Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Lower yield (around 20 %) for tur in Bihar and Jharkhand could not pressurize cash market.** Apart from lower arrival demand from Kanpur, Katni and Indore continues to increase. Currently, there is not much stock of tur in mills located in Katni region. As prices of local tur in cash market is higher, there is no parity for dal mills in this region. So, lemon tur is being processed to meet emerging demand. It impacted lemon tur price positively and it moved up by Rs 400 to Rs5500. However, some correction is expected at this level. As domestic crop size is lower, prices of tur is bound to move up further amid lower crop size report in Myanmar too this year. Forward deal in Myanmar has been struck at \$700/705 per MT basis Indian port. Supply from Nimuch line is decreasing now. Besides, there is not much stock in Mumbai and Chennai right now. All these developments would push tur price up by Rs 400-500 from current level in the medium term.
- **Nafed has procured 2.70 lakh MT tur on MSP so far. It has procured 1.11 lakh tonne tur in Karnataka,** 70 thousand tonne in Telangana, 53000 MT in Maharashtra, 30,000 MT in Gujarat and 5000 MT in AP. Madhya Pradesh and Tamil Nadu have contributed 1800 and 400 MT respectively as on 1st May 2019.
- **Slight recovery in cash market was seen during the week under review.** Demand for quality urad has improved amid restricted release by stockiest. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level. No big crop is due till Sep. Before this green urad would hit market from MP and UP but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move up by Rs 300 to 400 more from current level. Currently it is being traded at Rs 4550 to 4650 in Mumbai market. Tamil Nadu has procure 3400 MT urad while AP 2900 MT and Telangana just 400 MT so far on MSP.
- **Agriwatch expects downward correction in moong market as buyers at higher level have started** restricting bulk purchase. In Jaipur market moong is being traded at Rs 6300-6450. It may move further up by Rs 100-150 and then decrease. There is no parity for export while new crop is expected from UP, Odisha and Bihar. Pressure from Nimar line is coming down. Besides, govt has stock of around 1.5 lakh MT and attempt to sell at higher price may start again. Overall tone in the medium term remains firm. June onward it may move to Rs 7000. No big crop is due before August end. So, stake holders should buy at Rs100-200 downward correction.
- **Chana may continue to trade steady to slightly weak as millers are avoiding bulk buying to for stock** purpose at current price. In Delhi market chana is being traded at Rs 4275-4350. Weak demand amid eased supply side may restrict chana to have any major spike in the short term. There is some hope from Ramdan's demand and improved pace of procurement. However, it may not push up price beyond MSP level in any case in the near term. There is plenty of old stock with Nafed. Besides, there is almost double stock in cold storage this year in comparison to last year. So, it would continue to restrict improvement in the near term. If Nafed holds 10 lakh MT as buffer stock, there would be still marketable surplus of 7 lakh MT. It would cap uptrend. Chana cash market would move up beyond MSP, but not before June. In futures bears are active and they may pressurize market further.
- **As per market sources the import quota for pea may be increased by 50000 tonnes.** The current restriction allows an import of 1.5 LMT of peas (Yellow peas, Green peas, kasper peas and Dun peas) during 01st April 2019 to 31st March 2020. Agriculture ministry expects a production of 240.20 LMT in 2018-19 compared to 252.30 LMT in 2017-18. As a result pea prices have fallen by Rs 100 per quintal in past weeks. Pea market is likely to stay steady to slightly weak.
- **As per latest update, lower imports has led to increase in prices of lentil by Rs 50 per quintal** at ports. Lentil vessel is being quoted at Rs 4050-4150 per quintal and container is being quoted at Rs 4200-4250 per quintal. Furthermore arrivals

in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150 per quintal in previous week.

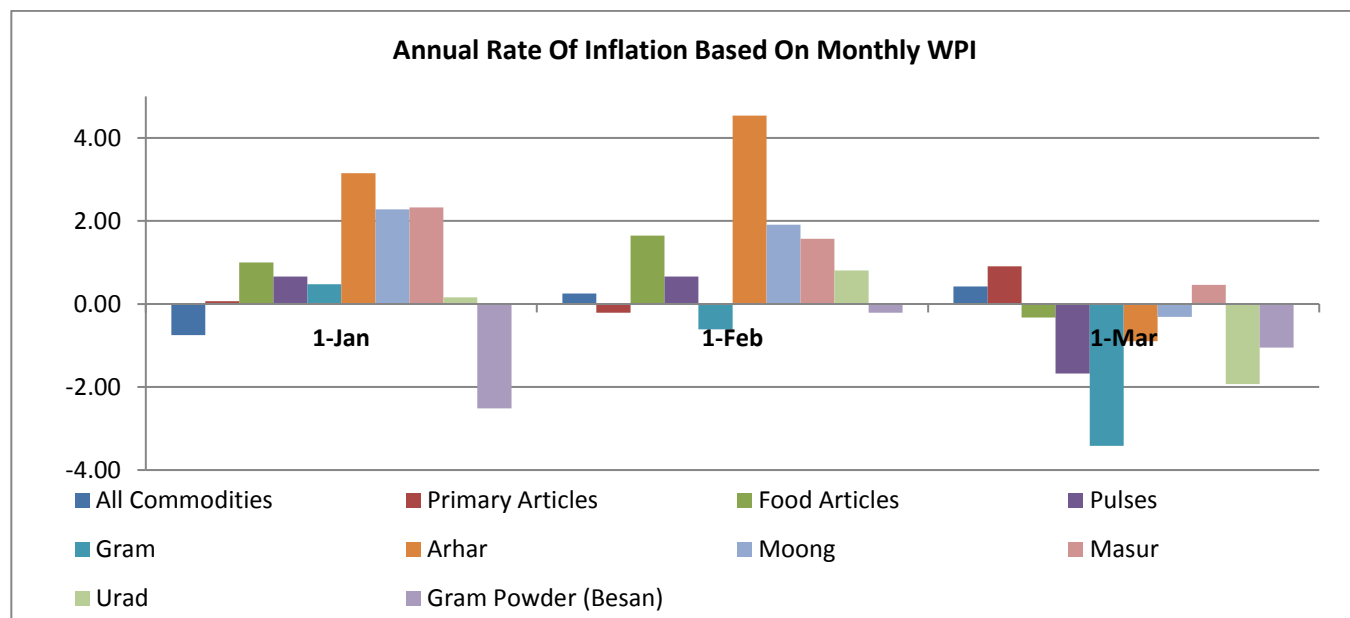

International Market:

- **Production of lentil in Canada is expected to decrease by 0.38 % to 21 lakh MT in 2019-20**, against 20.92 lakh tonne in 2018-19. Yield for the year has been pegged slightly up by 5% to 1.47 MT per ha against 1.4 MT /ha last year. However, total supply is expected to decrease by 2.01 % from 29.80 to 29.20 lakh MT due to 4.92% lower production pegged for 2019-20. Export has been pegged 1 lakh MT higher at 18 lakh tonne in 2019-20. Carryout is likely to decline from 8.0 lakh Mt to 6.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 37 to 28 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Production of Chickpeas in Canada is expected to decrease by 58.19 % to 1.30 lakh MT in 2019-20**, against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. Even total supply is expected to decrease by 0.57% from 3.50 to 3.48 lakh MT due to higher expected export in 2019-20. Export has been pegged at 1 lakh tonne, up by 0.10 lakh MT from 2018-19. Carryout is likely to decrease from 1.95 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 500 to 530 per MT in 2019-20.
- **Adverse weather condition at the point of crop growth stage in Myanmar has affected Tur and urad crop.** Despite good area coverage this year, production is likely to decline by 15 to 20 percent. Lower crop in India this year and weak prospects in Myanmar may push tur market further up in May. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year. Myanmar is offering new tur at \$770 in forward deal basis Indian ports. Old crop is being offered at \$660 per MT.
- **As per USDA pre sowing intention report dry pea area is expected to increase by 3% to 8.81 lakh acres this year.** Area may increase in Idaho, Montana, South Dakota, and Washington from last year. However, it may decline in Nebraska and North Dakota.
- **As per USDA report lentil area in US decline by 29 % from last year to 5.55 lakh acres in 2019.** Planted area is expected to decline in Montana and North Dakota while in Idaho and Washington it is expected to remain unchanged. If materialized, it will be the lowest area coverage since 2015.
- **As per the latest USDA seeding intention expected area coverage under chickpea in US may decline by 40% to 5.19 lakh acres.** Out of this small chickpeas area may be at 1.37 lakh acres large chickpea at 3.82 lakh acres. It would be the lowest since 2016.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand produced in 2017-18.** Faba bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **As per statistics Canada land in pulses and specialty crops may decline in 2019-20 if farmers remain stick with their seeding intentions.** They intend to plant 8.82 million acres of pulses and special crops, down from 8.98 million last year and below the recent five year average of 9.52 million acres. The only crops showing an increase over last year are peas, which could climb from 3.615 to 4.035 million acres.
- **This year supply from Myanmar is expected to be lower due to lower crop size and quantity restriction imposed by India.** New tur crop in Myanmar is expected from June end. As old crop stock is lower this year, Myanmar is offering new tur at \$770 and old at \$660 per MT. It is offering FAQ urad at \$580 and SQ at \$695 per MT. Chana Kabuli is being offered

at \$690 basis Indian port. Moong Pakakuis being offered at \$800 per MT. red rajma is being offered at \$1100 per MT. As demand is increasing from other parts of world, prices may move further up from current level.

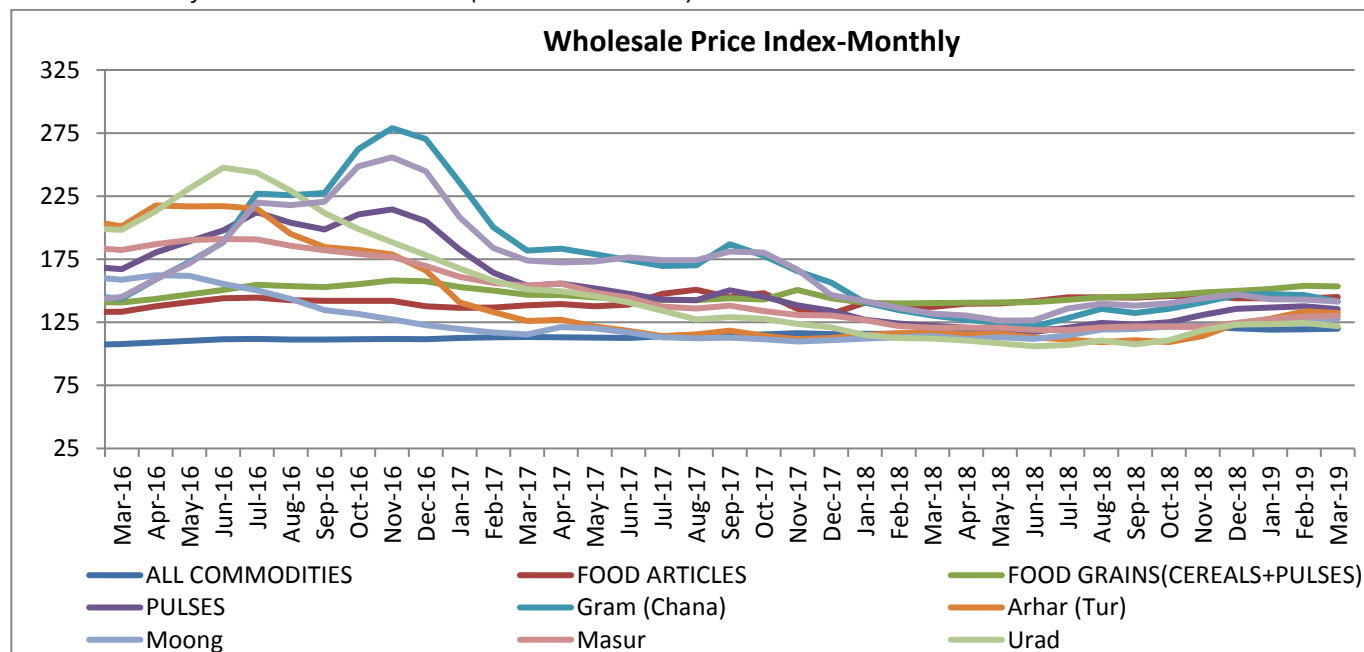

Monthly Outlook: -Pulses are likely to trade steady to slightly weak in this week.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 2.3 point from 137.6 in Feb to 135.3 in Mar-2019

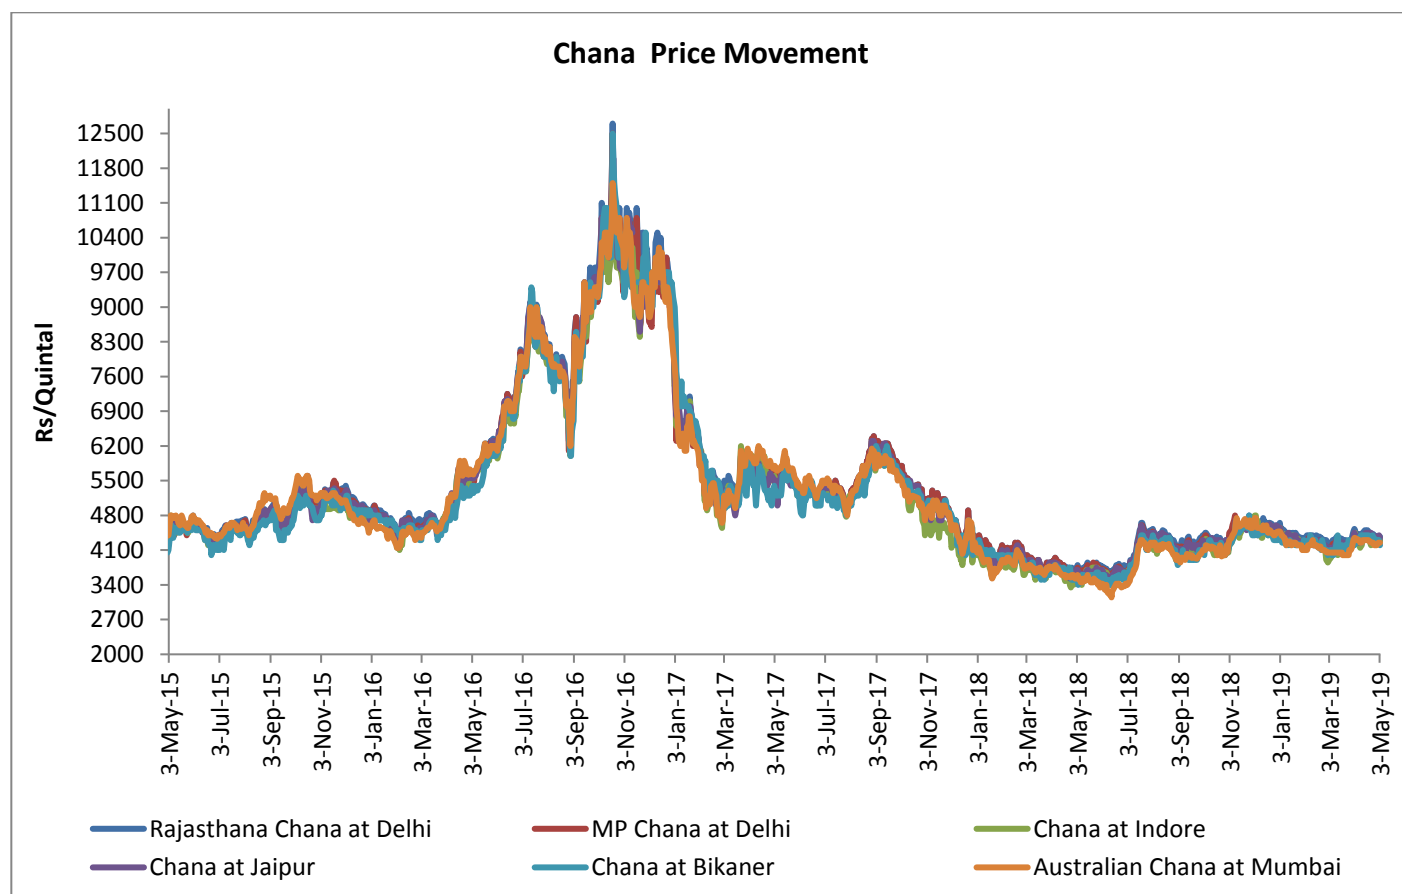

Pulses-Wise Scenario:

Chana

Current Scenario:

Stock is higher in cold storage and central pool and it restricted upward momentum in the cash market. Bulk buyers are unwilling to buy at current price despite Ramdan's demand is likely to begin. Chana prices in cash market stayed steady to slightly weak and is likely to trade range bound this week too due to slower pace of procurement and restricted buying by mills. Stockiest and mills are avoiding bulk purchase at higher level. Firmness might be seen if Nafed increases its procurement pace. Nafed has procured 1.61 lakh MT chana at MSP so far. In Delhi market chana is being traded at Rs4300-4350 per qtl. Overall trend seems steady to slightly weak in the short term.

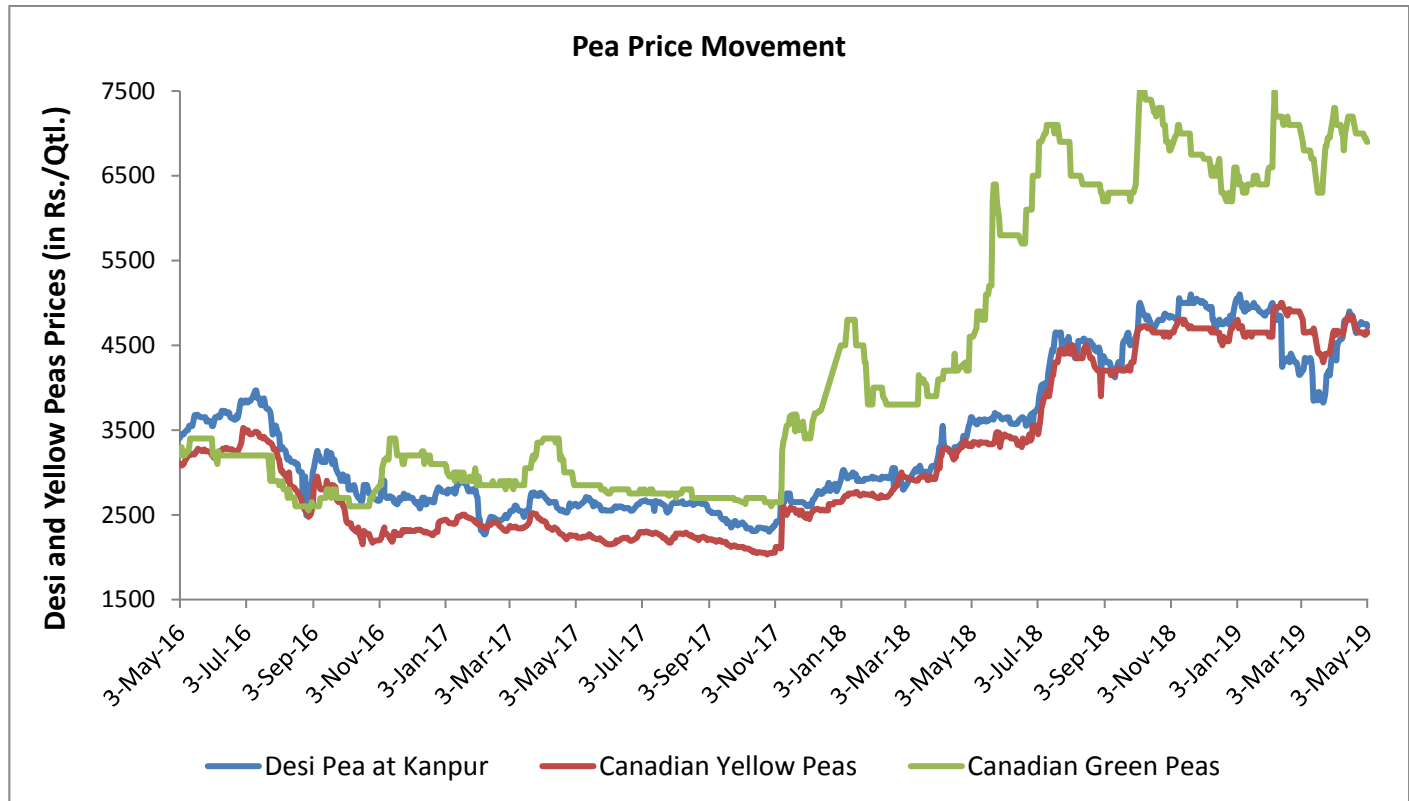

All India average price for Chana traded down by 2.13 % to Rs 4311. Australian chana price too traded down by 0.25 % at Rs 4229 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week.

Peas (Matar):

Market Recap:

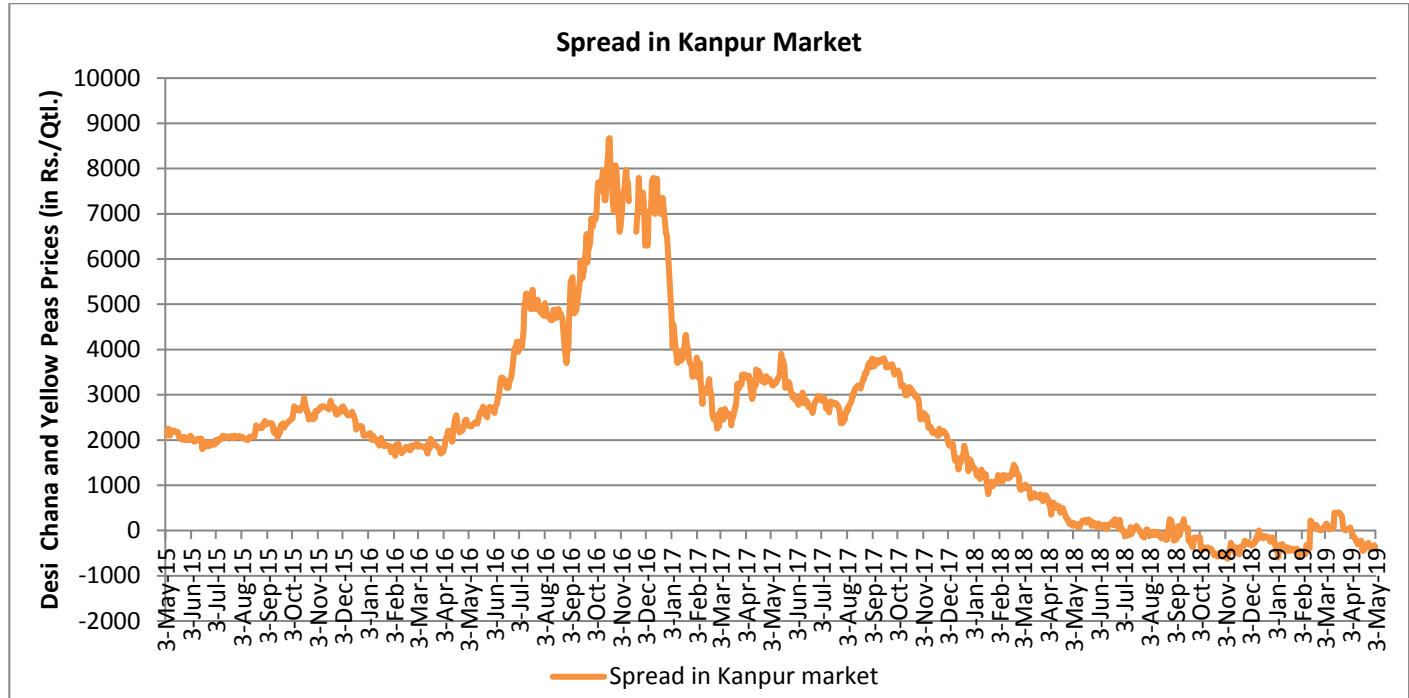

Pea market continued to trade weak and it may slip further due to poor demand at higher level despite import quota restriction at 1.5 lakh tonne for the whole year. As supply side is expected to be tight in 2nd half of the year, govt. may increase import quota to 2 lakh MT in coming months. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4700-4725, while in Kanpur market it is being traded at Rs 4650-4675 per qtl. As chana price has started decreasing, pea too may trade under pressure despite decreasing arrival. As, there would be shortage of imported crop, price would bound to move up taking clue from other pulses in the second half. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 4650-4675 in Kanpur market, almost Rs 100 down from previous week due to weak demand and decreasing chana price. Despite decreasing imported stock pea price may decline by Rs 100 more. Now importers would be able to import Only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT. So, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on slight decline.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap decreased slightly due to decreased pea price in Kanpur market. Spread is expected to remain in negative zone of 300-400 in May on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

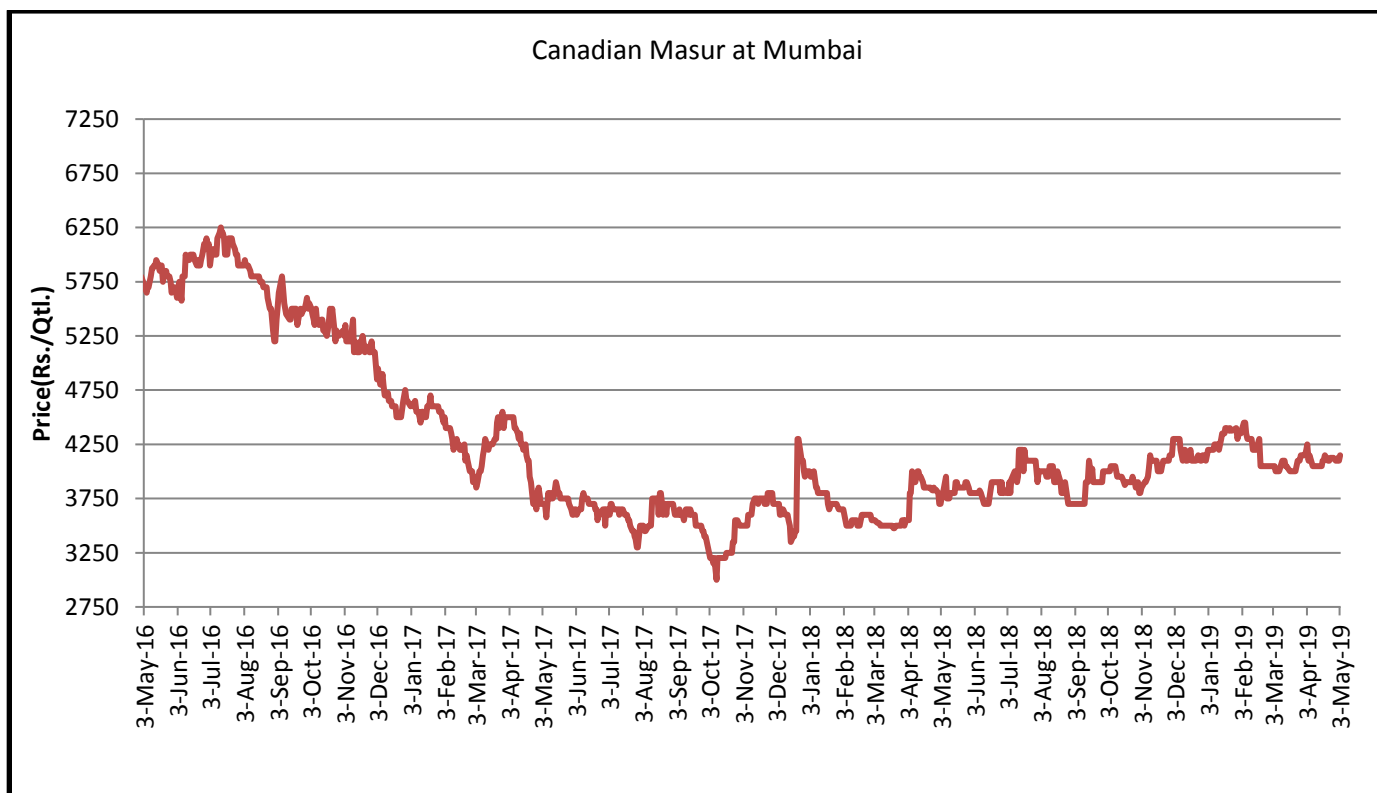

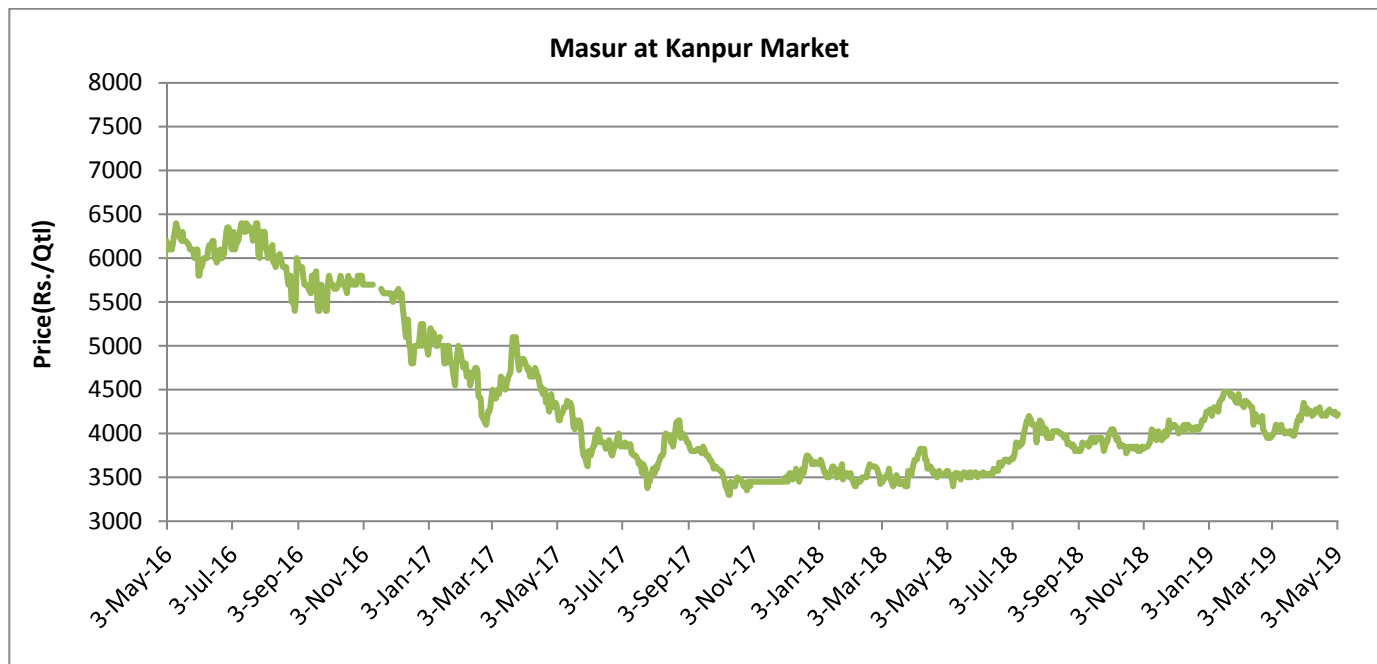

Lentils (Masoor):

Market Recap:

As per latest update, lower imports has led to increase in prices of lentil by Rs 50 per quintal at ports. Lentil vessel is being quoted at Rs 4075-4150 per quintal and container is being quoted at Rs 4200 per quintal. Further more arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150 per quintal in previous week. Lentil arrivals are not creating much pressure on prices. This would provide support to domestic market prices. However, higher stock in central pool may cap upward momentum to a certain extent. As prices of other pulses have started improving, lentil too may trade up again. Improvement in demand from Nepal and B'desh, may push lentil price up. Cash market may trade in the range of Rs4100-4350 this week too.

Current Scenario:

In the 1st week of May-2019, average price in key market like Kanpur was down by 0.70 % to Rs 4225 per qtl. Prices are likely to trade up in May to a certain extent. Demand from neighboring countries is awaited. Masur may get support from firmness in other pulses too in coming weeks.

Market Outlook: Prices are likely to notice firm movement due to procurement drive and decreasing arrival and lower import volume.

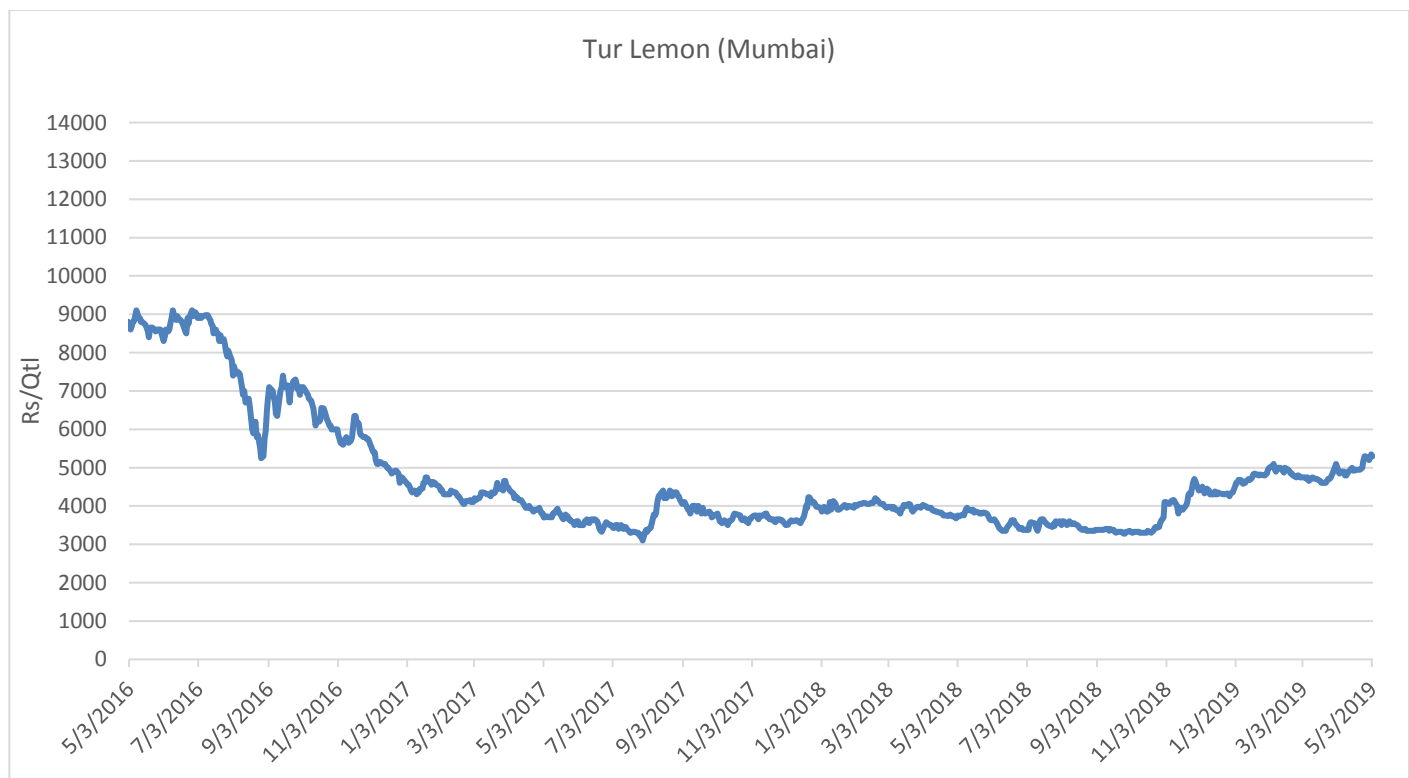

Pigeon Pea (Tur/Toor):

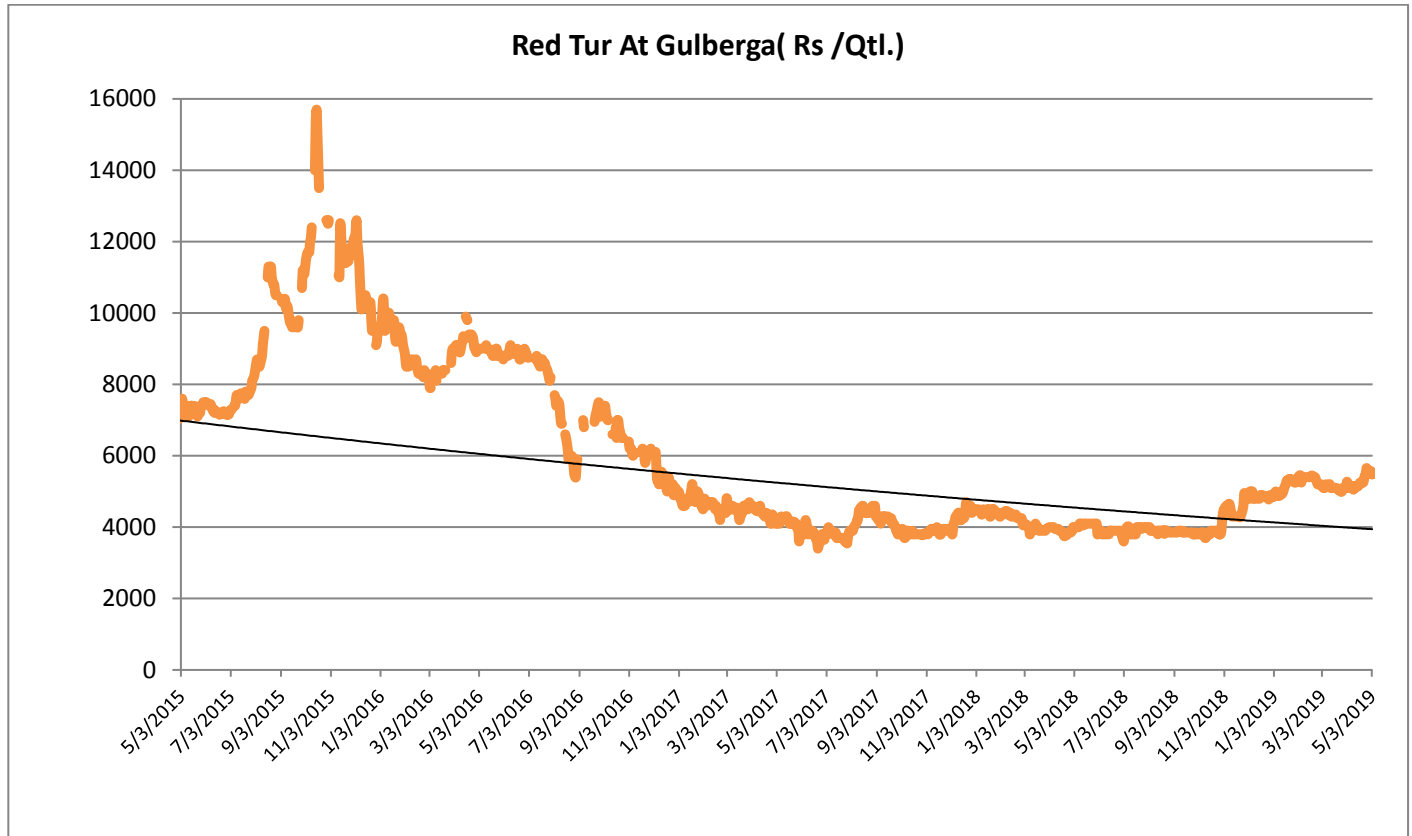

Market Recap:

Nafed has procured 2.70 lakh MT tur on MSP so far. It has procured 1.11 lakh tonne tur in Karnataka, 70 thousand tonne in Telangana, 53,000 MT in Maharashtra, 30,000 MT in Gujarat and 5,000 MT in AP. Madhya Pradesh and Tamil Nadu have contributed 1,800 and 400 MT respectively as on 1st May 2019. Tur traded firm due to poor arrival flow amid ongoing procurement drive at MSP which has increased this week. There is a common view in the market that tur price may go up by Rs200 more from current level as bulk users demand started improving. Agriwatch estimate for tur production is 36.21 lakh tonne for the year while govt.'s 2nd adv estimate released on 28th Feb has put it at 36.8 lakh tonne. Market is awaiting demand from bulk buyers. Currently tur market is being traded at Rs 5050-5200 in Gulberga market. This week it may trade slightly up. Myanmar is offering new tur at \$730 per MT in forward deal. Old is being offered at \$675 per MT.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm due to improved demand and decreasing arrival in major markets. Buying by private trade too has improved. Crop in Myanmar too is 20% lower this year. Overall outlook for Tur cash market remains firm in the short to medium term. Stake holders should buy on downward correction.

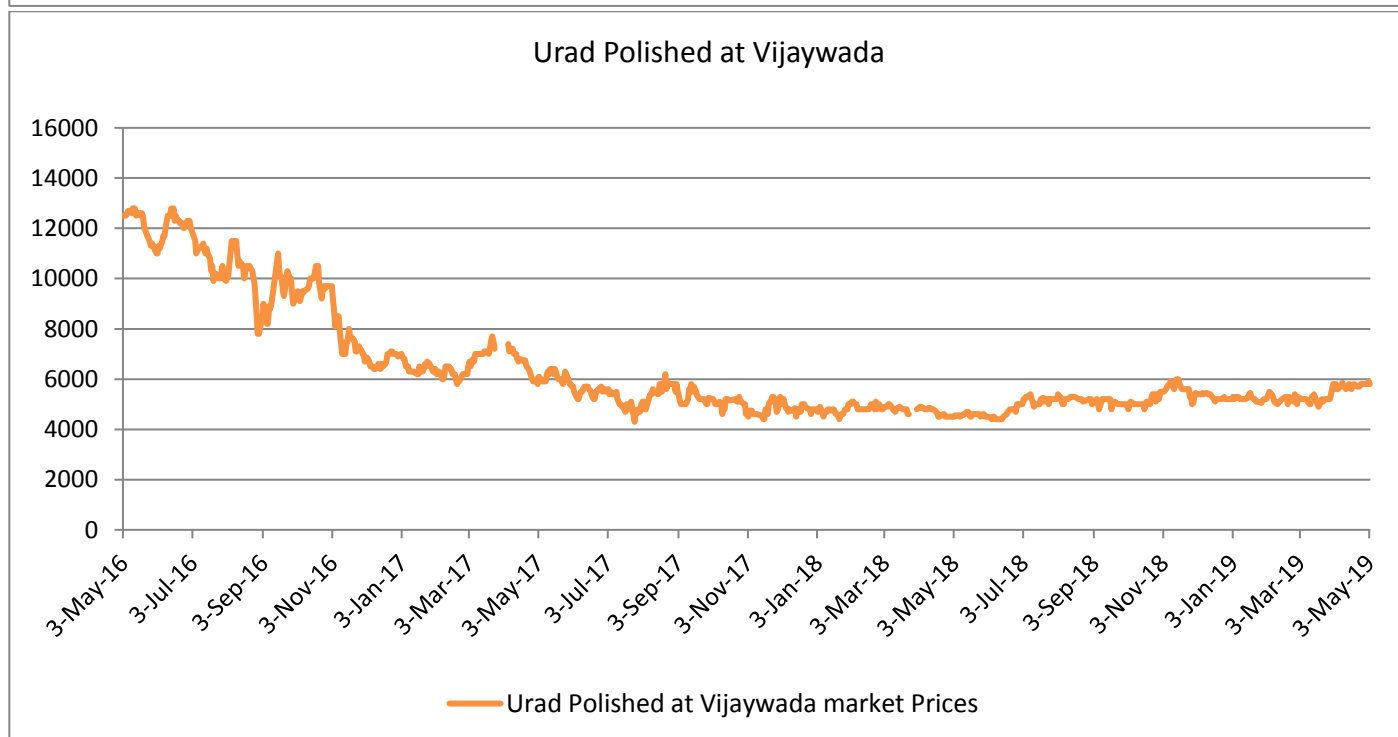

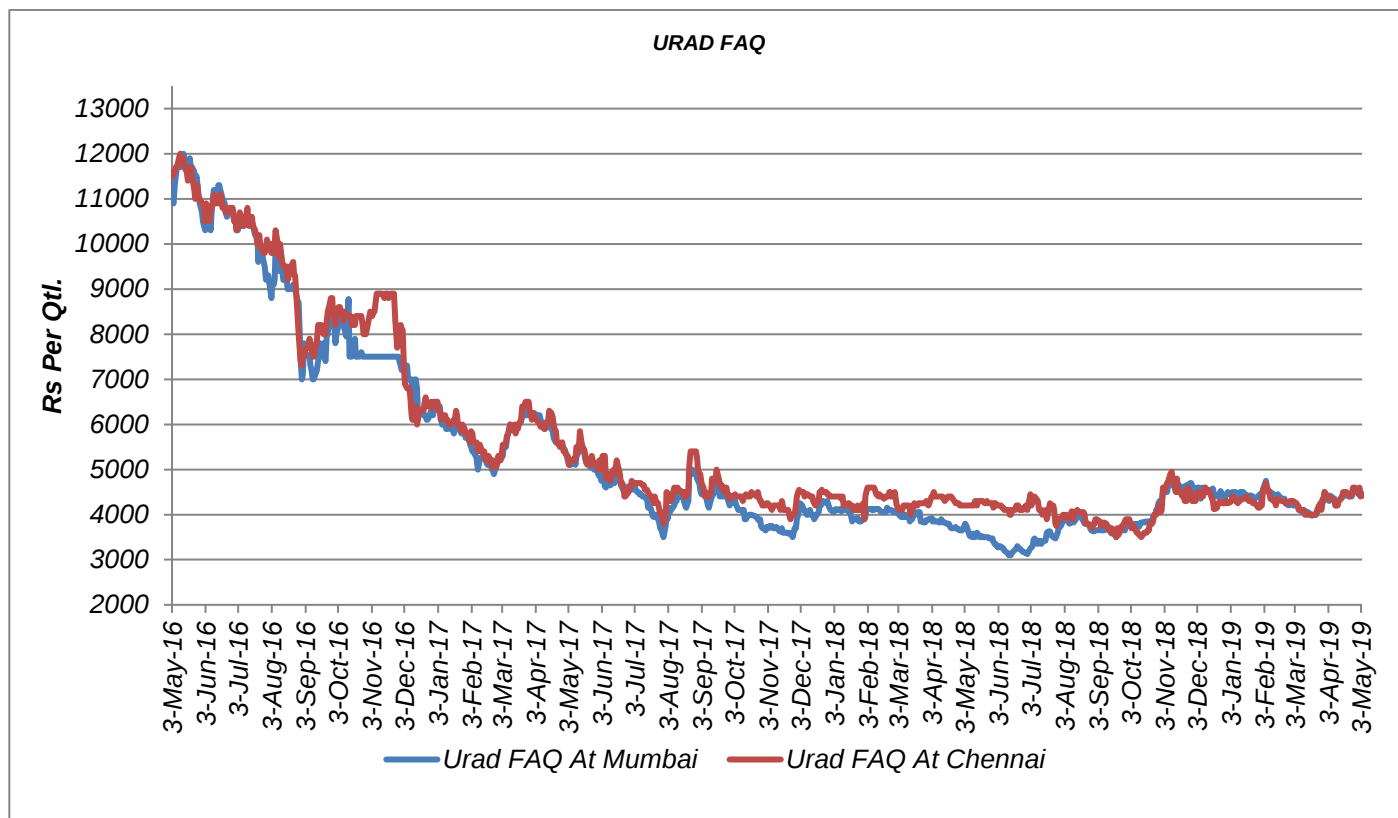

Market Outlook: Tur market may trade firm by Rs150-250 more with decreasing arrivals and renewed buying spree..

Black Matpe (Urad):

Slight recovery in cash market was seen during the week under review. Demand for quality urad has improved amid restricted release by stockiest. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level. No big crop is due till Sep. Before this green urad would hit market from MP and UP but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move up by Rs 300 to 400 more from current level. Currently it is being traded at Rs 4550 to 4650 in Mumbai market. So, FAQ moved up by Rs 100 to Rs 4550-4650 and SQ to Rs 5550-5650. After a slight downward correction urad may move further up by Rs 100-200. Stake holders should buy on dip and hold stock.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-4500 per Qtl.) and Chennai (Rs.4450-4550 Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase with increasing temperature. The following graph shows the prices movement in different markets:-

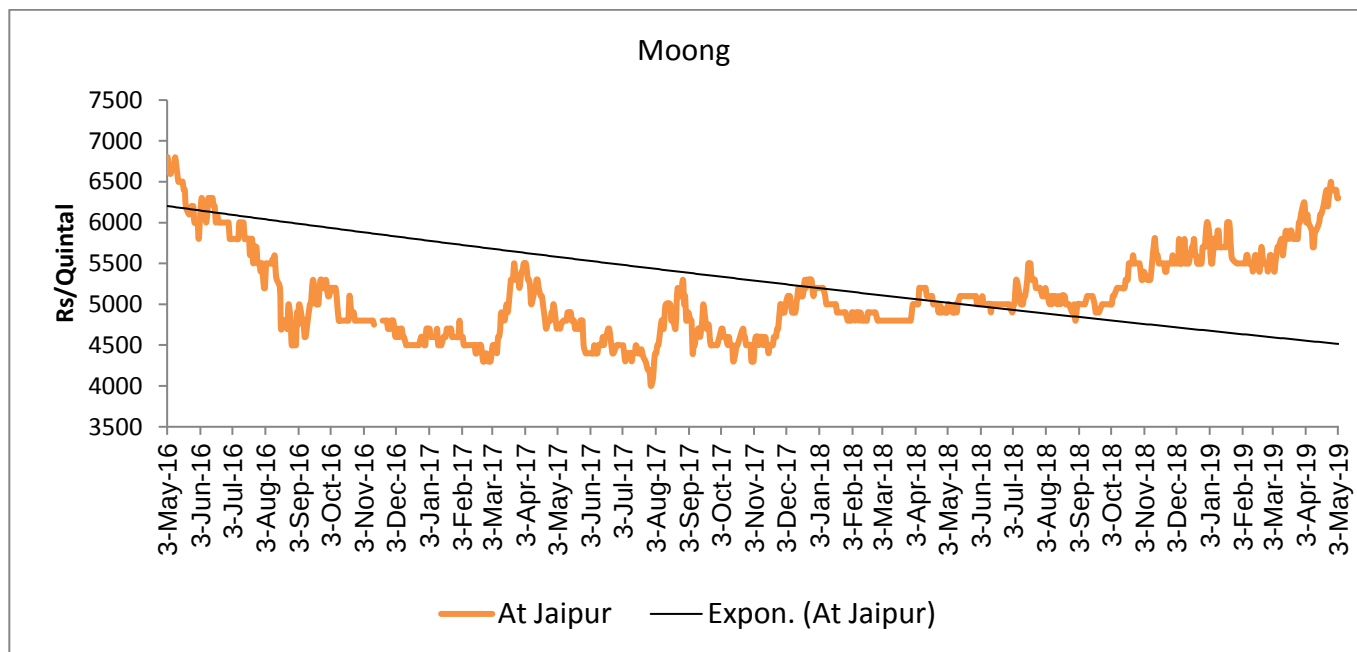

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):

Market Recap:

New crop of moong from UP and Bihar started hitting market now. Weak offtake at higher level and new arrival may pressurize moong market. Besides, import too is not possible, as there is no parity at current price. Moong in Jaipur market may touch 6100/6200 per qtl. this week. At this price stake holders should buy again..In the latest development, Nafed would start selling moong again in bulk volume. Procurement too is on in restricted way from rabi crop. New crop from Nimar,UP and Bihar has started hitting the market..

Market Outlook: Moong prices are likely to trade slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in May.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4200 to 4400 for this week.

Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4250 and second target 4200 with stop loss at 4400 level.

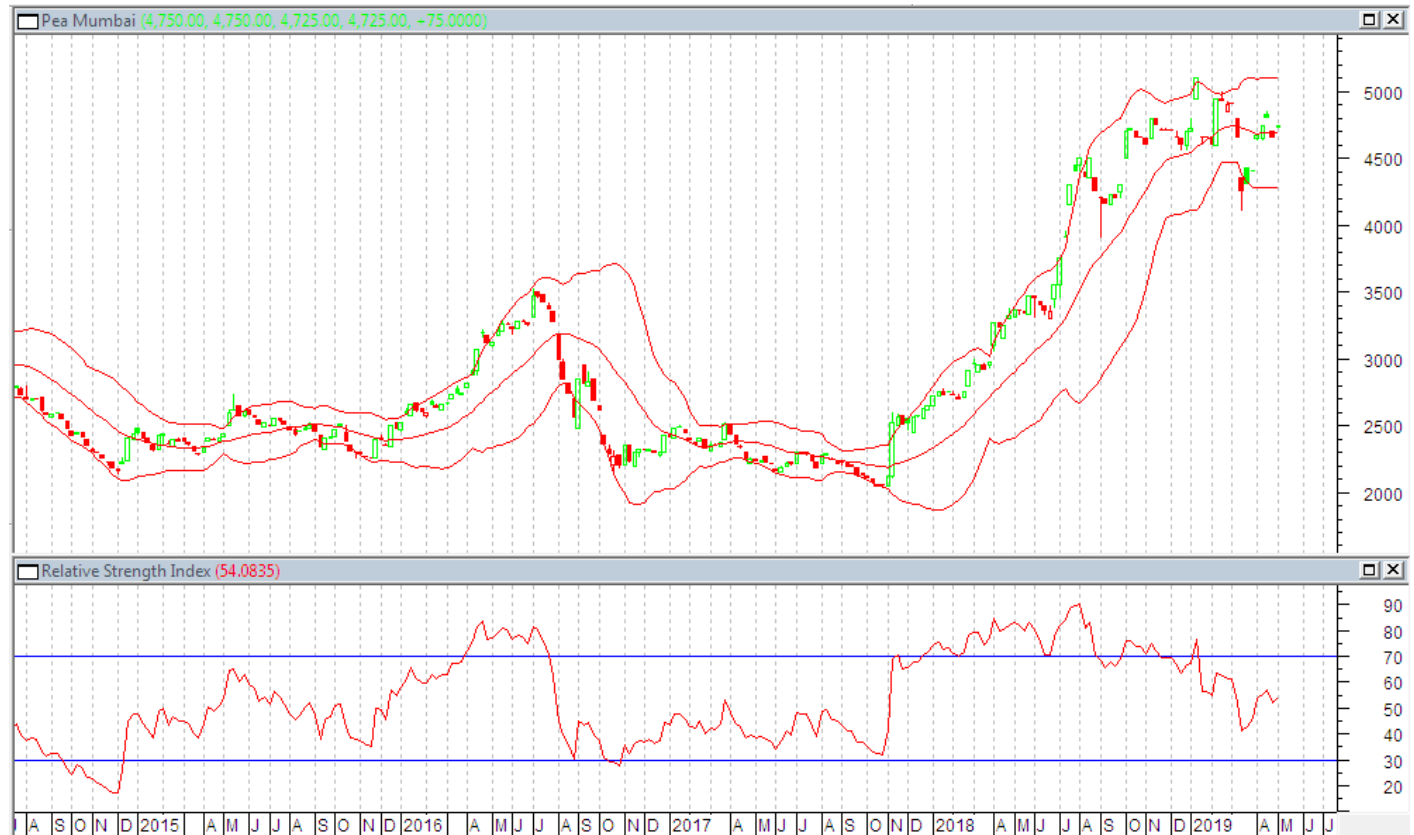

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4300	4450	4550

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana and import ceiling at 1.5 lakh tonne for the while year. It may be increased to 2lakh MT. Improved demand and decreasing imported stock at ports may restrict downward trend.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4500-4750 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4675 with the first target of 4750 and second target 4800 with stop loss at 4600 level.

Support & Resistance
