Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Indian farmers have covered 120.94 lakh ha area under pulses as on 16th, Aug-2019 against 125.34 lakh ha last year till date.** It is 3.51% lower than last year. Normal area under kharif pulses is 119.89 lakh ha. Farmers have covered 42.17 lakh ha under tur, 33.80 lakh ha under urad bean, 29.10 lakh ha under moong, 0.20 lakh ha under kulthi and 15.67 lakh ha under other pulses. It is 0.09 % up for tur, 6.21% down for urad, 10.04% down for moong, 45.45 % for kulthi and 8.43% up for other pulses from last year.
- **Continuous and heavy rains in some major tur growing states like Karnataka, Madhya Pradesh, Rajasthan and Maharashtra have increased concern of crop loss.** Flooding in three districts of Karnataka, Marathwara region in Maharashtra and four districts each in Rajasthan and MP may damage standing tur crop in the field. However, crop condition in AP, Gujarat, U.P. & Jharkhand is in good shape. So overall impact on crop size would not be 8 to 10 percent in current scenario. Impact of this likely loss is visible on price and market moved up By Rs 100 in last two-three days. In Gulberga market prices move up by Rs 50-75 to Rs5900-5925 and may move up further by Rs 200 from current level.
- **Heavy rains & flooding in some major growing belts of Rajasthan, Maharashtra & MP have started affecting standing crop of urad.** However, crop in upper land in MP and UP is in good to excellent condition. So overall impact of loss is not as much as is expected right now. Overall area is running behind by 6.21% from last year to 33.80 lakh ha so far. So, current loss with lower area would not allow market to trade lower. If rains continue in growing region urad price may move up by Rs200 -300 from current level. As sowing is delayed by 20 days, new crop would be available one month late i.e. in November. It may keep market well supported at current level. In Mumbai market urad is being traded at Rs 4500-4525 while in Chennai market it is being traded at Rs 4650-4700. It may move further up by Rs 200. Even stockiest started restricting sales. New urad from Gujarat and Maharashtra too would hit market from end Sep. Urad from Chandausi line is expected in Nov. There is good sowing in Guna & Ashoka Nagar. Besides, crop is in excellent condition in Lalitpur, Tikamgarh line.
- **Rains in Karnataka and Maharashtra have affected quality of moong crop in both states.** Some damage has been reported in lower land too. In other region crop condition is good to excellent. However, sowing got delayed by 15 to 20 days, arrival from other states too would be delayed and it would support moong price at current level. In Jaipur mandi moong is being traded at Rs 6200. With opening of weather, arrival is expected to increase in Karnataka and Rajasthan. So moong price may trade steady to slightly firm. Procurement at MSP too would not allow market to decrease. However, in Jaipur market price may touch to Rs6000 at peak arrival season.
- **Slightly recovery has been seen in chana market with improved demand due to festive season.** Besides, Nafed's decision not sell chana in Maharashtra and restrict its selling in other states too have lent support to cash chana market. Recovery in chana market is unlikely to sustain as Nafed has ample stock and it has to sell it in lean season. It would cap uptrend in the market. In Delhi market chana is being traded at RS 4400-4450 and it may move up to MSP level. Beyond that level stockiest would be active and would prefer to release stock. Even futures market too affects market sentiments. Overall trend in chana market seems slightly firm. However, any spike is unlikely in the near to medium term. So it is good for stake holders to release stock at every jump of Rs100. After festive demand it may come down again.
- **Lentil demand is weak due to which trade is sluggish. Millers are importing nipper quality from Australia** and exporting the same after processing to Bangladesh at Rs 4900-4950 per quintal. The same quality is being offered by millers in Bihar at Rs 5500 per quintal. Due to huge price gap the domestic market is witnessing low demand. Lentil container and vessel at port are being quoted at Rs 4100 per quintal and Rs 3950 per quintal respectively. Lentil mill quality at Kanpur is moving in around Rs 4425 per quintal. As per govt.'s 03rd adv. estimate released on 03rd June-2019 govt. has estimated 1.56 MMT production in 2018-19 compared to final estimate of 1.62 MMT for 2017-18. As per traders view, this estimate is at higher side.

International Market:

- **Lentil Production in Canada is expected to increase slightly from 2092(2018-19) thousand MT to 2200 thousand MT in 2019-20.** However, total supply is expected to decline slightly from 2989 to 2895 thousand MT. Export is expected to remain at 18 lakh MT, similar to 2018-19 level. Carry out stock is expected to decline from 7 lakh MT to 5 lakh MT in 2019-20. Prices are expected to hover in the range of 4430 to 460 per MT. Yield would be same at 1 Tonne per ha, similar as last year.
- **Dry Pea area in Canada is expected to increase slightly from 1431 to 1715 thousand ha in 2019-20.** Thus production is expected to increase from 3581 to 4300 thousand tonne in 2019-20. Due to higher production estimate total supply is likely to increase from 4246 to 4515 thousand tonne in 2019-20. Export is expected to increase from 26 lakh MT to 31 lakh MT in 2019-20. However, carryout would decline from 7.45 to 5 lakh MT this year. Price range is expected to hover in the range of \$255 to 285 per MT in 2019-20.
- **At Chickpea front, production in Canada is expected to decline from 3.11 to 2.60 lakh MT in 2019-20.** However, total supply is expected to increase slightly, from 3.37 to 4.28 lakh MT, due to weak demand in global market. Carryout is likely to increase from 1.70 to 2.20 lakh MT in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT in 2019-20.
- **As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading** towards maturity stage, despite some planting going on in certain regions. Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick- peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick- peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **As per latest data received from Russian Federal Customs Service, chickpeas export from Russia decreased by 16% to 25197 MT in May-2019** in comparison to April when export was registered at 29,858 MT. Russia has exported total 99674 MT in this MY against 19,209 MT during the previous calendar year. Pakistan was the major buyer buying 9,797 MT in May, followed by India-6,789 MT and Turkey at 3,766 MT. Demand remains weak as main buyer like India is almost out of the market due to higher availability in domestic market as well as central pool.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1point from 144.6 in June to 144.7 in July-2019

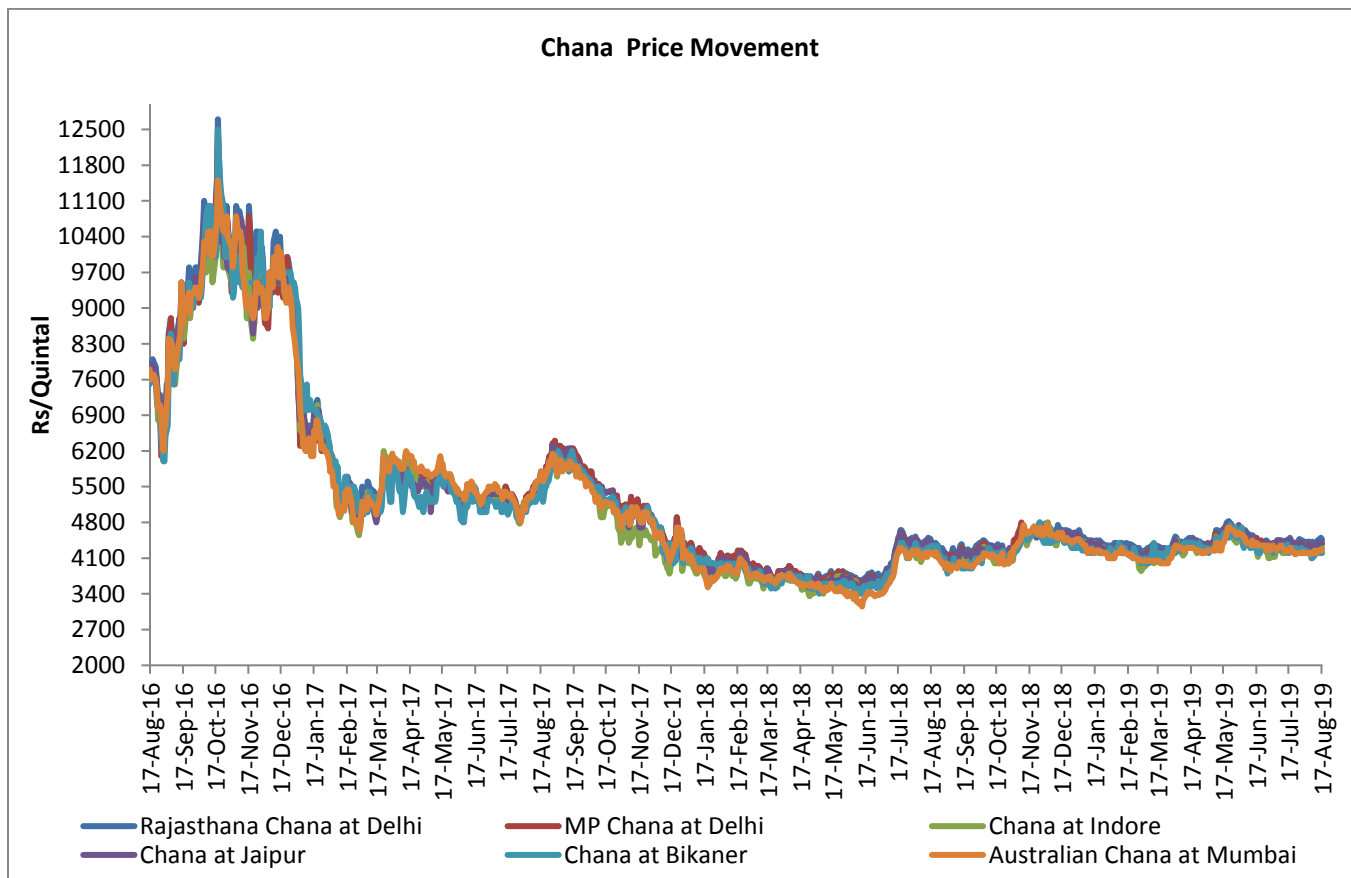

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana market could not sustain its upward momentum and decreased by Rs50 to Rs 4425 in Delhi market taking clue from weak futures. Demand remain restricted despite festive season. Market is well aware of Nafed stock. Cash market should improve once again and may trade at Rs 4400-4600 in Delhi market in coming weeks. Weak demand, liquidity issue and Nafed stock remain restrictive to cash chana market. Even futures remains un-supportive to cash market.. Stake holders should release stock at every improvement of Rs 100 from current level. In Delhi market chana is being traded at Rs 4300-4350. Nafed has 12.79 lakh MT old chana and 7.57 lakh MT new chana in its stock. The higher quantity would not allow market to go up. Bulk buyers too have restricted its buying due to weak demand and availability of higher stock in the market.

All India average price for Chana increased by 1.32 percent from Rs 4291 to 4348 per qtl.in 3rd week of Aug-2019. Australian Chana (imported) price too increased by 1.21 percent from Rs 4200 to Rs 4251 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

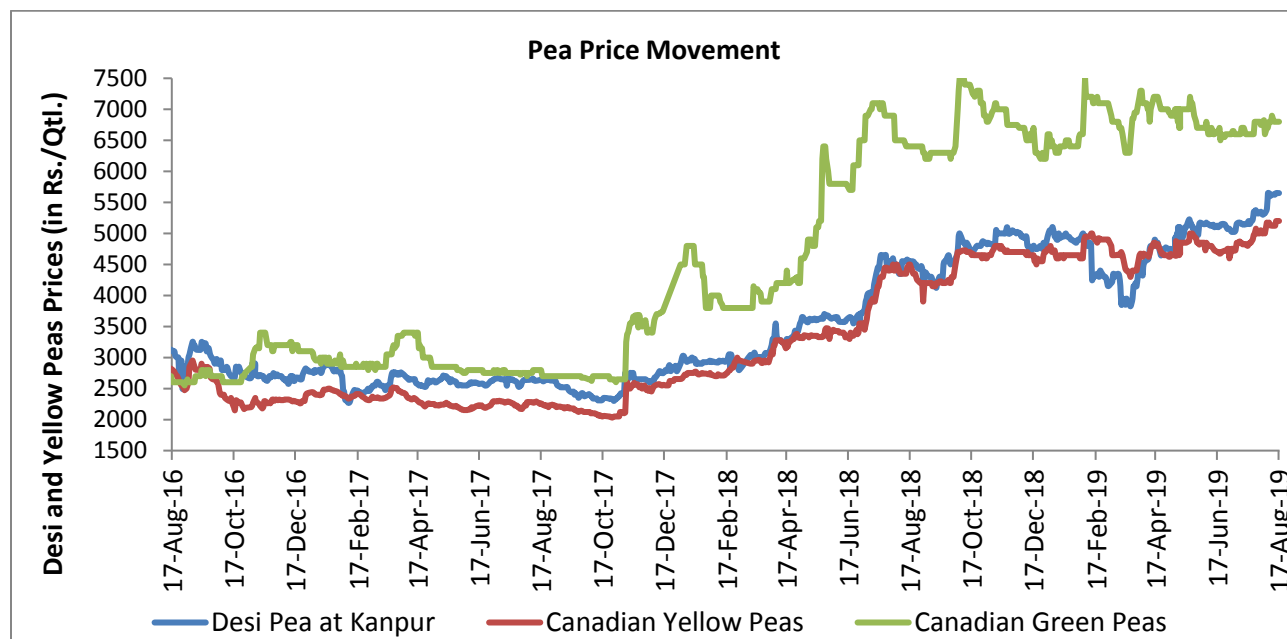

Market Outlook: Chana may trade steady to slightly weak this week too.

Peas (Matar): Market Recap:

Pea market could not sustain its firm momentum and declined with weak chana market. Slight increase was seen due to improved demand from actual users last week. Pressure on price might be seen again due to weak demand at higher level in cash market. Other pulses too seems under pressure. Some improvement was seen in desi pea market in Kanpur due to lower stock in domestic market, restricted import and declining availability. However, upward momentum is unlikely to continue as buyers would restrain buying at higher level. Import remains restricted for consumption grade pea at 1.5 lakh MT. It may be increased to 2 lakh MT in coming months. In a new development, govt. has allowed pea import for seed purpose.

Pea in Mumbai market is being traded at Rs. 5200, while in Kanpur market it is being traded at Rs 5600-5650 per qtl. As chana price has started decreasing, pea too would trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm. Stake holders should buy on downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from Aug end. If chana continues to trade weak, pressure would continue, on pea price too. Steady to slightly firm trend may prevail in Sept too.

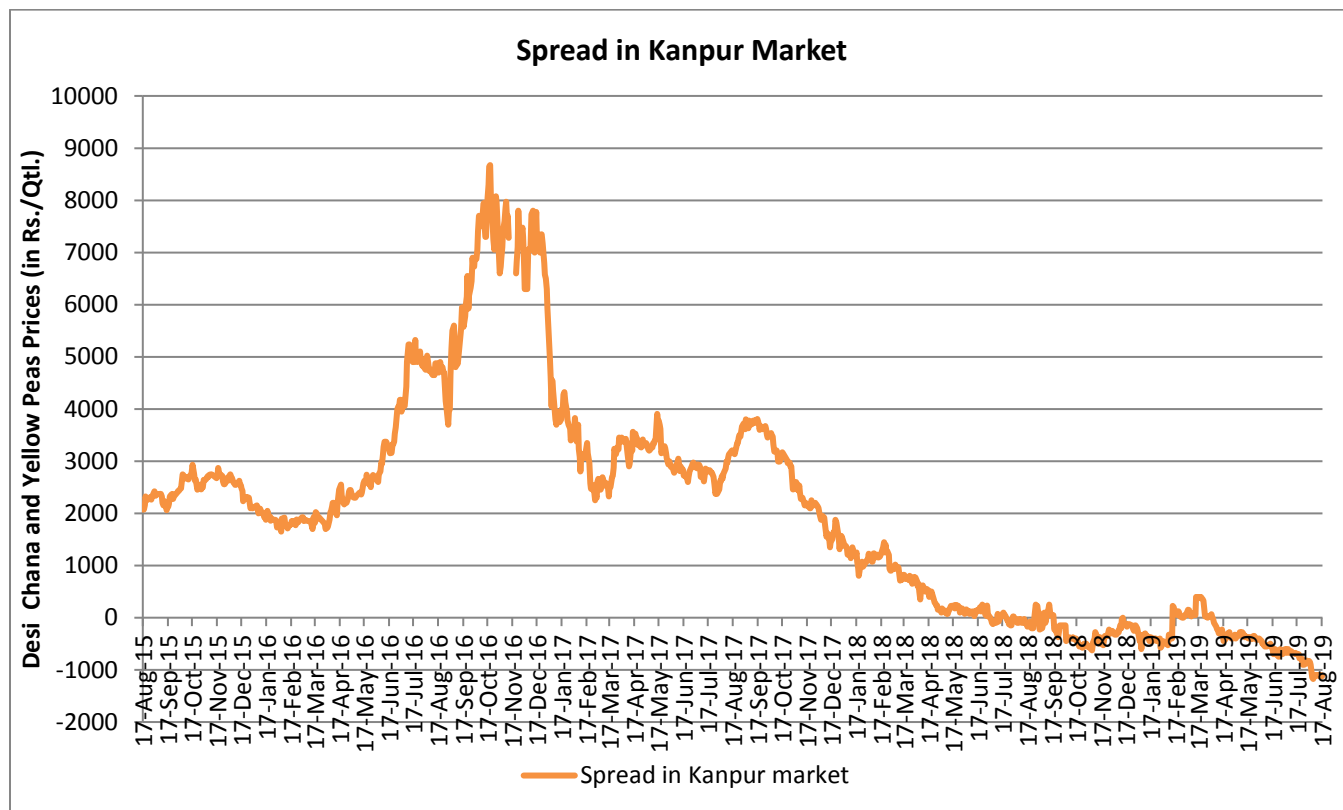

Current Market Dynamics & Outlook:

Pea market traded under firm on the back of lower stock at port. Kanpur market traded up from 5325 to 5625 per qtl due to increased holding by private trades. Overall, all India average price increased by 1.45% to Rs5825 per qtl in August. In Mumbai market, pea traded at Rs 5200, up from Rs 5025 last week. Slight pressure might be seen this week as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs850 to Rs 1050. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in coming weeks.

MarketOutlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

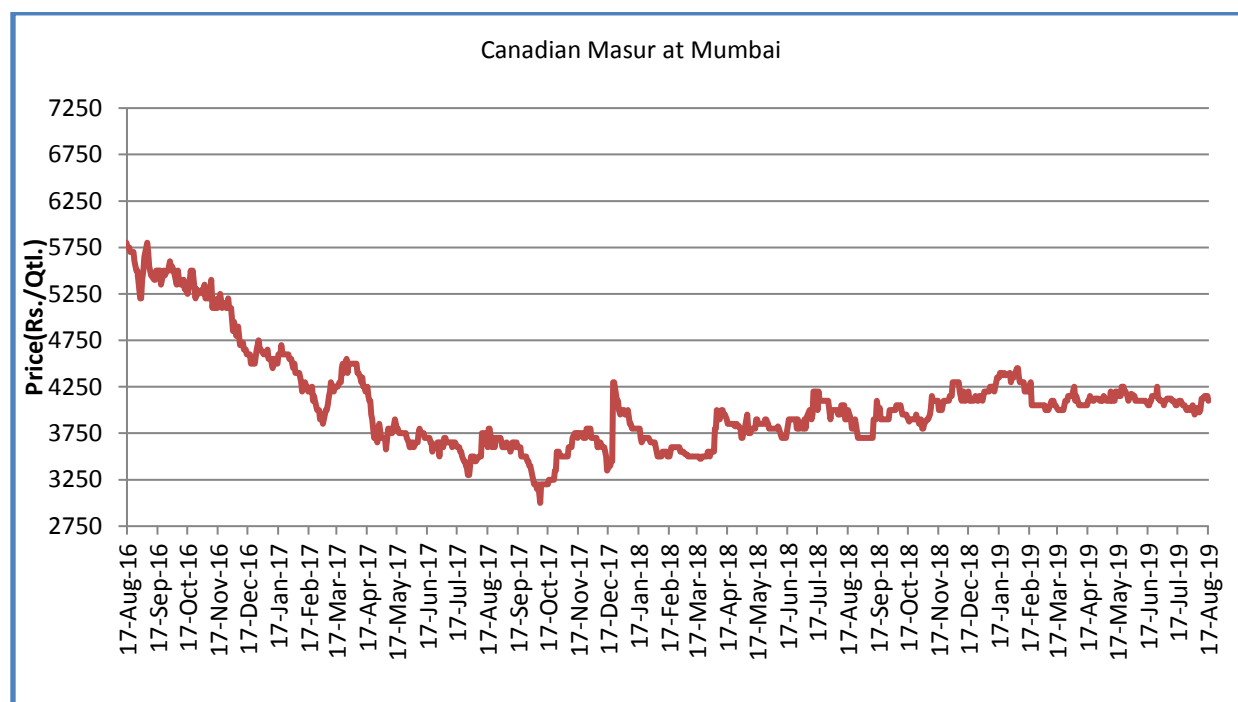

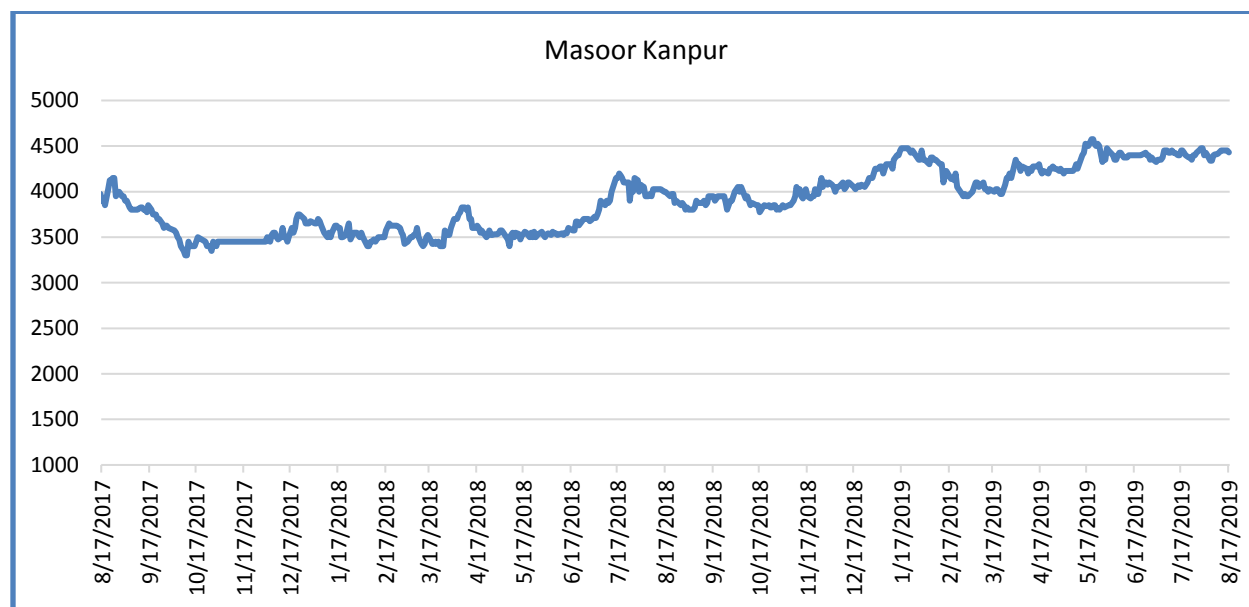

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed. It still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Range bound movement is expected in lentil market in August. Lentil vessel is being quoted at Rs 4100-4150 per quintal and container is being quoted at Rs 4175 per quintal. In Kanpur market it is being traded at Rs4400-4450 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4350-4550 in August.

Current Scenario:

In the 3rd week of August-2019, average price in key market like Kanpur was up by 0.27 % to Rs 4450 per qtl. Prices are likely to trade steady in Aug to a certain extent. Demand from neighboring

countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Demand is expected to improve in Aug end.

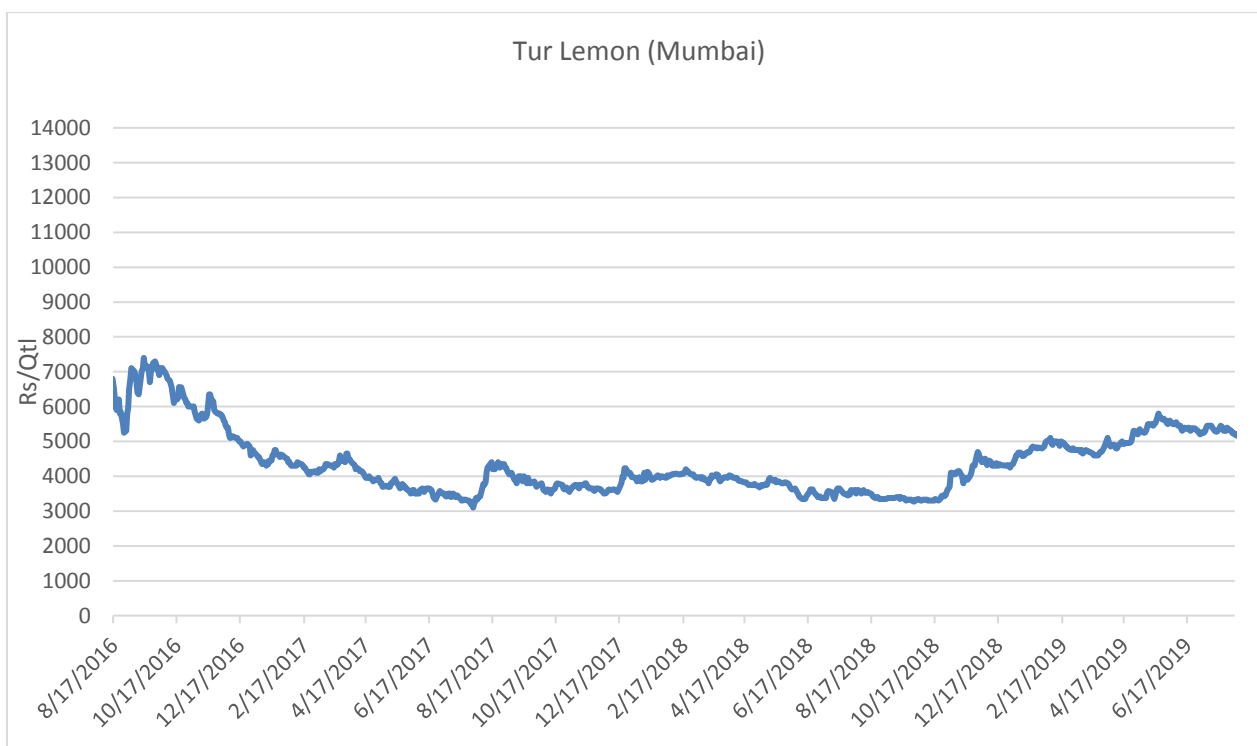

Market Outlook: Prices are likely to stay steady to slightly weak due to old and imported stock release by private trades. Nafed would interfere when prices move beyond MSP level. Import is likely to continue and it may limit one way trend.

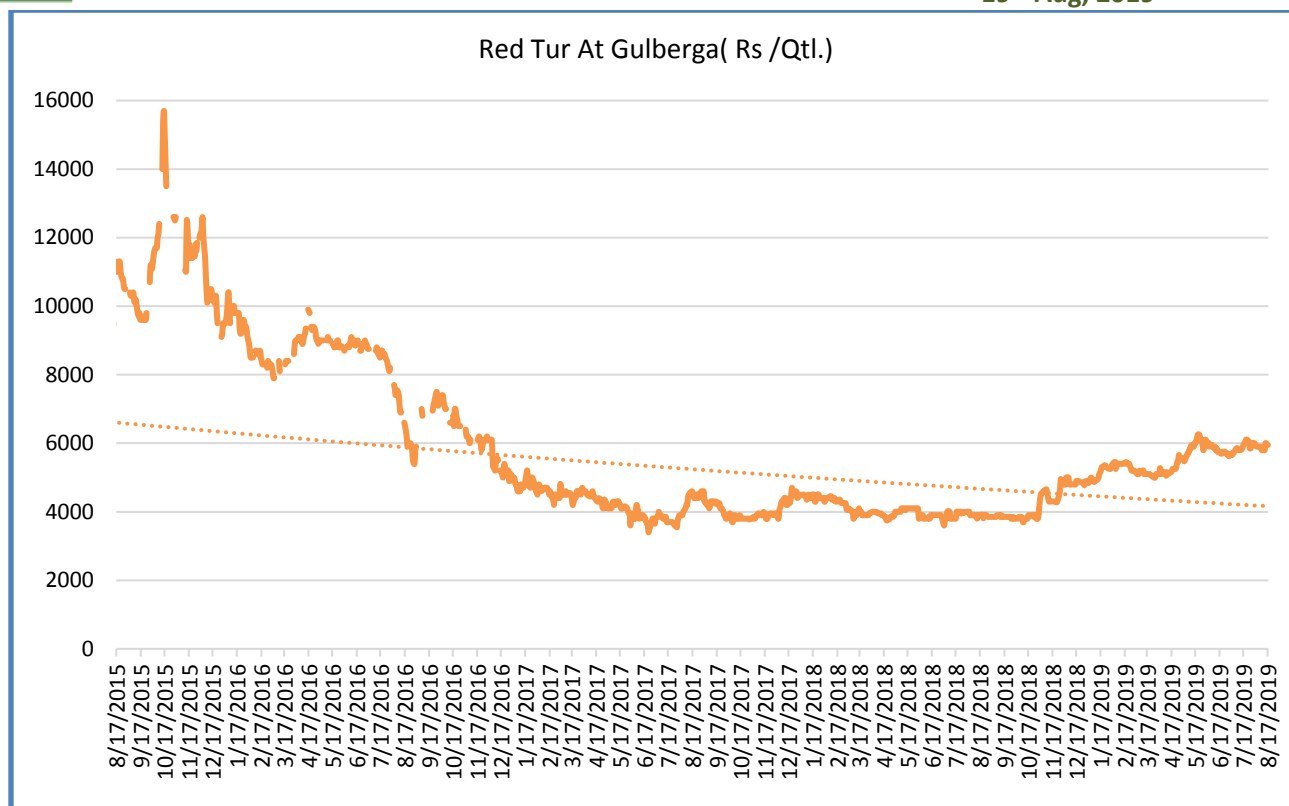

Pigeon Pea (Tur/Toor): Market Recap:

At planting front Indian farmers have covered 40.17 lakh ha as on 16th Aug-2019. It is up by 0.08% from last year. Normal area till date is 40.40 lakh ha and normal of the whole season is 43.00 lakh ha. Area in major growing state like Karnataka, Uttar Pradesh & Jharkhand is up by 12.42, 1.15 and 10.42 % so far. Even A.P. area increased by 17.02 % to 1.65 lakh ha so far. However, area in Maharashtra & M.P. is running behind by 0.58 and 14.06%. With good rainfall overall area is expected to cross normal level of 43 lakh ha this year too. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stake holders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Improvement in acreage, good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.80 lakh MT through govt.'s channel. So any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$720-25 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 7.5 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5850-5950 per qtl and it may continue to trade at same level until and unless heavy rains in growing regions wash out the standing crop.

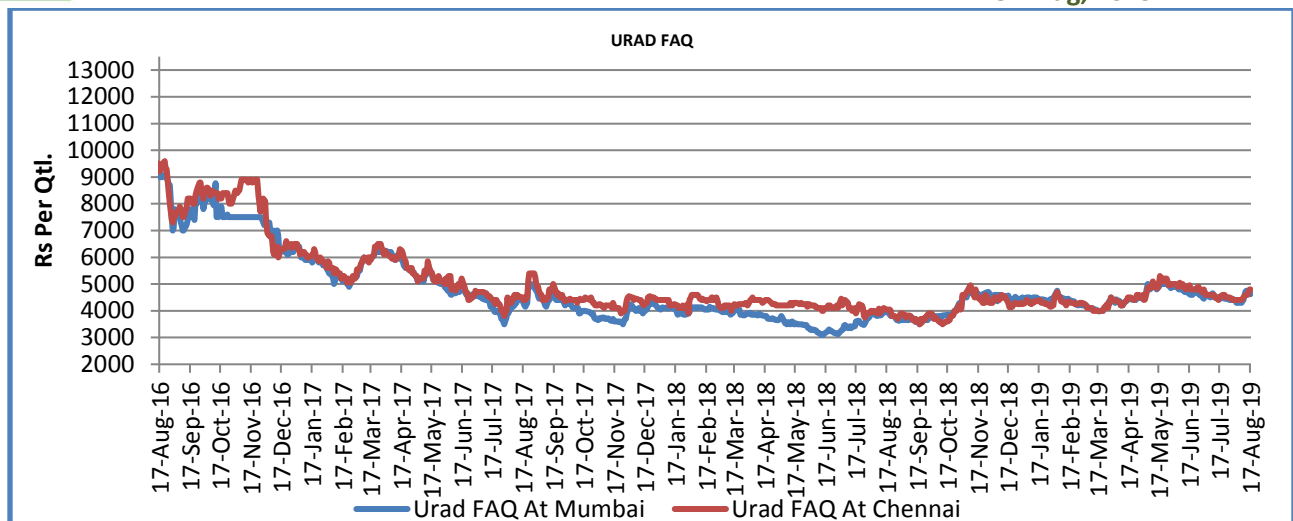

Market Outlook: Tur market may trade steady to slightly weak with increasing flow of import and central pool amid weak demand so far.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 33.80 lakh ha so far against 36.04 lakh ha last year till date. It is lower by 6.21 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 2.64 % to 15.10 lakh ha against season's normal of 10.67 lakh ha. However, situation in UP has improved now and farmers have covered 5.64 % higher area to 6.51 lakh ha so far. Area is down in Rajasthan by 3.16% to 4.57 lakh ha against 4.72 lakh ha last year as on 16th Aug-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.07 lakh ha so far. Even in Telangana farmers have covered 0.23 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

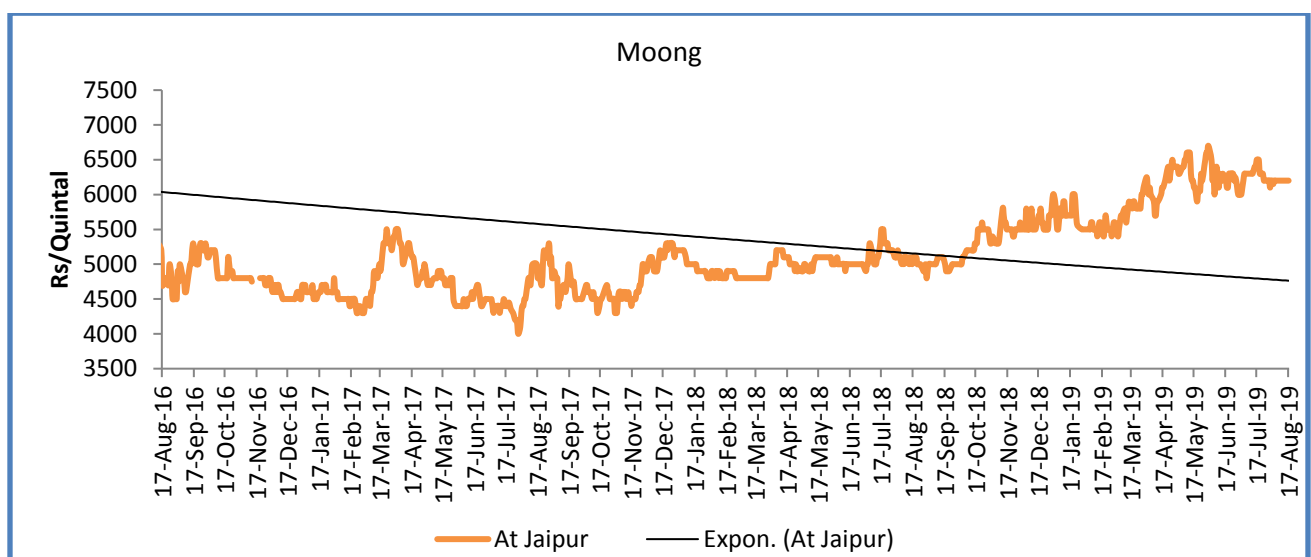

Heavy rains & flooding in some major growing belts of Rajasthan, Maharashtra & MP have started affecting standing crop of urad. However, crop in upper land in MP and UP is in good to excellent condition. So overall impact of loss is not as much as is expected right now. Overall area is running behind by 6.21% from last year to 33.80 lakh ha so far. So, current loss with lower area would not allow market to trade lower. If rains continues in growing region urad price may move up by Rs200 - 300 from current level. As sowing is delayed by 20 days, new crop would be available one month late i.e in November. It may keep market well supported at current level. In Mumbai market urad is being traded at Rs 4500-4525 while in Chennai market it is being traded at Rs 4650-4700. It may move further up by Rs 200. Even stockiest started restricting sales.

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week
Green Gram (Moong):

Market Recap:

All India kharif area coverage under moong is running behind by 10.04 % to 29.09 lakh ha as on 16th Aug--2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 18.05 lakh ha against 18.73 lakh ha last year and normal of 13.27 lakh ha. It is running behind by 38.06 % to 2.53 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 3.19 lakh ha has been covered against the normal of 4 lakh ha. AP has covered only 0.4 thousand ha against normal of 0.09 ha. In Telangana farmers have covered only 0.60 lakh ha against normal of 1 lakh ha for the whole season and 0.71 lakh ha last year. Rains in Karnataka and Maharashtra have affected quality of moong crop in both states. Some damage has been reported in lower land too. In other region crop condition is good to excellent. However, sowing got delayed by 15 to 20 days, arrival from other states too would be delayed and it would support moong price at current level. In Jaipur mandi moong is being traded at Rs 6200. With opening of weather, arrival is expected to increase in Karnataka and Rajasthan. So moong price may trade steady.

Market Outlook: Moong prices are likely to trade range bound in the near term.

Import- Export & Average Monthly CiF:

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in Aug.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4300 to 4500 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4250 with the first target of 4400 and second target 4500 with stop loss at 4200 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4150	4200	4350	4550	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week despite weak chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast. So pea may move further up but not before a downward correction.

Technical Analysis:

Candle stick chart denotes firm movement in the market.

RSI is moving up in neutral region.

Expected price band for pea is 5100-5350 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 5100 with the first target of 5300 and second target 5350 with stop loss at 5050 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4900	5000	5200	5350	5450

Masoor:
Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

Technical analysis:

Chart depicts steady to firm movement in the market.

RSI oscillator is moving up in neutral region.

Expected price range is 4300-4550

Strategy: Buy on dip:

Trade Recommendations: Buy around 4400 with the first target of 4500 and second target 4550 with stop loss at 4350 level.
