Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- Consumer Affair Ministry seems in favour of more pea import and pitch for relaxing quantity norm** set at 1.5 lakh MT right now. It may be increased to 2.0 lakh MT as pea price is ruling higher in domestic market due to lower crop size of chana and tight supply side for pea in domestic market. As per ministry official Inter-ministerial committee has asked commerce ministry to provide 10 years historical import data for pea, so that import quantity can be analysed and increased. Earlier in March the central govt. has increased pea import quota from 1 lakh MT to 1.5 lakh MT in March-2019. As chana crop size in India is lower this year, higher quantity for pea import seems necessary to keep price controlled.
- Monsoon progressed well in central and north India and pace of advancement is likely to** increase in coming days. Recent rains in Gujarat, M.P., Rajasthan, Bihar, West Bengal, Orissa and other south Indian states have provided much respite to the farming community. Sowing progress is likely to improve in coming weeks.
- Tur prices could not sustain at higher level taking clue from govt's intention to increase supply in** cash market by allowing 2 lakh MT additional tur import through private channel and permission for selling 2 lakh MT tur from buffer stock. Besides, planning of 1.75 lakh MT tur import through Gto G basis. Demand got affected too at higher level. So, some sales by private trades at discounted price kept market down during review week. However, market is well aware of lower stock this year and availability of tur in global market too is at lower ebb. Planting of tur is being delayed, so higher area coverage is unlikely now. It would support cash tur market once again. In Gulberga market tur is being traded at Rs 5700-5700. Overall trend remains steady to firm in the medium term. Import from Myanmar would take at least one month time to hit Indian ports as availability is lower there and exporters are quoting higher price for forward deals. No major big deals have been struck so far. Currently, tur lemon is being offered at 790 per MT basis Indian ports.
- Urad market too could not sustain its upward momentum and decreased by Rs 200-300 per qtl. Despite** slower pace of kharif sowing, farmers have covered only 32000 ha area under urad due to lower rainfall. As monsoon rains started in major growing region, urad sowing is likely to improve in coming weeks. Urad demand at higher level got affected as dal demand from retail market weakened. As import would remain restricted at 1.5 lakh MT, supply side might be tight till new crop hits the market in Aug end / Sep. So more down side movement is unlikely. Market may trade up by Rs 200 to 300 from current level in coming weeks. In Mumbai tur is being traded at Rs 4700-4750 after touching Rs 5000. Overall tone seems steady to slightly firm.
- Recovery in moong market was seen as buyers return to buy again at lower level. There** is short supply of quality moong in the market while any new big crop is not before Sep. So, market is expected to move up again. As moong sowing has delayed by 15 days, area coverage may be lower than normal expectation. It may support moong cash market once again. Farmers have covered only 31,000 ha so far. Even, shipment would be delayed as availability of moong in Myanmar is poor. However, Nafed would continue to sell in lower quantity and try to keep market supply balanced. In any case market is bound to recover. In Jaipur market moong is being traded at Rs 6250-6300 after touching 6000-6100 last week. As demand is lower for moong, any spike is unlikely. It may trade in the range of Rs 6200-6500 this week.
- Cash chana market continued to reel under pressure during the review week. Taking** clue from online market and tender for sale by Nafed. Market decreased by Rs 200. However, with cancellation of bids by Nafed due to lower bids by private trades, market recovered once again. If Nafed continues its strategy to sale chana not below MSP, chana market may improve slightly and may touch MSP level. However, Nafed stock would continue to haunt market and it may decrease once again as soon as Nafed starts selling. Ample stock is available with Nafed and with private hands. So Agriwatch expects market to trade in the range of Rs 4400-4500 in Delhi market. In Indore market it may trade at Rs 4200-4350 per qtl. this week.

Market is waiting for demand. July onward Nafed may prefer to release stock near Rs4400-4500. It would not allow market to trade at higher level.

International Market:

- **As per Eurostat latest data pea import in Spain decreased by 91% to 635MT in April** against 7409 MT in March-2019. In the ongoing MY Spain has imported total 21953 MT against 47045 MT last year till April-2018. France exported 581MT to Spain in April-2019 followed by Canada(48MT) and Belgium (3 MT).
- **Pea Export from Lithuania in April-2019 declined sharply in comparison to previous month(March).** It declined from 28,592 MT(March) to 22,097 MT in April-2019. This MY total export was registered at 94,984 MT, down by 26 % from last year till corresponding months. France brought 13,950 MT, followed by Germany(2,281 MT) & Latvia (2,260 MT)
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20** due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- **US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres** from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20** due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase -in 2019-20.
- **Lentil Production In US is expected to decline by 29% to 0.55 million acres in 2019-20.** The main reason behind this is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64%

from last year till April 2018. The biggest buyer was B, desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So Buyers are in no hurry to buy.

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

Recovery in chana market was seen due to cancellation of chana sale bids by Nafed due to lower than expected price bids. It supported chana market once again. However, any major recovery in chana market is unlikely in the near term. There are ample stock in private hands, cold storage and with Nafed. Upward momentum may continue until Nafed starts sale. Even futures remains unsupportive for chana cash market. Demand is weak. Stake holders should sell chana at higher level. Nafed has to procure pulses from kharif season and new kharif crop would start hitting the market from Sept. So, Nafed would not be able to retain stock for a long time. Agriwatch expects chana market to stay steady near Rs 4400-4500 till Nafed selling. Any major jump is unlikely in the near term. Chana in Delhi market may trade in the range of Rs 4300-4500 this week. Stake holders should sell around 4450-4500. At current price market is expected to move up by Rs 100 more.

All India average price for Chana traded down by 1.23 % to Rs 4387. Australian chana price too traded down by 1.14 % at Rs 4350 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week too

Peas (Matar):

Market Recap:

Pea market traded weak taking clue from weak chana in cash market and poor demand. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. However, with weakness in chana, pea may trade weak too despite tight supply side expected in coming weeks. Stockiest may prefer to release stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep. Earlier, market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4700-4750 while in Kanpur market it is being traded at Rs 5050-5100 per qtl. As chana price has started decreasing, pea too may trade weak. As, there would be shortage of imported crop, price is bound to move up taking clue from other pulses in the second half of the year. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 5050-5100 in Kanpur market, almost Rs 50 up from previous week, due to stable buying by bulk users and decreasing chana price. Decreasing imported stock may support pea price further by Rs. 200 more but not before a downward correction of Rs200 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200 decline.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 400-550 in June on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil built price stayed steady at Rs 4350-4450. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to move up again. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. Somasur may move up again from current level.

Current Scenario:

In the 3rd week of June-2019, average price in key market like Kanpur was up by 0.10% to Rs 4400 per qtl. Prices are likely to trade steady in June to a certain extent. Demand from neighboring countries, is awaited. Masur is

unable to get support from other pulses as all trade weak right now. Demand is expected to improve by the end of this month.

Market Outlook: Prices are likely to notice weak movement due to slower procurement drive, fear of selling by Nafed and increasing arrival amid higherr import volume.

Pigeon Pea (Tur/Toor):

Market Recap:

Govt. has decided to increase import quota from 2 to 4 lakh MT to control prices of tur. License for first two lakh MT import is likely to be issued next week, while another two lakh MT might take time for two to three months and may hit Indian market by Sep end /Oct. Besides this, govt would import 1.75 lakh MT through G2G basis and would sell 2 lakh MT from buffer stock to contain price of tur. At present govt has 11.53 lakh MT pulses in buffer while Nafed has 27.32 lakh MT pulses. So, there is no panic right now. Apart from this govt. has close eye on stockiest activities. All these developments would not allow market to move beyond a certain limit in coming weeks despite widening disparity gap for lemon tur.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm as stock is lower and market has adjusted recent decisions taken by govt.. Buying by private trade is about to start again. Overall outlook for Tur cash market remains firm in the medium term. Stake holders should buy on down ward correction as ready stock is decreasing in cash market.

Market Outlook: Tur market may trade weak by Rs100-150 more with increasing arrivals from old stock and poor buying spree.

Black Matpe (Urad):

Urad cash market traded weak taking clue of govt.'s intension to augment supply through import and central pool stock. Besides, stockists too have started releasing stock sensing higher supply from central pool and import.. However, demand for quality urad has improved amid fear of lower crop size in kharif season.. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level in the second half of the year. No big crop is due till Sep. Before this, green urad from MP and UP would hit market but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move down by Rs 100 to 150 more from current level. Currently it is being traded at Rs 4700 to 4750 in Mumbai market. After a slight downward correction, urad may move further up by Rs 200-300. Stake holders should buy on dip and hold stock.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs 4650-4750 per Qtl.) and Chennai (Rs.4900-4950 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

Stockists are unwilling to sell moong sensing uptrend to continue in moong market. Offtake from mills have increased. It has helped market to move up once again after touching Rs 6150 in Jaipur market. There is no scope of import before July and shortage of quality moong is obvious in cash market. It may push up moong price again by Rs 200 from current level. In Jaipur market, moong is being traded at Rs 6300-6350 and in Jodhpur it is being traded at Rs 6000-6050 per qtl. Availability of moong is lower in Maharashtra. In Karnataka moong is being traded at Rs 5900-5950. Stake holders should buy on correction. No new crop is due in next two months. The size of new crop from Hoshangabad is lower and it would not impact moong price much as would be consumed locally.

Market Outlook: Moong prices are likely to trade slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

24th June, 2019

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in June.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4400 to 4600 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4400 with the first target of 4550 and second target 4600 with stop loss at 4300 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4300	4375	4600	4750

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT .

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4650-4850 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4650 with the first target of 4775 and second target 4825 with stop loss at 4600 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4500	4600	4700	4800	5000

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

- Chart depicts steady to weak movement in the market.
- RSI oscillator is moving down in neutral region.
- Expected price range is 4300-4550

Strategy: Buy on dip:

Trade Recommendations: Buy around 4300 with the first target of 4450 and second target 4550 with stop loss at 4250 level.

Support & Resistance
