Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

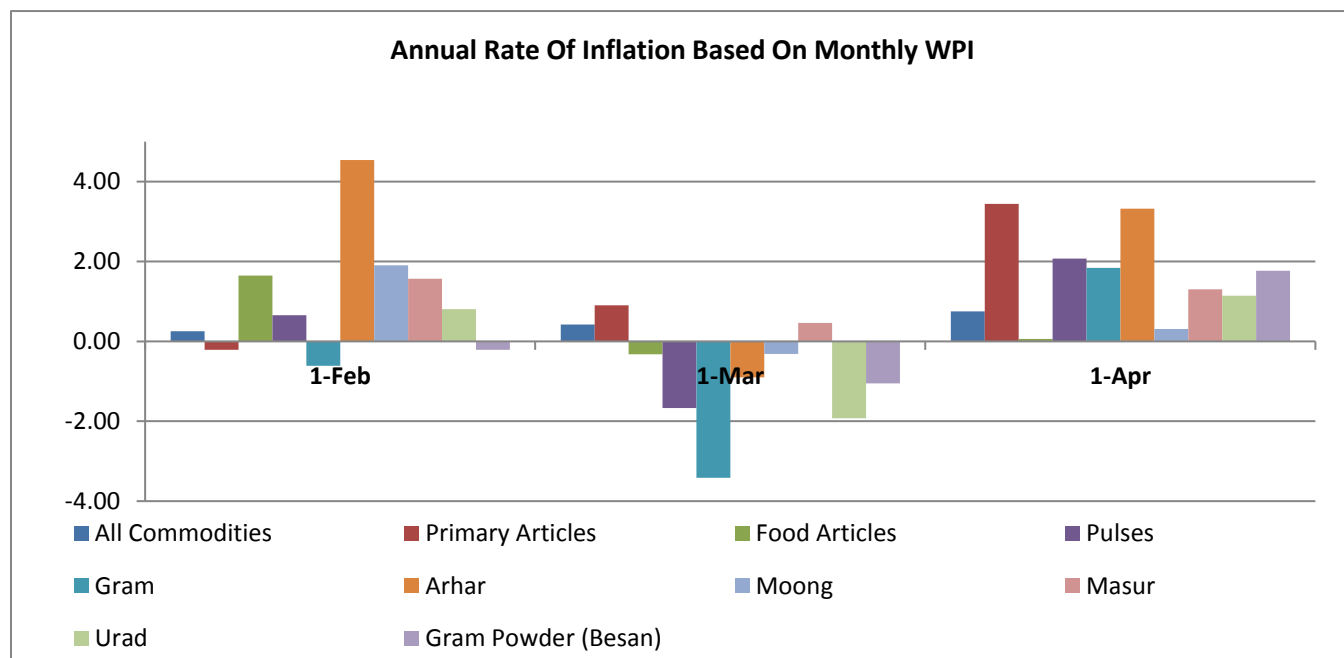

- **The govt may hike pulses import quota for millers due to tightening supply of tur in domestic market** and lower production in other origins too. Tur price in domestic market has crossed MSP level and is ruling at Rs5800-6100 per qtl., depending on quality of the crop. Govt may allow additional import of few lakh MT of tur alone. The current quota fixed at 2 lakh MT.
- **Market sources expect tur import to increase by 6 to 7 lakh MT, if govt. permits additional import** to control increasing price of tur. India imports tur from Malawi and Tanzania, Urad from Myanmar and yellow peas from Canada, Ukraine and Russia. Currently, India allows 2lakh MT tur import and 1.5 lakh MT each Urad, Moong and peas.
- **Monsoon is going to play an import role in influencing the prices of pulses and govt.'s strategy** of import. If monsoon is weak, possibility of higher import looms large.
- **Pressure was seen on cash moong market with the commencement of new arrival. However,** lower stock for quality crop and good demand at current level would not allow moong market to decrease beyond a certain level. Summer crop in Bihar, MP and UP is almost ready to be harvested now. However, demand from Papper industries and dal mills continues. It would help market to sustain at current level. Once the pressure from summer crop decreases, moong would trade firm again. It is being traded at Rs6500-6900 in Delhi market.
- **Active buying by dall mills and stockiest helped tur market to move up by Rs 100-150 per qtl to Rs 6150.** At this level buying got affected as old stock started surfacing in to market. Agriwatch expects correction of Rs 100-200 at this level. Stake holders should buy again as fundamental remains strong for tur. New crop is six months away and supply from overseas market would remain restricted. In Delhi market there is no parity from Maharashtra and Karnataka at Rs 6300-6400 per qtl. Stock at port is decreasing fast while processing of lemon tur has increased considerably. So market seems firm in the medium term. Stake holders should buy on correction and hold it for target of 6600-6800. Beyond that level govt may take action to increase supply and relax quantity norms/import duty.
- **There is no crop of urad due in the near futures. Demand for dal remains restricted while punters** are driving market up and down in their own interest. Urad price moved up by Rs300-400 in last five days. FAQ is being traded at Rs 5000-5050 while SQ is at Rs 6000-6100. At this level profit booking helped market to decrease by Rs100. However, market may move up once again as stock of urad in Mumbai market has already been exhausted while there is no parity from south India to North India at current price. As there is quantity restriction on urad import, supply side is expected to be lower that may help market to move up once again. Agriwatch expects demand –supply gap to widen further. It would push urad price up by Rs200-300 more from current level.
- **Correction in moong cash market is temporary and it is bound to move up again. Millers have covered** their immediate need and so buying at higher level got affected. Besides, stockist released old stock taking advantage of higher price. Buyers in retail market too turned wary to continue purchase at higher level. However, arrival from M>P> line has decreased while there is no supply of new moong from Kanpur line. Yield is lower by 20% in UP this year. Besides, continuous rains and storms in MP, UP and Rajasthan have affected crop and crop quality in these states. As crop is at maturity stage, rains and storm may further affect crop. Arrival from MP and Jharkhand is expected from mid June. So, moong may move further up by 300-400 in coming week. As there is no parity from overseas market, any major dip in cash moong market is unlikely despite stock in central pool. As price is higher, area coverage in kharif season may increase. In Jaipur market moong would continue to trade at Rs5900-6600 in June. There is no parity for moong import as Myanmar is offering moong at \$830 per MT.
- **As per latest update, lower imports has led to increase in prices of lentil by Rs 50 per quintal** at ports. Lentil vessel is being quoted at Rs 4100-4200 per quintal and container is being quoted at Rs 4200-4250 per quintal. Furthermore arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices have increased by Rs 100-150 per quintal in previous week.

International Market:

- **Production of Chickpeas in Canada is expected to decrease by 58.19 % to 1.30 lakh MT** in 2019-20, against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. Even total supply is expected to decrease by 0.57% from 3.50 to 3.48 lakh MT due to higher expected export in 2019-20. Export has been pegged at 1 lakh tonne, up by 0.10 lakh MT from 2018-19. Carryout is likely to decrease from 1.95 lakh Mt to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 500 to 530 per MT in 2019-20.
- **Production of lentil in Canada is expected to increase by 0.38 % to 21 lakh MT in 2019-20**, against 20.92 lakh tonne in 2018-19. Yield for the year has been pegged slightly up by 5% to 1.47 MT per ha against 1.4 MT /ha last year. However, total supply is expected to decrease by 2.01 % from 29.80 to 29.20 lakh MT due to 4.92% lower production pegged for 2019-20. Export has been pegged 1 lakh MT higher at 18 lakh tonne in 2019-20. Carryout is likely to decline from 8.0 lakh Mt to 6.35 lakh MT in 2019-20. Stock to use ratio is expected to decline from 37 to 28 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Adverse weather condition at the point of crop growth stage in Myanmar has affected Tur and urad crop**. Despite good area coverage this year, production is likely to decline by 15 to 20 percent. Lower crop in India this year and weak prospects in Myanmar may push tur market further up in May. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year. Myanmar is offering new tur at \$770 in forward deal basis Indian ports. Old crop is being offered at \$660 per MT.
- **As per USDA pre sowing intention report, dry pea area is expected to increase by 3% to 8.81 lakh acres** this year. Area may increase in Idaho, Montana, South Dakota, and Washington from last year. However, it may decline in Nebraska and North Dakota.
- **As per USDA report lentil area in US declined by 29 % from last year to 5.55 lakh acres in 2019**. Planted area is expected to decline in Montana and North Dakota while in Idaho and Washington it is expected to remain unchanged. If materialized, it will be the lowest area coverage since 2015.
- **As per the latest USDA seeding intention, expected area coverage under chickpea in US may decline** by 40% to 5.19 lakh acres. Out of this, small chickpeas area may be at 1.37 lakh acres large chickpea at 3.82 lakh acres. It would be the lowest since 2016.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand** produced in 2017-18. Fava bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **As per statistics Canada land in pulses and specialty crops may decline in 2019-20 if farmer's stick** to their seeding intentions. They intend to plant 8.82 million acres of pulses and special crops, down from 8.98 million last year and below the recent five-year average of 9.52 million acres. The only crops showing an increase over last year are peas, which could climb from 3.615 to 4.035 million acres.

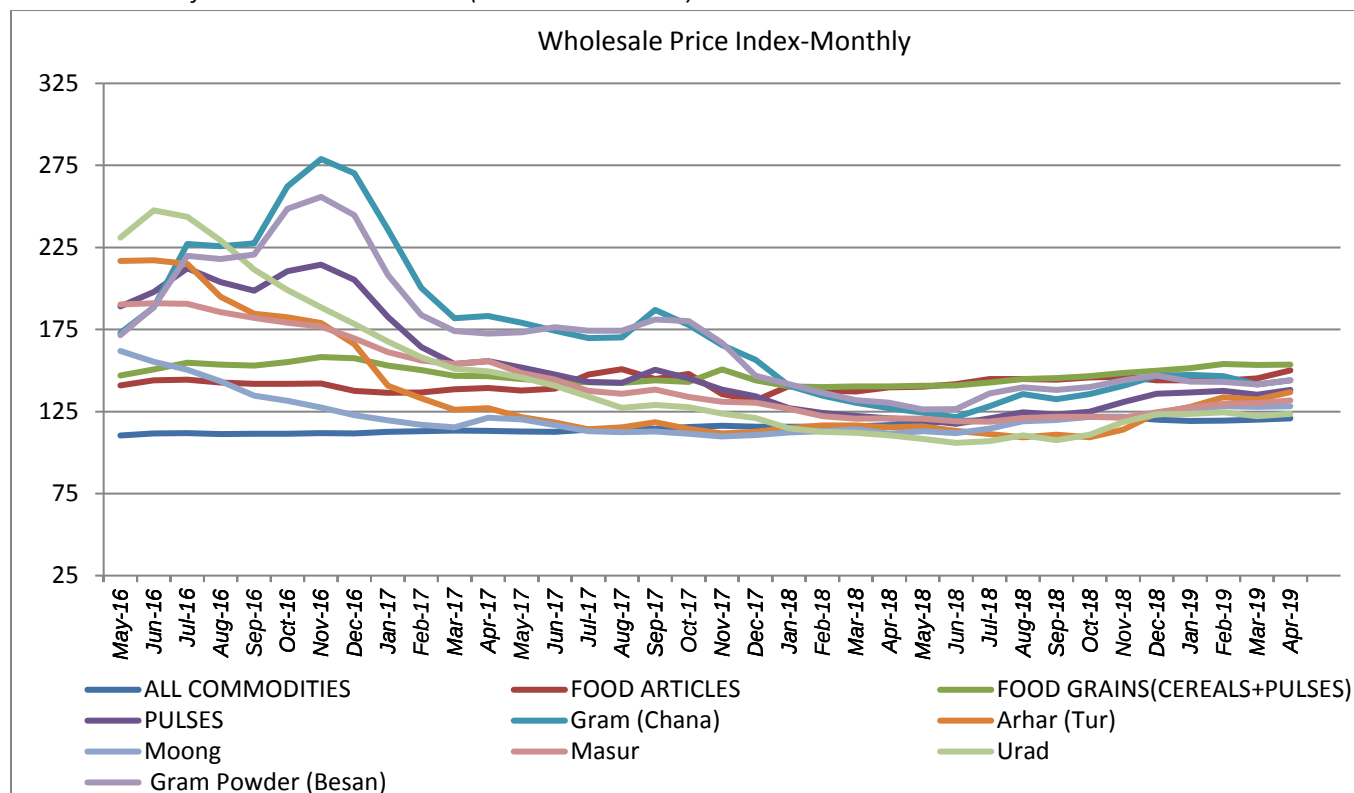

Weekly Outlook: -Pulses are likely to trade steady to slightly weak in this week.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 2.8 point from 135.3 in Mar to 138.1 in Apr-2019

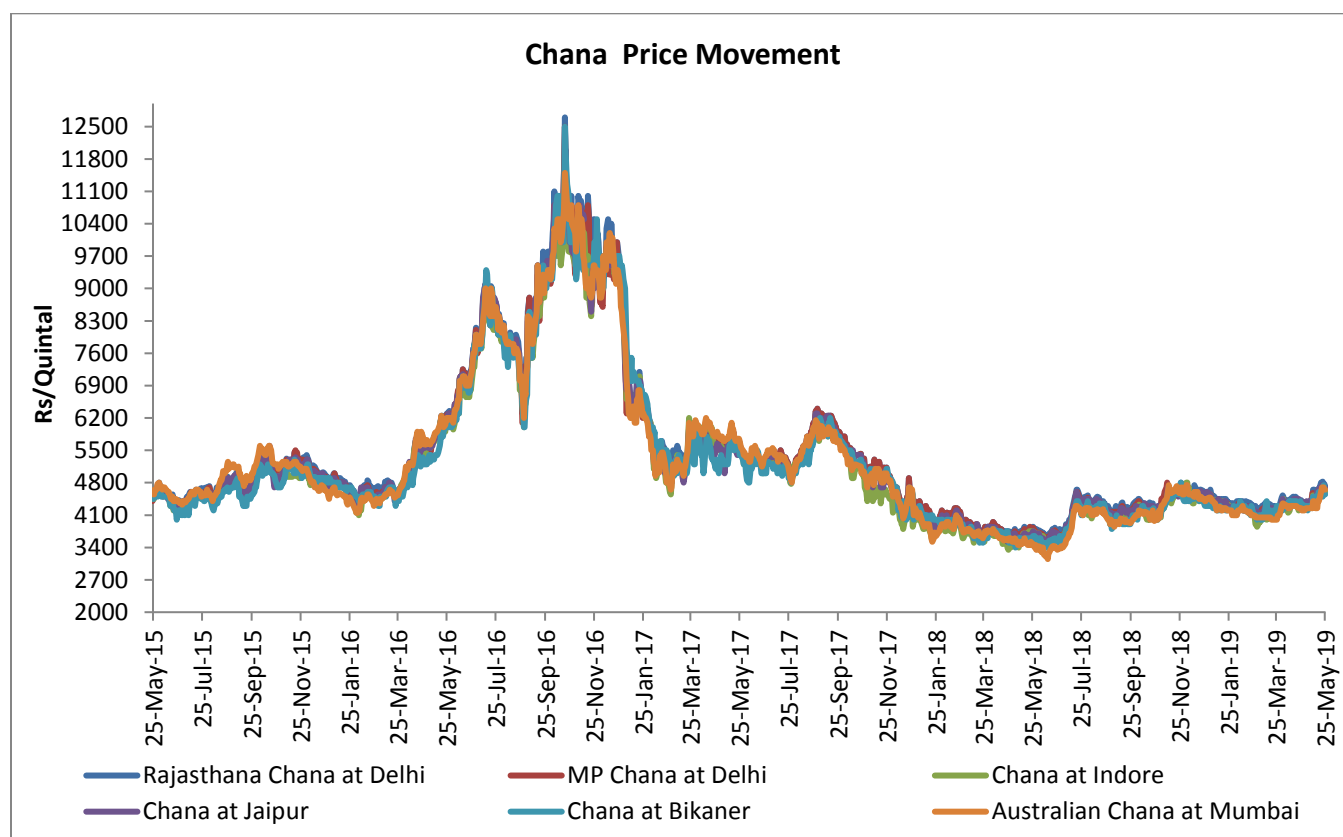

Pulses-Wise Scenario:

Chana

Current Scenario:

Cash chana market could not sustain its upward momentum taking clue from weak futures and restricted buying by millers at higher level despite lower arrivals in markets and increased pace of procurement in major producing states. Chana in Delhi market decreased by Rs100 at Rs 4650 after touching at Rs4800 last week. Even dal and Besan too moved up and down proportionally with chana. Supply from Bikaner line in Delhi has decreased considerably this week as there is no parity at this price. Buyers from Kanpur are engaged in buying from MP right now. MNC's have already accumulated stock at lower level. So, cash market is likely to trade steady to slightly firm. However, higher stock with Nafed and Cold would restrict chana cash market to a certain extent. In monsoon season demand for chana decreases and it may cap upward momentum. In June market is expected to trade in the range of Rs4600 to Rs 4850. Stake holders should release chana at this level.

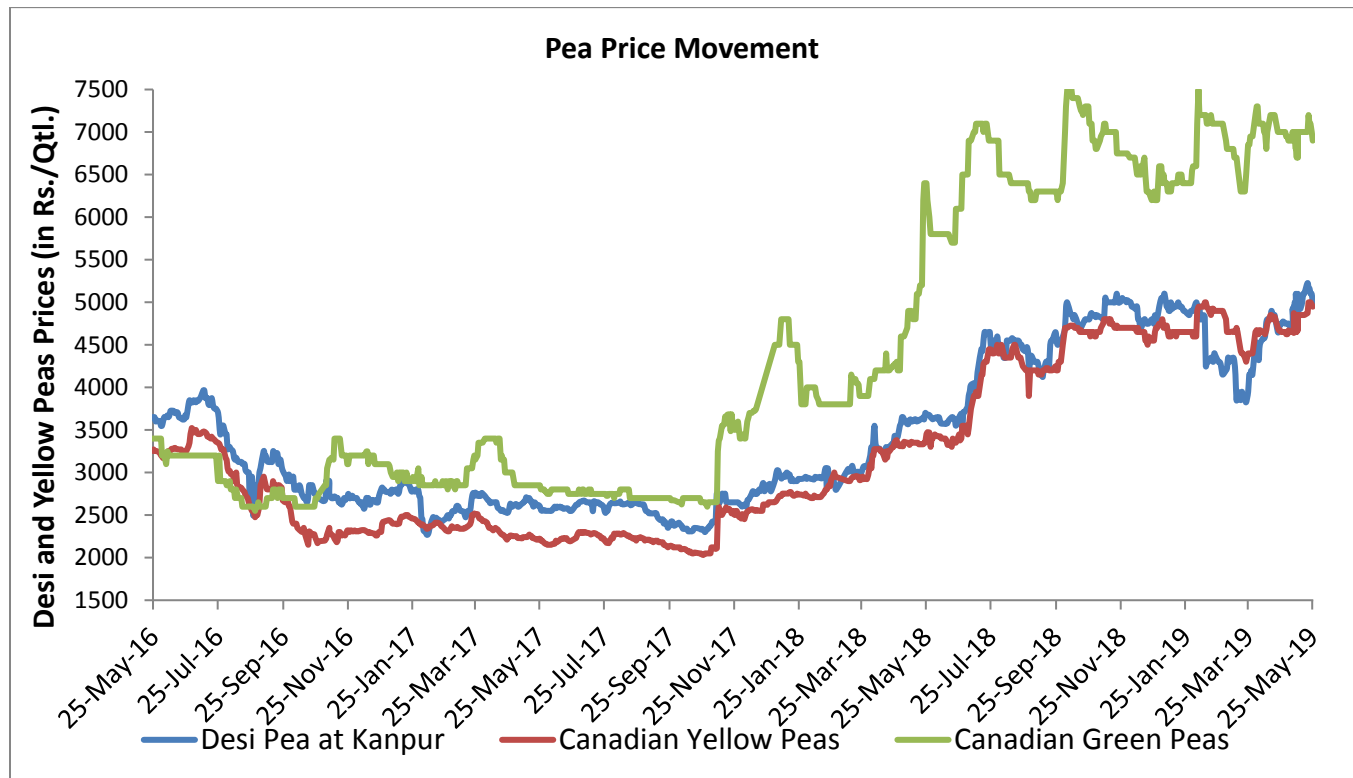

All India average price for Chana traded up by 2.94 % to Rs 4690. Australian chana price too traded up by 6.35 % at Rs 4650 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week .

Peas (Matar):

Market Recap:

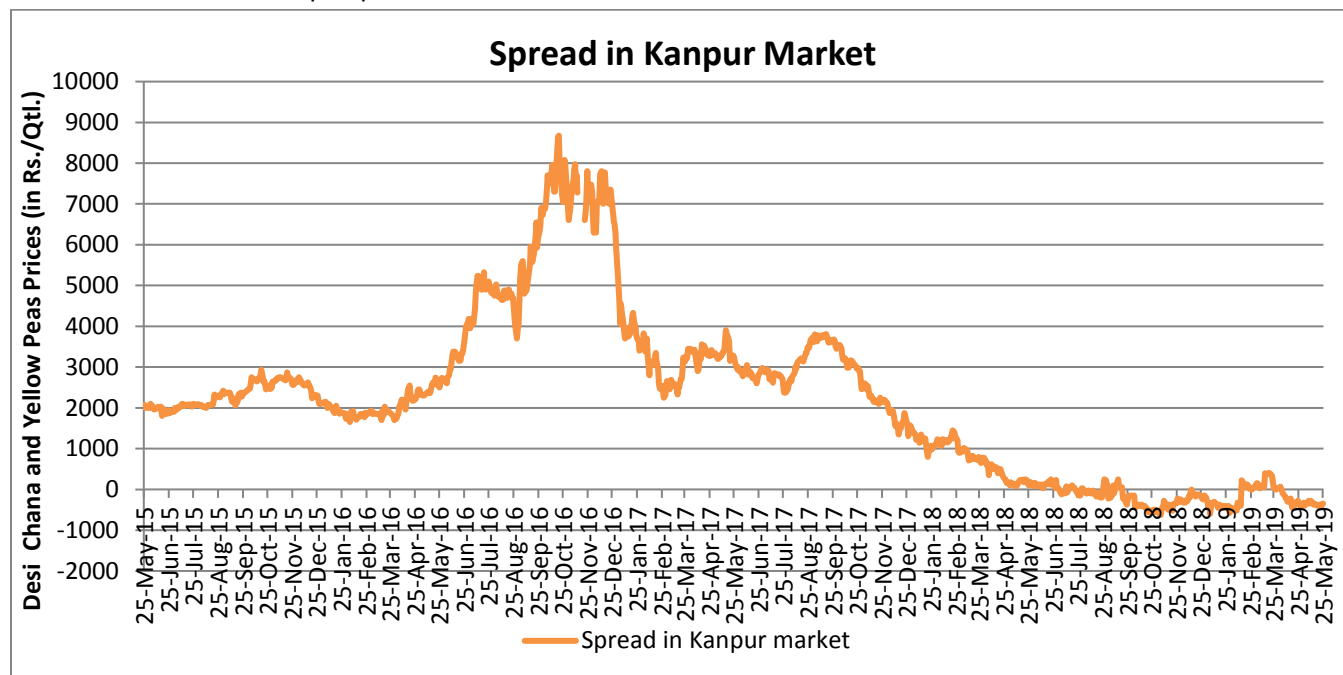

Pea market traded weak taking clue from weak chana in cash market. Unexpected spurt in chana price and import quota restriction at 1.5 lakh tonne for the whole year have helped market to recover. However, at higher level demand got affected. If chana trades firm again, pea may trade firm also as supply side is expected to be tight in coming weeks. Stockists have started holding stock. Govt. may increase import quota from 1.5 lakh MT to 2 lakh MT in coming months. Earlier market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4900-4950, while in Kanpur market it is being traded at Rs 5000-5100 per qtl. As chana price has started decreasing, pea too may trade weak in the short term. As, there would be shortage of imported crop, price is bound to move up taking clue from other pulses in the second half of the year. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 4900-4950 in Kanpur market, almost Rs 100 down from previous week due to weak chana market. However, decreasing imported stock may support pea price in coming weeks. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on slight decline.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 350-450 in June on relative movement in Chana and pea price.

Market Outlook: Outlook remains steady to weak this week.

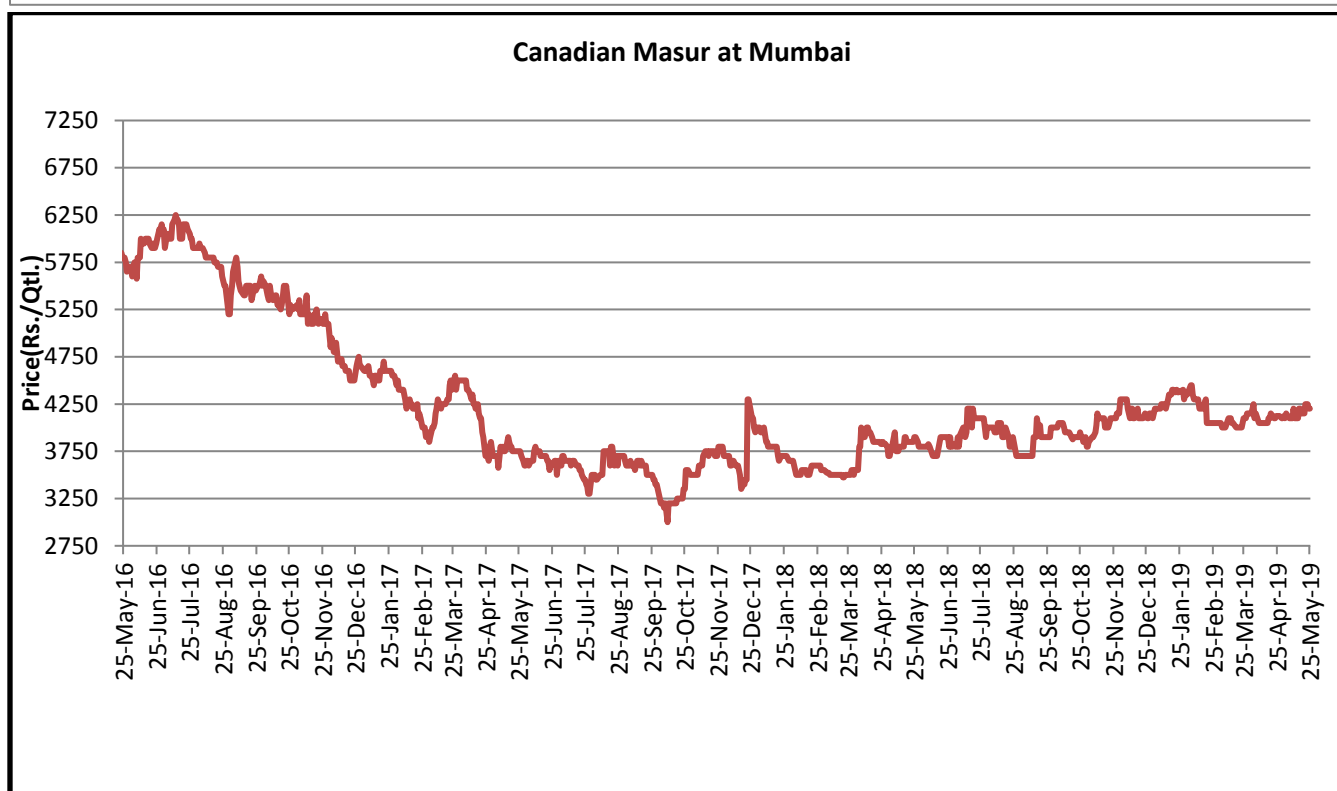

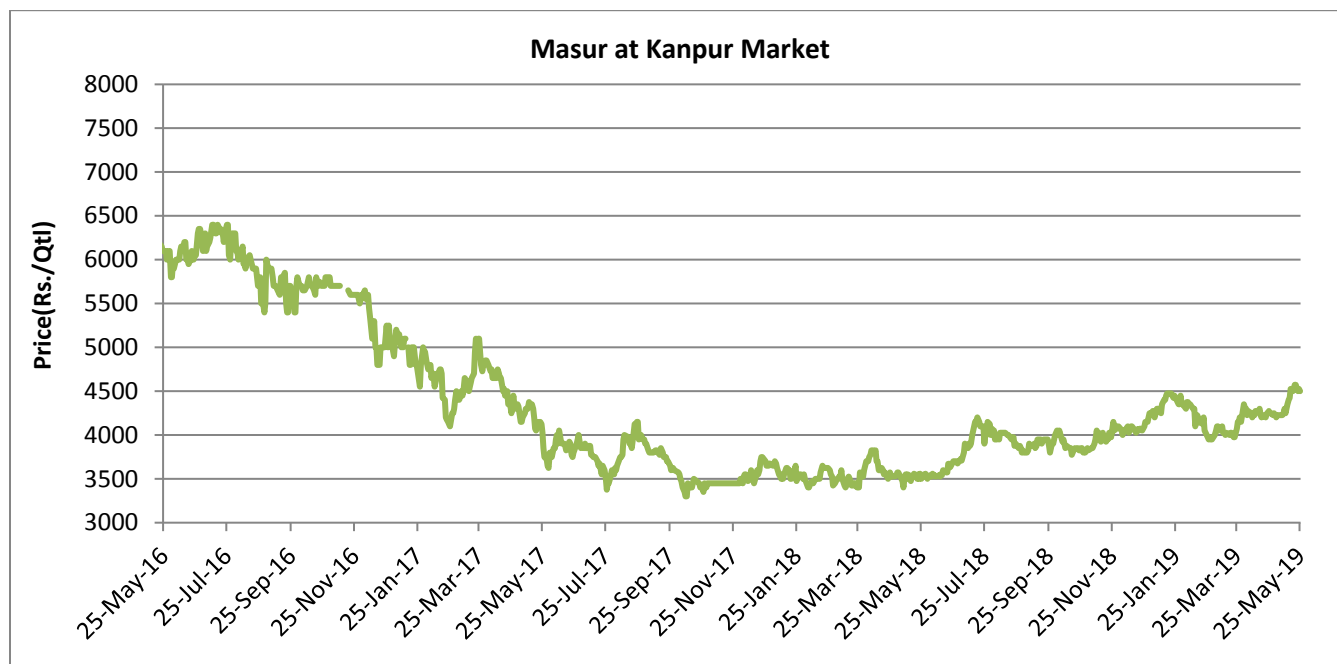

Lentils (Masoor):

Market Recap:

As per latest update, lower imports has led to increase in prices of lentil by Rs 100 per quintal at ports. Lentil vessel is being quoted at Rs 4200-4250 per quintal and container is being quoted at Rs 4250-4300 per quintal. Further more arrivals in domestic market is also low. Lentil stockiest are increasing their buying at a steady pace. All these factors are providing support to lentil market and as a result lentil prices may increase by Rs 100-150 per quintal in coming week. Lentil arrivals are not creating much pressure on prices. This would provide support to domestic market prices. However, higher stock in central pool may cap upward momentum to a certain extent. As prices of other pulses have started improving, lentil too may trade up again. Improvement in demand from Nepal and B'desh, may push lentil price up. Cash market may trade in the range of Rs4350-4550 this week too.

Current Scenario:

In the 4th week of May-2019, average price in key market like Kanpur was up by 2.0% to Rs 4500 per qtl. Prices are likely to trade up in June to a certain extent. Demand from neighboring countries is awaited. Masur may get support from firmness in other pulses too in coming weeks.

Market Outlook: Prices are likely to notice firm movement due to procurement drive, virtual stop of selling by Nafed and decreasing arrival amid lower import volume.

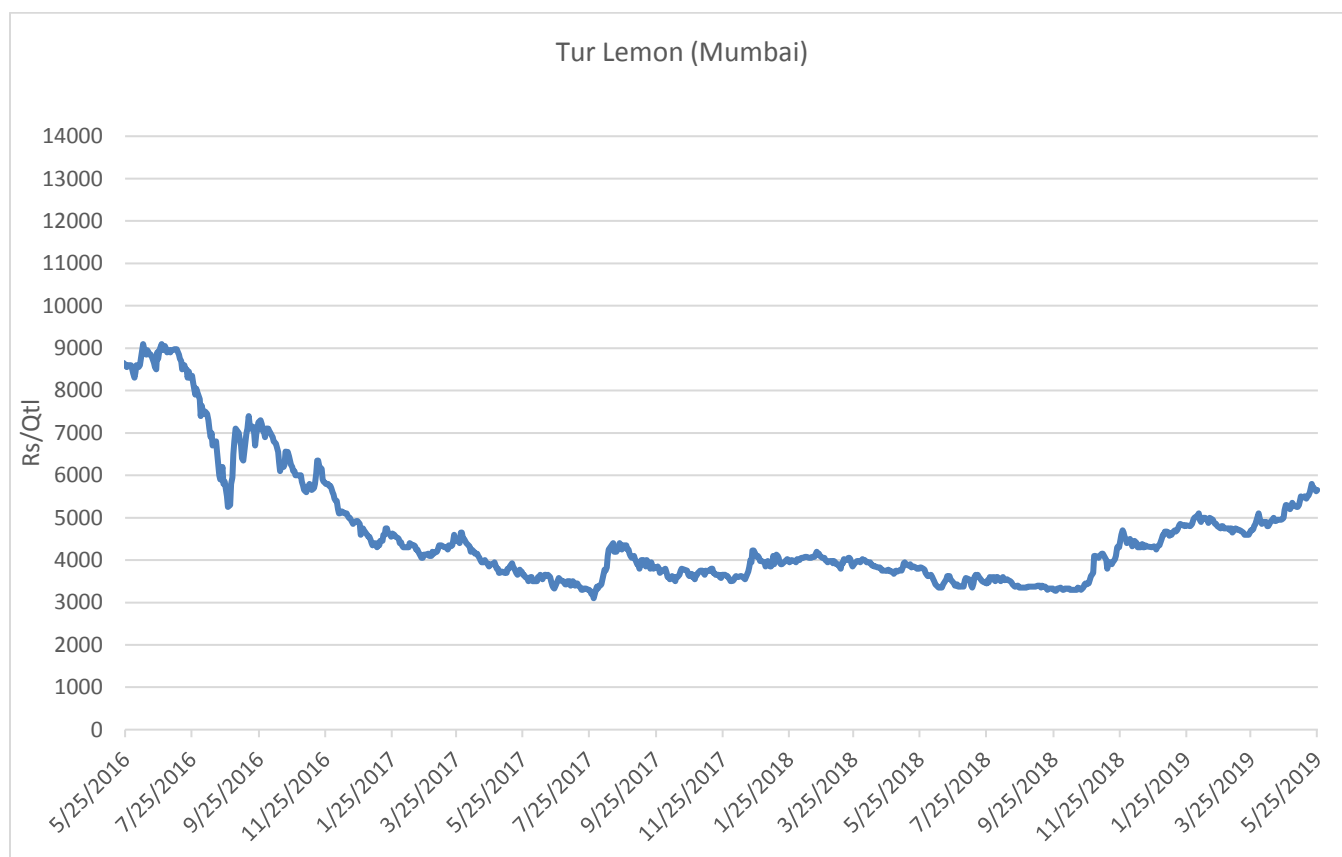

Pigeon Pea (Tur/Toor):

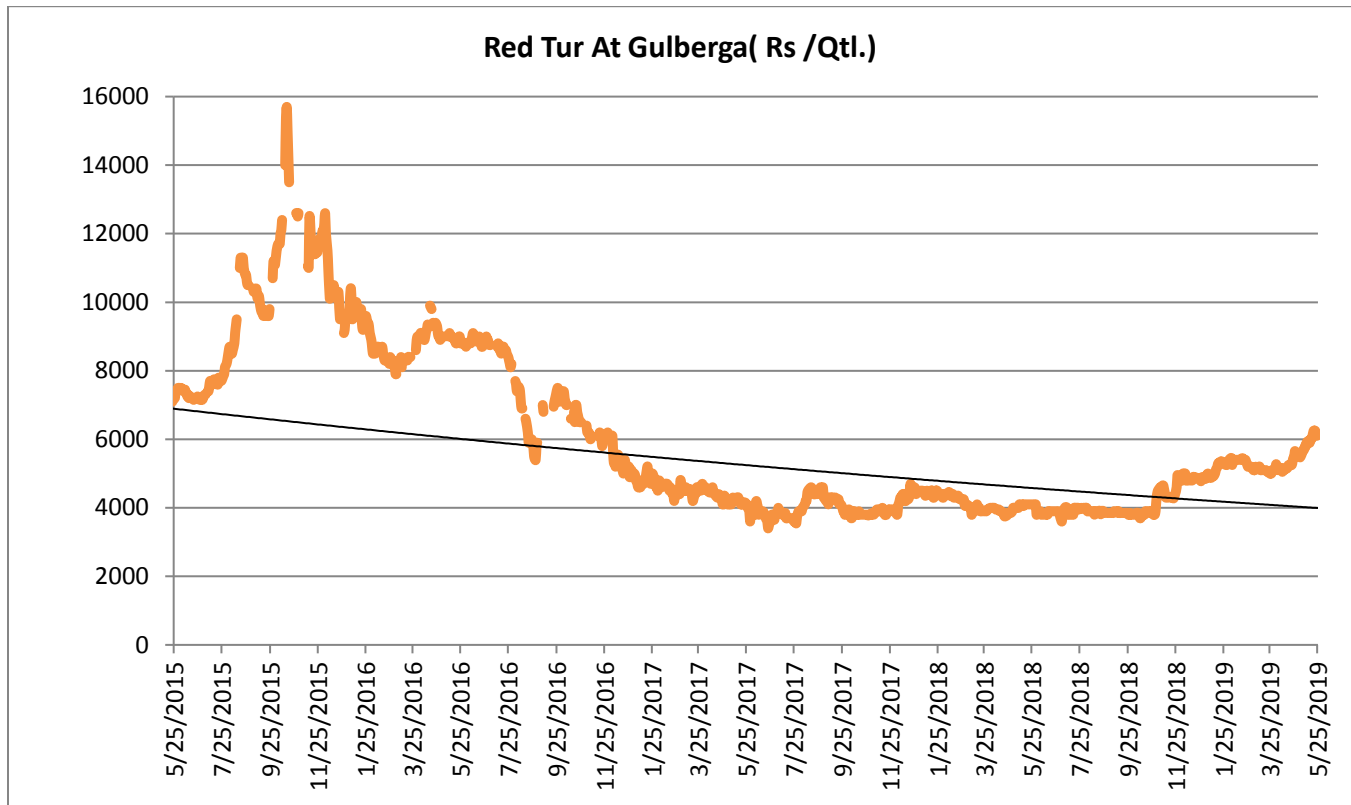

Market Recap:

Active buying by dall mills and stockiest helped tur market to move up by Rs 100-150 per qtl to Rs 6150. At this level buying got affected as old stock started surfacing in to market. Agriwatch expects correction of Rs 100-200 at this level. Stake holders should buy again as fundamental remains strong for tur. New crop is sixth months away and supply from overseas market would remain restricted. In Delhi market there is no parity from Maharashtra and Karnataka at Rs 6300-6400 per qtl. Stock at port is decreasing fast while processing of lemon tur has increased considerably. So market seems firm in the medium term. Stake holders should buy on correction and hold it for target of 6600-6800. Beyond that level govt may take action to increase supply and relax quantity norms/import duty.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak due to weak demand at higher level and gossip of higher import quota in coming months.. Buying by private trade too has slowed down. However, overall trend remains firm. Crop in Myanmar too is 20% lower this year. Stake holders should buy on down ward correction,.

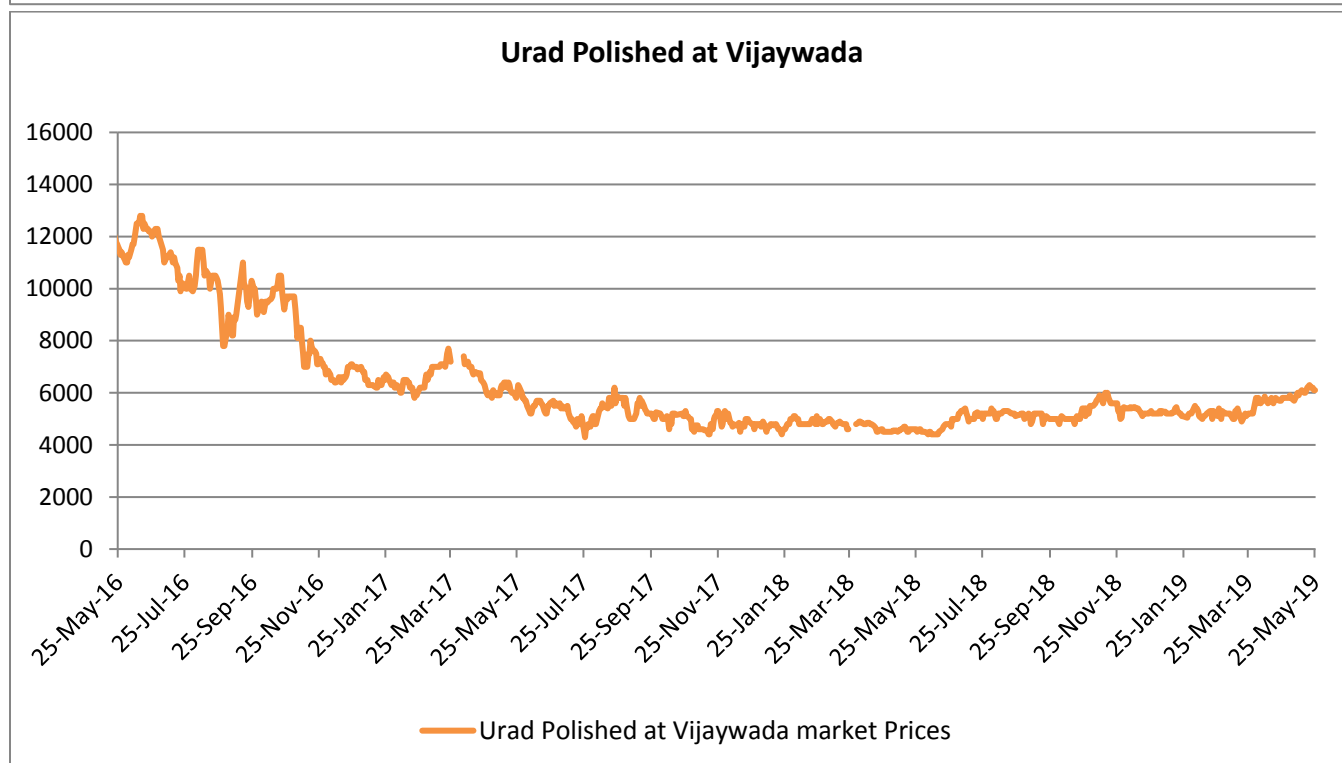

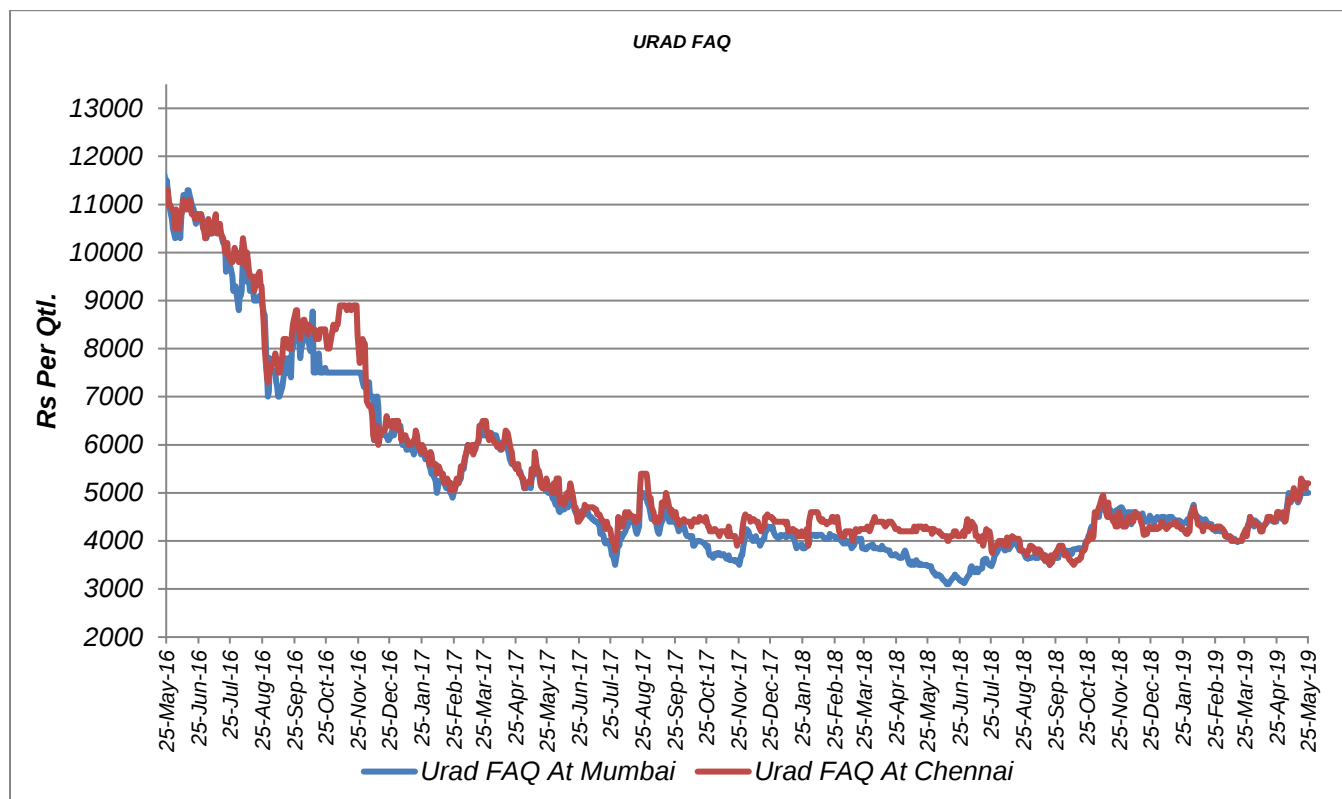

Market Outlook: Tur market may trade weak by Rs150-200 more as buying remains restricted at higher level.

Black Matpe (Urad):

Urad cash market traded firm taking clue of diminished possibility of import till July and active buying by mills. Besides, stockists too have started holding stocks in anticipation of higher price. Demand for quality urad too has improved amid restricted release by stockiest. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level. No big crop is due till Sep. Before this, green urad from MP and UP would hit market but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move up by Rs 200 to 250 more from current level. Currently it is being traded at Rs 4850 to 4950 in Mumbai market. After a slight downward correction, urad may move further up by Rs 100-200. Stake holders should buy on dip and hold stock.

Current Market Dynamics & Outlook:

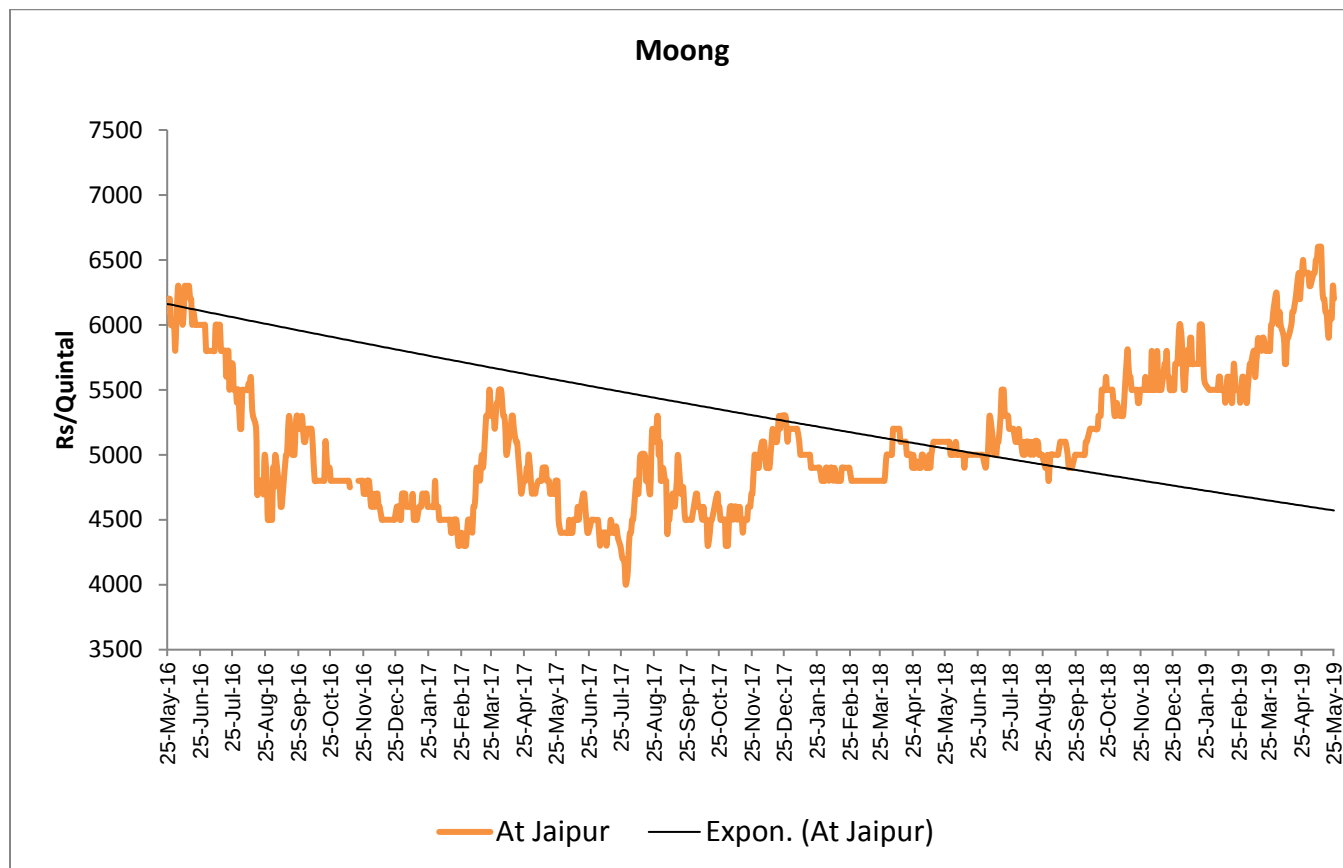

Urad FAQ at Mumbai (Rs Rs 5000-5050 per Qtl.) and Chennai (Rs.5100-5150 Qtl.) noticed firm tone. It traded up in Vijaywada too. Improvement might be seen in Urad market once again after slight correction and opening up of weather. Demand is likely to increase with increasing temperature. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):
Market Recap:

Pressure was seen on cash moong market with the commencement of new arrival. However, lower stock for quality crop and good demand at current level would not allow moong market to decrease beyond a certain level. Summer crop in Bihar, MP and UP is almost ready to be harvested now. However, demand from Papper industries and dal mills continues. It would help market to sustain at current level. Once the pressure from summer crop decreases, moong would trade firm again. It is being traded at Rs6500-6900 in Delhi market

Market Outlook: Moong prices are likely to trade slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in June.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4600 to 4850 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4600 with the first target of 4750 and second target 4850 with stop loss at 4500 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4400	4500	4650	4850	4950

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week taking clue from firm chana and import ceiling at 1.5 lakh tonne for the while year. It may be increased to 2 lakh MT. Improved demand and decreasing imported stock at ports may push market up.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4750-5100 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4900 with the first target of 5100 and second target 5150 with stop loss at 4800 level.

Support & Resistance				
S2	S1	PCP	R1	R2
