Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

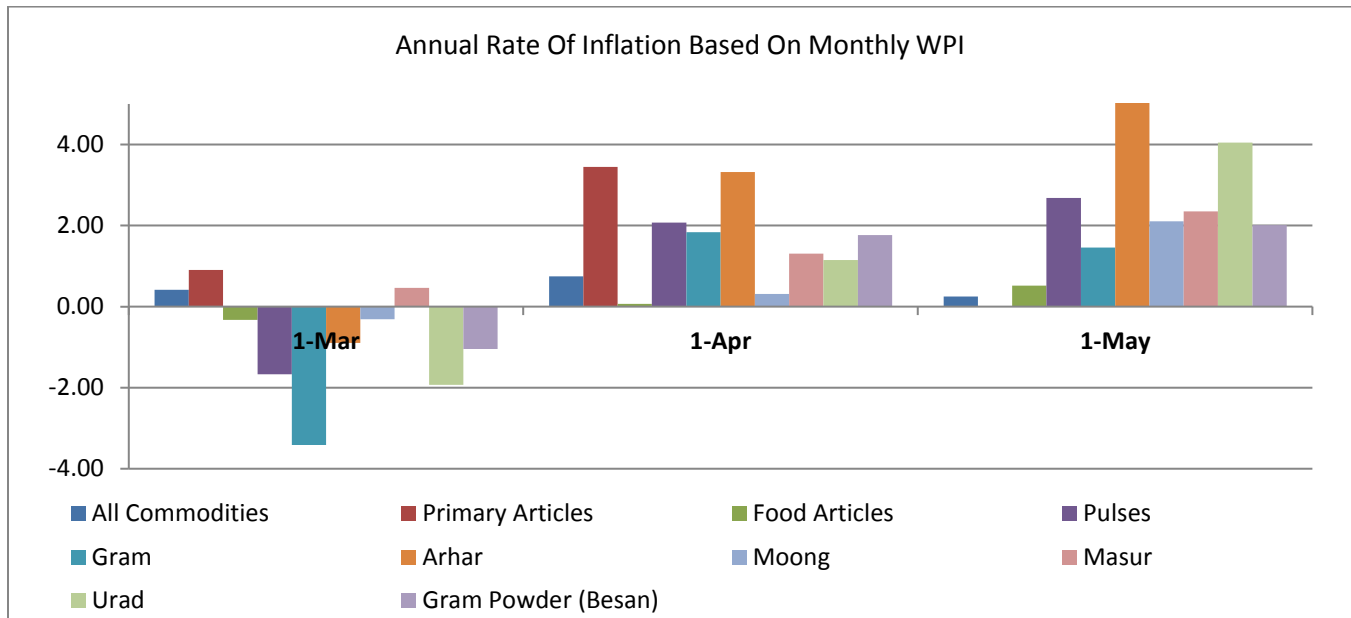

- Due to deficient rainfall so far Indian farmers have faced tough time. It has been 33 % lower** by the end of June. It has affected sowing activities adversely. It has been worst during last five years. Out of 36 meteorological divisions 28 have received lower rainfall. Kharif pulses sowing is running behind by 61.36% to 3.42 lakh ha. Major decline has been seen in Arhar area (77.24%), Moong (62.18%) and kulthi (66.67%). However, with revival of monsoon improvement in sowing activities seems on the card. As on 28th June-2019 all India pulses sowing area was recorded at 3.42 lakh Ha against 8.85 lakh ha last year. Delayed sowing is likely to impact overall crop size this season.
- DGFT has started issuing license to importers. Some applicants have already received it and the rest are in process** of getting it soon. There is a condition for importers that they have to import it before Oct-2019. This means supply of Tur, Urad & Moong would increase in Aug, Sept and from October new crop (especially urad and moong) would start hitting the market amid continuous sale by Nafed. So any spike in pulses market is unlikely. Even pulses demand in monsoon season weakens.
- Chana cash market continued to reel under pressure despite lower crop size this year and minimum** availability of stock in south Indian markets. Reason behind lower prevailing price is higher central pool stock and selling by Nafed through auction. Nafed has around 22-23 lakh MT stock, including new and old. It is considered to take care of three months total demand. This means, next six months there is no shortage of chana as offtake is lower from central pool. Besides, there is double stock this year in private hands and cold storage. Even futures market remains unsupportive to cash chana market. If Nafed restricts selling some improvement might be seen in chana market. Otherwise, cash market may continue to move range bound. In Delhi market chana is being traded at Rs 4300-4350. As demand decreases in monsoon season, pressure may continue on chana market. Delhi chana may touch Rs 4000-4100. Improvement in chana market might be seen in Oct-Nov when it may cross MSP. Short term outlook remains weak in domestic market. Nafed is selling chana at Rs 4050/4075.
- Despite higher rainfall in Andhra Pradesh (51%) and Telangana (13%) than normal till 28.06.2019**, sowing of tur is lower by 0.06 lakh ha to 0.01 lakh ha so far against normal of 2.36 lakh ha. Even all India coverage is lower by 77.24% to 0.84 lakh ha against 3.69 lakh ha last year till date and normal of 43.00 lakh ha for the whole season. With monsoon entering the half of India, sowing activities are likely to increase. Sowing would continue till July-2019, so farmers are expected to cover 90% area. However, delayed sowing and 24% lower rainfall in India as a whole may impact yield in other states too. Even in major tur producing states like Maharashtra, Karnataka, Gujarat, MP, Jharkhand, Telangana & UP situation is not good at the initial stage of sowing phase. In Gulberga market tur is being traded at Rs 5600-5700. It may dip by Rs 100-200 more from current level.
- Pressure on urad cash market continues as demand remains weak while stockiest are preferring to** release old stock due to liquidity crunch. They can't retain stock due to bleak outlook for urad in the near to medium term despite lower kharif acreage so far. Higher import (4.93 lakh MT against set quota of 1.5 lakh MT) in last MY remains burden on cash market. It will continue to affect market sentiments in new season too. Indian farmers have covered 0.62 lakh ha so far against normal of 1.4 lakh ha till date and 30.77 lakh ha for the whole season. They had planted 1.05 lakh ha last year till date. This year it is 40.95% down. As monsoon has progressed well, improvement seems very much in the sight. In AP farmers have covered only 0.01 lakh ha against 0.04 last year till date. Normal area in AP is 0.367 lakh ha. As farmers in south India have received lower price for urad, they may shift area to other lucrative crops too. As kharif urad is a minor crop in AP, its fluctuating area does not make much impact on total kharif crop size.
- Despite increasing fear of lower area coverage pressure on moong market continues and it lost Rs 300-400 per qtl** in last two weeks due to summer crop arrival, Nafed selling and lower demand at higher level. Moong in Jaipur market is being traded at Rs 6100 and it may trade further lower by Rs 100-200 more as stockiest would continue to sell old stock for purchasing new one. Fresh buying spree might be seen from mid of July once again. However, Nafed selling would continue to cap any spike in the near term. Import too would be limited as there is no parity from overseas market.

International Market:

- **Dry pea area is expected to increase by 20% in US to 10.3 lakh acres in 2019** as per estimate by USDA. Harvested area too is up by 20% from 2018 to 9.72 lakh acres. Planted area is up in all states except Nebraska and South Dakota. In Montana, as of June 23, blooming reached 24%, ahead of last year's 21% but well behind the 5-year average of 53%. As of June 23, blooming reached 15% in North Dakota, well behind both last year and the 5-year average.
- **Pea Export from Lithuania in April-2019 declined sharply in comparison to previous month(March).** It declined from 28,592 MT(March) to 22,097 MT in April-2019. This MY total export was registered at 94,984 MT, down by 26 % from last year till corresponding months. France brought 13,950 MT, followed by Germany(2,281 MT) & Latvia (2,260 MT)
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B,des is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20** due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20** due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase in 2019-20.
- **Lentil Production In US is expected to decline by 29% to 0.55 million acres in 2019-20.** The main reason behind this is lower area coverage in Montana and North Dakota. Production of lentil is expected to decline to 0.3 MMT in 2019-20, sharply lower from 2018-19. The main US export markets for lentils are EU, Canada, India and Mexico.
- **Chickpeas export from Australia increased sharply by over 90% to 43,962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B,des, buying 28,220 MT, followed by UAE buying

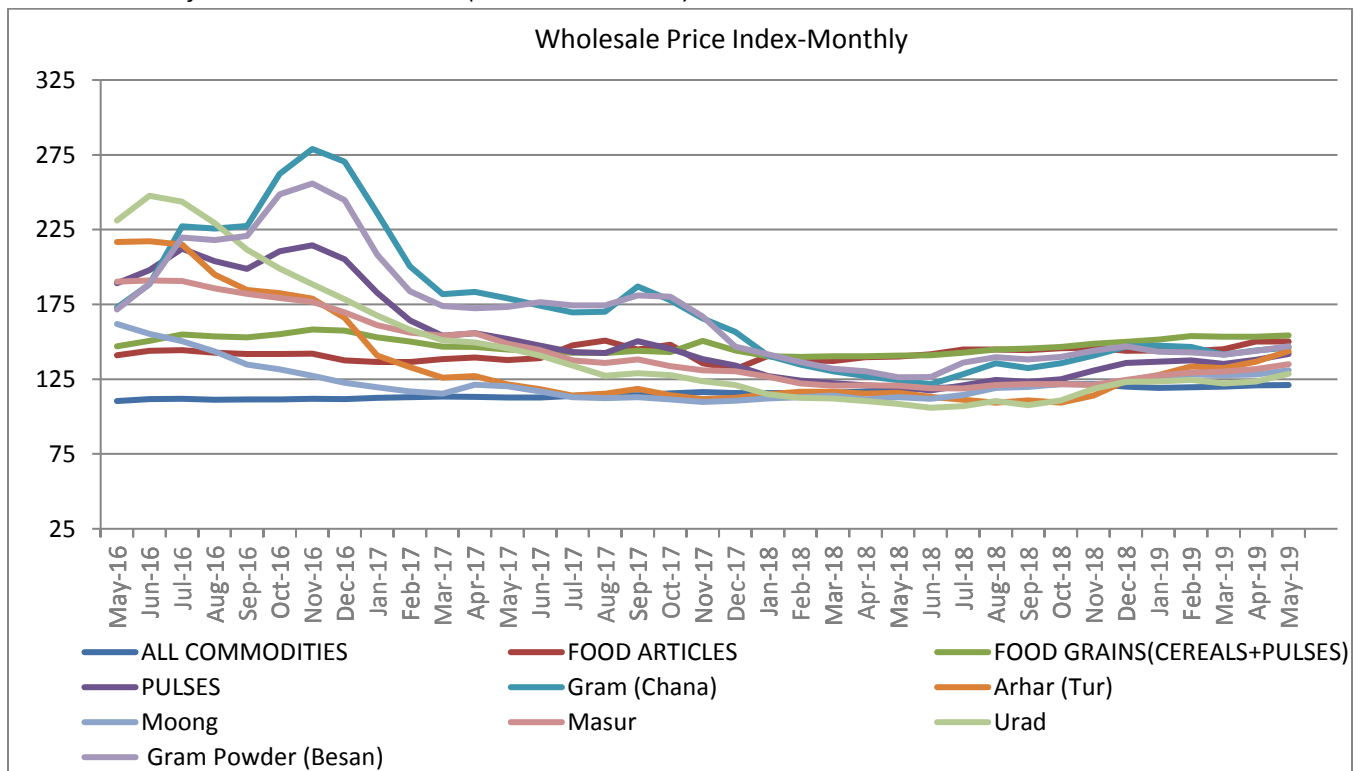

01st July, 2019

8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So Buyers are in no hurry to buy.

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

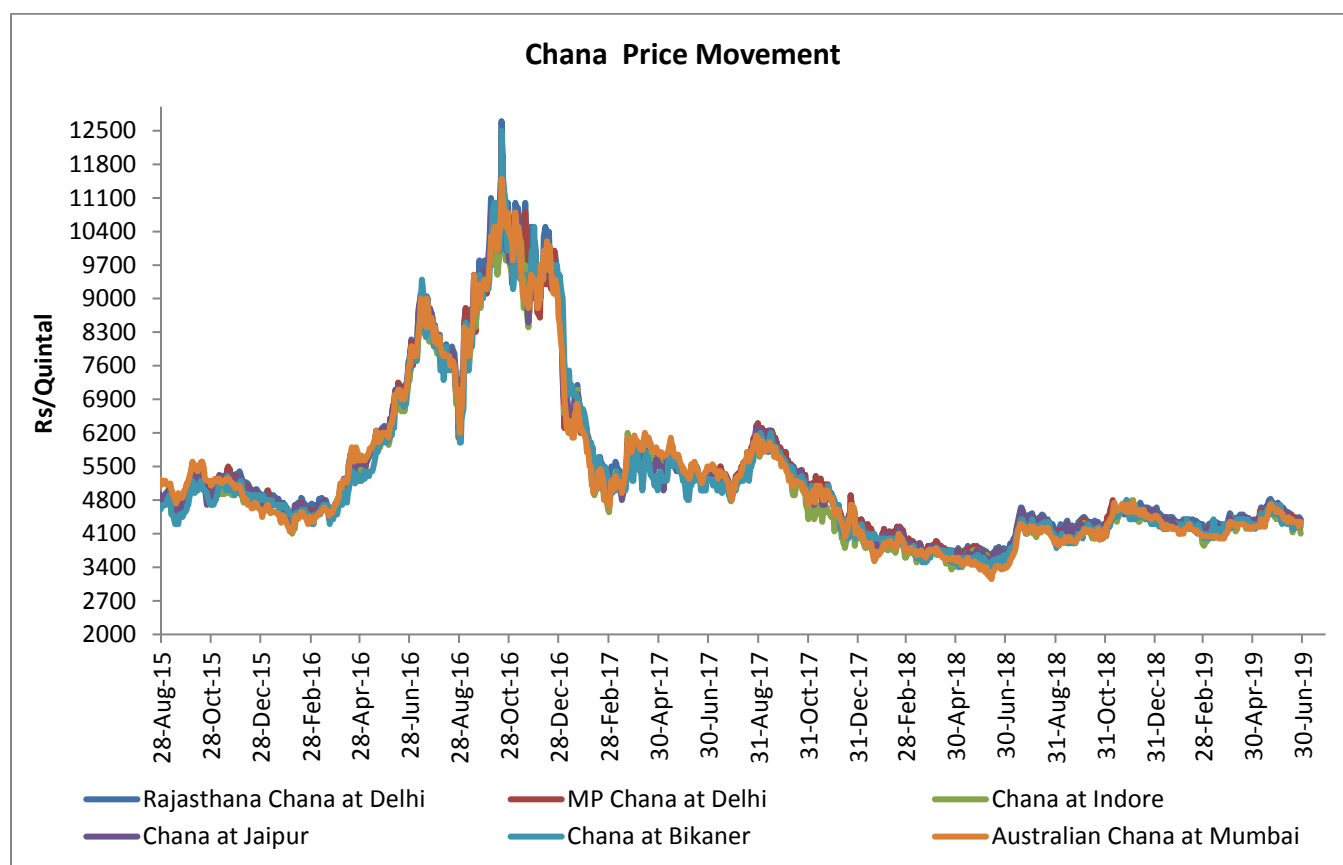

Pulses-Wise Scenario:

Chana

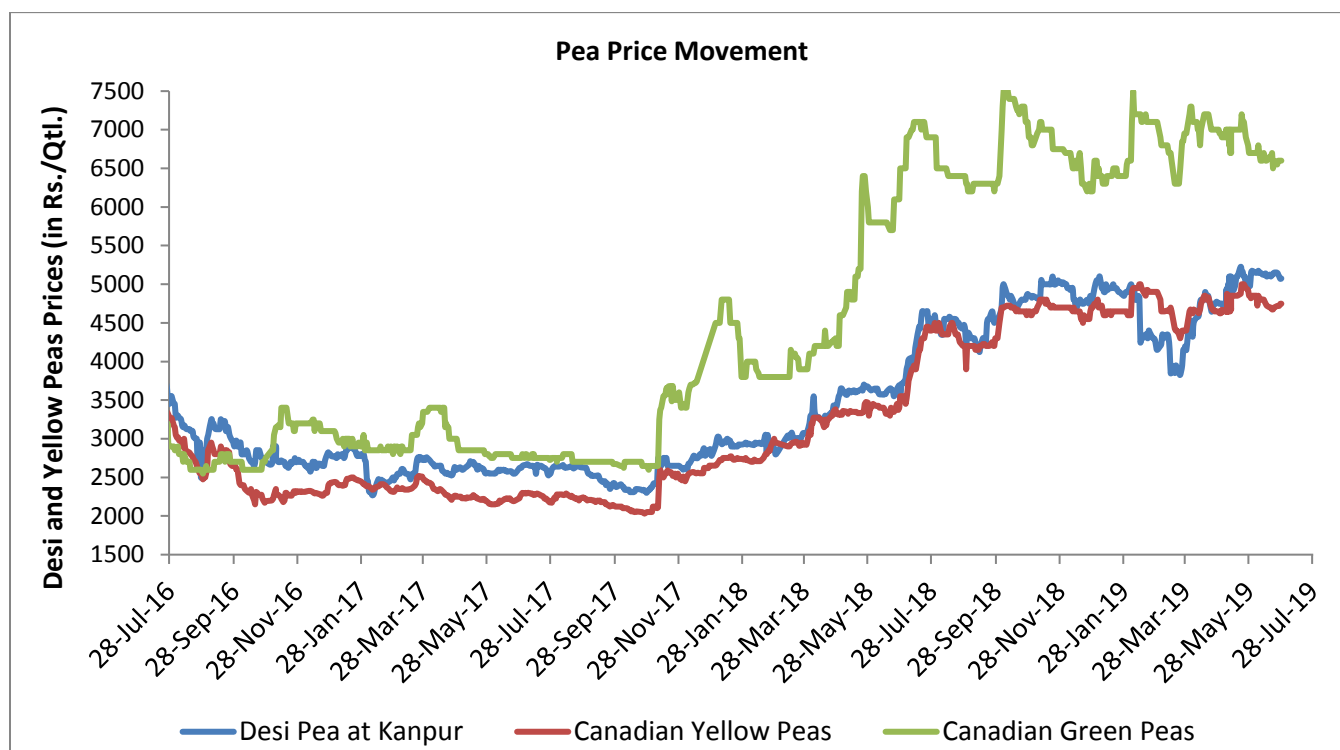

Current Scenario:

Nafed sale through auction and higher stock in central pool amid weak demand in monsoon season remains unsupportive to cash chana market. As inner tone is weak, buyers are buying based on their immediate needs. Nafed has over two million MT stock (old and new combined), and it would continue to cap any major recovery in chana market. Futures too remains unsupportive. Earlier, it was expected that Nafed would not sell Chana before July, but selling from June changed market sentiments. As stock is higher and Nafed has compulsion to continue pulse sale of pulses, so that space be available for kharif procurement. All these factors pressurize chana cash market and any major recovery in the near term is unlikely. Stake holders should start releasing stock chana in parts at every Rs100 recovery. Chana in Delhi market would continue to trade in the range of Rs4300-4500. Agriwatch expects chana market to stay steady near Rs4300-4500 till Nafed selling. Any major jump is unlikely in the near term. Due to liquidity crunch stockists would continue to release chana in physical market.

All India average price for Chana traded down by 0.23 % to Rs 4312. Australian chana price too traded down by 1.28 % at Rs 4314.5 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week too

Peas (Matar):
Market Recap:

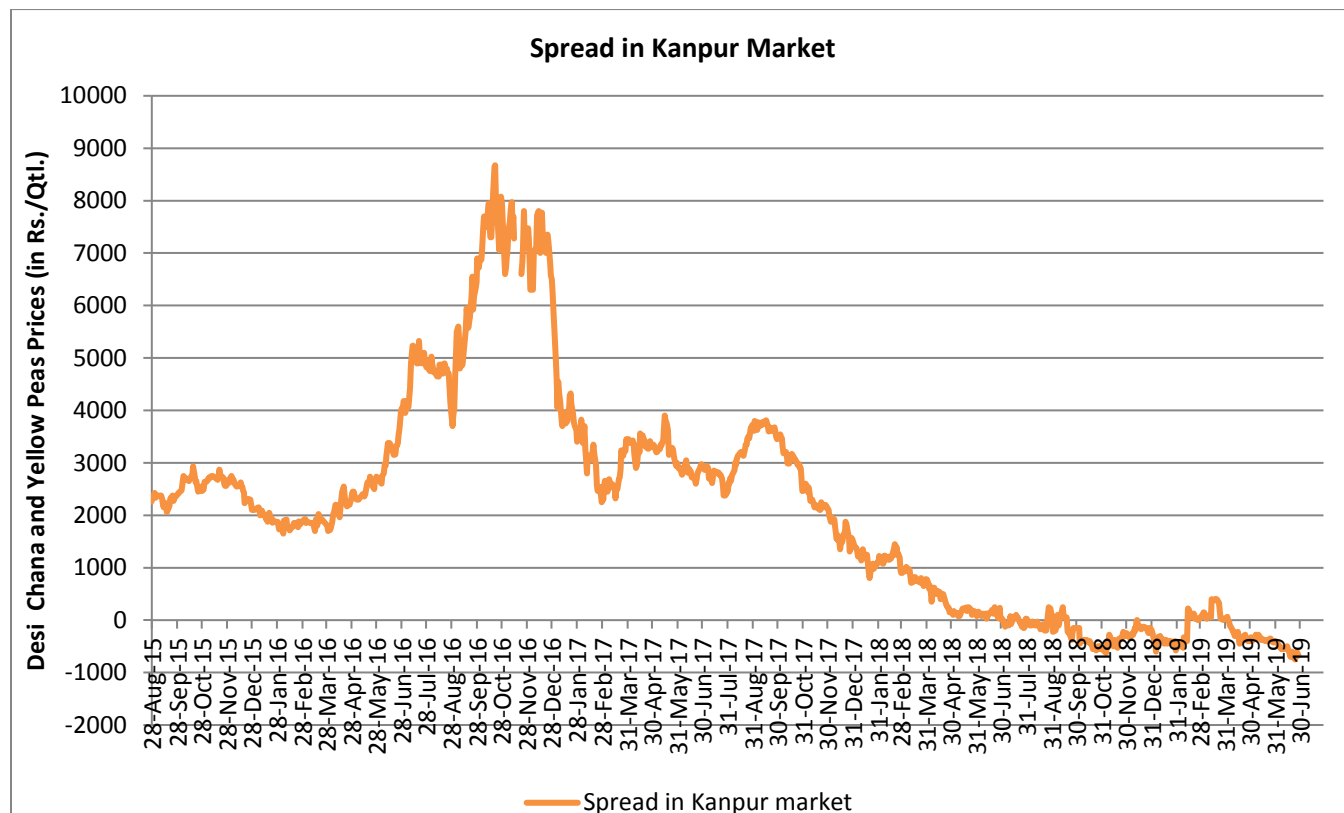

Govt has allowed pea import for seed purpose. However, suspicion is Pea market continues as there is no set method to stop it entering into cash market. Somarket remains under pressure. Even chana market remains unsupportive for cash pea market. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. However, with weakness in chana, pea may trade weak too despite tight supply side expected in coming weeks. Stockiest may prefer to release stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep. Earlier, market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4700-4750 while in Kanpur market it is being traded at Rs 5050-5100 per qtl. As chana price has started decreasing, pea too may trade weak. As, there would be shortage of imported crop, price is bound to move up taking clue from other pulses in the second half of the year. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 5000-5100 in Kanpur market, almost stable at last week level. Decreasing imported stock may support pea price further in span of time but not before a downward correction of Rs 200 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 450-550 in July on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

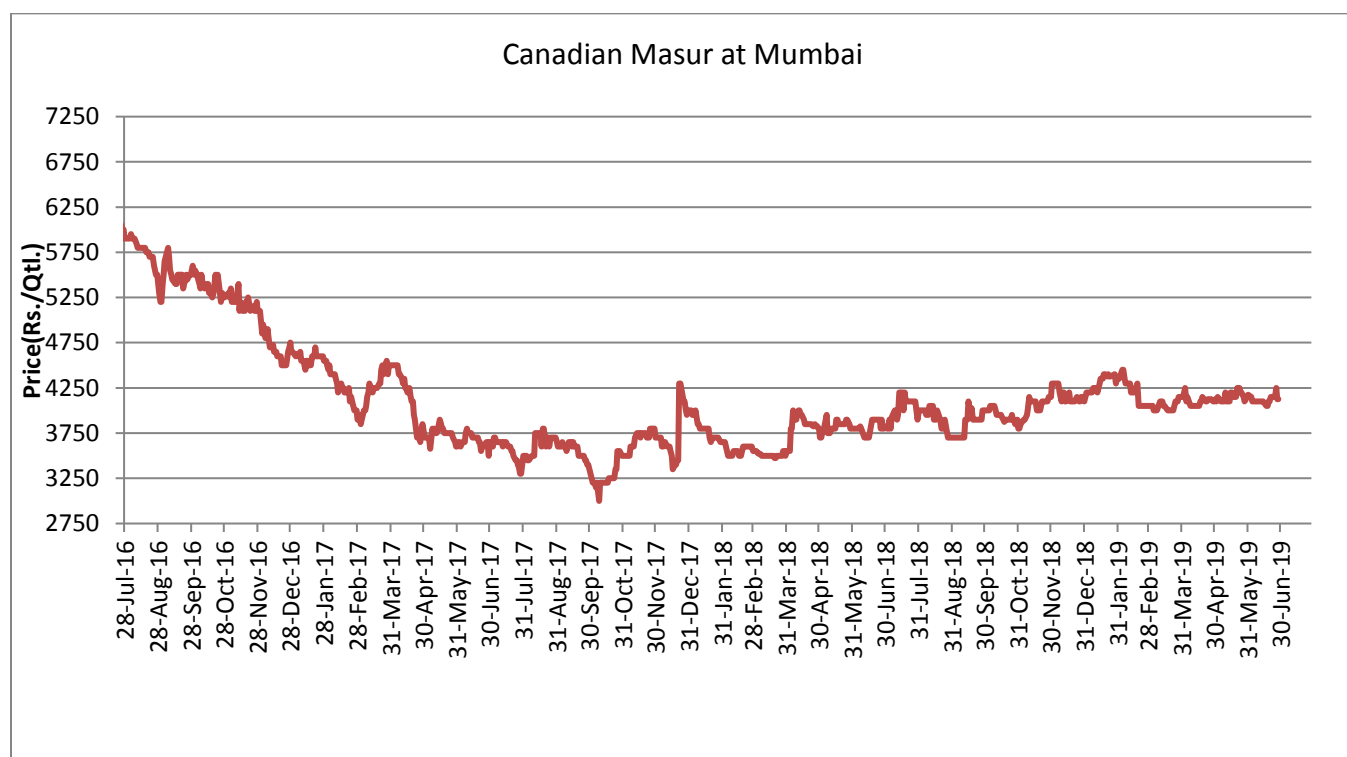

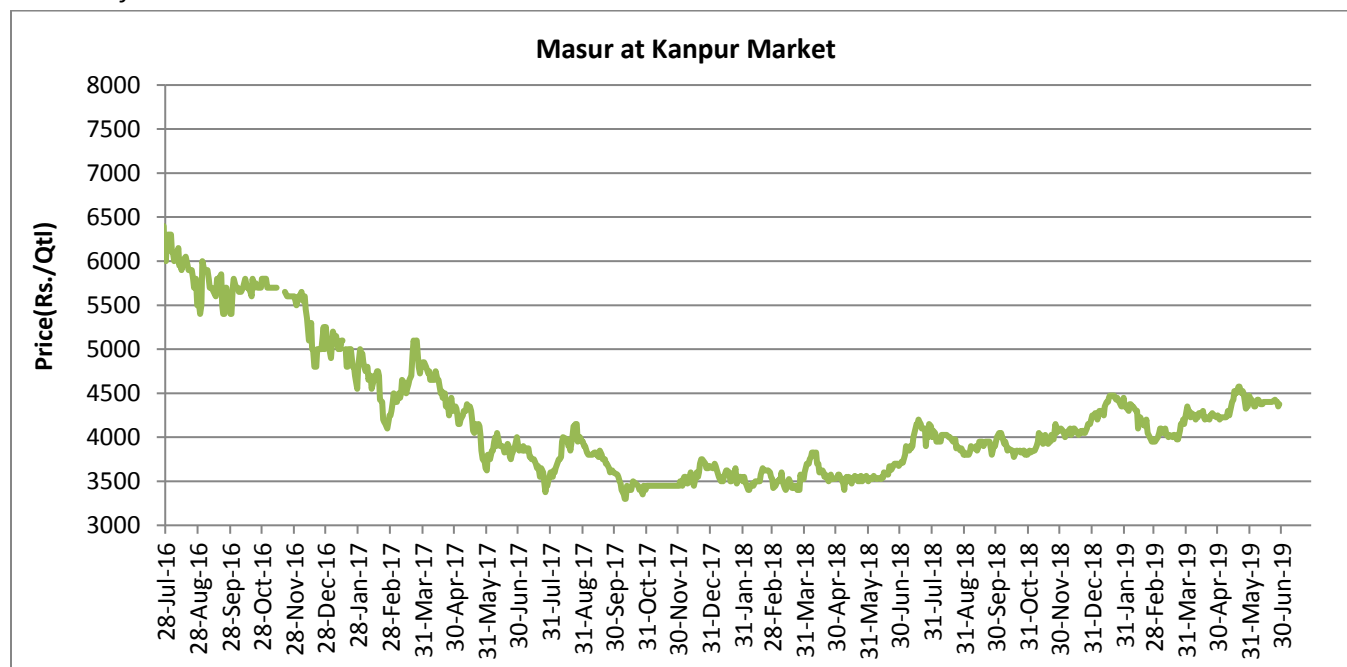

Market Recap:

Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil built price stayed steady at Rs 4350-4450. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to improve from current level. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. So masur may move up again from current level.

Current Scenario:

In the 4th week of June-2019, average price in key market like Kanpur was down by 0.34 % to Rs 4350-75 per qtl. Prices are likely to trade steady in July to a certain extent. Demand from neighboring countries, is still awaited.

Masur is unable to get support from other pulses as all trade weak right now. Demand is expected to improve by the end of this month.

Market Outlook: Prices are likely to notice weak movement due to slower procurement drive, fear of selling by Nafed and increasing arrival amid higherr import volume.

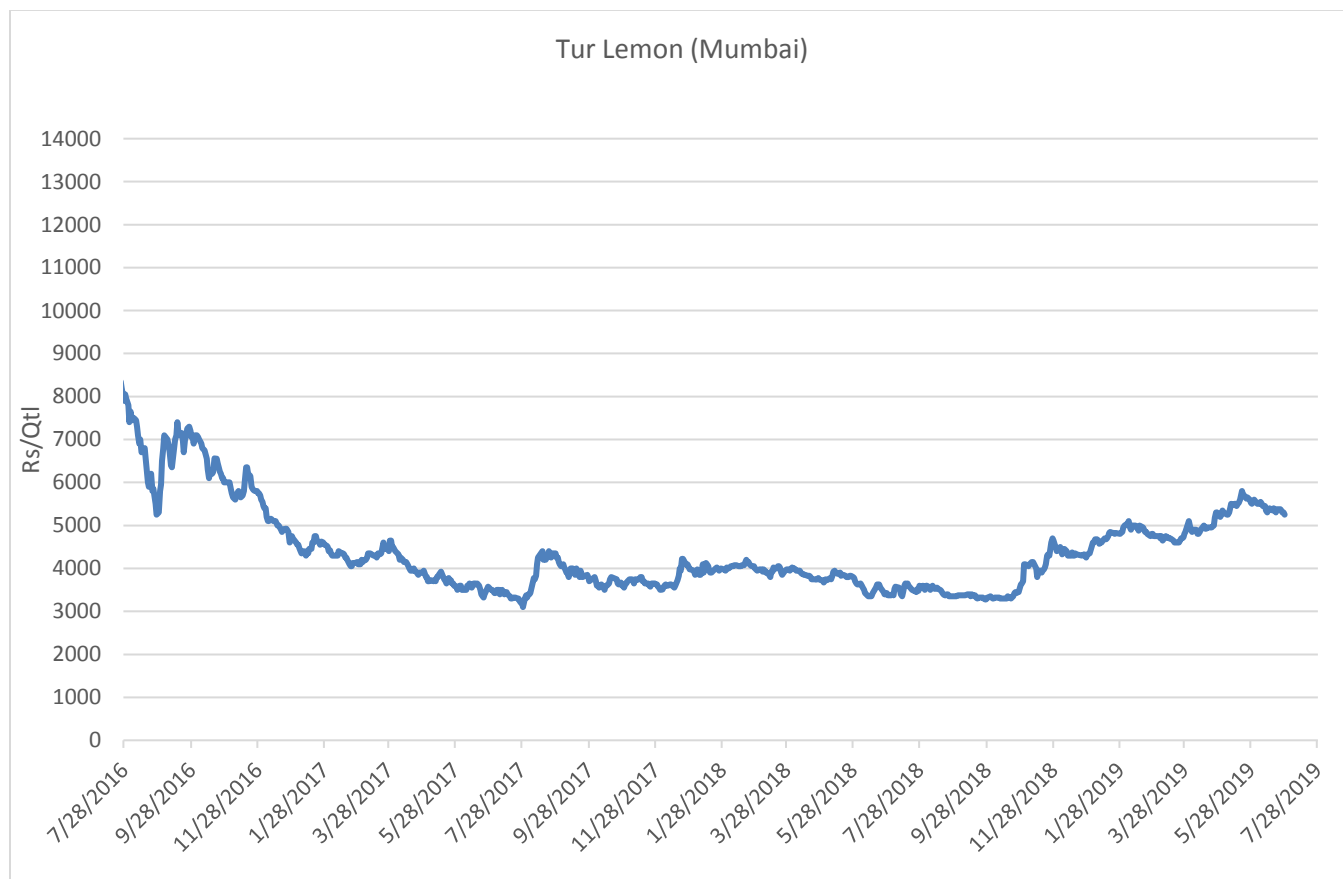

Pigeon Pea (Tur/Toor):

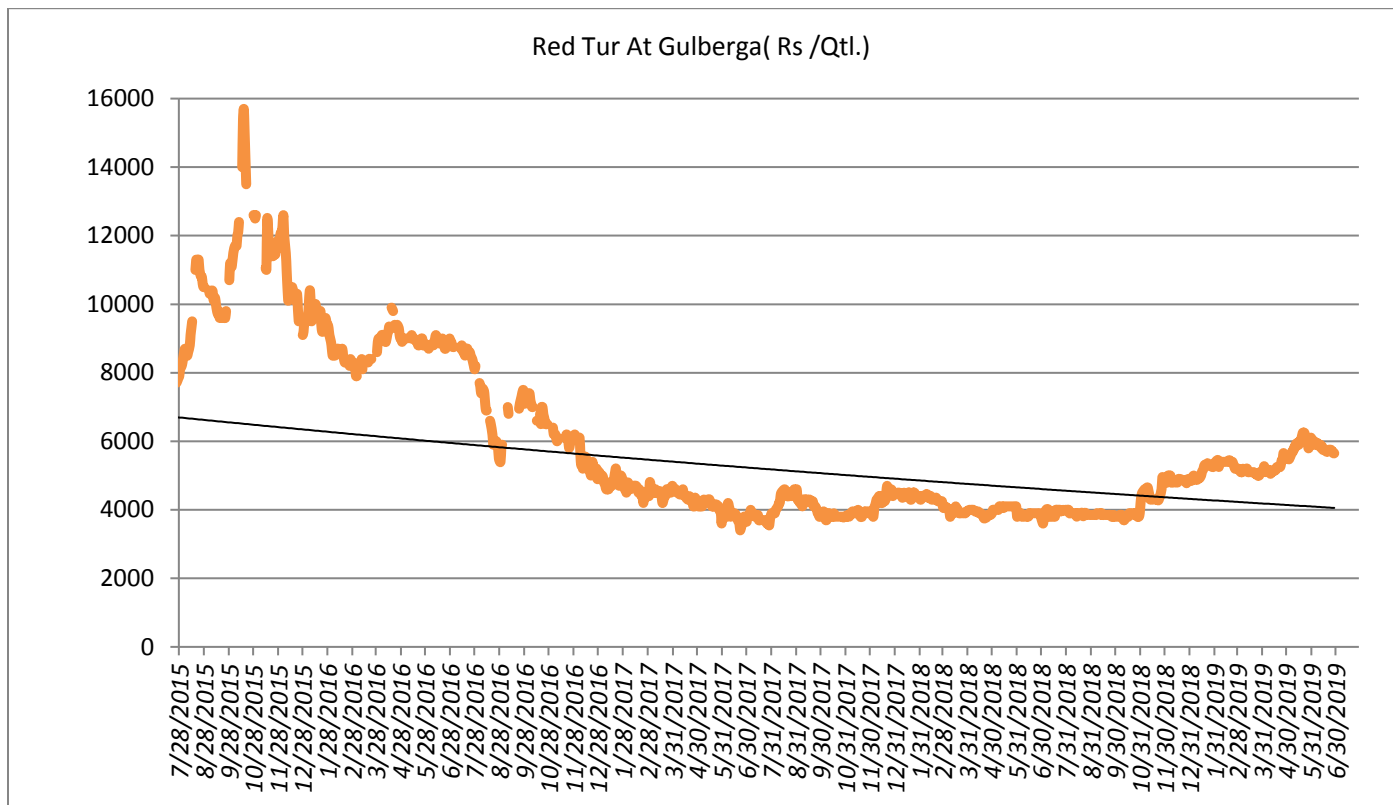

Market Recap:

Govt. has decided to increase import quota from 2 to 4 lakh MT to control prices of tur. License for first two lakh MT impor has been issued now, while another two lakh MT might take time for two to three months and it may hit Indian market by Sep end /Oct. Besides this, govt would import 1.75 lakh MT through G2G basis and would sell 2 lakh MT from buffer stock to contain price of tur. At present govt has 11.53 lakh MT pulses in buffer while Nafed has 27.32 lakh MT pulses. So, there is no panic right now. Apart from this govt. has close eye on stockiest activities. All these developments would not allow market to move beyond a certain limit in coming weeks despite widening disparity gap for lemon tur. There is still pressure on cash market.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak taking clue from other weak pulses. Fresh buying by private trade is about to start again from mid July. Overall outlook for Tur cash market remains weak in the short term. Stake holders should buy on down ward correction as ready stock is decreasing in cash market.

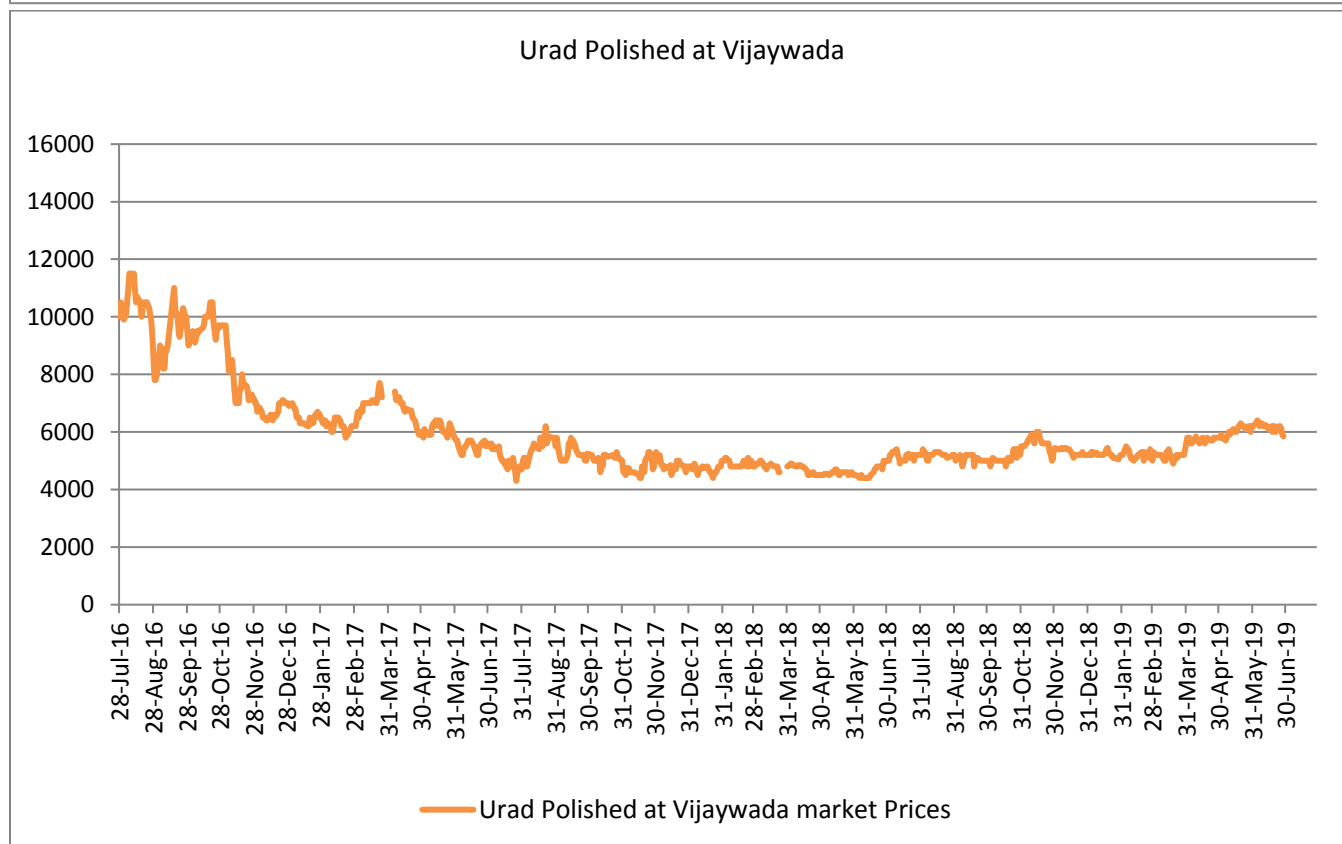

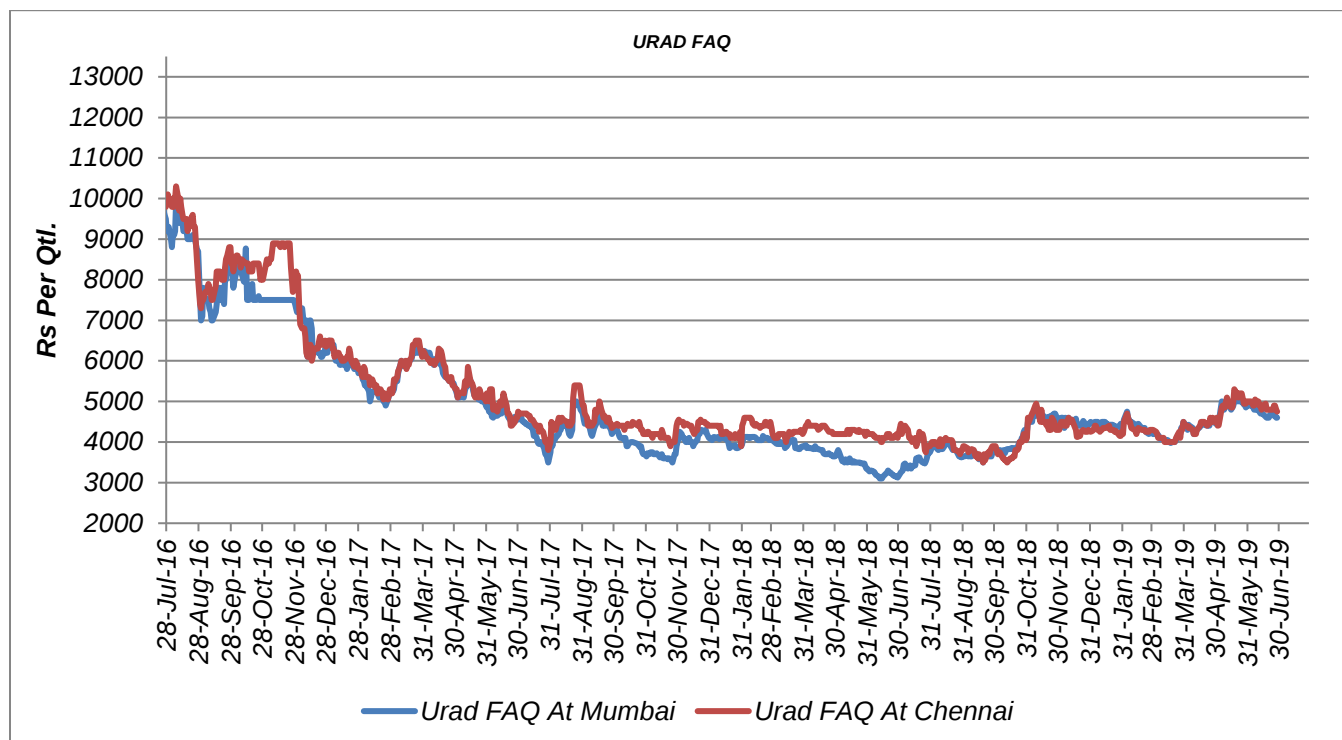

Market Outlook: Tur market may trade weak by Rs100-150 more with increasing arrivals from old stock and poor buying spree.

Black Matpe (Urad):

Urad cash market traded weak taking clue of govt.'s intension to augment supply through import and central pool stock. Besides, stockists too have started releasing stock sensing higher supply from central pool and import.. However, demand for quality urad has improved amid fear of lower crop size in kharif season.. Besides, The DGFT has fixed import quota of urad at 1.5 lakh MT for the whole year starting from 1st April-2019. As demand for urad dal improves in summer season, prices are expected to move up slightly from current level in the second half of the year. No big crop is due till Sep. Before this, green urad from MP and UP would hit market but mostly would be consumed locally in Dhoya dal. Under prevailing market scenario urad price may move down by Rs 100 to 150 more from current level. Currently it is being traded at Rs 4700 to 4750 in Mumbai market. After a slight downward correction, urad may move further up by Rs 200-300. Stake holders should buy on dip and hold stock.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs 4650-4750 per Qtl.) and Chennai (Rs.4900-4950 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

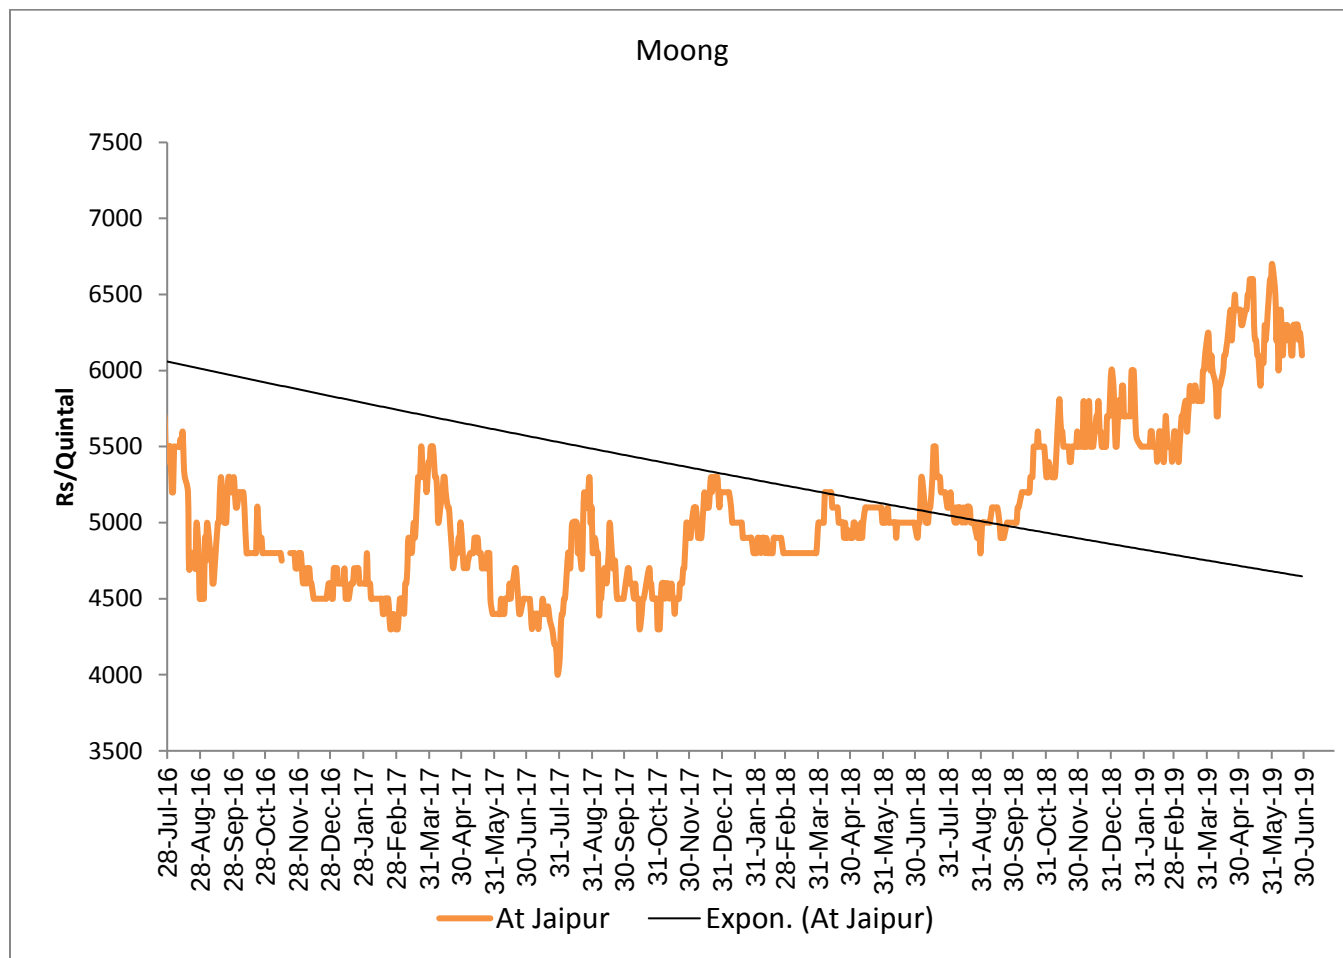

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

Stockists are unwilling to sell moong sensing uptrend to continue in moong market after declining arrival from summer crop. Offtake from mills at lower level may start again. Buyers should buy moong at correction of Rs 100 more. There is no scope of import before July and shortage of quality moong is obvious in cash market. It may push up moong price again by Rs 200-300 from current level. In Jaipur market, moong is being traded at Rs 6100-6150 and in Jodhpur it is being traded at Rs 5900-5950 per qtl. Availability of moong is lower in Maharashtra. In Karnataka moong is being traded at Rs 5700-5950. Stake holders should buy on correction. No new crop is due in next two months The size of new crop from Hoshangabad is lower and it would not impact moong price much as would be consumed locally.

Market Outlook: Moong prices are likely to recover in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in July.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4250 to 4500 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4350 and second target 4450 with stop loss at 4200 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4300	4500	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4650-4850 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4700 with the first target of 4775 and second target 4825 with stop loss at 4650 level.

Support & Resistance
