Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **NCDEX has launched Moong futures on 8th July-2019.** The moong traded on this exchange is unprocessed. The exchange has selected Merta City as main delivery center while Nokha, Jodhpur and Sri Ganganagar would be other centers. In the beginning the contract would be for Aug, Sep, Oct, Nov and Dec-2019.
- **Govt. seems in favor of not selling pulses below MSP.** If it happens, prices of pulses would move up again and volatility would decrease. However, it would be interesting to see how govt. would implement it. There is ample stock in govt.'s godowns and some of them have quality issue. Would govt. sell this too at MSP and how? Remains to be seen.
- **Over all kharif pulses area is lagging behind by 71.55 % to 7.94 lakh ha as on 5th -2019.** Arhar area is down by 75.33 % to 2.45 lakh ha so far while normal as on date is 10.99 lakh ha. Even urad area is down by 73.06 % to 1.86 lakh ha against normal of 5.70 lakh ha till date. Moong area is down by 73.95 % to 2.16 lakh ha against the normal of 7.88 lakh ha till date. Kulthi sowing has just started while other pulses coverage is 47.24 % down to 1.42 lakh ha against normal of 2.48 lakh ha. However, with monsoon advancing in growing regions, sowing activities is likely to pick up in coming weeks.
- **Tur market is likely to trade under pressure due to sluggish offtake by millers.** With the latest decision of allowing 2 lakh MT additional import over and above 2 lakh MT, permission to sell 2 lakh MT tur from buffer stock and sluggish trend in other pulses market affected tur market inner tone negatively and prices decreased by Rs.400 to 450 in last two weeks. Currently, tur in Gulberga market is being traded at Rs 5650-5700. It may move down to Rs 5500. At this level buyers are expected to be active. Stake holders should buy at this level. In a latest development govt has increased MSP of tur from Rs 5675 to Rs 5800 for the new season. It may encourage farmers to maintain tur area at previous year level.
- **Urad sowing coverage too has suffered a lot due to late monsoon rains.** However, fresh rains in major producing states have encouraged sowing activities and coverage area is likely to improve in coming weeks. Indian farmers have planted only 1.86 lakh ha this year till 5th July 2019 against 6.91 lakh ha last year. Normal area in Kharif Urad is 30.77 lakh ha. Major producing states like MP, Rajasthan and UP sowing activities is about to pick up. However, area is expected to decline as urad farmers did not get better price and cash market is still ruling much below MSP. Marginal hike in MSP (by Rs 100 to Rs 5700) would not inspire farmers to maintain area at previous year level. Urad cash market continued to reel under pressure due to weak offtake by millers, higher availability of imported stock, continuous sale by Nafed in various states and higher carry in. However, more downside movement is unlikely.
- **As there is no parity for moong import and there is a shortage of quality crop, moong market is likely to recover once again.** Govt has increased MSP for moong from Rs 6975 to Rs 7050 and it would prefer to buy higher quantity of moong under PM Aashaa programme this year. Besides, kharif area is likely to decrease by 15 to 20 % as in many states sowing time is about to end. There is no import parity, lower stock availability in central pool and stockiest unwillingness to release stock at current price remain supportive to moong market fundamental in coming weeks. Moong in Jaipur market would continue to trade in the range of Rs 6000-6500 in July. It may move further up in coming months.
- **Just opposite to normal expectation Chana cash market traded weak in June and there is no hope for any major recovery in July too.** Nafed has ample stock (over 2 MMT), old and new combined, and it would continue to sell through auction in coming months as it has to vacate storage for new kharif crop, expected from August end. Besides, in monsoon season demand for chana and its dal decreases as availability of green vegetables and mango increases. Apart from this farmers and traders still have Chana stock, just double from last year. So, any major recovery in chana market is unlikely in July. Even futures too are indicating downward trend. Chana in July may trade in the range of Rs 4100-4400 in Delhi market. July onward market may improve to a certain extent due to festive demand for chana products may increase. Higher availability would continue to cap uptrend in chana market.

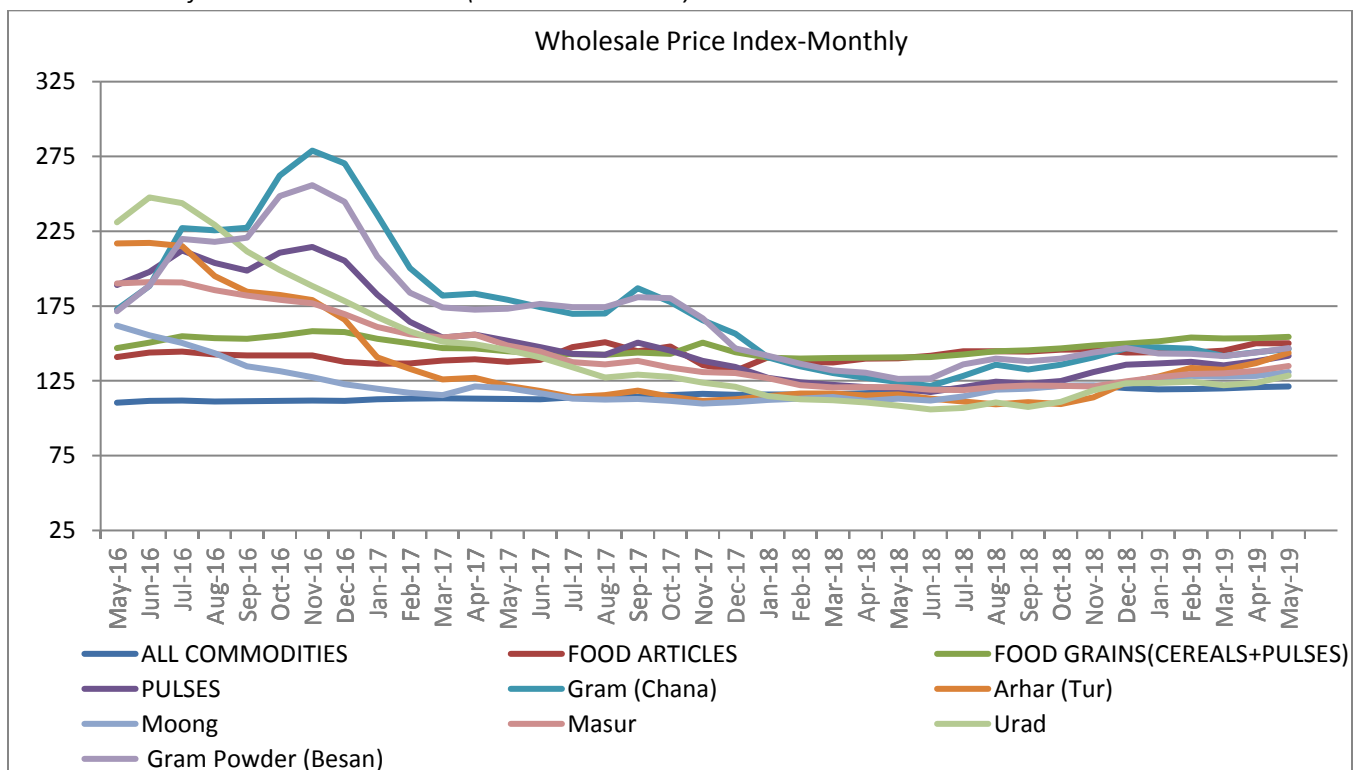

International Market:

- **As per Eurostat latest data pea import in Spain decreased by 91% to 635MT in April against 7409 MT in March-2019.** In the ongoing MY Spain has imported total 21953 MT against 47045 MT last year till April-2018. France exported 581MT to Spain in April-2019 followed by Canada(48MT) and Belgium (3 MT).
- **Pea Export from Lithuania in April-2019 declined sharply in comparison to previous month(March).** It declined from 28,592 MT(March) to 22,097 MT in April-2019. This MY total export was registered at 94,984 MT, down by 26 % from last year till corresponding months. France brought 13,950 MT, followed by Germany(2,281 MT) & Latvia (2,260 MT)
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Dry pea area is expected to increase by 20% in US to 10.3 lakh acres in 2019** as per estimate by USDA. Harvested area too is up by 20% from 2018 to 9.72 lakh acres. Planted area is up in all states except Nebraska and South Dakota. In Montana, as of June 23, blooming reached 24%, ahead of last year's 21% but well behind the 5-year average of 53%. As of June 23, blooming reached 15% in North Dakota, well behind both last year and the 5-year average.
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha in 2019-20.** The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20** due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- **US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year.** This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20** due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase in 2019-20.

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

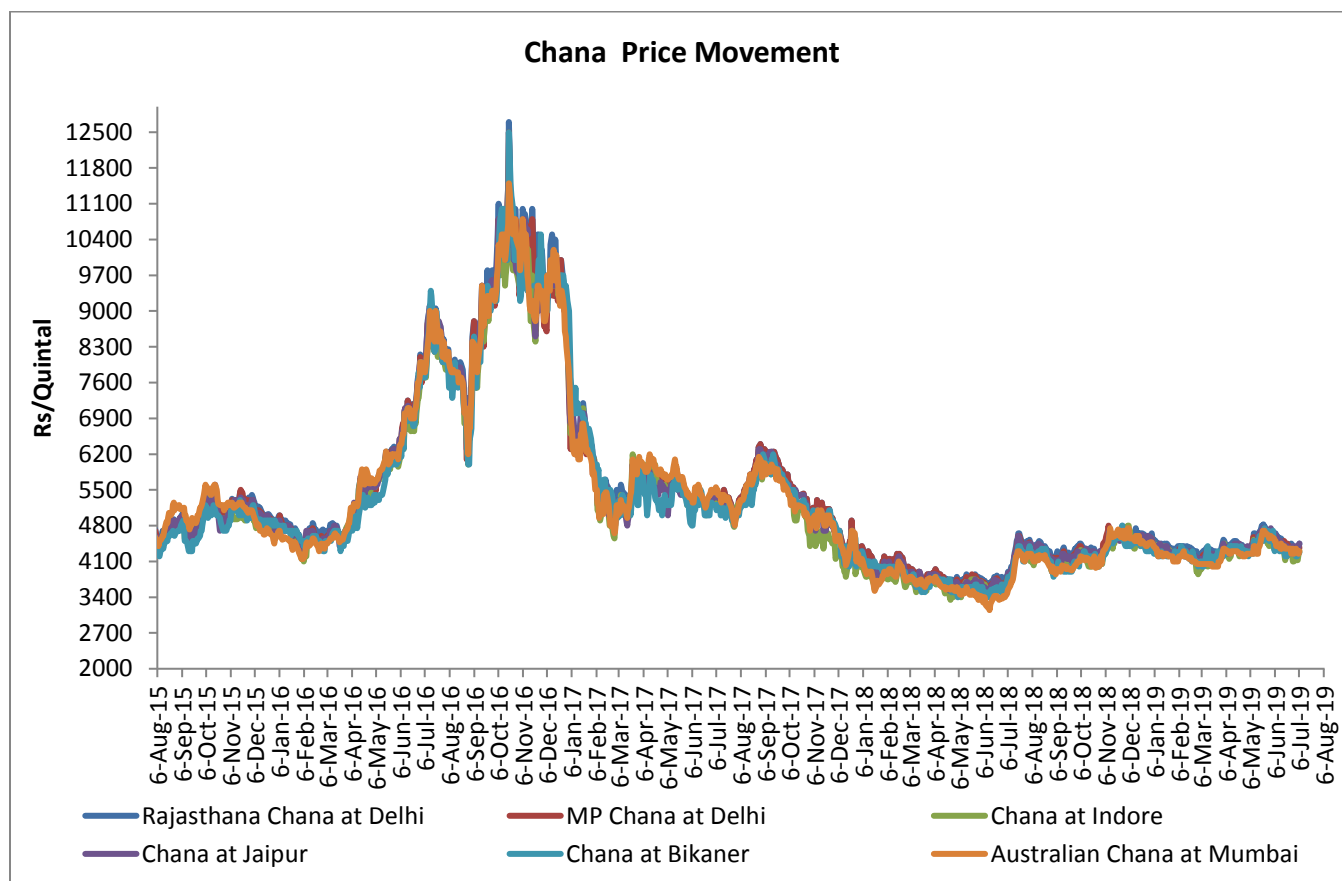

Pulses-Wise Scenario:

Chana

Current Scenario:

There is no respite for chana and it continued to reel under pressure against all expectation. Higher stock in central pool, Nafed willingness to sell it continuously through auction as kharif procurement drive is hardly two and half months away from now, weak demand and bearish futures remain price affecting facts for chana cash market. There is lot of stock in central pool(over two MMT) and stock in cold too is said to be double from last year. Demand remains restricted as mills are buying only to fulfil their immediate needs. Chana market may decrease further by Rs 100-150. At this level stake holders should buy as it may move up again by Rs 200. Quality of chana stored out in Nafed godowns is affected and it may push up quality chana price up but not before Aug-Sep. Festive season has begun and demand for chana products may improve. However, any major spike in Chana market is unlikely. Stockiest should continue to release stock at every rise of Rs 100.

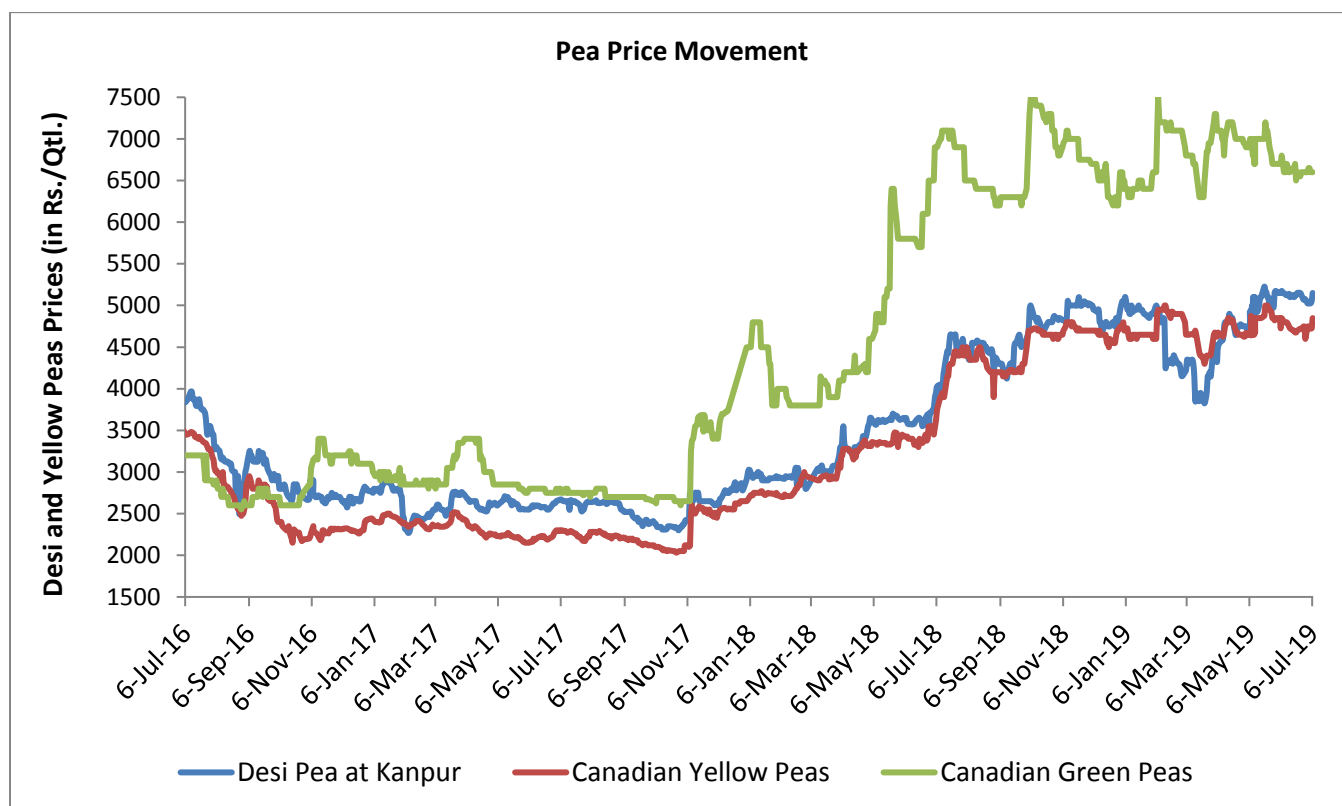

All India average price for Chana decreased by 2.81 percent from Rs 4531 (May) to 4403 per qtl.in June-2019. Australian Chana (imported) price too decreased by 1.12 percent from Rs 4443 to Rs 4393 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week too

Peas (Matar):

Market Recap:

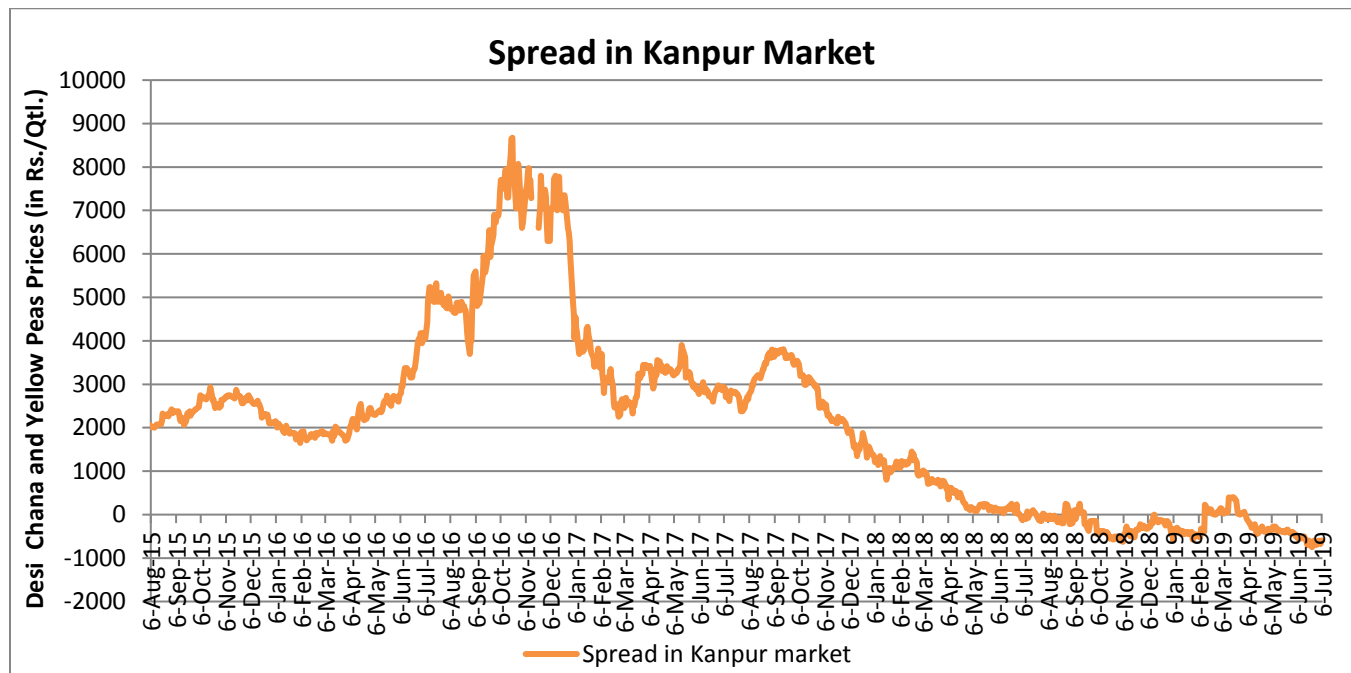

Govt has allowed pea import for seed purpose. However, suspicion in Pea market continues as there is no set method to stop it entering into cash market. Somarket remains under pressure. Even chana market remains unsupportive for cash pea market. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. However, with weakness in chana, pea may trade weak too despite tight supply side expected in coming weeks. Stockiest may prefer to release stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep. Earlier, market was expecting higher import quota. Pea in Mumbai market is being traded at Rs. 4750-4850 while in Kanpur market it is being traded at Rs 5050-5100 per qtl. As chana price has started decreasing, pea too may trade weak. As, there would be shortage of imported crop, price is bound to move up taking clue from other pulses in the second half of the year. Stake holders should buy on downward correction.

Current Market Dynamics & Outlook:

Pea traded at Rs 5000-5100 in Kanpur market, almost stable at last week level. Decreasing imported stock may support pea price further in span of time but not before a downward correction of Rs 200 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 450-550 in July on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly weak this week.

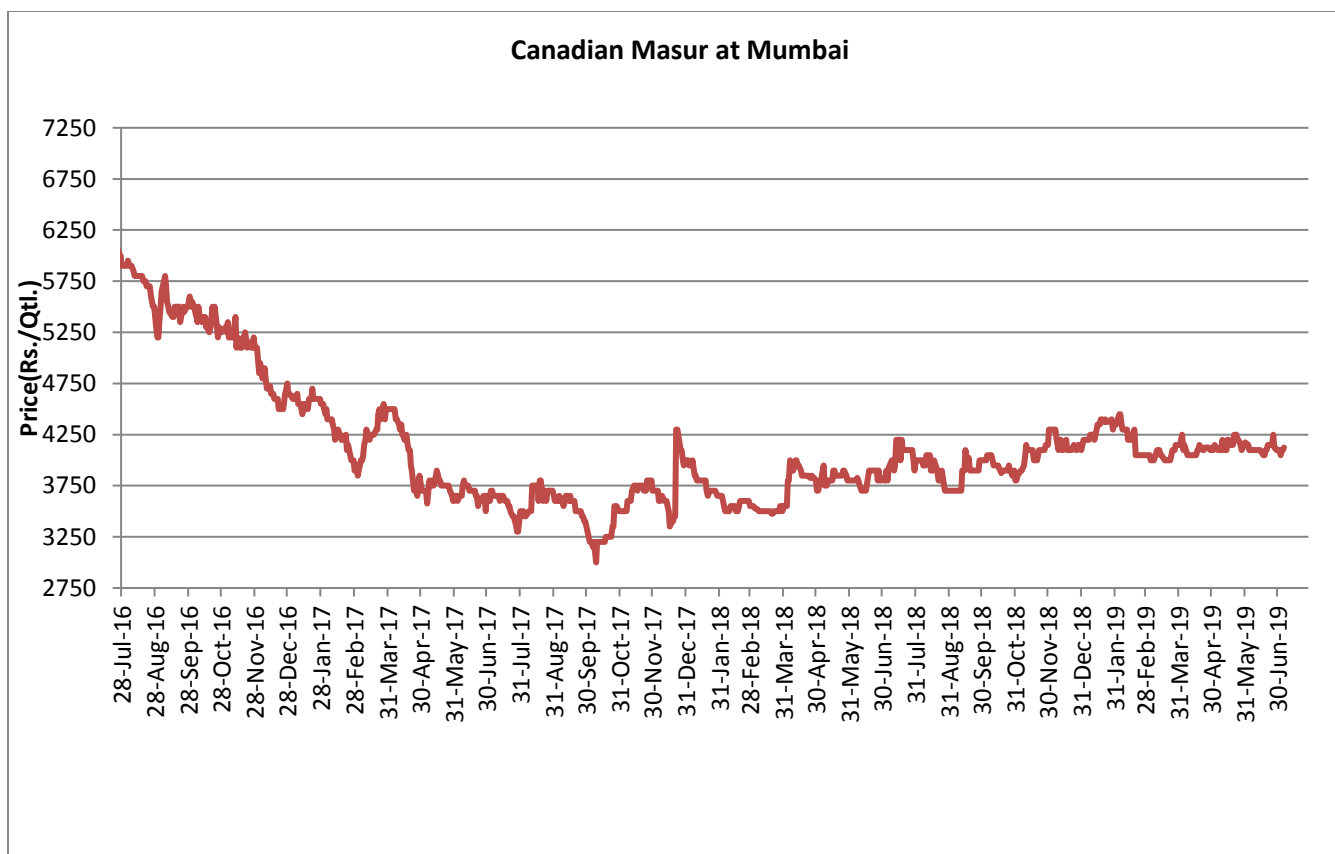

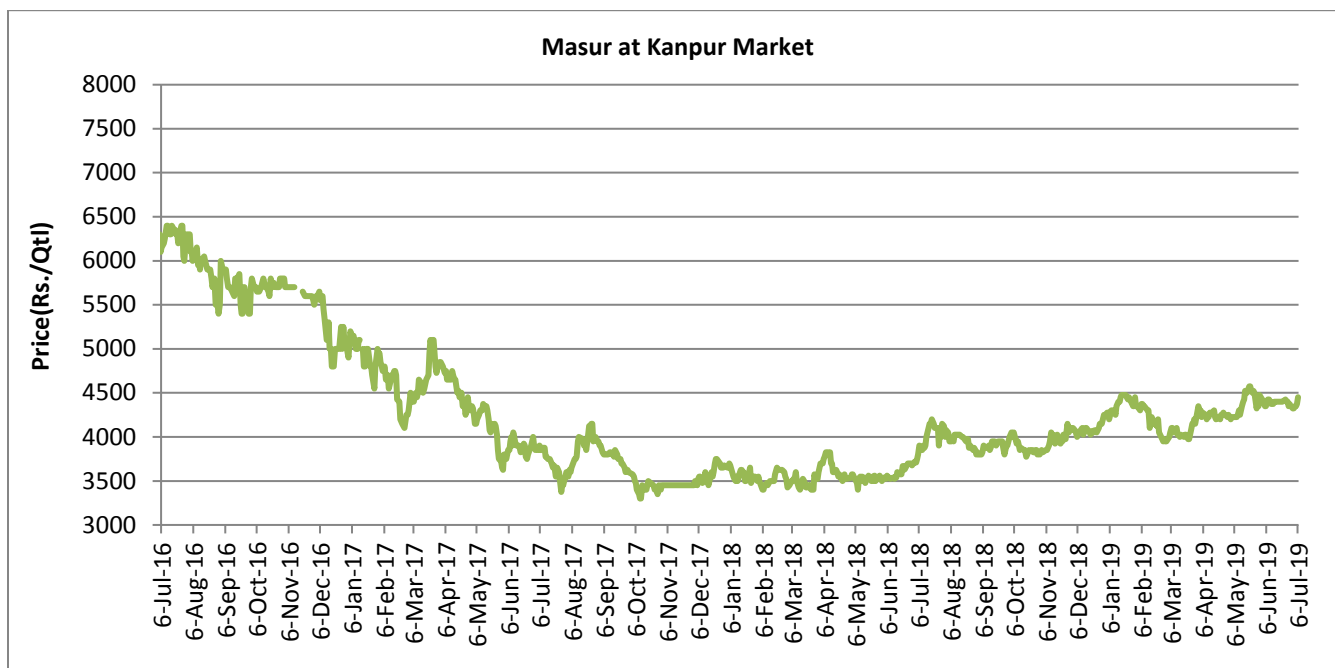

Lentils (Masoor):

Market Recap:

Lentil in global market is being traded at higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time, supply side has eased to some extent. Demand for lentil dal too is weak at this point of time. So lentil built price stayed steady at Rs 4350-4450. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to improve from current level. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. So masur may move up again from current level.

Current Scenario:

In the 1st week of June-2019, average price in key market like Kanpur was down by 0.34 % to Rs 4350-75 per qtl. Prices are likely to trade steady in July to a certain extent. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all trade weak right now. Demand is expected to improve by the end of this month.

Market Outlook: Prices are likely to notice weak movement due to slower procurement drive, fear of selling by Nafed and increasing arrival amid higher import volume.

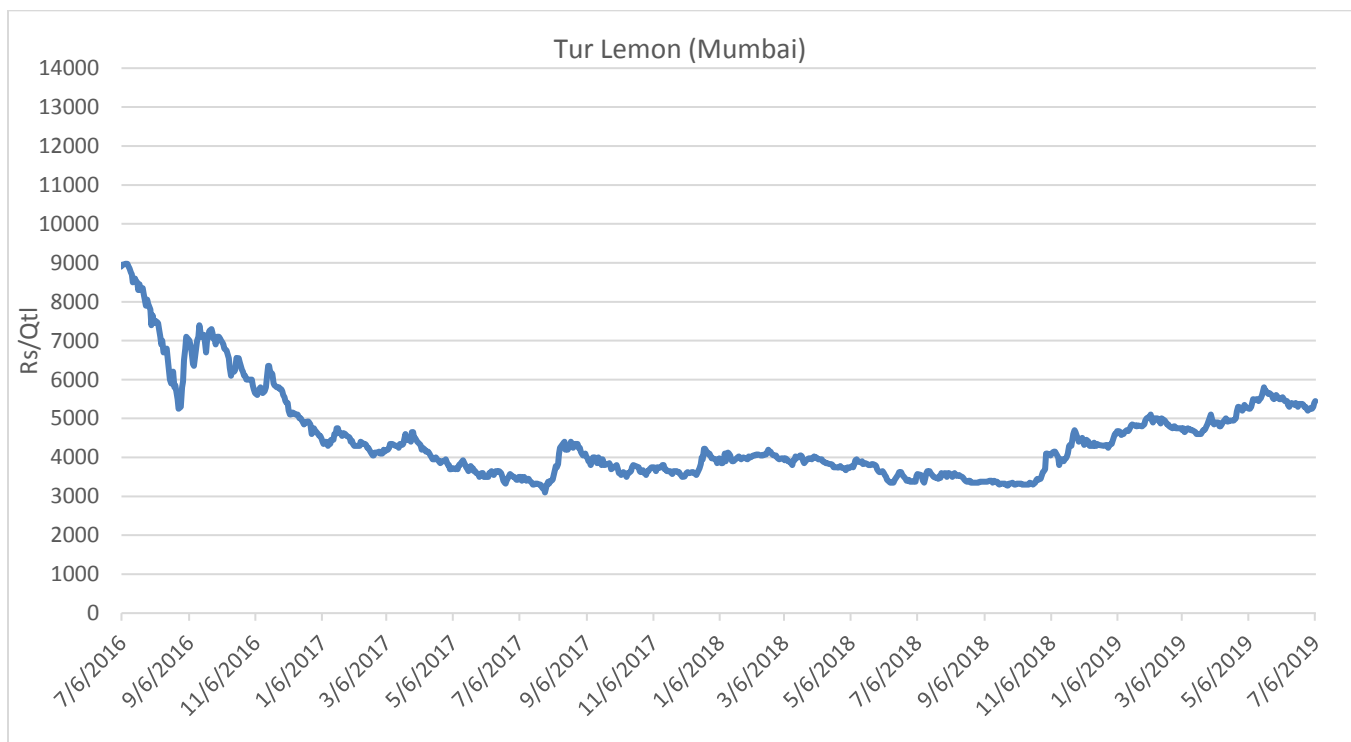

Pigeon Pea (Tur/Toor):

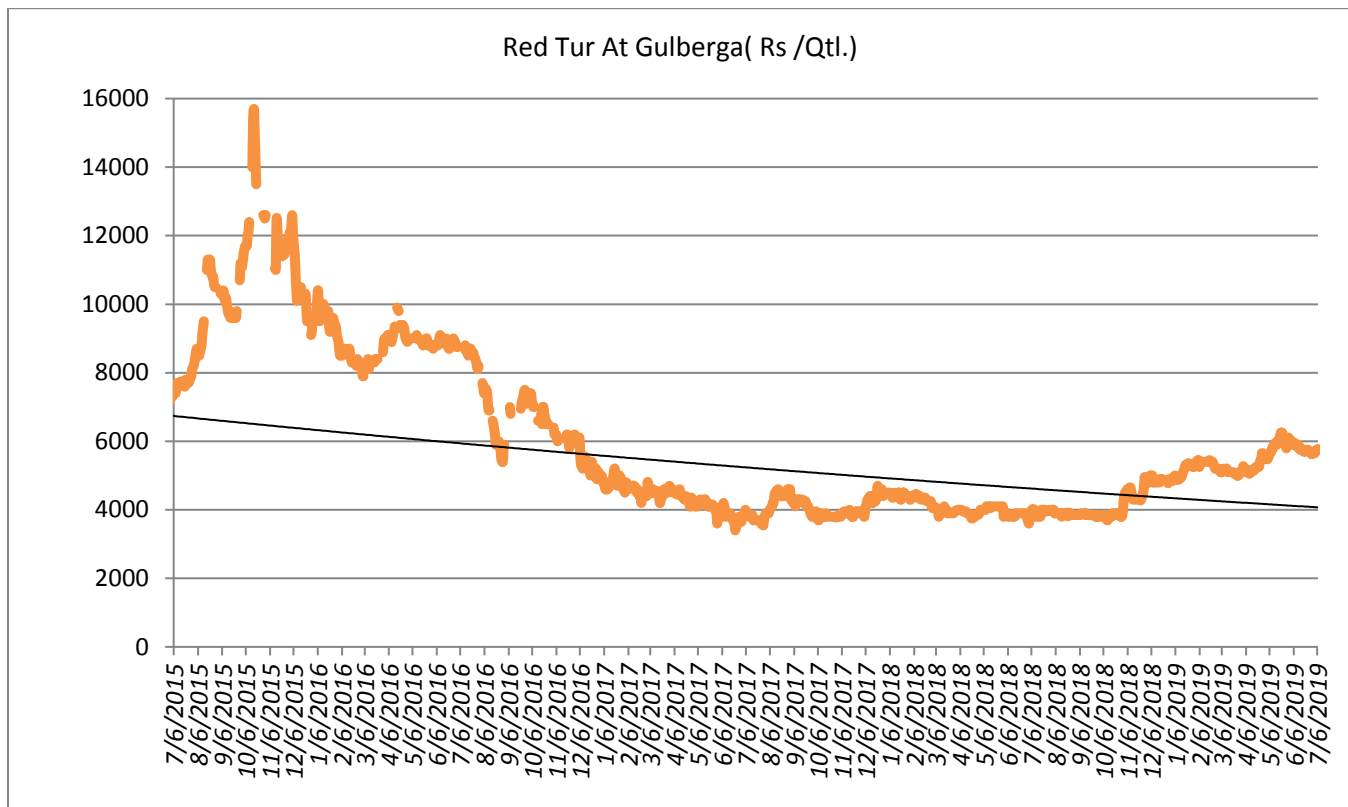

Market Recap:

Tur cash market traded up in the beginning of June and crossed 6000 level in Gulberga market. Lower crop size and fear of lower acreage this year too due to delayed monsoon helped market to trade continuously up from MSP. However, govt decision to allow additional 2lakh MT import over and above 2 lakh MT allowed previously and decision of selling 2 lakh MT from buffer stock weakened upward momentum in the market. Prices decreased by Rs350-450 in last 15 days. However, demand from mills is likely to improve and tur may improve again in July and continue to rule above 5675(MSP) in Gulberga market. Besides, some support is expected from higher MSP for 2019-20 crop. MSP of tur has been increased by Rs 125 to Rs 5800. In July tur market is expected to trade at Rs 5500-6000. As rains started in main growing region, sowing activities are likely to pick up and farmers may make out lower coverage. Availability is expected to remain at ease. So any major jump in market is unlikely in July. Myanmar is offering new tur at \$760-765 per MT in forward deal.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak on the back of lower demand on higher level. Availability would increase as enhanced import quota from 2 to 4 lakh MT. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. Restricted selling by stockiest, fear of lower area due to moisture stress in the field would remain supportive to cash tur market in the medium term.

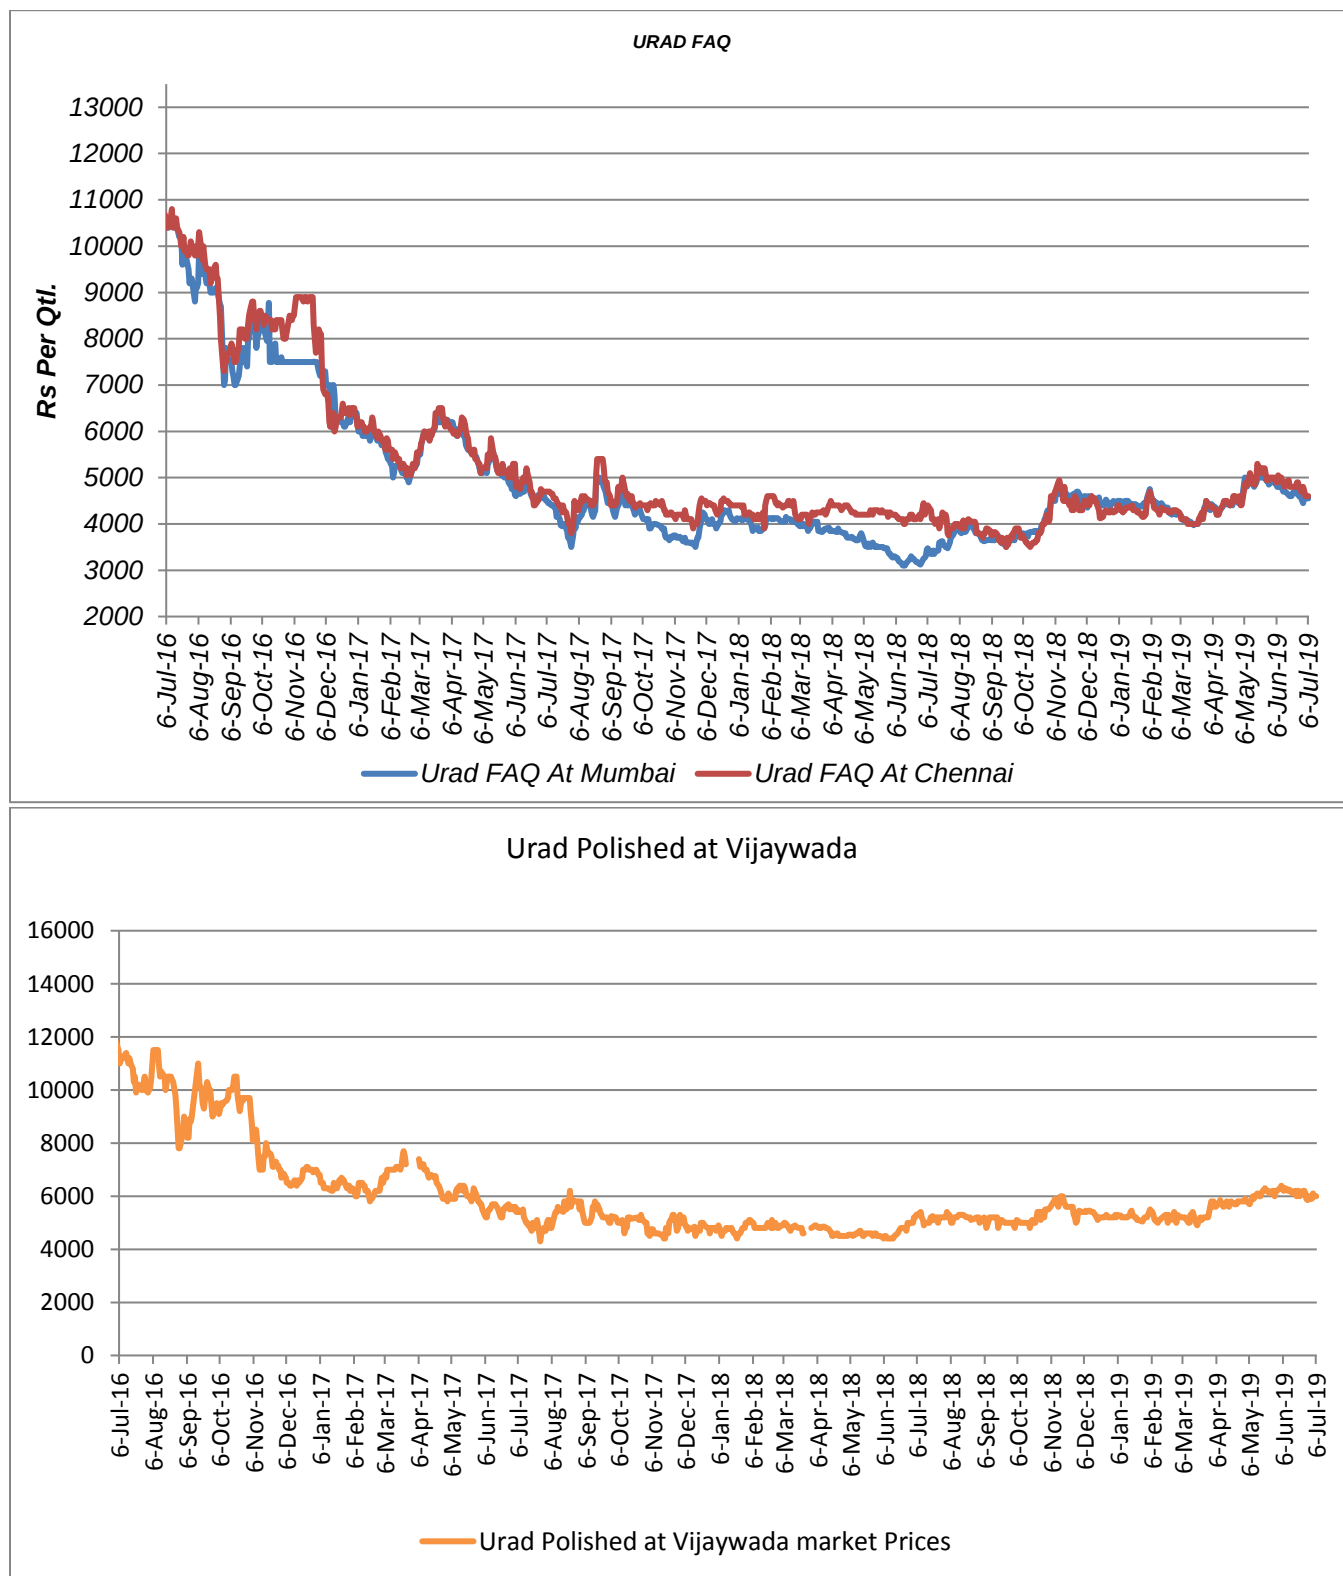

Market Outlook: Tur market may trade weak by Rs100-150 more with increasing arrivals from old stock and poor buying spree.

Black Matpe (Urad):

Urad area is likely to decline despite higher MSP for 2019-20 crop. MSP has been increased from Rs5600 to Rs 5700. Farmers are preferring coarse cereals to urad and moong this year. So any major decline in urad price is unlikely despite higher import and carryout stock. Buyers should buy urad at decreased level and hold it. Import would remain restricted at 1.5 lakh MT. So at current price there is no risk in Urad. Right now demand is weak. In the short to medium term, urad may trade up by Rs250 to 400.. Stockiest have started holding stock as import flow would remain restricted. Burden of old crop too is decreasing, and it may push urad price further up from current level. Urad may continue to trade at Rs4500-4850 per qtl in various markets in coming weeks. In Chennai market urad is being traded at Rs 4750-4775 per qtl. Buying at dip seems good at this point of time.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4550-4650 per Qtl.) and Chennai (Rs.4700-4850 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

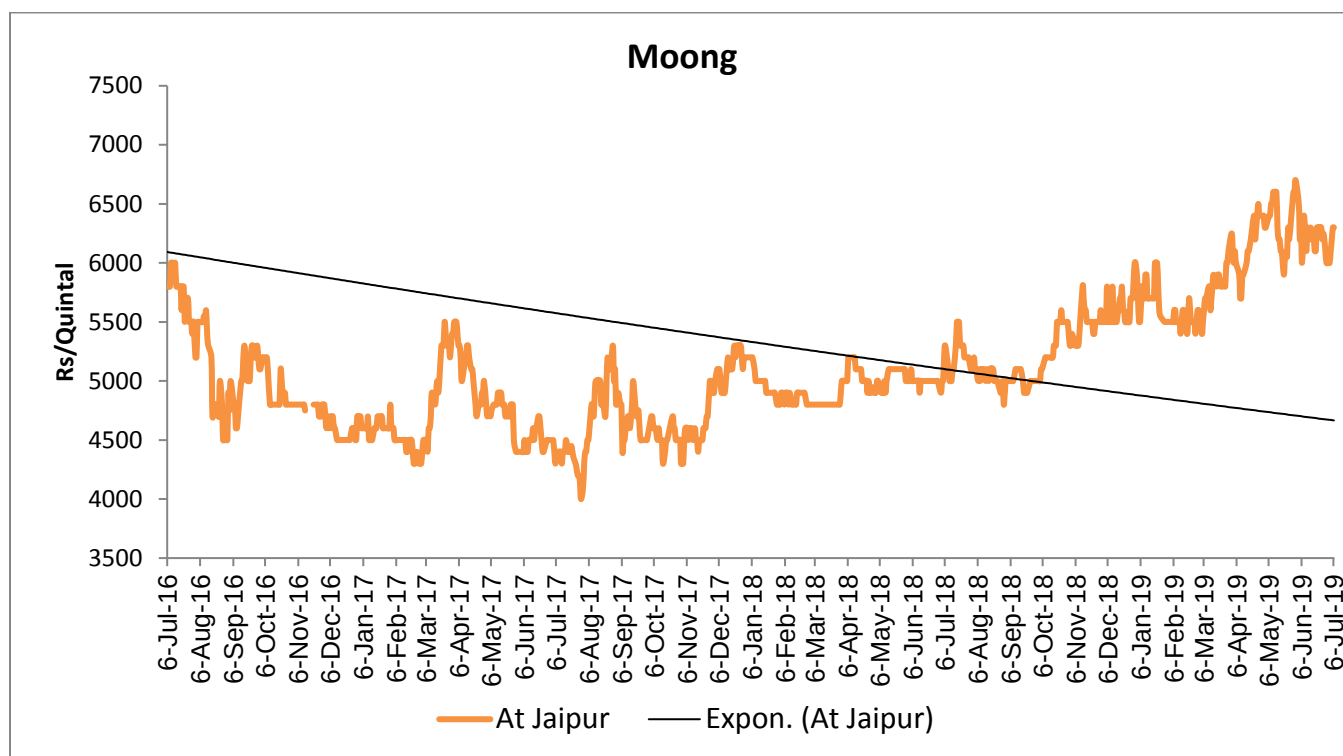

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

As there is no parity for moong import and there is a shortage of quality crop, moong market is likely to recover once again. Govt has increased MSP for moong from Rs6975 to Rs 7050 and it would prefer to buy higher quantity of moong under PM Asha programme this year. Besides, kharif area is likely to decrease by 15 to 20 % as in many states sowing time is about to end. There is no import parity, lower stock availability in central pool and stockiest unwillingness to release stock at current price remain supportive to moong market fundamental in coming weeks. Moong in Jaipur market would continue to trade in the range of Rs6000-6500 in July. It may move further up in coming months.

Market Outlook: Moong prices are likely to recover in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

- ❖ Chart depicts steady to slightly weak movement in July.
- ❖ RSI is moving down in neutral region.
- ❖ Expected price band for Chana in Delhi is 4250 to 4500 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4350 and second target 4450 with stop loss at 4200 level.

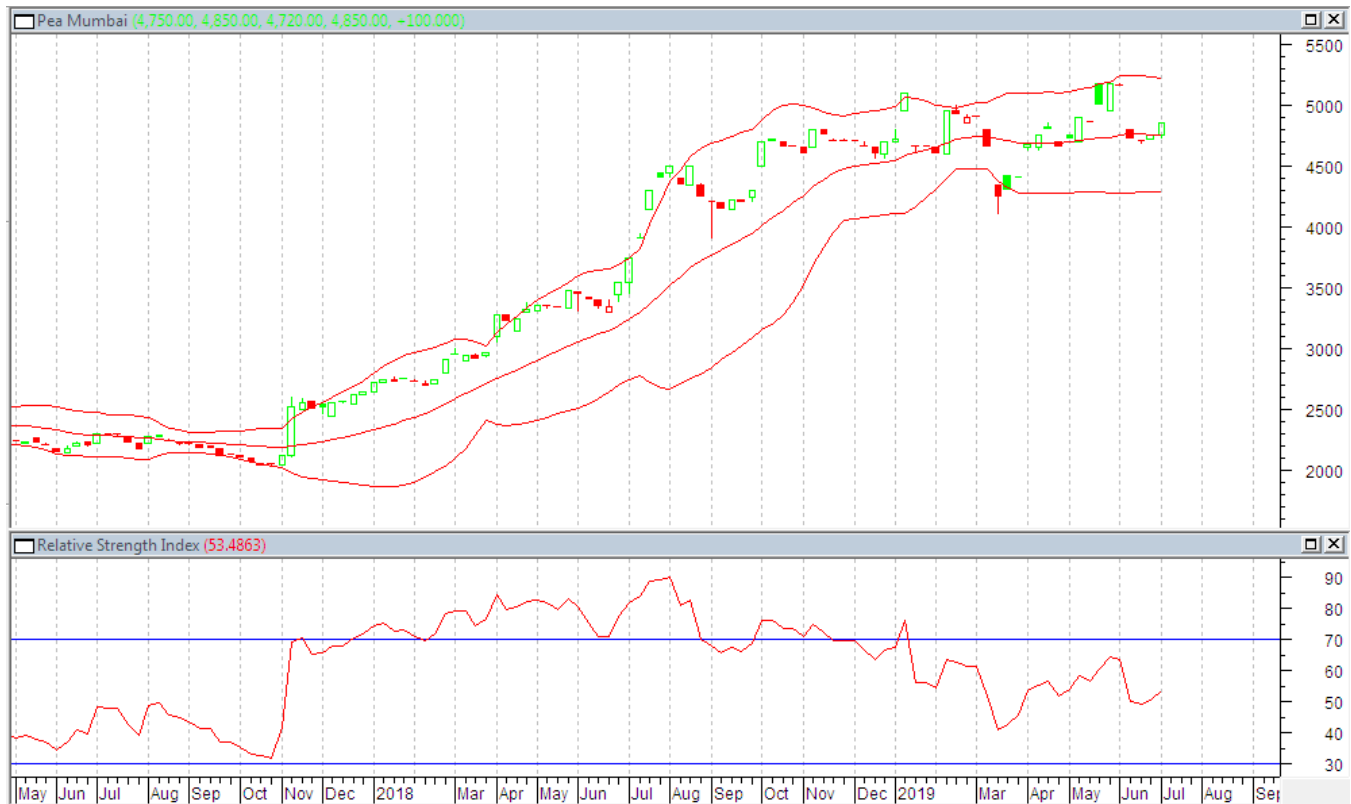

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4200	4275	4500	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week taking clue from weak chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT .

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4750-5050 in this week

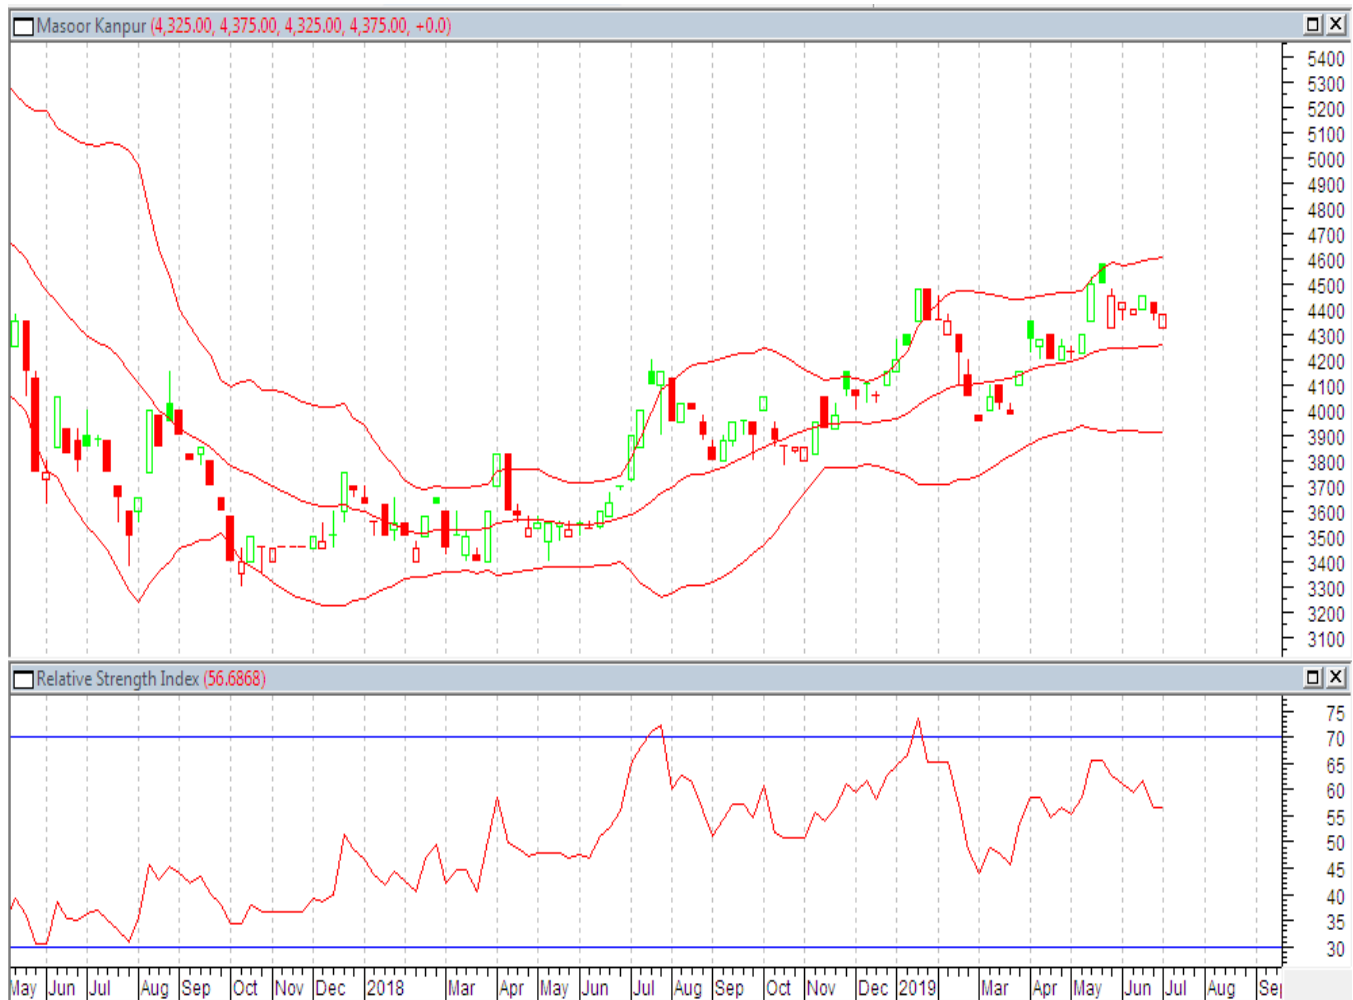

Strategy: Buy on dip

Trade Recommendations: Go long around 4800 with the first target of 4975 and second target 5000 with stop loss at 4650 level.

Support & Resistance
