Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

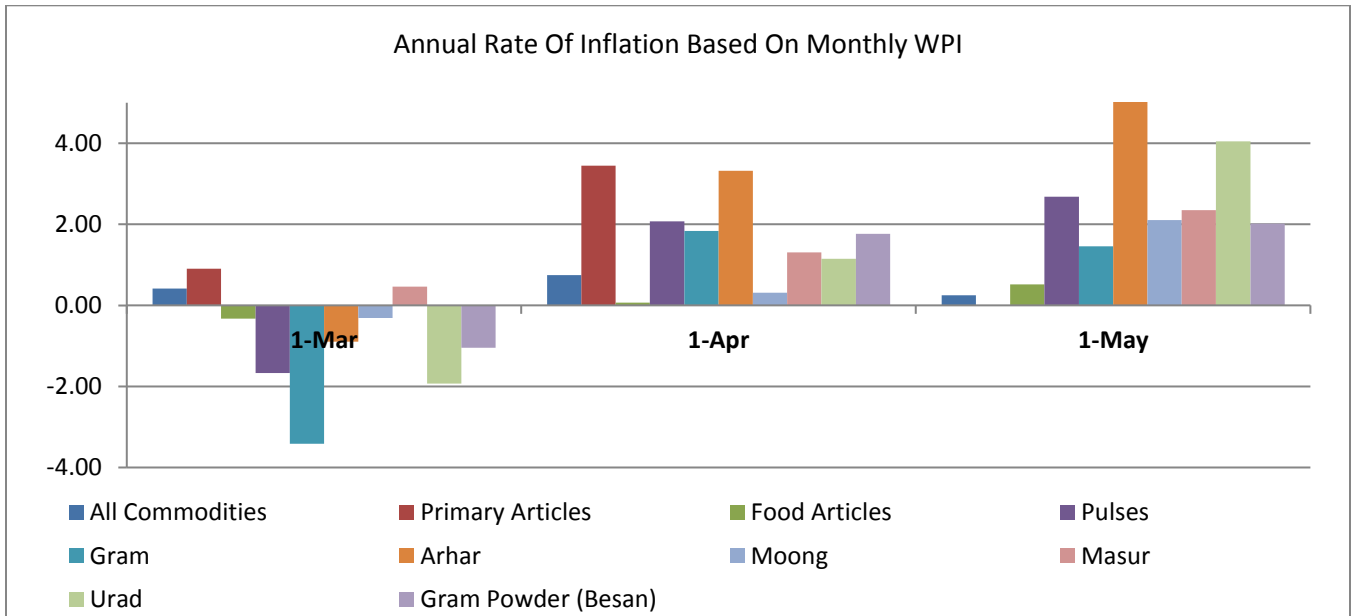

- **Over all kharif pulses area is lagging behind by 25.16 % to 34.22 lakh ha as on 12th July -2019.** Arhar area is down by 21.73 % to 12.44 lakh ha so far while normal as on date is 18.27 lakh ha. Even urad area is down by 25.71 % to 8.59 lakh ha against normal of 10.64 lakh ha till date. Moong area is down by 23.99 % to 10.58 lakh ha against the normal of 13.95 lakh ha till date. Kulthi sowing has just started and it running behind by 50.47 % to 0.10 while other pulses coverage is 39.45 % down to 2.51 lakh ha against normal of 6.16 lakh ha .However, with monsoon advancing in growing regions, sowing activities is likely to pick up in coming weeks and farmers will be able to cover the gap in coming weeks.
- **At planting front Indian farmers have covered 12.84 lakh ha as on 12, July-2019. It is lower** by 21.73% from last year. Normal area till date is 18.27 lakh ha and normal of the whole season is 43.00 lakh ha. The major growing state like Karnataka & Maharashtra planting is running behind by 32.80 % to 2.96 and 23.64 % to 3.82 lakh ha so far. Normal area in these states are 8.62 and 12.53 lakh ha. In AP normal area for tur is 2.37 lakh ha .However, farmers have covered only 0.06 lakh ha so far against 0.24 lakh ha last year. Against it, farmers in Telangana have covered 2.66 % higher area to 1.73 lakh ha this year so far. In MP area under tur is running behind by 27.23 % to 1.47 lakh ha. Normal area in M.P. is 5.80 lakh ha. Area in UP and Orissa has improved from last year by 28.35 and 32.86 % to 1.14 and 0.37 lakh ha so far. Situation is expected to improve in coming weeks.
- **With better rainfall in growing region pressure on tur market continues and it lost Rs 100 more to Rs 5700** in Gulberga market. It may decrease to Rs 5600. At this level buyer would be active once again. Lower crop size last year and bleak prospects this year too would not allow market to decrease beyond a certain level. Stockiest are unwilling to sell at current level despite higher import quota of 4 lakh MT and possibility of 1.75 lakh MT more import through G2G basis. Govt. is willing to keep supply side at ease. So, any major spike in tur market in the near term is unlikely.
- **At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan & Gujarat.** Indian farmers have covered 8.59 lakh ha so far against 11.56 lakh ha last year till date. It is lower by 25.71 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 48.34 % to 2.95 lakh ha against season's normal of 10.67 lakh ha. Situation in UP too is not good .Area under kharif urad is running behind by 49.71% to 0.70 lakh ha. However it is up in Rajasthan by 87% to 2.92 lakh ha against 1.56 lakh ha last year as on 12th July-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.02 lakh ha so far. Even in Telangana farmers have covered 0.13 lakh ha against normal of 0.30 lakh ha.
- **Kharif moong sowing is on and recent rains are considered to be beneficial to the standing crop. It has encouraged** farmers to use late varieties and compensate the area loss due to late monsoon this year. All India kharif area coverage under moong is running behind by 24 % to 10.58 lakh ha as on 12- July-2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. Prices of moong in cash market is likely to stay steady to slightly weak. Nafed has started selling moong from old stock. However, there is a short supply of quality moong in cash market and it would not allow market to decrease beyond a certain level. In Jaipur market moong is being traded at Rs 6300 .It may come down to Rs 6200 and move up again. New crop would start hitting the market only from August end .So any major dip is unlikely in the near term.
- **Chana cash market trades under pressure taking clue from weak futures and ample stock available** in central pool. Millers are unwilling to buy in bulk quantity as demand from retail market remains discouraging. In Delhi market chana is being traded at Rs 4400-4425. It may come down to Rs 4350. At this level buyers are expected to return into market. If Nafed sells chana below Rs 4250-4300, cash market is unlikely to recover in the near term. If it sells around 4400-4500, it may lend some support to cash market. Supply side is at ease amid weak demand. In short price direction for chana market depends on Nafed selling strategy in coming weeks. It is clear that Nafed would not be able to retain stock for more time as kharif procurement season starts in Aug-Sep.

- **Lentil market traded steady to slightly weak due to poor offtake from mills and continuous import flow.** As consumption is more than availability, prices of lentil is likely to improve in coming weeks. Masoor in Kanpur market is being traded at Rs4350-4400 while it is being traded at Rs Rs4100 in Mumbai market. Nafed still has over 1.25 lakh MT stock and it would start selling August onward. Overall trend remains firm.

International Market:

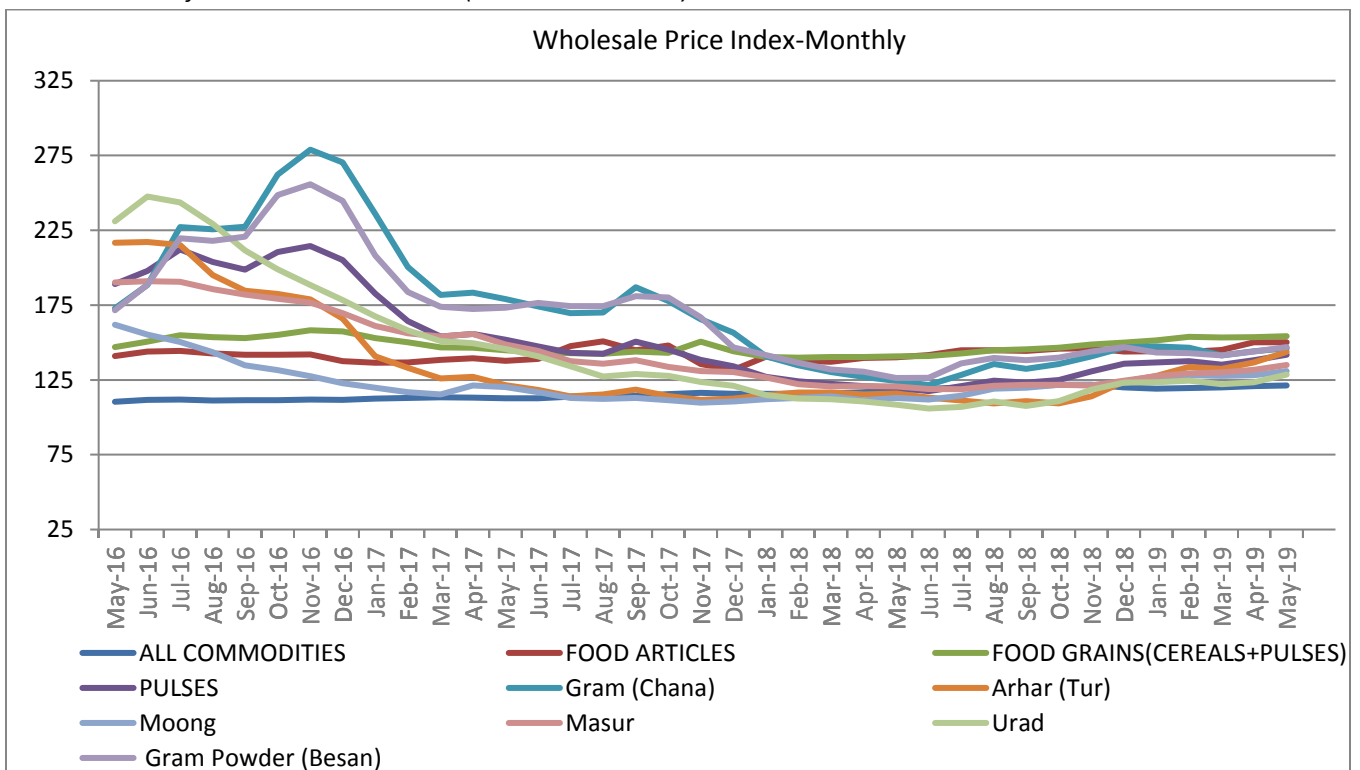

- **As per latest data received from Russian Federal Customs Service chickpeas export** from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858MT. Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyers buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Russian export of peas posted slight gain in comparison to March-2019.** In April Russia exported 55930 MT peas, up by 8% to 51836MT in March. In current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan brought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.
- **Dry pea area in Canada is expected to increase by 12% over last year to 1.6 million ha** in 2019-20. The reason behind higher area is mainly attributed to higher return and good demand for export over previous year. The major states like Saskatchewan and Alberta contribute 54 and 42 % in total production in Canada. Production is expected to increase by 12% to 4 MMT over previous year due to higher area coverage. Despite higher production supply side would increase marginally as carryout is lower. Demand from China and B, desh is expected to decline in 2019-20. Carry in may increase slightly to 0.4 MMT in 2019-20.
- **Dry pea area is expected to increase by 20% in US to 10.3 lakh acres in 2019** as per estimate by USDA. Harvested area too is up by 20% from 2018 to 9.72 lakh acres. Planted area is up in all states except Nebraska and South Dakota. In Montana, as of June 23, blooming reached 24%, ahead of last year's 21% but well behind the 5-year average of 53%. As of June 23, blooming reached 15% in North Dakota, well behind both last year and the 5-year average.
- **Even in US dry pea area is expected to increase slightly to 9 lakh Acres in 2019-20** due to higher area coverage in Montana. Production of pea in US is likely to decline by 35 to 0.7 MMT in 2019-20. The major buyers of US pea are Canada, the Philippines and Yemen.
- **Chickpea area is expected to fall in Canada from 176 to 133 thousand Ha in 2019-20** while production is expected to fall from 3.11 to 2.30 lakh MT. Supply is forecast to increase due to higher carry-in stocks, but softened by lower imports and production. The average price is forecast to fall due to larger world supply, with the expectation of an average grade distribution in 2019-20 as per Canada Stats.
- US chickpea area for 2019-20 is forecast by the USDA to decrease by 40% to 0.52 million acres from the previous year. This is largely due to an expected fall in area in Idaho, North Dakota and Washington. Assuming normal yields. Production is likely to decline by 43% to 0.33 MT in 2019-20. The major market for US is EU, Pakistan and Canada.
- **Lentil area in Canada is expected to decline 10% to 1.4 million ha in 2019-20** due to the sharp decline in farm gate lentil prices in the second half of the 2018-19 crop year. Saskatchewan is a major lentil producing state accounting for 91% of the lentil area. Production is likely to decline to 2 MMT in 2019-20. Due to lower production and carryout supply side is expected to fall to 2.8 MMT. Export is likely to be stable at 1.8 MMT in 2019-20. Carryout would decrease to 0.5 MMT. So average price for top grade may increase in 2019-20.

Pulses WPI Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 point from 138.1 in April to 141.8 in May-2019

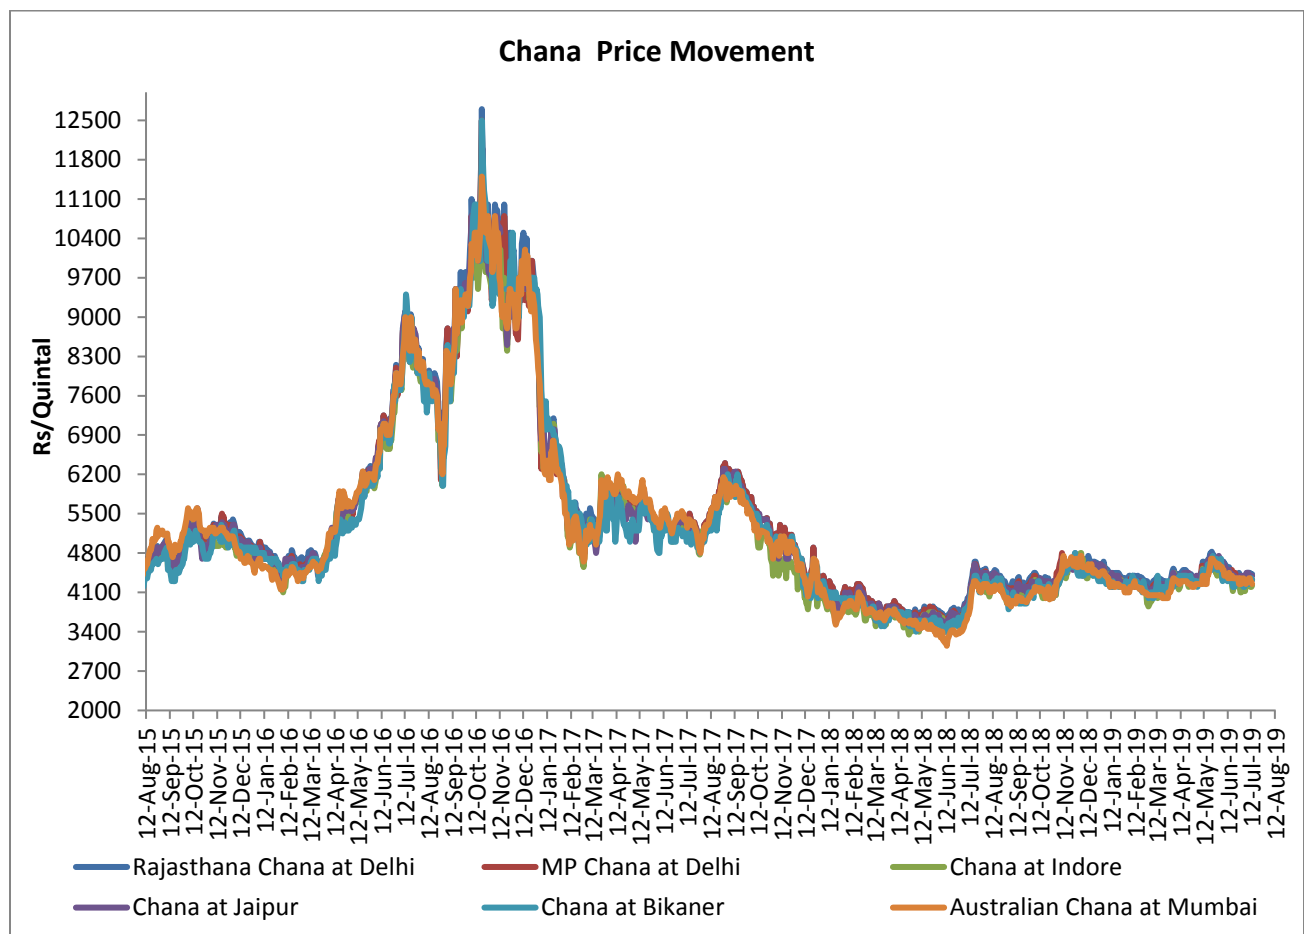

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is unable to find support due to uncertainty in market, Nafed selling strategy and weak demand despite commencement of festive season. Availability is higher in central pool as well as private hands. Firmness in cash chana market depends on Nafed. If Nafed restricts selling below a certain price (Rs 4400-4450). Chana may move up otherwise it will continue to trade range bound. In Delhi market it may continue to trade in the range of Rs 4300-4550 this week. Pressure continues as futures too remains unsupportive. Festive season has begun and demand for chana products may improve. However, any major spike in Chana market is unlikely. Stockiest should continue to release stock at every rise of Rs 100-150.

All India average price for Chana increased by 1.56 percent from Rs 4287 (May) to 4354 per qtl. in 2nd week of July-2019. Australian Chana (imported) price too increased by 0.34 percent from Rs 4300 to Rs 4315 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

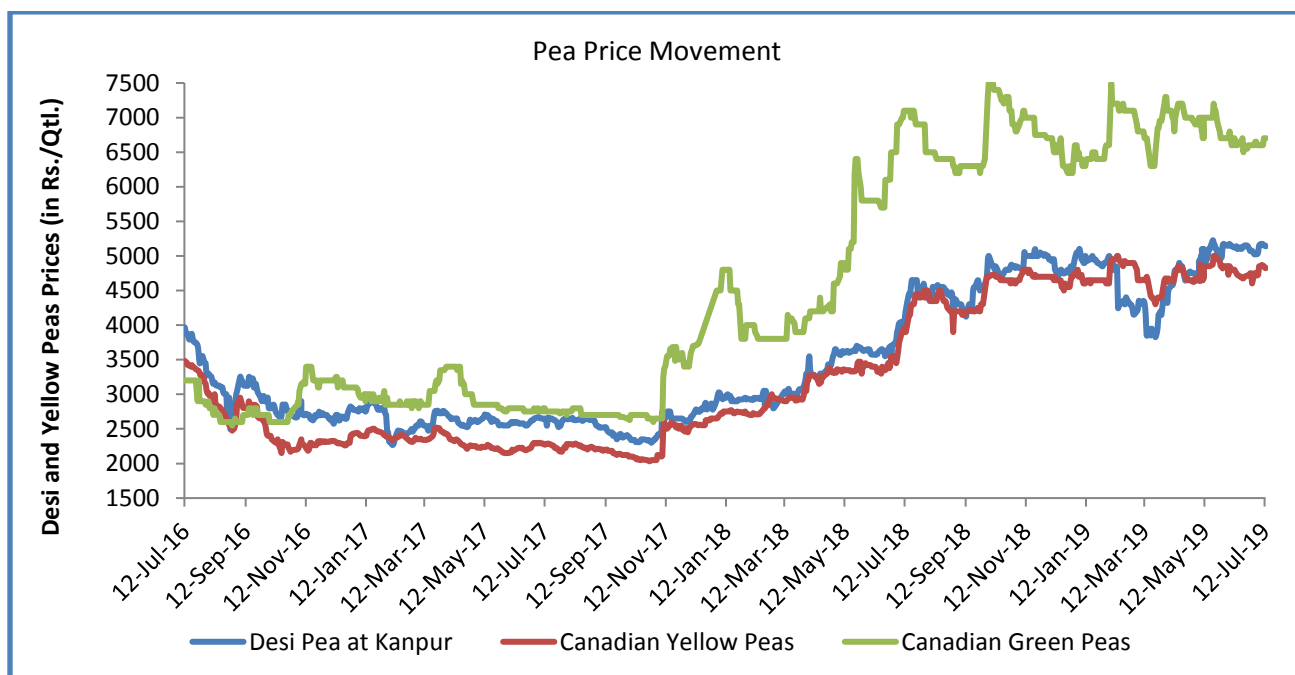

Market Outlook: Chana may trade steady to slightly weak this week too

Peas (Matar):

Market Recap:

Govt has allowed pea import for seed purpose. However, suspicion in Pea market continues as there is no set method to stop it entering into cash market. So market remains under pressure. Even chana market remains unsupportive for cash pea market. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. But recovery could not sustain. With weakness in chana, pea may trade weak too despite tight supply side expected in coming weeks. Stockiest may prefer to release stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep, considering the fluctuation in price in domestic market. Pea in Mumbai market is being traded at Rs. 4800-4850 while in Kanpur market it is being traded at Rs 5100-5150 per qtl. As chana price has started decreasing, pea too may trade weak. Stake holders should buy on downward correction.

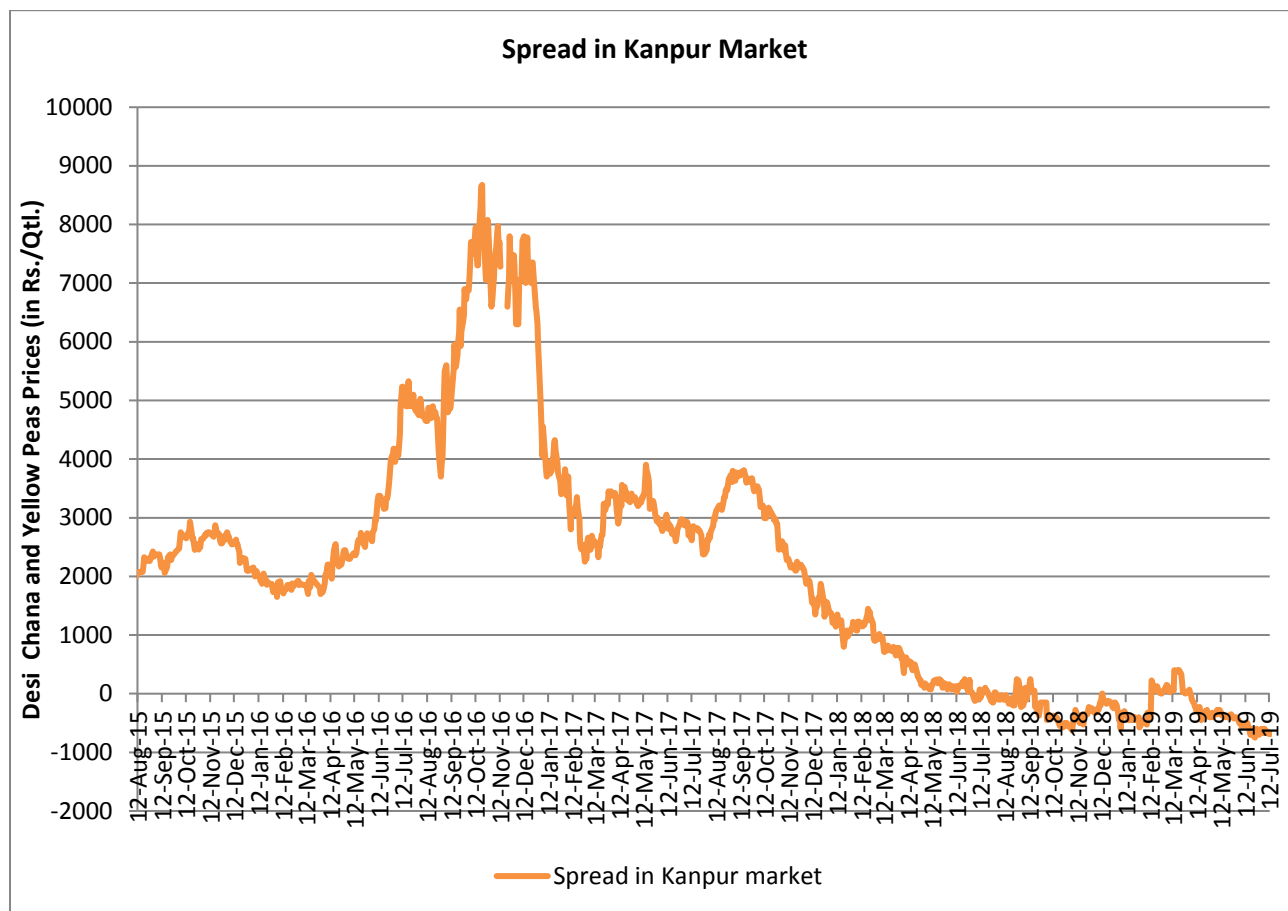

Current Market Dynamics & Outlook:

Pea traded at Rs 5100-5150 in Kanpur market, slightly higher from last week level. Decreasing imported stock may support pea price further in span of time but not before a downward correction of Rs 100 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 450-600 in July on relative movement in Chana and pea price.

Market Outlook: Outlook remains steady to slightly weak this week.

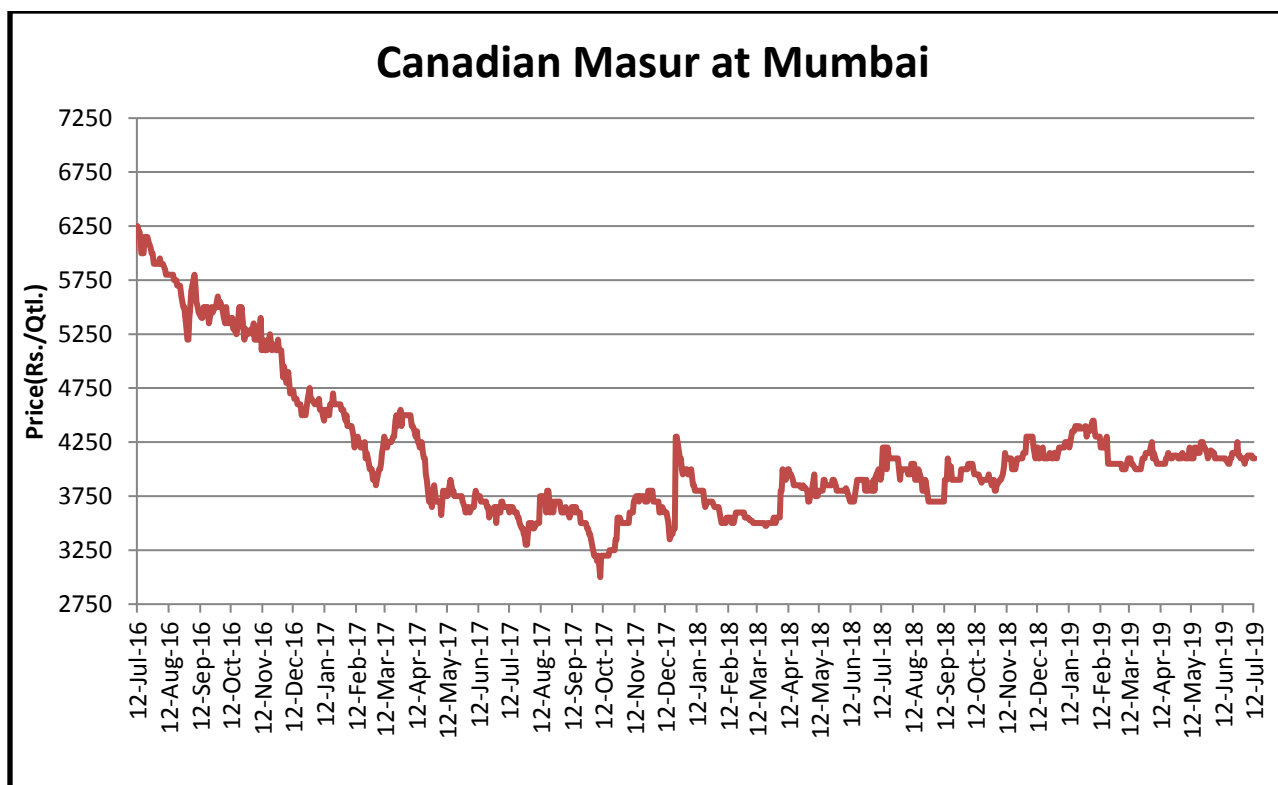

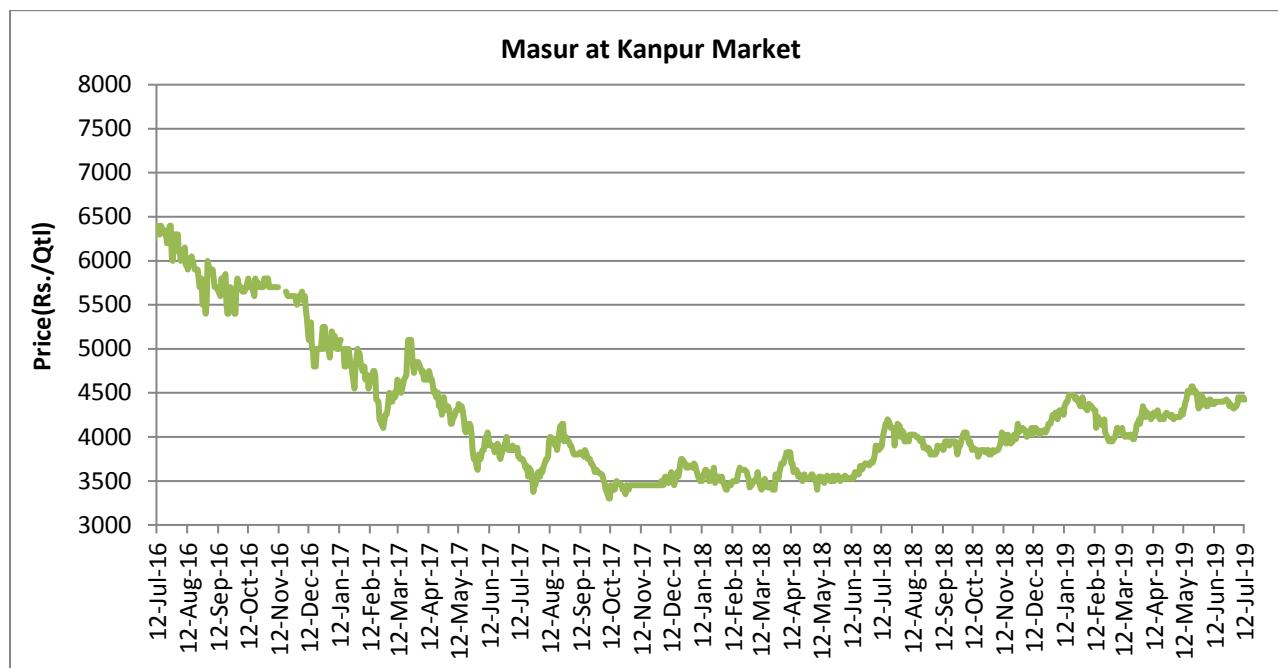

Lentils (Masoor):

Market Recap:

Lentil in global market is being traded at comparatively higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time due to liquidity issue, supply side has eased to some extent. Besides, Nafed has stock and auction is expected soon for bulk buyers. Demand for lentil dal too is weak at this point of time. So lentil built price stayed steady at Rs 4400-4425. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to improve from current level. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. So masur may move up again from current level.

Current Scenario:

In the 1st week of June-2019, average price in key market like Kanpur was down by 0.34 % to Rs 4350-75 per qtl. Prices are likely to trade steady in July to a certain extent. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all trade weak right now. Demand is expected to improve by the end of this month.

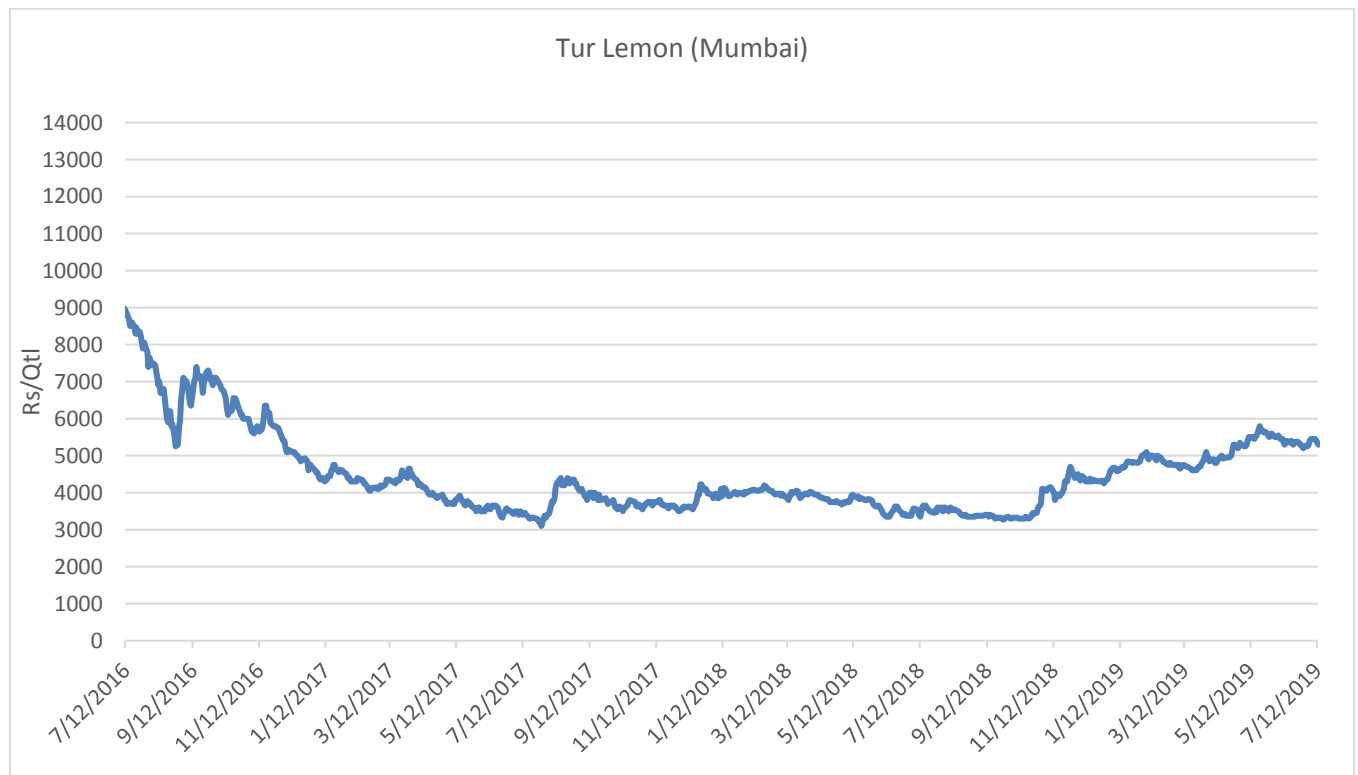

Market Outlook: Prices are likely to stay steady to slightly firm due to higher percentage of retention by private trades.,Nafed would interfere when prices move beyond MSP level. Import continues and it would limit one way utrend.

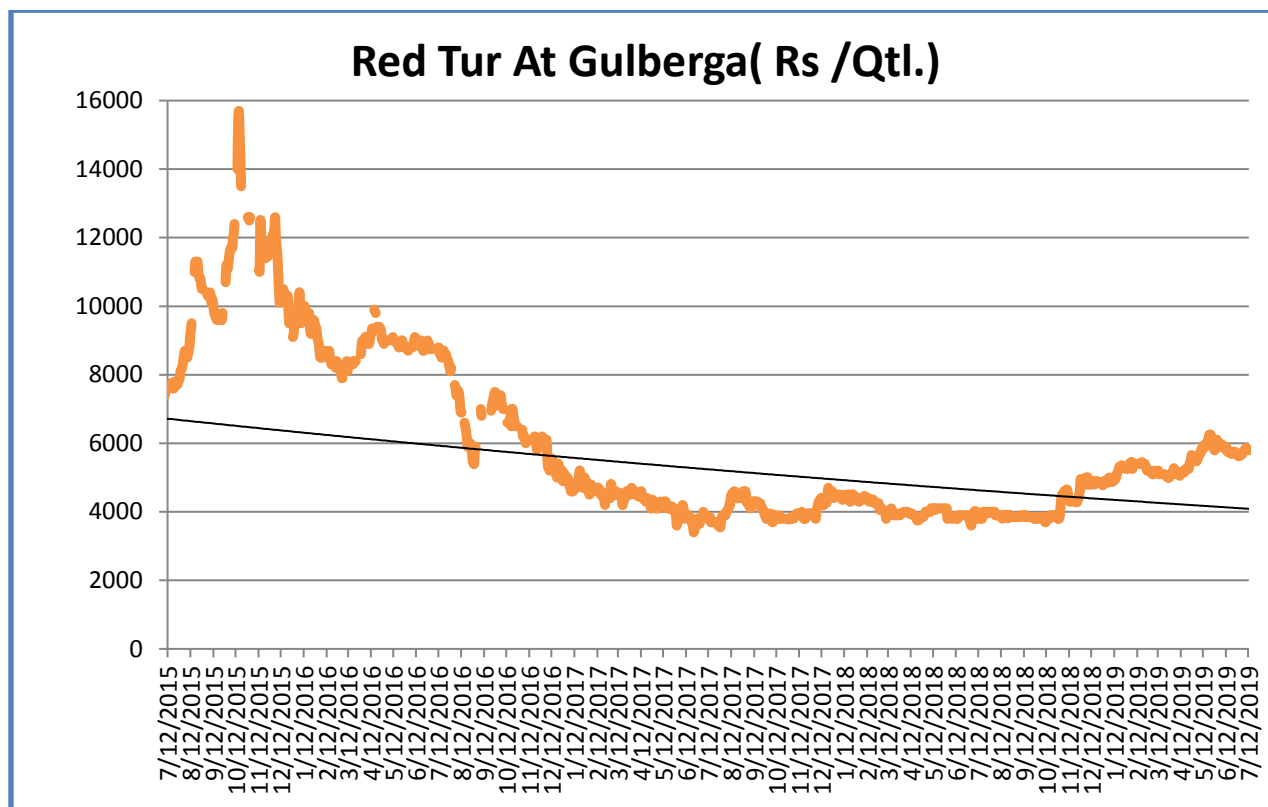

Pigeon Pea (Tur/Toor):
Market Recap:

With improvement of rainfall status last week sowing of kharif pulses has improved considerably in India as a whole .India received 217.7 mm rainfall against normal of 252.6 mm as on 12 th July-2019.It is still 14 % lower than normal.In A.P. It is still 38 % lower than normal of 126.9 so far.In Telangana it is lower by 33 % than normal of 196.1 mm.Rainfall situation is likely to improve in coming weeks and resultantly sowing status too would improve. At planting front Indian farmers have covered 12.84 lakh ha as on 12, July-2019. It is lower by 21.73% from last year.Normal area till date is 18.27 lakh ha and normal of the whole season is 43.00 lakh ha.The major growing state like Karnataka & Maharashtra planting is running behind by 32.80 % to 2.96 and 23.64 % to 3.82 lakh ha so far.Normal area in these states are 8.62 and 12.53 lakh ha.In AP normal area for tur is 2.37 lakh ha .Area in UP and Orissa has improved from last year by 28.35 and 32.86 % to 1.14 and 0.37 lakh ha so far. Situation is expected to improve in coming weeks.

Current Market Dynamics & Outlook:

With better rainfall in growing region pressure on tur market continues and it lost Rs 100 more to Rs 5700 in Gulberga market.It may decrease to Rs 5600. At this level buyer would be active once again.Lower crop size last year and bleak prospects this year too would not allow market to decrease beyond a certain level. Stockiest are unwilling to sell at current level despite higher import quota of 4 lakh MT and possibility of 1.75 lakh MT more import through G2G basis.Govt. is willing to keep supply side at ease.So ,any major spike in tur market in the near term is unlikely.

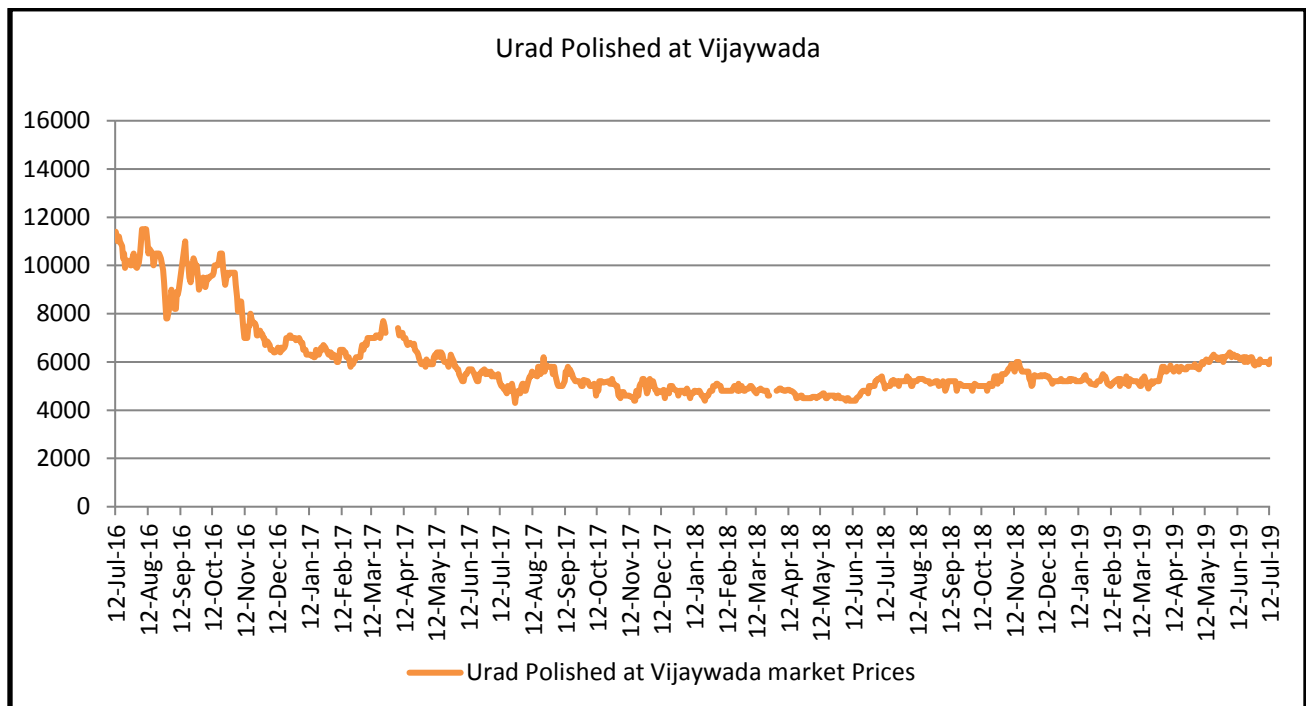

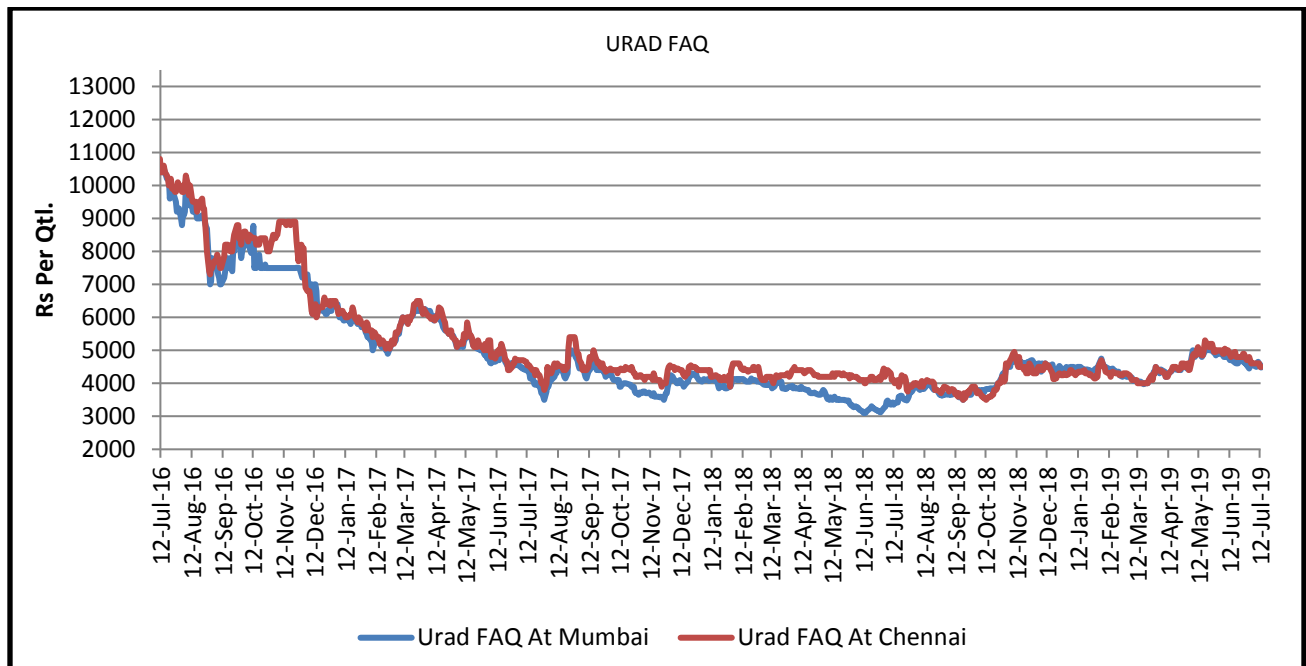

Market Outlook: Tur market may trade weak by Rs100-150 more with increasing arrivals from old stock and poor buying spree.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan & Gujarat. Indian farmers have covered 8.59 lakh ha so far against 11.56 lakh ha last year till date. It is lower by 25.71 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 48.34 % to 2.95 lakh ha against season's normal of 10.67 lakh ha. Situation in UP too is not good. Pressure continues on urad market and it may move down by Rs 100 more from current level in Mumbai market. At lower level millers are expected to return to market as festive season begins. As area is lower this year, production size too would be lower. It may support urad cash market in coming weeks. In Chennai urad is being traded at Rs 4600-4650. Due to heavy rainfall in some growing region, urad plant may decay due to water lodging. It too would impact urad price in coming weeks. Import would remain restricted at 1.5 lakh MT. So urad market would find balance and move up from current level. Nafed would continue to sell urad through auction and it would restrict urad market to make any big jump.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4450-4500 per Qtl.) and Chennai (Rs.4600-4650 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

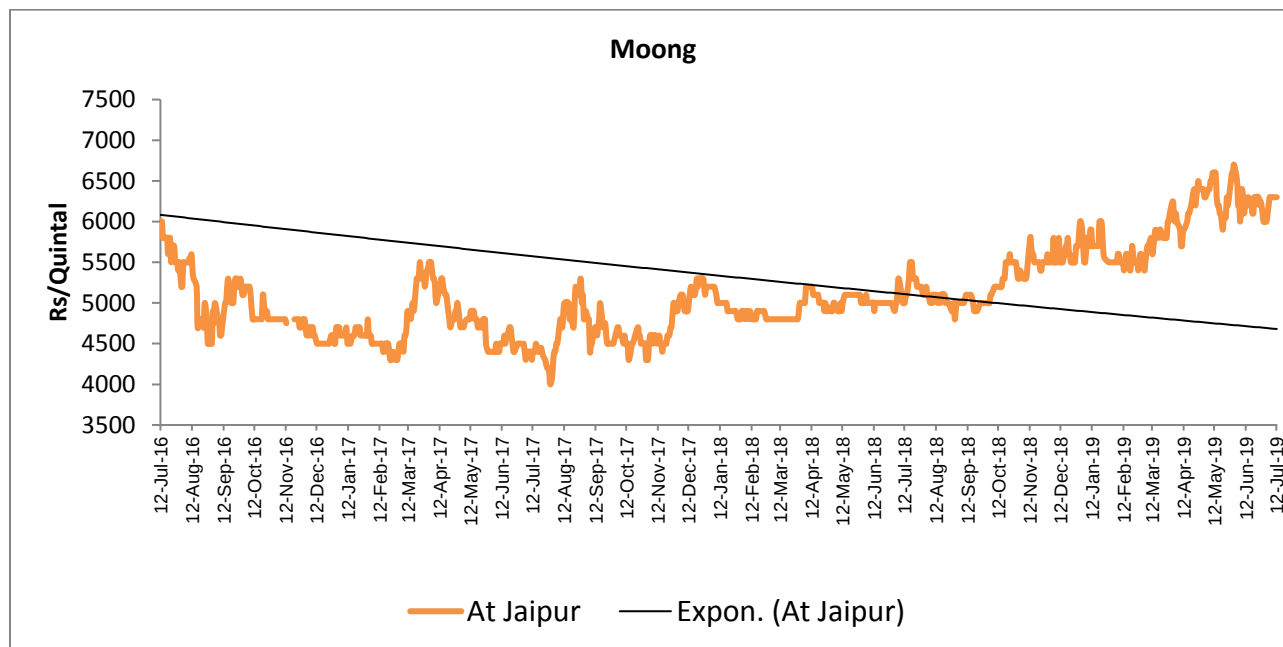

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

15th July, 2019

As there is no parity for moong import and there is a shortage of quality crop, moong market is likely to recover once again. Govt has increased MSP for moong from Rs6975 to Rs 7050 and it would prefer to buy higher quantity of moong under PM Asha programme this year. Besides, kharif area is likely to decrease by 15 to 20 % as in many states sowing time is about to end. There is no import parity, lower stock availability in central pool and stockiest unwillingness to release stock at current price remain supportive to moong market fundamental in coming weeks. Moong in Jaipur market would continue to trade in the range of Rs6000-6500 in July. It may move further up in coming months.

Market Outlook: Moong prices are likely to recover in the near term.

Import- Export & Average Monthly CiF:
