Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

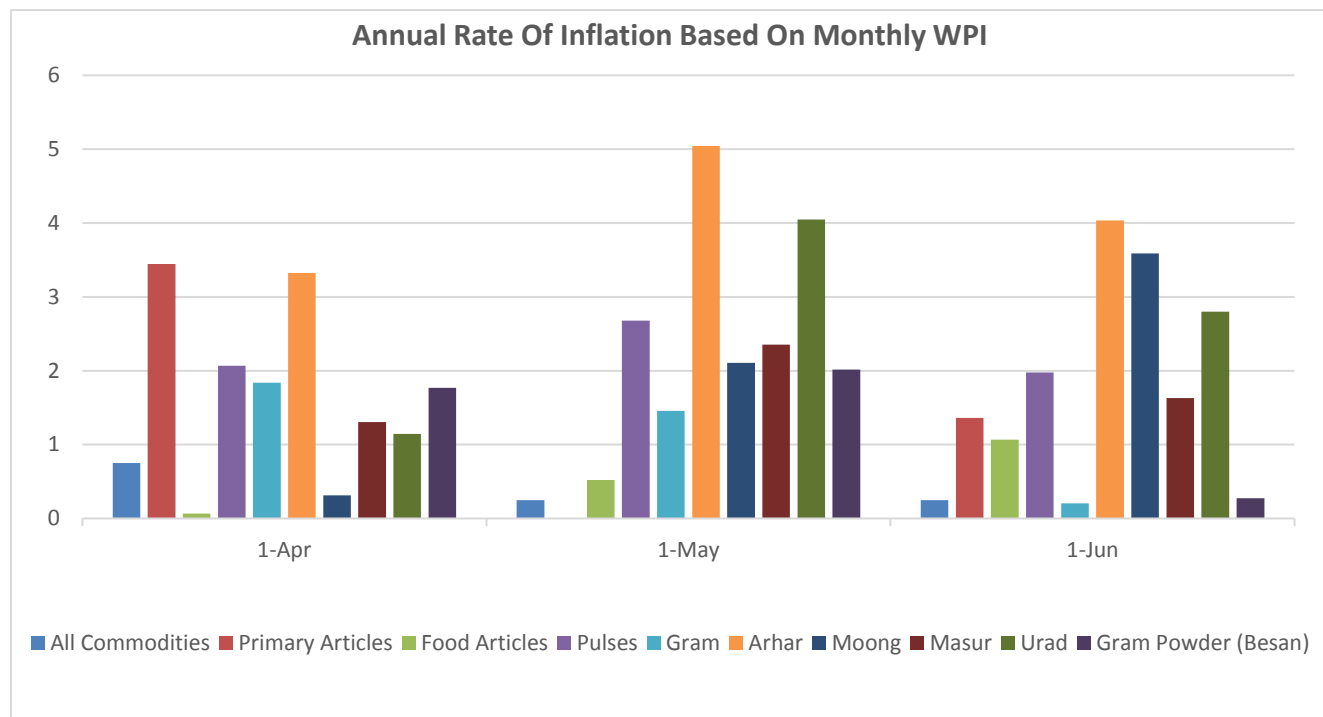

- **Indian farmers have covered 82.92 lakh ha under kharif pulses as on 26th July-2019** against 101.84 lakh ha last year. Coverage area has improved last week and may continue to improve. Farmers have covered 29.58 lakh ha (34.57 lakh ha last year) under tur, 26.15 under urad (28.97 lakh ha last year), 20.48 under moong (27.20 lakh ha last year), 6.56 under other pulses (10.75 lakh ha last year) and 0.15 lakh ha under Kulthi (0.35 lakh ha last year so far). Despite improvement in coverage area last week, it is running down by 18.58%. The gap is likely to be minimized in coming weeks. Details can be viewed on page no-12.
- **Tur cash market continued to trade stable during the week under review.** Old stock is being released by private trades at prevailing prices despite lower area coverage so far. Under prevailing conditions crop size is expected to be similar as last year and it would create short supply, if allowed 4 lakh MT import is not materialized before 31st Oct-2019. Supply side is balanced right now. So Prices of tur are expected to move range bound in coming weeks. Govt. has started releasing stock from buffer stock to states, for distribution through PDS. Uttarakhand govt would buy around 5000 MT pulses including tur and give subsidy of Rs 15 per kg to ration card holder. Other states too would follow the suit in coming weeks. If incoming crop gets affected, its impact would be felt
- next year. Agriwatch expects tur price to move in the range of Rs 5600-6000 in Gulbarga market. Right now, it is being traded at Rs 5825-5850. CiF quotes in Myanmar have decreased to \$ 750 per MT after touching at \$780 per MT. It is good to release some parts of stock at every hike of Rs100-150.
- **Kharif urad production in Maharashtra may decline by 20 % due to lower kharif area and end** of the sowing season now. In other states sowing would continue till the end of this month. As supply side is expected to be tight due to slower release by private trades, urad price may move up by Rs 200-300 in coming weeks. Major kharif growing states like Madhya Pradesh, Rajasthan, Uttar Pradesh, Maharashtra and Gujarat condition is not favourable for standing crop. Either it is being affected by excessive rains or facing drought like condition. It may reduce the final crop size. It may encourage private trades to hold stock. Besides, import would remain restricted at 1.5 lakh MT. All these emerging condition may lend some support to urad cash market in coming weeks. Stock in pipe line is decreasing. So urad may move up by Rs 100-200 in a couple of week. Myanmar is offering urad FAQ & SQ at \$540 & 685 per MT respectively basis Indian ports. Right now in Mumbai FAQ is being quoted at RS4500 while in Chennai it is being quoted at Rs 4550-4600.
- New crop of moong from Karnataka is expected to hit market in the second half of August and crop condition is said to be good so far. Recent showers of rains have benefitted the standing moong crop in many states. However, situation is critical in Maharashtra. Kharif sowing in Maharashtra is running behind by 30 % and sowing season in the state is almost over now. This year sowing has been reported only 69 % of 5 years average in Maharashtra. It would reduce the crop size by 20 to 25 % this year in the state. So moong is likely to trade firm in coming weeks. Major portion of stock is in strong hands and demand is expected to improve as stock in pipeline is coming down now. In Jaipur market moong is being traded at Rs 6200-6300. It may move further up by Rs200. Major kharif growing states like Rajasthan, Karnataka, Odisha, Telangana, M.P. and Gujarat condition for moong crop is poor in Maharashtra. It may be compensated by Rajasthan as good showers of rains are occurring in Rajasthan, M.P. and many eastern states. So any major spike in moong cash market is unlikely until and unless moong crop is washed out by flooding in Rajasthan.
- Cash chana market improves slightly taking clue from firm momentum in futures market & increased buying interests. Mills are active to fulfil their immediate festive demand. However, cash market is unlikely to maintain its upward momentum in coming weeks. Nafed uncertain sale strategy is affecting inner tone in the market. As soon as prices would move beyond 4500, Nafed would start accepting bids at around 4300-4350. It would pressurize cash market again. In Delhi market chana is being traded at Rs 4350-4425 and it may touch 4500 soon. At this level sale by private trade would emerge. So overall tone in cash chana market seems bearish. Nafed may intervene any time. It needs storage space for kharif season starting from August end. Besides, import from Black Sea region has started and importers have struck a deal at \$400 per MT basis CnF Navasheva. If the volume increases, it may affect inner tone

further. With duty it would cost around \$670-680 per MT. Myanmar is offering Kabuli chana at \$700 per MT basis Indian ports.

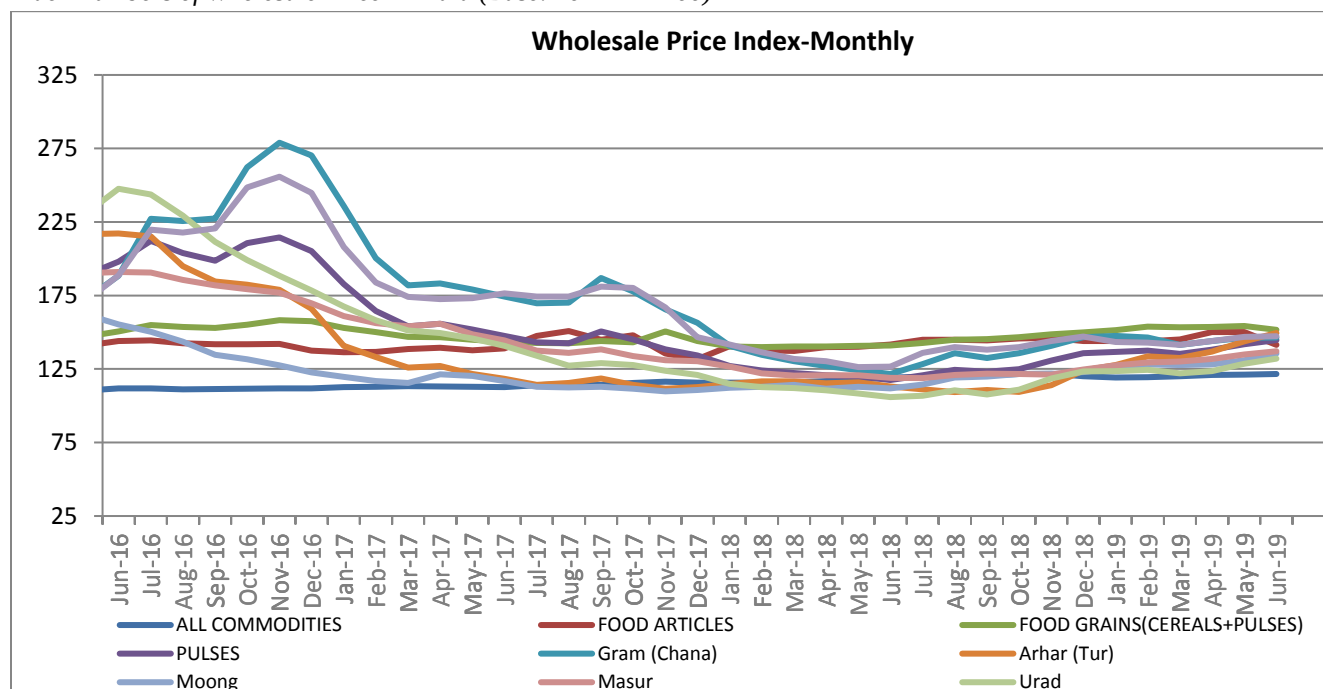

- Lentil market traded steady to slightly weak due to poor offtake from mills and continuous import flow. As consumption is more than availability, prices of lentil is likely to improve in coming weeks. Masoor in Kanpur market is being traded at Rs 4400-4450 while it is being traded at Rs 4100 in Mumbai market. Nafed still has over 1.25 lakh MT stock and it would start selling August onward. Overall trend remains firm. Pea market traded up as stock is coming down amid restricted import. In Kanpur market it has moved up by Rs 150 to Rs 5175-5180. Minor correction is expected at this stage.

International Market:

- As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading towards maturity stage despite some planting going on in certain regions. Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas. Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chickpeas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- Peas area in Canada is likely to increase by 19.89 % to 1754 thousand ha in 2019-20. Production too may increase by 20% to 43 lakh MT. Export and import are likely to be same in 2019-20. Carryout is likely to increase from 4 to 5 lakh MT this year. Average price might be hover in the range of \$255-285 per MT.
- Lentil area in Canada is expected to increase by 0.33 % to 1.53 million ha in 2019-20, due to favorable weather condition. Yield is likely to improve from 1.4 to 1.47 tonne per ha. However, total supply is likely to decrease by 2.85 % to 28.95 lakh MT in 2019-20. Export and import would increase slightly this year despite weak demand from India. Average price may hover in the range of \$ 430-460 per MT.
- Chickpea area in Canada would decline from 179 to 155 thousand ha in 2019-20. Production would decline by 16.40 % to 2.6 lakh MT. Carryout is expected to increase by 12.82 % to 2.2 lakh MT. Average price is expected to hover in the range of \$465 to 495 in 2019-20.
- NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres. The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- As per latest data received from Russian Federal Customs Service, chickpeas export from Russia decreased by 16% to 25,197 MT in May-2019 in comparison to April when export was registered at 29,858 MT. Russia has exported total 99,674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyer buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- Russian export of peas posted slight gain in comparison to March-2019. In April, Russia exported 55,930 MT peas, up by 8% to 518,363 MT in March. In current MY Russia has exported total 175,643 MT, down from 380,191 in the same period the last calendar year. Pakistan bought 12,004 MT, followed by India 9,655 MT and Bangladesh at 8,701 MT. Demand is likely to improve in coming months.

Pulses WPI Index:

Annual Rate Of Inflation:

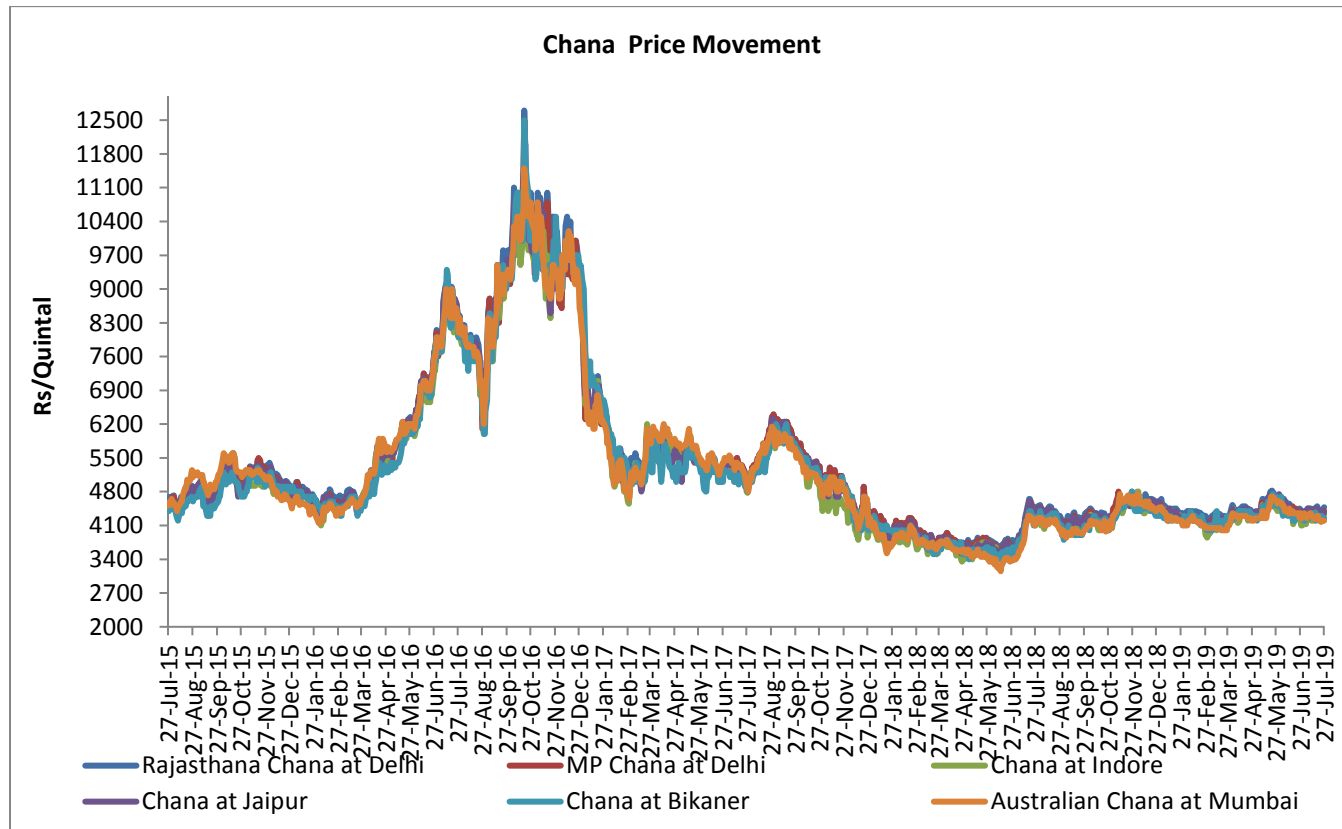

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market may find some balance as Nafed may restrict chana selling at lower level. In Indore and Dewas it has passed bids 200MT chana at Rs4411 per qtl. If it continues to accept bids above Rs4400, cash chana market may move up and touch MSP level. Demand is about to come as festive season starts. So, firmness in cash chana market depends on Nafed selling strategy. If Nafed restricts selling below a certain price (Rs4400-4450), chana may move up otherwise it will continue to trade range bound. In Delhi market it may continue to trade in the range of Rs4350-4550 this week. Futures still remain unsupportive. Festive season has begun and demand for chana products may improve. However, any major spike in Chana market is unlikely. Stockiest should continue to release stock at every rise of Rs 100-150. Bulk buyers are in wait and watch mode.

All India average price for Chana decreased by 1.26 percent from Rs 4363 to 4308 per qtl. in 4th week of July-2019. Australian Chana (imported) price too decreased by 1.52 percent to Rs 4195 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

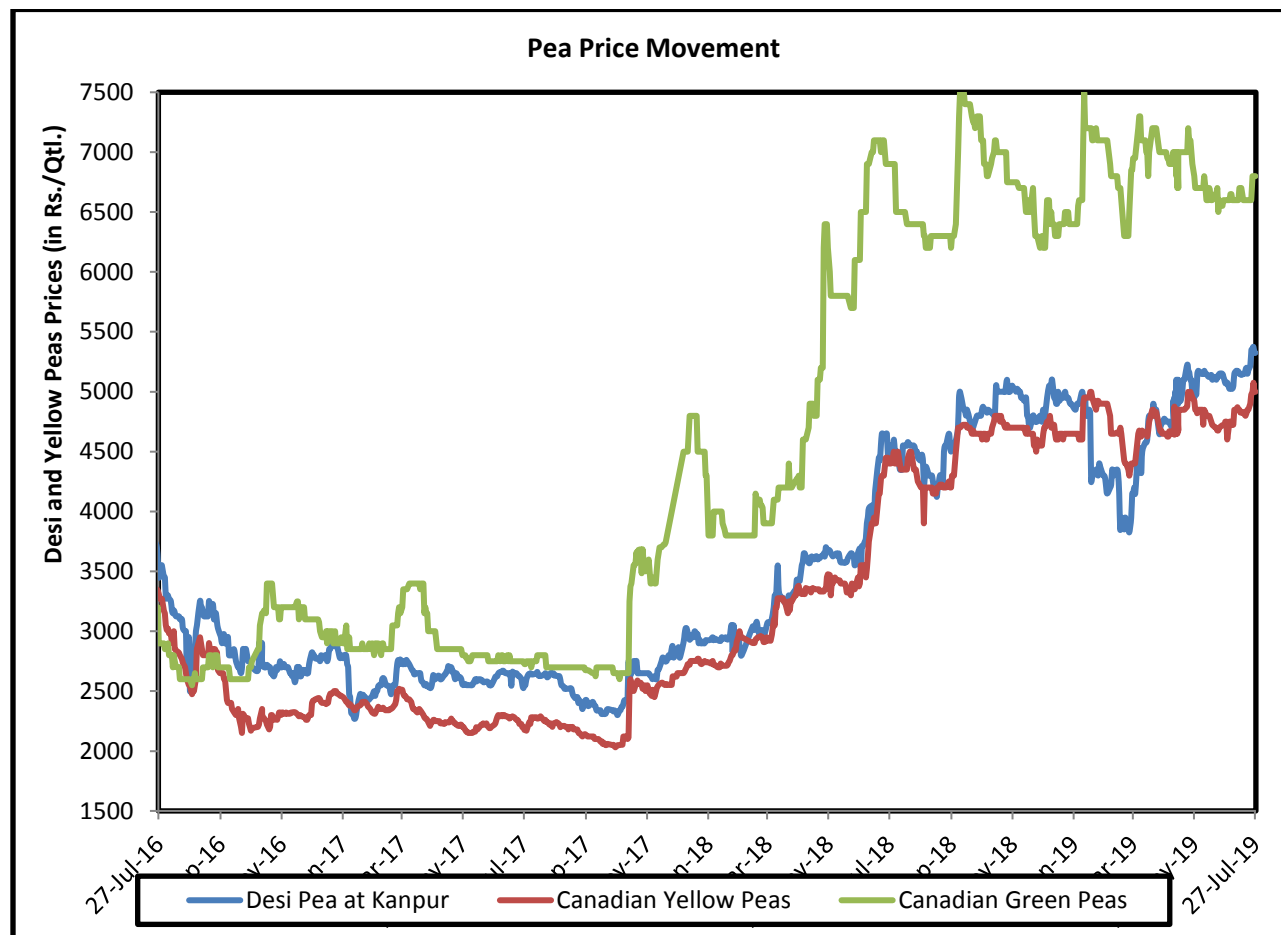

Market Outlook: Chana may trade steady to slightly firm this week.

Peas (Matar):

Market Recap:

Govt has allowed pea import for seed purpose. However, suspicion in Pea market continues as there is no set method to stop it from entering the cash market. As stock is lower, prices may move further up despite weak chana price. . Previously, firmness in chana and import quota restriction at 1.5 lakh tonne for the whole year had helped market to recover. But recovery could not sustain. Festive season demand may push up chana and pea price to some extent in coming weeks. Demand supply gap is widening. Stockiest may prefer to retain stock. Govt. may increase import quota to 2 lakh MT in coming months but not before Aug/Sep, considering the fluctuation in price in domestic market. Pea in Mumbai market is being traded at Rs. 5000-5550 while in Kanpur market it is being traded at Rs 5325-5350 per qtl. As chana price is expected to recover, pea too may trade firm. Stake holders should buy on downward correction.

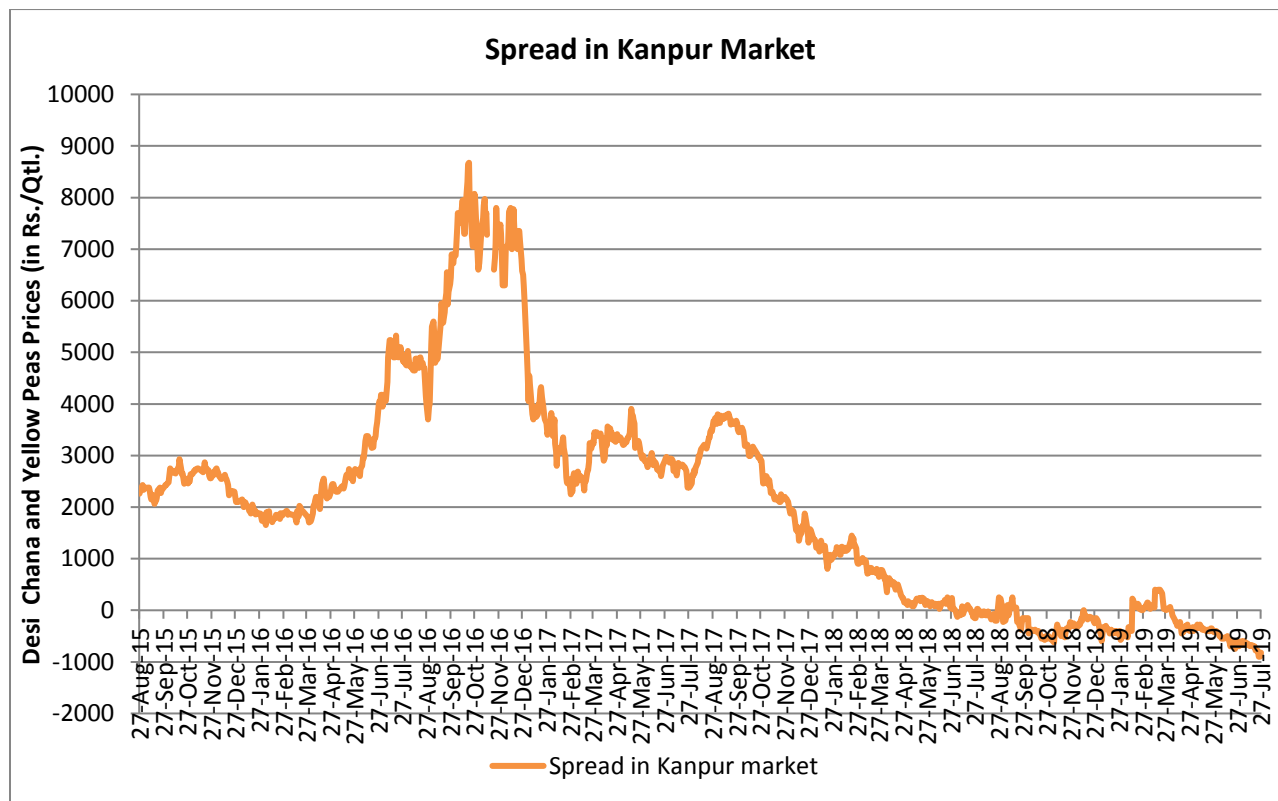

Current Market Dynamics & Outlook:

Pea traded at Rs 5325-5350 in Kanpur market, slightly higher from last week level. Decreasing imported stock may support pea price further in span of time but not before a downward correction of Rs 100 more from current level. Now importers would be able to import only 1.5 lakh tonne till March -2020 if govt. does not increase quota by 50,000 MT or more, short supply may be visible in coming months. In the medium term, demand is expected to improve as price of pulses would move up from current level. Stake holders should buy on decline of Rs 100-200.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market has stayed in negative zone and gap increased slightly due to increased pea price in Kanpur market. Spread is expected to remain in negative zone of 750-950 on relative movement in Chana and pea price.

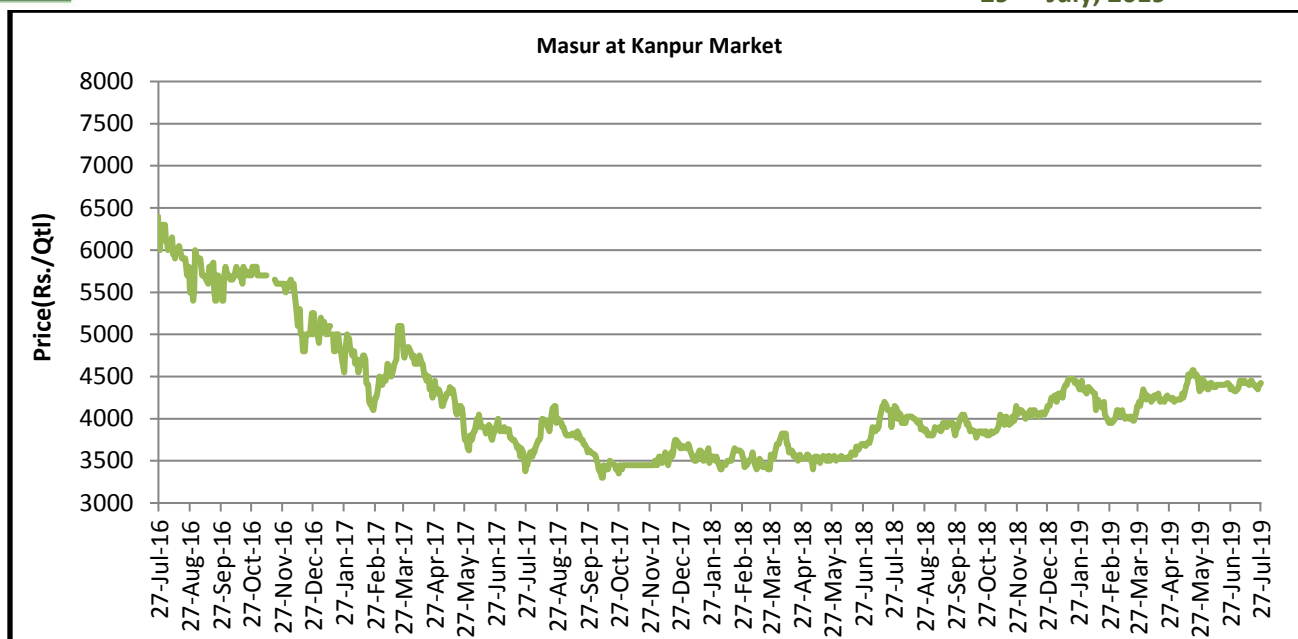

MarketOutlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

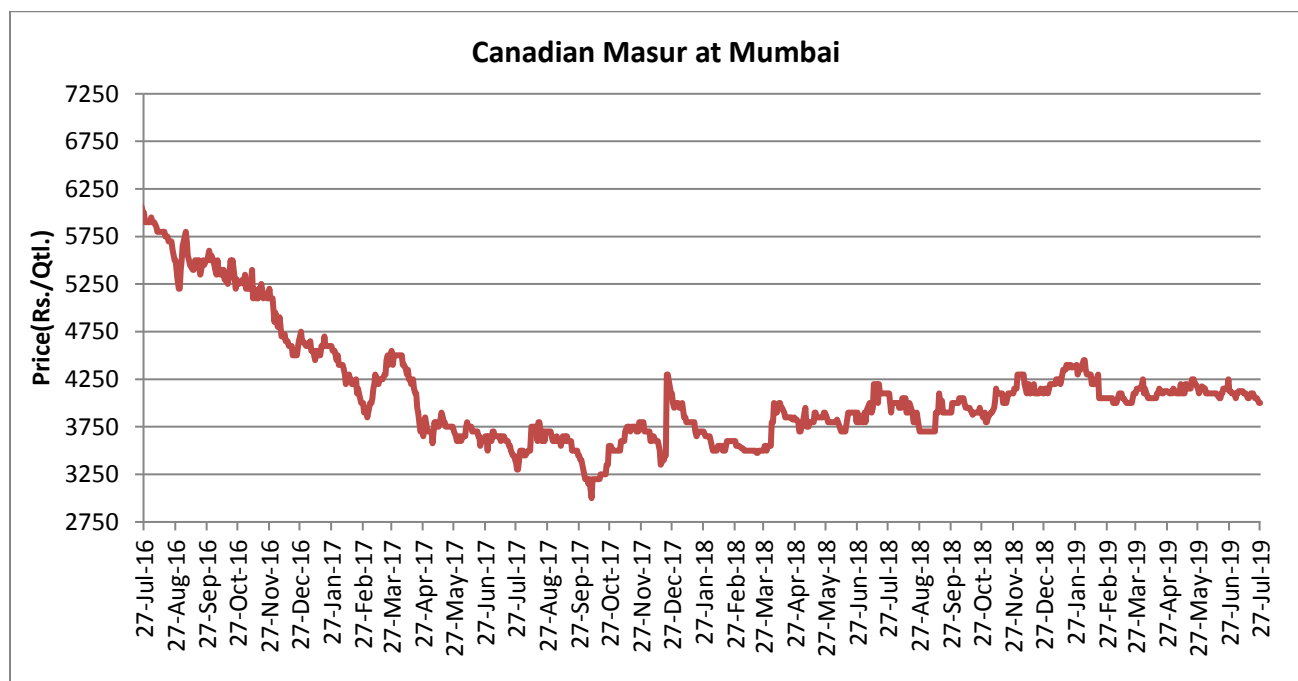

Market Recap:

Lentil in global market is being traded at comparatively higher price and at this price there is disparity for Indian importers. As local stockiest are unable to hold stock for some more time due to liquidity issue, supply side has eased to some extent. Besides, Nafed has stock and auction is expected soon for bulk buyers. Demand for lentil dal too is weak at this point of time. So lentil bulity price stayed steady at Rs 4400-4450. As maximum stock in domestic market is in strong hands and demand is likely to come in the weeks ahead, masur price is expected to improve from current level. Right now demand for malka and Chalani is weak. Mills in Delhi are buying masur from MP and UP at cheaper rate and it would not continue for couple of weeks. So masur may move up again from current level.

Current Scenario:

In the 4th week of July-2019, average price in key market like Kanpur was down by 0.13 % to Rs 4430 per qtl. Prices are likely to trade steady in Aug to a certain extent. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Demand is expected to improve in Aug.

Market Outlook: Prices are likely to stay steady to slightly firm due to higher percentage of retention by private trades. Nafed would interfere when prices move beyond MSP level. Import continues and it may limit one way trend.

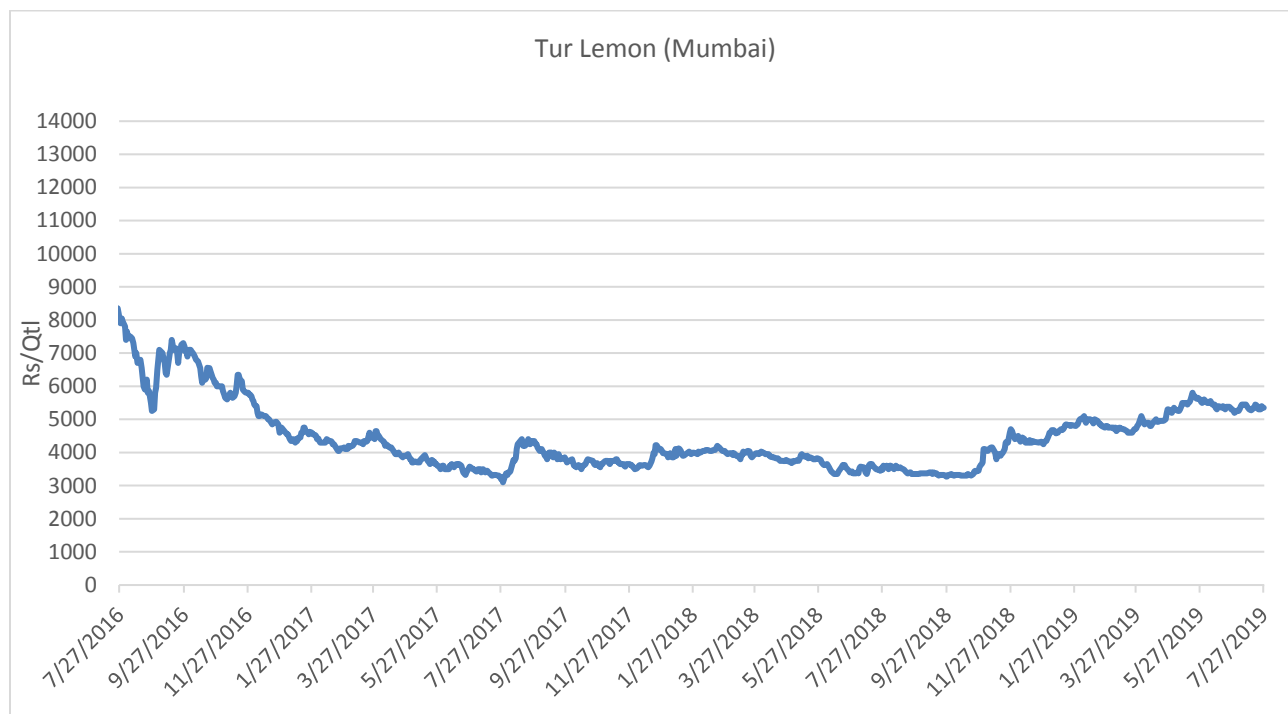

Pigeon Pea (Tur/Toor):

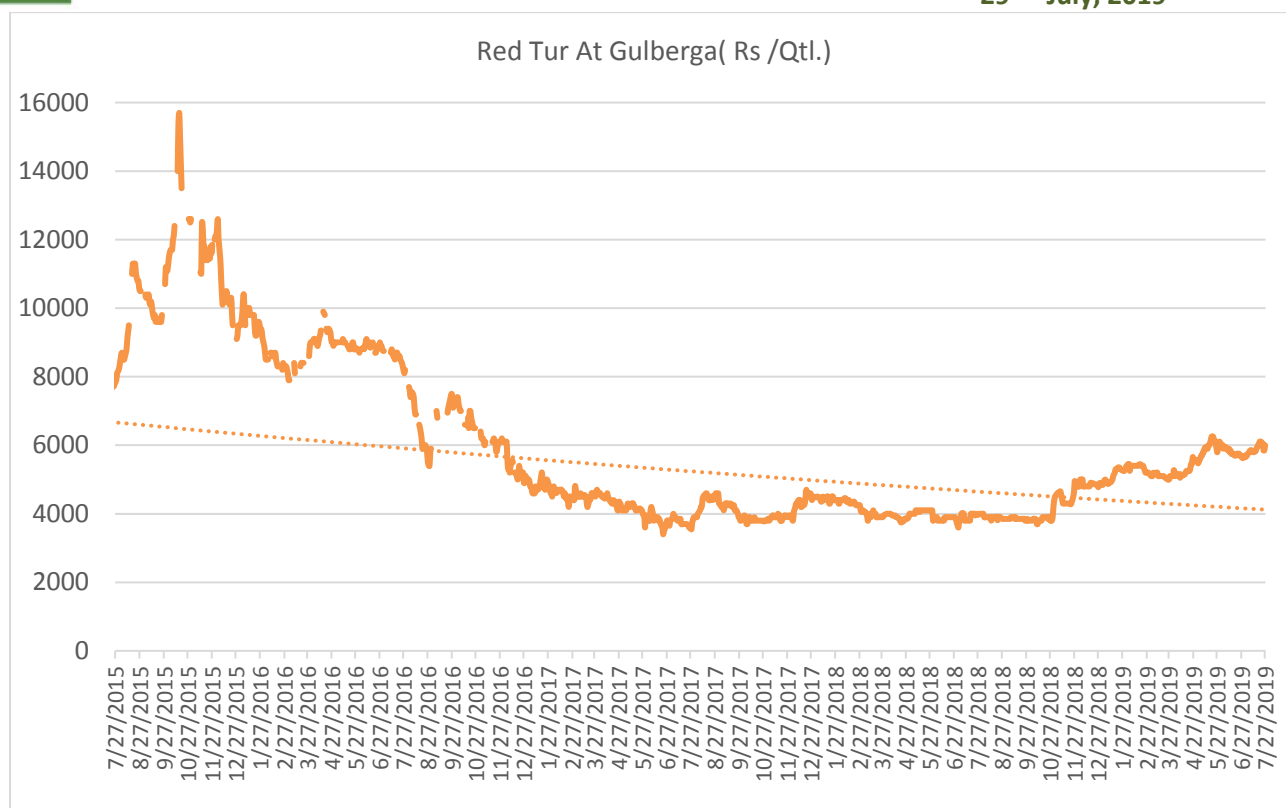

Market Recap:

At planting front, Indian farmers have covered 29.58 lakh ha as on 26 July-2019. It is lower by 14.43% from last year. Normal area till date is 32.69 lakh ha and normal of the whole season is 43.00 lakh ha. The major growing state like Karnataka & Maharashtra planting is running behind by 26.97 % to 6.40 and 3.73 % to 10.13 lakh ha so far. Normal area in these states are 8.62 and 12.53 lakh ha. In AP normal area for tur is 2.37 lakh ha. However, farmers have covered only 0.27 lakh ha so far against 0.77 lakh ha last year. Against it, farmers in Telangana have covered 3.41% lower area to 2.28 lakh ha this year so far. In MP area under tur is running behind by 17.79 % to 3.65 lakh ha. Normal area in M.P. is 5.80 lakh ha. Area in UP has improved from last year by 9% to 2.23 lakh ha so far. Situation is expected to improve in coming weeks too with good rainfall in these regions.

Current Market Dynamics & Outlook:

Tur market is likely to move up despite improvement in planting area. In Gulberga market, it is being traded at Rs 5950-6050 as buyers are active. Stockiest are unwilling to sell stock as they hope better price in coming months. Immediate import in bulk volume is unlikely. So, fundamental remains supportive to cash tur market right now. Stockiest are unwilling to sell at current level despite higher import quota of 4 lakh MT and possibility of 1.75 lakh MT more import through G2G basis. Govt. is willing to keep supply side at ease. So, any major spike in tur market in the near term is unlikely.

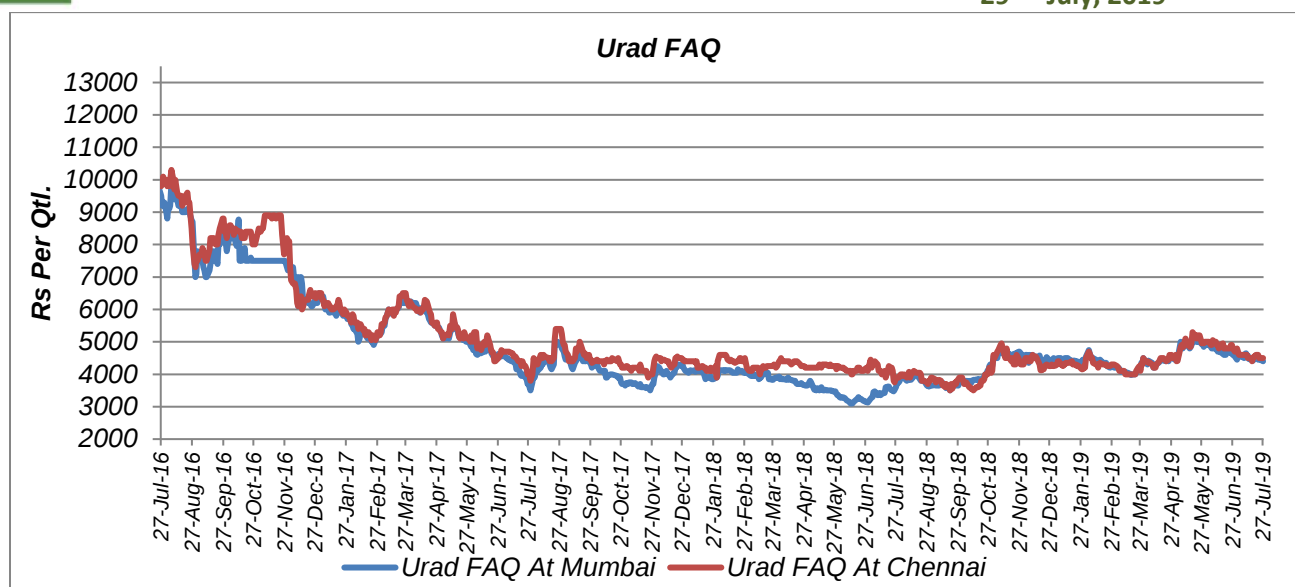

Market Outlook: Tur market may trade steady to slightly firm with decreasing arrivals from old stock and improved buying spree.

Black Matpe (Urad):

At planting front, area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 26.15 lakh ha so far against 28.97 lakh ha last year till date. It is lower by 9.73 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 15.20 % to 11.83 lakh ha against season's normal of 10.67 lakh ha. However, situation in UP has improved now and farmers have covered 6.21% higher area to 4.43 lakh ha so far.. Area in Rajasthan is up by 8.32% to 4.46 lakh ha against 4.11 lakh ha last year as on 26th July-2019. As south Indian states are not significant from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.04 lakh ha so far. Even in Telangana farmers have covered 0.21 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Urad FAQ at Mumbai (Rs Rs4400-4550 per Qtl.) and Chennai (Rs.4500-4550 Qtl.) noticed weak tone. It traded down in Vijaywada too. Improvement might be seen in Urad market once again as fear of lower crop size is increasing. Uncertainty over monsoon rains continues. The following graph shows the prices movement in different markets:

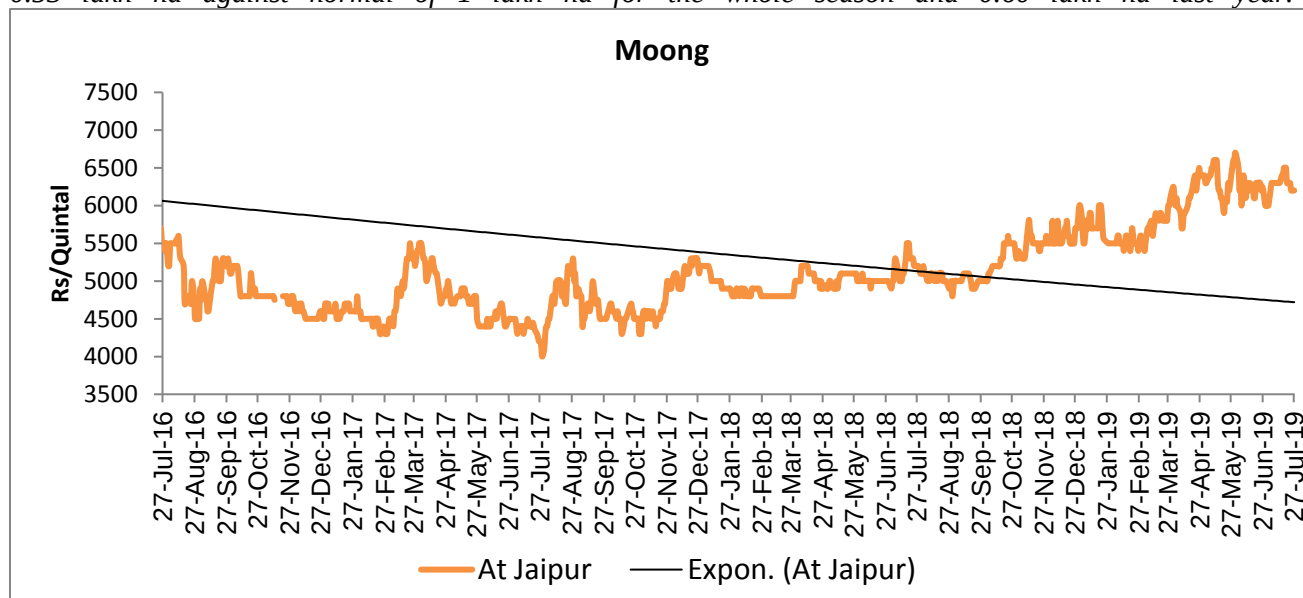

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

All India kharif area coverage under moong is running behind by 24.72 % to 20.48 lakh ha as on 26th -July-2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 11.87 lakh ha against 15.86 last year and normal of 13.27 lakh ha. It is running behind by 43.26 % to 2.18 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 2.74 lakh ha has been covered against the normal of 4 lakh ha. AP has covered only 0.2 thousand ha against normal of 0.07 ha. In Telangana farmers have covered only 0.53 lakh ha against normal of 1 lakh ha for the whole season and 0.60 lakh ha last year.

Market Outlook: Moong prices are likely to recover in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Aug.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4350 to 4550 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4350 with the first target of 4450 and second target 4550 with stop loss at 4250 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4150	4300	4375	4550	4650

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week taking clue from improved chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT. Stock at port is exhausting fast.

Technical Analysis:

Candle stick chart denotes weak movement in the market.

RSI is moving down in neutral region.

Expected price band for pea is 4850-5250 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4900 with the first target of 5100 and second target 5250 with stop loss at 4900 level.

Support & Resistance
