Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **The review week witnessed so many new developments in pulses market.** Govt. increased tur import quota from 2 lakh MT to 4 lakh MT. It decided to sell 2 lakh MT tur from buffer stock and import 1.75 lakh MT through G2G basis. Besides, import quantity for millers / traders were allocated. All these actions were just to control tur cash market price. Even moong and urad quota too has been allocated and importers have to import it till Oct-2019. Decision on pea import is still on hold.
- **Market experts say that tur crop in Myanmar is only 55 to 60 percent this year, so prices are going up in Myanmar** and it has increased by \$25 to 790-95 per MT basis Indian port. Arrival from Karnataka and Maharashtra has slowed down and stock is decreasing now. There is no parity for import at current price. So tur price is expected to go up again. Even import tur would take one and a half month to hit Indian ports. So, buying at downward correction seems good under emerging scenario.
- **As monsoon has delayed by 10 days, kharif planting is yet to pick up and if it gets delayed by one more week, it would impact overall sowing and normal yield too.** As there is ample stock of pulses available in certain pool, any unexpected jump in the pulses market is unlikely. Govt has a close eye on pulses market movement and if prices firm up again, govt would take all possible action to curb pulses prices.
- **In major markets of producing regions like Raj and MP there is no pressure of arrivals.** Even in south Indian markets chana stockiest are unwilling to sell at decreased price. Demand for dal is weak right now. So mills have restricted buying. Weak futures and limited buying have pressurized chana market. In Delhi market chana decreased to Rs4500. However, due to disparity of import at higher duty amid decreasing arrivals may restrict downward trend in chana market in coming weeks. Nafed would not sell chana at this point of time in bulk volume. So, buying around Rs4450-4475 seems good for stake holders.
- **Moong market is likely to move down by Rs200-300 from current level in Delhi market as new moong from Kanpur line has started hitting the market.** Before this moong from MP line was coming into markets. Supply from Jahanabad too is expected from this week. However, there is not much moong available and it may start moving up again by June end. Old stock of Rajasthan line is almost exhausted now. So, stake holders should buy at Rs5800-5900 again and hold it until new moong from kharif season hits again.
- **As urad price is ruling higher right now, supply is coming down swiftly. So dal millers are buying from local stockiest.** SQ in Chennai market is being traded at Rs 6000-6050. Arrival of green urad from north India is 50 % lower this year due to poor yield. Besides, there is no new crop before Sep. So Agriwatch expects market to move up again by Rs 200-300. There is not much stock in govt.'s custody, while import cap at 1.5 lakh MT remains intact.
- **Govt. has decided to increase import quota from 2 to 4 lakh MT to control prices of tur.** License for first two lakh MT import is likely to be issued next week, while another two lakh MT might take time for two to three months and may hit Indian market by Sep end / Oct. Besides this, govt would import 1.75 lakh MT through G2G basis and would sell 2 lakh MT from buffer stock to contain price of tur. At present govt has 11.53 lakh MT pulses in buffer while Nafed has 27.32 lakh MT pulses. So, there is no panic right now. Apart from this govt. has close eye on stockiest activities. All these developments would not allow market to move beyond a certain limit in coming weeks.
- **Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers.** As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil bulki price decreased by Rs 50 to Rs 75 per qtl. to Rs 4350-4400. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to move up again. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for two weeks. So, masur may move up again from current level.
- **Trading of pea got struck in the local market with rumours that govt may open import soon.** However, it is obvious that govt is not going to allow import without quantitative restriction. Some importers have struck some deals of peas

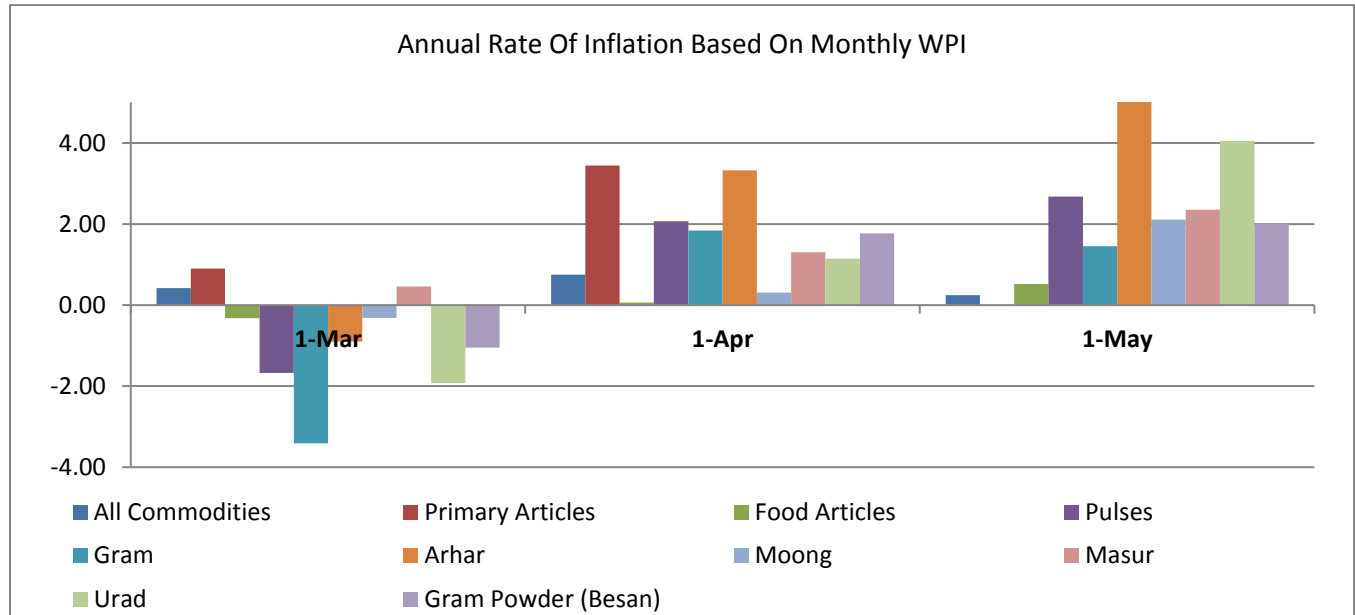

but due to technical glitches it was cancelled. Cash market is almost steady and is expected to trade range bound in coming weeks. DGFT will review situation in Aug-Sept regarding import quantity.

International Market:

- **Production of Chickpeas in Canada is expected to decrease by 58.19 % to 1.30 lakh MT** in 2019-20, against 3.11 lakh tonne in 2018-19. Yield for the year has been pegged slightly down at 1.76 MT per ha against 1.77 MT /ha last year. Even total supply is expected to decrease by 0.57% from 3.50 to 3.48 lakh MT due to higher expected export in 2019-20. Export has been pegged at 1 lakh tonne, up by 0.10 lakh MT from 2018-19. Carryout is likely to decrease from 1.95 lakh MT to 1.8 lakh MT in 2019-20. Price is likely to hover in the range of \$ 500 to 530 per MT in 2019-20.
- **Production of lentil in Canada is expected to increase by 0.38 % to 21 lakh MT in 2019-20**, against 20.92 lakh tonne in 2018-19. Yield for the year has been pegged slightly up by 5% to 1.47 MT per ha against 1.4 MT /ha last year. However, total supply is expected to decrease by 2.01 % from 29.80 to 29.20 lakh MT due to 4.92% lower production pegged for 2019-20. Export has been pegged 1 lakh MT higher at 18 lakh tonne in 2019-20. Carryout is likely to decline from 8.0 lakh MT to 6.35 lakh MT in 2019-20. Stock to use ratio, is expected to decline from 37 to 28 % in 2019-20. Price is likely to hover in the range of \$ 390 to 420 per MT in 2019-20.
- **Pakistan's import of pulses declined to \$432.546 million in July-April, down by 2.3 percent**, official figure says. Fall in pulses import now stands at \$10.19 million in July-May 2018-19 from \$442.736 million in July-April 2017-18, Pakistan Bureau of Statistics shows. In term of quantity, pulses import surged by 30 percent or 183, 889 metric tons to 801,843 metric tons in July-April 2018-19 from 617,954 metric tons in July-April 2017-18. As per the latest update by Pakistan Bureau of Statistics, pulses import in Pakistan increased by 30% to 801,843 MT during July to April-2018-19 against 617,954 MT in July- April -2017-18. In April -2019 Pakistan imported 76,833 MT against 59,386 MT in April-2018. Pakistan's import increased by 29.38 % in April-2019.
- **Adverse weather condition during crop growth stage in Myanmar has affected Tur and urad crop.** Despite good area coverage this year, production is likely to decline by 15 to 20 percent. Lower crop in India this year and weak prospects in Myanmar may push tur market further up in May. Farmers in Africa too have planted lesser area this year. So, pulses market may find good support in 2nd half of the year. Myanmar is offering new tur at \$770 in forward deal basis Indian ports. Old crop is being offered at \$660 per MT.
- **As per USDA, pre-sowing intention report, dry pea area is expected to increase by 3% to 8.81 lakh acres** this year. Area may increase in Idaho, Montana, South Dakota, and Washington from last year. However, it may decline in Nebraska and North Dakota.
- **As per USDA report lentil area in US declined by 29 % from last year to 5.55 lakh acres in 2019.** Planted area is expected to decline in Montana and North Dakota while in Idaho and Washington it is expected to remain unchanged. If materialized, it will be the lowest area coverage since 2015.
- **As per the latest USDA seeding intention, expected area coverage under chickpea in US may decline** by 40% to 5.19 lakh acres. Out of this, small chickpeas area may be at 1.37 lakh acres, large chickpea at 3.82 lakh acres. It would be the lowest since 2016.
- **Chickpea production in Australia has been forecast at 330 thousand MT for 2018-19 against 1148 thousand** produced in 2017-18. Fava bean production too has been estimated at 214 thousand MT against 330 last year. Field pea production has been pegged at 194 thousand MT against 289 in 2017-18. Lentil production estimate too, has been pegged at 343 thousand MT against 485 thousand MT. However, Lupins production estimate has been pegged higher at 710 thousand MT for 2018-19. It was 631 last year.
- **As per statistics Canada land in pulses and specialty crops may decline in 2019-20 if farmers stick** to their seeding intentions. They intend to plant 8.82 million acres of pulses and special crops, down from 8.98 million last year and below the recent five-year average of 9.52 million acres. The only crops showing an increase over last year are peas, which could climb from 3.615 to 4.035 million acres.

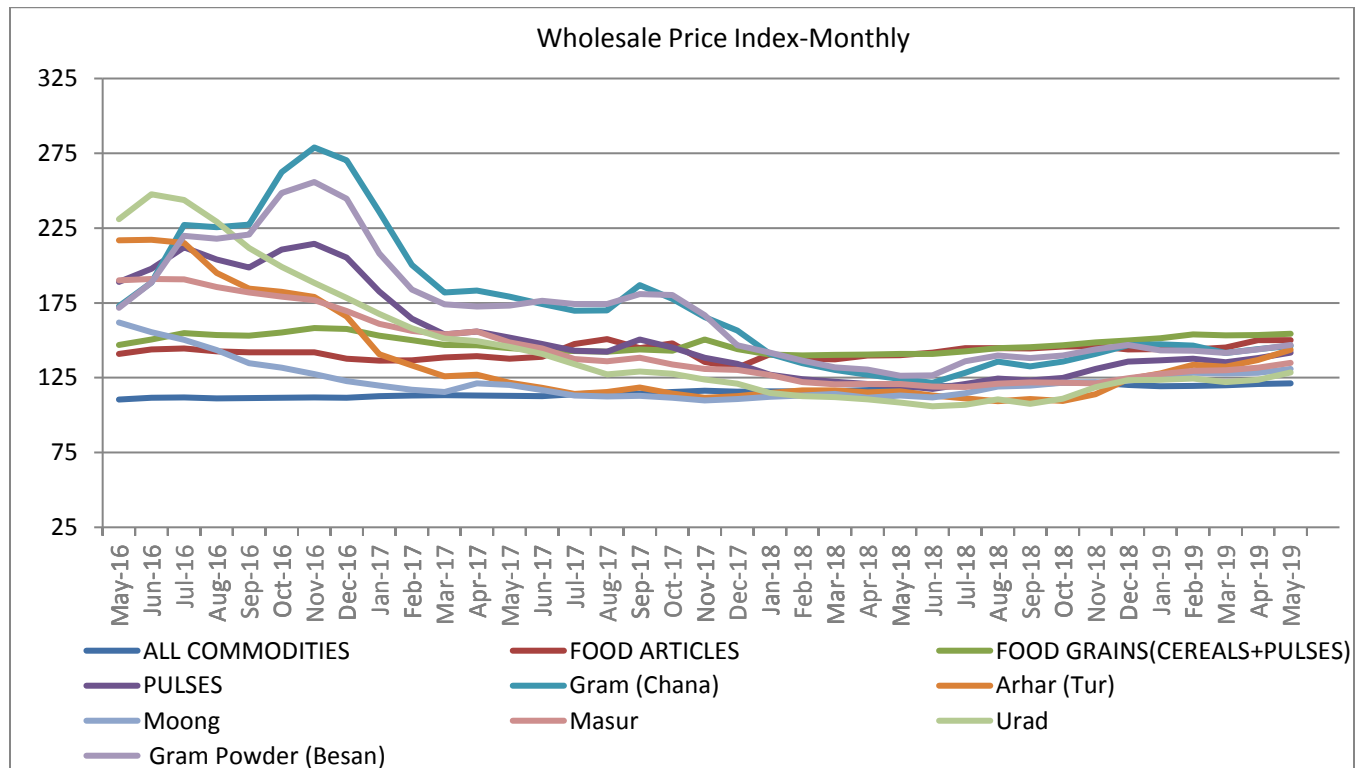

Weekly Outlook: -Pulses are likely to trade steady to slightly weak in this week.

Monthly Wholesale Price Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

Pressure on chana market continues as fear of sale from Nafed godowns looms large. Ample availability in central pool and govt's intention to control price and some steps regarding import of pulses have compelled stockiest to release their stock. Even futures have traded lower against all expectations. Actually, there is weak demand from retail end and buyers have restricted buying. Agriwatch expects chana market to move down by Rs 100-150 more and then it would stabilize. Any major jump is unlikely in the near term. Chana in Delhi market may trade in the range of Rs 4400-4600 this week. Stake holders should buy around 4300-4400 and hold it for 4650-4750 in July.

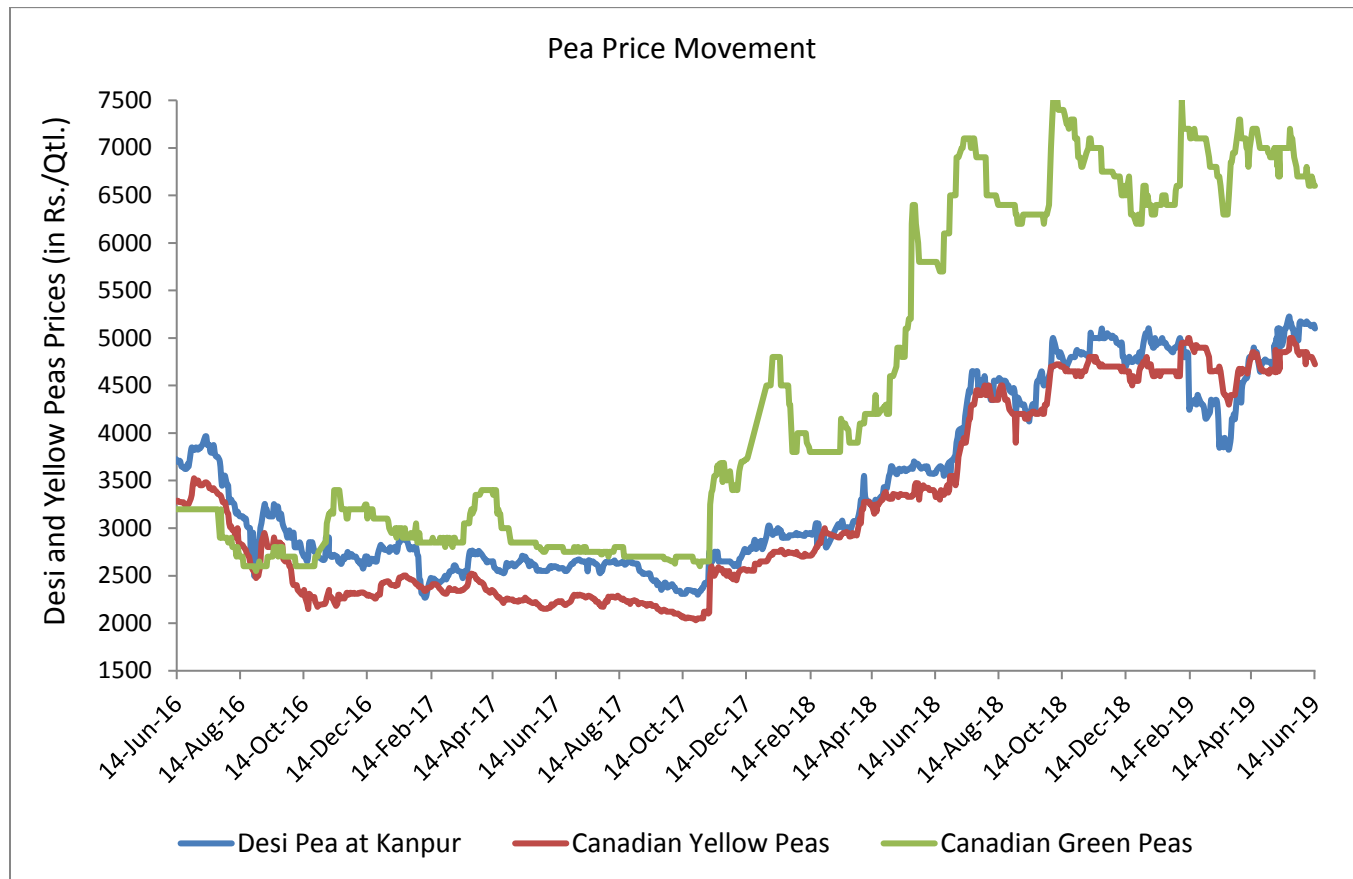

All India average price for Chana traded down by 1.46 % to Rs 4437. Australian chana price too traded down by 2.44 % at Rs 4390 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week too.

Peas (Matar):

Market Recap:

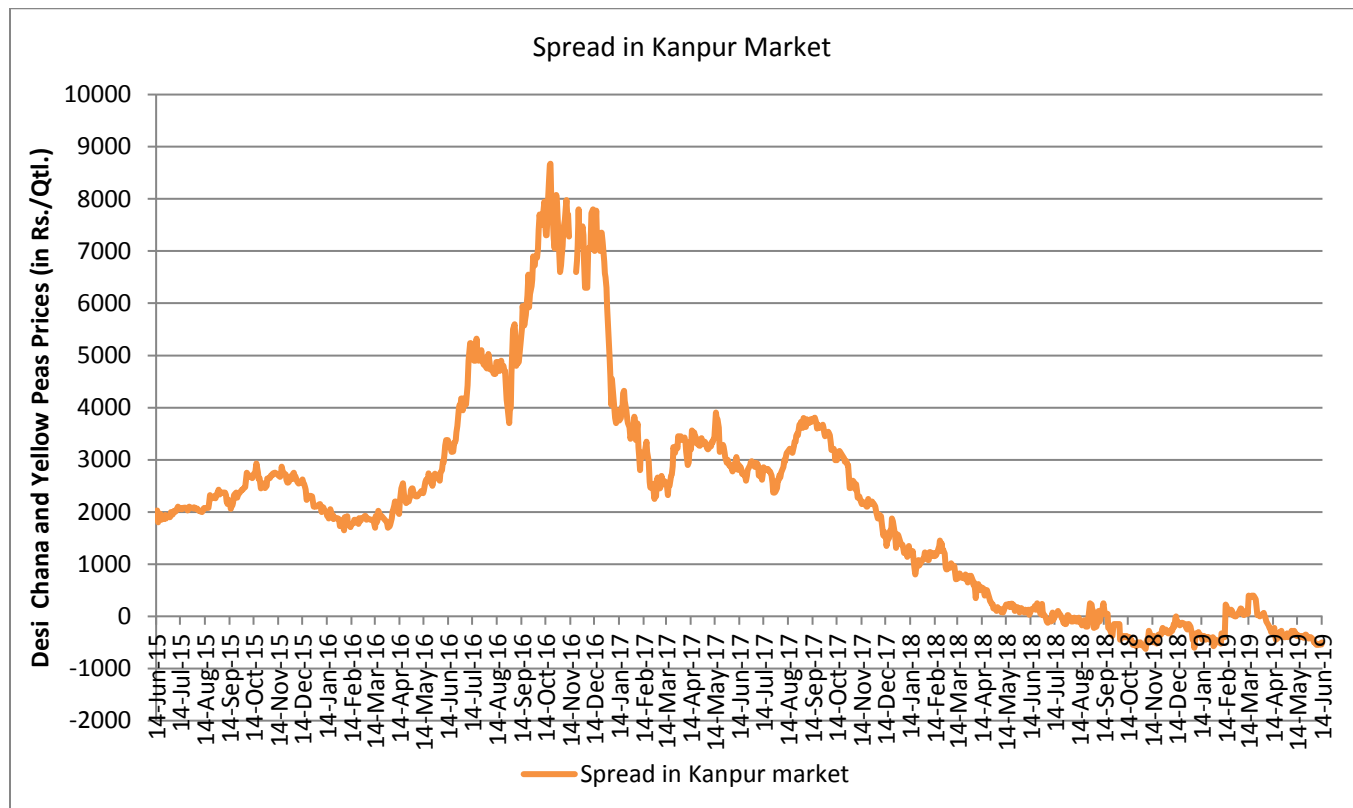

Pea market traded weak taking clue from weak chana in cash market and poor demand. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. However, with weakness in chana, pea may trade weak too despite tight supply side expected in coming weeks. Stockiest may prefer to release stock. Govt. may increase import quota to 2 lakh MT in coming months but not before aug/sep. Earlier, market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4750-4800, while in Kanpur market it is being traded at Rs 5050-5100 per qtl. As chana price has started decreasing, pea too may trade weak. As, there would be shortage of imported crop, price is bound to move up taking clue from other pulses in the second half of the year. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 5000-5025 in Kanpur market, almost Rs 50 down from previous week, due to decreased buying by bulk users and decreasing chana price. Decreasing imported stock may support pea price further by Rs. 200 more but not before a downward correction of Rs100 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100 decline.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 400-550 in June on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

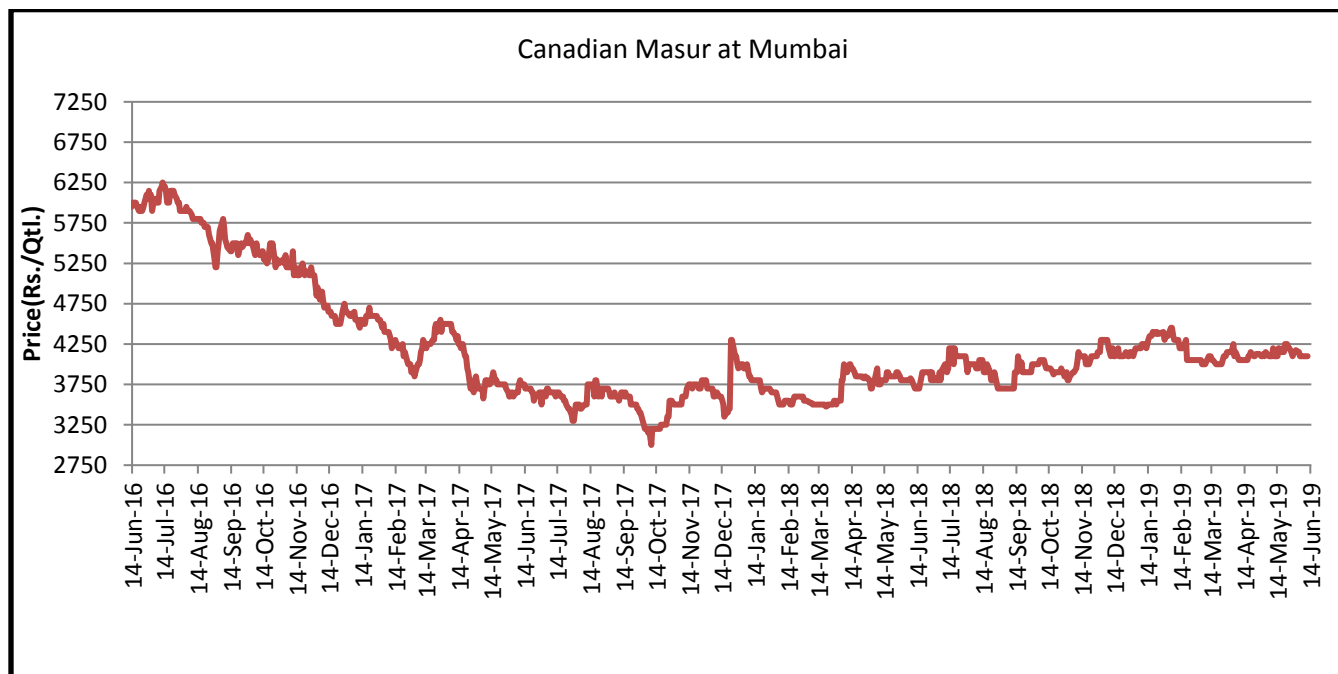

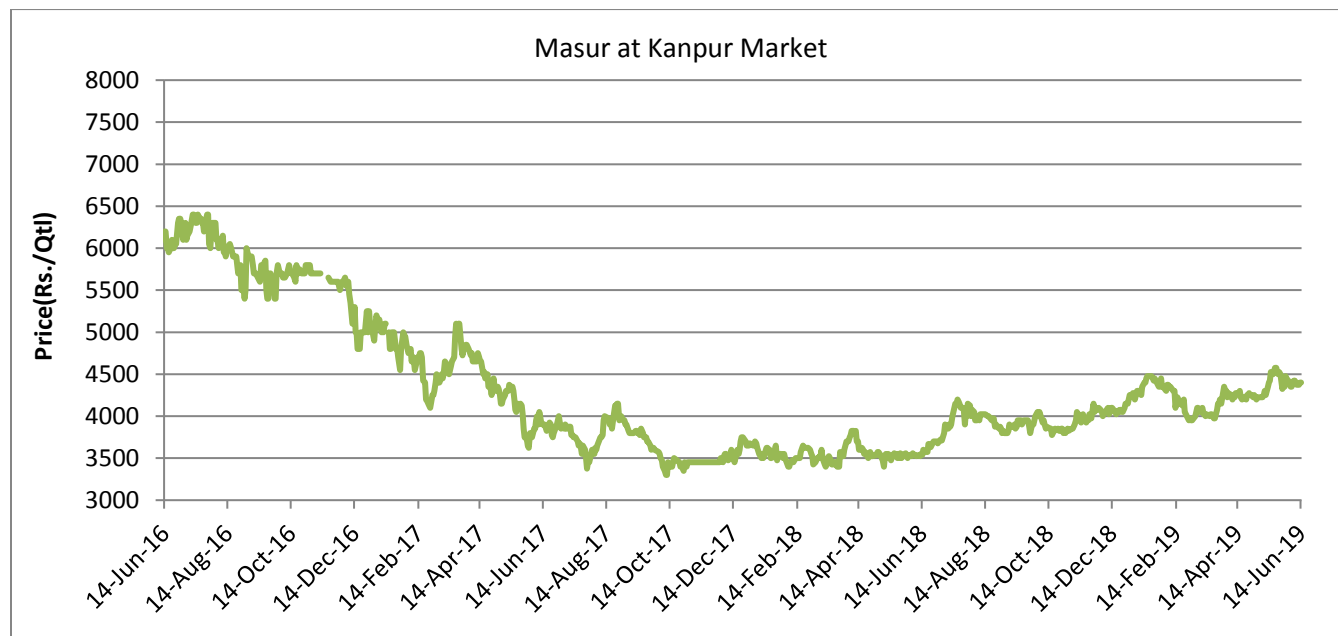

Market Recap:

Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil is also weak at this point of time. So lentil built-up price decreased by Rs 50 to Rs 75 per qtl. to Rs 4350-4400. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to move up again. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for two weeks. So, masur may move up again from current level.

Current Scenario:

17th June, 2019

In the 2nd week of June-2019, average price in key market like Kanpur was down by 0.15% to Rs 4390 per qtl. Prices are likely to trade down in June to a certain extent. Demand from neighboring countries, is awaited. Masur is unable to get support from other pulses as all trade weak right now. Demand is expected to improve by the end of this month.

Market Outlook: Prices are likely to notice weak movement due to slower procurement drive, fear of selling by Nafed and increasing arrival amid higherr import volume.

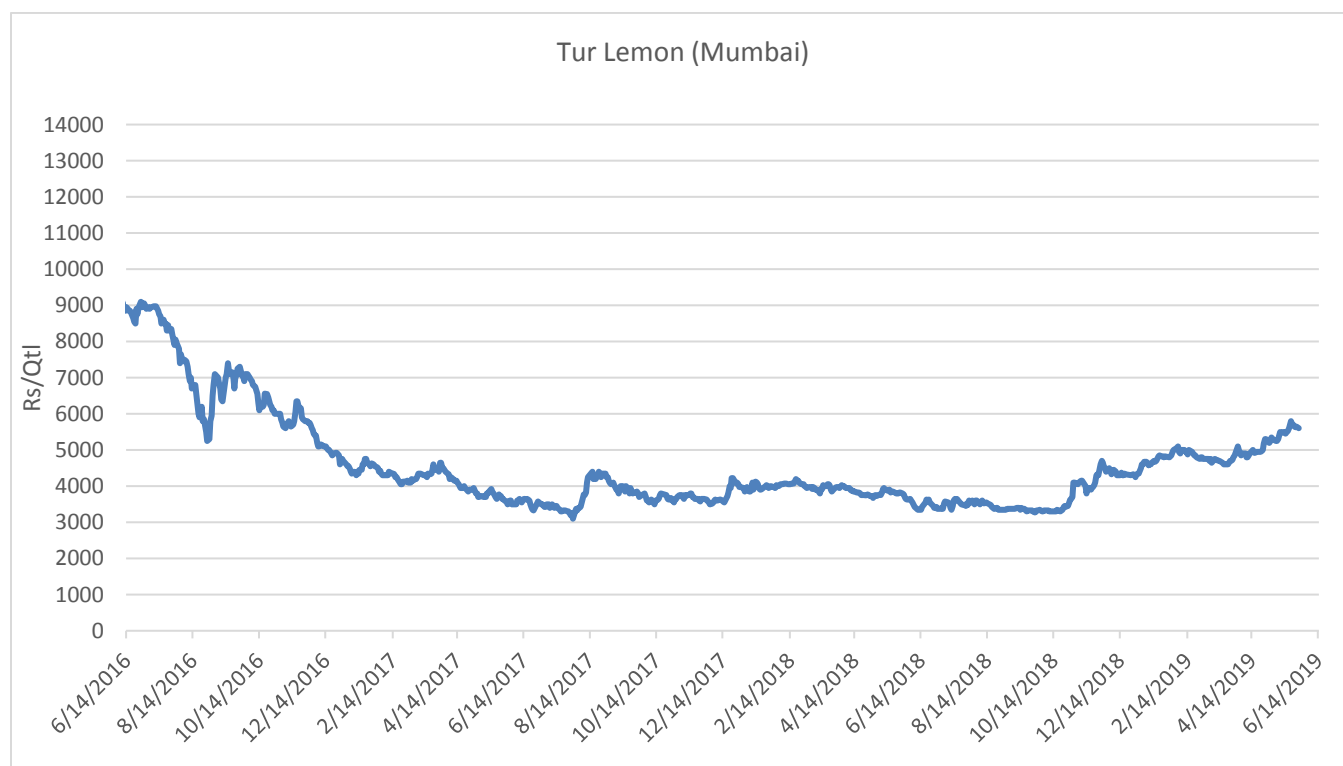

Pigeon Pea (Tur/Toor):

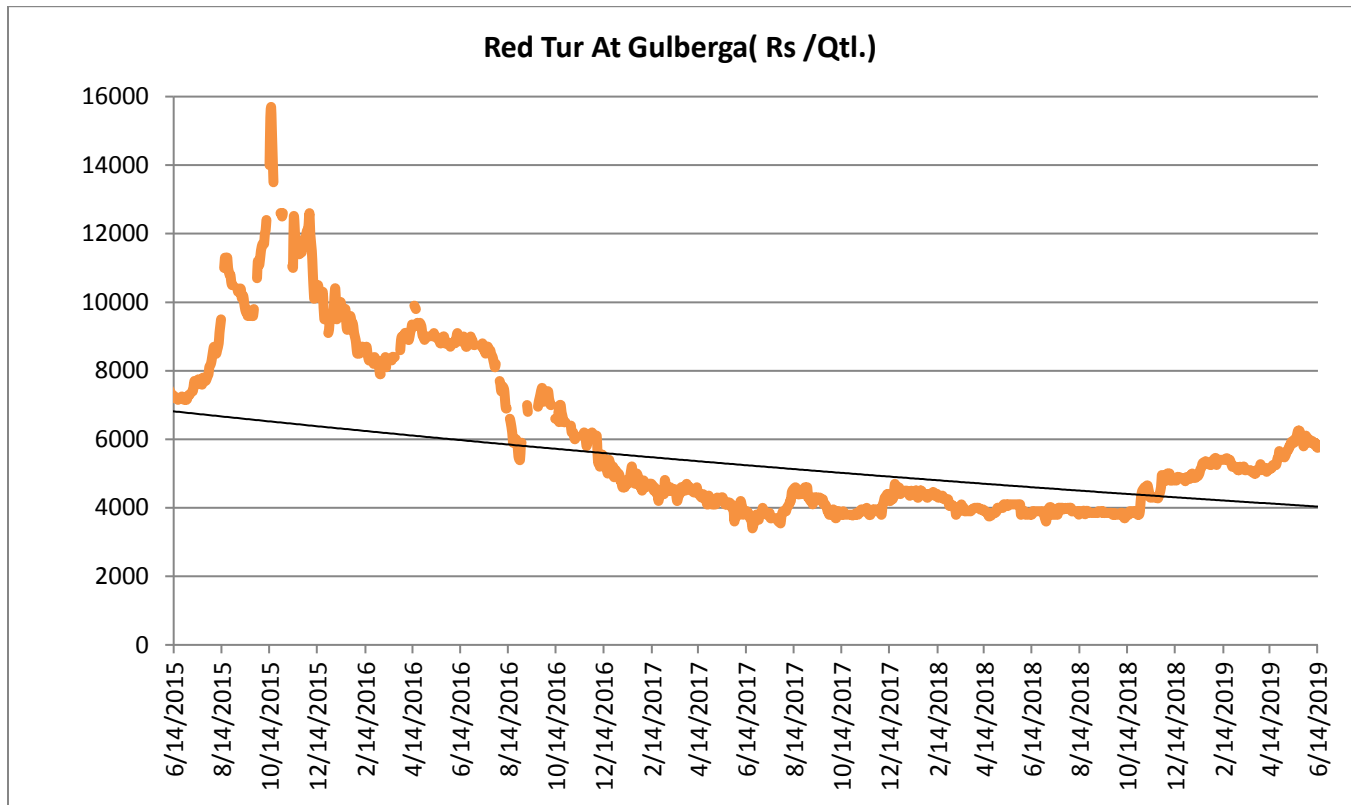

Market Recap:

Govt. has decided to increase import quota from 2 to 4 lakh MT to control prices of tur. License for first two lakh MT import is likely to be issued next week, while another two lakh MT might take time for two to three months and may hit Indian market by Sep end /Oct. Besides this, govt would import 1.75 lakh MT through G2G basis and would sell 2 lakh MT from buffer stock to contain price of tur. At present govt has 11.53 lakh MT pulses in buffer while Nafed has 27.32 lakh MT pulses. So, there is no panic right now. Apart from this govt. has close eye on stockiest activities. All these developments would not allow market to move beyond a certain limit in coming weeks despite widening disparity gap for lemon tur.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak due to fear of higher release/auction by Nafed if prices continues to move up. Buying by private trade too has slowed down. However, overall outlook for Tur cash market remains firm in the medium term. Stake holders should buy on down ward correction as ready stock is decreasing in cash market.

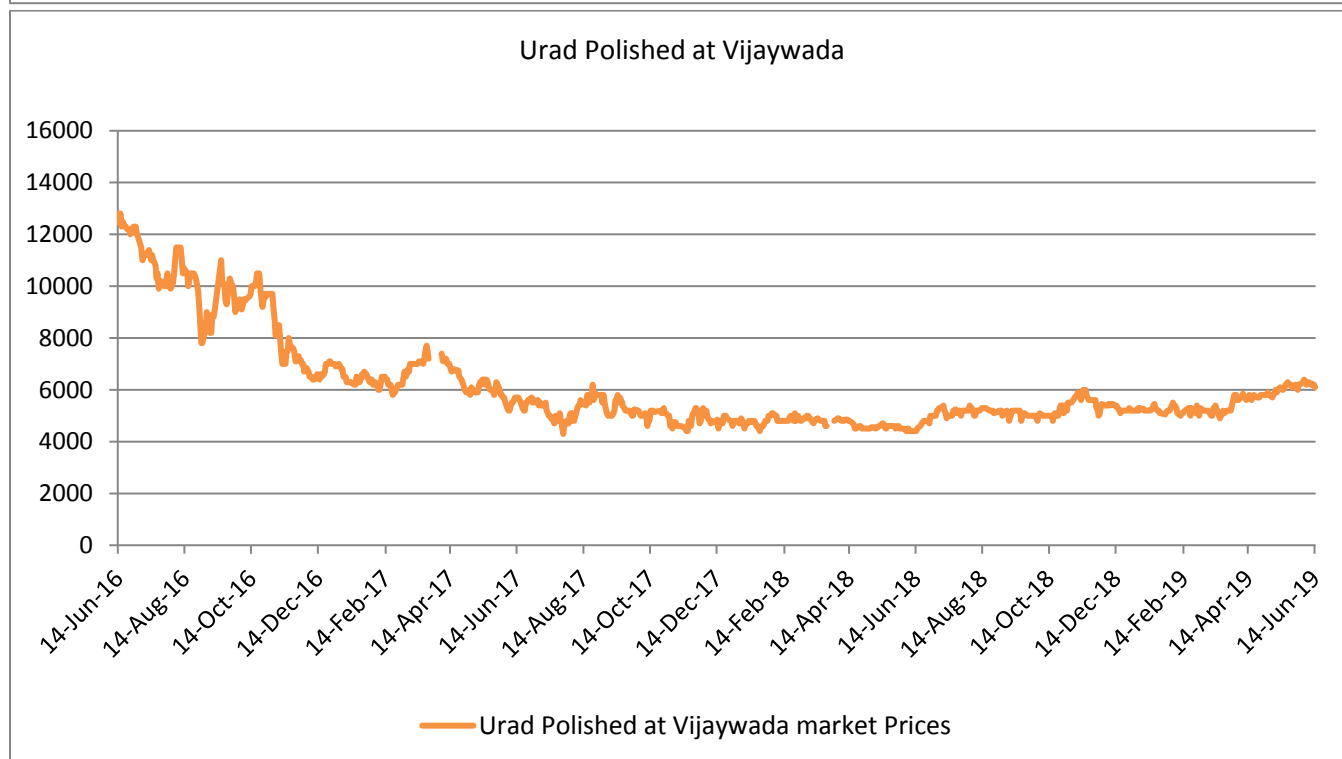

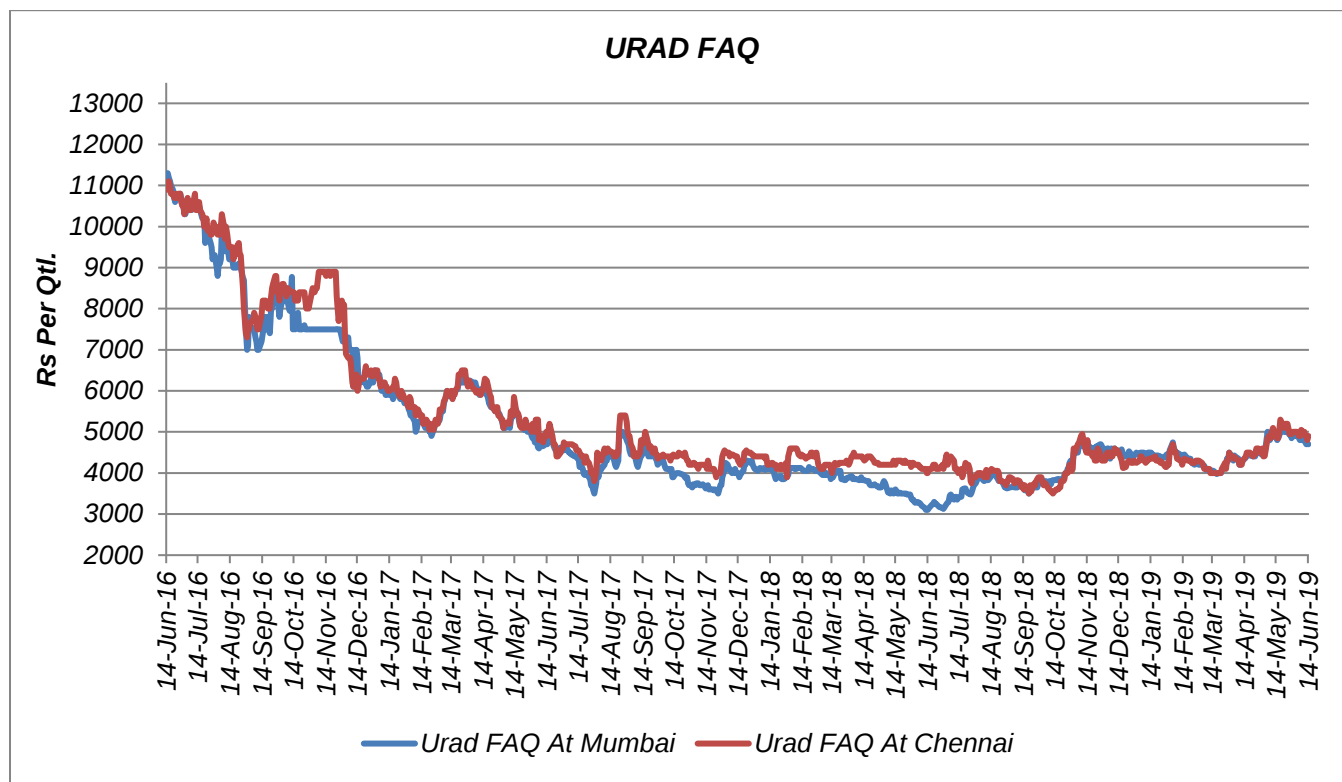

Market Outlook: Tur market may trade weak by Rs100-150 more with increasing arrivals from old stock and poor buying spree.

Black Matpe (Urad):

Urad cash market traded weak taking clue of govt.'s intension to augment supply through import and central pool stock. Besides, stockists too have started releasing stock sensing higher supply from central pool and import.. However, demand for quality urad has improved amid fear of lower crop size in kharif season.. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level in the second half of the year. No big crop is due till Sep. Before this, green urad from MP and UP would hit market but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move down by Rs 100 to 150 more from current level. Currently it is being traded at Rs 4700 to 4750 in Mumbai market. After a slight downward correction, urad may move further up by Rs 200-300. Stake holders should buy on dip and hold stock.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4700-4750 per Qtl.) and Chennai (Rs.4900-4950 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

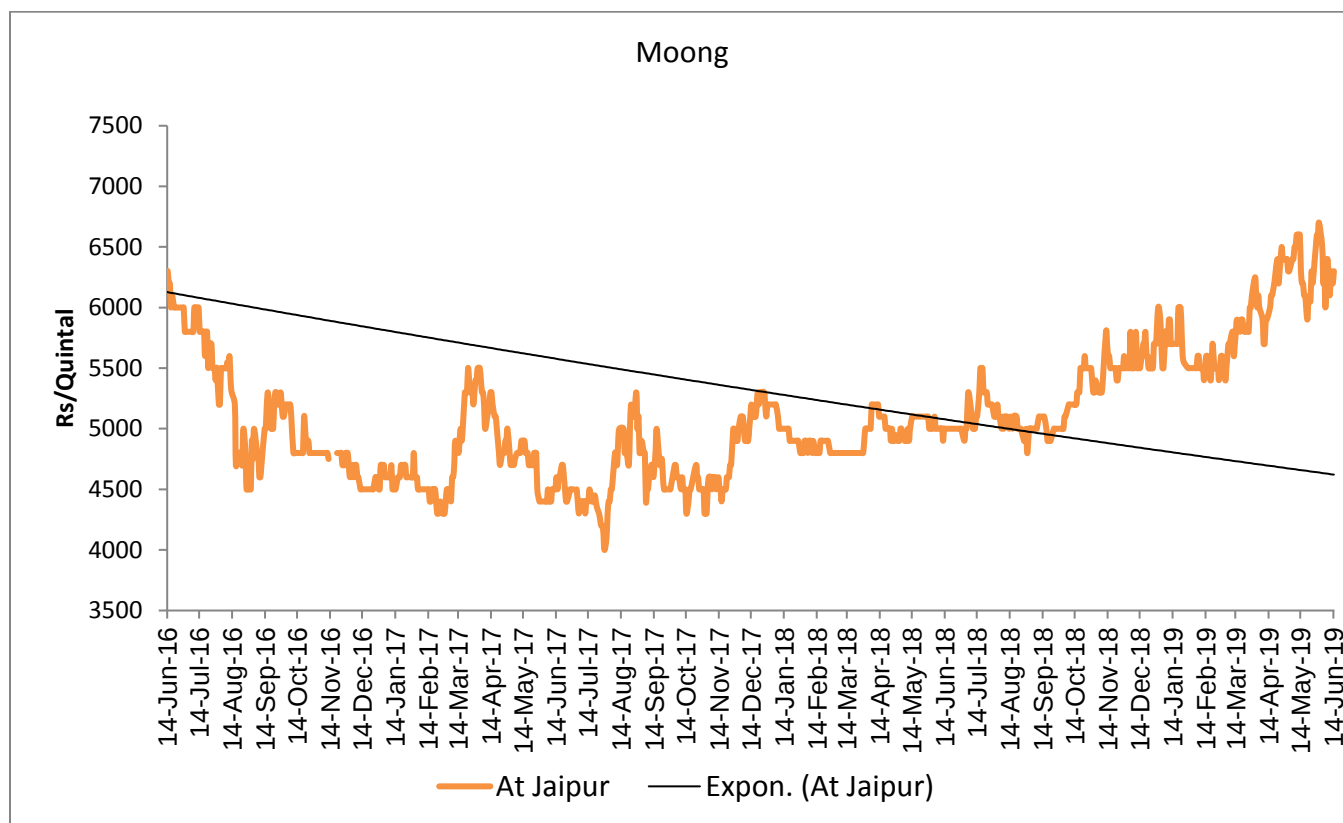

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

Stockists are unwilling to sell moong sensing uptrend to continue in moong market. Offtake from mills have increased. It has helped market to move up once again after touching Rs 6150 in Jaipur market. There is no scope of import before July and shortage of quality moong is obvious in cash market. It may push up moong price again by Rs 200 from current level. In Jaipur market, moong is being traded at Rs 6250-6350 and in Jodhpur it is being traded at Rs 5900-6050 per qtl. Availability of moong is lower in Maharashtra. In Karnataka moong is being traded at Rs 5700-5900. Stake holders should buy on correction. No new crop is due in next two months. The size of new crop from Hoshangabad is lower and it would not impact moong price much.

Market Outlook: Moong prices are likely to trade slightly firm in the near term.

17th June, 2019

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in June.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4400 to 4600 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4400 with the first target of 4550 and second target 4600 with stop loss at 4300 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4300	4475	4600	4750

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT .

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4650-4850 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4650 with the first target of 4775 and second target 4825 with stop loss at 4600 level.

Support & Resistance
