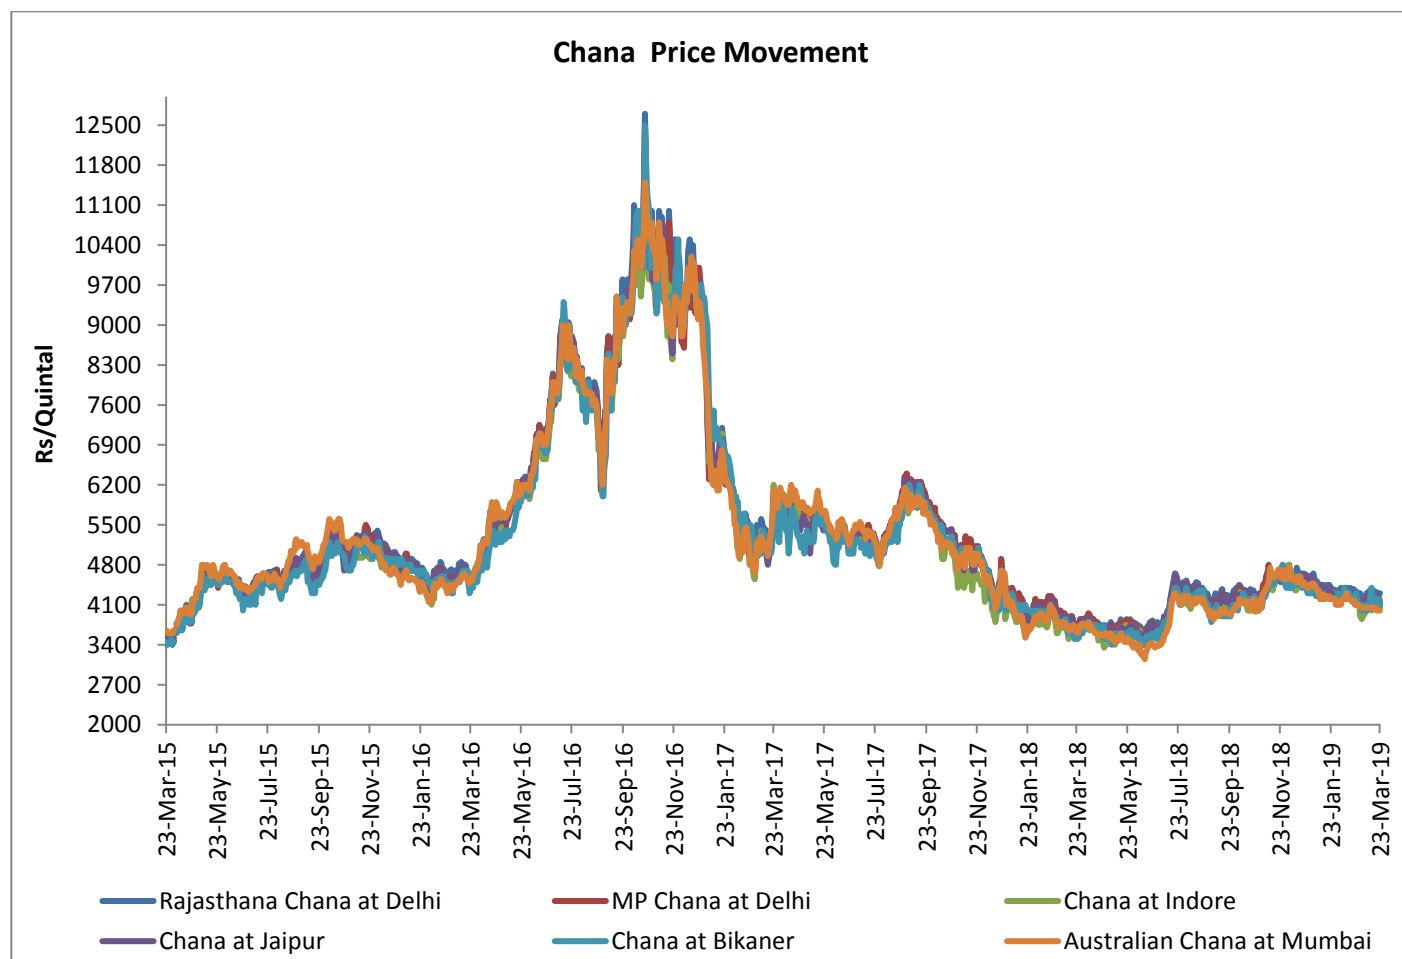

Pulses-Wise Scenario:

Chana

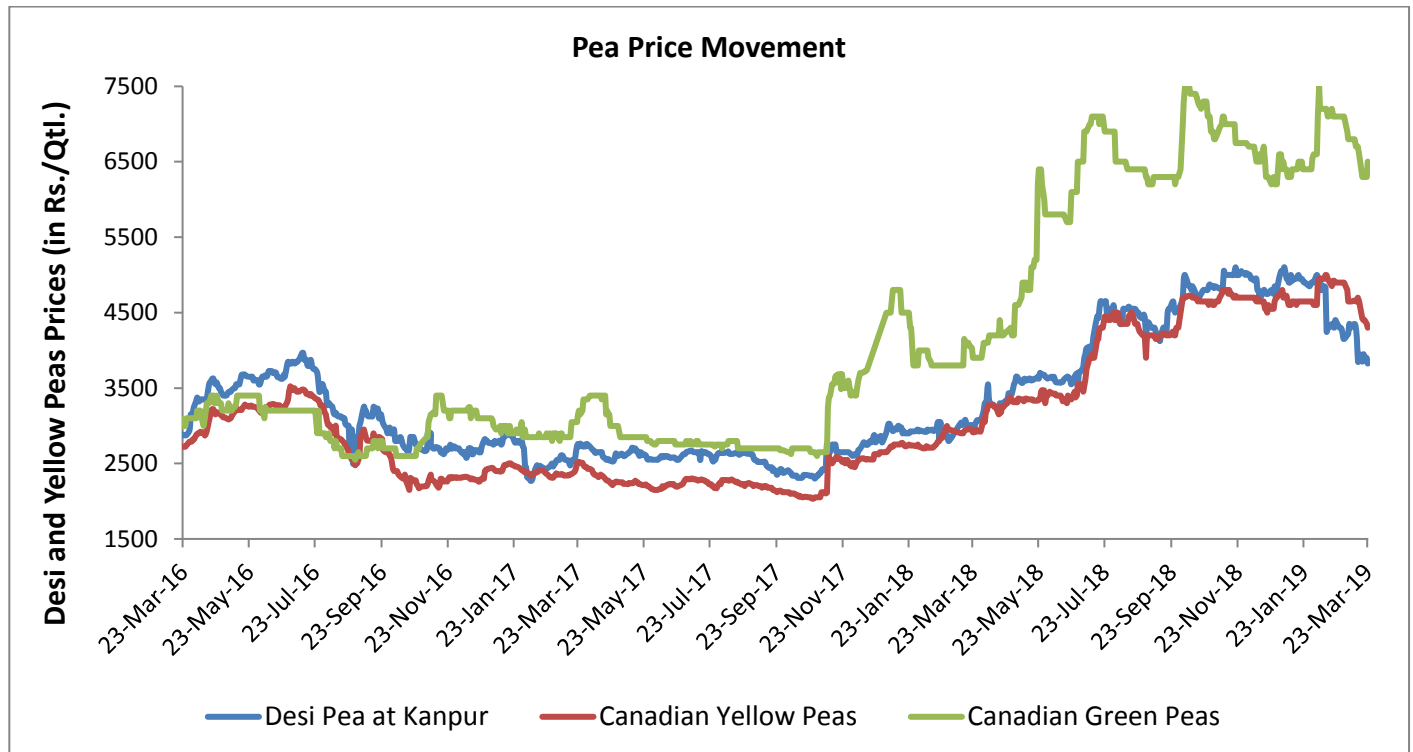

Current Scenario:

Chana in cash market is being traded lower by Rs500-600 per qtl. from MSP. New arrival in states like MP and Rajasthan has started increasing. New chana in MP is being sold at Rs4000-4050 against set MSP of Rs4650. As production is expected to decrease this year to 88/90 lakh tonne, as per trade estimate, procurement target by govt. too has been decreased this year. If state procurement agencies procure higher than expected quantity, price of chana may recover. However, under prevailing market condition amid weak demand Agriwatch expects chana to move down by Rs 100-150 from current level. Stake holders should buy below Rs3800/3900 and hold it. Recovery is expected May onward.

All India average price for Chana traded down by 1.30 to Rs 4173. Australian chana price traded unchanged at Rs 4000 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week.

Peas (Matar):
Market Recap:

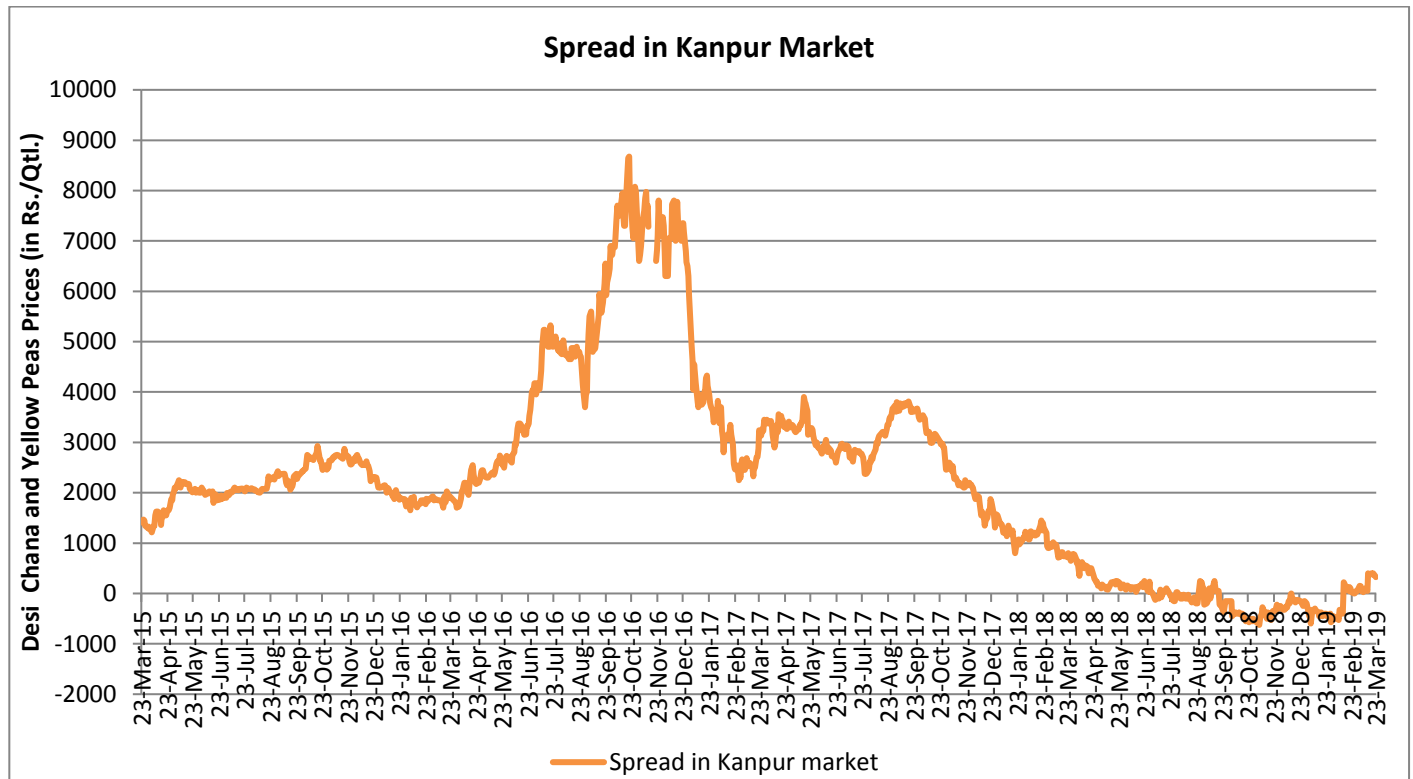

Pea market traded weak as expected last week and pressure would continue on cash market due to poor offtake and new arrivals. It would ease supply in domestic market. Pea in Mumbai market is being traded at Rs. 4650, while in Kanpur market it is being traded at Rs 3950 per qtl. As chana price is decreasing and new crop is at hand, any firm momentum in pea market is unlikely this week too. New crop in local market too has started hitting mandis now. Govt has already extended import restriction from Dec to March 2019 and it may help market to sustain around current level. Besides, pea in green form is available in local market and it is available at Rs10-15 per kg. Overall sentiment remains weak. Area under pea is almost 11.36% higher this year at 10.45 lakh ha. Overall tone remains weak in the near term. Selling on higher level seems good on rise. Govt policy for next quarter too would be price driving factors. If import limit is increased, it would ease availability.

Current Market Dynamics & Outlook:

Pea traded at Rs3800-3900 in Kanpur market, almost Rs100 down from previous week due to weak demand and lower price for chana despite decreasing stock at port and import restriction. Market has already taken account of impact of extension of import ban till March-2019 amid lower stock at port. Consumption of pea in besan is weak as chana is available at cheaper price. In short term, demand is expected to remain weak due to higher availability of green vegetable and weak chana market. New crop has already commenced. The govt may increase import limit to 2 lakh tonne from April-2019. The move is said to be under consideration.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has started moving in positive zone due to decreased pea price in Kanpur market. Spread is expected to remain in the positive zone of 300-500 in April on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

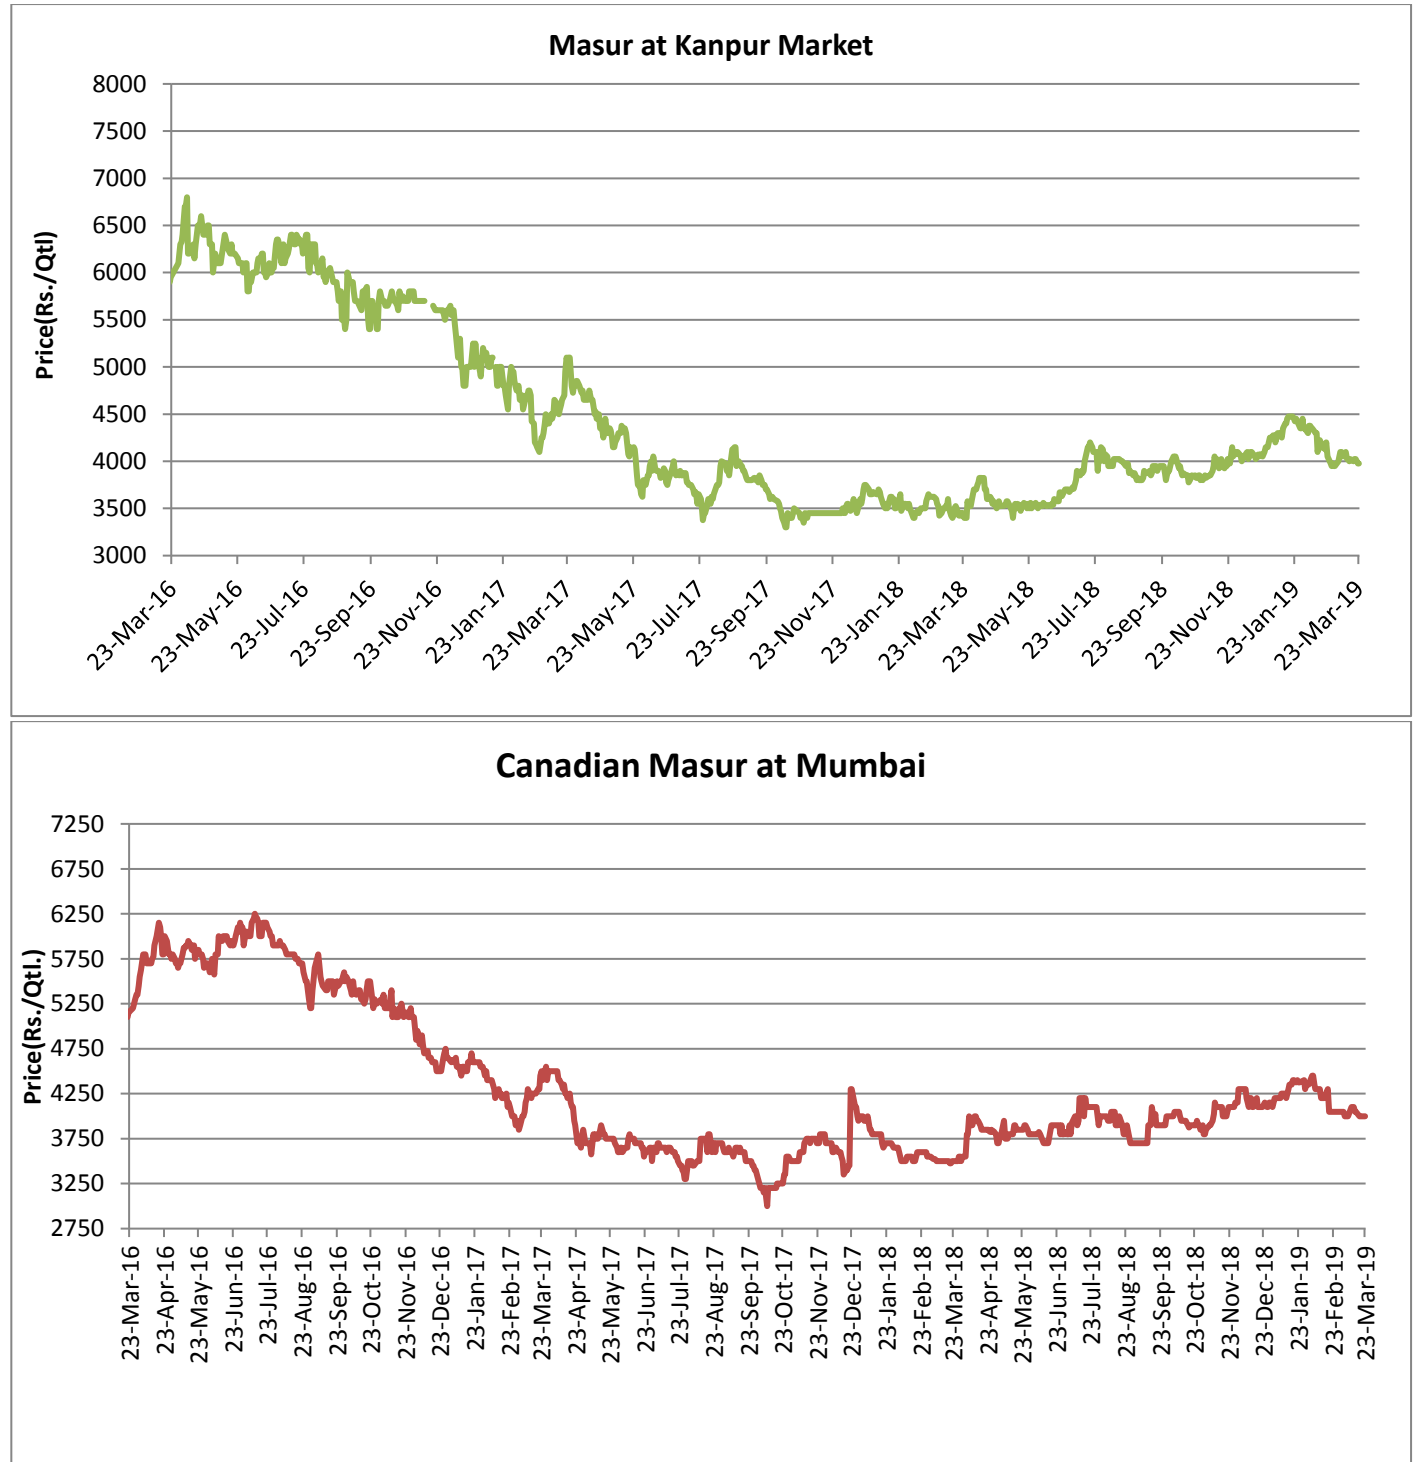

Lentils (Masoor):

Market Recap:

New crop started arriving at mandis of MP and Uttar Pradesh .it is expected from Bihar now. However,delayed harvesting has capped downward trend. Demand from Kolcatta and Nepal is weak and it remains un-supportive to cash lentil market.. Weather for next 10 days remains very crucial for lentil market. If the weather turns rough and hail storm occurs again, some cap on decreasing trend, might be seen. Procurement drive may help market to recover slightly this week. Cash market may improve from here. However,demand is weak. Cash market may trade in the range of Rs3800-4100 this week.

Current Scenario:

In the 3rd week of March-2019, average price in key market like Kanpur was down by 0.86 % to Rs 4000 per qtl. Prices are likely to trade range bound in April to a certain extent. So any unexpected spike is unlikely at current level. Masur may trade in the range of Rs 3800- 4100 in the near term.

Market Outlook: Prices are likely to notice weak movement due to procurement drive and lower arrival

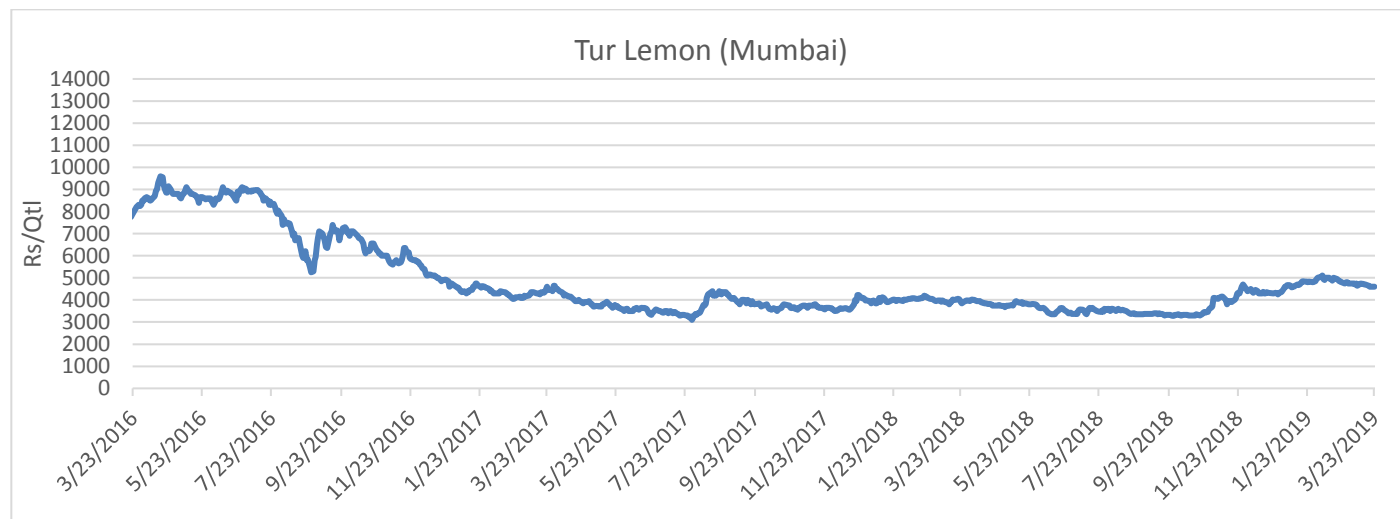

Pigeon Pea (Tur/Toor):

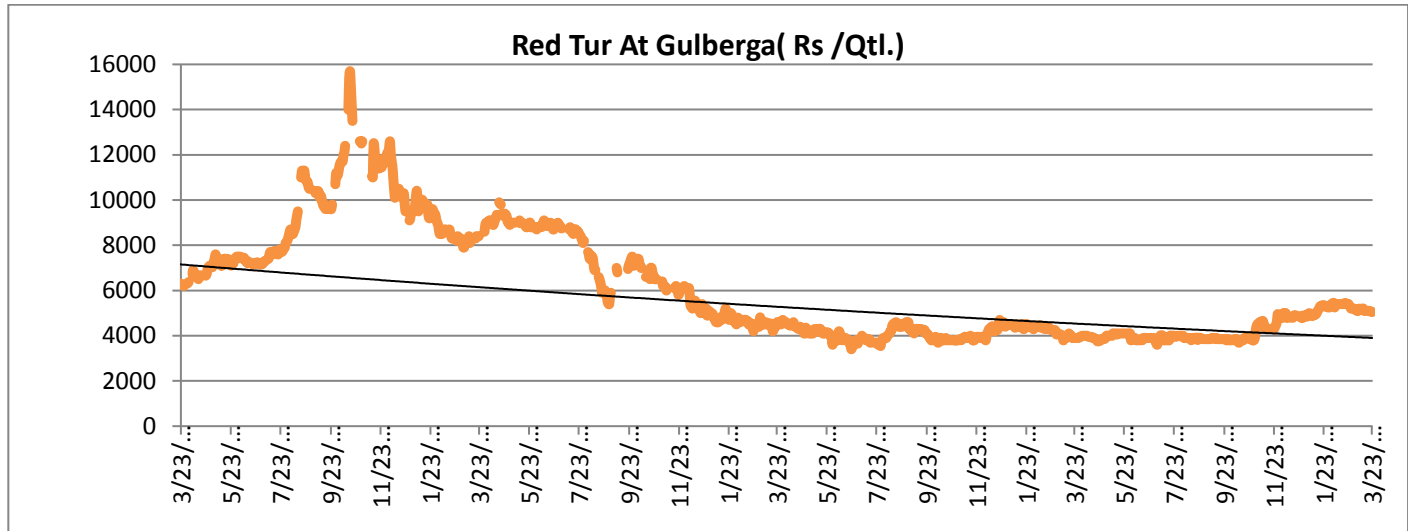

Market Recap:

Tur traded weak with increasing arrivals in major markets amid slower pace of procurement by various agencies. Total procurement by Nafed, has reached 1.44 lakh tonne. Arrival pressure is likely to continue amid restricted buying by private trades. There is a common view in the market that tur price may go down by Rs100-150 more from current level as bulk users demand remains sluggish at this point of time. However, any major spike is unlikely as crop size is lower this year. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 4900-5100 in Gulberga market. This week it may trade slightly lower. Myanmar is offering tur at \$600 per MT. Total procurement from kharif-2018 has reached 181112.60MT as on 13th March-2019. Overall tone remains weak

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak due to poor demand and increasing arrival in major markets. Buying by private trade remains restricted. However, medium term outlook remains firm due to import ban till March-2019 and lower crop size (36.21 lakh tonne). Stake holders should buy on correction.

Market Outlook: Tur market may dip by Rs100-150 more with increasing arrivals.

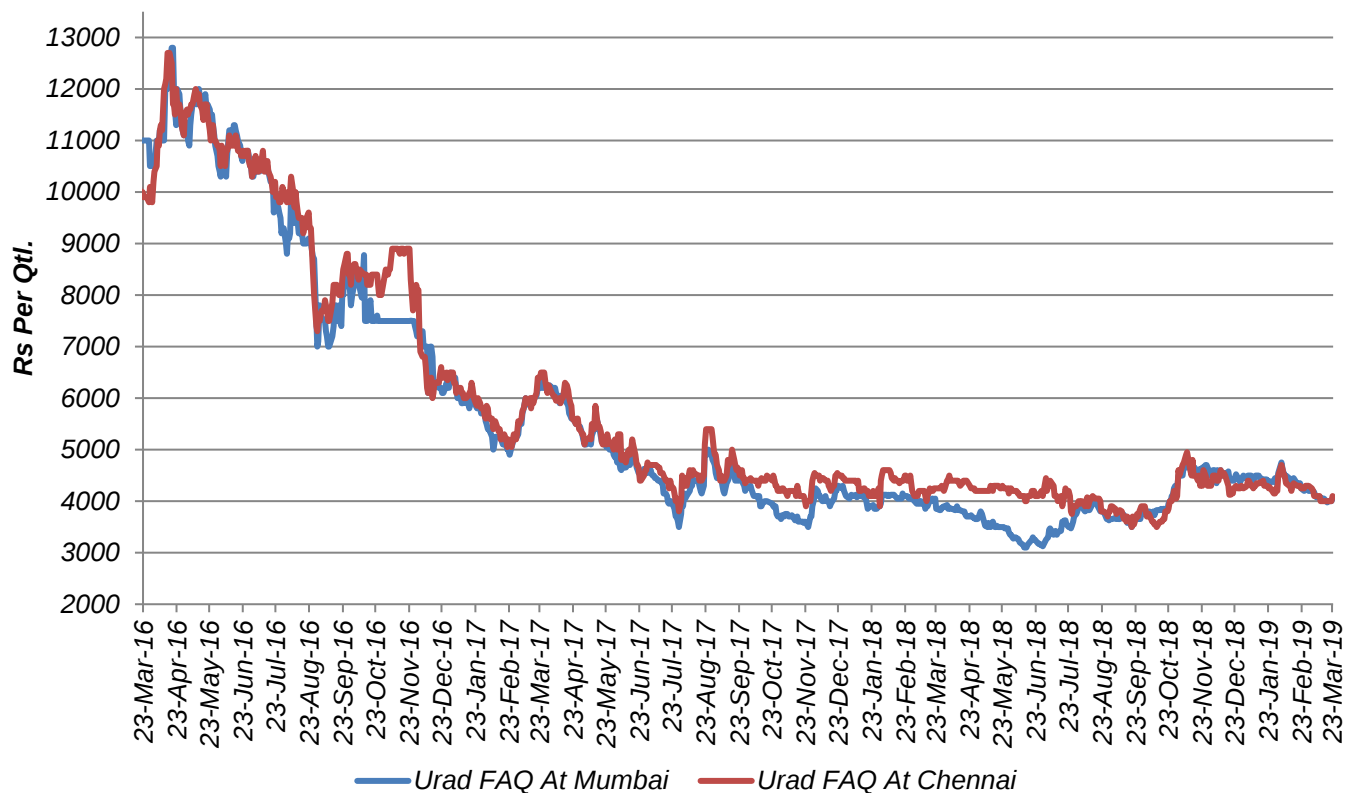

Black Matpe (Urad):

Urad market traded almost steady during the month under review. Slackened demand from mills and higher production adv estimate amid higher carryout have capped market at current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Despite lower crop size from kharif, carryout is at higher side and it may restrict uptrend in coming weeks. With opening of weather, demand is likely to improve. With ongoing procurement drive, any major decline is unlikely. Urad may continue to trade at Rs4000-4400 per qtl in various markets. In Chennai market urad is being traded at Rs4000-4150 per qtl. Burma is offering FAQ urad at \$470 & SQ at \$580 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market in March too. Buying at dip seems good. Burma is offering FAQ urad at \$465 & SQ at \$575 per tonne. Imported stock too is capping market to get firmer. Steady tone may prevail in urad cash market.

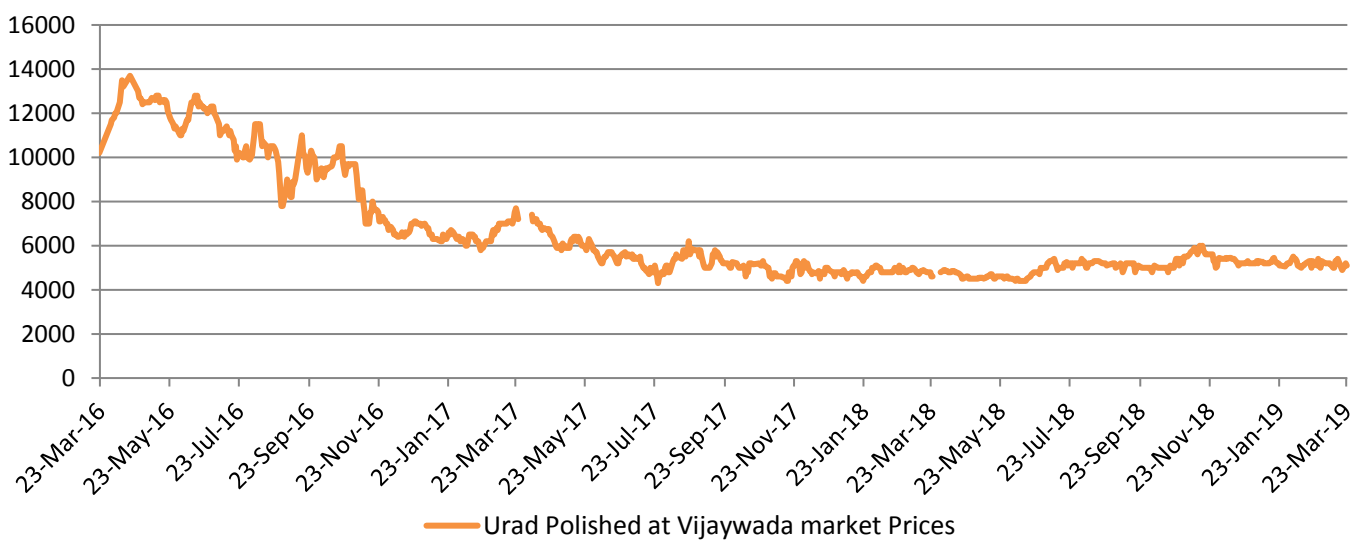

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4000-4100per Qtl.) and Chennai (Rs.4050-4150 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase from mid March. The following graph shows the prices movement in different markets:-

URAD FAQ

Urad Polished at Vijaywada

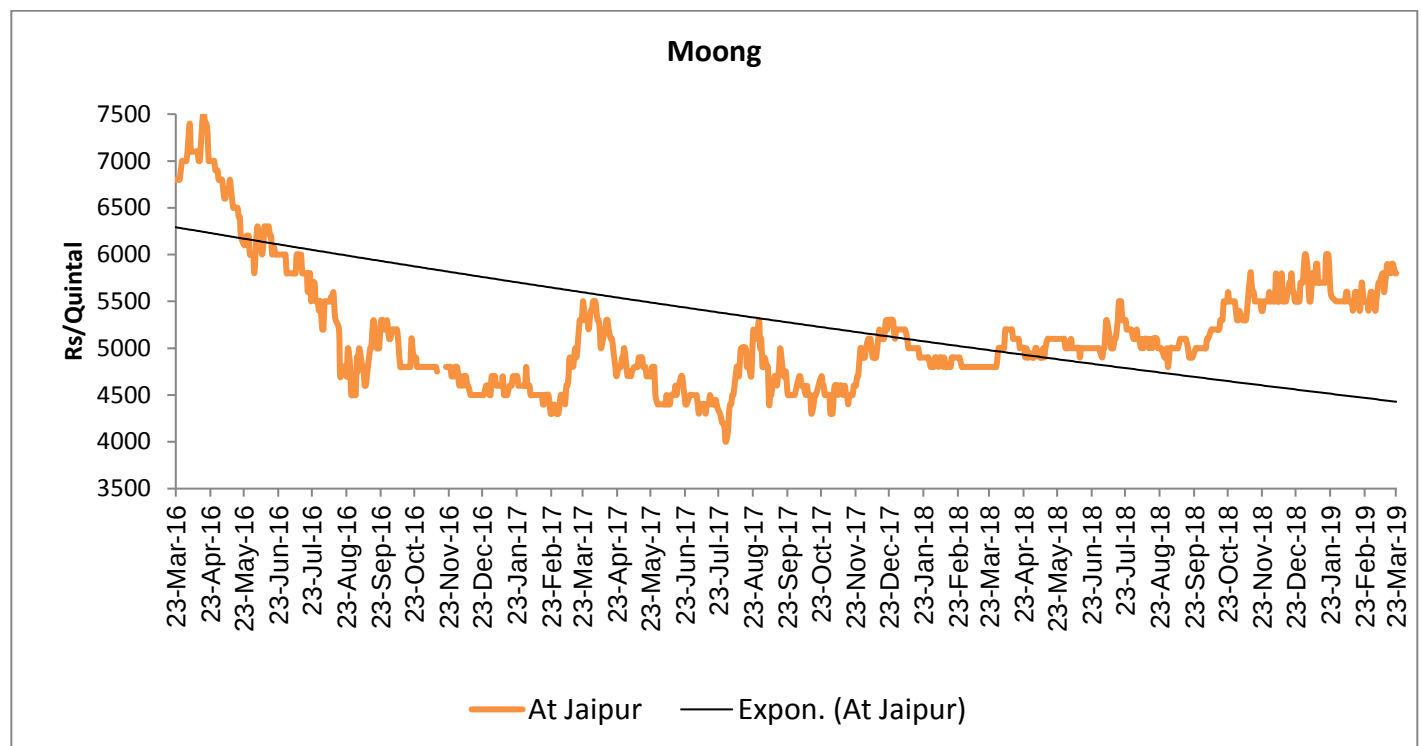

Market Outlook: *Urad Prices are likely to show range bound momentum this week*

Green Gram (Moong):

Market Recap:

Demand for moong dal from cash market, remains affected. Bulk buyers are unwilling to buy at higher level and fulfilling their immediate requirements. Supply side in domestic market is at ease against weak demand. So, any major jump is unlikely in moong market despite restricted supply from Rajasthan, Gujarat and MP line. Moong is being traded at Rs 5400-5500 in Jaipur market. It may dip by Rs100 more from current level. New crop from UP and Bihar is expected from March end. So steady to slightly weak tone may prevail this week too. Moong would continue to trade in the range of Rs5400 to Rs5800 in Jaipur market. Myanmar is offering moong at \$680 per MT.

Market Outlook: *Moong prices are likely to trade range bound in the near term.*

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in April.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4000 to 4350 levels in this week..

Strategy: Sell on rise

Trade Recommendations: Go short around 4250 with the first target of 4150 and second target 4050 with stop loss at 4300 level.

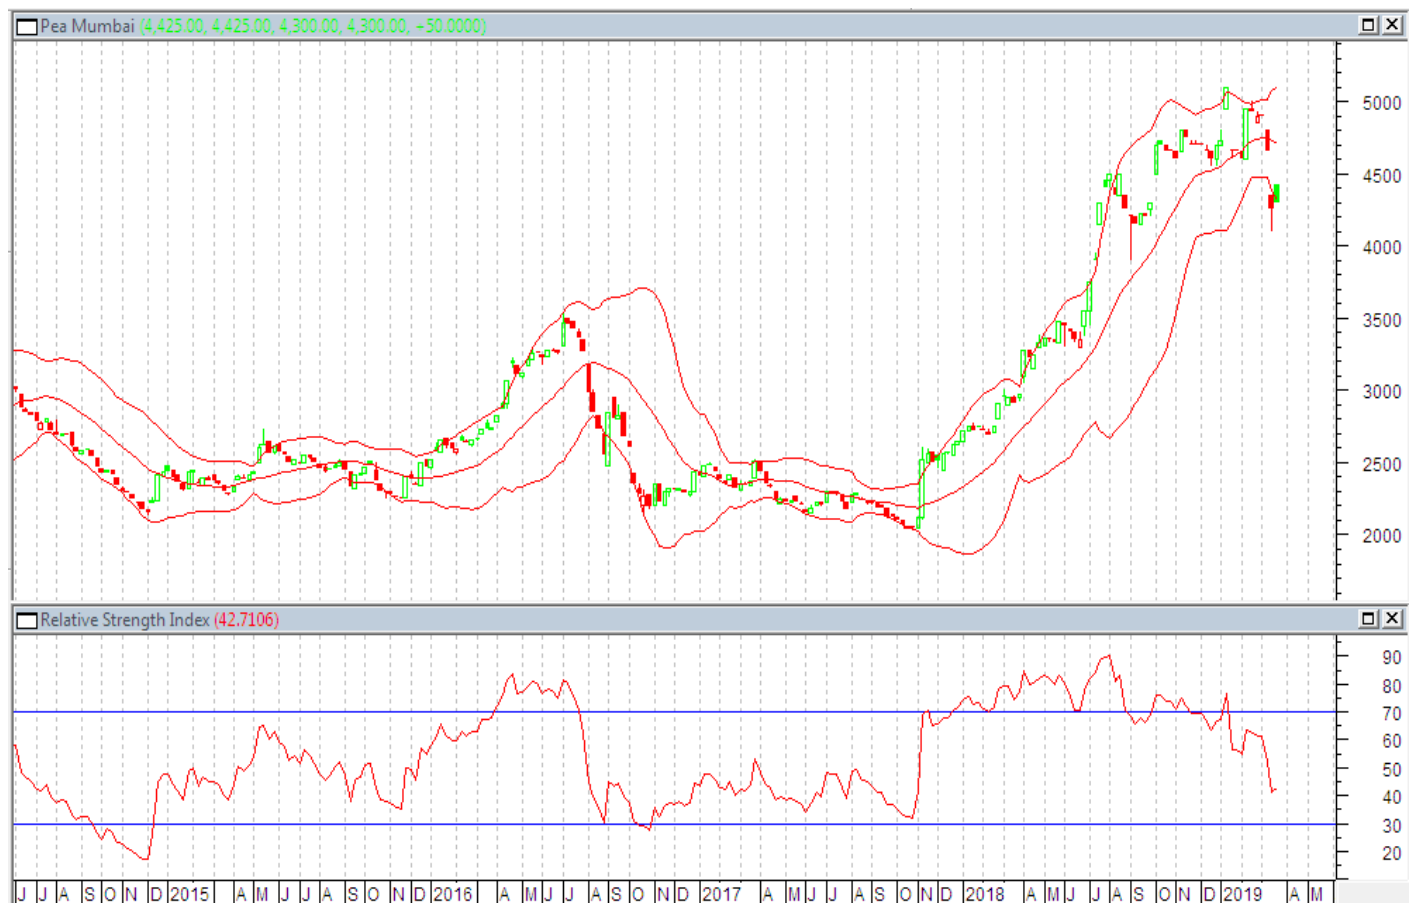

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4050	4150	4350	4450

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana,. Weak demand despite decreasing stock at ports may cap uptrend.

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4000-4400 in this week

Strategy: Sell on rise

Trade Recommendations: Go short around 4400 with the first target of 4250 and second target 4200 with stop loss at 4500 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4300	4550	4650

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 3850-4100

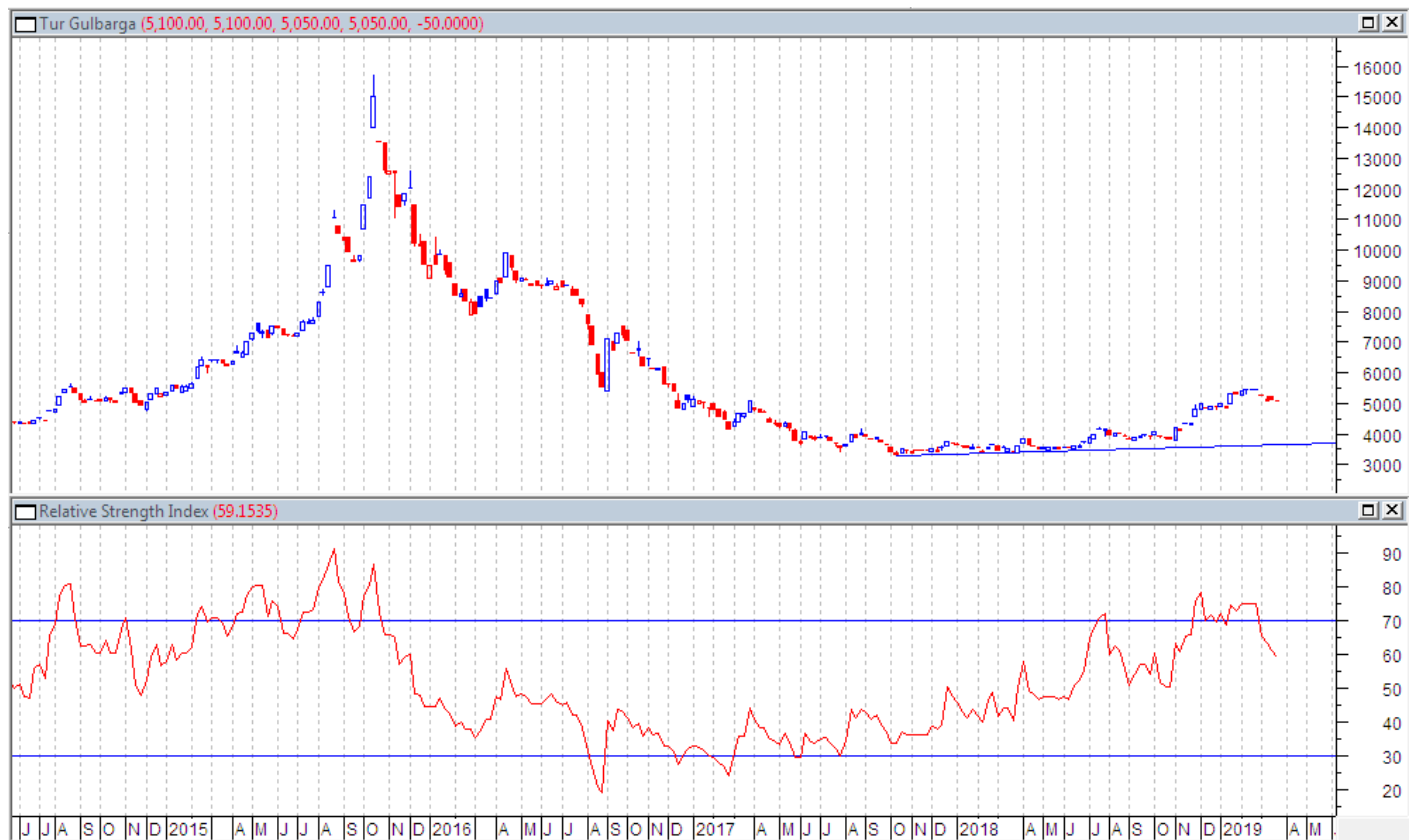

Strategy Sell on rise

Trade Recommendations: Sell around 4050 with the first target of 3900 and second target 3850 with stop loss at 4150 level.
