Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

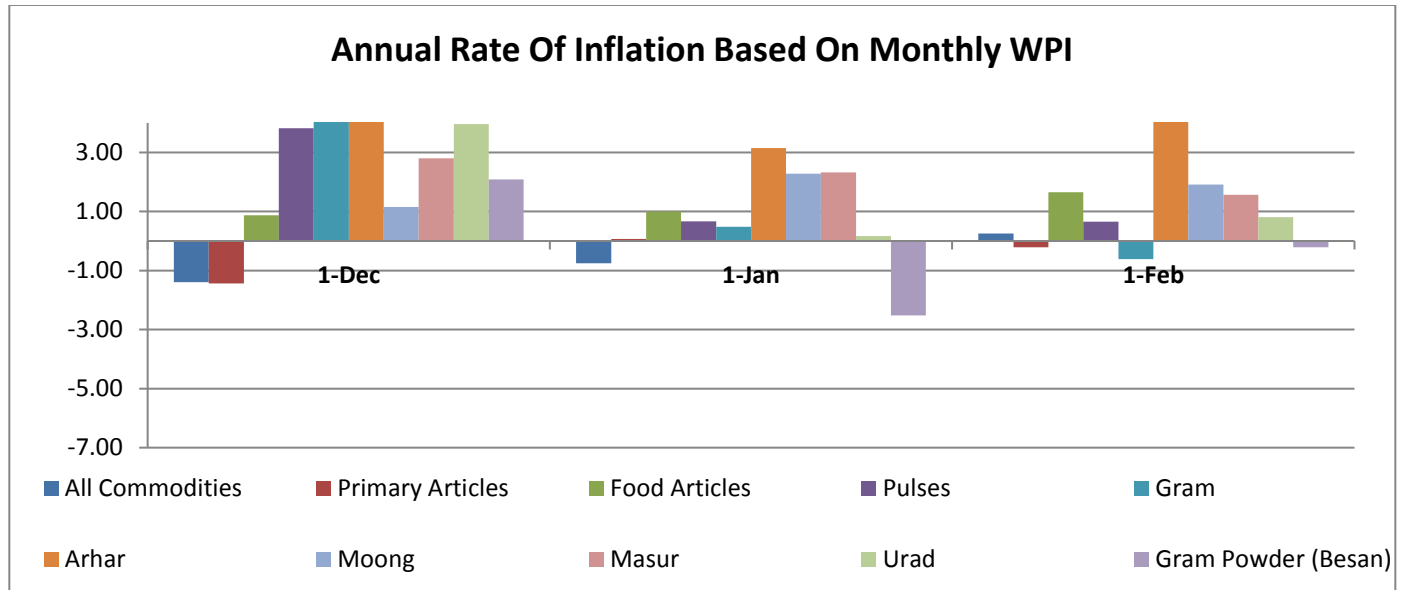

- **Demand of pulses in Indian market has started increasing as millers are active now to** build up one and a half to two months stock. They are aware of the fact that price would move up in coming months due to lower crop size and restricted import. Old stock is coming down while release from central pool stock too have been restricted amid ongoing procurement drive. All these developments may push up pulses prices. Due to longer phase of election, arrival too is expected to be lower than normal flow.
- **In a latest development DGFT has re-set import quantity for the whole year at 6.5 lakh MT, starting from 1st April-2019 to 31st March-2020.** Out of total tur import quantity has been set at 2 lakh MT, Urad and moong 1.5 lakh MT each and 1.5 lakh MT peas including Green and Kaspas. This means there would be minimum import and it would remain supportive for domestic cash market in coming months. However, it does not include import through govt.'s channel.
- **The Madras High Court has upheld the validity of the DGFT order to ban pulses import in the country.** The honorable court has dismissed the writ petitions of importers against the DGFT and held the stand of the latter related to banning of import of pulses. The decision is very crucial and would help pulses market to recover. There is no decision taken on those importers who have cleared its imported stock in last month, specially urad and tur.
- **Active buying by dal millers and comparatively lower arrival at this point of time amid ongoing** procurement drive have helped chana market to recover smartly in April. In Delhi market chana is being traded at Rs 4325 to 4400 per qtl. As demand is expected to increase, prices of chana would trade further up. Procurement on MSP in Rajasthan and MP (major growing states) at Rs 4620 would remain supportive for chana market. Stake holders should buy chana after a slight downward correction and hold it for better realization. In normal condition chana in Delhi market may trade in the range of Rs 4300-4650 by April end. Agriwatch expects market to move up by Rs 200-300 from current level.
- **Restriction on quantity for tur import at 2.0 lakh MT has been extended for a year, starting from 1st April-2019.** So importers would not be able to import above 2 lakh MT this year. Besides, crop size is lower this year to 35/36 lakh MT against around 40 lakh MT last year. Even in central pool tur stock is decreasing and is around 4 lakh MT. Against its consumption is around 41-42 lakh MT. So, supply side may turn tight in the second half of the year. It may push tur price up and cross MSP (Rs 5675) in coming months. New crop is due from UP and MP and arrival is expected from end April. However, crop is in poor condition and would not build up pressure much. Overall inner tone seems bullish. Stake holders should buy on dip and hold it for good gain.
- **Cloudy weather and rains spells during Feb end and March beginning have delayed new arrival of moong** by 20 days. Besides, arrival from Shekhavati- Kishanganj line has almost dried now. Moong in Jodhpur region is being traded at Rs 5800-5900 while in Jaipur it is being traded at Rs 6000-6100 per qtl. Apart from this new moong arrival from MP is expected only by May end. So, it may move up further by Rs 200 to 300 in April from current level. Stockists have restricted selling too, sensing uptrend to continue. With increasing temperature demand too is expected to increase.
- **Urad cash market is bound to go up due to import cap at 1.5 lakh MT for the whole year, starting from 1st April-2019 to 31st March-2020.** No new crop is due now. Next new arrival (big crop) is expected only in Sep. Before this green urad (smaller crop size) would hit market from MP and Uttar Pradesh but mostly would be consumed in Dhoja dal. Currently, there is no parity for Delhi from Kota and Chandausi line. So FAQ moved up by Rs 100 to Rs 4550-4600 and SQ to Rs 5500-5550. After a slight downward correction urad may move further up by Rs 200-300. Stake holders should buy on dip and hold stock.
- **Peas market has become firm in past days due to import restriction imposed by government.** This restriction will allow an import of 1.5 LMT of peas (Yellow peas, Green peas, kaspas and Dun peas) during 01st April 2019 to 31st March 2020. Desi peas at Kanpur has increased from Rs 4150 per quintal to Rs 4525 per quintal.
- **Demand for lentil dal started improving and cash market is expected to trade up from current level** despite 1.5 lakh MT stock with Nafed. Restricted selling would help market to recover. However, any major spike is unlikely at this point of time. Lentil is being traded at Rs 4100-4300 in Kanpur market. Imported stock is being traded at Rs 3900-4000 per qtl. New arrival continues in MP and Bihar.

International Market:

- **Production of lentil in Canada is expected to decrease by 4.39 % to 20 lakh MT in 2019-20** aginst 20 lakh tonne in 2018-19. Yield for the year has been pegged slightly up at 1.5 MT per ha against 1.4 MT /ha last year. However total supply is expected to decrease from 29.89 to 28.20 lakh MT due to lower production pegged for 2019-20. Export has been pegged at 18 lakh tonne almost unchanged from 2018-19. Carryout is likely to decline from 7.0 lakh Mt to 5.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 31 to 23 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 116.39 % to 1.30 lakh MT** in 2019-20 aginst 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. However total supply is expected to increase from 3.37 to 3.48 lakh MT due to higher carryout for 2019-20. Export has been pegged at 1 lakh tonne almost unchanged from 2018-19. Carryout is likely to increase from 1.7 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 520 to 550 per MT in 2019-20.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, large chickpea production increased by 86%, while small chickpeas increased by 66%.
- **Chickpea export from Russia increased from 9104(Oct) to 19,326 metric tons in Nov.** However, it was down by 28% in this calendar year to 78,889 MT from last year till Nov-2018. Pakistan, Turkey and Jordan were major buyers. They brought 61674668 and 2,547 MT so far.
- **Pea Export from Russia increased from 65,578 MT to 78,295 MT in Oct.** This lifted export sales so far during the calendar year to 967,095, up 14% last year. The major importer for the month was Turkey- 17,069 MT. Latvia-15,975 MT and Spain - 15,362 MT.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand** produced in 2017-18. Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **Adverse weather condition at this point of time in Myanmar is likely to affect Tur and urad crop.** Despite good area coverage this year production is likely to decline by 15 to 20 percent this year. Lower crop in India this year and weak prospects in Myanmar may push tur market smartly up in the second half of the year. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year.
- **Lentil production in US is slightly down to 381384 MT against 339381 produced last year.** Earlier USDA had projected 398384 MT. Despite lower area coverage by 1.1 million acres, production increased due to better growing condition this year. Average yield increased from 678 pounds per seeded acre to 1,078 pound per acre. US mostly produces green lentil and it is facing challenge due to surplus production in Canada and other parts of the world.
- **All U.S. chickpea acreage increased from 625,500 acres in 2017 to 859,600 acres in 2018; 636,900 acres in large, and 222,700 in small.** Now we know where the lentil and dry pea acreage went; chickpea acreage increased by nearly 38%. As a result of a significant increase in yield, from 1,155lbs/ac average in 2017 to 1,512lbs/ac in 2018, production jumped from 320,100 MT in 2017 to 577,967 MT in 2018, an 81% increase in U.S. chickpea production! To break that down, chickpea production increased by 86%, while small chickpeas increased by 66%

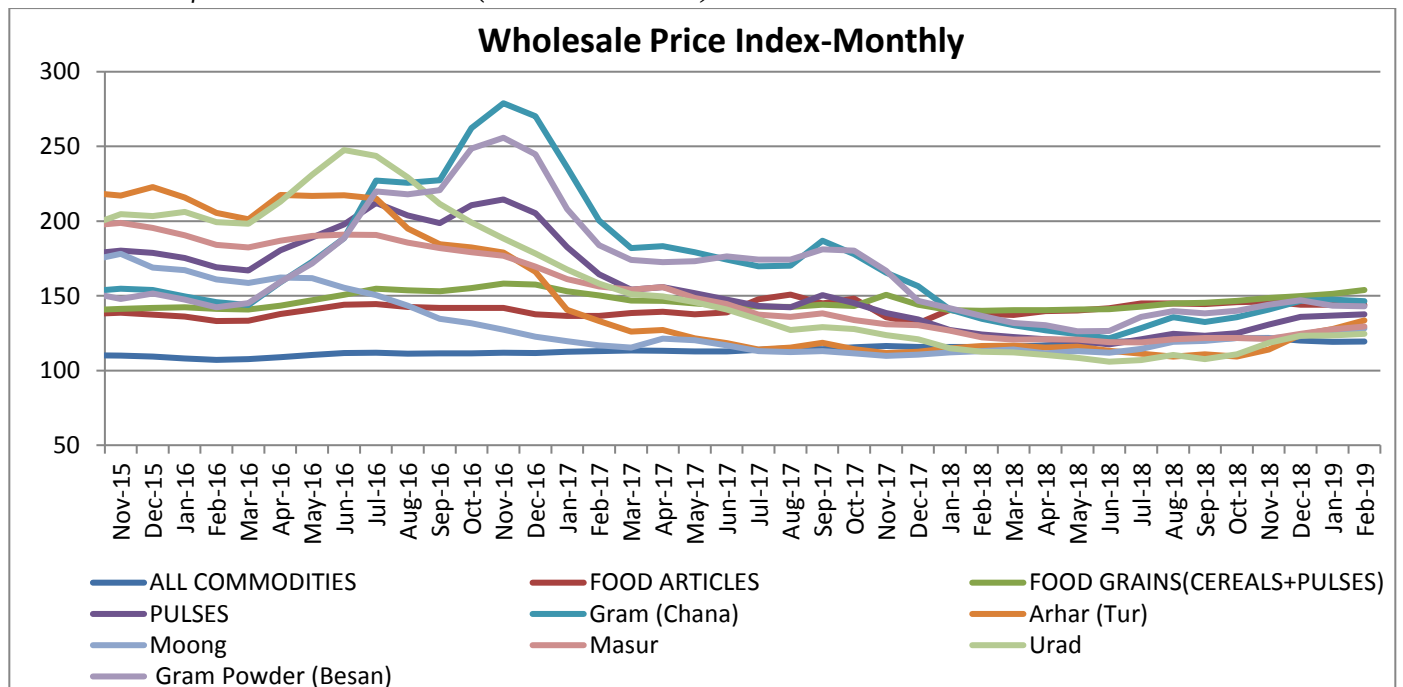

Monthly Outlook: -Pulses are likely to trade steady to slightly firm in April.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 0.9 point from 136.7 in Jan to 137.6 in Feb-2019

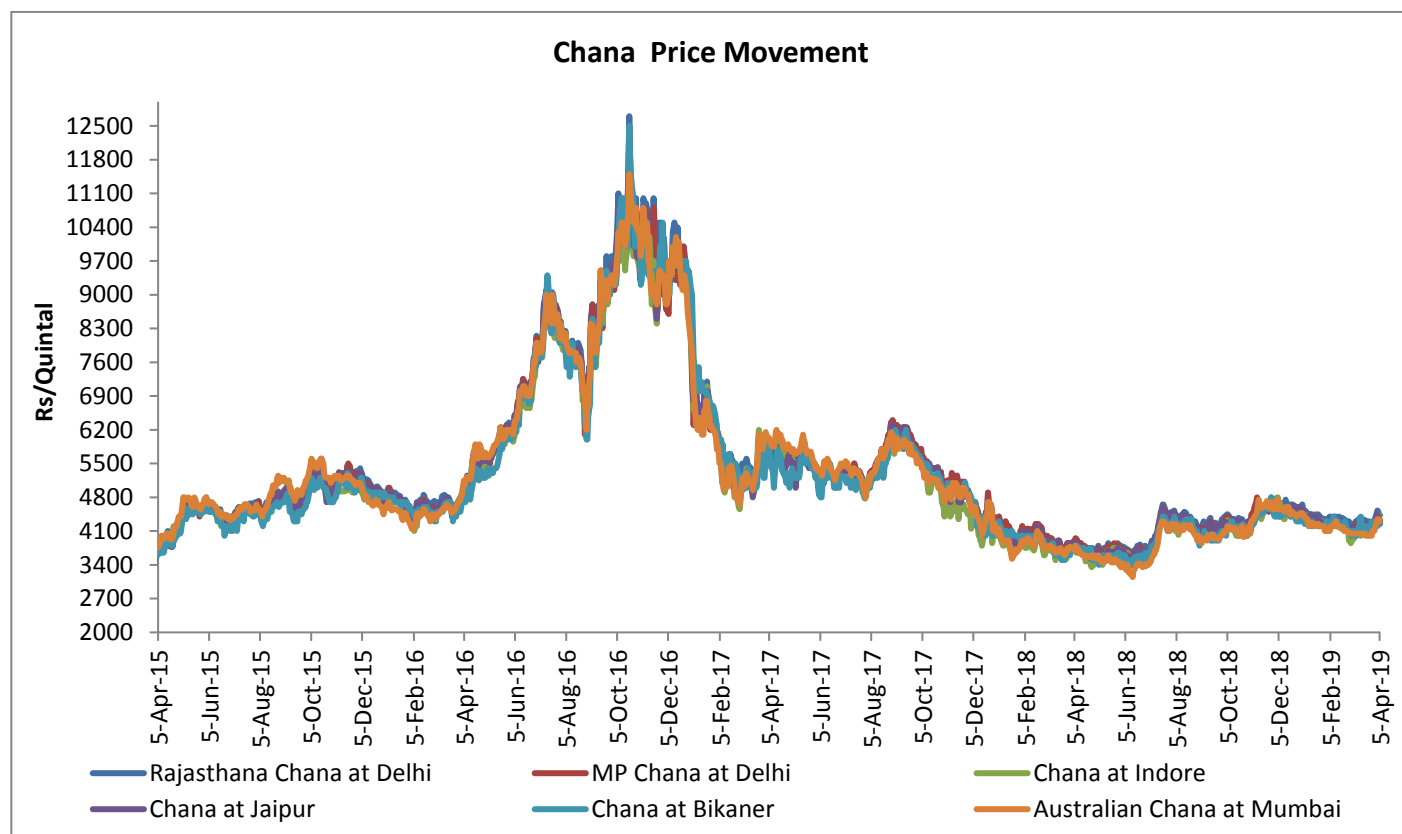

Pulses-Wise Scenario:

Chana

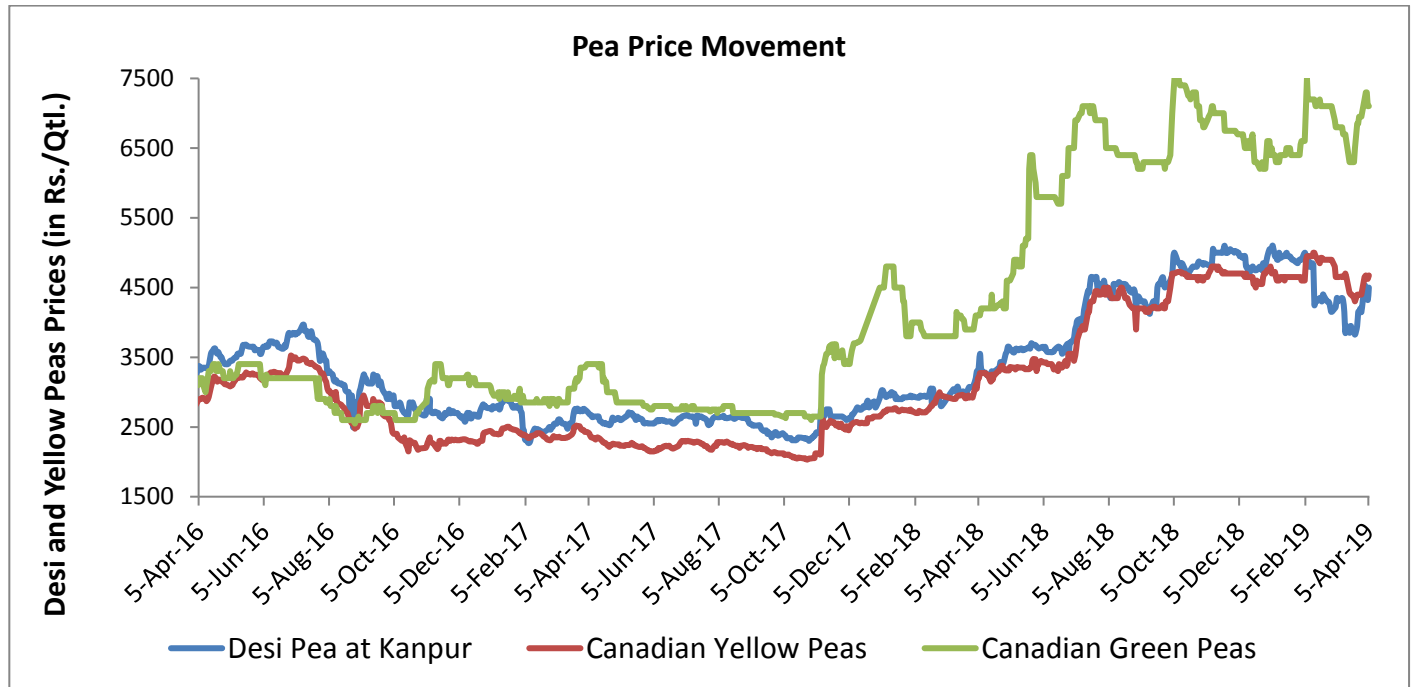

Current Scenario:

Bulk buyers like mills seem active now while bullish futures may remain supportive for cash chana market. Import quota restriction on other pulses at 6.5 lakh MT through private channels, buyers renewed buying interest and lower crop size have helped chana cash market to improve during the week under review. Longer period in phased manner for Lok Sabha election too would restrict arrival. Restricted pea import at 1.5 lakh tonne for the whole year would help higher demand for chana from besan industry. Higher demand for sattu too would lend support to chana cash market. At higher import duty there is no parity right now. So, support at current level is likely to continue. Chana may touch MSP and may stabilize at that level. Improvement in other pulses too help market to move up. Buyers should buy after slight correction of Rs 100 from current level.

All India average price for Chana traded up by 2.47% to Rs 4349. Australian chana price too traded up by 4%% at Rs 4325 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):
Market Recap:

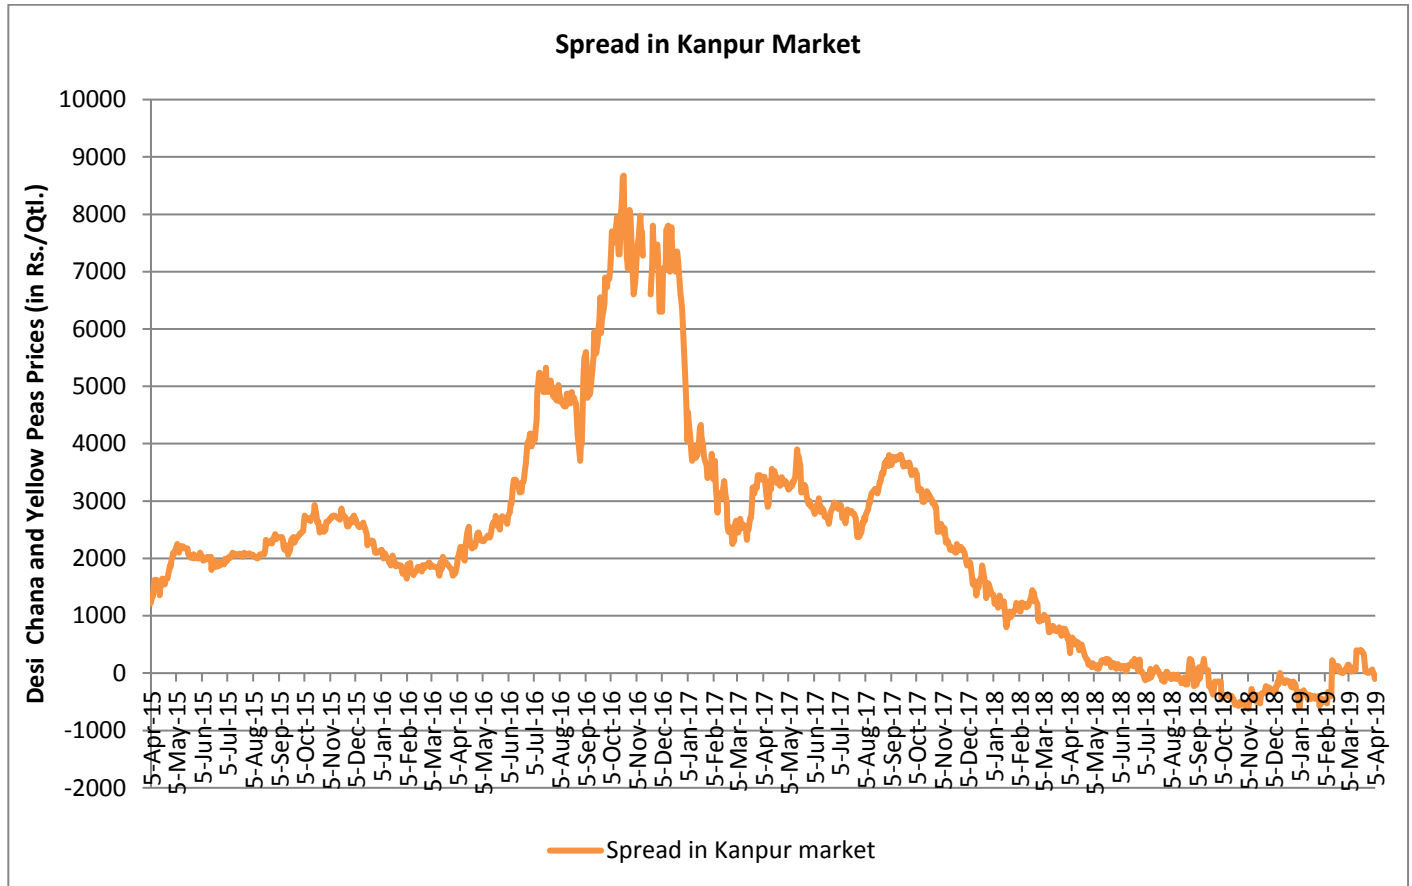

Pea market traded firm as expected and would continue to trade firm on import quota restriction at 1.5 lakh tonne for the whole year. With emerging scenario stockists have started holding stock while farmers too are unwilling to release stock at this point of time. With quota restriction cash market moved up by Rs 300 to 350 in five-six days. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4600, while in Kanpur market it is being traded at Rs 4250-4350 per qtl. As chana price has started increasing, so pea too may get support at current level. Arrival pressure from new crop too is decreasing now. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses

Current Market Dynamics & Outlook:

Pea traded at Rs 4300 -4350 in Kanpur market, almost Rs250 up from previous week due to quota restriction and stockists holding. Imported stock is decreasing and it may push pea market up. Now importers would be able to import only 1.5 lakh tonne till March -2020. So, short supply is visible in coming months. In short to medium term, demand is expected to improve as pulses price would move up from current level. Stake holders should buy on slight decline.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has started moving in negative zone due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 100-200 in April on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly firm this week too.

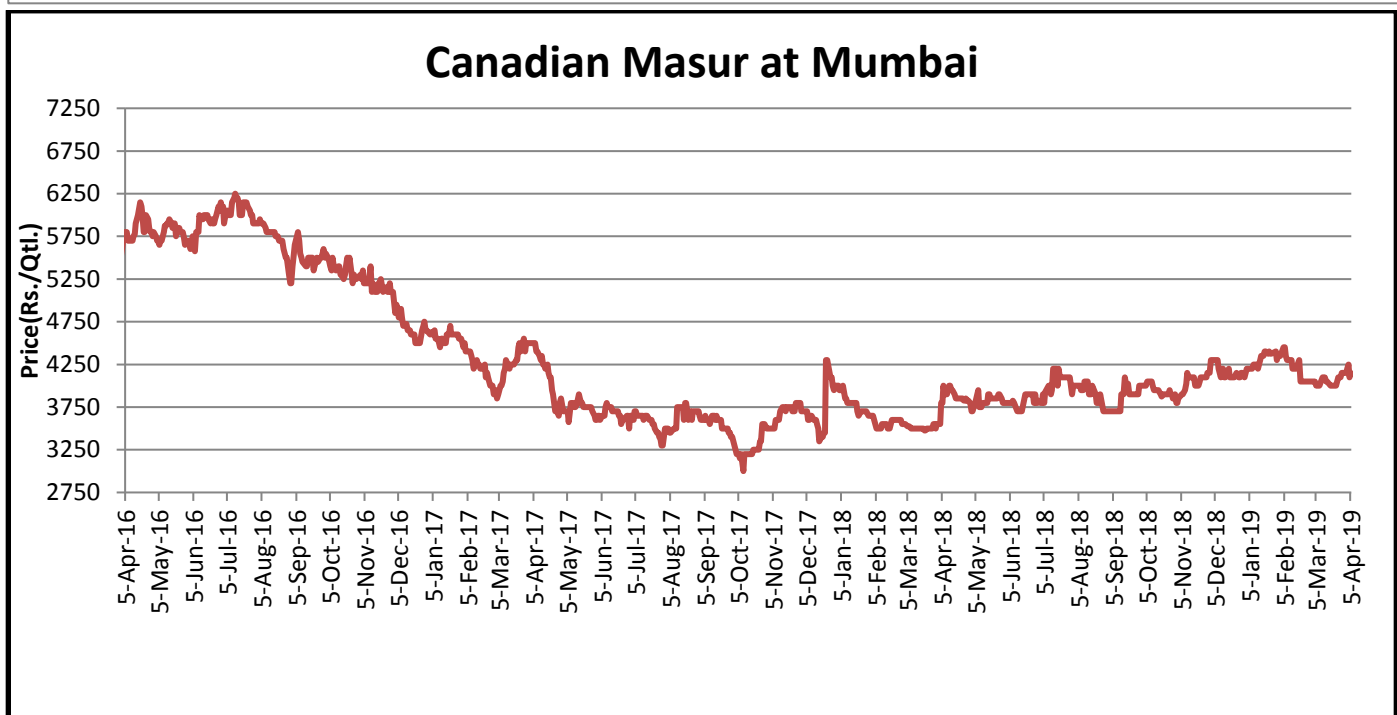

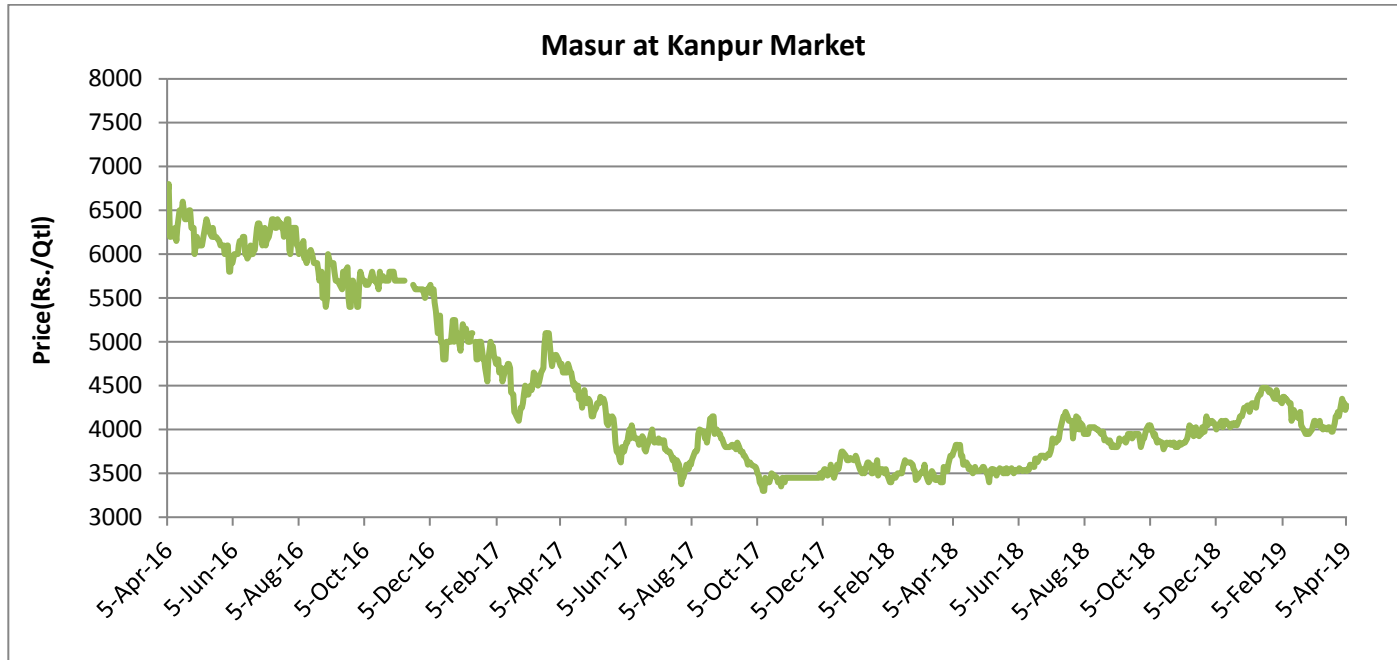

Lentils (Masoor):

Market Recap:

Arrival pressure has started decreasing now and fresh demand amid increased stock holding may push up lentil price further. However, higher stock in central pool may cap upward momentum. As prices of other pulses have started improving too, lentil too may trade up again. Improvement in demand from Nepal and B, desh may push lentil price up. Procurement drive may help market too this week. Cash market may trade in the range of Rs3950-4250 this week.

Current Scenario:

In the 1st week of April-2019, average price in key market like Kanpur was up by 0.55 % to Rs 4185 per qtl. Prices are likely to trade up in April to a certain extent. Demand from neighboring countries is awaited. Masur may get support from firmness in other pulses too in coming weeks.

Market Outlook: Prices are likely to notice firm movement due to procurement drive and decreasing arrival

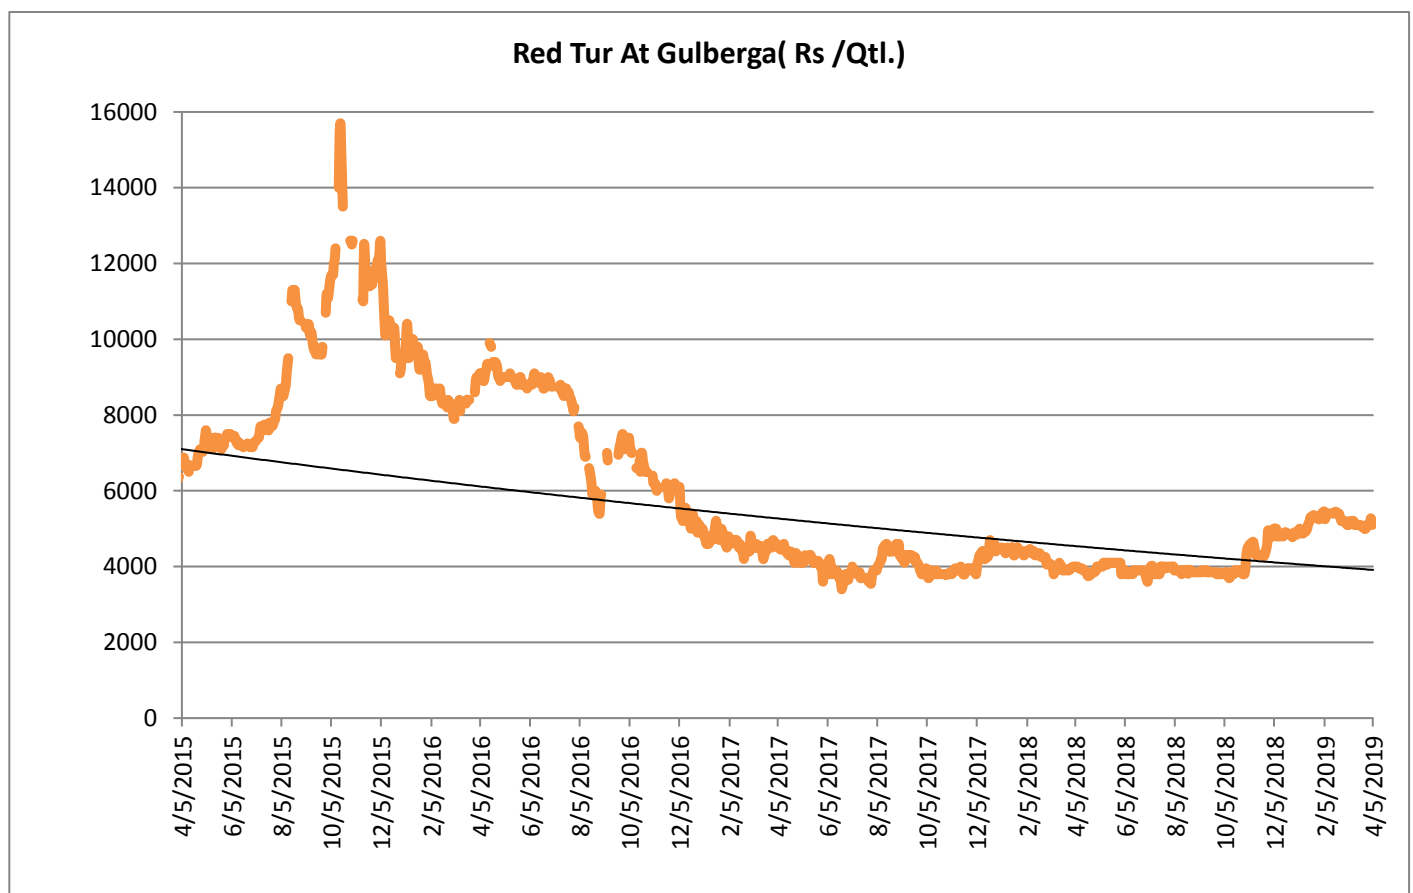

Pigeon Pea (Tur/Toor):

Market Recap:

Tur traded firm with decreasing arrivals in major markets amid ongoing procurement drive by various agencies. Total procurement by Nafed, has reached 2.0 lakh tonne. There is a common view in the market that tur price may go up by Rs100-150 more from current level as bulk users demand has started improving taking clue from firmness in other pulses.. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. As carryout is higher, any major jump from current level is unlikely. Market is awaiting demand. Currently tur market is being traded at Rs 4900-5100 in Gulberga market. This week it may trade slightly higher. Myanmar is offering tur at \$600 per MT. Overall tone remains bullish until crop from UP hits the market.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm due to renewed demand and decreasing arrival in major markets. Buying has improved by private trade. Overall outlook for Tur cash market remains firm. Stake holders should buy on correction.

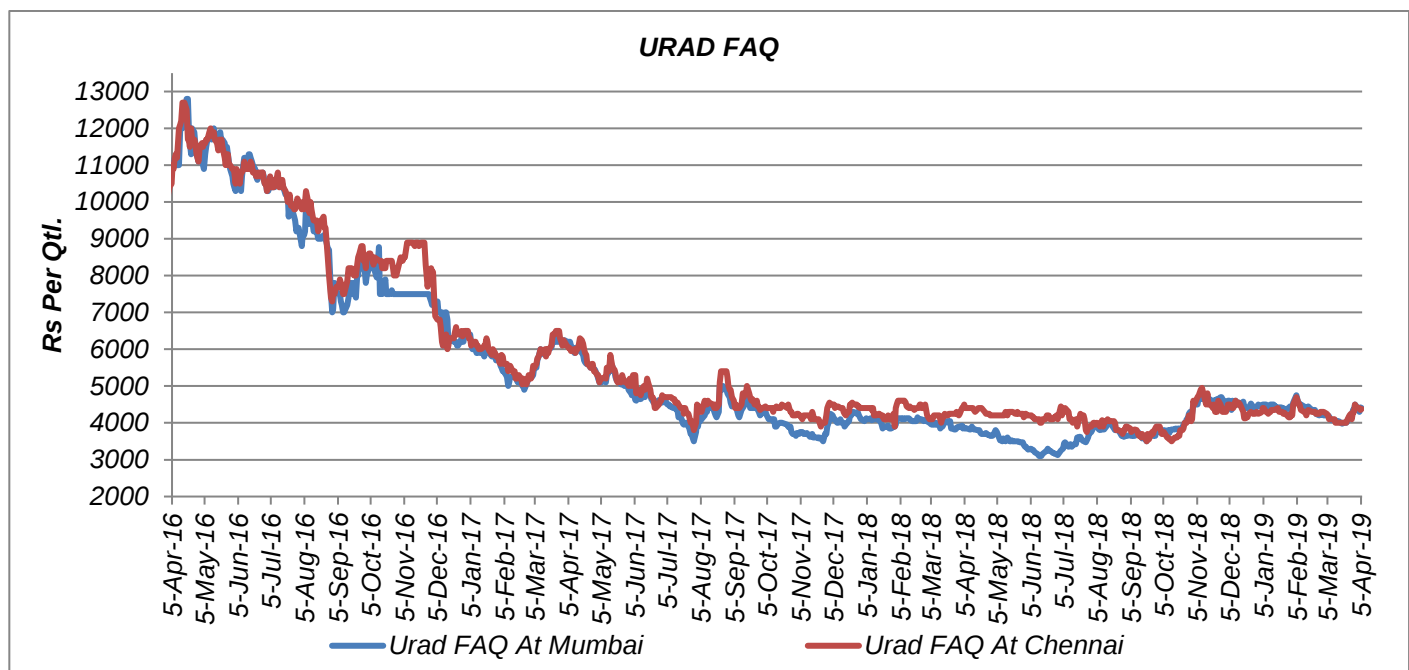

Market Outlook: Tur market may trade firm by Rs150-250 more with decreasing arrivals.

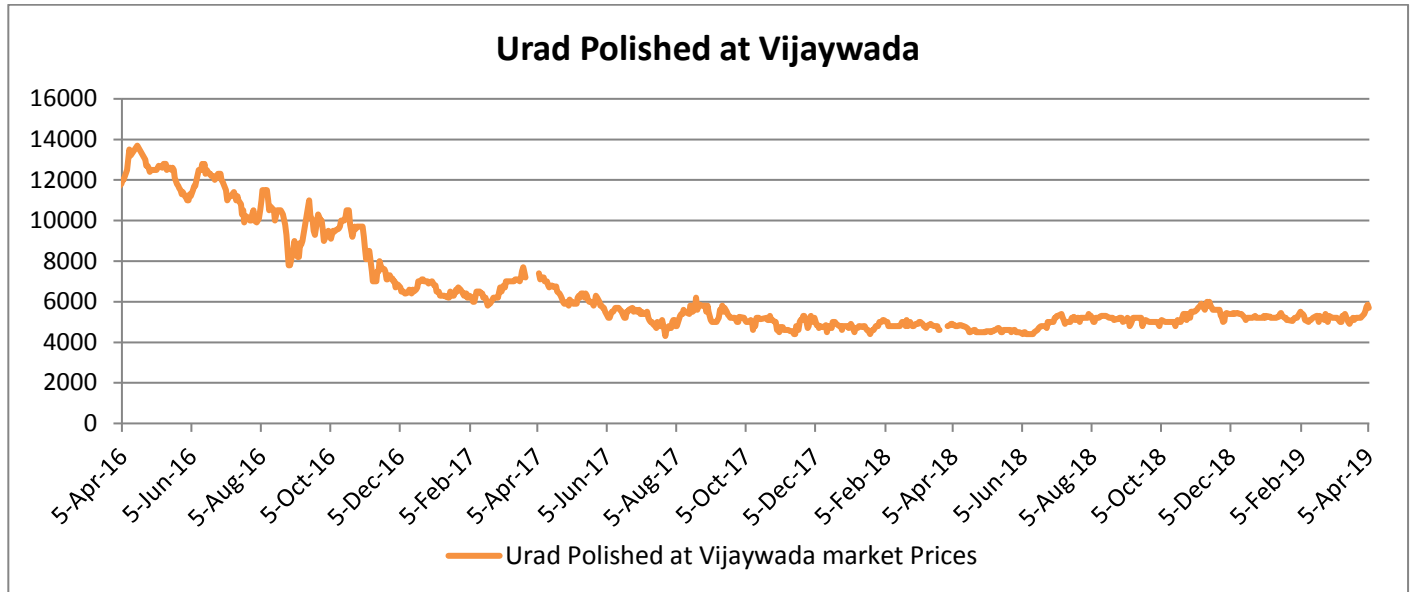

Black Matpe (Urad):

Firmness in urad cash market may continue due to import restriction at 1.5 lakh tonne, starting from 1st April-2019 and lower crop size too may help urad market to recover this week. In short to medium term urad may trade up by Rs250 to 400 in coming weeks. Stockists have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing and it may push urad price further up from current level. Govt has estimated 3.36 million tonne for 2018-19 in the 2nd Adv estimate released on 28th Feb-2019. Private trade, see it at higher side. It includes 2.68 MMT from Kharif and 0.69 from Rabi. Urad may continue to trade at Rs4300-4550 per qtl in various markets. In Chennai market urad is being traded at Rs4400-4450 per qtl. Burma is offering FAQ urad at \$540 & SQ at \$655 per tonne. Buying at dip seems good at this point of time.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4350-4400 per Qtl.) and Chennai (Rs.4450-4500 Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase from mid April. The following graph shows the prices movement in different markets:-

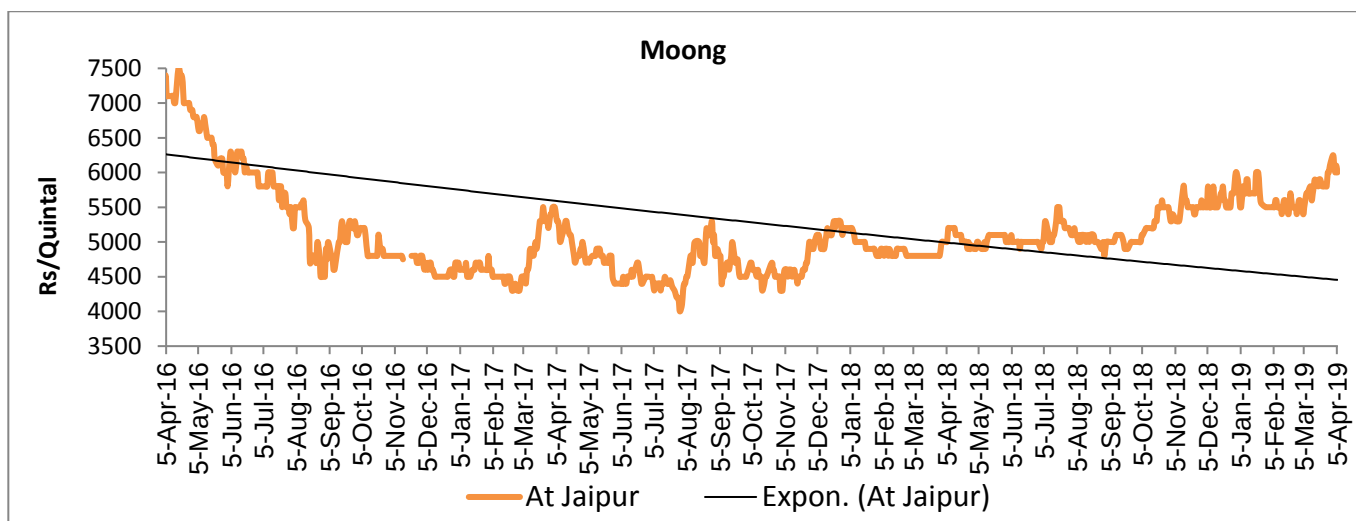

Market Outlook: Urad Prices are likely to show firm momentum this week

Green Gram (Moong):

Market Recap:

New crop of moong from UP and Bihar is expected to hit market by end April/May. So, cash moong market may move further up by Rs200-300 as old stock is decreasing and demand from mills have improved. Besides, import too is not possible as there is no parity at current price. Moong in Jaipur market may touch 6400/6500 per qtl before arrival from UP. In the latest development, nafed would start selling moong from 1st April and it may cap one way upward movement. Procurement too is on in restricted way from rabi crop. New crop is almost one month away.

Market Outlook: Moong prices are likely to trade firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook –We expect prices to move steady to slightly firm in the coming days.

- ❖ Chart depicts steady to slightly firm movement in April.
- ❖ RSI is moving up in neutral region.
- ❖ Expected price band for Chana in Delhi is 4250 to 4500 levels in this week..

Strategy: Buy on dip

Trade Recommendations: Go long around 4300 with the first target of 4400 and second target 4450 with stop loss at 4250 level.

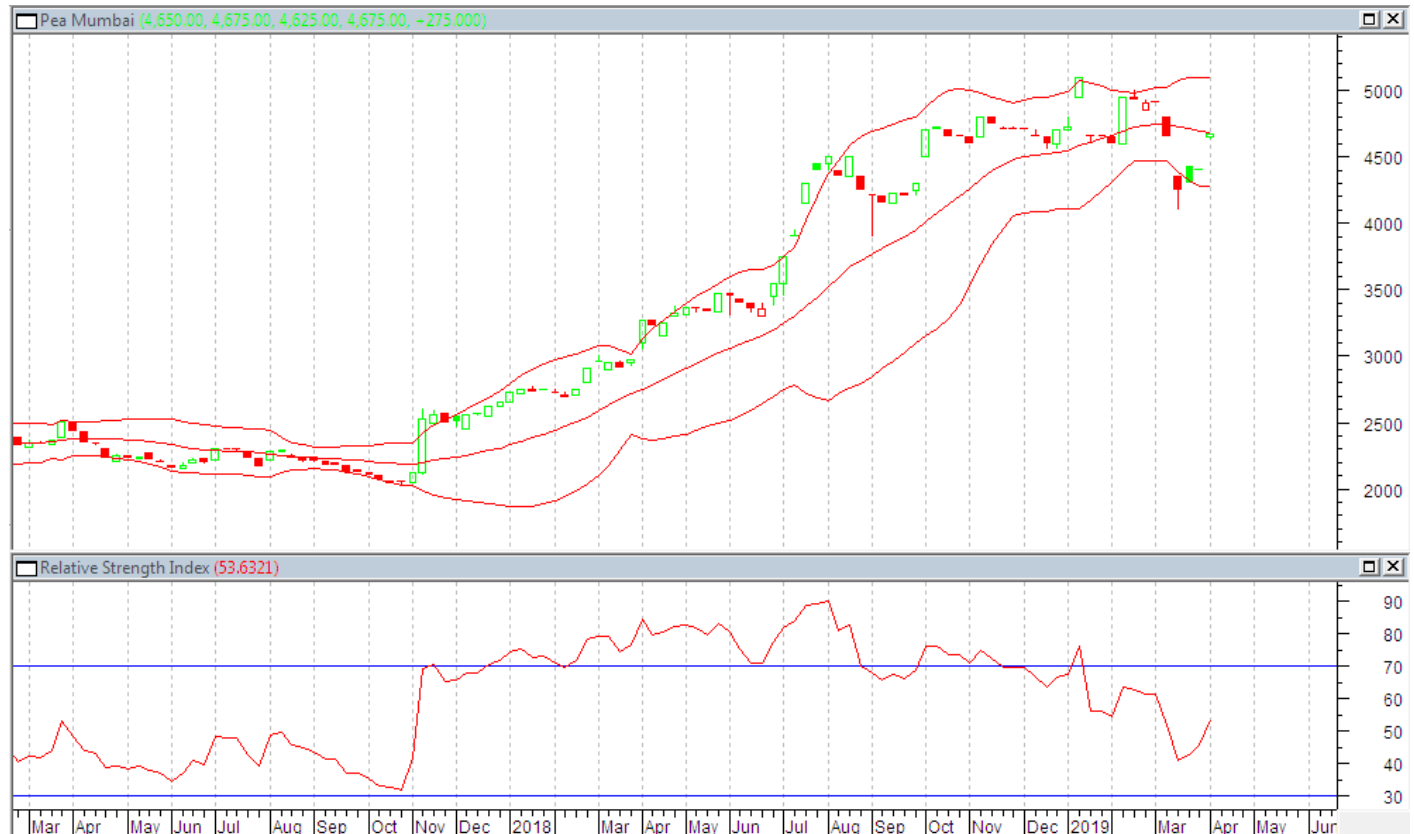

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4325	4450	4550

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week taking clue from firm chana and import ceiling at 1.5 lakh tonne for the while year .Improved demand and decreasing imported stock at ports may push up price in coming weeks.

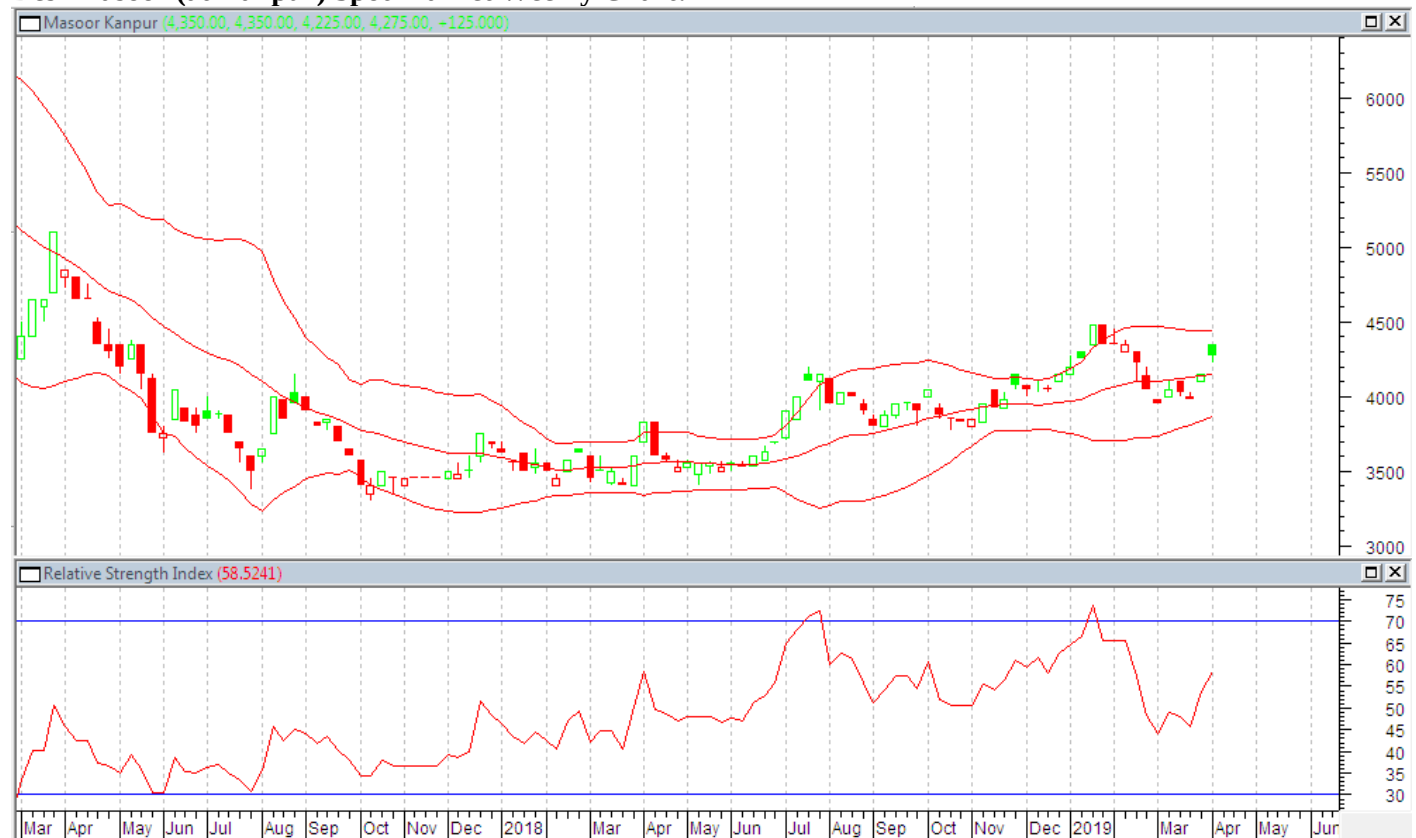

Technical Analysis:

- Candle stick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4400-4750 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4550 with the first target of 4700 and second target 4750 with stop loss at 4450 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4675	4550	4650

Masoor:
Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

- Chart depicts steady to firm movement in the market.
- RSI oscillator is moving up in neutral region.
- Expected price range is 3950-4450

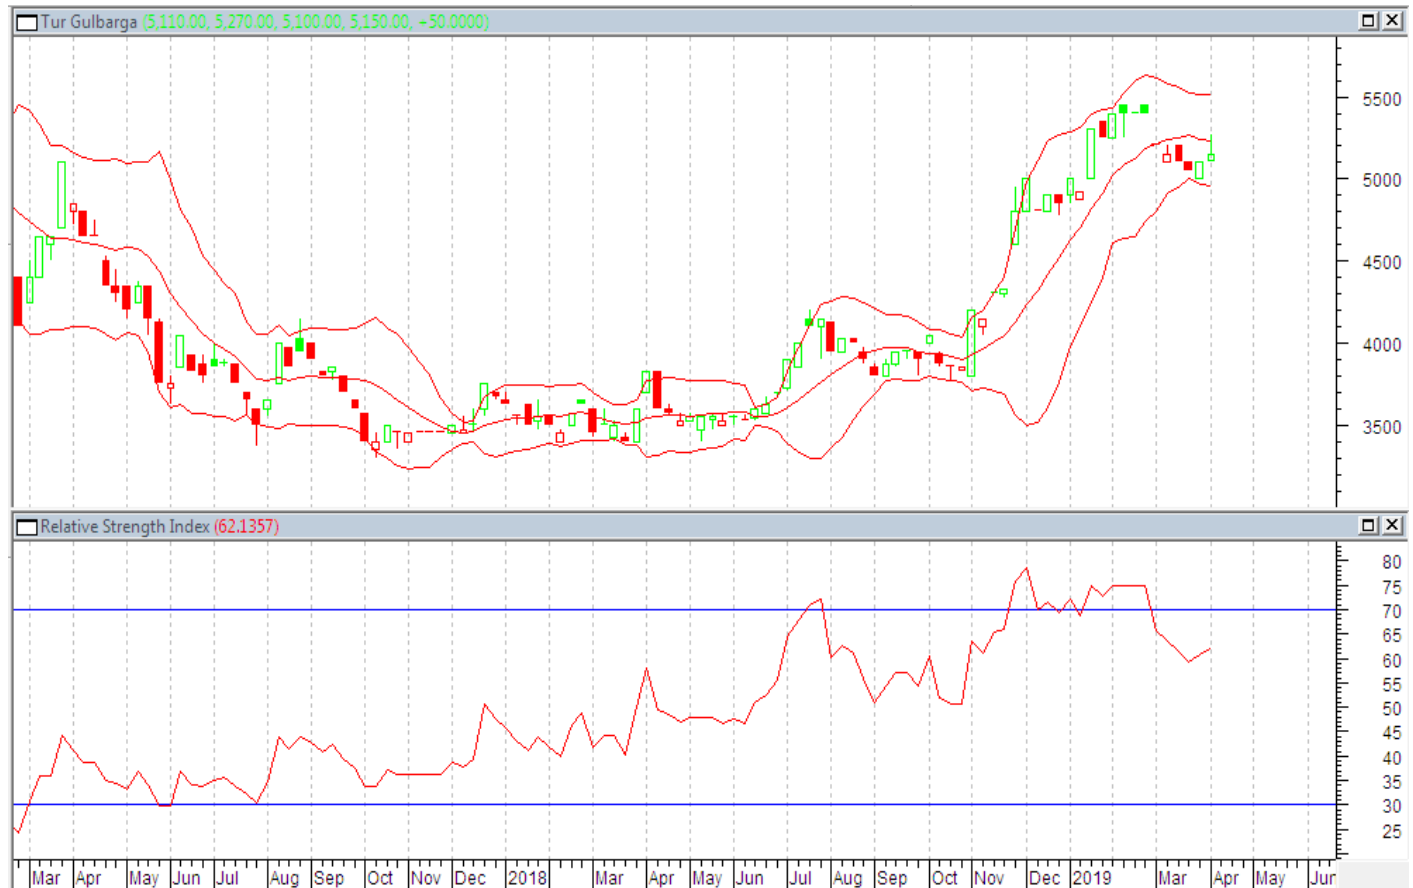

Strategy: Buy on dip:

Trade Recommendations: Buy around 4200 with the first target of 4350 and second target 4450 with stop loss at 4150 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3800	3950	4275	4450	4550

Tur:

Tur (at Gulbarga) Spot Market Weekly Chart:

Outlook - We expect prices to show firm movement in the coming week.

- Candlestick chart denotes firm movement in the market.
- Oscillator RSI is moving up in neutral region.
- Expected price range is 4800-5350

Strategy: Buy on dip

Trade Recommendations: -Go long around 5000 with the first target of 5250 and second target 5350 with stop loss at 4900 level.

Support & Resistance
