Commodity-wise Domestic, International Prices and Arrivals at Different Centers

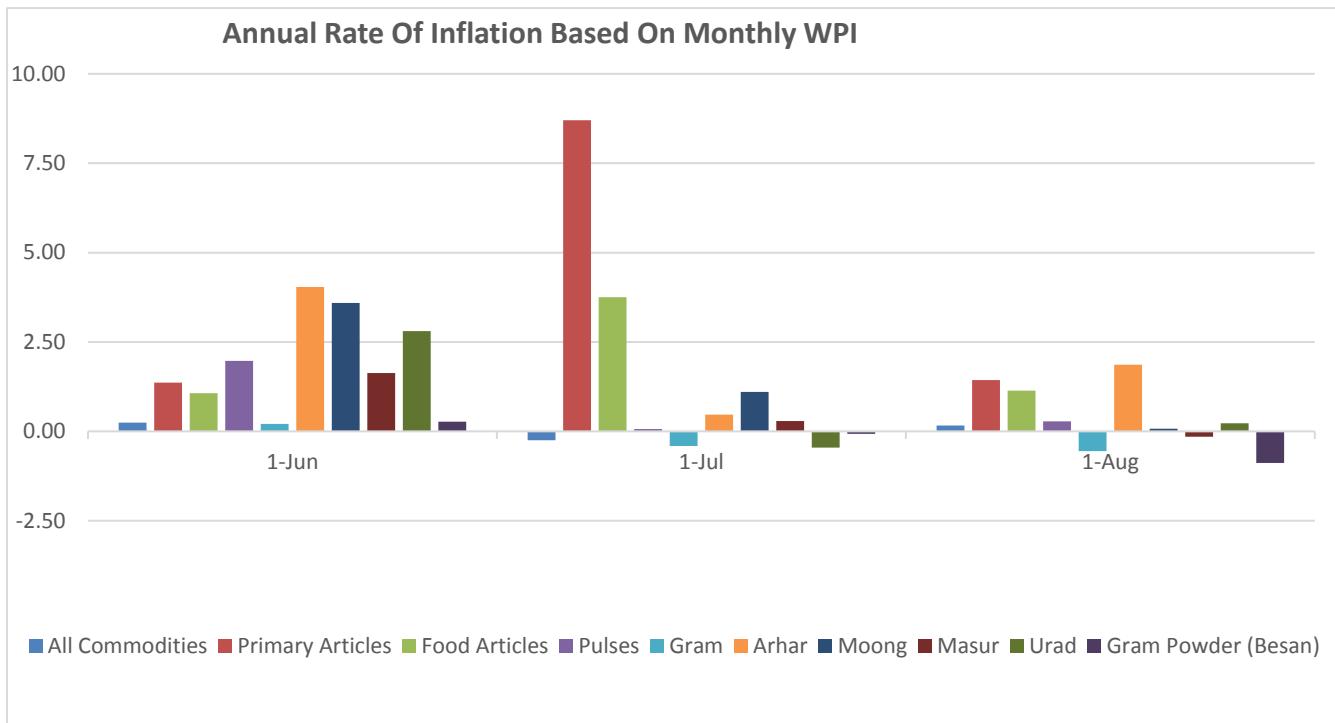

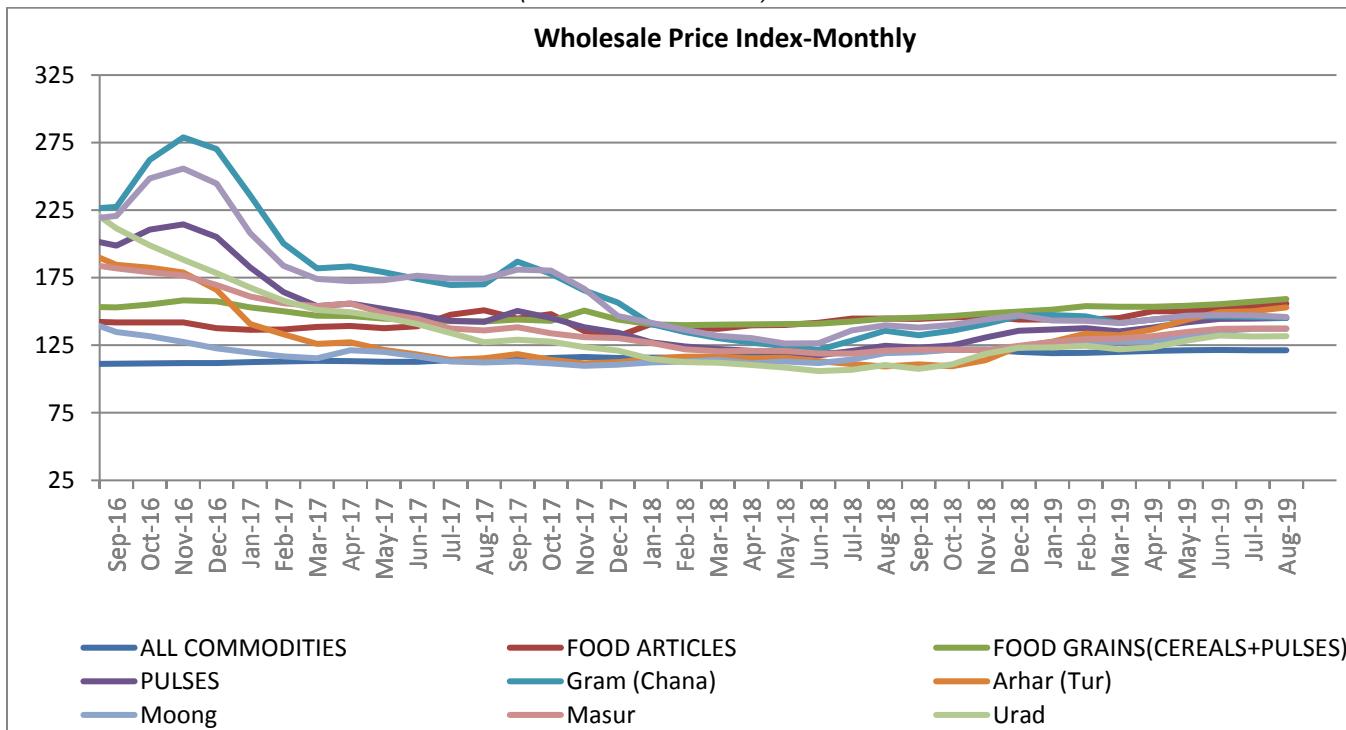

Highlights-Domestic Market:

- **Indian farmers have covered 132.99 lakh ha area under kharif pulses as on 20th Sep-2019 against 135.41 lakh ha last year till date. Sowing is at last phase now.. It is 1.78 % lower than last year. Tur area is lower by only 0.34% to 45.49 lakh ha. It was 45.64lakh ha last year. Urad area is lower by 1.70% to 38.46 lakh ha. It was 39.13 lakh ha last year. Moong area is lower by 9.12% to 30.99 lakh ha. It was 34.10 lakh ha last year. However, area under Kulthi and other pulses is up by 16.20 & 8.91% to 0.71 & 17.34 lakh ha respectively.**
- **Tur cash market continued to trade under pressure as importers have started releasing lower quality stock at discounted price. In Gulberga market tur is being traded at Rs 5400-5500 per qtl. down by Rs 100 from last week. Total area coverage under tur is almost same as last year at 45.49 lakh ha. It may end up with 46 lakh ha this year against normal of 43 lakh ha. Crop condition started improving with recent shower of rains in major growing belts despite some losses in Gujarat Raj and MP. Area loss is likely to be compensated by higher yield in upper land of Mah, UP and Gujarat. However, crop condition is poor in Karnataka, the major tur growing states where 11.71 lakh ha has been covered. Area in Mah crossed 12.07 lakh ha as on 20th Sep-2019.**
- **The main reason behind pressure on price is mainly attributed to improved yield prospects and lower price of poor quality imported stock. Imported tur from Myanmar is said to be poor quality and it is being sold at discounted price at Rs5250. It has started affecting the price of quality tur in domestic market. Prices are expected to improve once poor quality imported stock ends. So, any major spike in tur market is unlikely as there is ample stock in domestic market including central pool stock. New crop is hardly two months away now. Myanmar is offering lemon tur at \$675 per MT.**
- **Cash urad market in Mumbai and Chennai traded range bound after decreasing by Rs 100 on rumours that Rajasthan High Court has given stay order on urad import. The news was spread intentionally to pressurize urad market. Actually some traders have sold urad in forward(Oct) and they intend to buy urad at lower price for physical delivery in Oct. Due to loss of kharif urad crop by flooding and rains, it prices moved up by Rs500 to 600 in last 15 days. It has decreased to 4950-5050 after touching 5200 in Mumbai. More downward trend is unlikely as arrival has been delayed by 20 days while total loss in MP, Raj & UP is said to be around 2.75 lakh ha. It means crop size would be down by 1.25 to 1.5 lakh MT from normal expectation. It would keep market well supported at current level. Some selling of old stock might be seen by private trades as they would prefer to take advantage of higher price. It may pressurize market by Rs100-150 from current level. Overall tone in urad market remains firm due to crop loss and delayed arrivals. Even quality of urad in Maharashtra is said to be affected. New Urad from Gujarat and Maharashtra commences now.**
- **Moong crop in Baran, Bundi, Chittorgarh, Dholpur, Jhalawar & Kota in Rajasthan, Mansore, Neemuch, Bhopal and Hoshangabad in MP & Marathwara and 3 districts in central Maharashtra have suffered a lot due to flooding and continuous rains. In Maharashtra moong and urad crops are at harvesting stages. Around 60 to 75 thousand ha moong crop is said to be washed out in Rajasthan. In M.P districts like Mandsor, Neemach, Bhopal and Hoshangabad are said to be worst affected. Arealoss is said to be around 40,000 ha In Maharashtra flood and heavy rains have affected mature crop of moong and urad in Marathwara region and central Maharashtra. Around 50 to 60 thousand ha is expected to be affected badly.**
- **Total area loss under pulses is over 3 lakh ha so far. If rains continue damage would increase further. However, moong crop conditions are excellent in Gwalior and Chambal region of MP, Nagore, Sumerpur, Jaipur and Kishanganj in Rajasthan. In UP too moong crop is in good condition except Allahabad, Varanasi region. Lower area coverage and loss by flood are likely to be compensated by improved yield. Arrivals have started in Mah & Guj. With commencement of procurement moong price is expected to improve in coming weeks. Moong in Jaipur market is likely to trade in the range of Rs 5700 to 6200 in the near term.**
- **Demand from mills and for seed purpose helped chana cash market to recover. However, pressure continues due to lack of confidence in the market and ample availability of stock. Demand is good at this point of time. However, buyers hesitate to go for bulk buying at higher price. There is a common view in the market that it should stabilize now. Delhi chana is being traded at Rs 4200-4225 per qtl. It may move up to Rs4300-4350, if demand continues and Nafed's sale through tender remains restricted. NCDEX traded up in last few days. However, any spike is unlikely in coming weeks. Pressure on other pulses too is affecting chana market sentiments.**
-

- **Weak demand,higher volume of import continued to affect lentils price sentiments despite lower arrival in major mandis.**Lentils(containers) at Mumbai port was quoted at Rs 4150-4250.However,demand at lower level is expected in coming weeks.Farmers have sold out maximum crop now.As stockiests too are selling,pressure continues.In Indore market lentils is being traded at Rs 4100-4150.Stockiests are aware that Nafed has around 2lakh MT stock while import is on ,so any spike is unlikely.If demand improves, prices may move up by Rs 200 -300 in the medium term.In Kanpur market masur moti is being traded at Rs 4400-4425. Now marketing is awaiting for demand.

International Market:

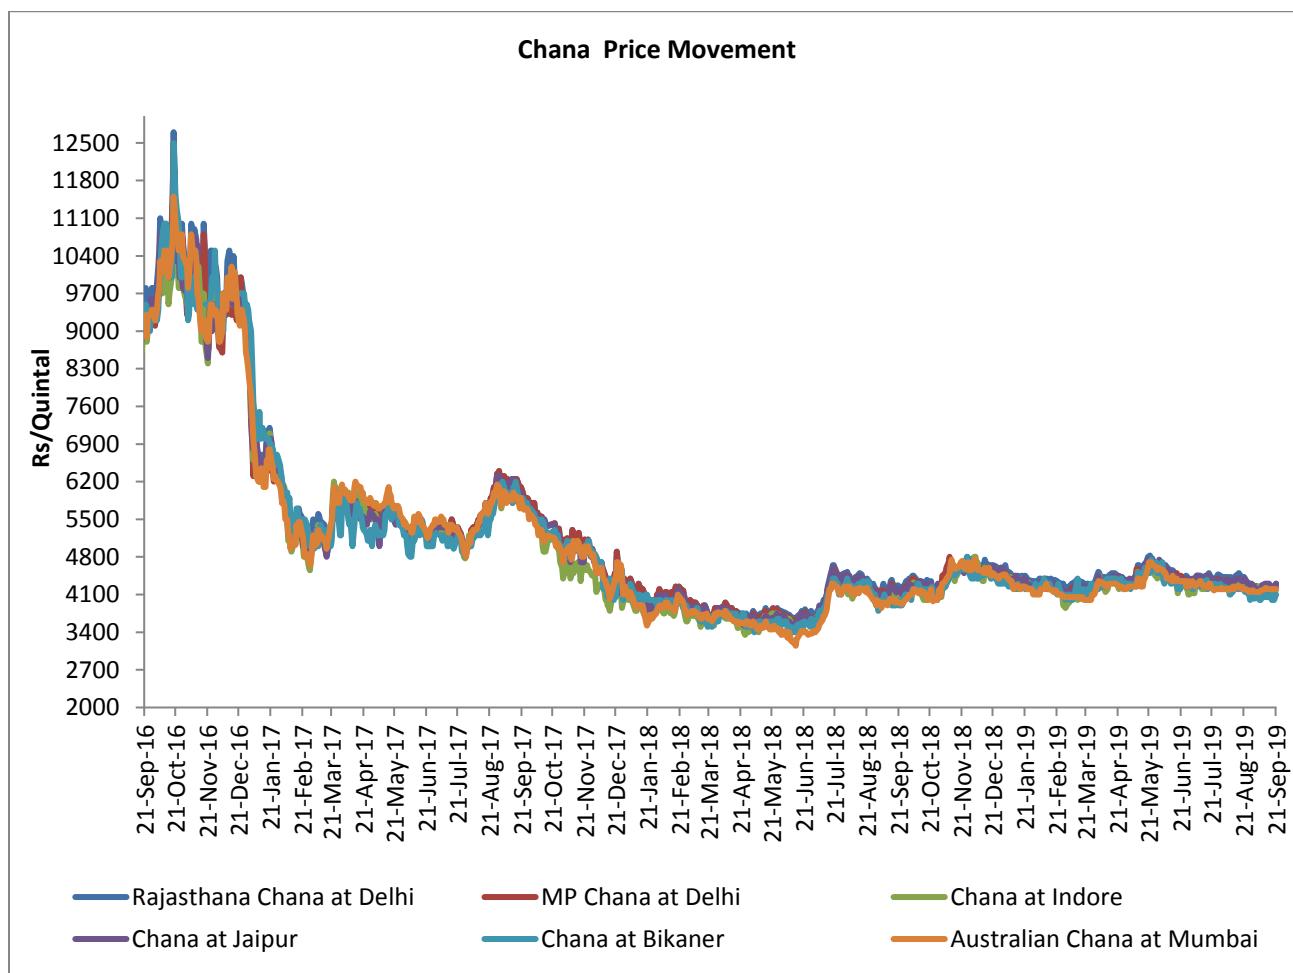

- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.**It would be the second highest production.The rise in production is mainly attributed to higher area and yield this year.Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada.Manitoba contributes 3% in total production.Despite 30% increase in production,totalsupply is expected to increase only by 18% due to lower carryin stock.Export is expected to increase to 34 lakh MT.Canada had produced 35.81 lakh MT dry peas in 2018-19.Yield is expected to increase from 2.5to 2.71 tonne per ha.Canada had exported 32.50 lakh MT last year.Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20.Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Lentils production in Canada is expected to increase from 20.92(2018-19) to 25.20 lakh MT in 2019-20** due to higher yield.Yield has increased from 1.40 to 1.68 tonne per ha this year.Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage.It would increase from 3.14 to 5.94 lakh MT this year.Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20.However import and export is expected to decrease slightly this year.Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage.Farmars in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year.Despite lower production totalsupply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20.Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT.Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage declined to 4.5lakh acres** despite higher yield realization this year in the initial stages of harvesting.Demand from main export market like India, the EU and Canada is decreasing.Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20.It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303.to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chick-peas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018.The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 144.7 in July to 145.1 in Aug-2019

Pulses-Wise Scenario:
Chana
Current Scenario:

Despite some improvements seen in futures chana market is unlikely to sustain at higher level.. Demand from bulk users has improved taking clue from firm futures. Once Nafed starts selling chana in bulk volume it would come down again. Market is well aware of ample availability of chana in central pool as well as in private hands.If we keep aside reserve stock of 1278453 MT, still there is a availability of 1232136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4200-4300.If demand improves and Nafed decides not to sell stock, it may move to 4400-4500 maximum. Liquidity crunch too is restricting normal trade. So it is better to sell Chana at every hike of Rs75-100.Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks.Chana may dip further by Rs 100 from current level.As fresh buying spree is expected,some support is expected by end Sep.

All India average price for Chana decreased by 0.53 percent from Rs 4198 to 4176 per qtl. in the 4TH week of Sep-2019. Australian Chana (imported) too price decreased by 0.59 percent from Rs 4225 to Rs 4200 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

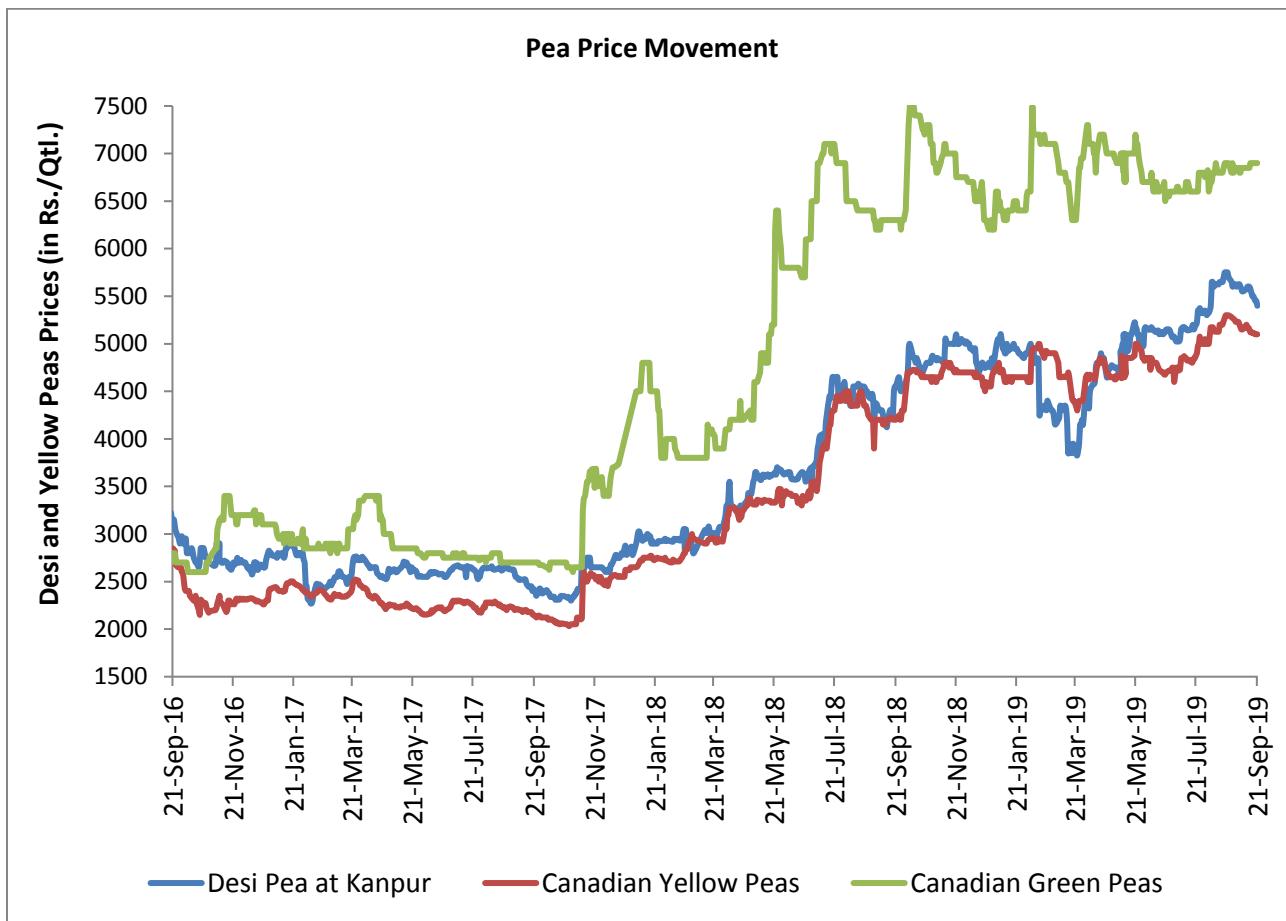

Market Outlook: Slight recovery might be seen in chana cash market this week.

Peas (Matar):
Market Recap:

Despite higher prevailing prices in domestic market the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses are ruling lower.. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT.Before this in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now food minister says that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continues to move up, govt may consider to relax quota norm by October end.

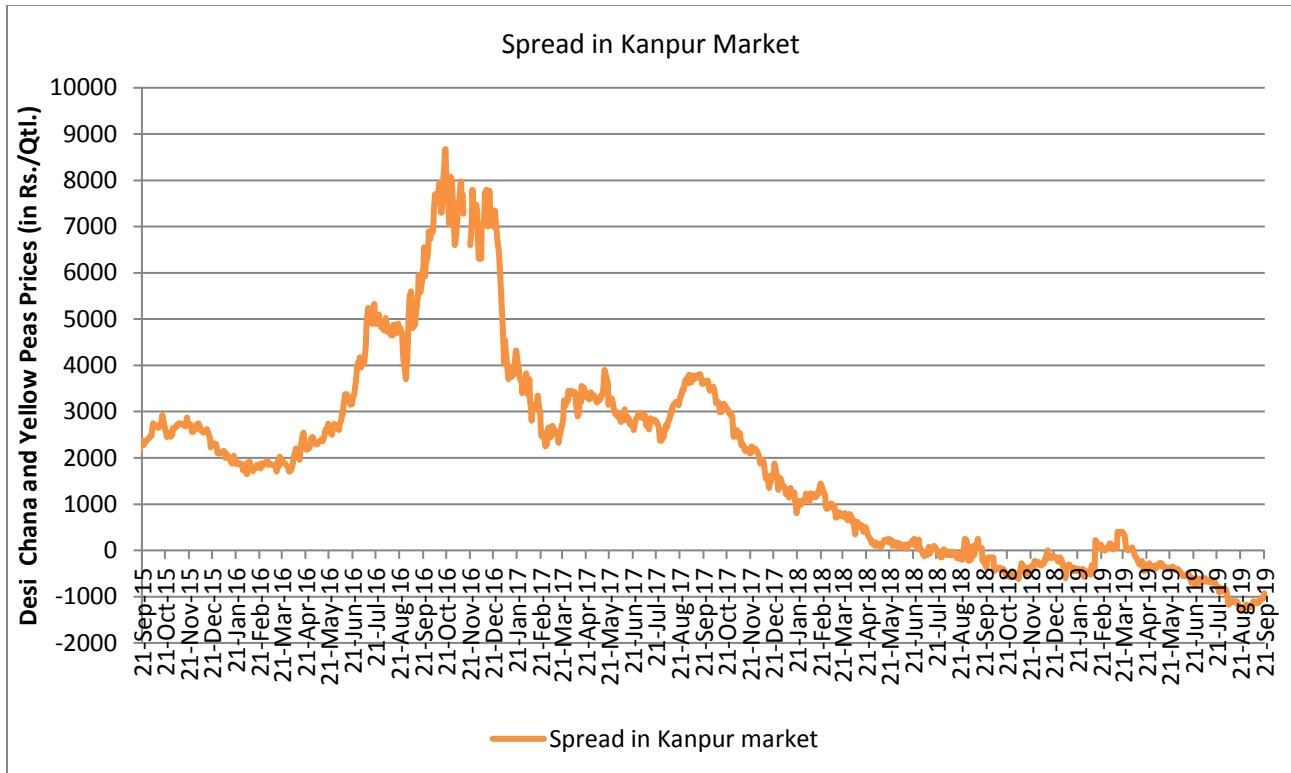

Pea in Mumbai market is being traded down at Rs. 5120-5125, while in Kanpur market it is being traded at Rs 5400 per qtl. As chana price has started decreasing, pea too might trade under pressure. Arrival in local mandis has decreased. As, there would be shortage of imported crop in coming months, price may trade steady to slightly firm after minor correction Stake holders should buy, on downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Sep. If chana continues to trade weak, pressure would continue, on pea price too. Steady to slightly weak trend may prevail this week.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction. Kanpur market traded down by Rs 50 to 5400 per qtl due to sale at discounted price by importers.. Overall, all India average price decreased by 0.45% to Rs 5695 per qtl in 4th week of sep. In Mumbai market, pea traded at Rs 5100, down from Rs 100 last week. Slight pressure might be seen this week as chana trades under pressure. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased from Rs1100 to Rs 900. Spread is expected to remain in the negative zone in Sep too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

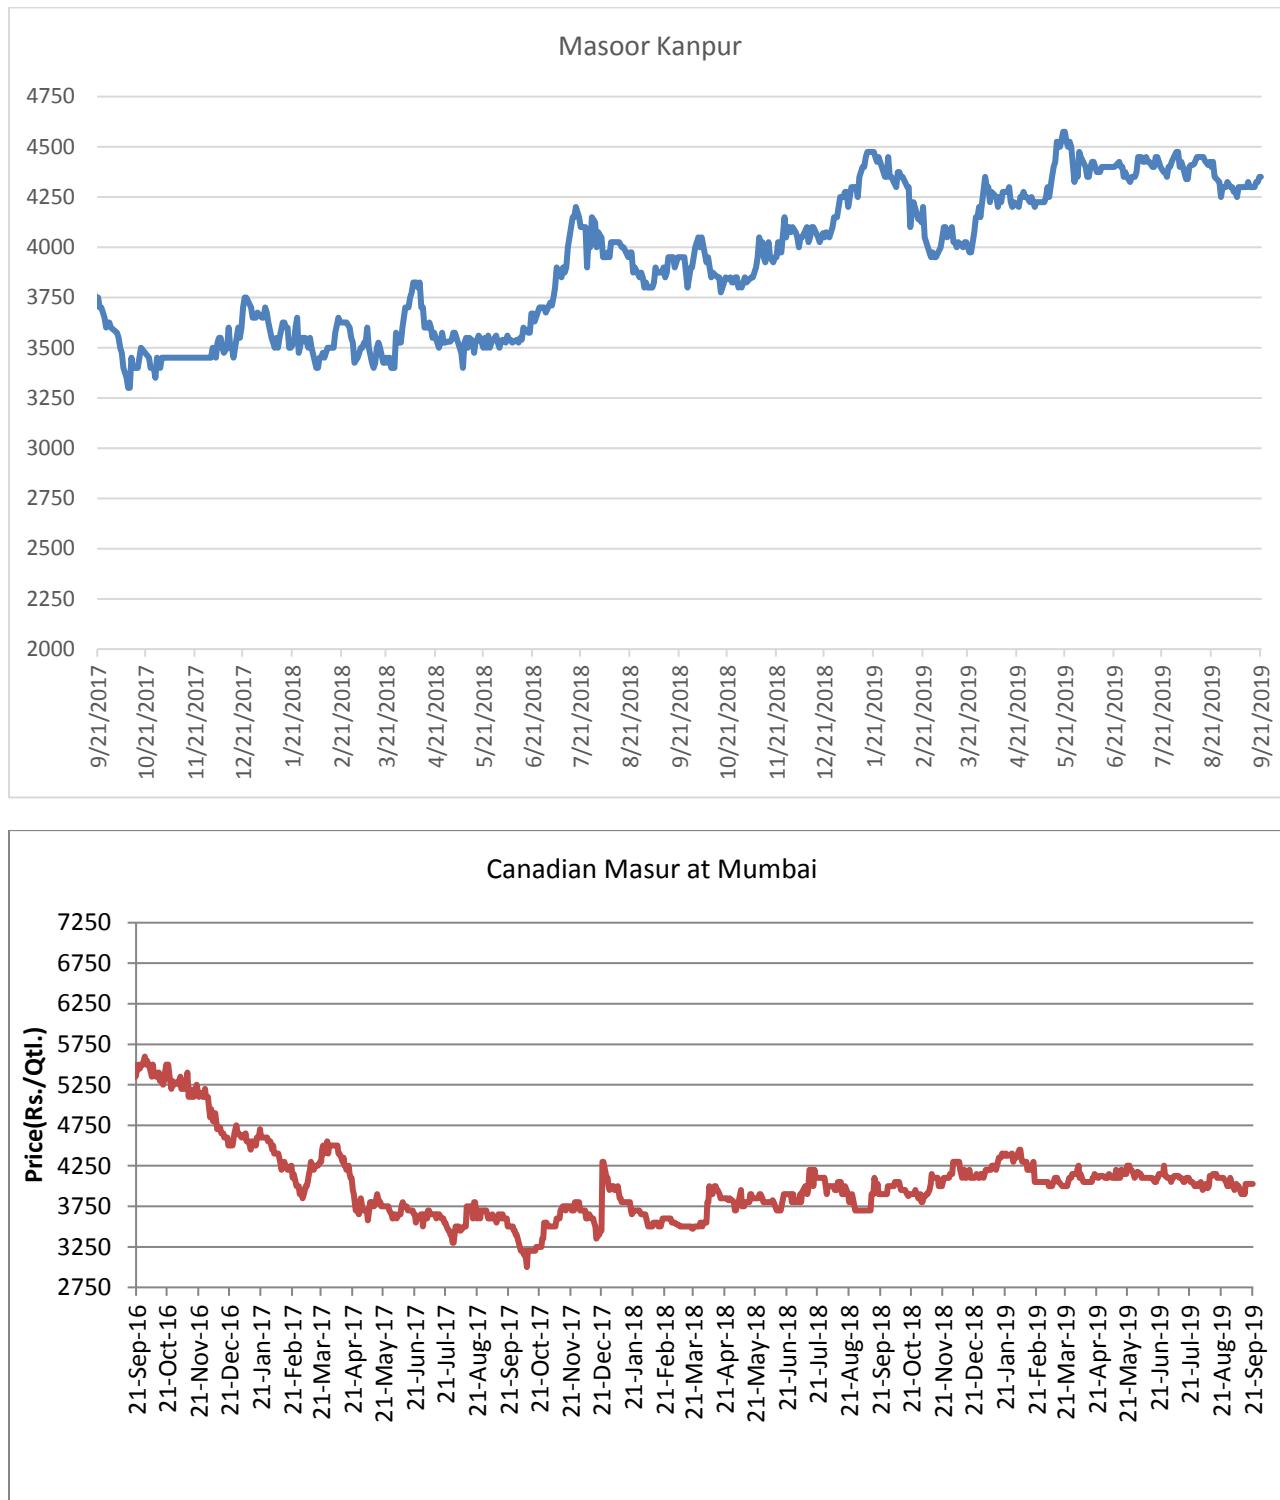

MarketOutlook: Outlook remains steady to slightly weak this week too.

Lentils (Masoor):
Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand, continuous import at cheaper price and ample stock with Nafed. Nafed still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Steady to weak movement is expected in lentil market in this weak too. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4100-4150 per quintal. In Kanpur market it is being traded at Rs4350 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Festive demand may lend some support to cash market. However, any spike is unlikely at this point of time.

Current Scenario:

In the 4th week of Sep-2019, average price in key market like Kanpur was down by 0.15 % to Rs 4200-4215 per qtl. Prices are likely to trade steady to slightly weak in Sep too.. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Import flow remains restrictive for lentil market.

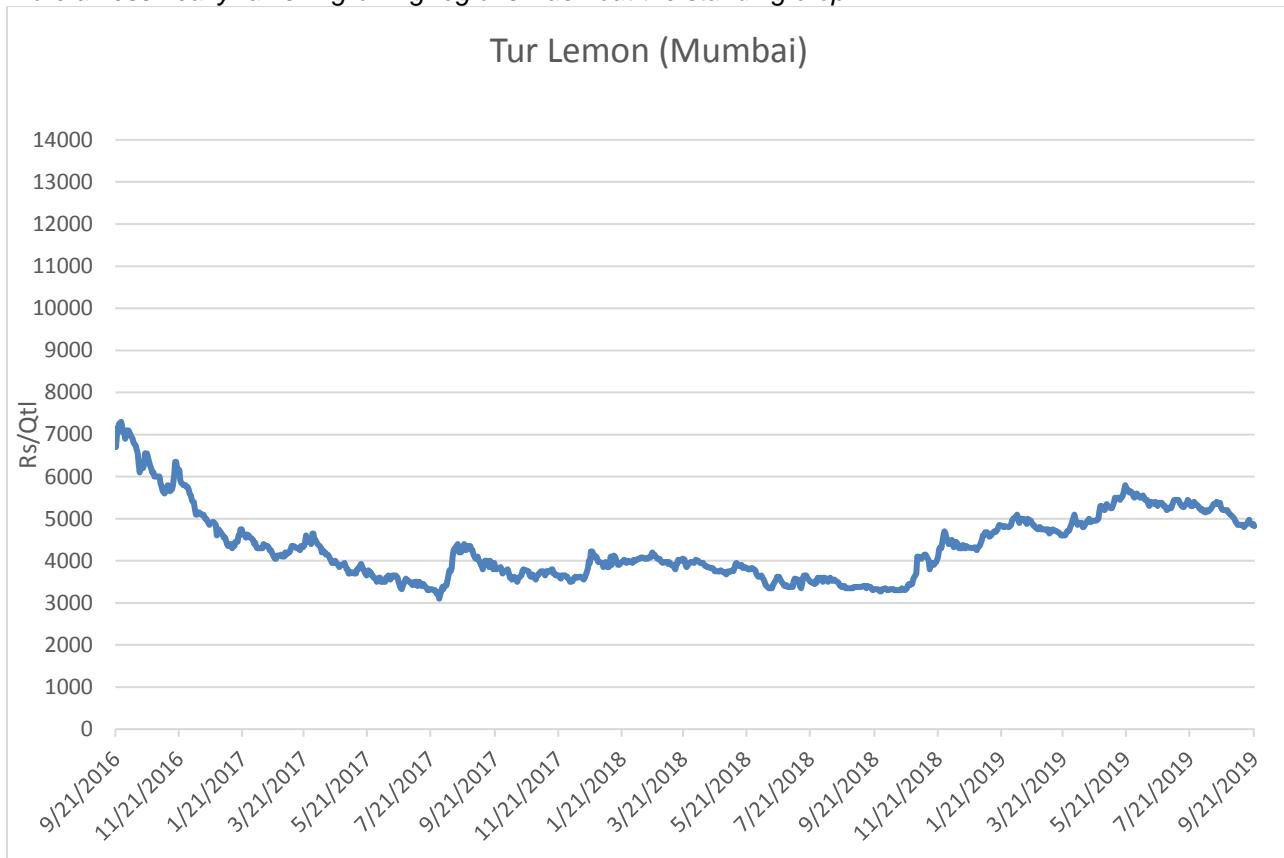

Market Outlook: Prices are likely to stay steady to slightly weak due to old and imported stock release by private trades. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way trend.

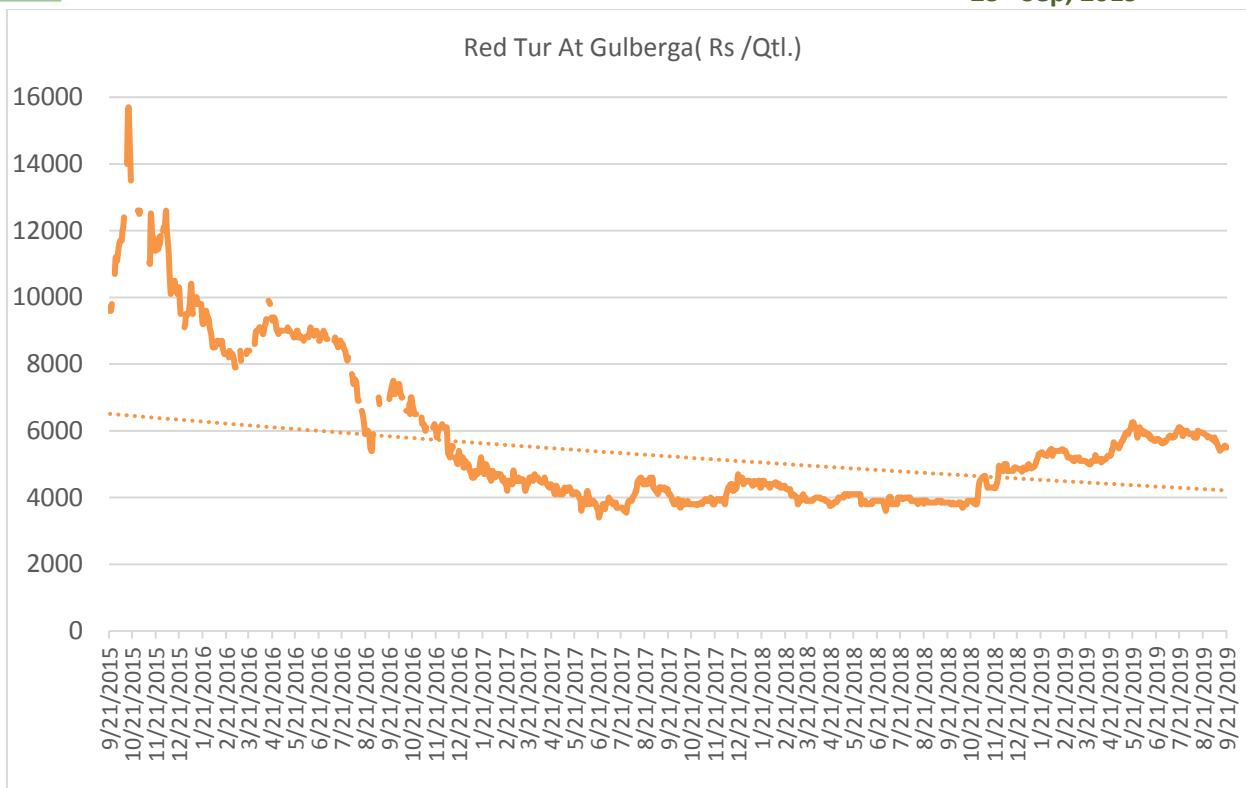

Pigeon Pea (Tur/Toor):
Market Recap:

At planting front Indian farmers have covered 45.49 lakh ha as on 20th Sep-2019. It is down by 0.34% from last year. Normal area till date is 43.57 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 1.79%, 0.04% and 0.02% respectively. Even A.P. area increased by 0.06 % to 2.24 lakh ha so far. However, area in Maharashtra and M.P. is running behind by 0.27 and 1.19%. With good rainfall overall area is expected to touch of 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Improvement in acreage, good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.80 lakh MT through govt's channel. So any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$680 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 7.5 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5500-5525 per qtl and it may trade down by Re 100 more unless heavy rains in growing regions wash out the standing crop.

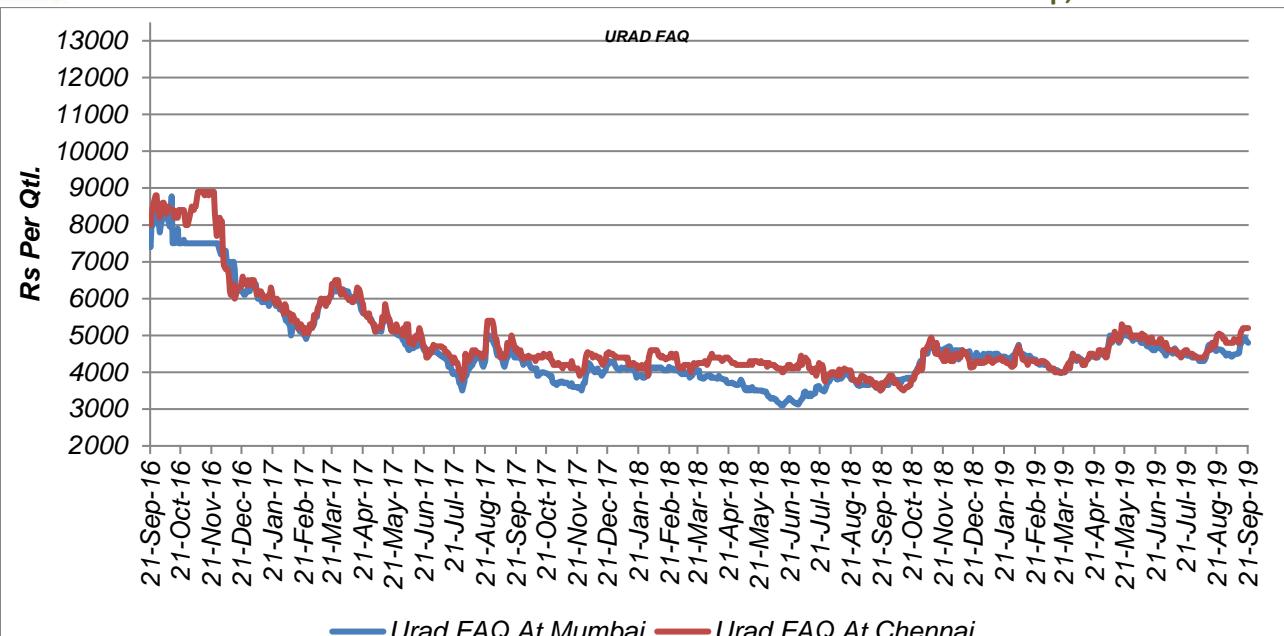

Markt Outlook: Tur market may trade steady to slightly weak with increasing flow of import and central pool amid weak demand so far.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat despite some losses by recent flooding and rains. Indian farmers have covered 38.46 lakh ha so far against 39.13 lakh ha last year as on 20th Sep-2019. It is lower by 1.70 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running up by 6.31 % to 16.50 lakh ha against season's normal of 10.67 lakh ha. Even situation in UP too has improved now and farmers have covered 2.02 % higher area to 7.02 lakh ha so far. Area is down in Rajasthan by 2.48% to 4.61 lakh ha against 4.72 lakh ha last year.. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.08 lakh ha so far. Even in Telangana farmers have covered 0.23 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Market has adjusted the impact of flood loss and opening of weather in major growing region has pressurized cash urad market once again.Besides, private trades are releasing old stock. New crop is hardly one month away now.Import remains restricted so any major decline is unlikely.Govt would procure urad at Rs5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end.It may keep market well supported at current level in the medium term.At present urad Mumbai is being traded at Rs 4900,in Chennai it is being traded at Rs 5200 per qtl. Cash market may increase by Rs 100-150 more this in coming weeks. New Urad from Gujarat and Maharashtra would hit market from end Sep

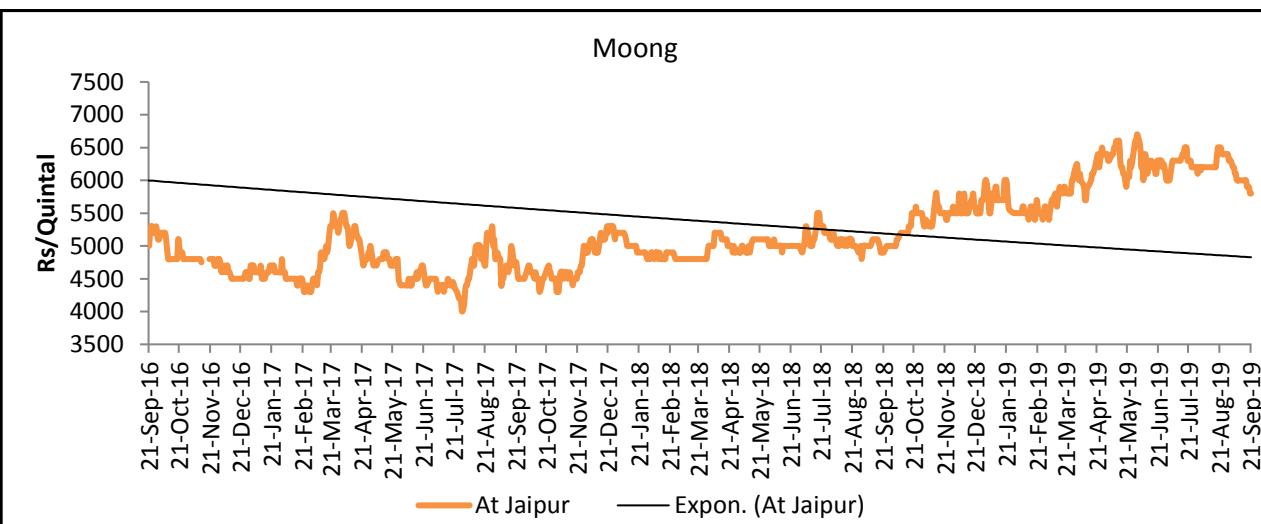

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum this week

Green Gram (Moong):

Market Recap:

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP was lower in size. So moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 5800-5850. It may move down further by Rs 100-200 from current level as arrival started increasing.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in Sep.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4200 to 4400 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4150 with the first target of 4300 and second target 4350 with stop loss at 4100 level.

Delhi Chana Physical:

| Support & Resistance | | | | |
|---------------------------------|------|------|------|------|

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week due to weak chana. Govt has delayed decision over import quantity. It may be increased to 2lakh MT . Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. Import too is not possible beyond a limit. It may lend support to pea market if chana starts improving.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 5000-5450 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 5050 with the first target of 5200 and second target 5300 with stop loss at 5000 level.
