Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Import foot of pulses from Myanmar and Africa during last one week at Indian ports, many vessels on way to Indian ports and weak demand in domestic market at this point of time has pressurized pulses cash market by 5 to 10 % in four-five days.** As supply from imported pulses and from kharif crop is expected to increase by the end of this month, prices of pulses are expected to remain under pressure during festive season. Normally, pulses demand increases during festive season. However, govt. allowed 4 lakh MT tur import, 1.5 lakh MT moong and urad each. Besides lentil is being imported at faster pace. Good rainfall in kharif growing belts too is ensuring better kharif pulses production prospects. So, prices of pulses would remain stable at peak demand season.
- **India has received 410.50 mm of actual rainfall against 452.20 mm of normal rainfall during 01st June to 31st July-2019.** During the same period rainfall was below LPA by 8%, 5%, 19% and 11% in Northwest India, Central India, South Peninsula and East & Northeast peninsula respectively. Deficient rainfall has been recorded in Gujarat, West Uttar Pradesh, Jharkhand, West Bengal, Orissa, Marathwada, Rayalseema, S.I Karnataka, Tamil Nadu & Pondicherry. During the week (25 to 31st July) the rainfall was 42% above the LPA for the entire country. Wheat crop has been harvested. Farmers were already advised to slightly delay their Kharif sowing. IMD has given forecast for normal monsoon this year.
- **Improvement in acreage, good showers in producing region and govt's intention to release old stock of tur may cap uptrend in coming weeks.** Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.75 lakh MT through govt.'s channel. So, any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$740-50 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 8 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5800-5950 per qtl and it may continue to trade at same level until and unless heavy rains in growing regions wash out the standing crop.
- **Improvement in sowing area, higher stock (3.32 lakh MT) with Nafed and its continuous release** with improving rainfall status, have pressurized urad market once again. Crop condition in MP, Rajasthan, Maharashtra, Gujarat and Uttar Pradesh is very good so far. Under emerging scenario, stockiest would prefer to release old stock too amid continuous import by millers. All these factors are restrictive to urad cash market in coming weeks. Demand remains weak despite festive season. In Mumbai market Urad is being traded at Rs 4450-4500 and in Chennai market it is being traded at Rs 4550-4650. Urad may extend its loss further.
- **Pressure on moong might be seen in coming weeks due to improved area, good rainfall in growing region and 1.45 lakh MT stock with Nafed.** New crop in Karnataka is expected to hit market soon and pressure might be seen from mid-August. It would not allow market to move up from current level. Nafed would continue to release stock in various states through auction. Besides, millers have option to import 1.50 lakh MT moong. Demand is weak in cash market. So, any upward momentum is unlikely before commencement of procurement at MSP of Rs 7050. Crop condition in Karnataka, Maharashtra and Gujarat is good so far. Moong is being traded at Rs 6200-6250 in Jaipur market. It may decline to Rs 6000 in coming weeks.
- **Lentil demand is weak due to which trade is sluggish. Millers are importing nipper quality from Australia and exporting the same after processing to Bangladesh at Rs 4900-4950 per quintal.** The same quality is being offered by millers in Bihar at Rs 5500 per quintal. Due to huge price gap the domestic market is witnessing low demand. Lentil container and vessel at port are being quoted at Rs 4100 per quintal and Rs 3950 per quintal respectively. Lentil mill quality at Kanpur is moving in around Rs 4425 per quintal. As per govt.'s 03rd adv. estimate released on 03rd June-2019 govt. has estimated 1.56 MMT production in 2018-19 compared to final estimate of 1.62 MMT for 2017-18. As per traders view, this estimate is at higher side.
- **Chana in Delhi market improved slightly by Rs 50 to Rs 4425. Millers are buying based on needs only despite lower arrival.** There is a common view in the market that chana would continue to trade range bound despite festive season as there is plenty of stock with Nafed. Liquidity issue in the market too is restricting bulk purchase – sale.

International Market:

- **Lentil Production in Canada is expected to increase slightly from 2092(2018-19) thousand MT to 2200 thousand MT in 2019-20.** However, total supply is expected to decline slightly from 2989 to 2895 thousand MT. Export is expected to remain at 18 lakh MT, similar to 2018-19 level. Carry out stock is expected to decline from 7 lakh MT to 5 lakh MT in 2019-20. Prices are expected to hover in the range of 4430 to 460 per MT. Yield would be same at 1 Tonne per ha, similar as last year.
- **Dry Pea area in Canada is expected to increase slightly from 1431 to 1715 thousand ha in 2019-20.** Thus production is expected to increase from 3581 to 4300 thousand tonne in 2019-20. Due to higher production estimate total supply is likely to increase from 4246 to 4515 thousand tonne in 2019-20. Export is expected to increase from 26 lakh MT to 31 lakh MT in 2019-20. However, carryout would decline from 7.45 to 5 lakh MT this year. Price range is expected to hover in the range of \$255 to 285 per MT in 2019-20.
- **At Chickpea front, production in Canada is expected to decline from 3.11 to 2.60 lakh MT in 2019-20.** However, total supply is expected to increase slightly, from 3.37 to 4.28 lakh MT, due to weak demand in global market. Carryout is likely to increase from 1.70 to 2.20 lakh MT in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT in 2019-20.
- **As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading towards maturity stage, despite some planting going on in certain regions.** Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chickpeas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **As per latest data received from Russian Federal Customs Service, chickpeas export from Russia decreased by 16% to 25197 MT in May-2019 in comparison to April when export was registered at 29,858 MT.** Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyer buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 2.8 point from 141.8 in May to 144.6 in June-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

Higher stock availability with Nafed and in private hands, weak futures and sluggish demand in cash market amid good rainfall in kharif pulses growing belts, weak demand for other pulses remain price affecting factors for chana market. Despite higher duty import from African countries at cheaper price is likely to increase in coming months. Sudan is offering Chana at Rs 3850-3900 basis Indian port and around 20,000 MT is expected by mid –Aug-2019. As all pulses prices are under pressure, chana too continues to reel under pressure. Nafed would not be able to retain stock for a longer period as kharif procurement season is round the corner and Nafed has to offload old crop for new pulses storage. So, it seems difficult for chana market to move beyond MSP level (RS 4625 per qtl.) in August. Stake holders should release stock at every improvement of Rs 100 from current level. In Delhi market chana is being traded at Rs 4300-4350. Nafed has 12.79 lakh MT old chana and 7.57 lakh MT new chana in its stock. The higher quantity would not allow market to go up. Bulk buyers too have restricted its buying due to weak demand and availability of higher stock in the market.

All India average price for Chana decreased by 1.70 percent from Rs 4403 (June) to 4328 per qtl. in July-2019. Australian Chana (imported) price too decreased by 3.11 percent from Rs 4393 to Rs 4256 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Chana may trade steady to slightly weak this week too.

Peas (Matar):

Market Recap:

Pea market could not sustain its firm momentum and declined with weak chana market. Pressure is likely to continue due to weak demand in cash market taking clue from other weak pulses. However, some improvement was seen in desi pea market in Kanpur due to lower production in domestic market, restricted import and declining stock. However, upward momentum is unlikely to continue as buyers remain silent at higher level. Import remains restricted for consumption grade pea at 1.5 lakh MT. It may be increased to 2lakh MT in coming months. In a new development, govt. has allowed pea import for seed purpose.

However, it would not impact current market trend. Pea in Mumbai market is being traded at Rs. 5025, while in Kanpur market it is being traded at Rs 5300-5350 per qtl. As chana price has started decreasing, pea too would trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till April-2020 and lower availability of imported stock may support pea market once again from Aug end. If chana continues to trade weak, pressure would continue, on pea price too. Weak trend may prevail in August.

Current Market Dynamics & Outlook:

Pea market traded under pressure despite lower stock at port. However, Kanpur market traded slightly up from 5136 to 5201 per qtl due to increased holding by private trades. Overall, all India average increased by 1.25% to Rs5625per qtl in July. In Mumbai market, pea traded at Rs 5025, up from Rs 4810 in June. Pressure is likely to continue in August as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season is about to begin.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs650 to Rs 850. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

MarketOutlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed. It still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in August. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4100 per quintal. In Kanpur market it is being traded at Rs4400-4425 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4250-4550 in August.

Current Scenario:

In the 1st week of August-2019, average price in key market like Kanpur was down by 0.08 % to Rs 4425 per qtl. Prices are likely to trade steady in Aug to a certain extent. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Demand is expected to improve in Aug.

Market Outlook: Prices are likely to stay steady to slightly firm due to higher percentage of retention by private trades. Nafed would interfere when prices move beyond MSP level. Import continues and it may limit one way trend.

Pigeon Pea (Tur/Toor):
Market Recap:

At planting front Indian farmers have covered 37.50 lakh ha as on 02nd Aug-2019. It is lower by 4.56% from last year. Normal area till date is 36.78 lakh ha and normal of the whole season is 43.00 lakh ha. Area in major growing state like KarnatakaUttar Pradesh & Jharkhand is up by 12.60,6.68 and 10.42 % so far. However, area in Maharashtra & M.P. is running behind by 5.98 and 22.60%. With good rainfall overall area is expected to touch normal level of 43 lakh ha this year too.

Current Market Dynamics & Outlook:

Improvement in acreage ,good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks.Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.75 lakh MT through govt.'s channel.So any short fall in open market is unlikely before new crop hits Indian market in December.Crop condition in Myanmar is good to excellent so far.So, supply side seems balanced.Myanmar is offering lemon tur at \$740-50 per MT basis Indian port. Demand in domestic market is normal against supply.Nafed still has over 8 lakh MT tur.So,any spark in price is unlikely.Tur in Gulberga market is being traded at Rs 5800-5950 per qtl and it may continue to trade at same level until and unless heavy rains in growing regions wash out the standing crop.

Agriwatch expects tur price to move in the range of Rs 5600-6000 in Gulbarga market. Right now, it is being traded at Rs 5800-5850. CiF quotes in Myanmar have decreased to \$ 740-50 per MT after touching at \$780-790 per MT.It is good to release some parts of stock at every hike of Rs100-150.

Market Outlook: Tur market may trade steady to slightly weak with increasing flow of import and from central pool amid weak demand so far..

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 30.27 lakh ha so far against 31.99 lakh ha last year till date. It is lower by 5.36 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 2.10 % to 13.98 lakh ha against season's normal of 10.67 lakh ha. However, situation in UP has improved now and farmers have covered 5.58% higher area to 5.35 lakh ha so far Area is up in Rajasthan by 4.44% to 4.56 lakh ha against 4.37 lakh ha last year as on 02 nd Aug-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.04 lakh ha so far. Even in Telangana farmers have covered 0.21 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Urad too remains under pressure. Nafed would continue to sell old stock and two vessels is on the way to Indian ports. Demand in cash market is still weak while kharif area has improved considerably. All these developments have affected urad price in Mumbai and Chennai. In Mumbai it is being traded at RS 4300-4325 and may move down by Rs 100 more to Rs 4200.

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

All India kharif area coverage under moong is running behind by 12.01 % to 25.81 lakh ha as on 2nd Aug--2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 16 lakh ha against 16.84 lakh ha last year and normal of 13.27 lakh ha. It is running behind by 35.78 % to 2.49 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 2.86 lakh ha has been covered against the normal of 4 lakh ha. Pressure on moong might be seen in coming weeks due to improved area, good rainfall in growing region and 1.45 lakh MT stock with Nafed. New crop in Karnataka is expected to hit market soon and pressure might be seen from mid-August. It would not allow market to move up from current level. Nafed would continue to release stock in various states through auction. Besides millers have option to import 1.50 lakh MT moong. Demand is weak in cash market. So, any upward momentum is unlikely before commencement of procurement at MSP of Rs7050.

Market Outlook: Moong prices are likely to trade range bound in the near term.

Import- Export & Average Monthly CiF:

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in Aug.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4300 to 4500 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4450 and second target 4500 with stop loss at 4200 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4150	4200	4300	4550	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week taking clue from improved chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT. Stock at port is exhausting fast. So pea may move up.

Technical Analysis:

Candle stick chart denotes firm movement in the market.

RSI is moving up in neutral region.

Expected price band for pea is 4950-5350 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4950 with the first target of 5150 and second target 5250 with stop loss at 4900 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4800	4900	5025	5250	5400

Masoor:
Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

Technical analysis:

Chart depicts steady to firm movement in the market.

RSI oscillator is moving up in neutral region.

Expected price range is 4300-4550

Strategy: Buy on dip:

Trade Recommendations: Buy around 4350 with the first target of 4450 and second target 4550 with stop loss at 4250 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4100	4250	4400	4550	4650

Tur:
Tur (at Gulbarga) Spot Market Weekly Chart:

Outlook - We expect prices to show range bound movement in the coming week.

Technical analysis:

Candlestick chart denotes weak movement in the market.

Oscillator RSI is moving down in neutral region.

Expected price range is 5800-6150

Strategy: Buy on dip

Trade Recommendations: -Go long around 5800 with the first target of 6000 and second target 6100 with stop loss at 5700 level.

Support & Resistance
