Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

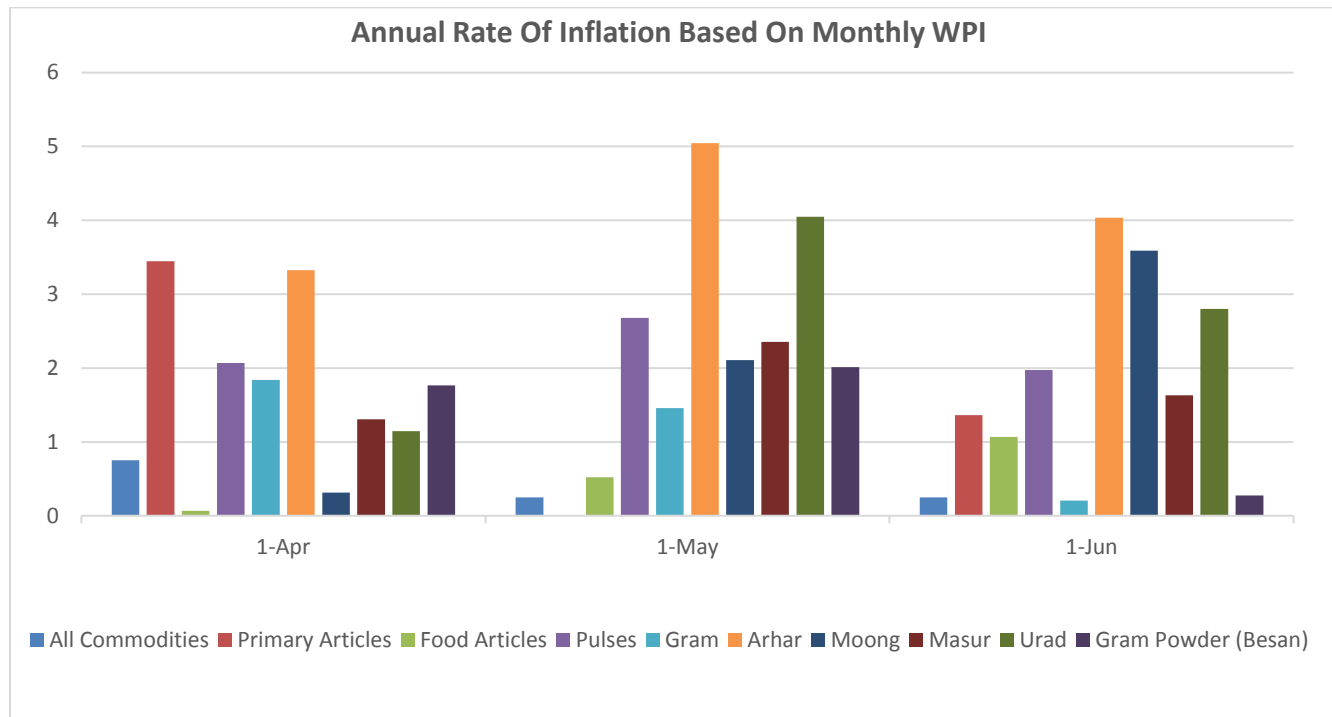

- **Indian farmers have covered 62.19 lakh ha under kharif pulses as on 19th July-2019 against 73.98 last year.** Coverage area has improved last week and it is likely to cover short area in two weeks. Farmers have covered 22.87 lakh ha (26.44 lakh ha last year) under tur, 17.94 under urad (20.65 lakh ha last year), 16.23 under moong (20.35 lakh ha last year), 5.02 under other pulses (6.20 lakh ha last year) and 0.13 lakh ha under Kulthi (0.34 lakh ha last year so far. Despite improvement in coverage area it is running down by 15.94%. The gap is likely to be minimized in coming weeks. For details see table at page no-12
- **Recent flooding in many states has affected kharif crops in many regions and it would affect kharif crop size further.** Resowing in these states is possible with short duration crops. Farmers in these regions may shift from one to other crops. South India still remains dry while eastern and central India are facing havoc of flooding. So at kharif crop front situation is not normal despite improvement in sowing area during the review week.
- **Tur market seems under pressure due to govt.'s strategy and it would continue to trade stable** in the near term despite lower crop size last year and slower planting progress this year. Govt has allowed 4 lakh MT import. Besides, additional 1.75 lakh MT would come through G2G channel. This means 5.75 lakh MT import would ease supply side in coming months. It does not include 2 lakh MT sale reserve stock. There are 4 to 5 consumption months remain before the new crop hits the market. So, availability is unlikely to be so tight. If incoming crop gets affected, its impact would be felt next year. Agriwatch expects tur price to move in the range of Rs 5600-6000 in Gulbarga market. Right now it is being traded at Rs 5750-5850. CIF quotes in Myanmar have decreased to \$ 740 per MT after touching at \$780 per MT. It is good to release some parts of stock at every hike of Rs100-150.
- **Urad cash market continued to reel under pressure due to sluggish demand from bulk buyers and release of higher quantity by punters/importers.** As cash market has started adjusting with the higher supply flow, it may stay steady at current level. Improvement in market is expected in August as there is no crop due in next two months. Planting in Maharashtra (Udgir & Latur) has got delayed by 20 days, so new arrivals expected now in Sept. Besides, market is expecting festive demand and it may help market to recover from current level. Urad in Mumbai market is being traded at Rs 4500-4525 while in Chennai market it is being quoted at Rs 4600-4650.
- **Moong cash market is expected to recover once again as major parts of stocks are in strong hands and arrival in major markets are decreasing fast.** Sowing has been delayed by a fortnight and new arrival would start not before Sep. So steady to slightly firm tone may prevail in cash moong market. In Jaipur market moong is being traded at Rs 6250- 6300 per qtl. Coverage area is lower by 23% so far to 10.58 lakh ha. Recovery in area is expected this week too with current showers of rains in producing regions.
- **Cash chana market lacks direction for any upward momentum despite decreasing arrivals in all major markets.** In Delhi market chana was traded at previous day level of Rs 4350-4400 amid 15 to 20 motor arrivals. However futures traded up during last two days. But due to lack of buying support firm momentum is unlikely to continue. Actually weak demand in cash market and uncertain policy regarding sale by Nafed remain the price affecting factors. Slight improvement might be seen if festive demand emerges. Any major spike in chana market is unlikely in the near term. It may continue to trade in the range of Rs 4300-4550 per qtl. in Delhi market. Nafed is trying to sell chana in MP and UP and it may restrict upward movement in chana market. Besides, import from Black Sea region has started and importers have struck a deal at \$400 per MT basis CNF Navasheva. If the volume increases, it may affect inner tone further. With duty it would cost around \$670-680 per MT.
- **Lentil market traded steady to slightly weak due to poor offtake from mills and continuous import flow.** As consumption is more than availability, prices of lentil are likely to improve in coming weeks. Masoor in Kanpur market is

being traded at Rs4400-4450 while it is being traded at Rs Rs4100 in Mumbai market. Nafed still has over 1.25 lakh MT stock and it would start selling August onward. Overall trend remains firm. Pea market traded up as stock is coming down amid restricted import. In Kanpur market it has moved up by Rs 150 to Rs 5175-5180. minor correction is expected at this stage.

International Market:

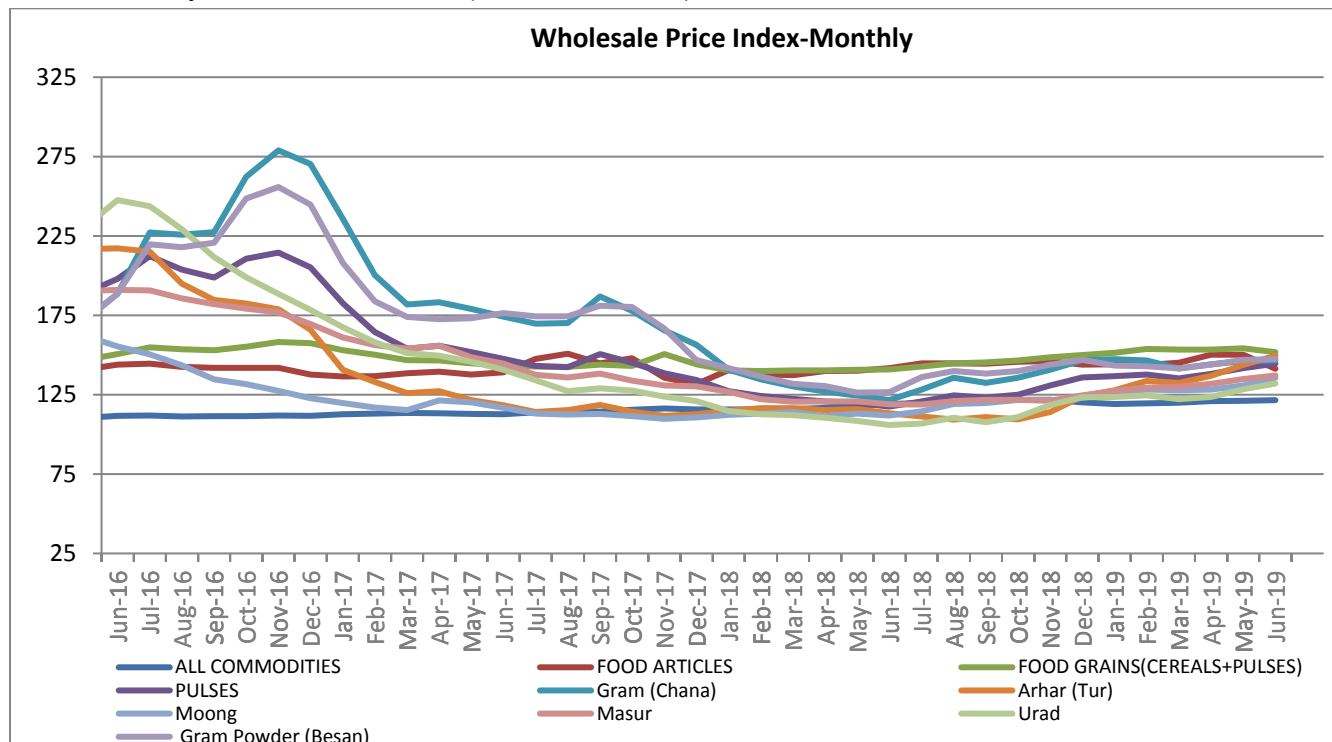

- **As per the latest update by US dry peas & lentil council mostly standing pulses crops are heading towards maturity stage** despite some planting is going on in particular regions. Crop condition is normal to good. As demand from India is weak so farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **A tentative comparison from last year shows that carryover stocks are high for all peas, lentils, and chick- peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick- peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **Peas area in Canada is likely to increase by 19.89 % to 1754 kha in 2019-20. Production too may increase** by 20% to 43 lakh MT. Export and import are likely to be same in 2019-20. Carryout is likely to increase from 4 to 5 lakh MT this year. Average price might be hover in the range of \$255-285 per MT.
- **Lentil area in Canada is expected to increase by 0.33 % to 1.53 million ha in 2019-20 due to favorable weather condition.** Yield is likely to improve from 1.4 to 1.47 tonne per ha. However total supply is likely to decrease by 2.85 % to 28.95 lakh MT in 2019-20. Export and import would increase slightly this year despite weak demand from India. Average price may hover in the range of \$ 430-460 per MT
- **Chickpea area in Canada would decline from 179 to 155 kha in 2019-20. production would decline** by 16.40 % to 2.6 lakh MT. Carryout is expected to increase by 12.82 % to 2.2 lakh MT. Average price is expected to hover in the range of \$465 to 495 in 2019-20.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **As per latest data received from Russian Federal Customs Service, chickpeas export** from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858 MT. Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyer buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Russian export of peas posted slight gain in comparison to March-2019. In April,** Russia exported 55930 MT peas, up by 8% to 51836 MT in March. In current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan brought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.

Pulses WPI Index:

Annual Rate Of Inflation:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 2.8 point from 141.8 in May to 144.6 in June-2019

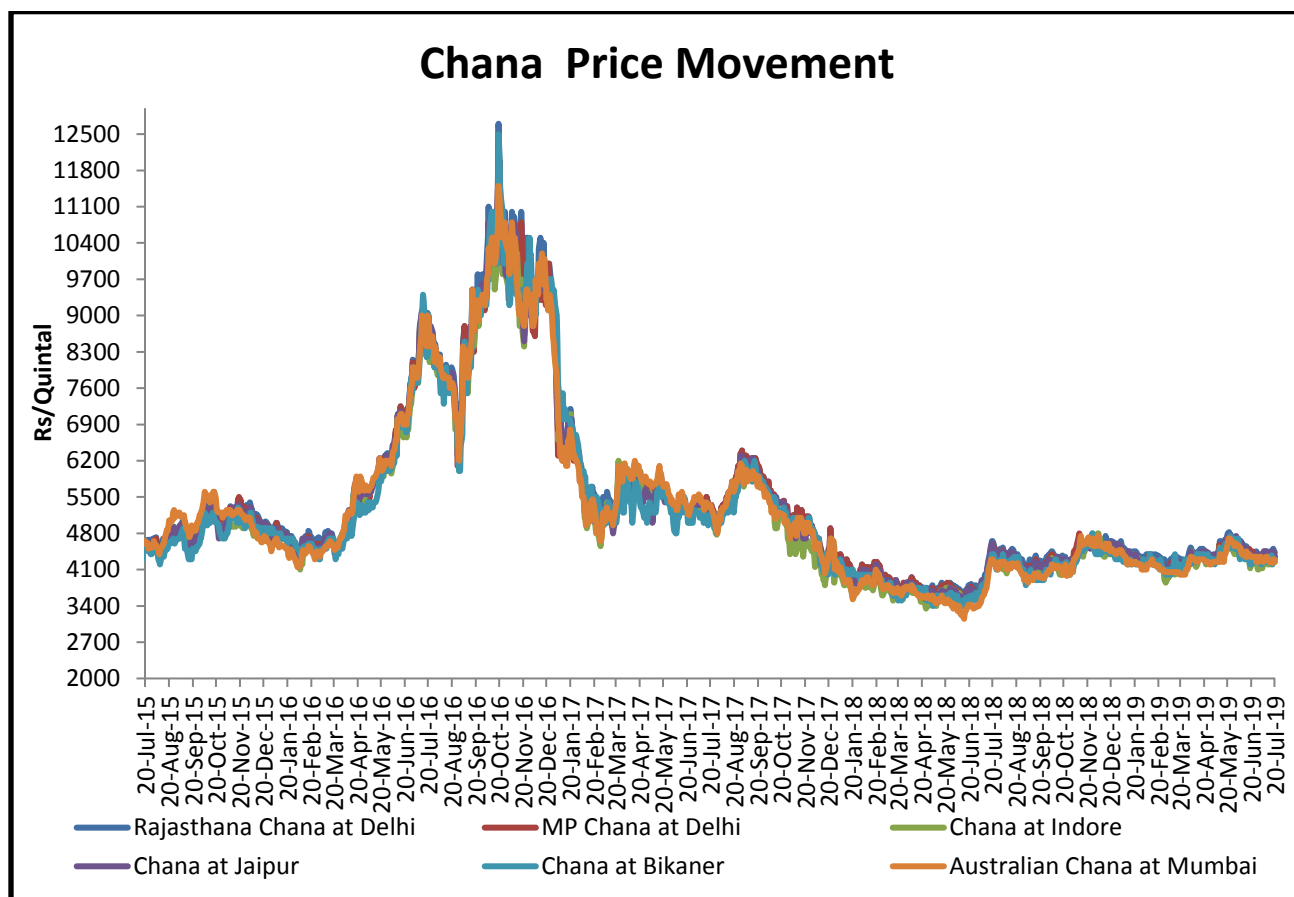

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market is unable to find support due to uncertainty in market, Nafed selling strategy and weak demand despite commencement of festive season. Availability is higher in central pool as well as private hands. Firmness in cash chana market depends on Nafed selling strategy. If Nafed restricts selling below a certain price (Rs4400-4450), chana may move up otherwise it will continue to trade range bound. In Delhi market it may continue to trade in the range of Rs4300-4450 this week. Pressure continues as futures too remains unsupportive. Festive season has begun and demand for chana products may improve. However, any major spike in Chana market is unlikely. Stockiest should continue to release stock at every rise of Rs 100-150. Bulk buyers are in wait and watch mode.

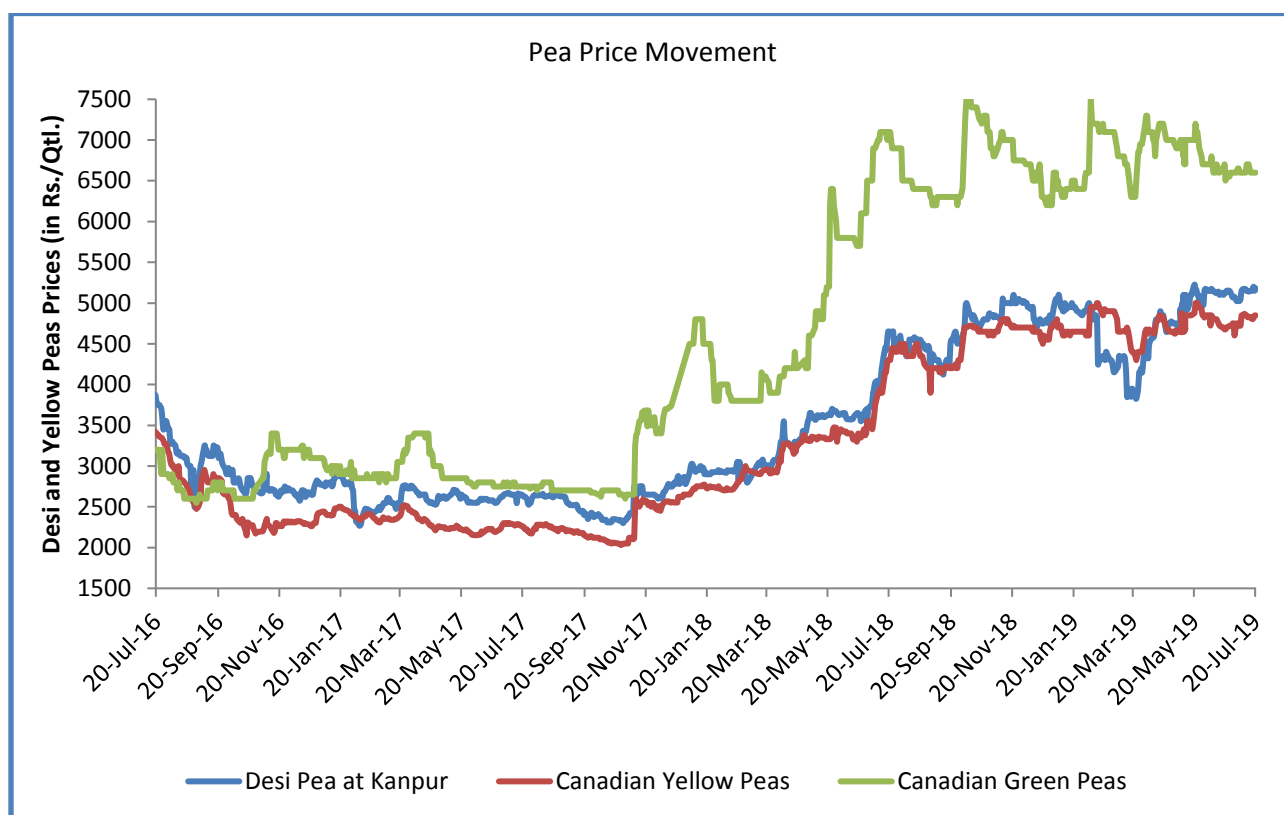

All India average price for Chana increased by 0.20 percent from Rs 4354 (May) to 4363 per qtl. in 3rd week of July-2019. However, Australian Chana (imported) price decreased by 1.27 percent from Rs 4315 to Rs 4260 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar): Market Recap:

Govt has allowed pea import for seed purpose. However, suspicion in Pea market continues as there is no set method to stop it entering into the cash market. As stock is lower, prices may move further up despite weak chana price. Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. But recovery could not sustain. festive season demand may push up chana and pea price to some extent in coming weeks. Demand supply gap is widening. Stockiest may prefer to retain stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep, considering the fluctuation in price in domestic market. Pea in Mumbai market is being traded at Rs. 4800-4850 while in Kanpur market it is being traded at Rs 5150-5180 per qtl. As chana price is expected to recover, pea too may trade firm. Stake holders should buy on downward correction.

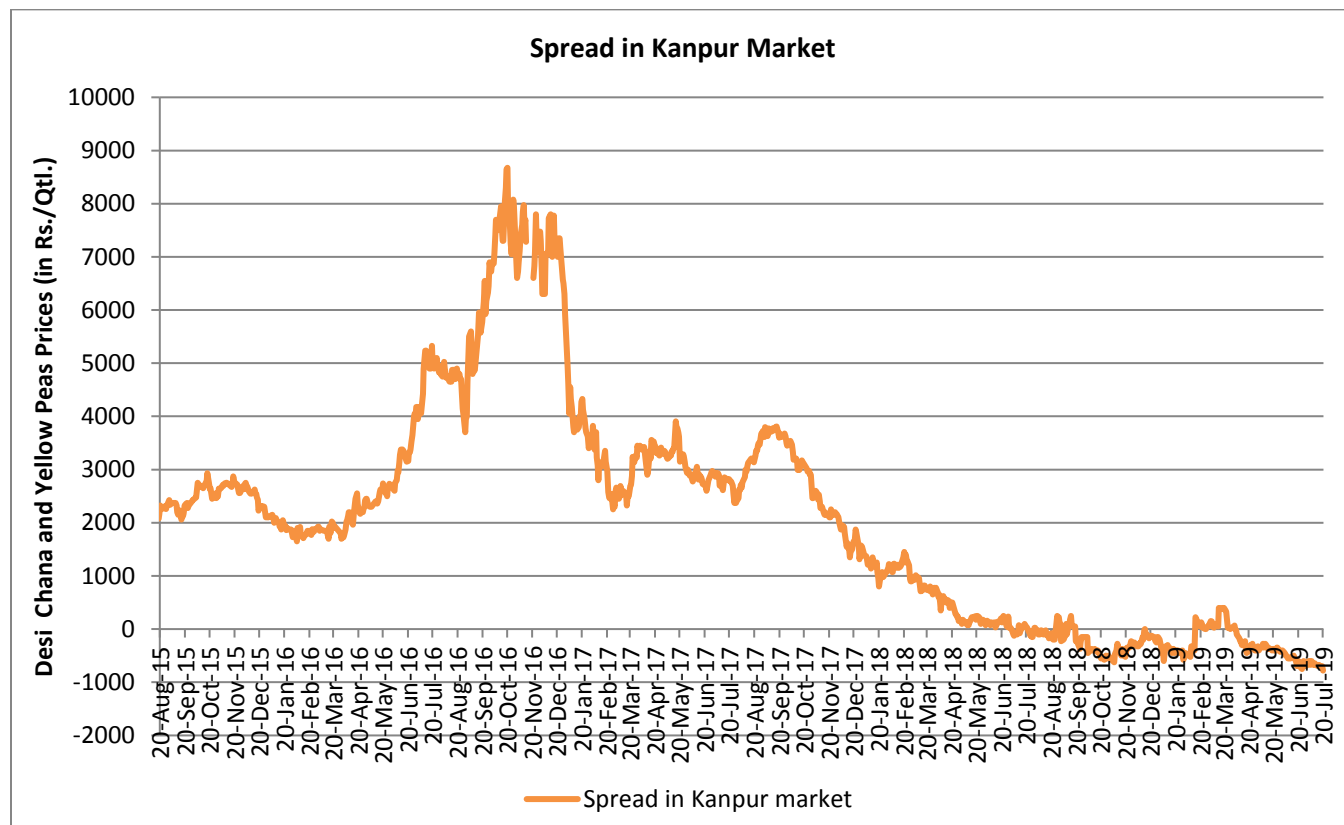

Current Market Dynamics & Outlook:

Pea traded at Rs 5150-5180 in Kanpur market, slightly higher from last week level. Decreasing imported stock may support pea price further in span of time but not before a downward correction of Rs 100 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 550-750 in July on relative movement in Chana and pea price.

MarketOutlook: Outlook remains steady to slightly firm this week.

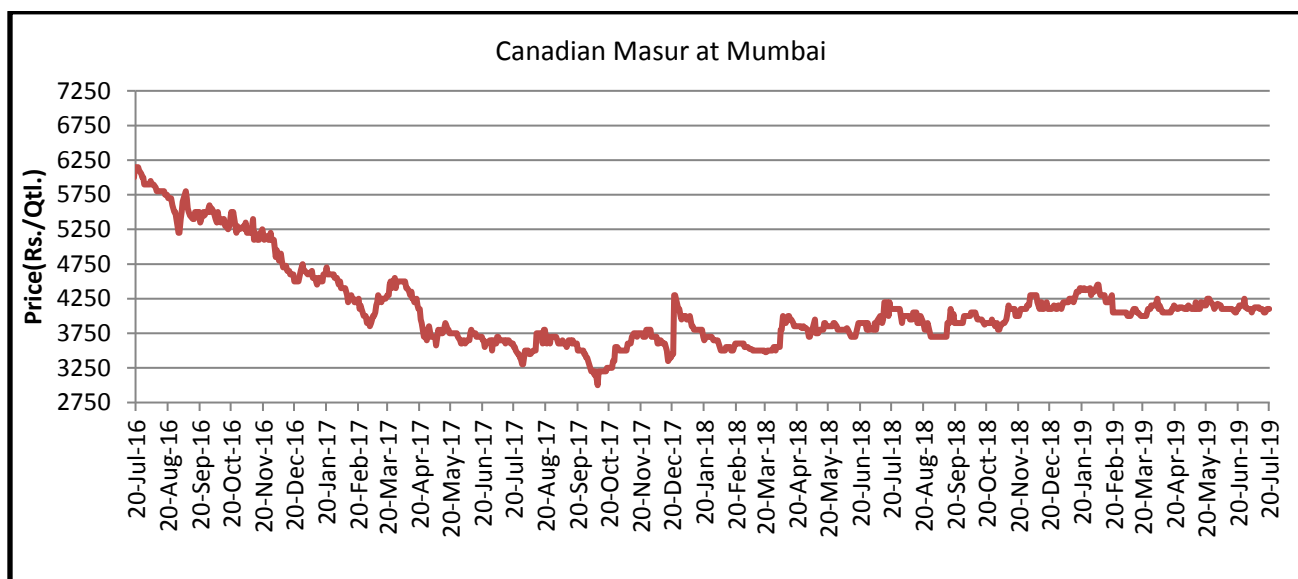

Lentils (Masoor):

Market Recap:

Lentil in global market is being traded at comparatively higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time due to liquidity issue, supply side has eased to some extent. Besides, Nafed has stock and auction is expected soon for bulk buyers. Demand for lentil dal too is weak at this point of time. So lentil built price stayed steady at Rs 4400-4450. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to improve from current level. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. So masur may move up again from current level.

Current Scenario:

In the 3rd week of July-2019, average price in key market like Kanpur was down by 0.11 % to Rs 4420 per qtl. Prices are likely to trade steady in July to a certain extent. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Demand is expected to improve by the end of this month.

Market Outlook: Prices are likely to stay steady to slightly firm due to higher percentage of retention by private trades. Nafed would interfere when prices move beyond MSP level. Import continues and it would continue to limit one way utrend.

Pigeon Pea (Tur/Toor):

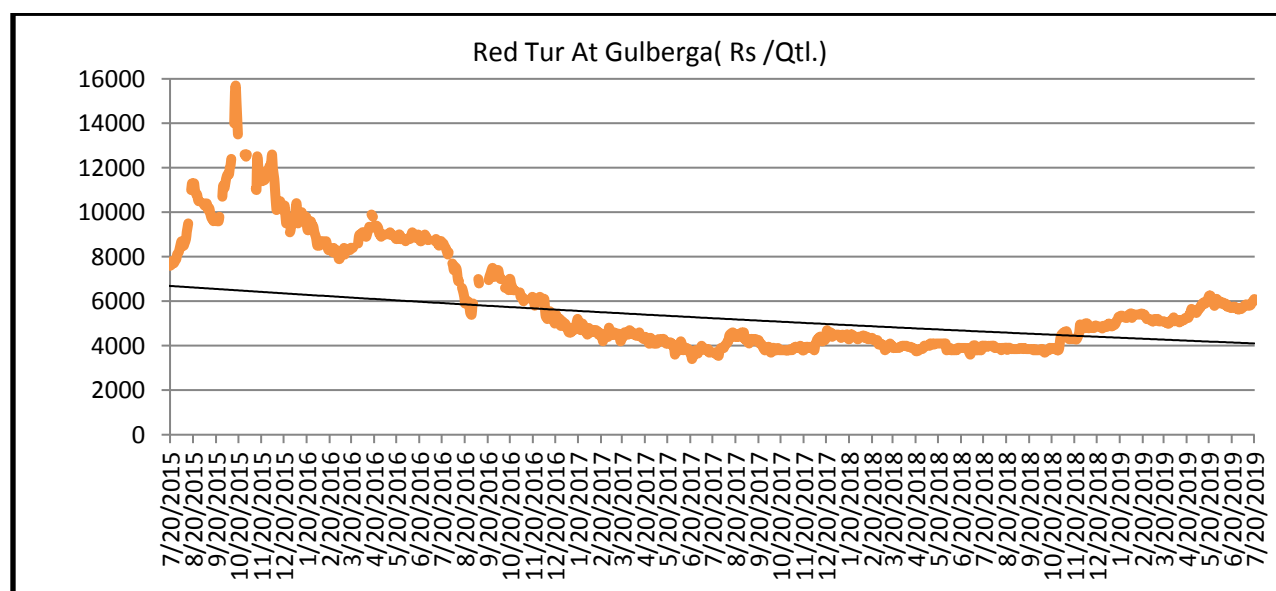

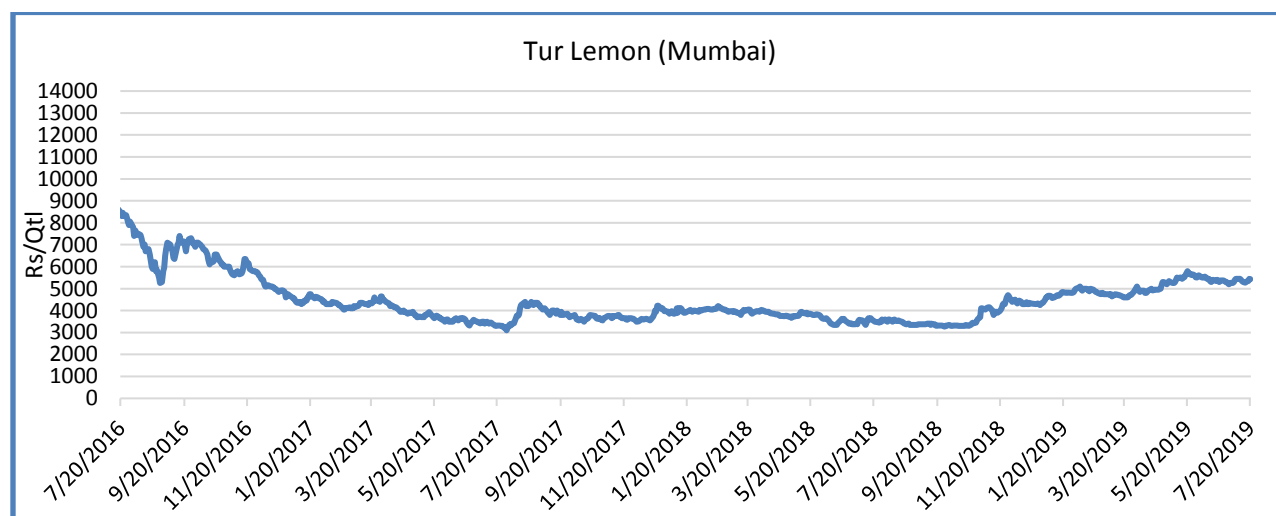

Market Recap:

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 17.94 lakh ha so far against 20.65 lakh ha last year till date. It is lower by 13.12 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 27.70 % to 6.89 lakh ha against season's normal of 10.67 lakh ha. Situation in UP too is not good .Area under kharif urad is running behind by 10.85% to 2.79 lakh ha. However it is up in Rajasthan by 48.56% to 4.33 lakh ha against 2.91 lakh ha last year as on 19th July-2019.

As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.03 lakh ha so far. Even in Telangana farmers have covered 0.17 lakh ha against normal of 0.30 lakh ha. Situation is expected to improve in coming weeks.

Current Market Dynamics & Outlook:

Tur market is likely to move up despite improvement in planting area. In gulberga market it is being traded at Rs 5800-5850 as buyers are active. Stockiest are unwilling to sell stock as they hope better price in coming months. Immediate import in bulk volume is unlikely. So, fundamental remains supportive to cash tur market right now. Stockiest are unwilling to sell at current level despite higher import quota of 4 lakh MT and possibility of 1.75 lakh MT more import through G2G basis. Govt. is willing to keep supply side at ease. So, any major spike in tur market in the near term is unlikely.

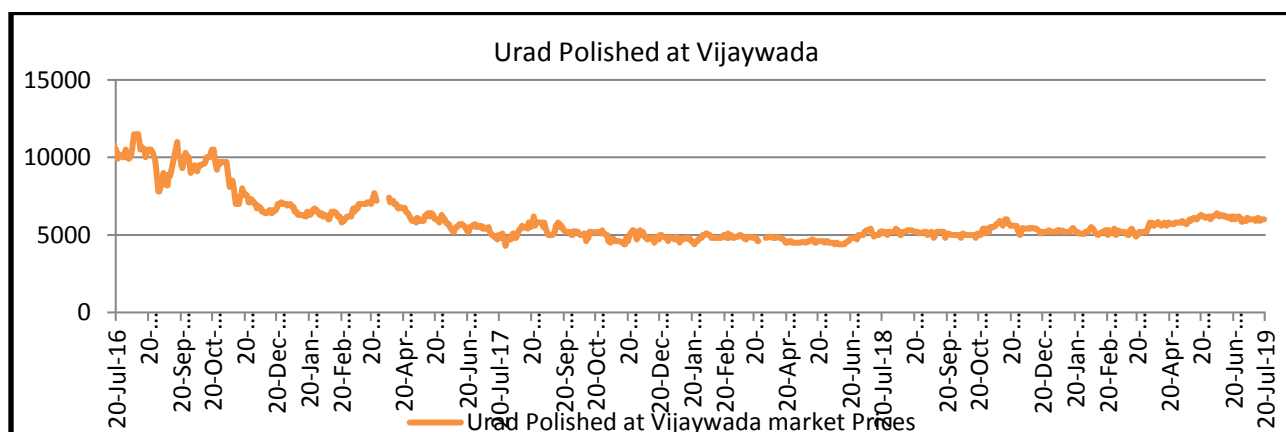

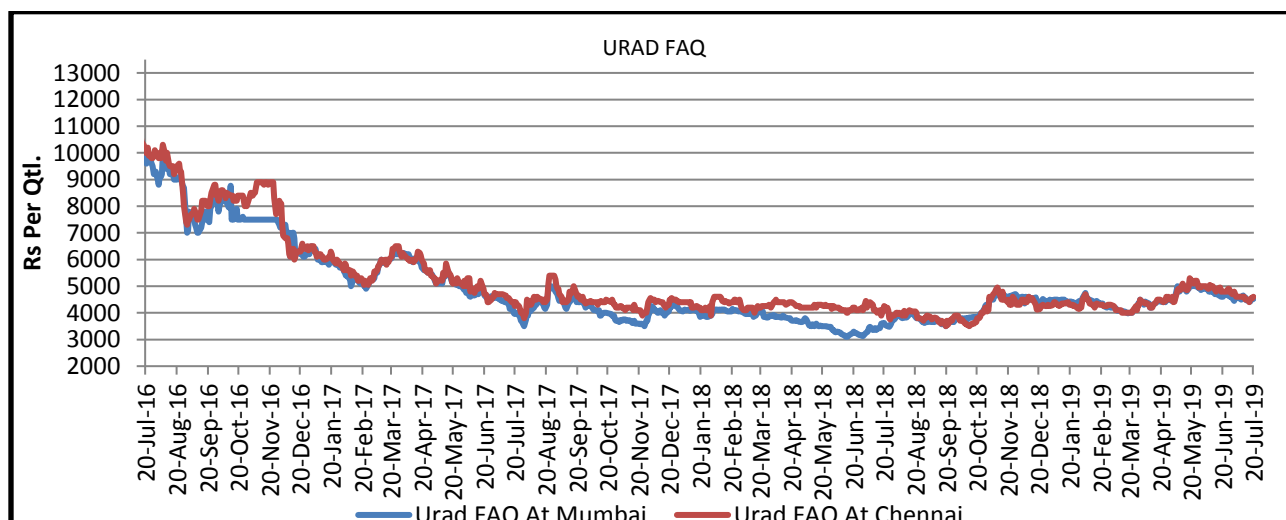

Market Outlook: Tur market may trade steady to slightly firm with decreasing arrivals from old stock and improved buying spree.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 17.94 lakh ha so far against 20.65 lakh ha last year till date. It is lower by 13.12 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 27.70 % to 6.89 lakh ha against season's normal of 10.67 lakh ha. Situation in UP too is not good. Area under kharif urad is running behind by 10.85% to 2.79 lakh ha. However it is up in Rajasthan by 48.56% to 4.33 lakh ha against 2.91 lakh ha last year as on 19th July-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.03 lakh ha so far. Even in Telangana farmers have covered 0.17 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

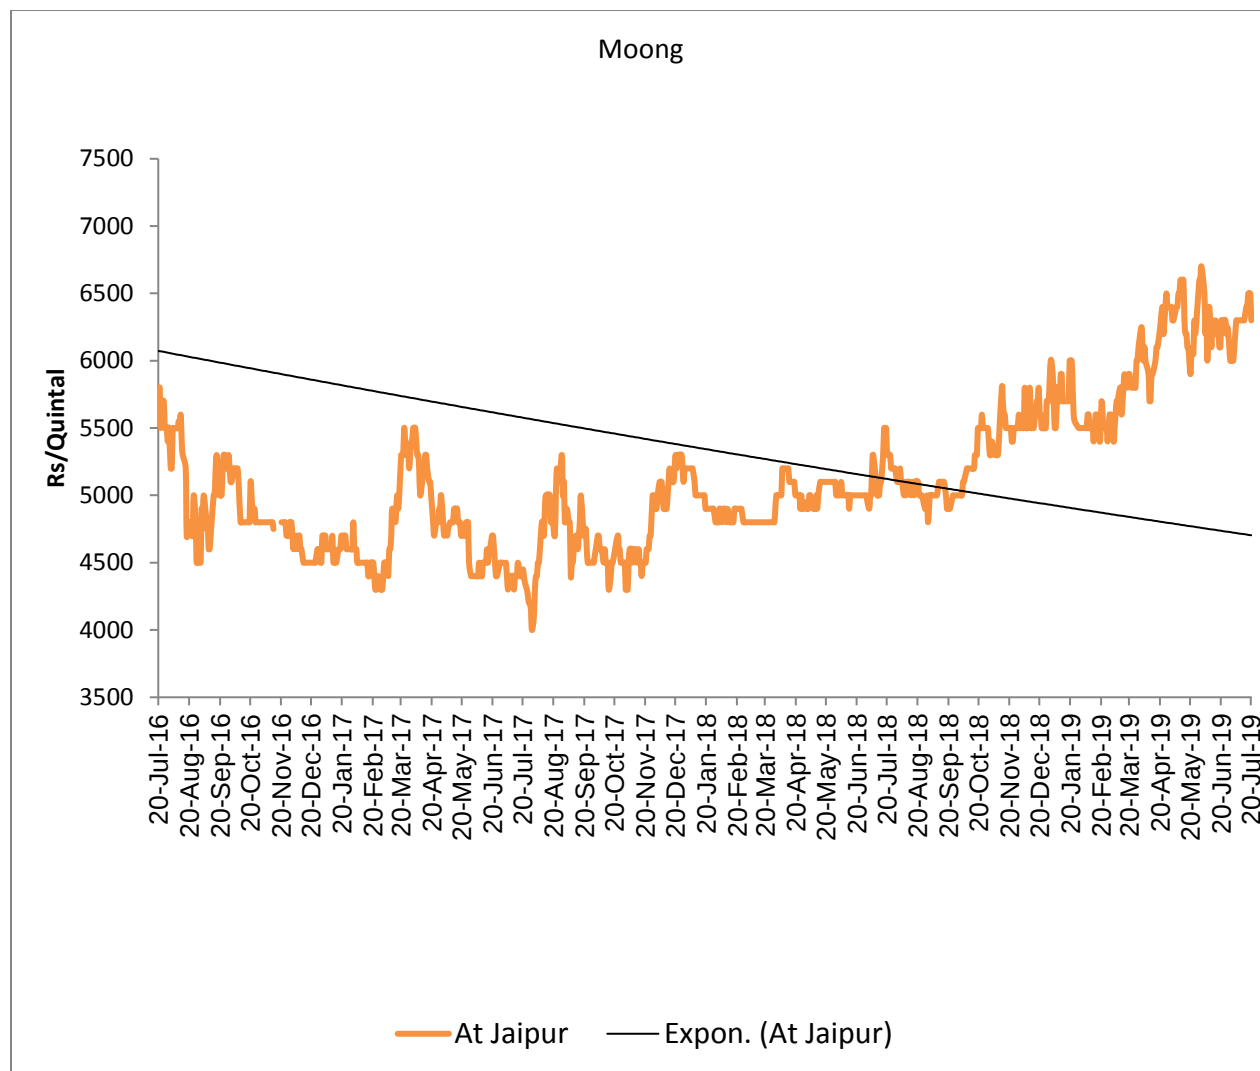

Urad FAQ at Mumbai (Rs Rs4500-4550 per Qtl.) and Chennai (Rs.4600-4650 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:-

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):
Market Recap:

All India kharif area coverage under moong is running behind by 20.24 % to 16.23 lakh ha as on 19th -July-2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 9.75 lakh ha against 10.87 last year and normal of 13.27 lakh ha. It is running behind by 51.91 % to 1.82 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 1.98 lakh ha has been covered against the normal of 4 lakh ha. AP has covered only 0.01 thousand ha against normal of 0.07 ha. In Telangana, farmers have covered only 0.41 lakh ha against normal of 1 lakh ha for the whole season and 0.60 lakh ha last year.

Market Outlook: Moong prices are likely to recover in the near term.
