Commodity-wise Domestic, International Prices and Arrivals at Different Centers

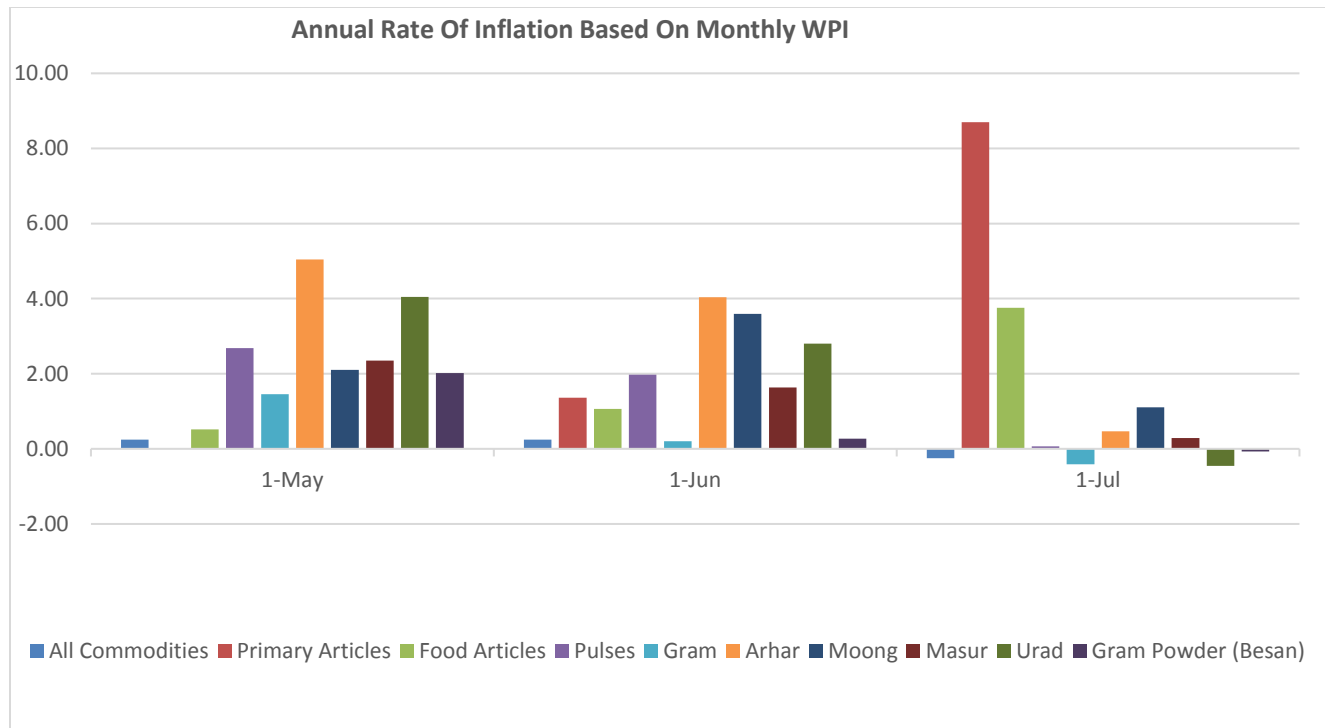

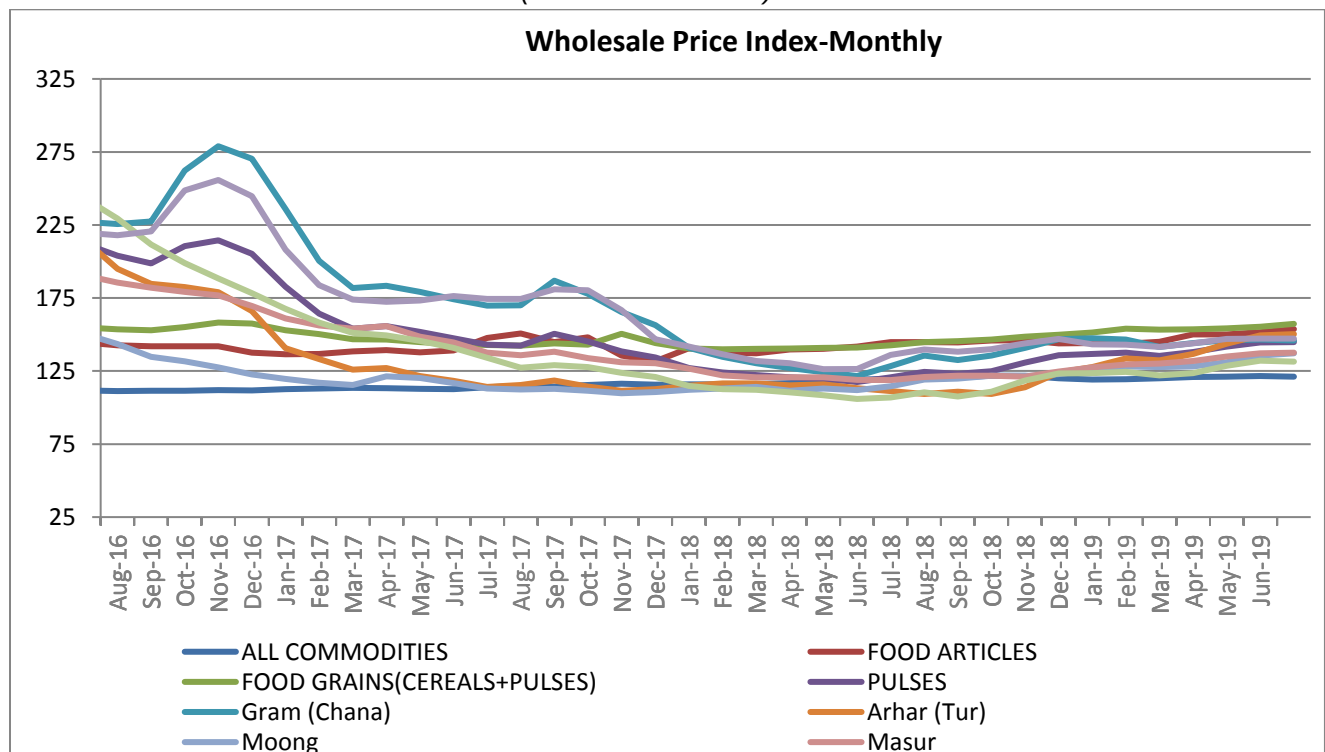

Highlights-Domestic Market:

- **Indian farmers have covered 124.56 lakh ha area under pulses as on 23rd, Aug-2019 against 128.53 lakh ha last year till date.** It is 3.09 % lower than last year. Normal area under kharif pulses is 119.89 lakh ha. Farmers have covered 43.43 lakh ha under tur, 35.10 lakh ha under urad bean, 29.86 lakh ha under moong, 0.23 lakh ha under kulthi and 15.95 lakh ha under other pulses. It is 0.39 % up for tur, 6.23% down for urad, 8.54 % down for moong, 44.09 % for kulthi and 7.85 % up for other pulses from last year.
- **Despite reports of crop loss tur cash market could not sustain its firm momentum and** traded almost range bound during week under review. Private trades resorted to release old stock and eased supply into the market. Nafed and other agencies have still enough stock to take care of any supply shortage before new crop hits the market. Public procurement agencies still have around 7.5 to 8 lakh MT stock, while 2 lakh MT import is expected by the end of Oct. Against this total availability for next four months is over 12 lakh MT. It is considered enough to handle the four months domestic demand. So, steady to slightly weak tone may prevail in the tur cash market in coming weeks. In Gulberga market tur is being traded at Rs 5850-5875. It may move up to Rs 5800-6000 if heavy rains occur again and affect standing crop.
- **Recent report of urad crop loss in parts of Rajasthan, Maharashtra & MP has helped market** to recover last week by Rs 200- 300. It may continue to trade steady in coming weeks as private trades have resorted to release stock. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level. In Mumbai market urad is being traded at Rs 4625-4650 while in Chennai market is being traded at Rs 5000-5050. It may move up to Rs 5200-5300. At this level, Stockiest may prefer to release old stock. New Urad from Gujarat and Maharashtra would hit market from mid Sep. Urad from Chandausi line is expected in Nov. There is good sowing in Guna & Ashoka Nagar. Besides, crop is in excellent condition in Lalitpur, Tikamgarh line. So any spike in urad is unlikely at this point of time in normal condition.
- **Despite some loss of kharif moong crop due to flooding and heavy rains arrivals in** Karnataka mandis started improving and pressure on price was seen building up. Buyers restricted buying and resorted to sale their old stock too. Procurement is yet to start. So, pressure is on moong cash market. Demand is weak in retail market. After Karnataka, moong from Mah, Gujarat and Rajasthan would hit market in Sep /Oct. So there would be ample supply in coming two months. It would restrict market to move up. As demand is weak, govt.'s procurement may lend some support to cash moong market. Right now pressure may continue and moong may dip Rs 100-200 from current level. Selling by Nafed from Ravi season crop too is on.
- **Weak demand, higher volume of import continued to affect lentils price sentiments despite** lower arrival in major mandis. Lentils (containers) at Mumbai port was quoted at Rs 4150-4250. However, demand at lower levels is expected in coming weeks. Farmers have sold out maximum crop now. As stockiest too are selling, pressure continues. In Indore market lentils are being traded at Rs 4100-4150. Stockiests are aware that Nafed has around 2 lakh MT stock while import is on, so any spike is unlikely. If demand improves, prices may move up by Rs 200 -300 in the medium term. In Kanpur market masur moti is being traded at Rs 4400-4425. Now marketing is awaiting for demand.
- **Punters active selling in futures and rumours of stern action by consumer affairs ministry** regarding stock pressurised chana market and it lost 200 in last two-three days. Millers are not buying as they think price would dip further by Rs 50-100. However, at this level demand is expected. Even buyers were not buying imported chana and importers have to offer chana at Rs 50 discount. It is being offered at Rs 4100 at Mundra, Mumbai port. Private trade resorted to sell chana in expectation of further decrease in price. In Jaipur mandi chana was traded at Rs 4300. It came down to 4000-4050 in Jodhpur market. In Indore mandi prices decreased to Rs 4200. In other states, prices remained under pressure. Inner tone has weakened now so, more decline in chana is expected. If Nafed decides to stop selling till Sep, market may recover.

- Lower volume of import, decreasing stock at port despite weak chana price pea traded up during the week under review. firmness in pea cash market is likely to continue. Pea in Mumbai market is being traded at Rs 5300, up by Rs 100. It may move up by Rs 100 more from current level.

International Market:

- **At Chickpea front, production in Canada is expected to decline from 3.11 to 2.60 lakh MT in 2019-20.** However, total supply is expected to increase slightly, from 3.37 to 4.28 lakh MT, due to weak demand in global market. Carryout is likely to increase from 1.70 to 2.20 lakh MT in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT in 2019-20.
- **As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading** towards maturity stage, despite some planting going on in certain regions. Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate, area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **Lentil Production in Canada is expected to increase slightly from 2092 (2018-19) thousand MT to 2200 thousand MT in 2019-20.** However, total supply is expected to decline slightly from 2989 to 2895 thousand MT. Export is expected to remain at 18 lakh MT, similar to 2018-19 level. Carry out stock is expected to decline from 7 lakh MT to 5 lakh MT in 2019-20. Prices are expected to hover in the range of 4430 to 460 per MT. Yield would be same at 1 Tonne per ha, similar as last year.
- **Dry Pea area in Canada is expected to increase slightly from 1431 to 1715 thousand ha in 2019-20.** Thus production is expected to increase from 3581 to 4300 thousand tonne in 2019-20. Due to higher production estimate total supply is likely to increase from 4246 to 4515 thousand tonne in 2019-20. Export is expected to increase from 26 lakh MT to 31 lakh MT in 2019-20. However, carryout would decline from 7.45 to 5 lakh MT this year. Price range is expected to hover in the range of \$255 to 285 per MT in 2019-20.
- **Chickpea area in Australia is expected to increase 22.11% from 303 (2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher levels relative to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1point from 144.6 in June to 144.7 in July-2019

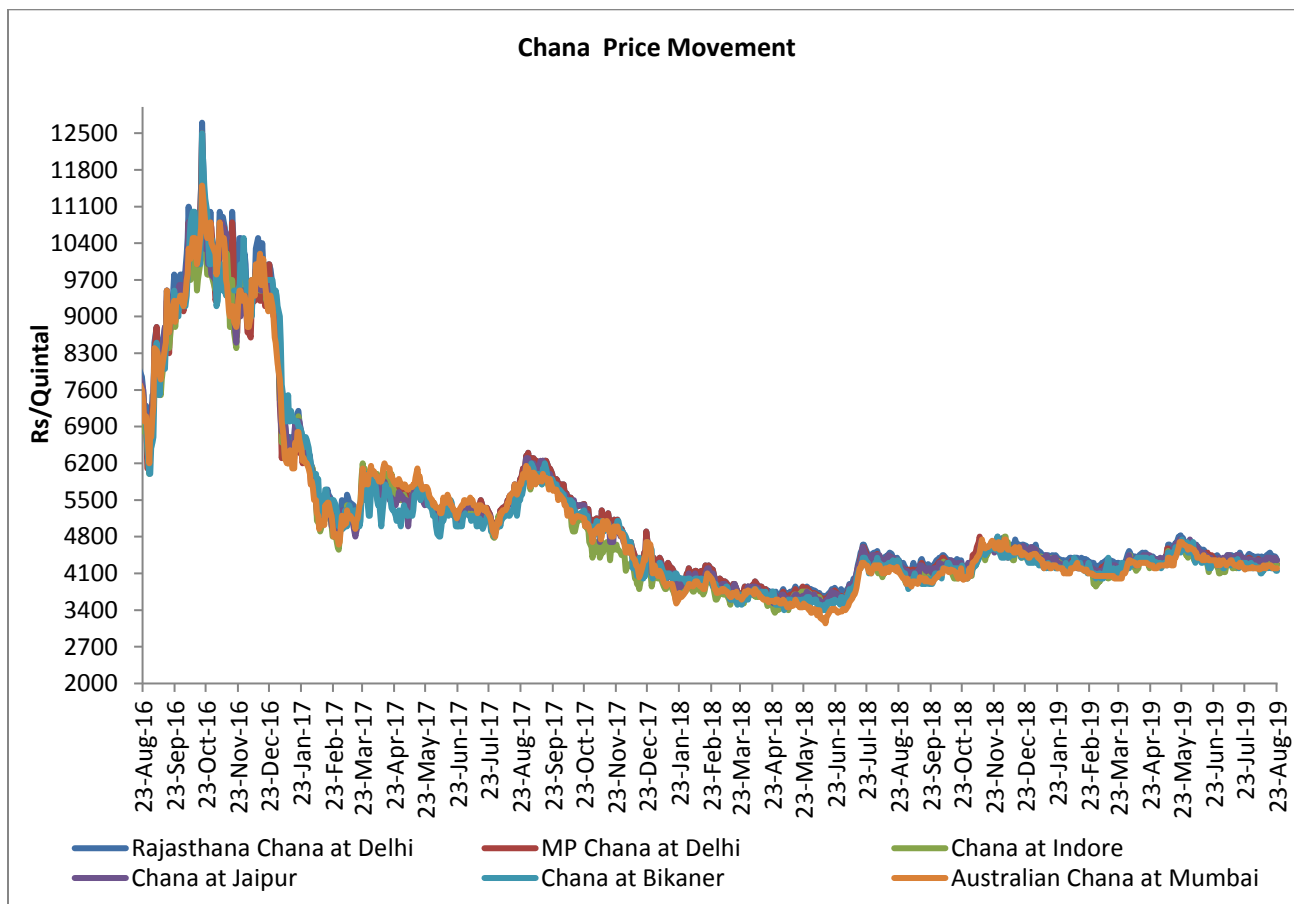

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana market traded under extreme pressure under fear of action against stockiest who holds at higher level to drag market up. Govt.'s close eye on pulses market movement and intention to sell chana stock in coming months amid weak futures pressurized chana market. Under these conditions punters resorted to sell chana in futures market. Meanwhile actual buyers preferred to wait and watch market movement. Arrival in market has decreased while demand at lower level is expected to improve due to festive season. Besides, weak demand, liquidity issue and Nafed stock remain restrictive to cash chana market. Stake holders should release stock at every improvement of Rs 100 from current level. In Delhi market, chana is being traded at Rs 4275-4300. Nafed has 12.79 lakh MT old and 7.57 lakh MT new chana stock. The higher quantity would not allow market to go up. Under prevailing condition chana may trade down by Rs 100 more from current level.

All India average price for Chana increased by 0.85 percent from Rs 4348 to 4311 per qtl. in 4th week of Aug-2019. Australian Chana (imported) price too decreased by 1.19 percent from Rs 4251 to Rs 4200 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

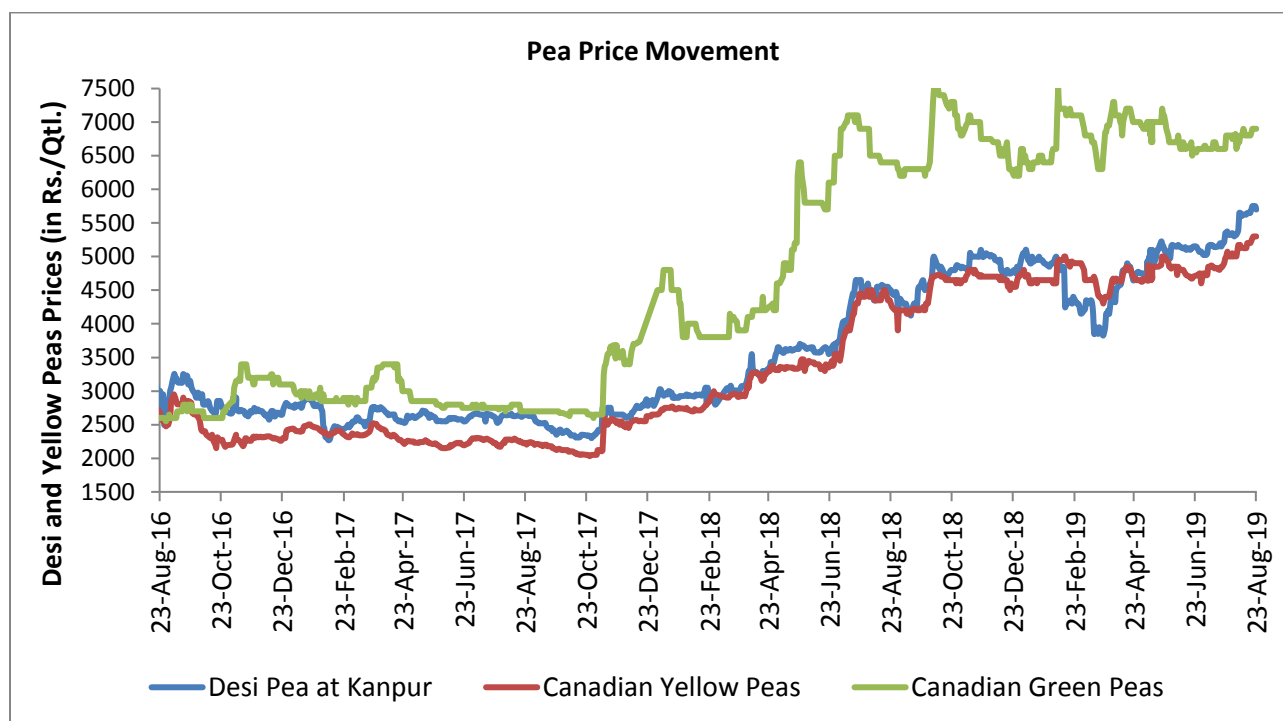

Market Outlook: Chana may trade steady to weak this week too.

Peas (Matar): Market Recap:

Pea market continued to trade firm its firm despite weak chana market. Slight increase might be seen due to improved demand from actual users and dwindling stock at ports. Stockiest too have retained their stock in anticipation of higher price. A downward correction is expected. However, overall tone remains firm. Some improvement was seen in desi pea market in Kanpur due to lower stock in domestic market, restricted import and declining availability. However, any spike is unlikely as buyers would restrain buying at higher level. Import remains restricted for consumption grade pea at 1.5 lakh MT. It may be increased to 2lakh MT in coming months. In a new development, govt. has allowed pea import for seed purpose.

Pea in Mumbai market is being traded at Rs. 5300-5325, while in Kanpur market it is being traded at Rs 5650 per qtl. As chana price has started decreasing, pea too might trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm after slight correction. Stake holders should buy, on downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from Aug end. If chana continues to trade weak, pressure would continue, on pea price too. Steady to slightly firm trend may prevail in Sept too.

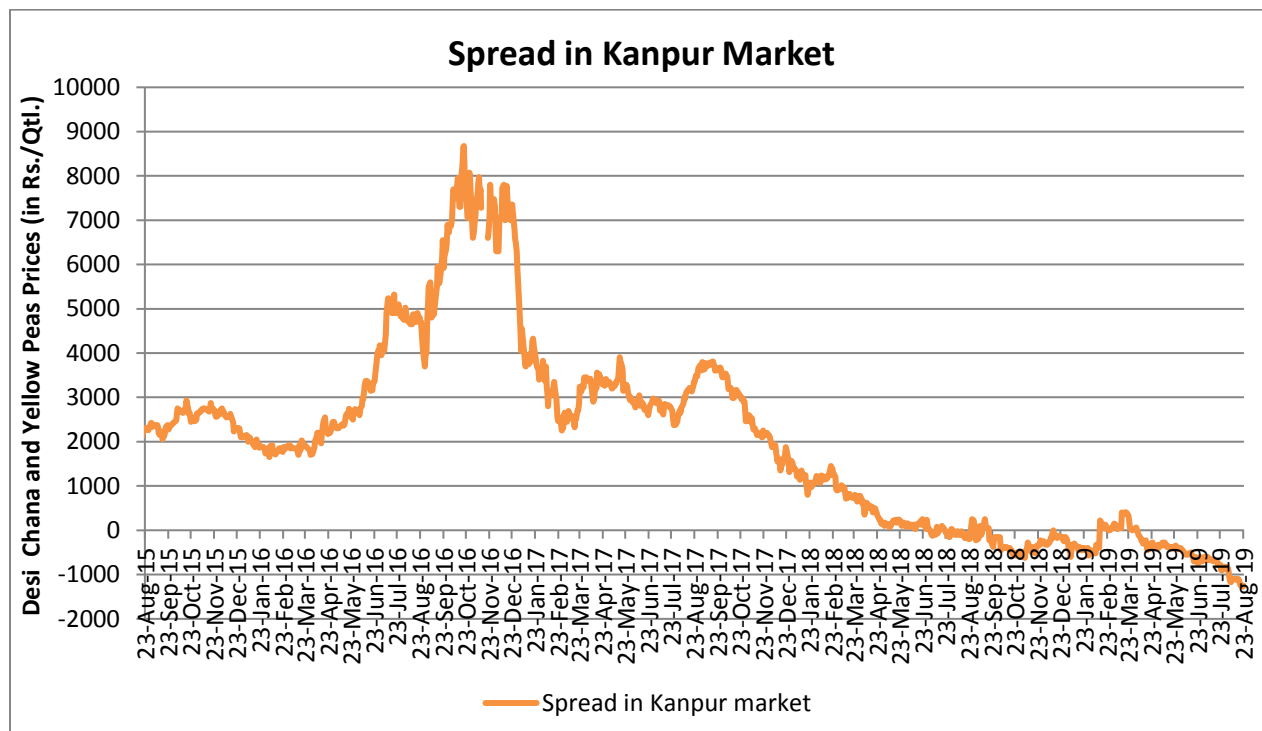

Current Market Dynamics & Outlook:

Pea market traded firm on the back of lower stock at port. Kanpur market traded up from 5625-5650 per qtl due to increased holding by private trades. Overall, all India average price increased by 1.83% to Rs 5978per qtl in August. In Mumbai market, pea traded at Rs 5300, up from Rs 5225 last week. Slight pressure might be seen this week as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs1050 to Rs 1250. Spread is expected to remain in the negative zone in August too on relative movement in Chana prices. Overall outlook seems steady to slightly firm in coming weeks.

Market Outlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

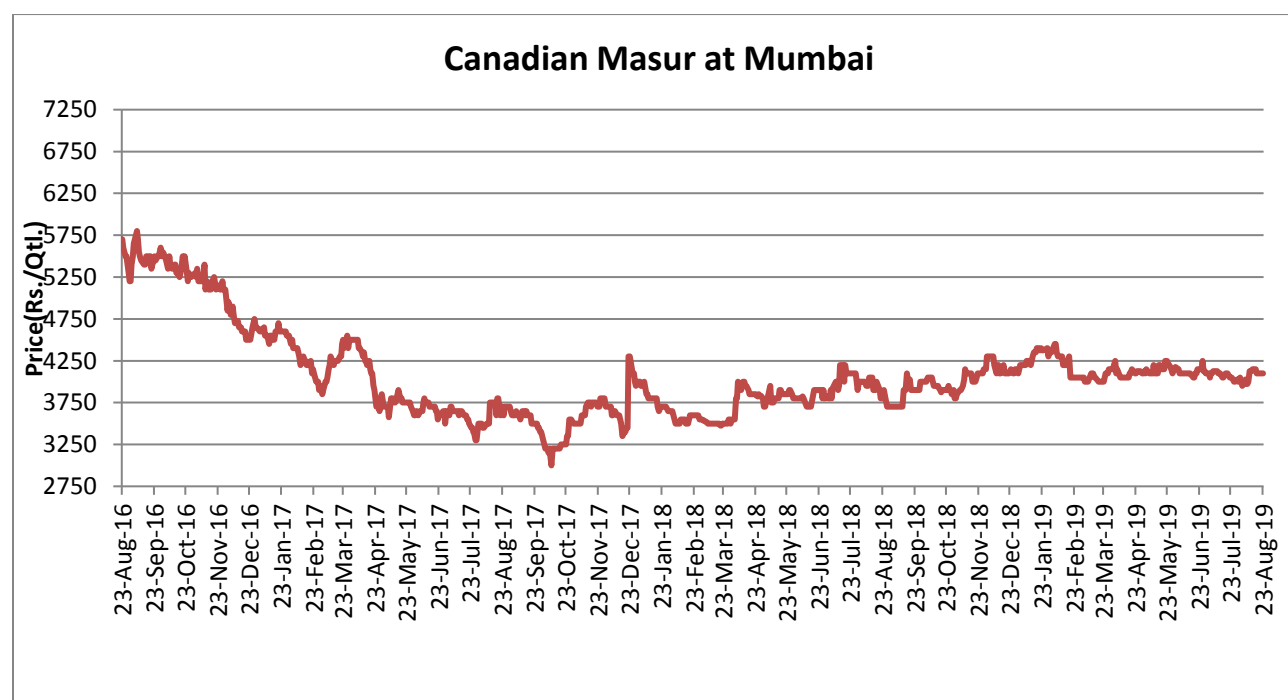

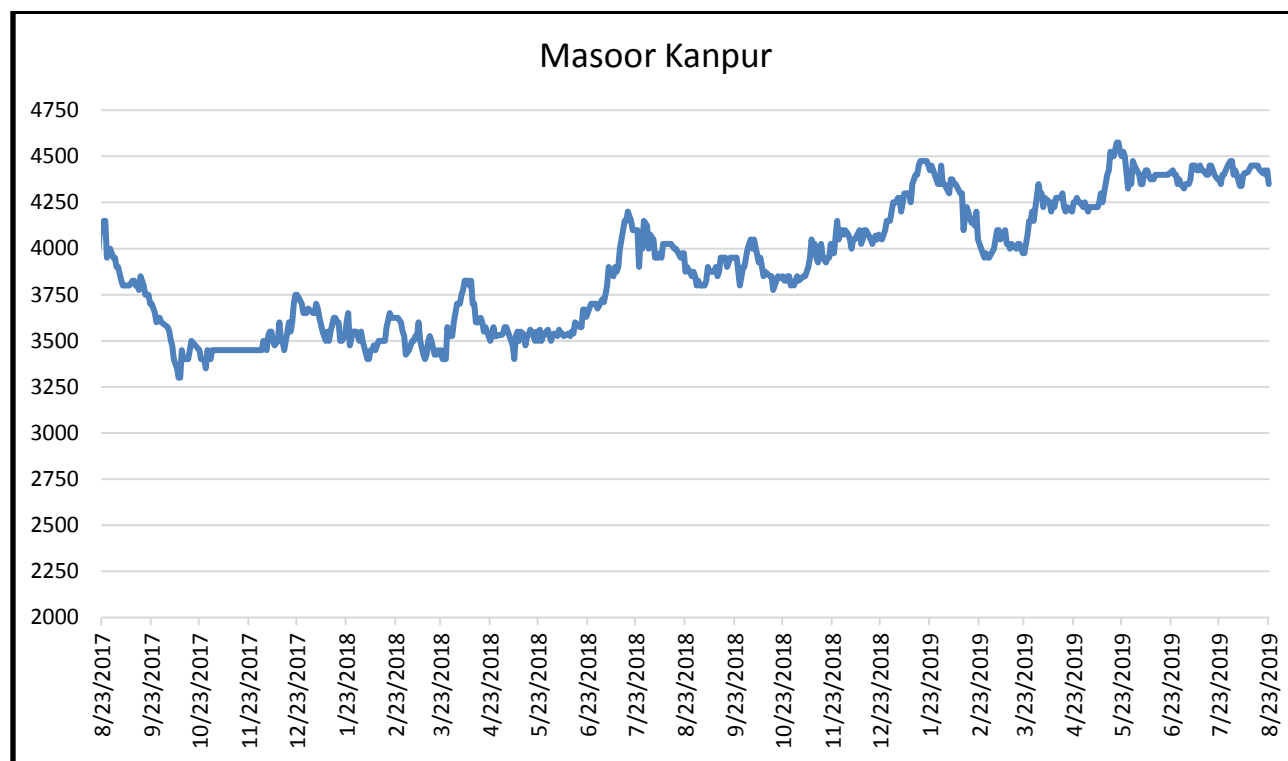

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand, continuous import at cheaper price and ample stock with Nafed. Nafed still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Steady to weak movement is expected in lentil market in this week too. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4100-4150 per quintal. In Kanpur market it is being traded at Rs4350-4400 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Festive demand may lend some support to cash market. However, any spike is unlikely at this point of time.

Current Scenario:

In the 4th week of August-2019, average price in key market like Kanpur was down by 1.21 % to Rs 4402 per qtl. Prices are likely to trade steady to slightly weak in Aug.. Demand from neighboring

countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Demand is expected to improve from mid sep..

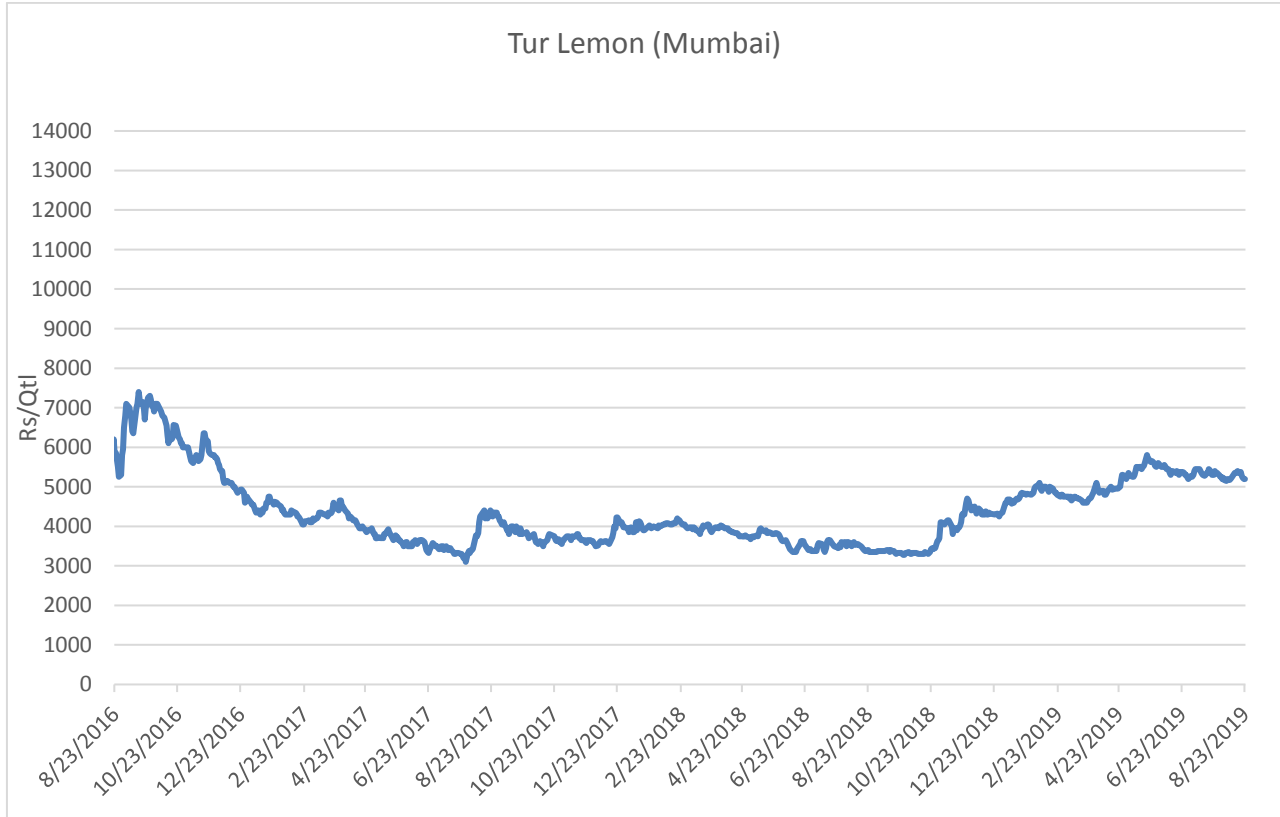

Market Outlook: Prices are likely to stay steady to slightly weak due to old and imported stock release by private trades. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

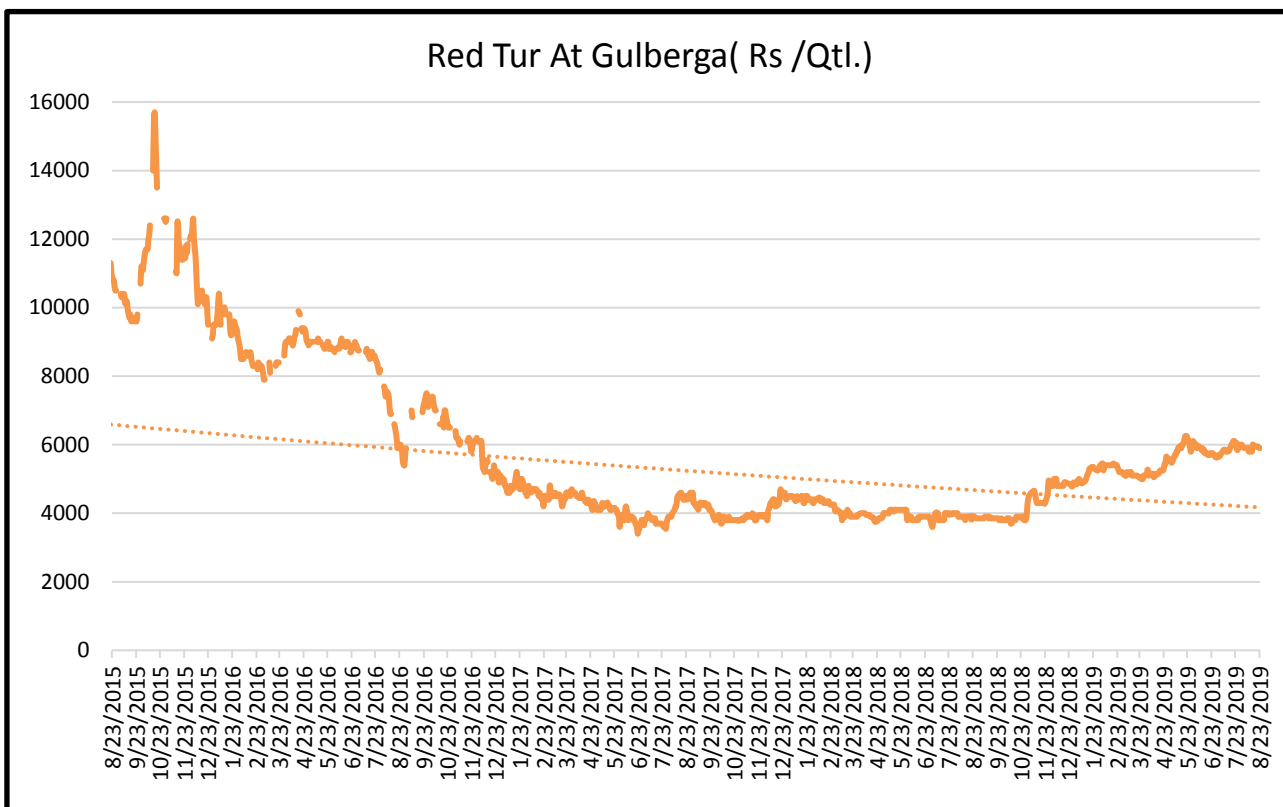

Pigeon Pea (Tur/Toor):
Market Recap:

At planting front Indian farmers have covered 43.43 lakh ha as on 23rd Aug-2019. It is up by 0.39% from last year. Normal area till date is 41.35 lakh ha and normal of the whole season is 43.00 lakh ha. Area in major growing state like Karnataka, Uttar Pradesh & Jharkhand is up by 12.60, 0.63 and 3.90 % so far. Even A.P. area increased by 24.52 % to 1.93 lakh ha so far. However, area in Maharashtra & M.P. is running behind by 0.84 and 13.70%. With good rainfall overall area is expected to cross normal level of 43 lakh ha this year too. With good rainfall overall area is expected to cross normal level of 43 lakh ha this year too. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Improvement in acreage, good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.80 lakh MT through govt.'s channel. So any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$715 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 7.5 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5850-5900 per qtl and it may continue to trade at same level unless heavy rains in growing regions wash out the standing crop.

Market Outlook: Tur market may trade steady to slightly weak with increasing flow of import and central pool amid weak demand so far.

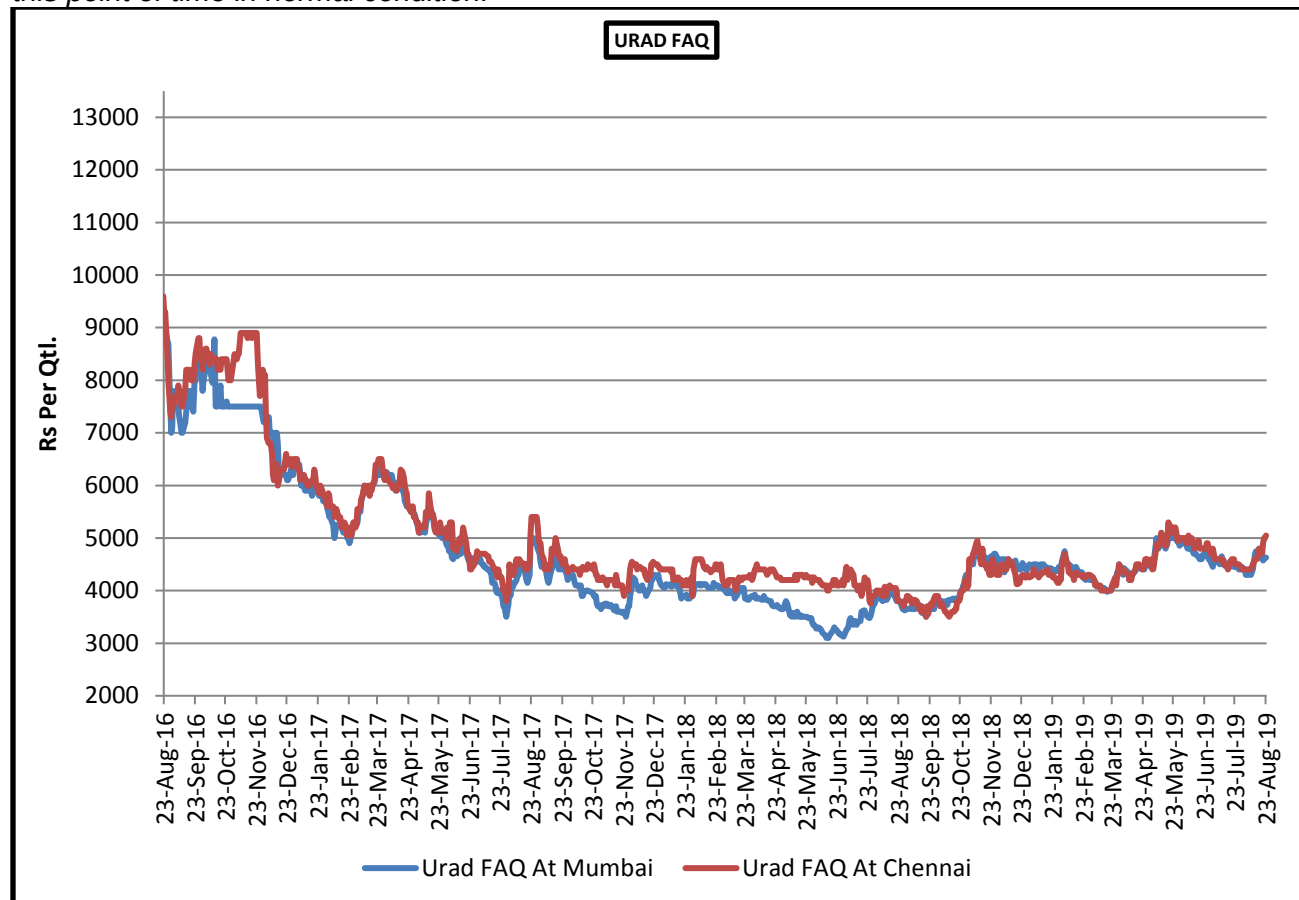

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat. Indian farmers have covered 35.10 lakh ha so far against 37.43 lakh ha last year till date. It is lower by 6.23 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running behind by 1.35 % to 15.30 lakh ha against season's normal of 10.67 lakh ha. However, situation in UP has improved now and farmers have covered 0.11 % higher area to 6.89 lakh ha so far. Area is down in Rajasthan by 3.24% to 4.57 lakh ha against 4.72 lakh ha last year as on 23rd Aug-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.07 lakh ha so far. Even in Telangana farmers have covered 0.23 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Recent report of crop loss in parts of Rajasthan, Maharashtra & MP has helped market to recover last week by Rs 200- 300 .It may continue to trade steady in coming weeks as private trades have resorted to release stock. Besides,Nafed has started auction in MP,Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level.In Mumbai market urad is being traded at Rs 4625-4650 while in Chennai market is is being traded at Rs 5000-5050.It may move up to Rs 5200-5300. At this level, Stockiest

may prefer to release old stock. New Urad from Gujarat and Maharashtra would hit market from mid Sep. Urad from Chandausi line is expected in Nov. There is good sowing in Guna & Ashoka Nagar. Besides, crop is in excellent condition in Lalitpur, Tikamgarh line. So any spike in urad is unlikely at this point of time in normal condition.

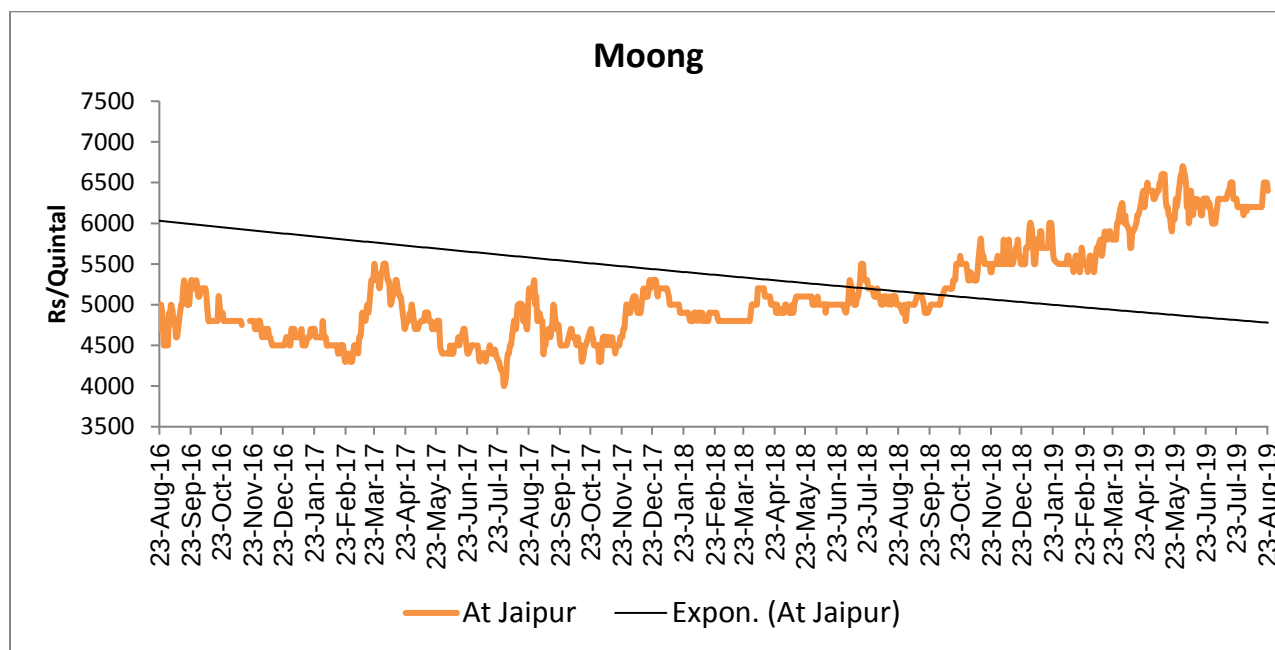

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):

Market Recap:

All India kharif area coverage under moong is running behind by 8.54 % to 29.86 lakh ha as on 23rd Aug--2019 against the normal of 27.50 lakh ha so far. Major kharif moong producing states are Rajasthan, Karnataka, MP & Madhya Pradesh. In Rajasthan farmers have covered 18.26 lakh ha against 18.75 lakh ha last year and normal of 13.27 lakh ha. It is running behind by 35.03 % to 2.66 lakh ha in Karnataka. Normal area in Karnataka is 3.44 lakh ha. In Maharashtra only 3.22 lakh ha has been covered against the normal of 4 lakh ha. AP has covered only 0.4 thousand ha against normal of 0.09 ha. In Telangana farmers have covered only 0.62 lakh ha against normal of 1 lakh ha for the whole season and 0.71 lakh ha last year. Rains in Karnataka and Maharashtra have affected quality of moong crop in both states. Some damage has been reported in lower land too. In other region crop condition is good to excellent. However, sowing got delayed by 15 to 20 days, arrival from other states too would be delayed and it would support moong price at current level. In Jaipur mandi, moong is being traded at Rs 6300 after touching the high of Rs 6500. With opening of

weather, arrival is expected to increase in Karnataka and Rajasthan. So moong price may trade steady to slightly weak

Market Outlook: Moong prices are likely to trade range bound in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in Aug.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4200 to 4400 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4200 with the first target of 4300 and second target 4400 with stop loss at 4150 level.

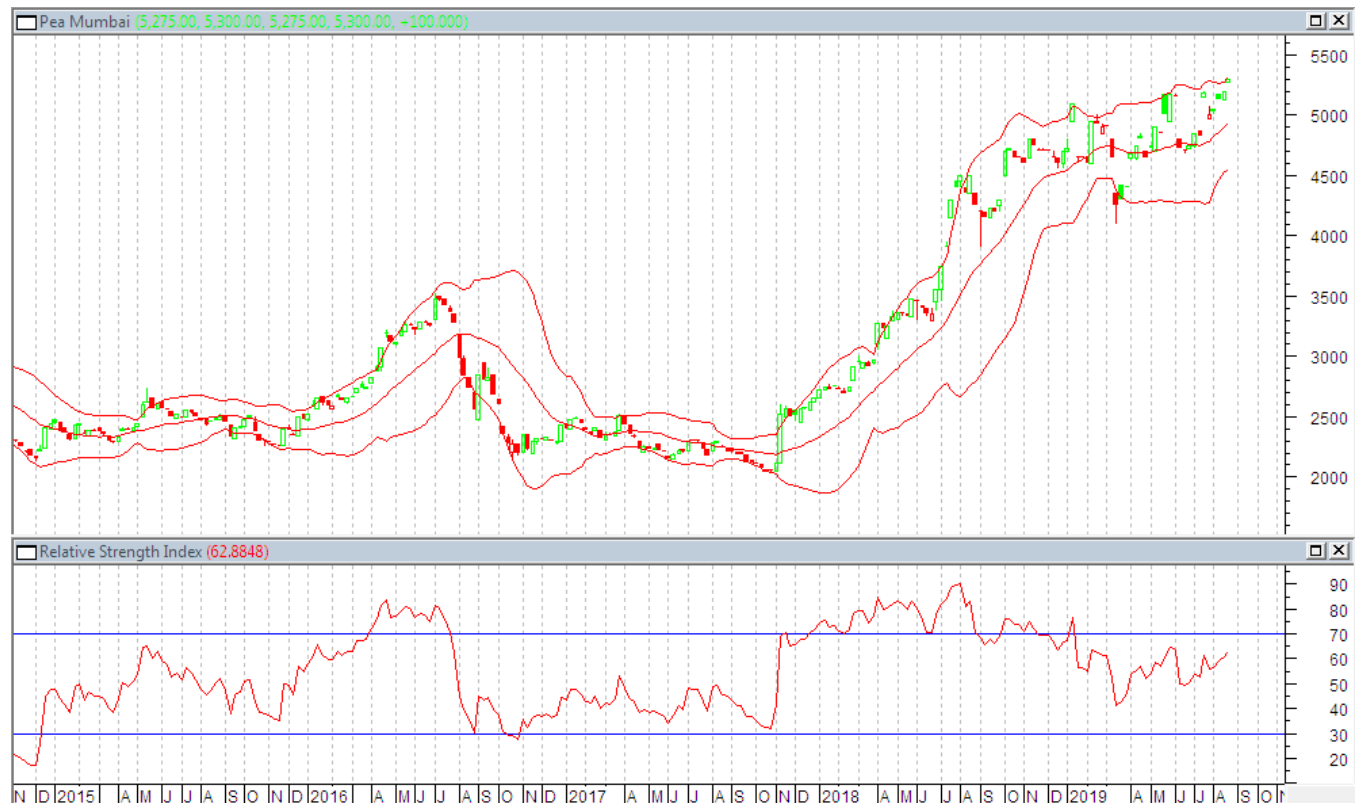

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4050	4150	4275	4450	4550

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice firm movement in this week despite weak chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction.

Technical Analysis:

Candle stick chart denotes firm movement in the market.

RSI is moving up in neutral region.

Expected price band for pea is 5200-5450 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 5200 with the first target of 5350 and second target 5450 with stop loss at 5150 level.

Support & Resistance
