Commodity-wise Domestic, International Prices and Arrivals at Different Centers**Highlights-Domestic Market:**

- **Some reputed firms have alleged that prices of lentils in Indian market are ruling around 3800 to 4000 per qtl** while its price in supplying countries like Australia and Canada are hovering at lower levels. So import volume is continuously increasing in Indian market. Sensing dumping like condition some firms have requested either to increase import duty on lentil or impose quantity restriction as soon as possible. The matter pertaining to increase in duty pertains to department of revenue while action on curbing of import may be taken by DGFT. It would be interesting to see the next move by the concerned authority in this regard.
- **Increasing fear of urad crop loss in India due to rains and recent flooding. Gauging the crop** loss importers have started striking new deals for urad in Myanmar. Quotes in Myanmar too increased from \$525 to \$535 for FAQ and from \$660 to \$670-75 for SQ in last two days. Due to loss availability of urad in MP is likely to be lower. As per latest update this year urad production in Myanmar has been pegged at 3.5 lakh MT. Out of this around 2.25 lakh MT has been exported till Aug-2019. Myanmar is exporting 50 to 60 thousand MT urad per month. Under current situation urad price may move up further by 300-400 per qtl.
- **Tur crop condition in major growing belts are good to excellent so far despite some losses due to** flooding in MP, MH & Guj. Area coverage is comparatively 1% higher than last year, so recent loss by flooding is likely to be compensated by higher yield and area. The new crop is hardly two months away and there is plenty of stock in central pool and private hands. Besides, continuous import at cheaper price and higher supply side amid weak demand have pressurized cash market and it may move down further by Rs 100-150 from current level. Myanmar is offering tur at \$660-70 per MT. All these developments would not allow tur price to move beyond a certain level. Steady to slightly weak tone may prevail this week too. In Gulberga market tur is being traded at Rs 5500-5550. Demand remains weak. Season may end with 46 lakh ha area coverage, slightly higher than last year. Prices may recover if weather turns rough in major producing region.
- **New moong crop would start hitting the market from Oct and pressure might be felt on** moong price in coming weeks. Despite some losses of standing moong crop due to recent flooding in parts of major growing belts. However, Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by end Sep. Even moong crop in Akola and Khamgaon line is in very good condition. So, good arrival is expected in October –Nov. Analysing the emerging scenario traders and stockiest have started offloading old moong stock. Pressure on moong cash market is likely to continue till procurement starts in various states. In Jaipur market moong is being traded at Rs 6000 and it may move down to Rs 5800 at peak arrival season.
- **Despite some improvements seen in futures chana market is unlikely to sustain at higher** level. Demand from bulk users has improved taking clue from firm futures. Once Nafed starts selling chana in bulk volume it would come down again. Market is well aware of ample availability of chana in central pool as well as in private hands. If we keep aside reserve stock of 1278453 MT, still there is a availability of 1232136 MT with Nafed for sale. In Delhi market chana is being traded at Rs 4300-4350. If demand improves and Nafed decides not to sell stock, it may move to 4400-4500 maximum. Liquidity crunch too is restricting normal trade. So it is better to sell Chana at every hike of Rs 75-100. Overall sentiments remain weak this week for chana cash market.
- **Weak demand, higher volume of import continued to affect lentils price sentiments despite lower** arrival in major mandis. Lentils (containers) at Mumbai port was quoted at Rs 4150-4250. However, demand at lower level is expected in coming weeks. Farmers have sold out maximum crop now. As stockiest too are selling, pressure continues. In Indore market lentils are being traded at Rs 4100-4150. Stockiests are aware that Nafed has around 2 lakh MT stock while import is on, so any spike is unlikely. If demand improves, prices may move up by Rs 200-300 in the medium term. In Kanpur market masur moti is being traded at Rs 4400-4425. Now marketing is awaiting for demand.
- **Govt. may consider higher import quota for peas and moong, so that increasing prices can be** contained. Peas in Mumbai market is being traded at Rs 5220 and may move up to 5300-5400 if import volume remains restricted.

International Market:

- **At Chickpea front, production in Canada is expected to decline from 3.11 to 2.60 lakh MT in 2019-20.** However, total supply is expected to increase slightly, from 3.37 to 4.28 lakh MT, due to weak demand in global market. Carryout is likely to increase from 1.70 to 2.20 lakh MT in 2019-20. Price is expected to hover in the range of \$520 to 550 per MT in 2019-20.
- **As per the latest update by US dry peas & lentil council, most of the standing pulses crops are heading towards maturity stage, despite some planting going on in certain regions.** Crop condition is normal to good. As demand from India is weak, farmers have changed planting decision to some extent this year. Inventory of chickpeas and lentil has increased. As per USDA estimate, area under chickpeas and lentils have decreased by 31 & 35 % respectively. Montana lentil crops benefitted from good rains across the state. 52% of lentil plants are in bloom. The lentil crop rated 4% poor, 52% fair, 43% good and 1% excellent.
- **Lentil Production in Canada is expected to increase slightly from 2092(2018-19) thousand MT to 2200 thousand MT in 2019-20.** However, total supply is expected to decline slightly from 2989 to 2895 thousand MT. Export is expected to remain at 18 lakh MT, similar to 2018-19 level. Carry out stock is expected to decline from 7 lakh MT to 5 lakh MT in 2019-20. Prices are expected to hover in the range of 4430 to 460 per MT. Yield would be same at 1 Tonne per ha, similar as last year.
- **Dry Pea area in Canada is expected to increase slightly from 1431 to 1715 thousand ha in 2019-20.** Thus production is expected to increase from 3581 to 4300 thousand tonne in 2019-20. Due to higher production estimate total supply is likely to increase from 4246 to 4515 thousand tonne in 2019-20. Export is expected to increase from 26 lakh MT to 31 lakh MT in 2019-20. However, carryout would decline from 7.45 to 5 lakh MT this year. Price range is expected to hover in the range of \$255 to 285 per MT in 2019-20.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chick-peas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

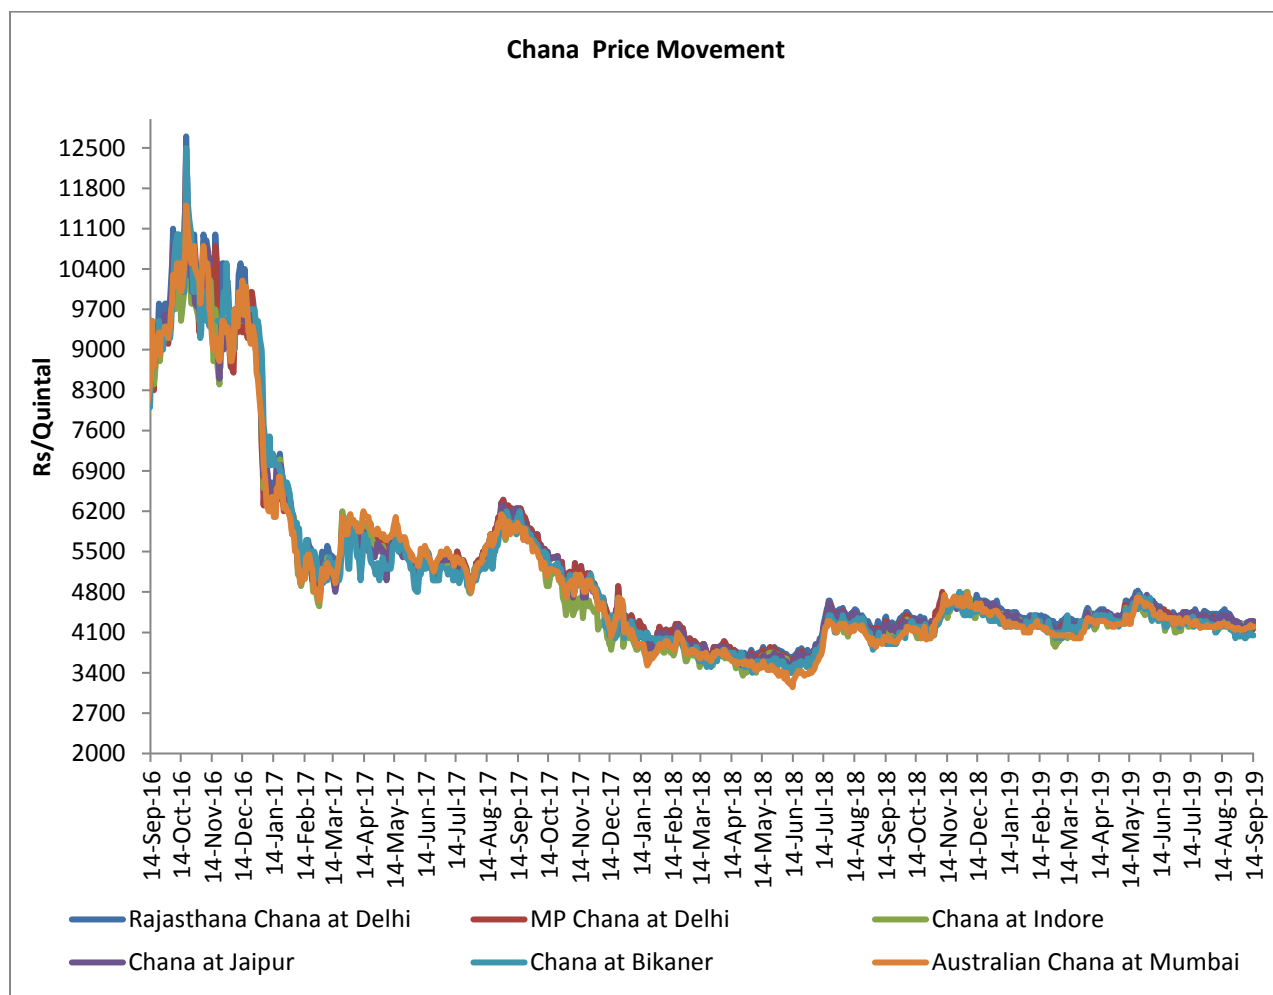

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 1point from 144.6 in June to 144.7 in July-2019

Pulses-Wise Scenario:
Chana
Current Scenario:

Despite recovery in chana futures market fundamental remains unsupportive as demand remains weak and ample stock available with govt's agencies as well as in private hands. Accepting bids at around Rs 4000-4050 by Nafed affected market sentiments at this point of time. So Nafed 'sselling strategy would be price impacting factors for chana market. Nafed has to sell over one MMT besides, reserve stock. So, it is very difficult to push price up in the cash market. In Delhi market chana is being traded at RS 4250-4300. It may move down to 4100-4200 again. Demand from retail market and mills remains subdued. If demand improves, slight recovery is expected. However, overall tone in cash pulses market remains weak. Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks. Chana may dip further by Rs 100 from current level. As fresh buying spree is expected, some support is expected by end Sep.

All India average price for Chana decreased by 1.44 percent from Rs 4260 to 4198 per qtl. in the 2nd week of Sep-2019. However, Australian Chana (imported) price increased by 1.66 percent from Rs 4156 to Rs 4225 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

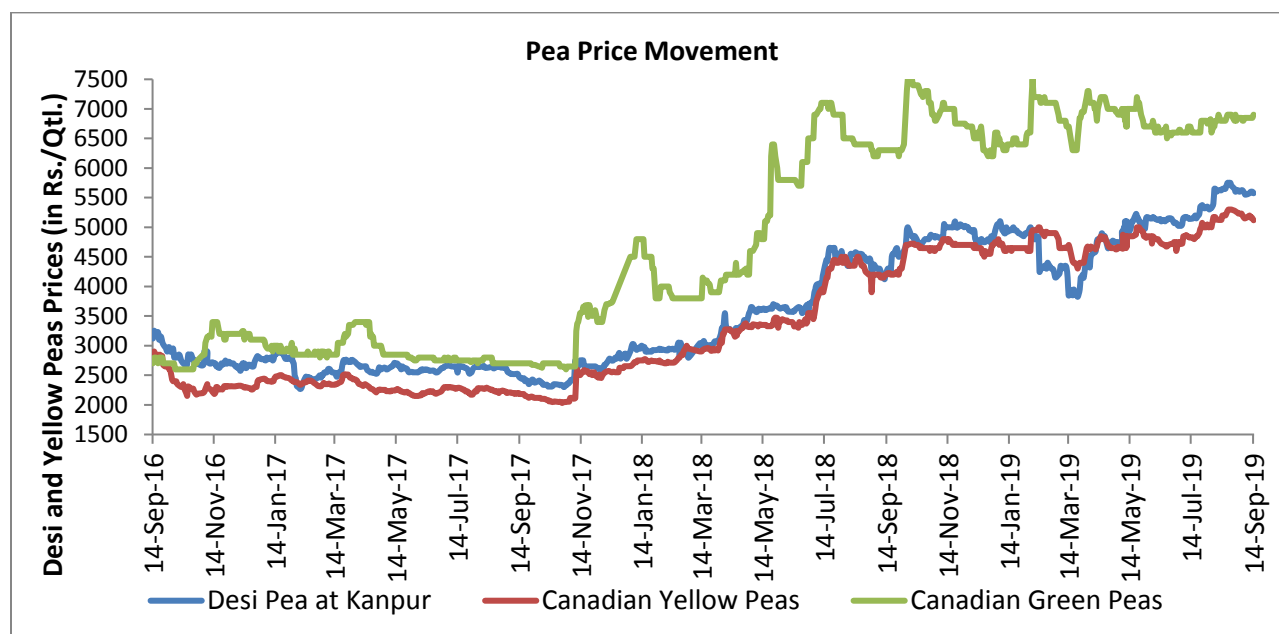

Market Outlook: Slight recovery might be seen in chana cash market this week.

Peas (Matar):
Market Recap:

Despite higher prevailing prices in domestic market the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses are ruling lower.. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Before this in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now food minister says that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue to move up, govt may consider to relax quota norm by October end.

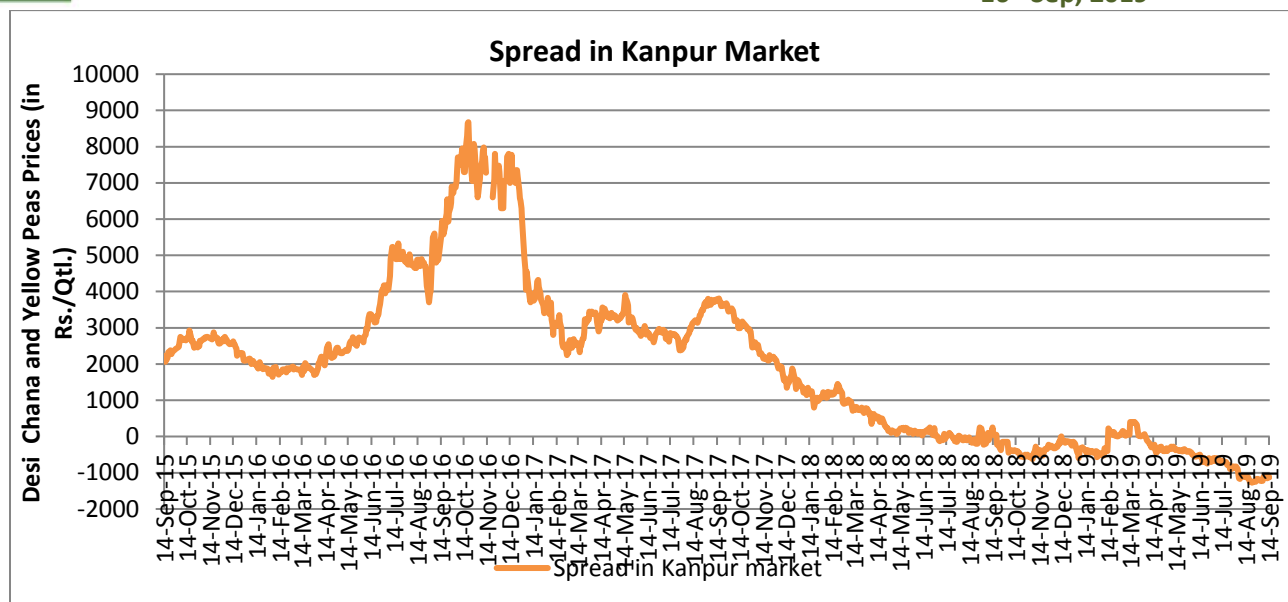

Pea in Mumbai market is being traded down at Rs. 5220-5225, while in Kanpur market it is being traded at Rs 5500 per qtl. As chana price has started decreasing, pea too might trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm after minor correction. Stake holders should buy, on downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Sep. If chana continues to trade weak, pressure would continue, on pea price too. Steady to slightly weak trend may prevail this week.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction. Kanpur market traded up from 5450-5550 per qtl due to restricted release by private trades. Overall, all India average price increased by 1% to Rs 5895 per qtl in 2nd week of sep. In Mumbai market, pea traded at Rs 5230, up from Rs 5130 last week. Slight pressure might be seen this week as chana trades bearish. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased from Rs1000 to Rs 1100. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

MarketOutlook: Outlook remains steady to slightly weak this week too.

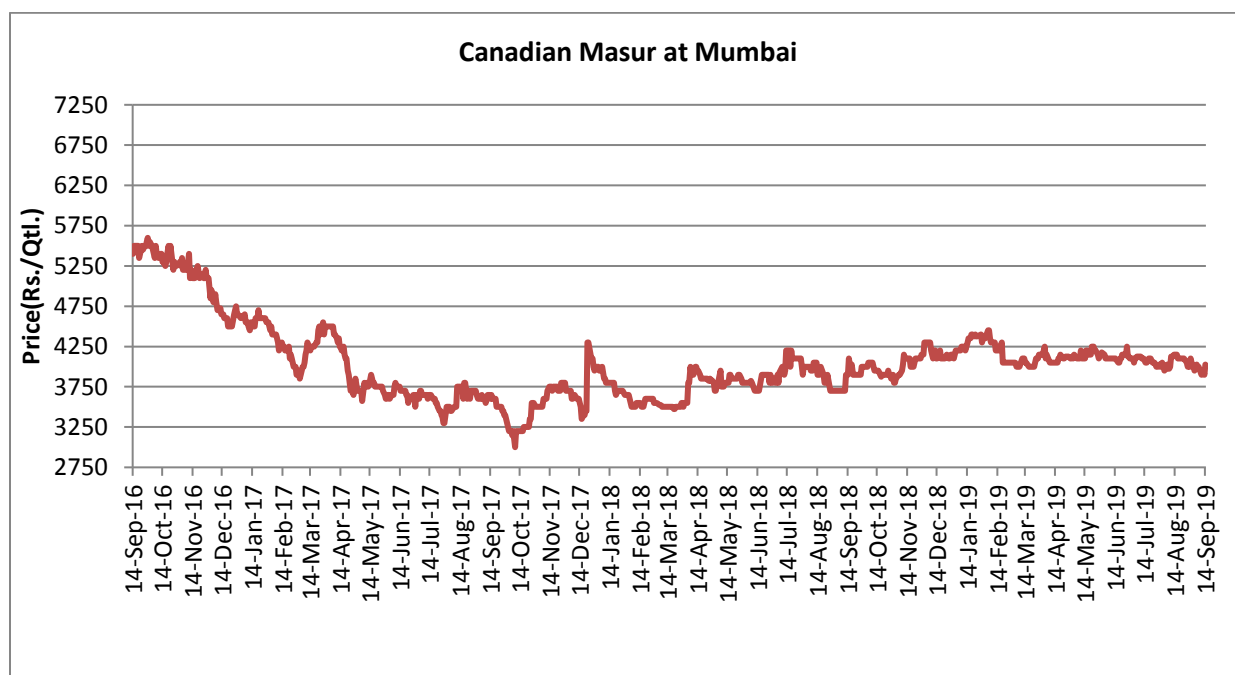

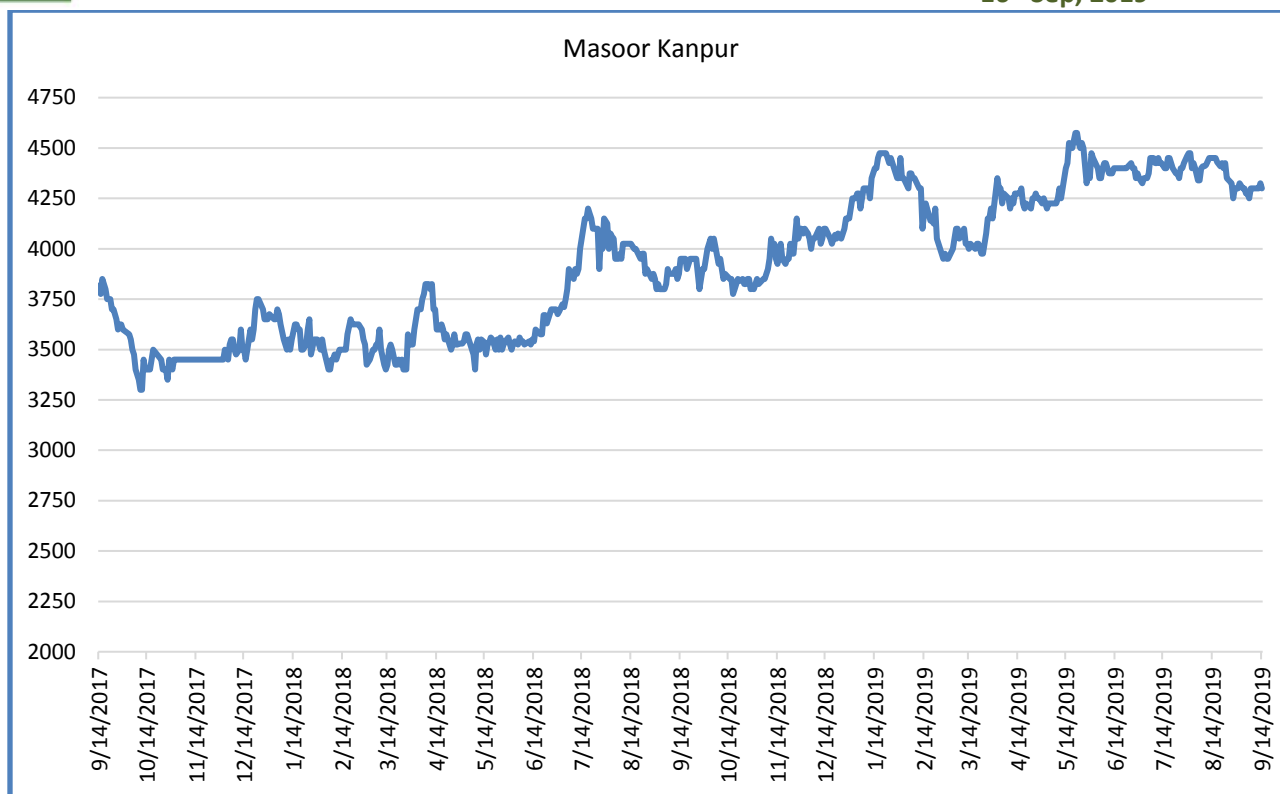

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand, continuous import at cheaper price and ample stock with Nafed. Nafed still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Steady to weak movement is expected in lentil market in this week too. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4100-4150 per quintal. In Kanpur market it is being traded at Rs4350-4400 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Festive demand may lend some support to cash market. However, any spike is unlikely at this point of time.

Current Scenario:

In the 2nd week of Sep-2019, average price in key market like Kanpur was down by 0.25 % to Rs 4200-4225 per qtl. Prices are likely to trade steady to slightly weak in Sep too. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Import flow remains restrictive for lentil market.

Market Outlook: Prices are likely to stay steady to slightly weak due to old and imported stock release by private trades. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

Pigeon Pea (Tur/Toor):

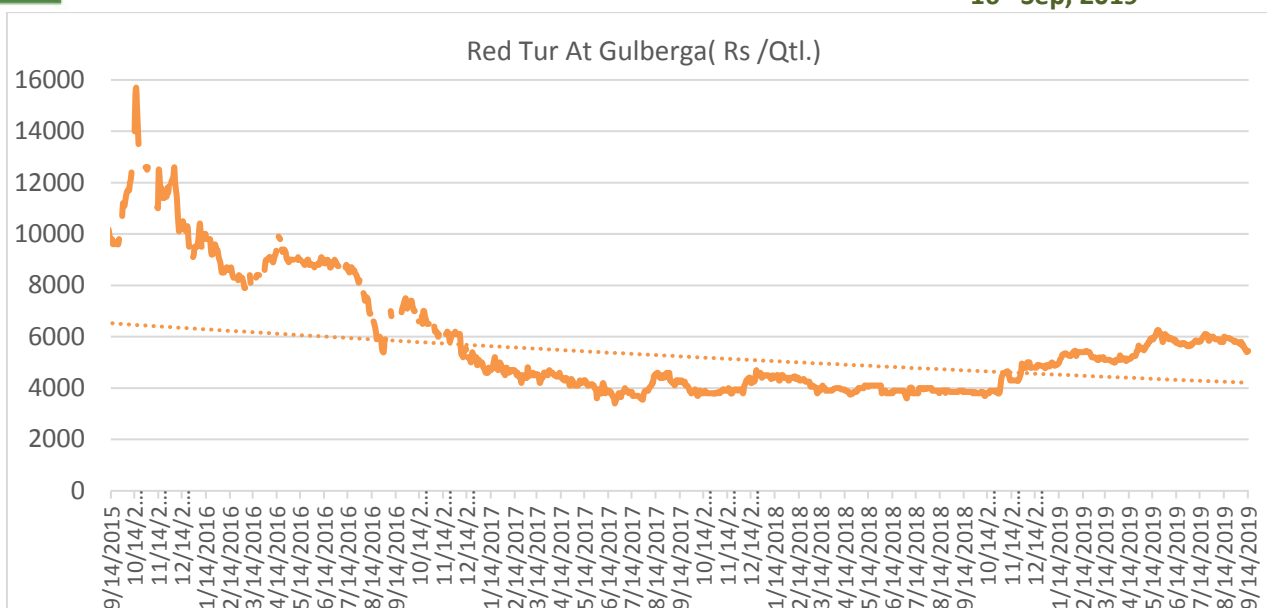

Market Recap:

At planting front Indian farmers have covered 44.95 lakh ha as on 06th th Sep-2019. It is up by 0.42% from last year. Normal area till date is 42.98 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 1.84%, 0.04% and 0.12% respectively. Even A.P. area increased by 0.13 % to 2.11 lakh ha so far. However, area in Maharashtra & M.P. is running behind by 0.07 and 1.19%. With good rainfall overall area is expected to cross normal level of 43 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from normal. With good rainfall overall area is expected to cross normal level of 43 lakh ha this year too. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Improvement in acreage, good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.80 lakh MT through govt.'s channel. So any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$680 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 7.5 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5700-5725 per qtl and it may trade down by Re 100 more unless heavy rains in growing regions wash out the standing crop.

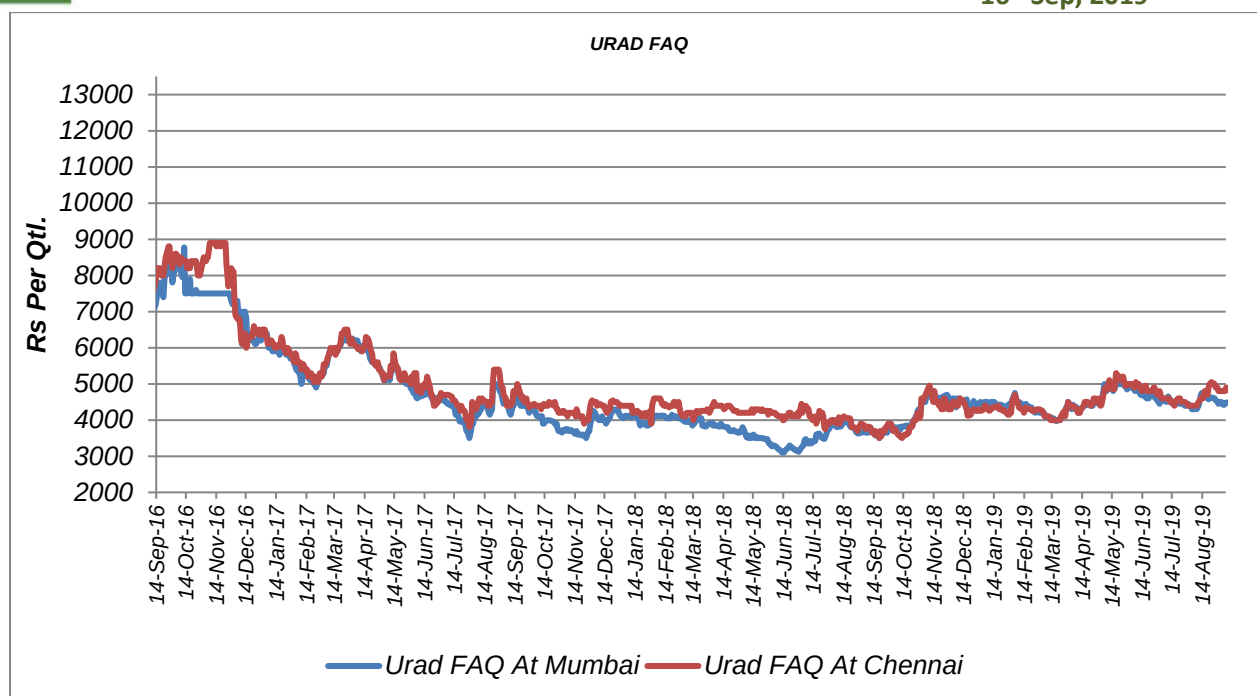

Markt Outlook: Tur market may trade steady to slightly weak with increasing flow of import and central pool amid weak demand so far.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat despite some losses by recent flooding. Indian farmers have covered 37.52 lakh ha so far against 38.18 lakh ha last year till date. It is lower by 1.74 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running up by 6.31 % to 16.50 lakh ha against season's normal of 10.67 lakh ha. Even situation in UP too has improved now and farmers have covered 2.02 % higher area to 7.02 lakh ha so far. Area is down in Rajasthan by 3.24% to 4.57 lakh ha against 4.72 lakh ha last year as on 06th Sep-2019. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.07 lakh ha so far. Even in Telangana farmers have covered 0.23 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Market has adjusted the impact of flood loss and opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Govt would procure urad at Rs5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 4500, in Chennai it is being traded at Rs 4800 per qtl. Cash market may increase by Rs 300 more this in coming weeks.. New Urad from Gujarat and Maharashtra would hit market from end Sep

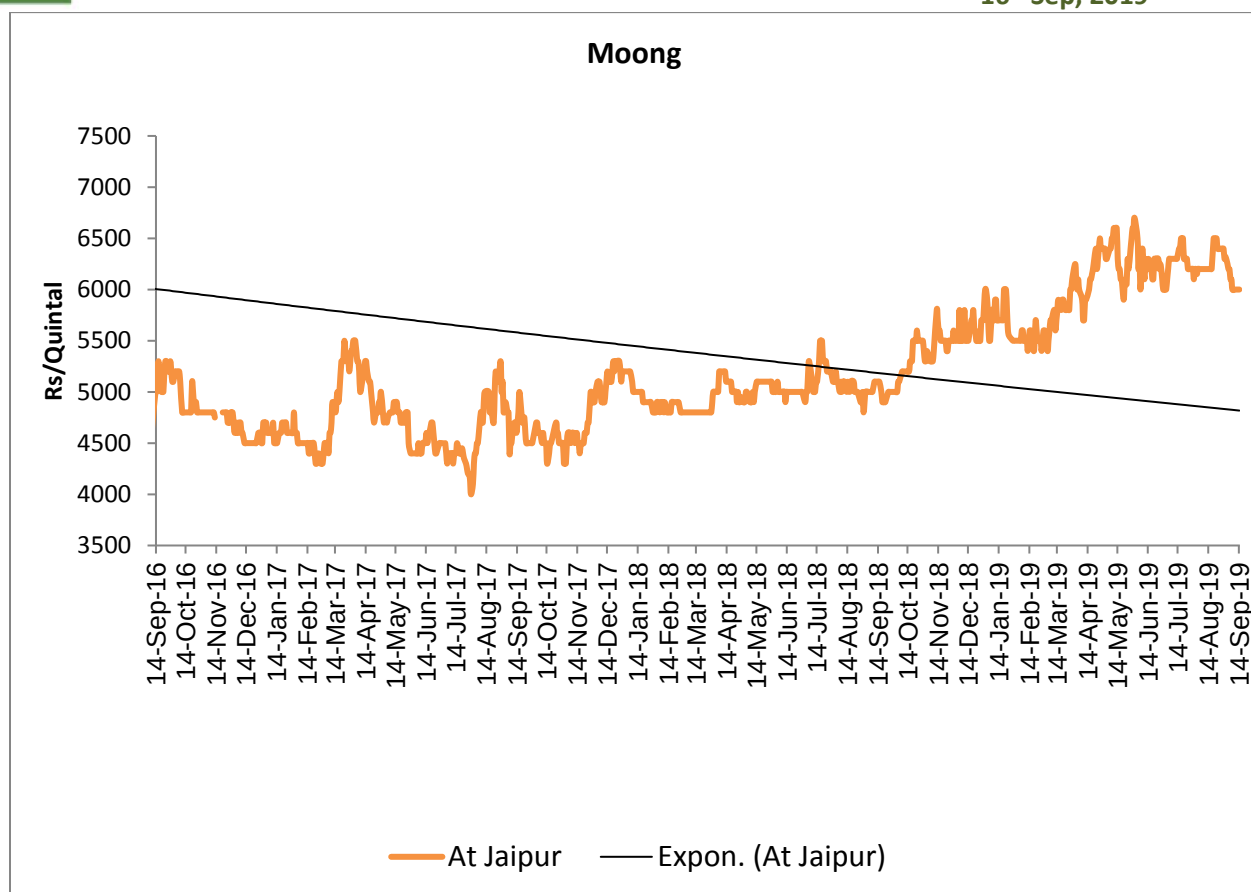

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):

Market Recap:

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 6000-6000. It may move down further by Rs 100 from current level

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in Sep.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4200 to 4400 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4150 with the first target of 4300 and second target 4350 with stop loss at 4100 level.

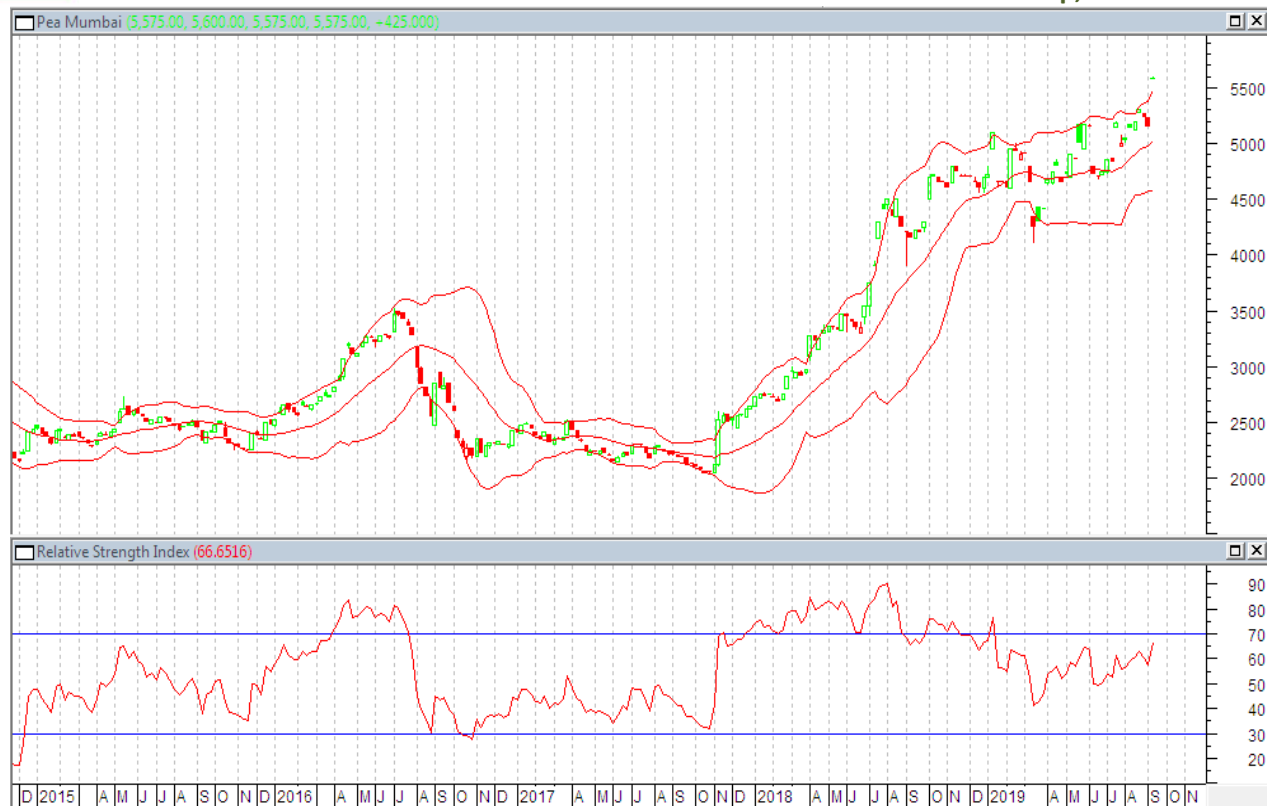

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4000	4100	4200	4400	4550

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week due to weak chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. Import too is not possible beyond a limit. It may lend support to pea market if chana starts improving.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 5000-5450 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 5150 with the first target of 5300 and second target 5400 with stop loss at 5050 level.

Support & Resistance
