Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Tur coming into various markets is said to be of poor quality and it is affecting tur cash price** despite slower pace of arrivals. As quality is poor, trade in Maharashtra and Karnataka markets is taking place at lower level. Arrival in Latur market has decreased to 150 bags only. Stock in private hands is coming down. Besides, demand for tur dal is sluggish and Nafed too is planning to sell it as new crop is only two months away. Market participants are of the view that declining stock may push up tur price to a certain extent before new arrival. As crop condition is good, production size may increase further. Import flow continues and it would continue to restrict tur price. In near to medium term tur may trade 5400-5800 in Gulberga market. Myanmar is quoting lemon tur at \$635 right now. So any spike in tur market is unlikely.
- **Recent loss and strong demand for stocking purpose amid seller's unwillingness to sell have lent support to cash urad market.** Virtually, sellers have disappeared from market and farmers too have restricted selling. Besides, import flow is lower. So there is a short supply like situation in the market and it is pushing up cash market continuously. The largest producing state like MP have lost 15-20% crop while 30% quality of crop is of inferior quality. Arrival is 90 % lower than last year. Even in other states like Raj, U.P & MH quality of crop is average. All these factors have lent massive support to cash urad market. If stockiest/farmers continue to restrict sale, urad may move up further by Rs300-400. However, at current level stockiest may prefer to release stock by end Oct as around 75-80 thousand MT urad is expected to hit Indian ports by the end of this month. If govt. allows additional 1 to 1.5 lakh MT, as has been demanded by dal mills associations/traders, it may decrease, otherwise it may move further up by Rs300-400.
- **Moong too may continue to trade firm as Procurement by Nafed commences in Tamil Nadu, Telangana & Maharashtra.** It is likely to begin soon in M.P., Rajasthan and Gujarat. It has procured 25.75 MT in Tamil Nadu and 3285 MT in Telangana. Nafed sold 470 MT moong in Rajasthan at Rs 6401 per qtl. It was sold in Gujarat at Rs 6285 per qtl. Nafed still has 95989.34 MT moong in its stock. Out of it rabi share is 18281.14 MT. As procurement is on, moong may continue to trade firm despite new arrival in Rajasthan is yet to pick up. There is a short supply of quality moong. So stockiest should buy when it comes down by Rs 200-300 on arrival pressure. Poor quality of moong coming into mandis may check one way uptrend in coming weeks. Farmers are selling moong to private trades due to quality issue and set parameters for govt.'s purchase. Overall trend in moong market seems firm until procurements come to an end. In Jaipur market moong is being traded at Rs 6000-6200.
- **Chana cash market traded firm on good buying support from millers and besan udhyog.** Dal demand in retail market have improved. As stock in private hands is coming down and sales by Nafed remains restricted, chana traded firm. In Delhi market it is being traded at Rs 4375-4400 and may move up to 4600-4700. Sowing is about to start from 20th Oct and demand for seed too would continue. So, cash market it expected to trade firm. At MSP level market may face resistance as Nafed may interfere to cool down price as it has ample stock over 1 MMT. So any spike is unlikely in chana market. Normal trade is expected in chana cash market. This year sowing is expected to cross last year level as water availability is higher. Besides, Import volume is increasing from LDC (least developed countries), however, it would not affect overall supply side as volume remains at lower level. Import from major importing countries like Australia, Ukraine would be limited due to higher import duty.
- **Masur cash market may move up due to seed demand, lower availability of quality stock, proposed MSP at Rs4800 for next season and lower than expected yield in Canada.** As import flow is on, upside movement would be limited. Currently, imported masur is being offered at Rs 4000-4100 while in Kanpur it is being traded at Rs4300-4400. It may move up to Rs 4600-4650 in coming weeks. Once demand from Nepal and B'desh improves for Indian lentils, price would move up. Quotes in Canada too is expected as crop size is lower than normal expectation.
- **Pea price remains under pressure as demand remains restricted despite festive season due to higher price and incoming flow of peas through illegal channels.** Stock at ports is negligible and import remains restricted. Consumption season has begun, and prices of green and yellow peas are expected to recover once again. Seeding is about to start by the end of this month. In Mumbai market yellow pea is being traded at Rs 4900-4925. In Kanpur market it is being traded at Rs 5300-5350. Overall tone remains weak in the short term.

International Market:

- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage** declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming** to an end now. Dry pea harvesting is over in 98% area while it is 90 % for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far..
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production** has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Lentils production in Canada is expected to increase from 20.92(2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-29) to 370 thousand ha** in 2019-20. Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha** in 2019-20. However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chickpeas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 144.7 in July to 145.1 in Aug-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

This year area under chana is likely to increase as water availability is higher and farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. After setting aside reserve stock of 1278453 MT, there is an availability of 1132136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4450-4500. If demand improves and Nafed decides not to sell stock, it may move to 4600-4650 maximum. Demand for chana dal is improving. So, it is better to sell Chana at every hike of Rs75-100. Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks. Agriwatch expects chana to trade in the range of Rs4500-4700 in Oct. Stake holders should buy after downward correction and prefer buy & sell trade instead holding it for a longer period.

All India average price for Chana increased by 1.87 percent from Rs 4332 to 4413 per qtl. in Oct-2019. Australian Chana (imported) price too increased by 0.30 percent to Rs4308 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

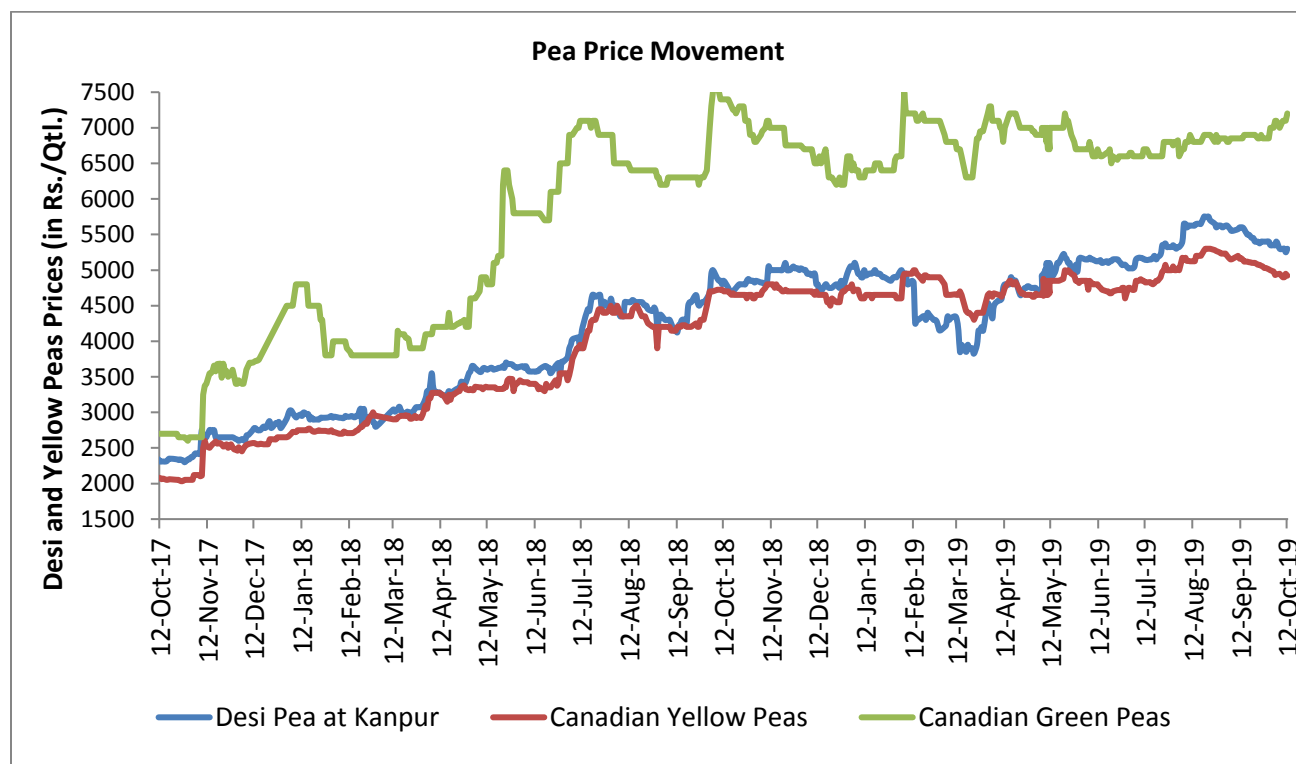

Market Outlook: Slight recovery might be seen in chana cash market this week too as demand started improving with futures trading firm

Peas (Matar):
Market Recap:

Illegal import from B, desh and Nepal has eased availability of peas in domestic market and pressure is likely to continue in coming weeks too. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses except urad are still ruling below MSP. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue move up, govt may consider to relax quota norm in last quarter. However, availability of green peas is almost negligible and it may continue to move up. Sowing of pea is about to begin.

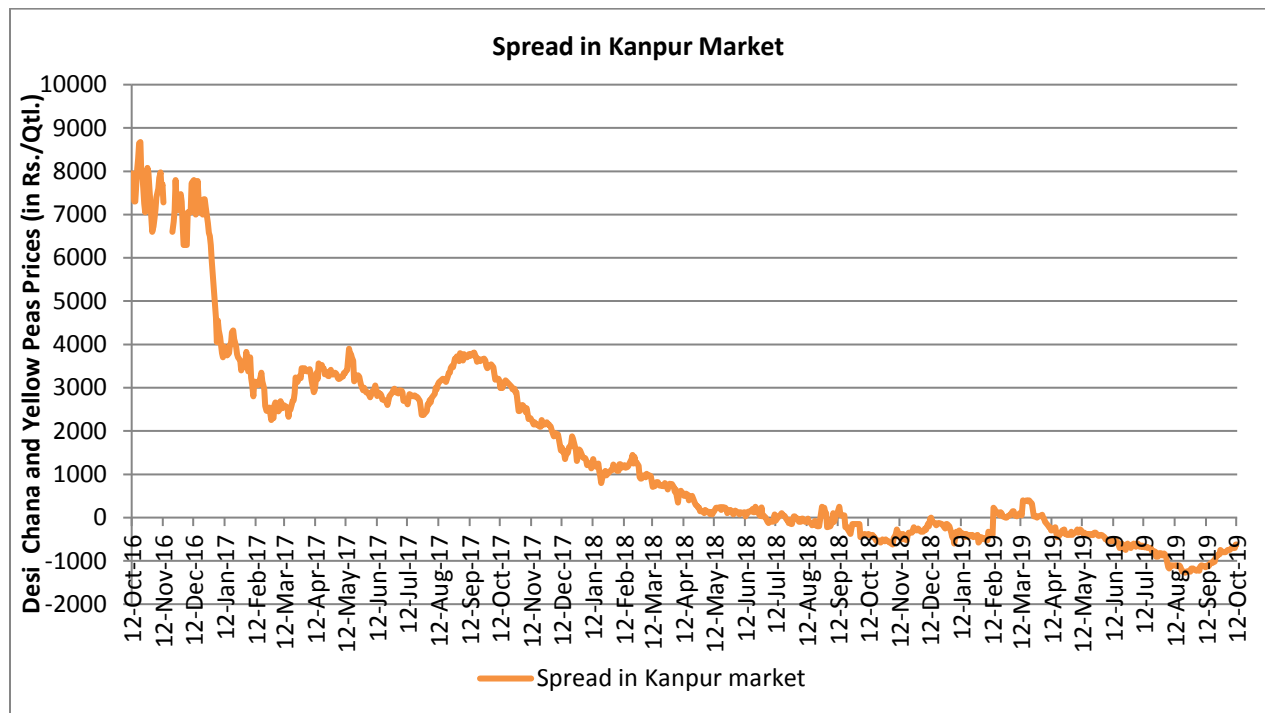

Pea in Mumbai market is being traded down at Rs. 4920, while in Kanpur market it is being traded at Rs 5300 per qtl. As chana price has started increasing, pea too might recover a little bit. Arrival in local mandis has decreased. As, supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from end Oct as demand for seed would increase. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly weak trend may prevail this week.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction and lower availability of imported stock. Kanpur market traded down by Rs 50 to 5300 per qtl due to sale at discounted price by importers and increasing illegal flow of peas. Overall, all India average price decreased by 0.15% to Rs 5610 per qtl in 1st week of Oct. In Mumbai market, pea traded at Rs 4920, down from Rs100 last week. More down ward trend seems limited. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs900 to Rs 625 due to decreased pea price and improved chana price.. Spread is expected to remain in the negative zone in Oct too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too..

MarketOutlook: Outlook remains steady to slightly weak this week too.

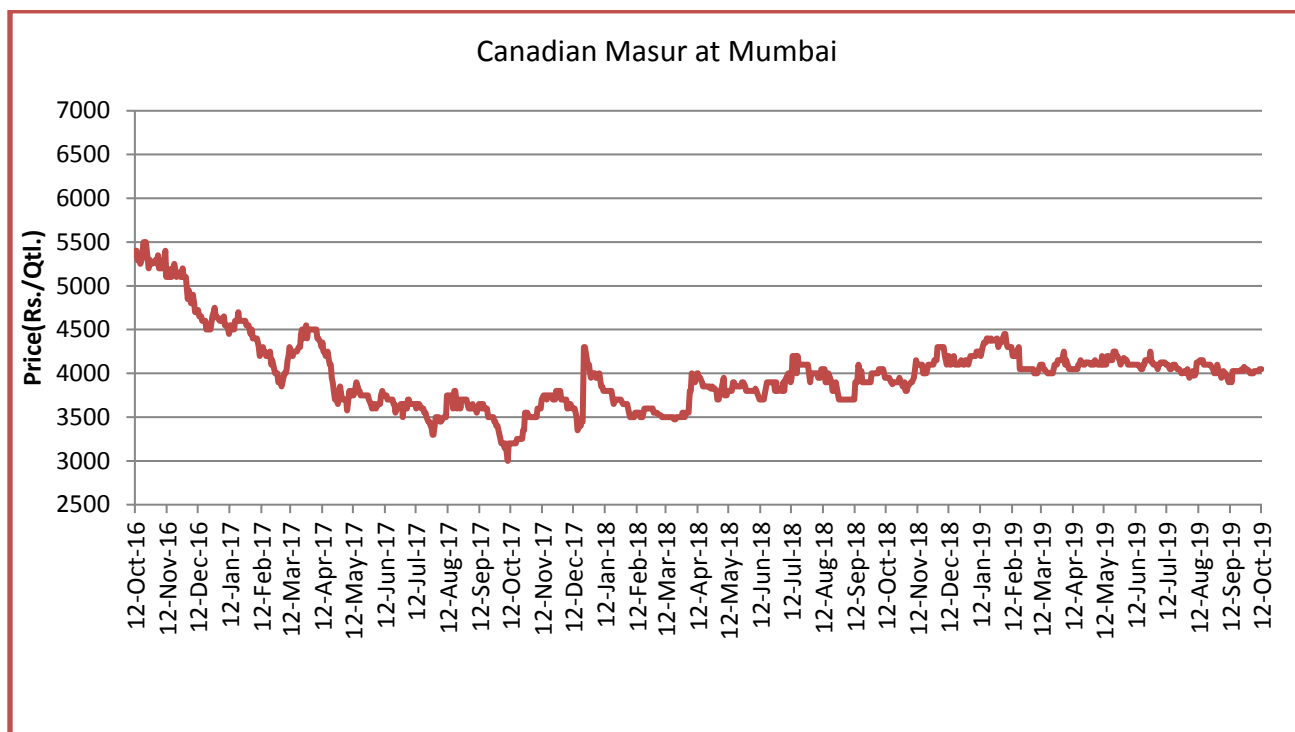

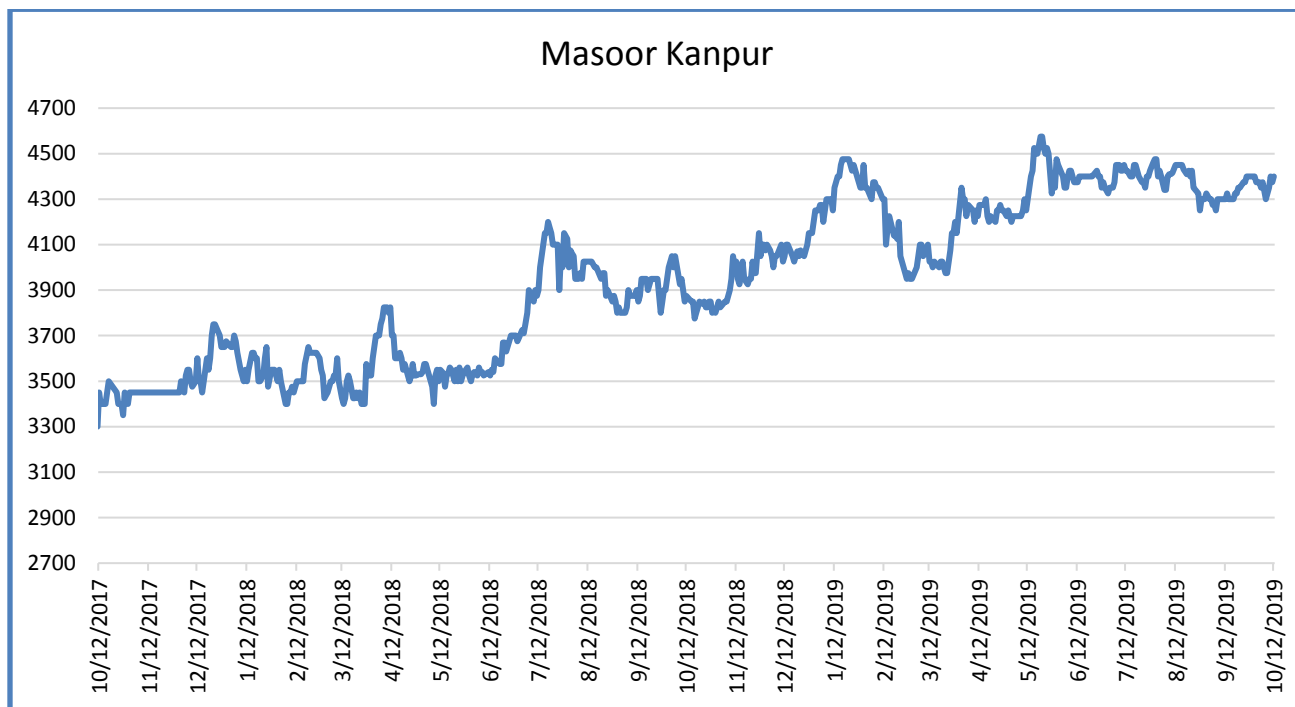

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. However, proposed higher MSP (4800) may support cash market in the third quarter of the year. Nafed still has 2.01 lakh MT old and new stock. So, supply side seems balanced.. Prices of other pulses too may support lentil market as firmness starts with help of improved demand.. However, prices in global market is lower, so import duty remains ineffective. So any major spike is unlikely in Oct. Lentil vessel is being quoted at Rs 4000-4100 per quintal and container is being quoted at Rs 4200-4250 per quintal. In Kanpur market it is being traded at Rs4300-4325 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs4150-4450 in Oct

Current Scenario:

In Oct-2019, average price in key market Kanpur was down slightly by 0.24 % from Rs 4350 to Rs 4320 per qtl. MoM basis. Prices are likely to trade steady to slightly firm in Oct too.

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand for seed and mills. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

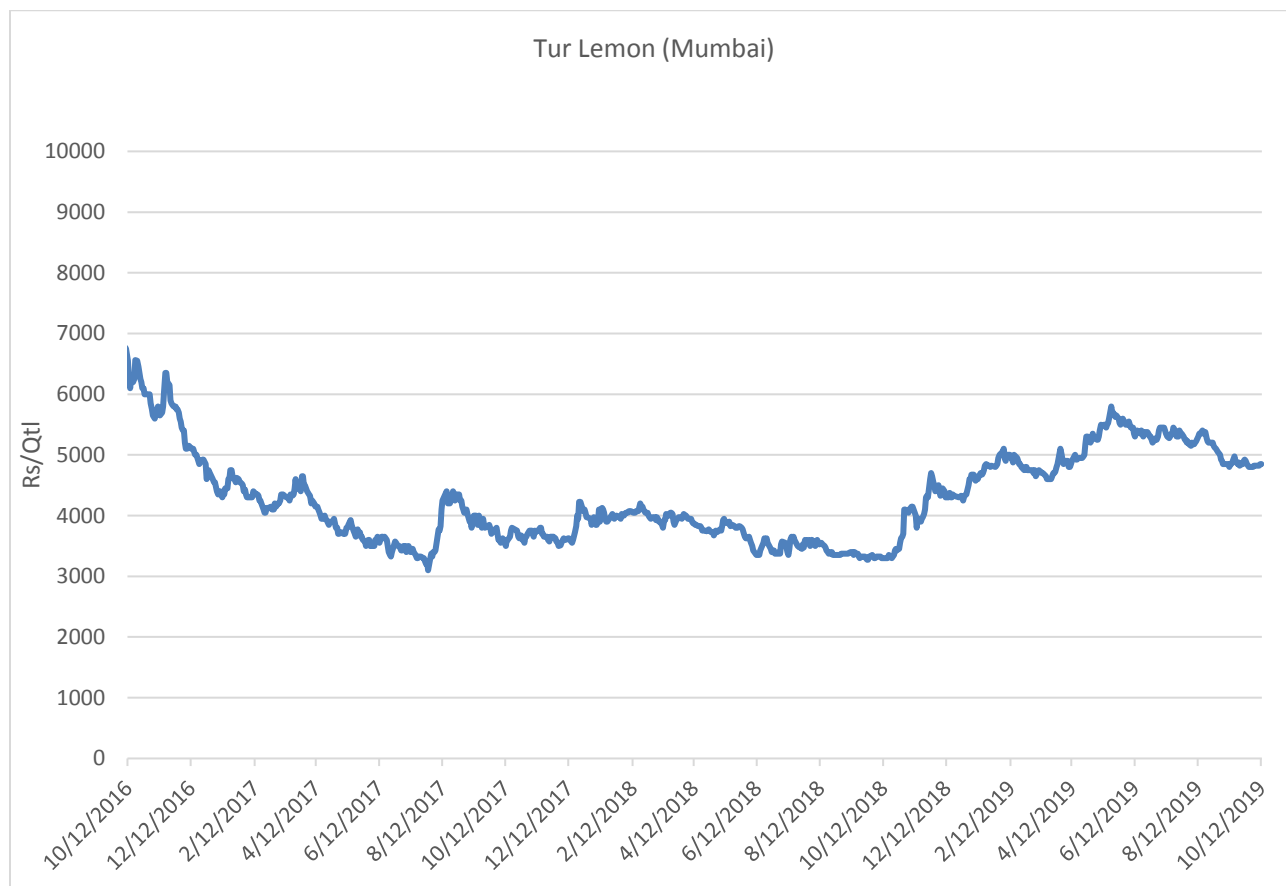

Pigeon Pea (Tur/Toor):

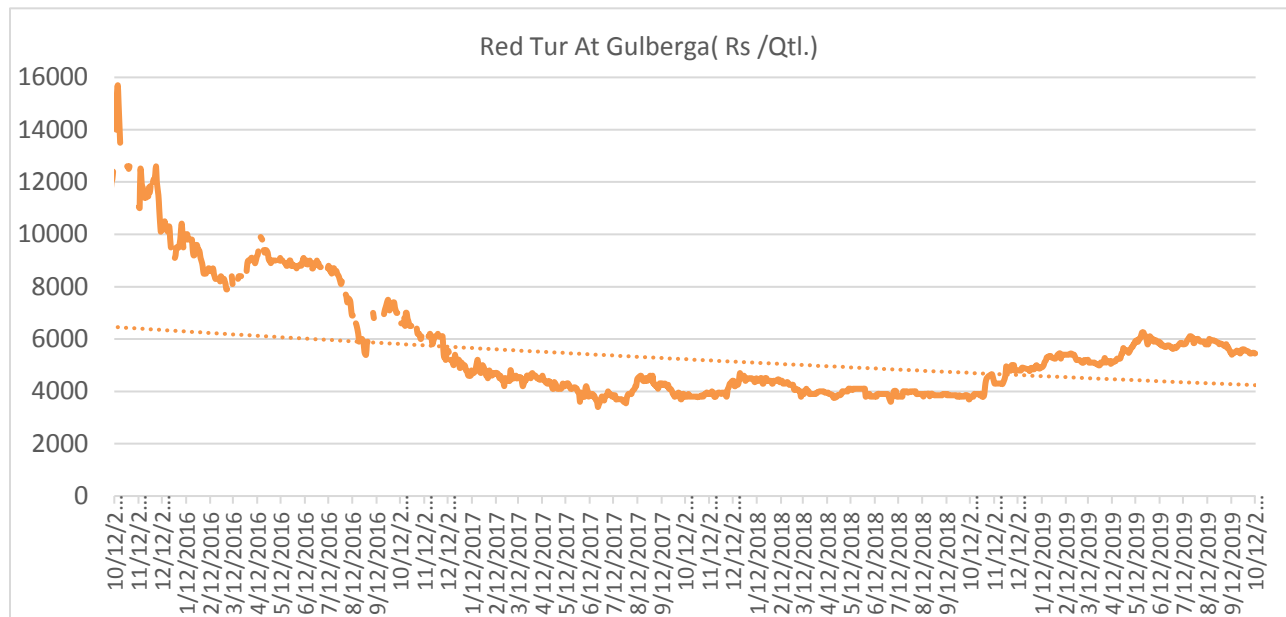

Market Recap:

At planting front Indian farmers have covered 45.82 lakh ha as on 27th Sep-2019. It is up by 0.16% from last year. Normal area till date is 43.71 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 2.02%, 0.04% and 0.02% respectively. Even A.P. area increased by 0.07 % to 2.27 lakh ha so far. However, area in Maharashtra and M.P. is running behind by 0.27 and 1.19%. With good rainfall overall area is expected to touch 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. With good rainfall overall area is expected to touch of 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak on the back of lower demand at higher level. Availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, any spike in tur market is unlikely. New crop would hit Indian market in Dec and govt has enough stock to handle next three months demand.

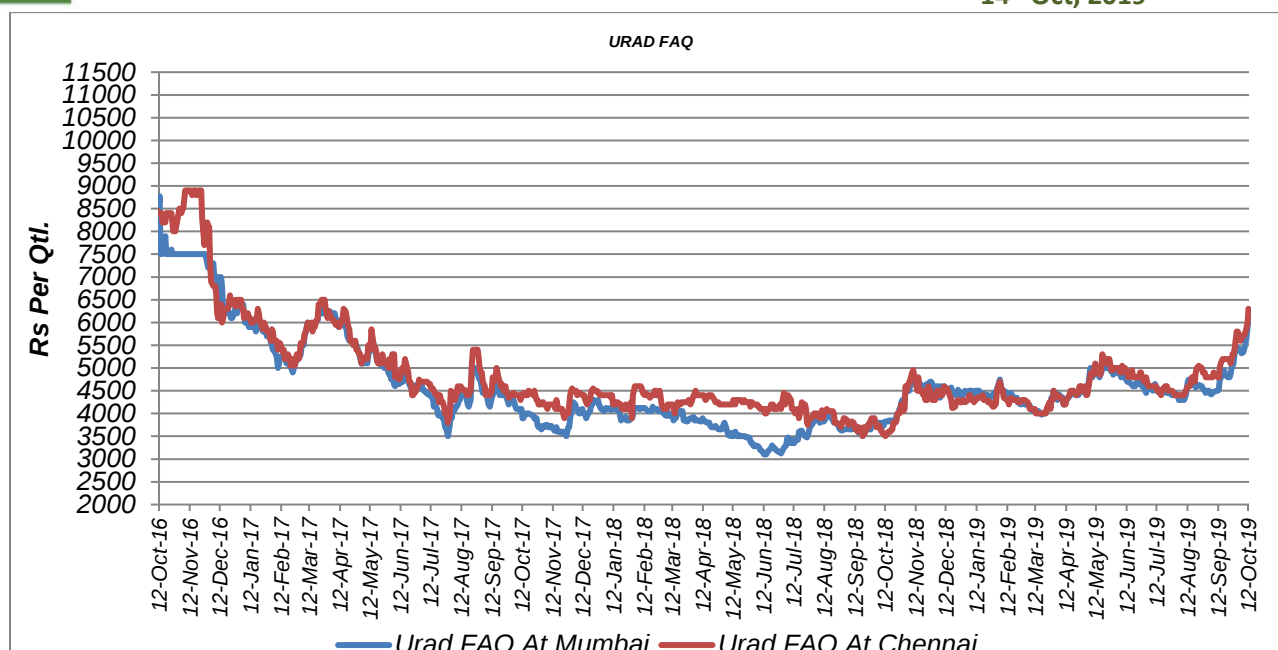

Markt Outlook: In Sep-2019, average price in Gulberga market was down in first week of Oct from 5550 to Rs 5450 per qtl. due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in Sep. Tur price in Oct is likely to move down. By Rs 100-150 more.

Black Matpe (Urad):

Recent loss and strong demand for stocking purpose amid sellers unwillingness to sell have lent support to cash urad market. Virtually, sellers have disappeared from market and farmers too have restricted selling. Besides, import flow is lower. So there is a short supply like situation in the market and it is pushing up cash market continuously. The largest producing state like MP have lost 15-20% crop while 30% quality of crop is of inferior quality. Arrival is 90 % lower than last year. Even in other states like Raj, U.P & MH quality of crop is average. All these factors have lent massive support to cash urad market. If stockiest/farmers continue to restrict sale, urad may move up further by Rs 300-400. However, at current level stockiest may prefer to release stock by end Oct as around 75-80 thousand MT urad is expected to hit Indian ports by the end of this month. If govt. allows additional 1 to 1.5 lakh MT, as has been demanded by dal mills associations/traders, it may decrease, otherwise it may move further up by Rs 300-400.

Current Market Dynamics & Outlook:

Market has adjusted the impact of flood loss, and opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Governmentt would procure urad at Rs. 5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 5800, in Chennai it is being traded at Rs 6000 per qtl. Cash market may decrease first before it moves up further. New Urad from Gujarat and Maharashtra would hit market in Oct

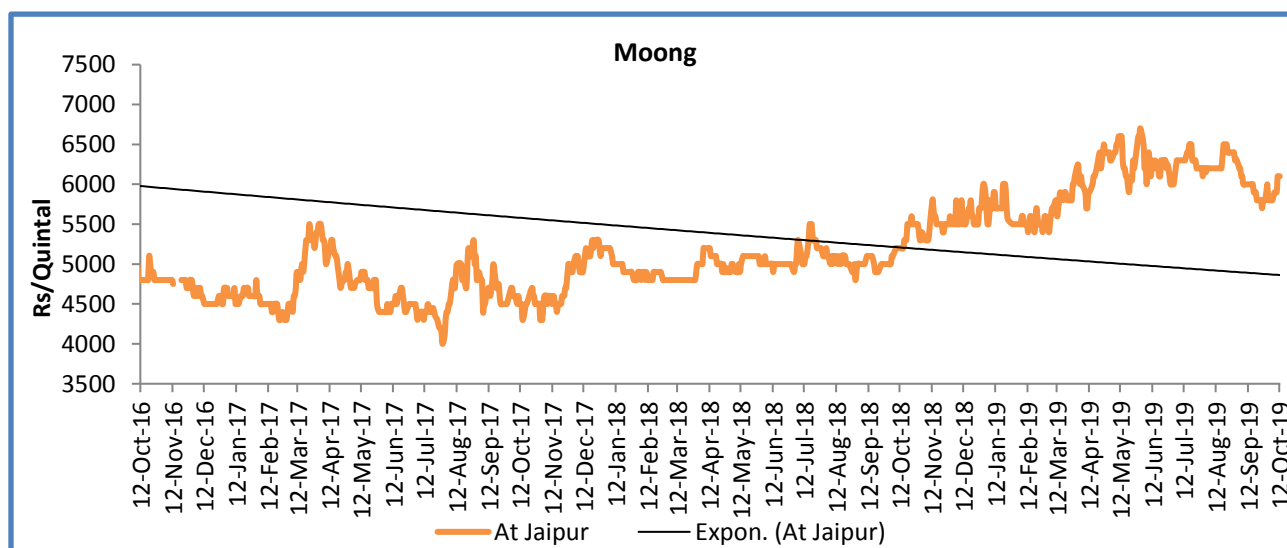

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum but not before a downward correction.

Green Gram (Moong):

Market Recap:

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP, was lower. So, moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 5800. It may move down further by Rs 100-200 from current level as arrival started increasing.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Oct.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4400 to 4650 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4600 and second target 4650 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4400	4550	4650	4700

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to recover slightly in this week due to firm chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. It may lend support to pea market if chana starts improving if illegal import flow is restricted.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4800-5350 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4800 with the first target of 5000 and second target 5050 with stop loss at 4700 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4700	4800	4920	5300	5450

Masoor:
Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

Technical analysis:

Chart depicts steady to firm movement in the market.

RSI oscillator is moving up in neutral region.

Expected price range is 4300-4550

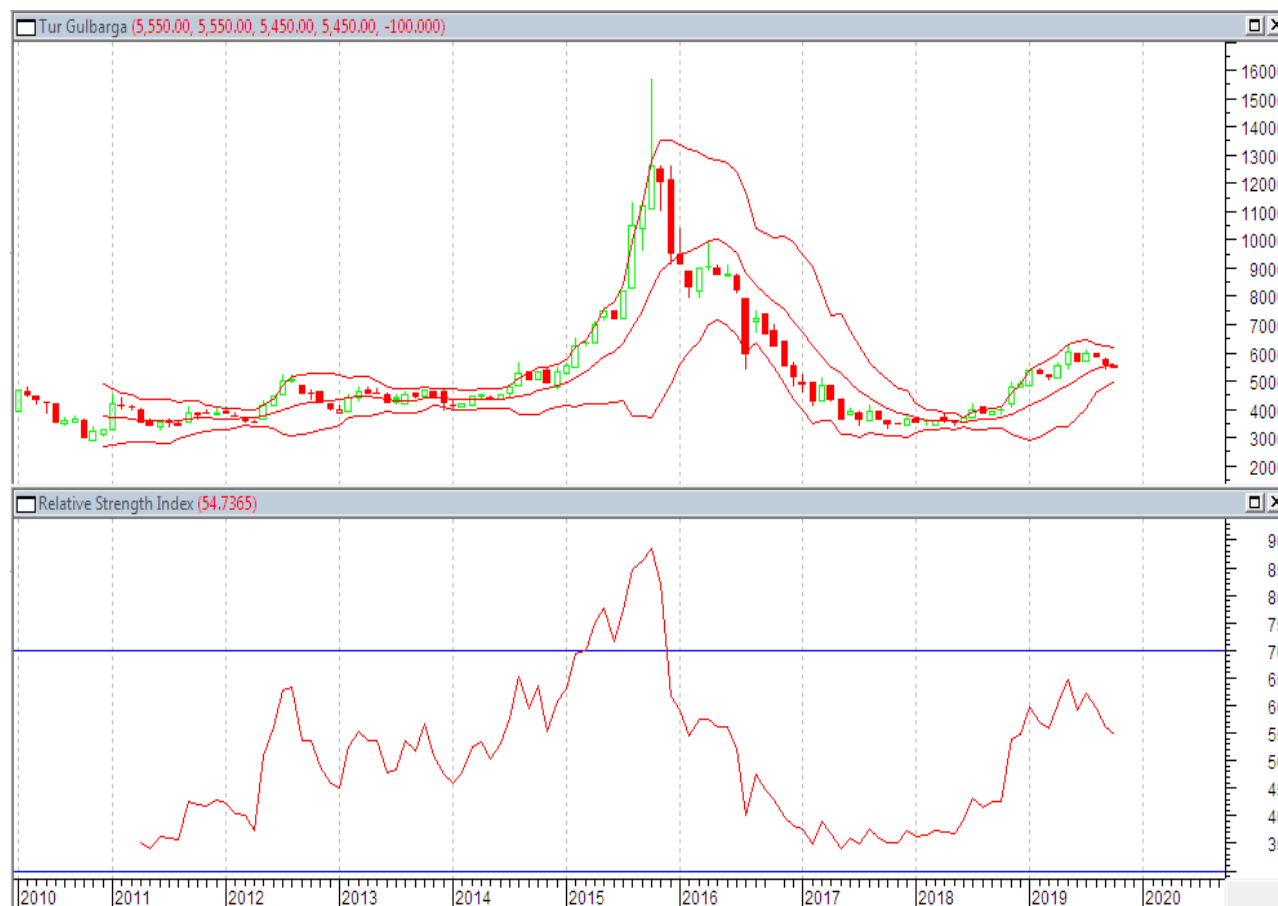

Strategy: Buy on dip:

Trade Recommendations: Buy around 4350 with the first target of 4450 and second target 4500 with stop loss at 4250 level.
