Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Indian farmers have covered 134.02 lakh ha area under kharif pulses as on 27th Sep-2019** against 136.40 lakh ha last year till date. Sowing is at last phase now. It is 1.75 % lower than last year. Tur area is higher by only 0.16% to 45.82 lakh ha. It was 4575 ha last year. Urad area is lower by 1.85% to 38.83 lakh ha. It was 39.56 lakh ha last year. Moong area is lower by 9.01% to 31.16 lakh ha. It was 34.25 lakh ha last year. However, area under Kulthi and other pulses is up by 6.11 & 8.15% to 0.78 & 17.44 lakh ha respectively.
- **With decreasing stock of poor quality stock at ports and fear of yield loss due to ongoing heavy rains** in Karnataka, Maharashtra, M.P., Rajasthan and Gujarat have provided much needed respite to declining tur market this week. Cash market has started recovering. In Gulberga market tur price increased by Rs 100 to Rs 5550-5600. Total area coverage under tur is almost same as last year at 45.49 lakh ha. It may end up with 46 lakh ha this year against normal of 43 lakh ha. New arrival in bulk volume is expected in December. Stock in private hands is said to be 4 lakh MT. Import volume is below normal expectation as availability in global market is lower. Myanmar has 60-65000 MT old stock while African countries including Tanzania, Malawi & Mozambique have 1.5 to 1.75 lakh MT tur stock. So import volume is likely to be restricted in October too. Mills located in North and central India's dependence on lemon tur would increase as old stock in these states are declining fast. If heavy rains in major growing belts affects standing crops further, tur cash market may move up by Rs 300 to 400 from current level. It may touch MSP once again in coming weeks.
- **Continuous rains in major urad growing states like MP, Mah, Guj, Odisha after devastating flooding in MP, Rajasthan and Gujarat** have started causing concern for urad crop. Crop in these states have entered at maturity stages and higher rainfall, if continues (likely), may affect quality of crop and size of the crop as well. Arrival of new urad crop in M.P., Rajasthan and Mah has started in limited quantity. As fear of loss has increased again urad market may get support at current level and may move up by Rs 200-300. Nafed still has around 2.51 lakh MT stock, while import volume is likely to be restricted at 1.5 lakh MT. In last two months starting from Aug, around 1.15 lakh MT urad has been imported. So, as per set norms only 35,000 MT more urad would be imported, assuming that govt is not going to increase limit of import. So supply side seems tight and it may lend support to cash market price. Procurement drive too is expected to support cash market in coming weeks. Overall tone in urad market remains firm due to crop loss and delayed arrivals. Even quality of urad in Maharashtra is said to be affected. New Urad from Gujarat and Maharashtra commences now. In Chennai market urad is being traded at Rs 5200-5250 while in Mumbai it rules around Rs 5000-5150. Demand for urad dal is normal while millers are engaged to buy old crop sensing crop loss.
- **New arrival of moong in Nimar region of MP commences. It has already commenced in Tamil Nadu and Maharashtra.** However, due to heavy rains in MP moisture content is higher in moong and private trades are unwilling to buy it. Even govt.'s agencies have not set parameters to buy moong having higher moisture content. Millers in MP are procuring dry moong from Maharashtra paying mandi tax. Arrivals in Nimar region is lower as farmers are drying wet crop. Even in Indore mandi, buyers did not show interest in buying wet moong even at lower price. At higher level buying interest of private trades is weak. They know that govt would procure at higher level and sell it much below MSP. It is affecting market sentiments. Moong in Yadgir market traded up by Rs 100 to Rs 5500-6500 depending on quality. It traded at Rs 5700-5800 in Delhi market. As arrival in major markets have declined due to rains, moong price may stay steady at current level. In Jaipur market it may trade at Rs 5800-6000. Overall tone seems bearish as arrival is expected to increase with opening of weather in Mah, Guj, M.P & Raj. If crop loss in MP and Raj increases and quality suffers, moong may trade up once again as procurement drive is about to start from mid Oct.
- **Chana stock in NCDEX ware house for delivery is declining fast and stock in physical market too** is dwindling amid private trades restricted release have lent much needed support to cash chana market despite ample availability of stock in central pool. With improving price in futures, dal millers buying spree has increased. Besides, Nafed would sell chana two days in a week in Mah and Karnataka with reserve price of Rs 4400. It has pushed up chana price in cash

market. In Delhi market chana is being traded at Rs 4350-4400 and it may move upto Rs 4500-4600. At this level, private stockiest may resort to sell stock. It may restrict upward momentum. Right now, overall tone remains firm. At this level there is no parity from producing markets. It hints market to move up by Rs 100-150 from current level in the near term.

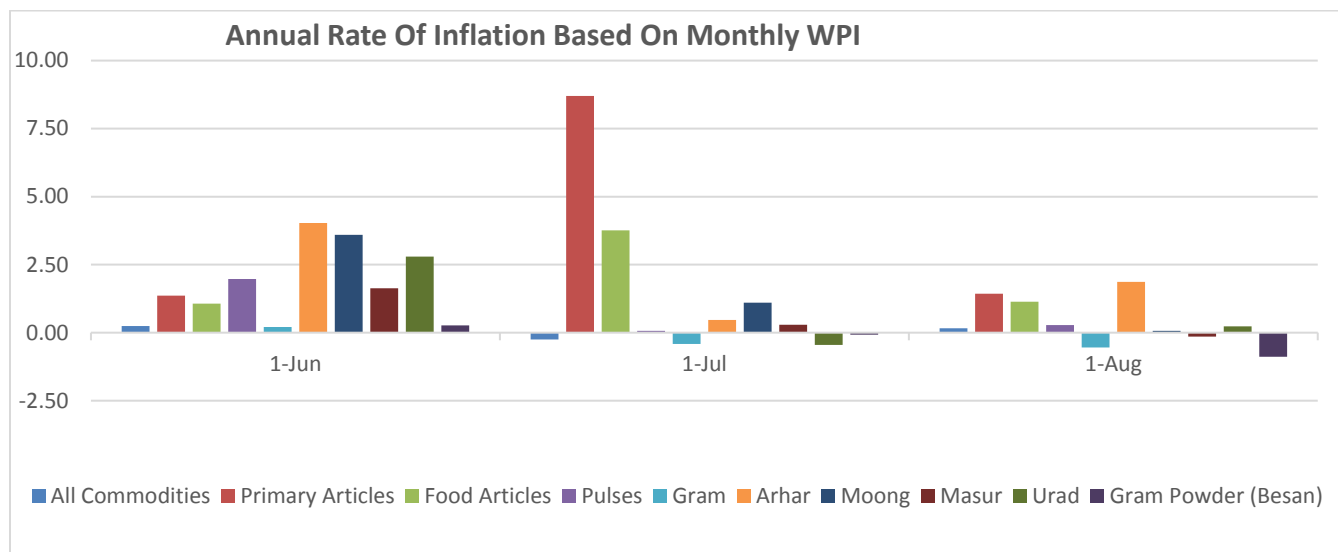

- **Weak demand, higher volume of import continued to affect lentils price sentiments despite** lower arrival in major mandis. Lentils (containers) at Mumbai port was quoted at Rs 4150-4250. However, demand at lower level is expected in coming weeks. Farmers have sold out maximum crop now. As stockiest too are selling, pressure continues. In Indore market lentils are being traded at Rs 4100-4150. Stockiests are aware that Nafed has around 2 lakh MT stock while import is on, so any spike is unlikely. If demand improves, prices may move up by Rs 200 -300 in the medium term. In Kanpur market masur moti is being traded at Rs 4400-4425. Now marketing is awaiting demand.

International Market:

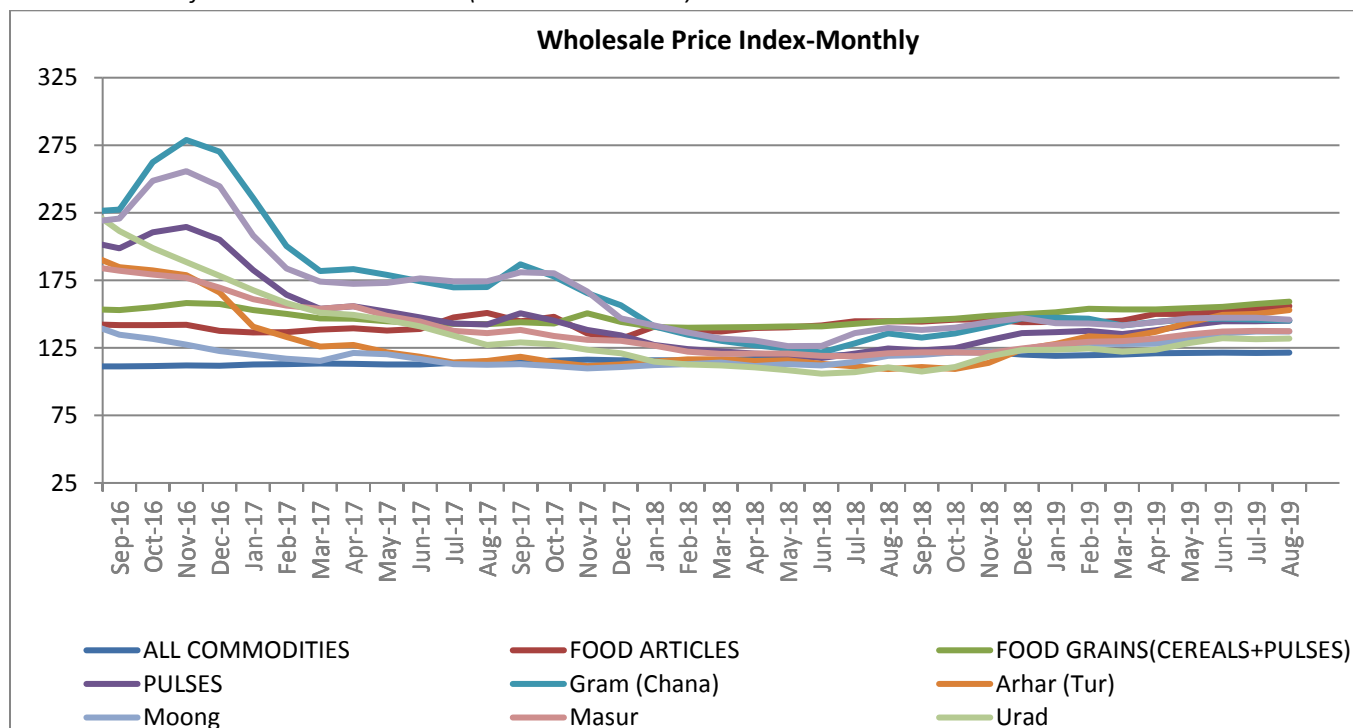

- **Lentils production in Canada is expected to increase from 20.92 (2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Chickpeas production in US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage declined to 4.5 lakh acres** despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **Chickpea area in Australia is expected to increase 22.11% from 303 (2018-19) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79% to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chickpeas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.

- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 144.7 in July to 145.1 in Aug-2019

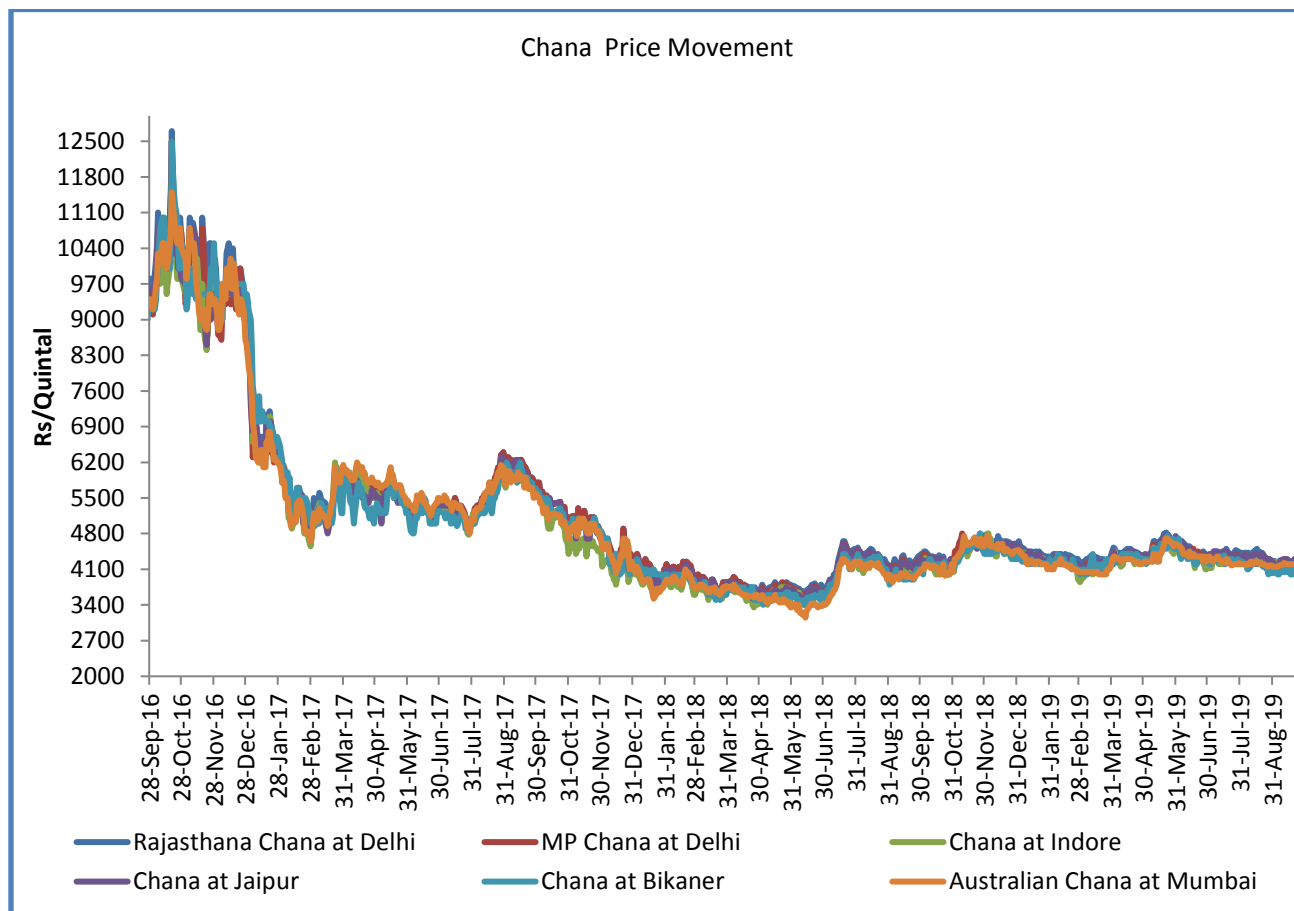

Pulses-Wise Scenario:

Chana

Current Scenario:

This year area under chana is likely to increase as water availability is higher and farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. If we keep aside reserve stock of 1278453 MT, still there is a availability of 1132136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4350-4400. If demand improves and Nafed decides not to sell stock, it may move to 4500-4600 maximum. Liquidity crunch too is restricting normal trade. So it is better to sell Chana at every hike of Rs75-100. Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks. Chana may dip further by Rs 100 from current level. Stake holders should buy after down ward correction.

All India average price for Chana increased by 3.13 percent from Rs 4176 to 4307 per qtl. in the 4th week of Sep-2019. Australian Chana (imported) too price increased by 2.38 percent from Rs 4200 to Rs 4300 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

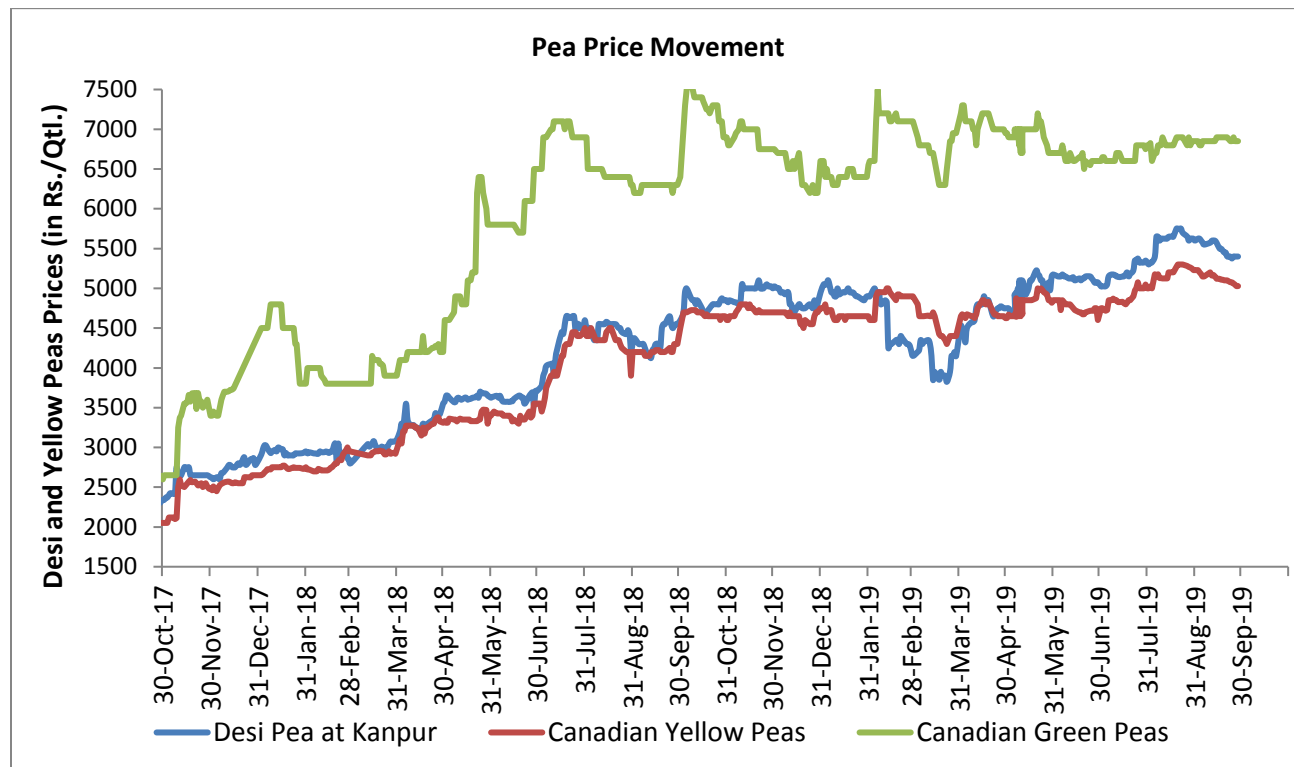

Market Outlook: Slight recovery might be seen in chana cash market this week as demand started improving.

Peas (Matar):
Market Recap:

Illegal import from B, desh and Nepal has eased availability of peas in domestic market and pressure is likely to continue in coming weeks too. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses are ruling lower. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Before this in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue move up, govt may consider to relax quota norm in last quarter.

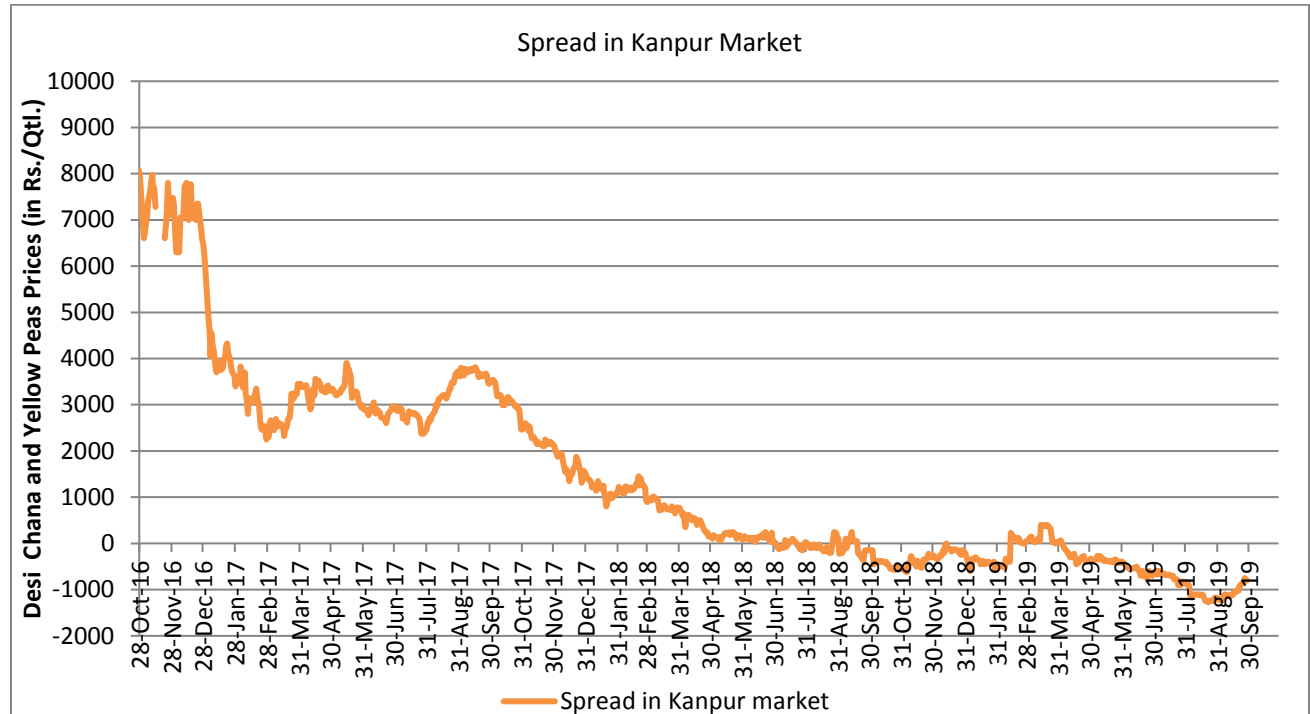

Pea in Mumbai market is being traded down at Rs. 5030-35, while in Kanpur market it is being traded at Rs 5400 per qtl. As chana price has started increasing, pea too might recover a little bit.. Arrival in local mandis has decreased. As, supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Oct as demand for seed would increase. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly weak trend may prevail this week.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction and lower availability of imported stock. Kanpur market traded down by Rs 50 to 5350 per qtl due to sale at discounted price by importers and increasing illegal flow of peas.. Overall, all India average price decreased by 0.55% to Rs 5650 per qtl in 4th week of sep. In Mumbai market, pea traded at Rs 5130, down from Rs70 last week. Slight pressure might be seen this week as chana trades under pressure. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has decreased from Rs900 to Rs 800. Spread is expected to remain in the negative zone in Oct too on relative movement in Chana prices. Overall outlook seems steady to slightly weak in coming weeks.

MarketOutlook: Outlook remains steady to slightly weak this week too.

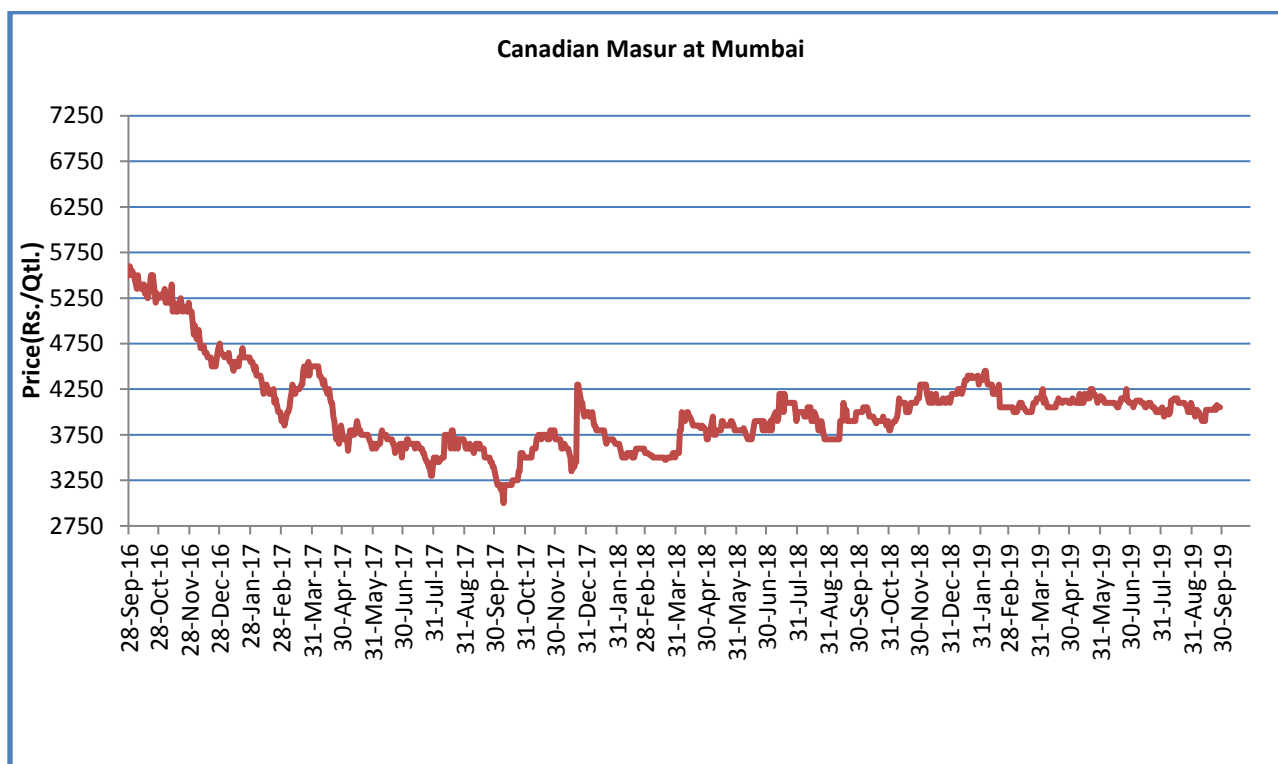

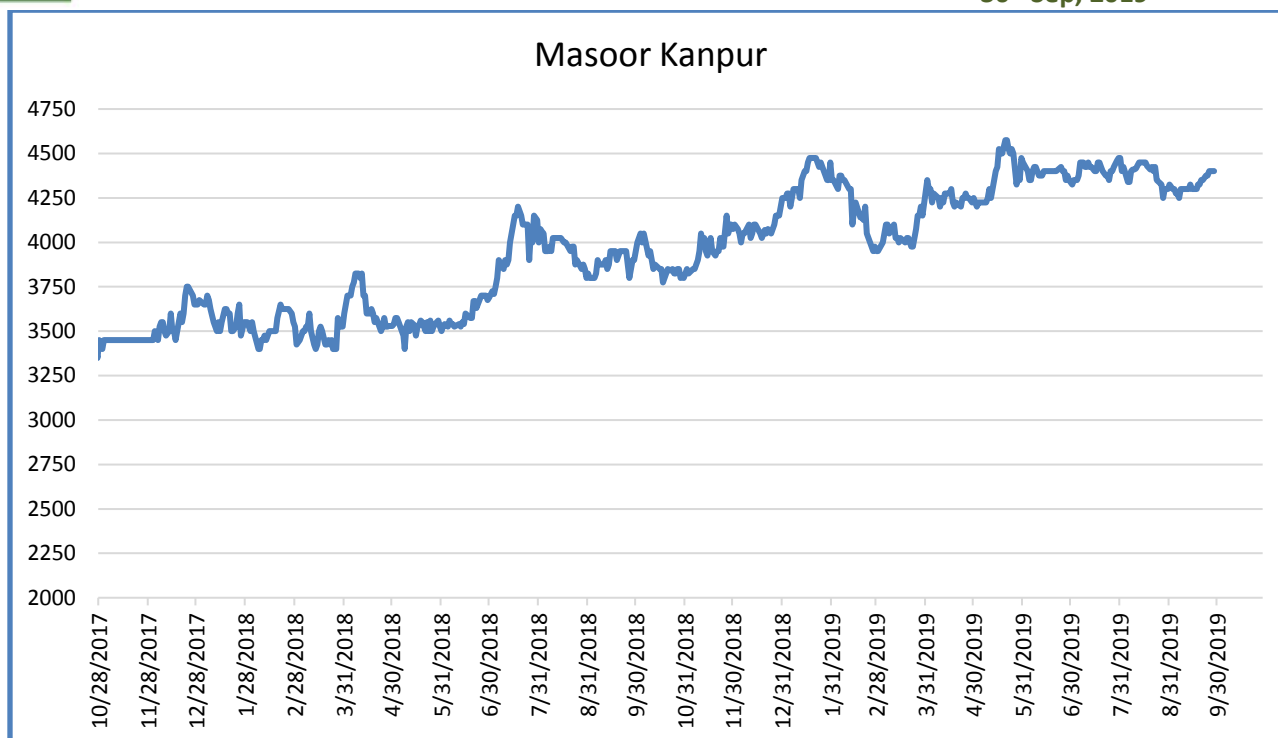

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand, continuous import at cheaper price and ample stock with Nafed. Nafed still has 2.07 lakh MT old and new stock. Besides, import is taking place at lower level. So, supply side seems at comfortable level amid weak demand in cash market. Prices of other pulses too remain unsupportive for cash market. Prices in global market is lower, so import duty remains ineffective. Steady to weak movement is expected in lentil market in this weak too. Lentil vessel is being quoted at Rs 4000-4050 per quintal and container is being quoted at Rs 4150-4200 per quintal. In Kanpur market it is being traded at Rs4400 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by another Rs 100 from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Festive and seed demand may lend some support to cash market. However, any spike is unlikely at this point of time.

Current Scenario:

In the 4th week of Sep-2019, average price in key market like Kanpur was up by 1.15 % to Rs 4300-4350 per qtl. Prices are likely to trade steady to slightly firm in Oct. Demand from neighboring countries, is still awaited. Masur is unable to get support from other pulses as all pulses are trading weak right now. Import flow remains restrictive for lentil market.

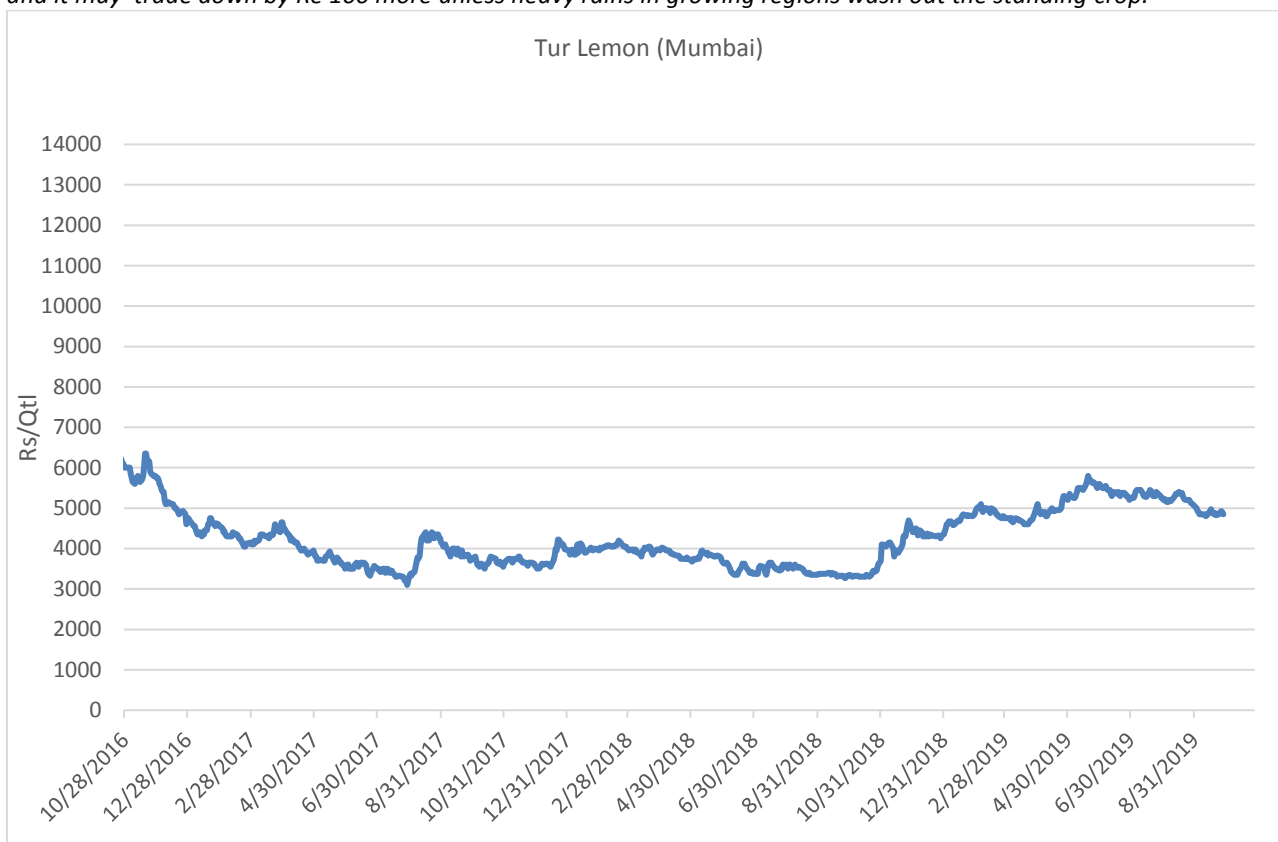

Market Outlook: Prices are likely to stay steady to slightly weak due to old and imported stock release by private trades. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

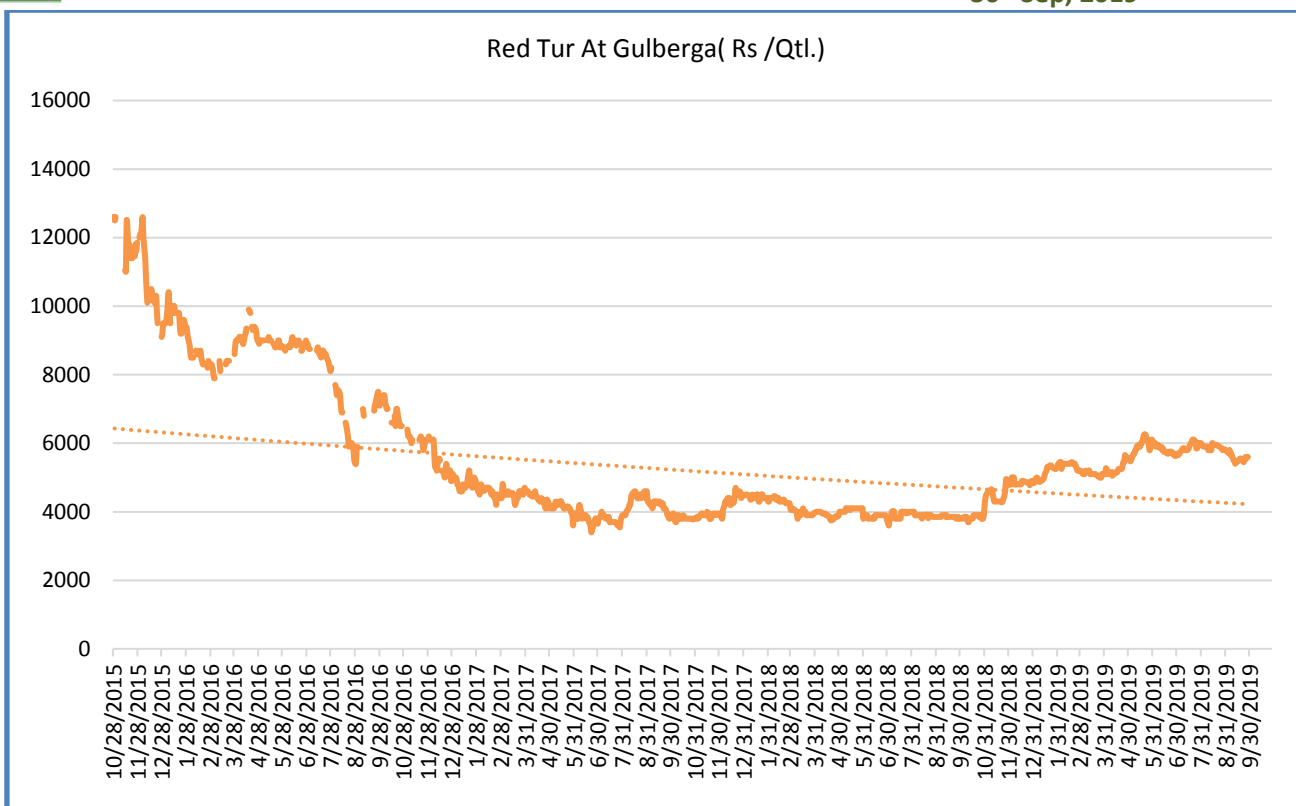

Pigeon Pea (Tur/Toor):
Market Recap:

At planting front Indian farmers have covered 45.82 lakh ha as on 27th Sep-2019. It is up by 0.16% from last year. Normal area till date is 43.71 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 2.02%, 0.04% and 0.02% respectively. Even A.P. area increased by 0.07 % to 2.27 lakh ha so far. However, area in Maharashtra and M.P. is running behind by 0.27 and 1.19%. With good rainfall overall area is expected to touch 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. With good rainfall overall area is expected to touch of 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Improvement in acreage, good showers in producing region and govt's intention to release old stock may cap uptrend in coming weeks. Short fall in production last year is likely to be compensated by 4 lakh MT import through private channel and 1.80 lakh MT through govt.'s channel. So any short fall in open market is unlikely before new crop hits Indian market in December. Crop condition in Myanmar is good to excellent so far. So, supply side seems balanced. Myanmar is offering lemon tur at \$675 per MT basis Indian port. Demand in domestic market is normal against supply. Nafed still has over 7.5 lakh MT tur. So, any spark in price is unlikely. Tur in Gulberga market is being traded at Rs 5500-5525 per qtl and it may trade down by Re 100 more unless heavy rains in growing regions wash out the standing crop.

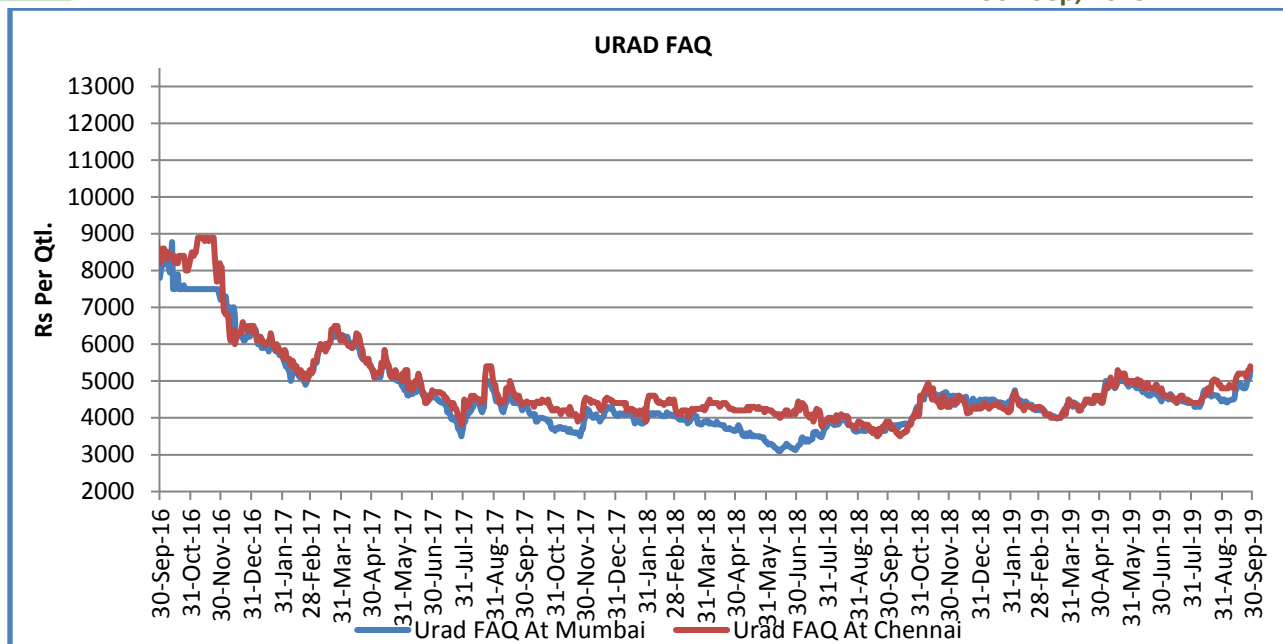

Markt Outlook: Tur market may trade steady to steady to slightly firm with higher import quotes and restricted releales from central pool amid improving demand.

Black Matpe (Urad):

At planting front area coverage has improved from last week with current showers of rains in major kharif urad growing belts like Madhya Pradesh, Uttar Pradesh, Rajasthan and Gujarat despite some losses by recent flooding and rains. Indian farmers have covered 38.83 lakh ha so far against 39.56 lakh ha last year as on 27th Sep-2019. It is lower by 1.85 %. Normal area under kharif urad is 30.77 lakh ha. In MP it is running up by 6.31 % to 16.50 lakh ha against season's normal of 10.67 lakh ha. Even situation in UP too has improved now and farmers have covered 2.02 % higher area to 7.02 lakh ha so far. Area is down in Rajasthan by 2.2.41% to 4.61 lakh ha against 4.72 lakh ha last year. As south Indian states are minor from kharif urad point of view, up and down in area in these regions would not impact overall crop size much. Normal area in AP is 0.37 lakh ha and it has covered only 0.09 lakh ha so far. Even in Telangana farmers have covered 0.23 lakh ha against normal of 0.30 lakh ha.

Current Market Dynamics & Outlook:

Market has adjusted the impact of flood loss, and opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Govt would procure urad at Rs.5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 5000, in Chennai it is being traded at Rs 5300 per qtl. Cash market may increase by Rs 100-150 more in coming weeks. New Urad from Gujarat and Maharashtra would hit market in Oct

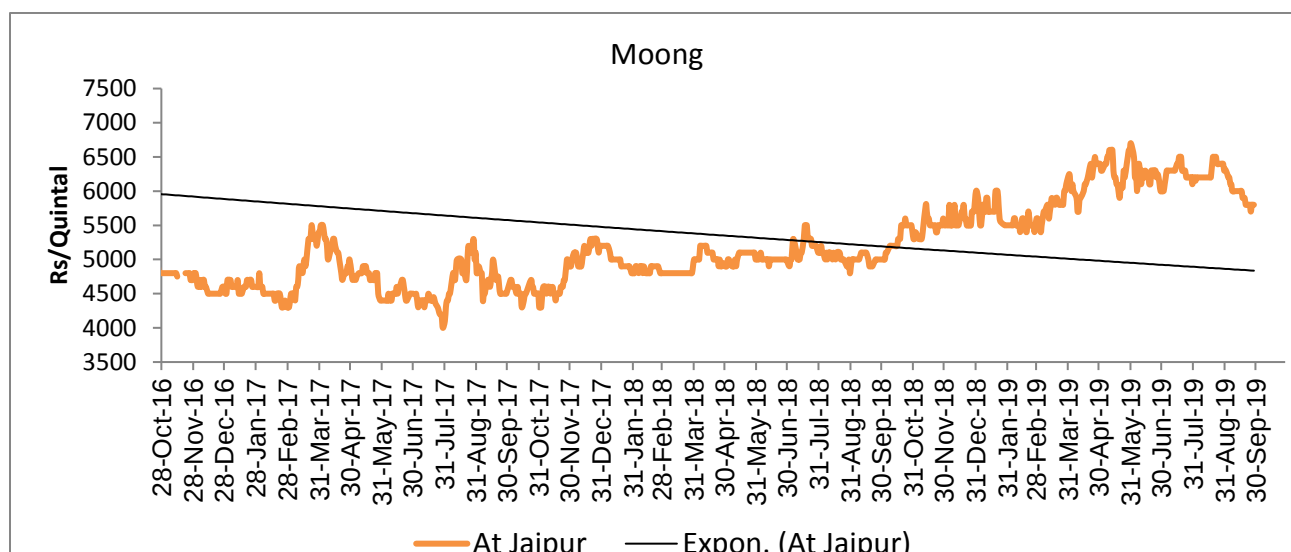

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum this week

Green Gram (Moong):

Market Recap:

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP, was lower. So, moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 5800. It may move down further by Rs 100-200 from current level as arrival started increasing.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Oct.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4350 to 4600 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4400 with the first target of 4500 and second target 4650 with stop loss at 4300 level.

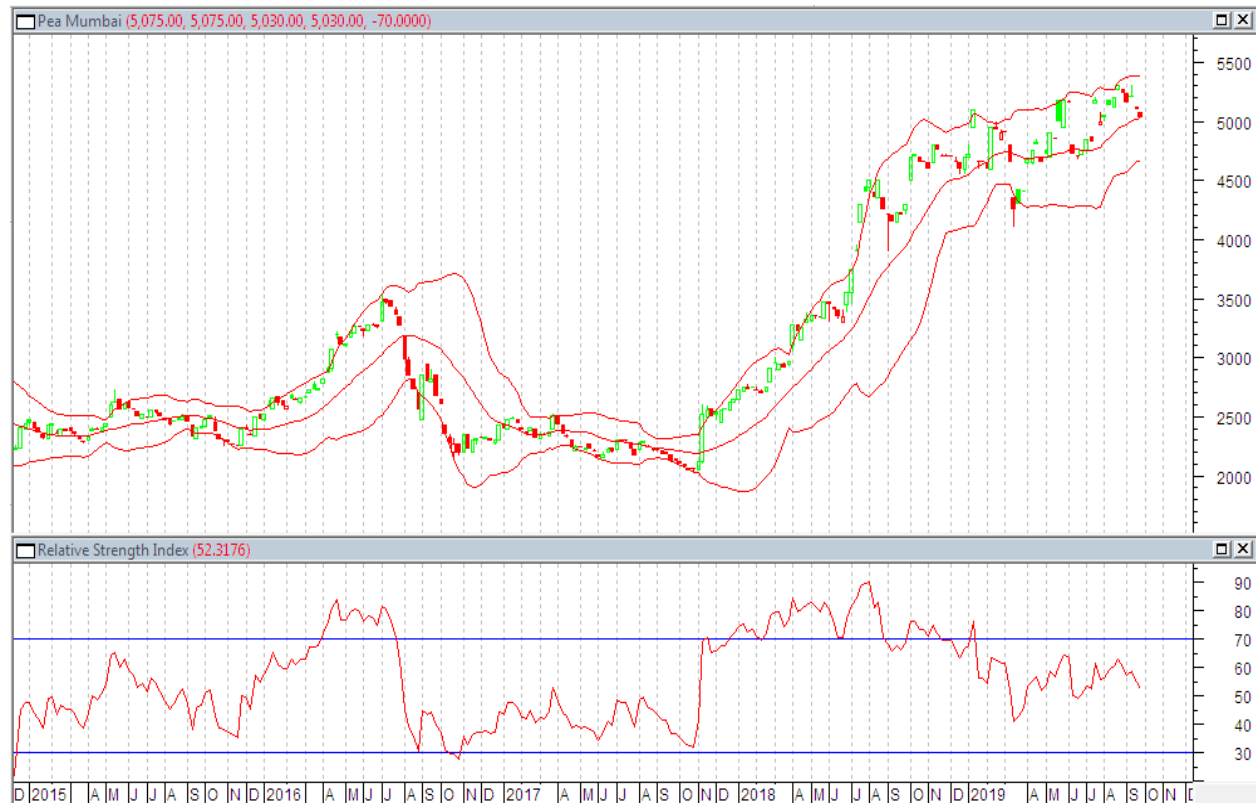

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4200	4300	4450	4600	4750

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to notice weak movement in this week due to weak chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. It may lend support to pea market if chana starts improving if illegal import flow is restricted.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4900-5350 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4950 with the first target of 5150 and second target 5250 with stop loss at 4900 level.

Support & Resistance
