Commodity-wise Domestic, International Prices and Arrivals at Different Centers

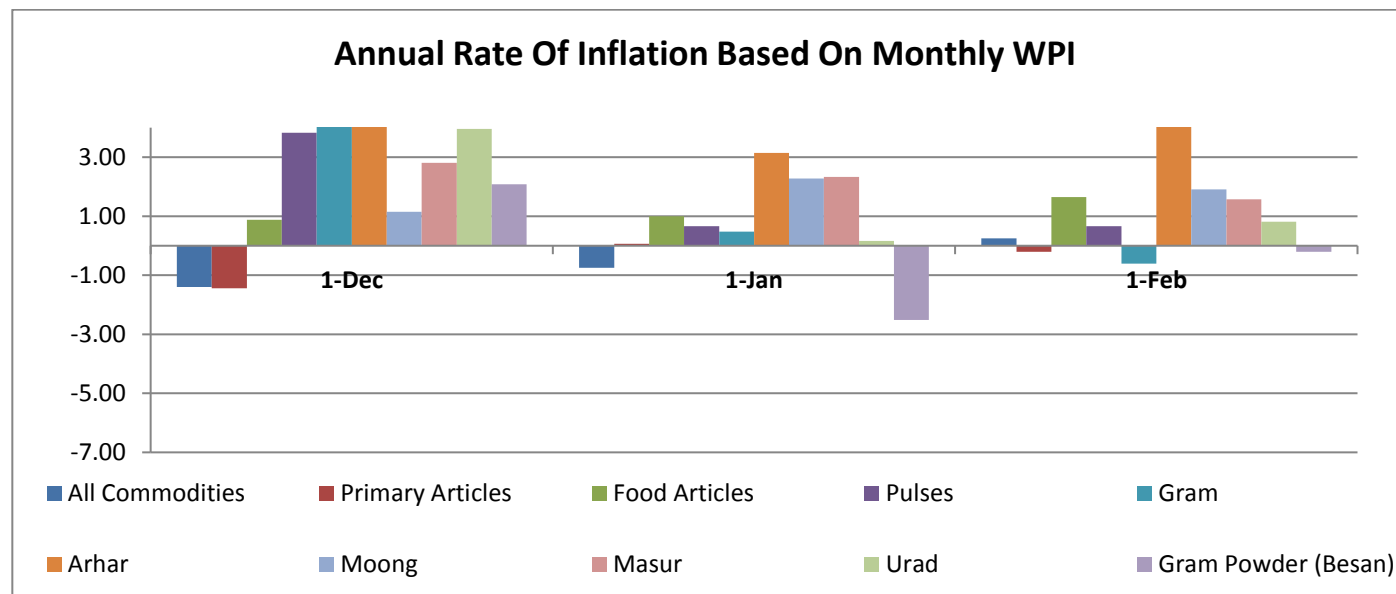

Highlights-Domestic Market:

- **Directorate general of foreign trade have notified quota restriction on pulses import and it will continue.** The quota of import for new financial year for moong has been set at 1.5 lakh MT, for urad at 1.5 lakh MT for tur at 2.0 lakh MT and for pea at 1.5 lakh MT. It means import of pulses would remain restricted. The new notification would help cash pulses market to recover smartly. The reaction on price in cash market is visible now and all market moved up by Rs 200 to 350 per qtl in last two days starting from Saturday. It would move up further by Rs 200 to Rs 350 more from current level. With this notification cash market is likely to trade up. Lower import volume would lend support to cash market now.
- **Tur buying by mills in cash market increased by Rs 100-150 to Rs 5050-5100 in Gulberga market.** However, liquidity crunch is not allowing bulk buyers to buy in bulk quantity. As crop size is lower this year, prices are expected to move up once again with restriction of yearly import quota of 2 lakh MT. Even old stock in central pool is said to be around 4 lakh tonne. So, supply side might be tight in the second half of the year. Private traders have started holding stock for better price and it would push tur price to the level of MSP at Rs 5675 soon. Fear of increasing chances of El-Nino too has started impacting market sentiments. Lower rainfall may affect tur sowing. So overall outlook for tur market remains firm. New arrival from UP is expected from April end. So, one downward correction of Rs 100-200 is expected at the time of arrival.
- **Firmness in urad cash market is likely to sustain as import quota has been fixed at 1.5 lakh tonne** for the whole year. However, uptrend might be capped as Nafed has decided to sell its stock from 1st April-2019. Market was expecting higher import quota at around 2 lakh tonne, but it has been kept at previous level of 1.5 lakh tonne for the whole year. So, market is expected to improve by Rs 250 to 400 from current level. Around 35,000 MT urad is likely to be released this week lying at various ports at 10% bank guarantee. Demand is likely to improve in coming weeks. Due to higher carryover for this year, any major jump is unlikely. If kharif sowing gets affected this season, we can expect market to move up towards MSP level in the second half. Crop in Myanmar too is lower this year, so, import in bulk quantity too is not possible. So, short to medium term outlook seems firm. In Mumbai market urad is being traded at Rs 4300-4350 while in Chennai market it is being traded at Rs 4350-4400. So stakeholders should buy on dip. Right now millers buying remain restricted at this point of time.
- **New crop of moong from UP and Bihar is expected to hit market by end April/May. So, cash moong market may move further up by Rs 200-300** as old stock is decreasing and demand from mills have improved. Besides, import too is not possible as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, Nafed would start selling moong from 1st April and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop. Restricted import at 1.5 lakh tonne too would remain supportive for cash moong market.
- **New MY season for moong starts in Oct from Rajasthan and Maharashtra. This year poor crop size (40% lower)** could not help market to touch MSP as Nafed continued to sell crop at lower price. In Jaipur market moong traded higher at Rs 6000 in March. It may move up to Rs 6400 in April. Right now demand for moong in central and north India is being fulfilled by Shekhavati-Jodhpur line. Supply from these lines may be affected as stock is decreasing now. Right now moong taken through tender is being traded at Rs 5400-5600. Moong of Jodhpur line is being traded at Rs 5800. With increasing temperature demand for moong dal would increase and it may support price in coming weeks. Overall tone remains firm.
- **Chana cash market is likely to trade up with procurement drive and improvement in demand.** Procurement starts in MP, Rajasthan, Telangana, Gujarat and Maharashtra. The highest procurement (around 35000 MT) has been registered in Telangana. Besides, Maharashtra govt has instructed APMC market to ensure trade at MSP in mandis. With increasing temperature demand for sattu is likely to increase. It would help cash market to recover. Chana is being traded at Rs 4200-4300 in Bikaner market. It may move towards MSP level. In Delhi market chana is being traded at Rs 4350-4400 per qtl. Overall trend in chana market remains firm. Firmness in other pulses too remains supportive for chana market.
- **Peas market has become firm in past days due to import restriction imposed by government. This restriction will allow an import of 1.5 LMT of peas (Yellow peas, Green peas, kasper peas and Dun peas) during 01st April 2019 to 31st March 2020.** Desi peas at Kanpur has increased from Rs 4150 per quintal to Rs 4525 per quintal.

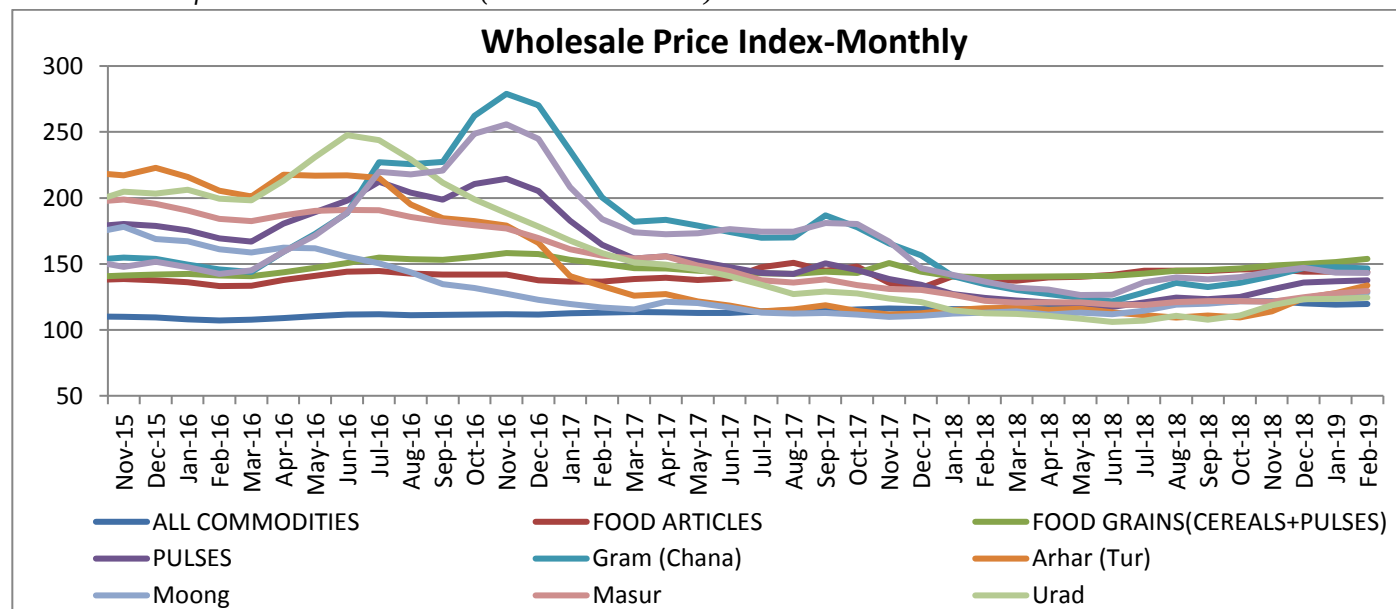

International Market:

- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** against 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT** in 2019-20 against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.
- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced** in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, chickpea production increased by 86%, while small chickpeas increased by 66%

- Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 0.9 point from 136.7 in Jan to 137.6 in Feb-2019

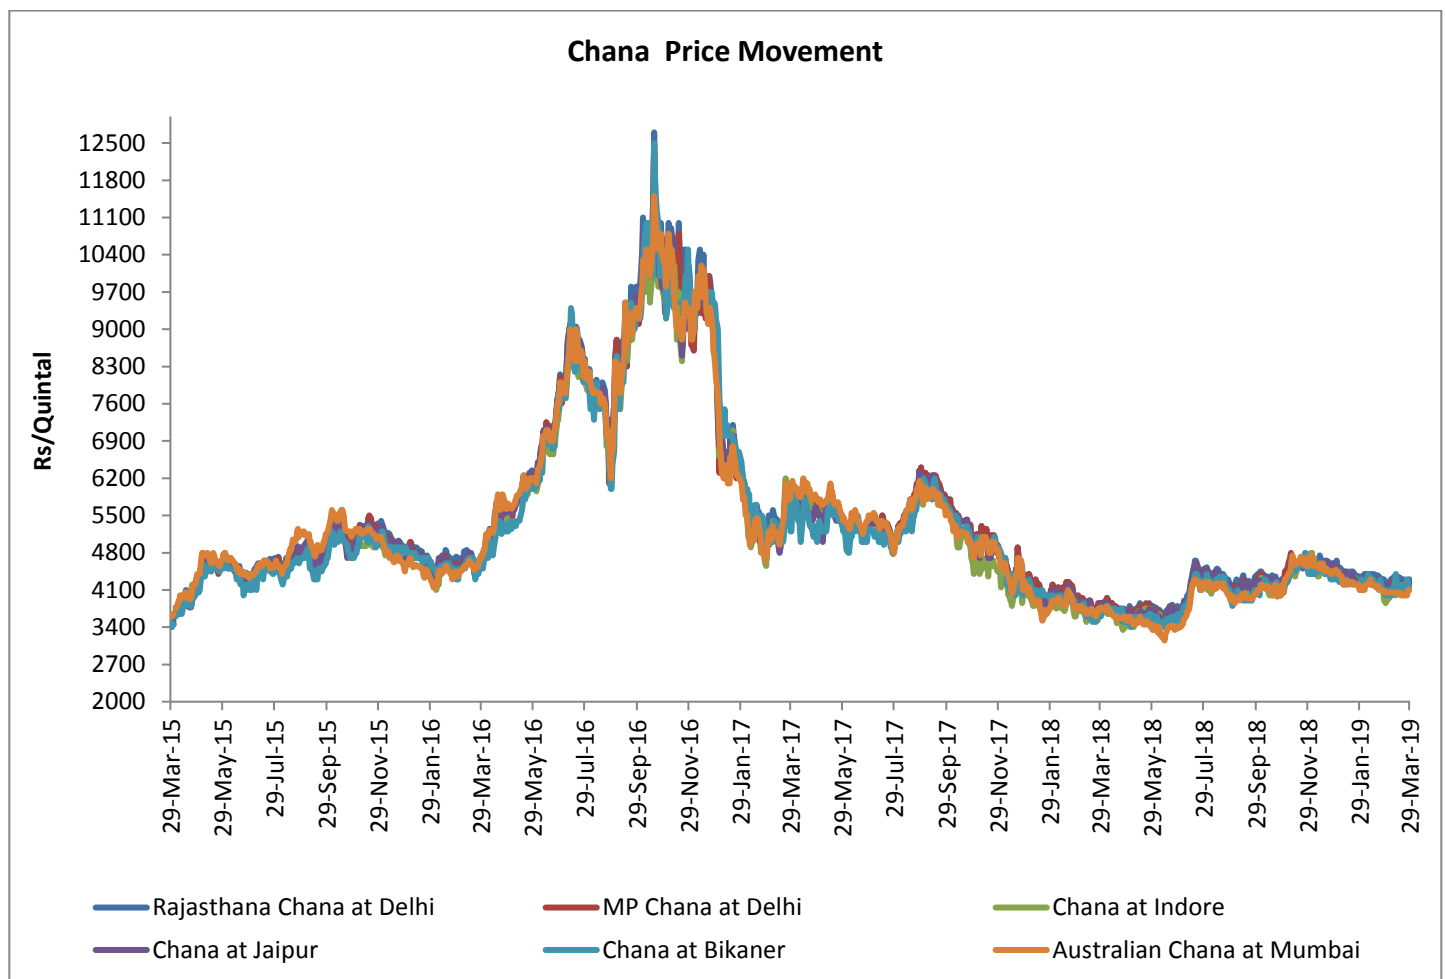

Pulses-Wise Scenario:

Chana

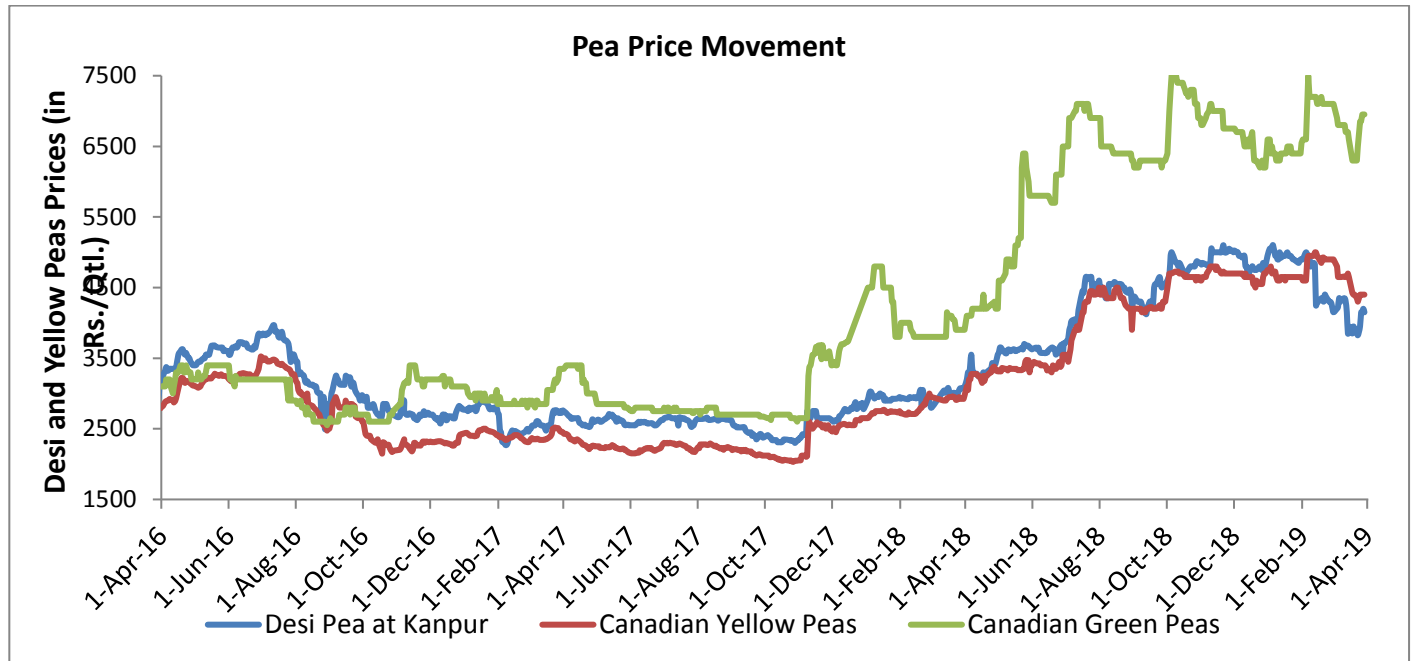

Current Scenario:

Import quota restriction on other pulses at 6.5 lakh MT through private channels, buyers renewed buying interest and lower crop size have helped chana cash market to improve during the week under review. Restricted pea import at 1.5 lakh tonne for the whole year would help higher demand for chana from besan industry. At higher import duty there is no parity right now. So, support at current level is likely to continue. Chana may touch MSP and may stabilize at that level. Improvement in other pulses too help market to move up.

All India average price for Chana traded up by 0.30 to Rs 4186. Australian chana price too traded up by 0.33% at Rs 4060 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):
Market Recap:

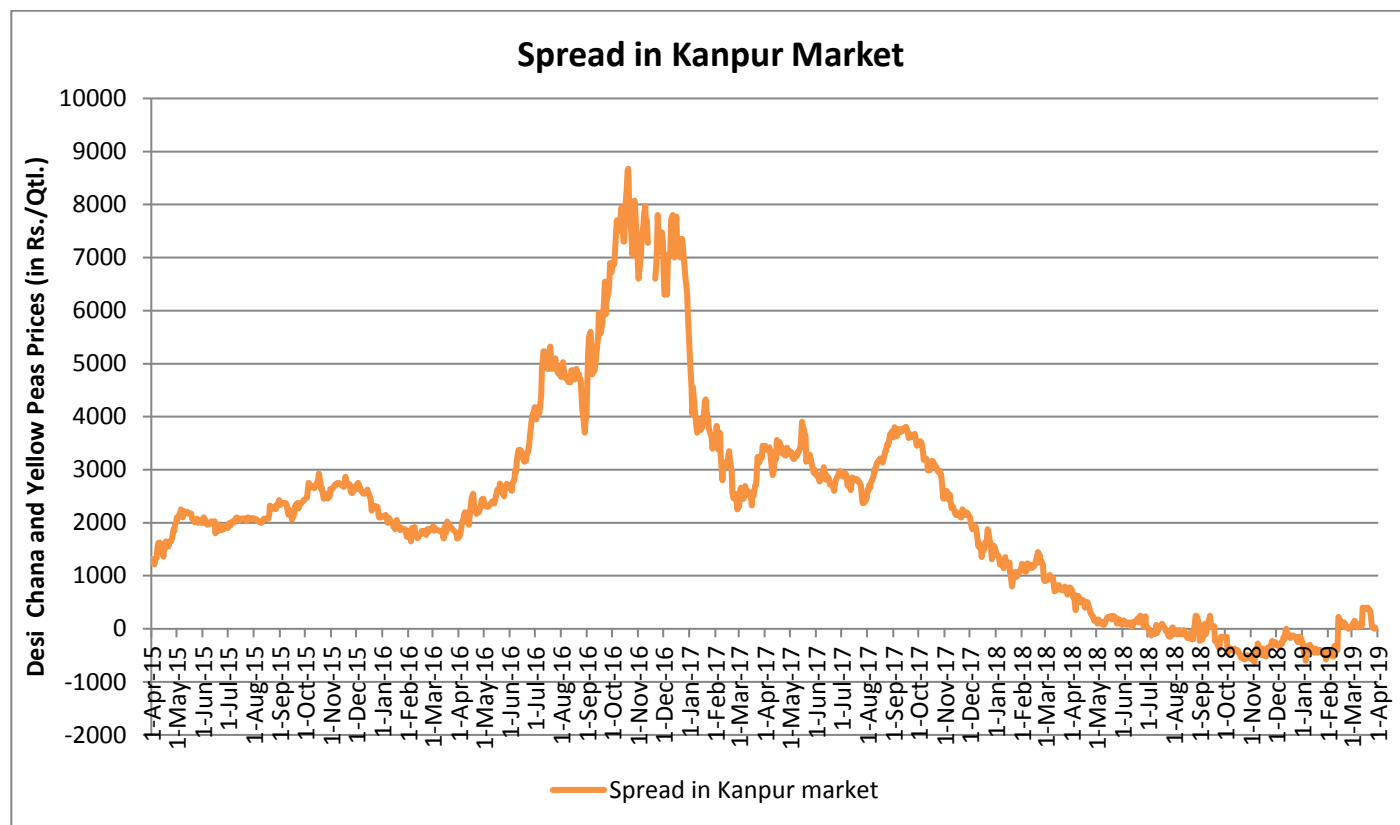

Pea market traded firm as expected and would continue to trade firm on import quota restriction at 1.5 lakh tonne for the whole year. With emerging scenario stockists have started holding stock while farmers too are unwilling to release stock at this point of time. With quota restriction cash market moved up by Rs 250 to 300 in two days. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4400, while in Kanpur market it is being traded at Rs 4150 per qtl. As chana price is has started increasing and pea too may get support at current level.. Arrival pressure from new crop too is decreasing now. DGFT has fixed import quota at 1.5 lakh tonne. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses

Current Market Dynamics & Outlook:

Pea traded at Rs 4100 -4200 in Kanpur market, almost Rs200 up from previous week due to quota restriction and stockists holding. Imported stock is decreasing and it may push pea market up. Now importers would be able to import Only 1.5 lakh tonne till March -2020. So, short supply is visible in coming months. In short to medium term, demand is expected to improve as pulses price would move up from current level.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has started moving in negative zone due to increased pea price in Kanpur market. Spread is expected to remain in the positive zone of 100-200 in April on relative movement in Chana and pea price.

Market Outlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

Market Recap:

New crop started arriving at mandis of MP and Uttar Pradesh .It is expected from Bihar now. However, delayed harvesting has capped downward trend. As prices of other pulses have started improving,lentil too may trade up again.Improvement in demand from Nepal and B,desh may push lentil price up . Procurement drive may help market too this week. Cash market may trade in the range of Rs3950-4250 this week.

Current Scenario:

In the 4th week of March-2019, average price in key market like Kanpur was down by 0.25 % to Rs 4104 per qtl.Prices are likely to trade up in April to a certain extent. Demand from foreign countries is awaited.Masur may get support from firmness in other pulses too in coming weeks.

Masur at Kanpur Market

Canadian Masur at Mumbai

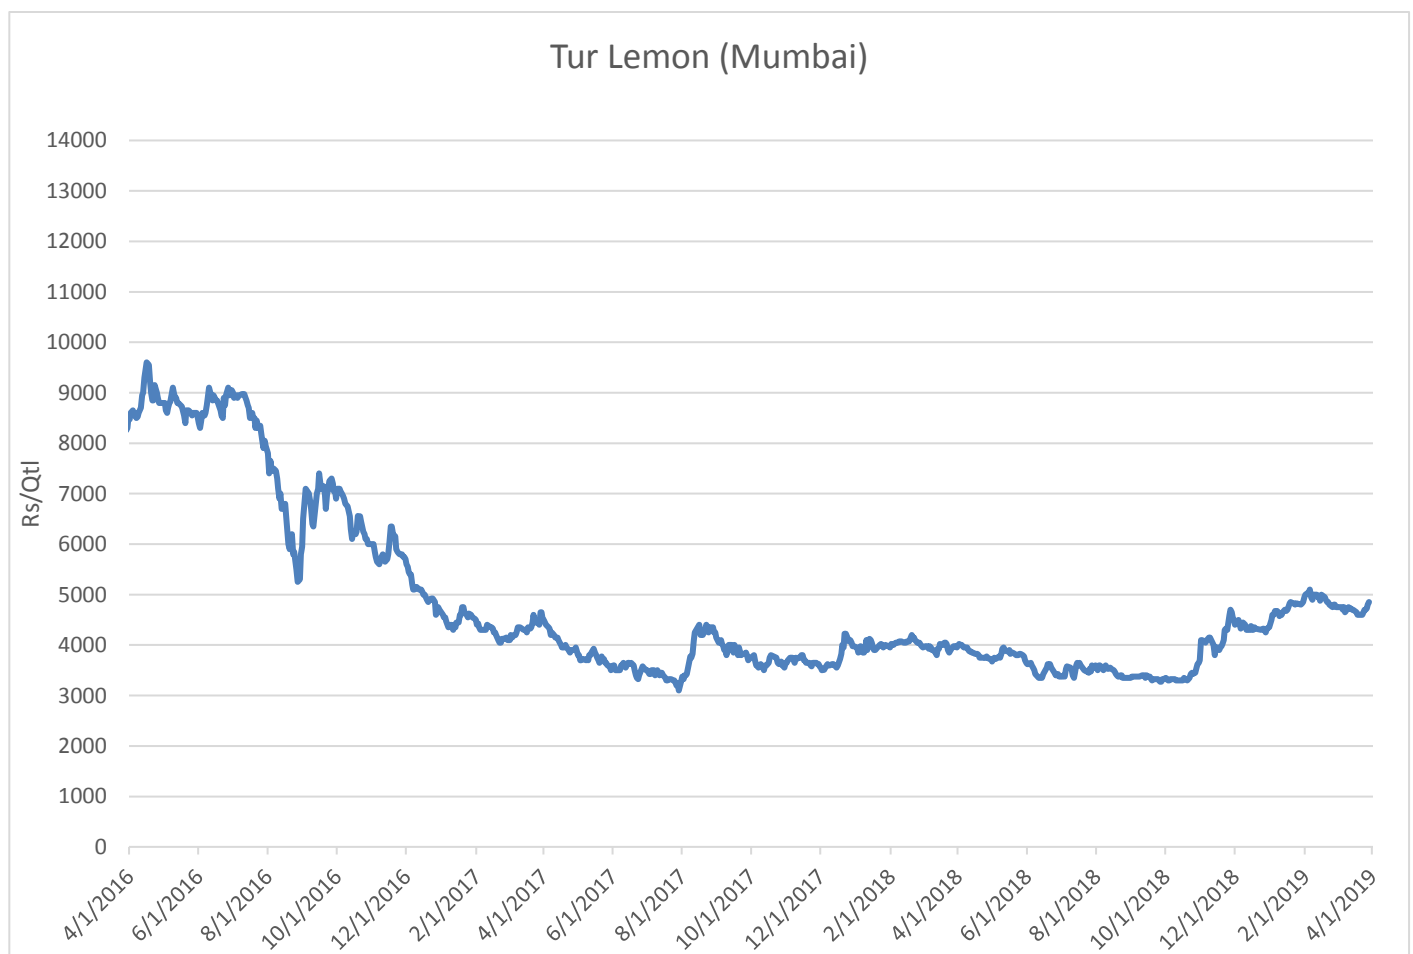

Market Outlook: Prices are likely to notice firm movement due to procurement drive and decreasing arrival

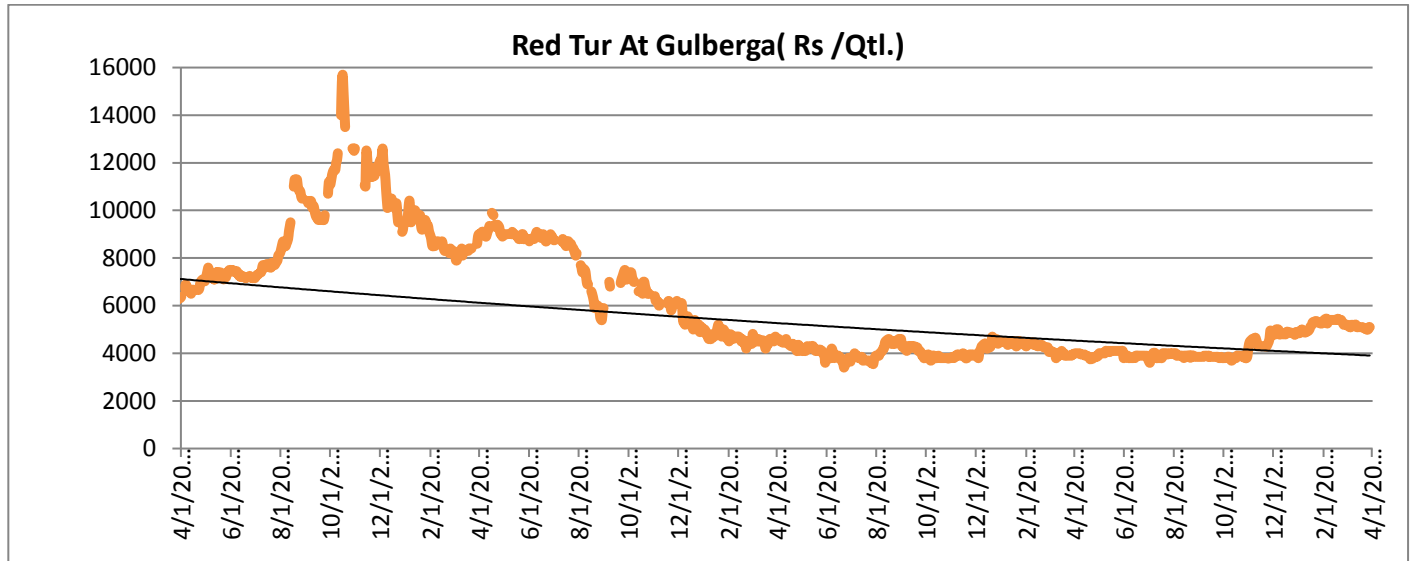

Pigeon Pea (Tur/Toor):
Market Recap:

Tur traded firm with decreasing arrivals in major markets amid ongoing procurement drive by various agencies. Total procurement by Nafed, has reached 2.0 lakh tonne. There is a common view in the market that tur price may go up by Rs100-150 more from current level as bulk users demand has started improving taking clue from firmness in other pulses.. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 4900-5100 in Gulberga market. This week it may trade slightly higher. Myanmar is offering tur at \$600 per MT. Overall tone remains bullish until crop from UP hits the market.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm due to renewed demand and decreasing arrival in major markets. Buying has improved by private trade. Overall outlook for Tur cash market remains firm. Stake holders should buy on correction.

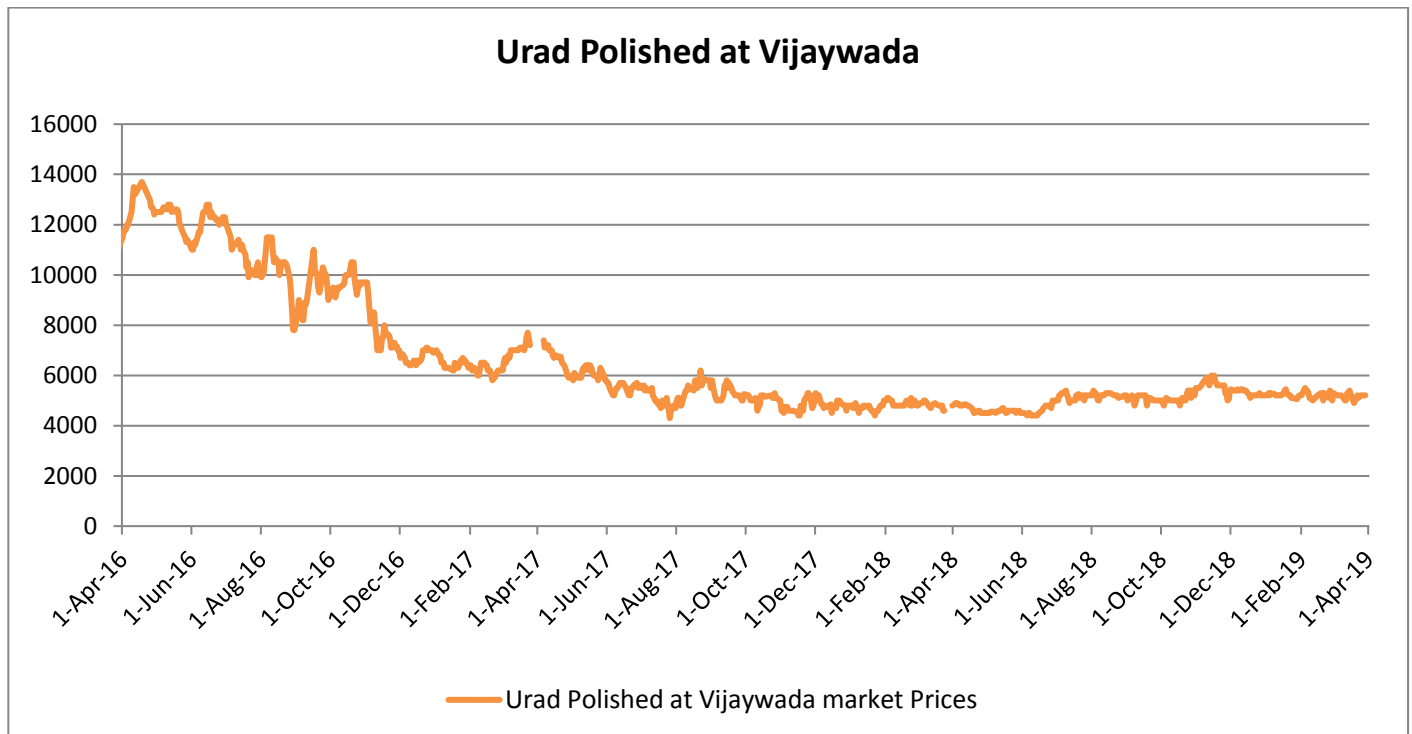

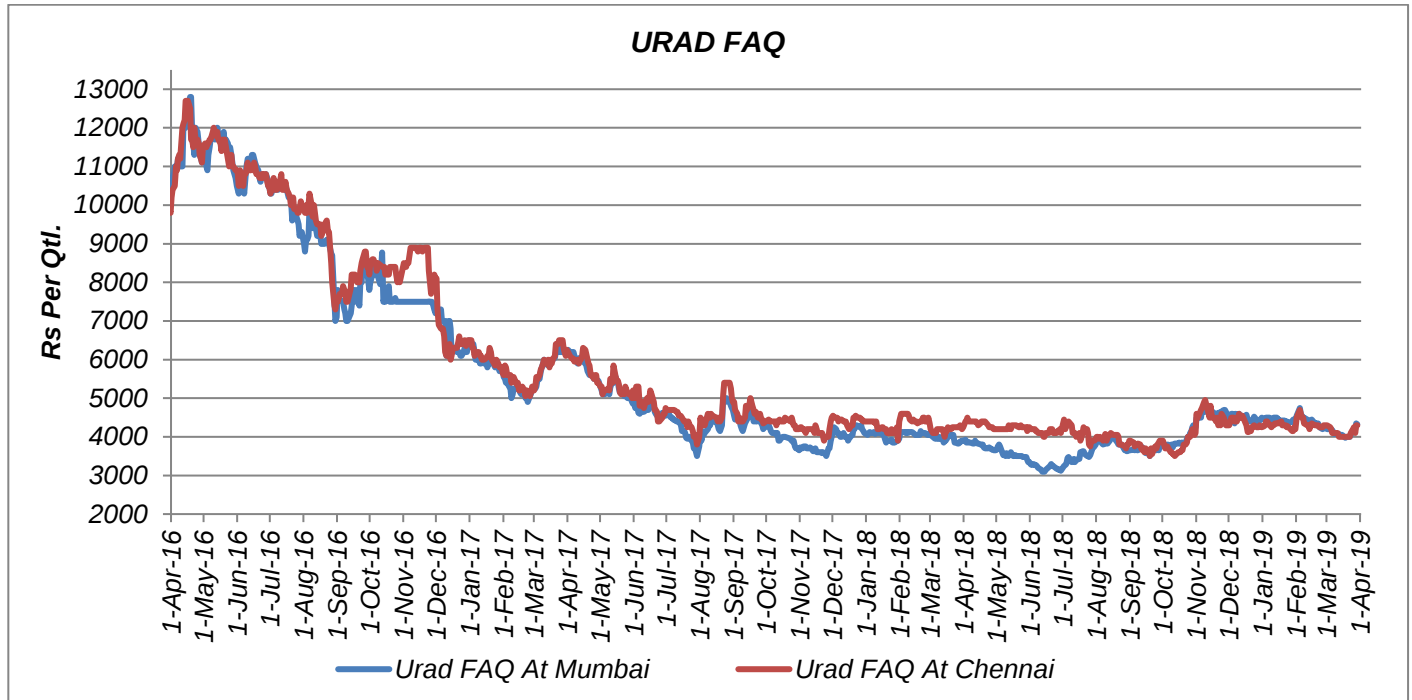

Market Outlook: Tur market may trade firm by Rs150-250 more with decreasing arrivals.

Black Matpe (Urad):

Import restriction at 1.5 lakh tonne, starting from 1st April-2019 and lower crop size may help urad market to recover this week. In short to medium term urad may trade up by Rs250 to 400 in coming weeks. Stockists have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing and it may push urad price further up from current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Urad may continue to trade at Rs4200-4500 per qtl in various markets. In Chennai market urad is being traded at Rs4300-4350 per qtl. Burma is offering FAQ urad at \$460 & SQ at \$570 per tonne. Buying at dip seems good at this point of time.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4300-4350 per Qtl.) and Chennai (Rs.4350-4400 Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase from mid April. The following graph shows the prices movement in different markets:-

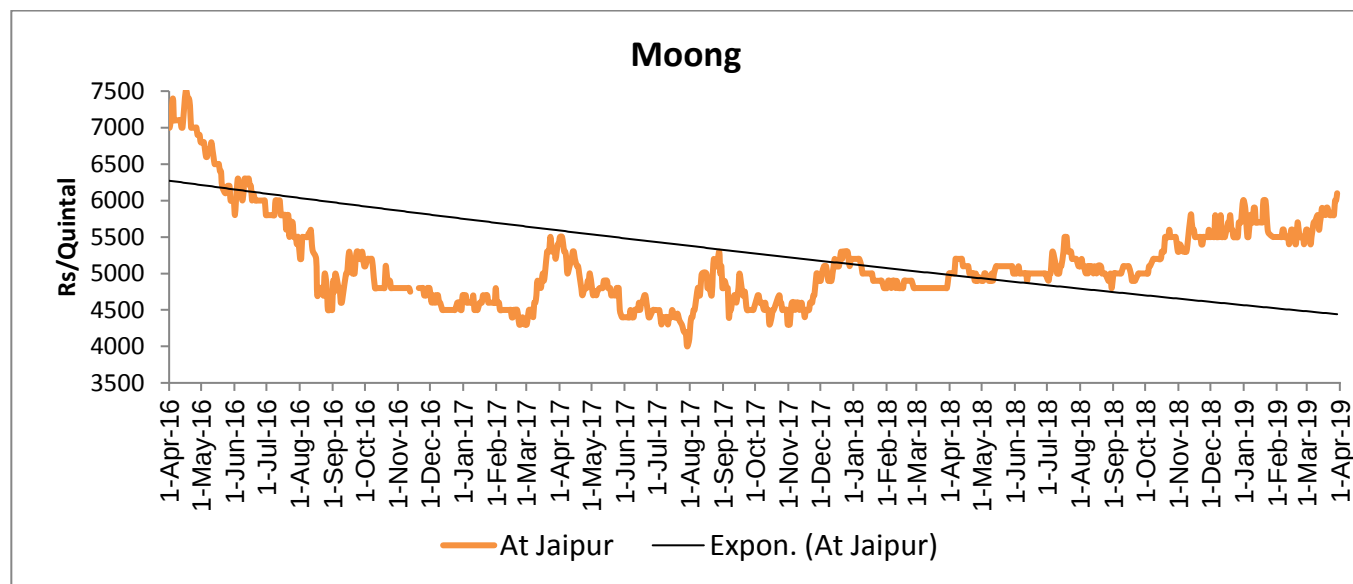

Market Outlook: Urad Prices are likely to show firm momentum this week

Green Gram (Moong):

Market Recap:

New crop of moong from UP and Bihar is expected to hit market by end April/May. So, cash moong market may move further up by Rs200-300 as old stock is decreasing and demand from mills have improved. Besides, import too is not possible as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, Nafed would start selling moong from 1st April and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop.

New MY season for moong starts in Oct from Rajasthan and Maharashtra. This year poor crop size (40% lower) could not help market to touch MSP as Nafed continued to sell crop at lower price. In Jaipur market moong traded higher at Rs 6000 in March. It may move up to Rs 6400 in April. Right now demand for moong in central and north India is being fulfilled by Shekhavati-Jodhpur line. Supply from these lines may be affected as stock is decreasing now. Right now moong taken through tender is being traded at Rs5400-5600. Moong of Jodhpur line is being traded at Rs5800. With increasing temperature demand for moong dal would increase and it may support price in coming weeks. Overall tone remains firm. Continue to trade in the range of Rs5500 to Rs6000 in Jaipur market. Myanmar is offering moong at \$680 per MT.

Market Outlook: Moong prices are likely to trade firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in April.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4250 to 4500 levels in this week..

Strategy: Buy on dip

Trade Recommendations: Go long around 4200 with the first target of 4400 and second target 4450 with stop loss at 4100 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4250	4450	4550

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week.

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week taking clue from firm chana and import ceiling at 1.5 lakh tonne for the while year .Improved demand and decreasing imported stock at ports may push up price in coming weeks.

Technical Analysis:

- Candle stick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4200-4550 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4400 and second target 4500 with stop loss at 4200 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4300	4550	4650

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3950-4350

Strategy: Buy on dip:

Trade Recommendations: Buy around 4100 with the first target of 4250 and second target 4350 with stop loss at 4050 level.
