Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **No major change in tur sentiment is expected for the week.** *Cash market traded almost steady due to continuous holidays. Lower than expected import and possibility of 15 days delayed arrival this year amid no auction by Nafed till now despite over 8 lakh MT stock in its hand may support tur market in coming weeks. Crop size is expected to be around 36-37 lakh MT, slightly higher than last year. So supply and demand side seems balanced right now. If govt. extends time line for 4 lakh MY import from 31st Oct to 30th Nov-2019, upward momentum might be restricted. New crop in India is likely to hit in Dec while new crop from Myanmar would be available in January. So, it is unlikely to develop any tight supply side. Nafed has to procure tur in the new season too, so it may start releasing at least 50% stock before Dec. In Gulberga market tur is being traded at Rs 5500-5550. It may move up to MSP, or slightly higher than MSP. So any spike in tur price is unlikely. It may trade in the range of Rs5500-6000 in Nov-Dec.*
- **Sentiments in urad cash market remain firm despite increasing arrivals in markets.** *Due to three-four holidays last week trade volume remains restricted and prices stayed almost flat. Stockiest's unwillingness to sell old stock & active buying continue to push urad price up. Crop loss in MP and Rajasthan, quality loss and slower pace of import remain supportive to urad market.. All these factors would remain supporting to urad price. In Mumbai market imported urad is being traded at Rs 6400-6450 while in Chennai market it is being offered at Rs 6500-6550. In MP market it is available at Rs 6200-6300. Arrival in all major markets are lower. So, urad price is expected to move up further by 200-300. At this price govt.'s procurement would decrease considerably. However, Nafed still has 2.31 lakh MT old stock and it would continue to release stock to contain price. In extreme price rise condition govt has option to enhance import limit. Burma is offering FAQ urad at \$655 while SQ at \$760 per MT. If govt relaxes import quantity, current rise might be limited. Overall, short term outlook seems firm.*
- **Rajasthan govt is gearing up to procure 3 lakh MT moong on MSP this season from kharif crop.** *Procurement is likely to commence from 1st Nov. It would push moong market further up by 300 to 400 per qtl. In Jaipur market moong is being traded at Rs 6200-6400 per qtl. As quality loss is higher and traders have restricted selling sensing firm momentum in coming weeks, cash market price is bound to go up. Besides, there is no parity for import as availability in Myanmar is lower and prices continue to rule higher. Lower crop size, quality loss is likely to remain supportive for moong in coming weeks. Nafed still have 1.16 lakh MT moong. To keep price under check Nafed would continue to release old stock at regular intervals. Availability of water is good this year. So, Agriwatch expects higher acreage in Rabi season. It would make up production loss to some extent. At higher level stockiest would restrict buying in bulk volume. It may check price to move beyond a certain level.*
- **Nafed would continue to release chana in restricted way and would not accept bid below 4400.** *It would keep market well supported at current level. Nafed has 17.34 lakh MT chana in its stock. It may increase sale volume after Nov. It would restrict uptrend. Under prevailing condition any spike in chana cash market is unlikely. Nafed still have 1.7 MMT stock. Nafed would invite tender once in a week on Thursday now. Nafed may prefer to sell chana near 4400. So, any downward trend in chana is unlikely at this point of time. Apart from this demand for besan has improved and dal millers have shown interests in buying at current level. Arrival in markets have already declined while stockiest are waiting for further improvement. Even NCDEX is trading firm. Demand for seed too is visible in the market. Nafed may decide to sell chana in bulk volume from mid-November. It may restrict uptrend in Chana market. As Nafed is on driver's seat, its selling decision would remain crucial for chana price in Nov, Dec and Jan-20. Chana in Delhi market is being traded at Rs4475-4550. It may move up to Rs 4650-4700.*
- **Analysing bulk volume of masur import and for pushing its price up in domestic market,** *govt may increase import duty from 30 to 60 %. If it is notified by concerned ministry, it may push up masur price by 350 to 450 per qtl. MSP for masur is likely to be increased to 4800 as has been proposed in recent weeks. Actually, govt wants to ensure better price for farmers and encourage them to grow more lentils this rabi season. Nafed has 2.06 lakh MT stock. Out of this 1 lakh*

MT has been reserved for unforeseen circumstances. This means Nafed can offer around 1lakh MT for open market. So, under emerging scenario, prices should move up. Sowing is about to begin by the end of this month.

- **Pea price remains under pressure as demand remains restricted despite festive season due to higher price and incoming flow of peas through illegal channels.** Stock at ports is negligible and import remains restricted. Consumption season has begun, and prices of green and yellow peas are expected to recover once again. Seeding is about to start by the end of this month. In Mumbai market yellow pea is being traded at Rs 4900-4925. In Kanpur market it is being traded at Rs 5300-5350. Overall tone remains weak in the short term.

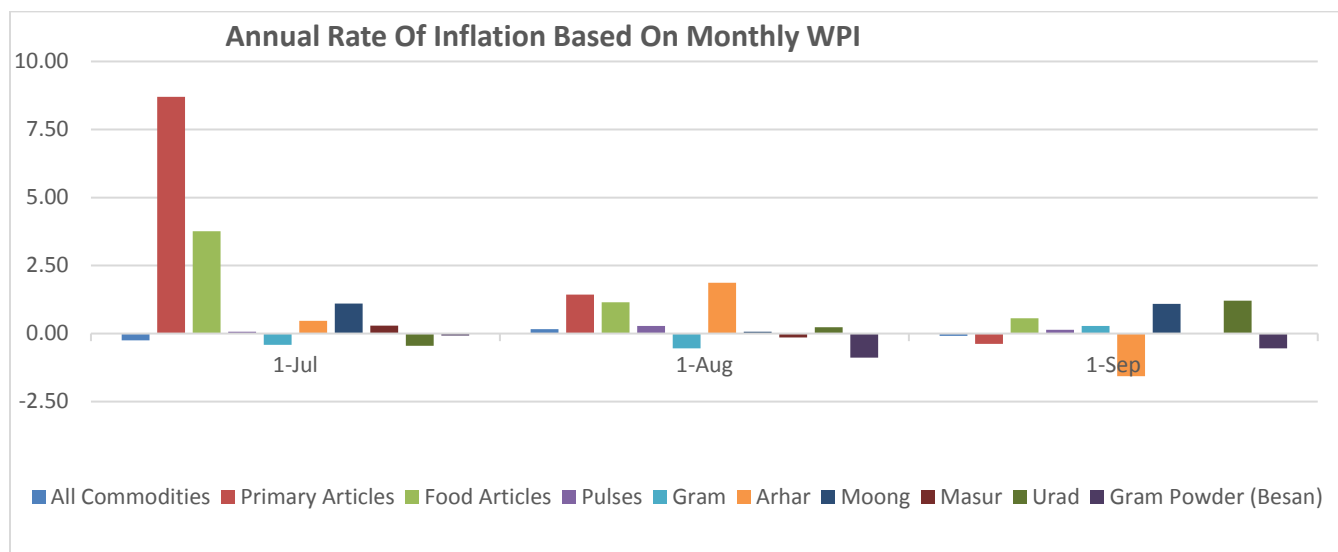

International Market:

- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Chickpeas production in US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting.** Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now.** Dry pea harvesting is over in 98% area while it is 90 % for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far..
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT.** Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Lentils production in Canada is expected to increase from 20.92(2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303(2018-19) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79 % to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **A tentative comparison from last year shows that carryover stocks in US are high for all peas, lentils, and chickpeas.** Dry pea stocks are up 2% to 204,117 MT, lentils are up 81% at 144,242 MT. Large chickpeas are up 310 percent or 113,851 MT, while small chickpeas are up 256 percent, or 43,318 MT. Total chickpeas are up 294% for a total of 157,396 MT as per NASS report.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas

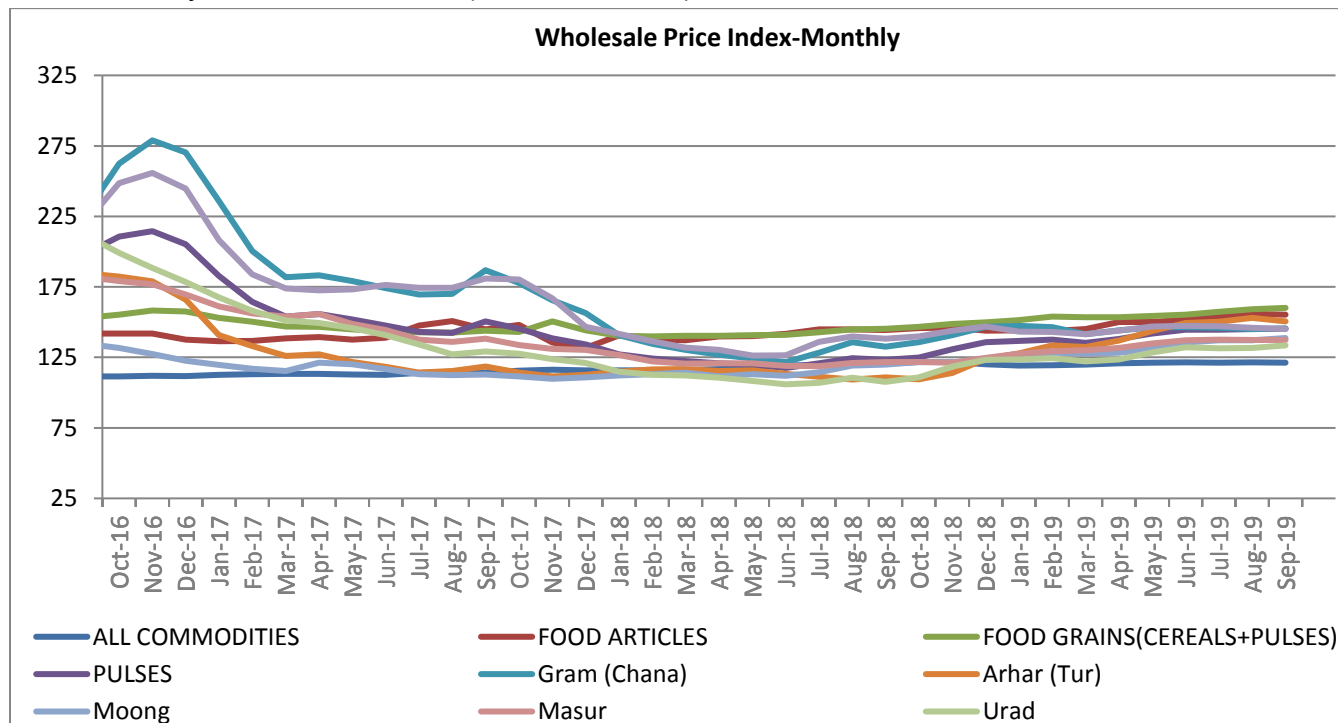

will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.

- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 42points from 145.1 in Aug to 145.3 in Sep-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

Steady to firm sentiments continued in cash chana market. This year area under chana is likely to increase as water availability is higher and farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level in Nov-Dec. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. After setting aside reserve stock of 1278453 MT, there is an availability of 1132136MT with Nafed for sale. In Delhi market chana is being traded at Rs 4500-4550. If demand improves and Nafed decides not to sell stock, it may move to 4650-4750 maximum. Demand for chana dal is improving. So, it is better to sell Chana at every hike of Rs75-100. Stockiest have started releasing old stock amid supply from central pool is bound to increase in coming weeks. Agriwatch expects chana to trade in the range of Rs 4600-4750 in Oct. Stake holders should buy after downward correction and prefer buy & sell trade instead holding it for a longer period.

All India average price for Chana increased by 1.62 percent from Rs 4413 to 4485 per qtl. in Oct-2019. Australian Chana (imported) price too increased by 0.18 percent to Rs4316 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

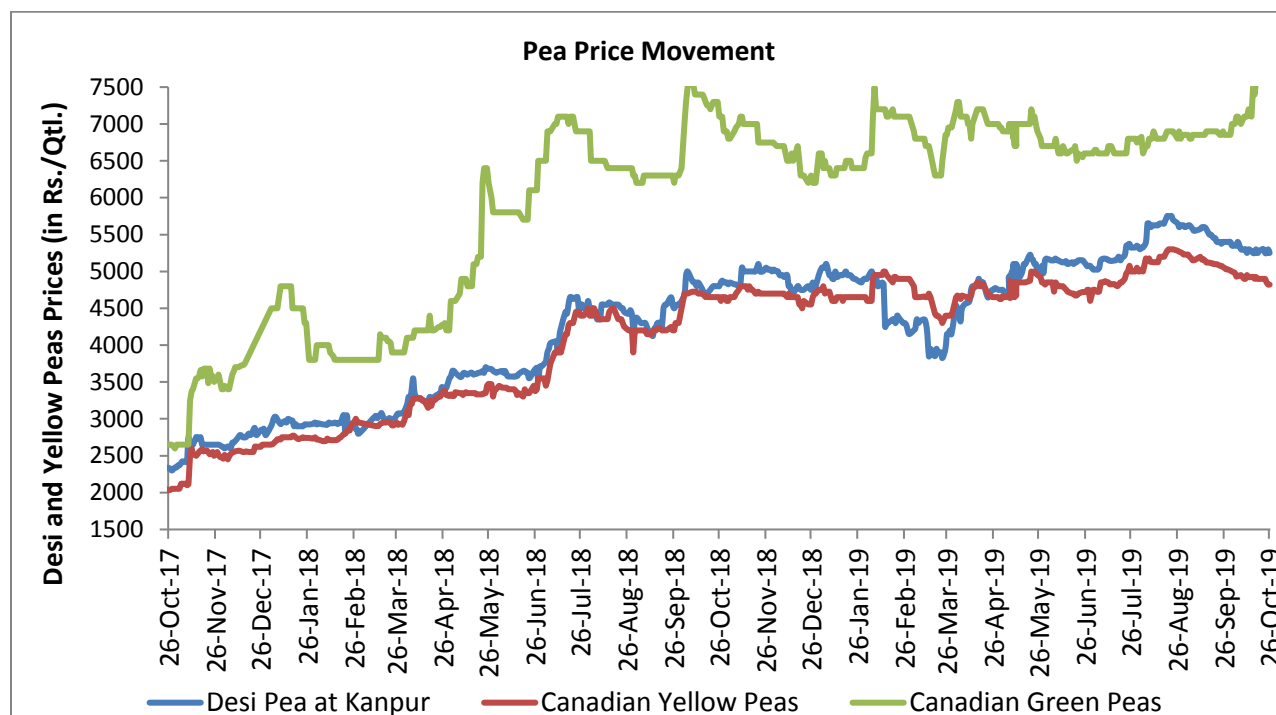

Market Outlook: Slight recovery might be seen in chana cash market this week too as demand started improving with futures trading firm.

Peas (Matar):
Market Recap:

Supply continues through illegal channel from B'desh and Nepal and it has eased availability of peas in domestic market and pressure is likely to continue in coming weeks too. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses except urad are still ruling below MSP. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue to move up, govt may consider relaxing quota norm in last quarter. However, availability of green peas is almost negligible and it may continue to move up. Sowing of pea is about to begin.

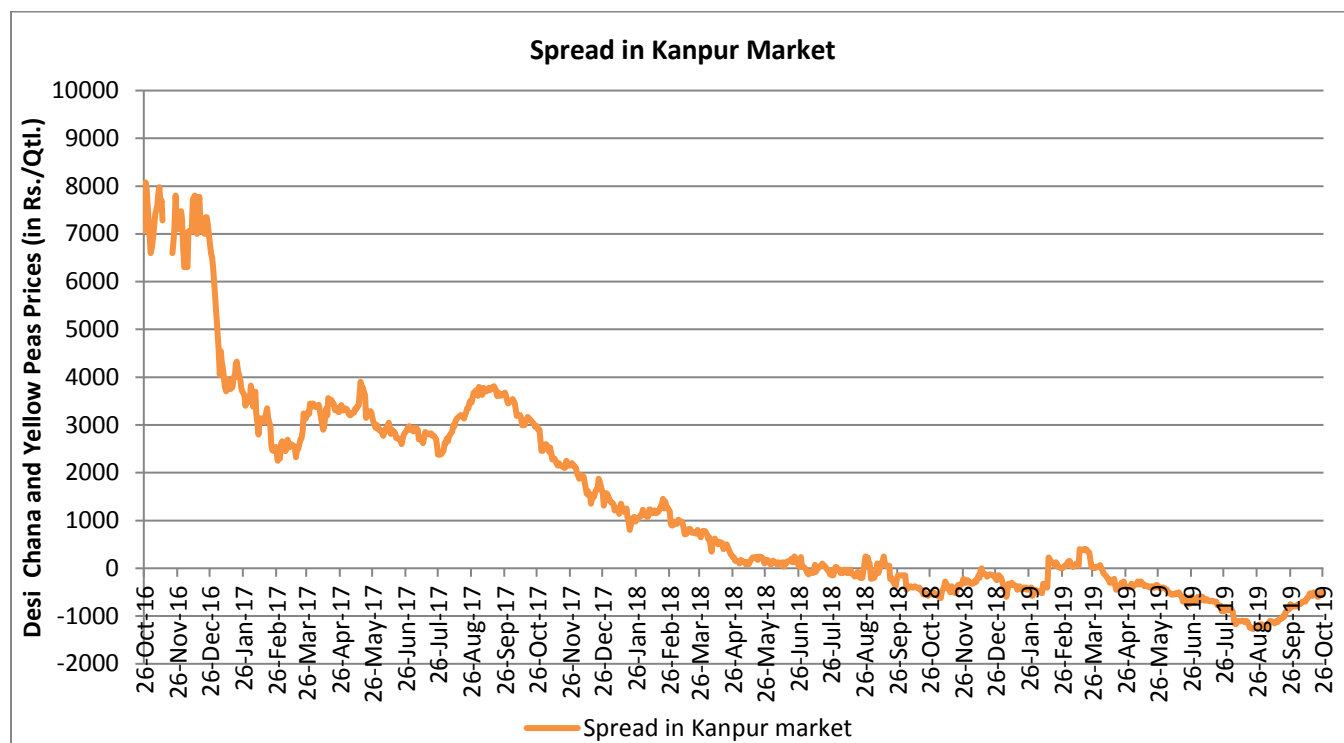

Pea in Mumbai market is being traded down at Rs. 4900, while in Kanpur market it is being traded at Rs 5250-5275 per qtl. As chana price has started increasing, pea too might recover a little bit. Arrival in local mandis has decreased. As, supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from end Oct as demand for seed would increase. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly weak trend may prevail this week. As stock of green pea is at negligible level, prices are increasing.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction and lower availability of imported stock. Kanpur market traded steady at Rs 5300 per qtl due to sale at discounted price by importers and increasing illegal flow of peas. Overall, all India average price decreased by 0.15% to Rs 5610 per qtl in 1st week of Oct. In Mumbai market, pea traded at Rs 4920, down from Rs100 last week. More down ward trend seems limited. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 625 to Rs 525 due to decreased pea price and improved chana price.. Spread is expected to remain in the negative zone in Oct too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too..

MarketOutlook: Outlook remains steady to slightly weak this week too.

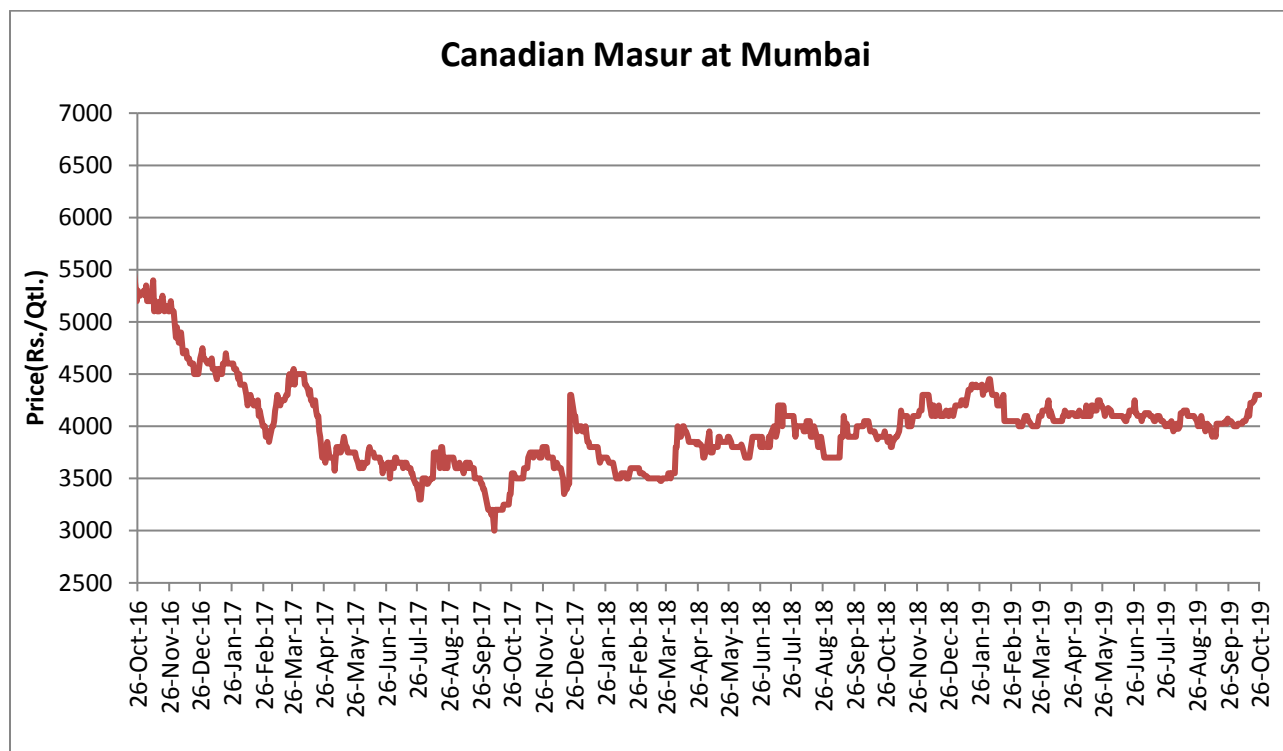

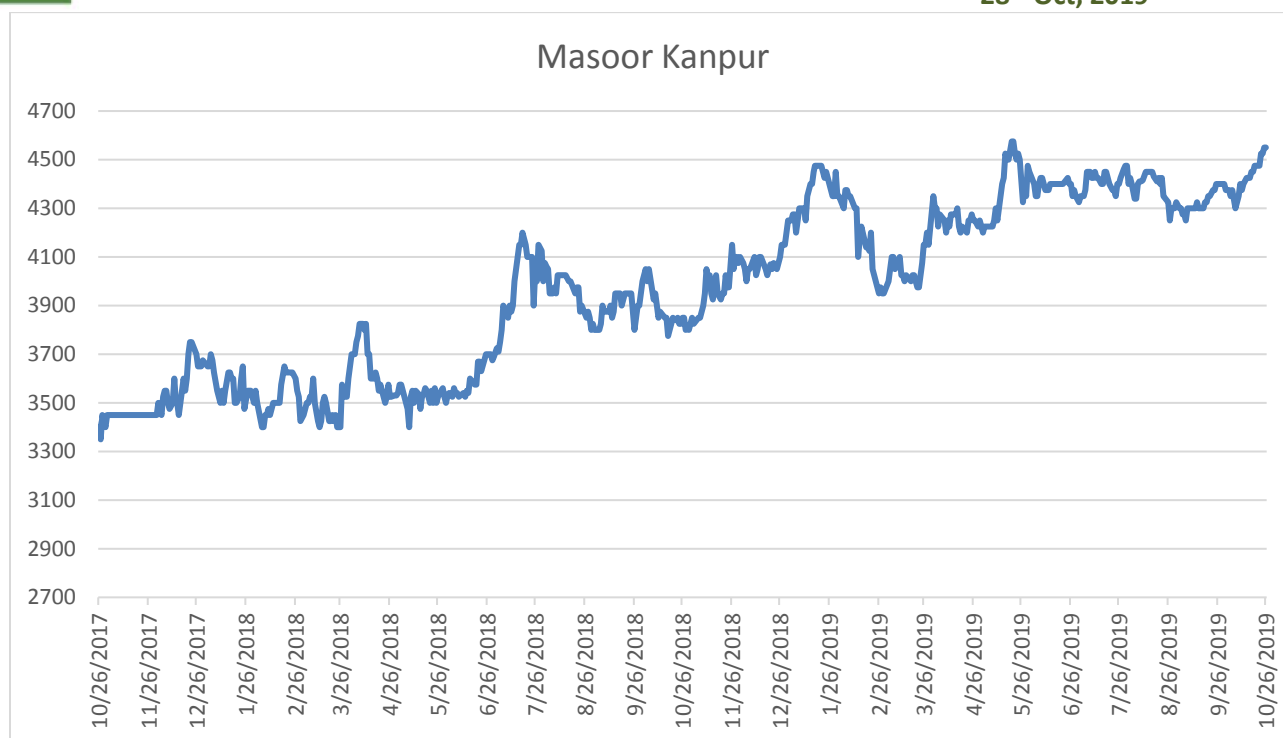

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. However, proposed higher MSP (4800) may support cash market in the third quarter of the year. Nafed still has 2.01 lakh MT old and new stock. So, supply side seems balanced. However, if govt impose higher duty, it may move up to proposed MSP level. Prices of other pulses too may support lentil market as firmness starts with help of improved demand.. However, prices in global market is lower, so import duty remains ineffective. So any major spike is unlikely in Oct. Lentil vessel is being quoted at Rs 4000-4150 per quintal and container is being quoted at Rs 4200-4275 per quintal. In Kanpur market it is being traded at Rs 4400-4425 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs 4350-4550 in Oct

Current Scenario:

In the third week of Oct-2019, average price in key market Kanpur was up slightly by 0.35 % from Rs 4300 to Rs 4425 per qtl.. Prices are likely to trade steady to slightly firm in Oct too.

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand for seed and mills. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

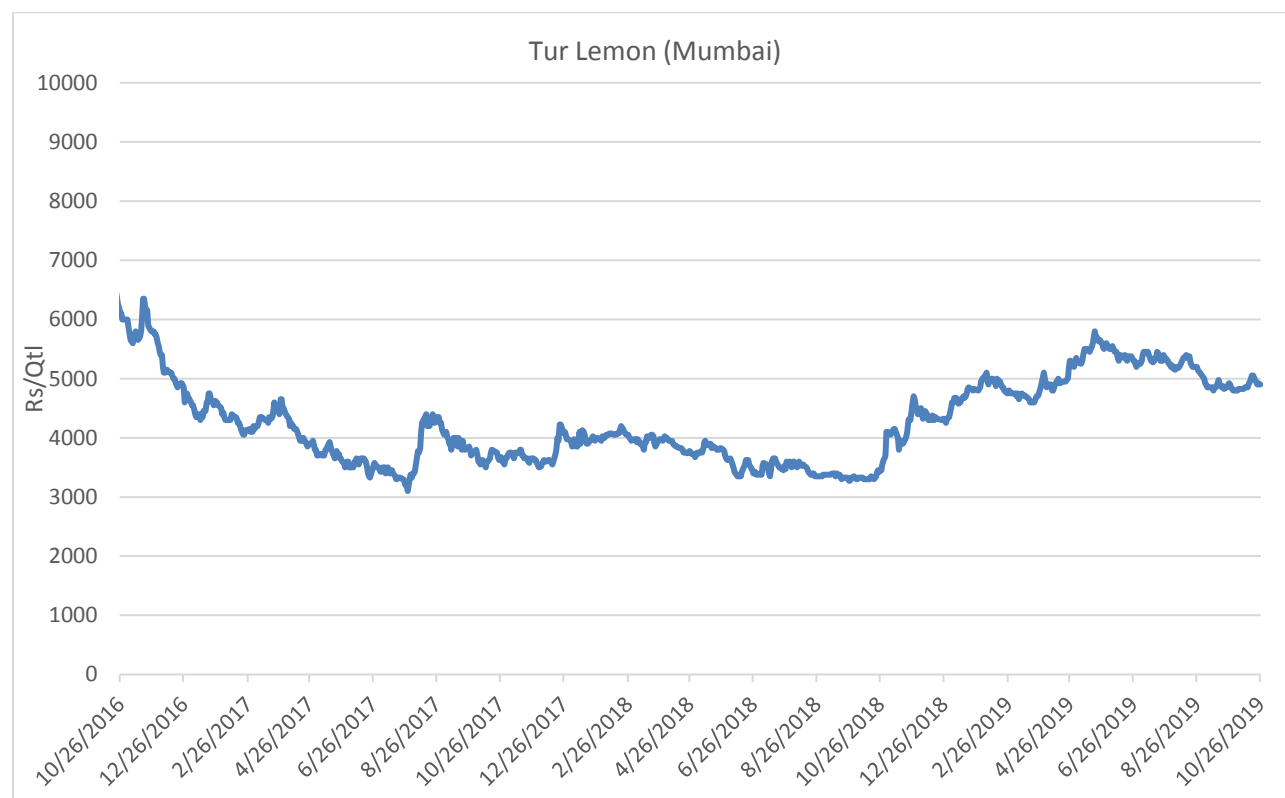

Pigeon Pea (Tur/Toor):

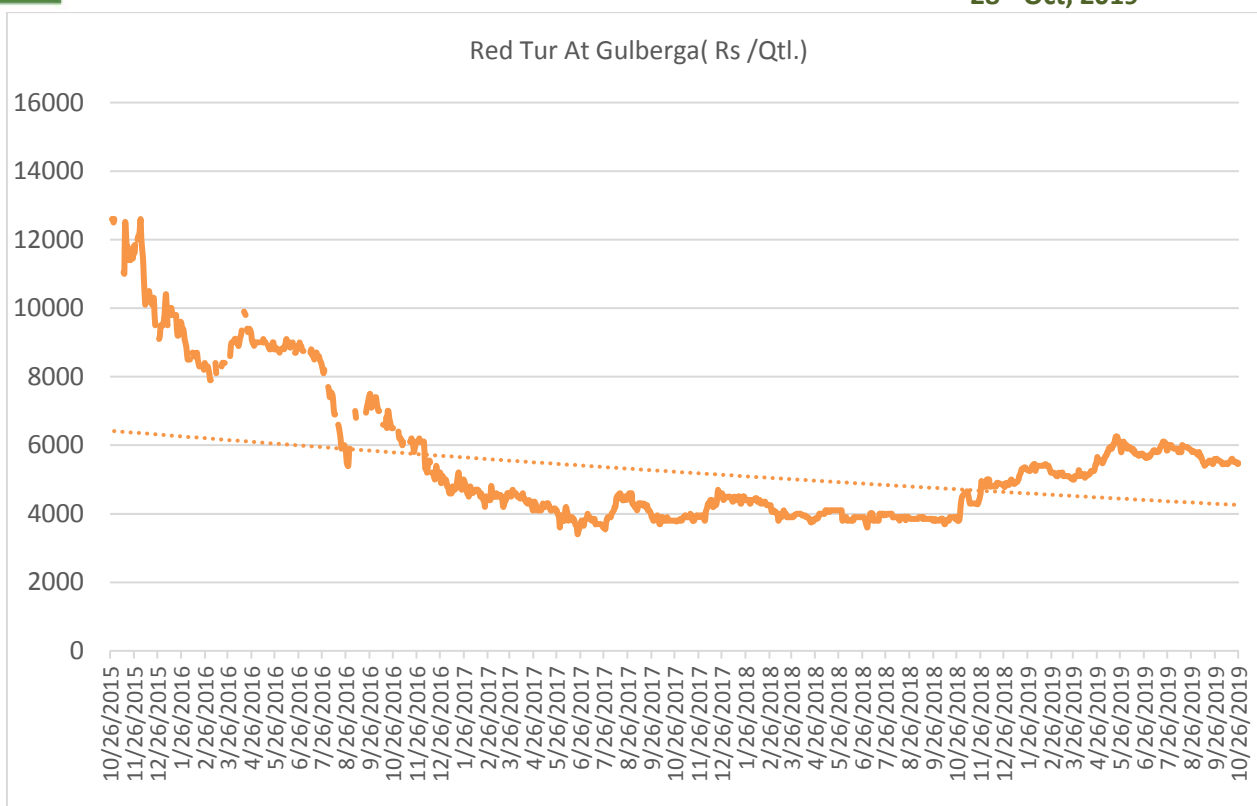

Market Recap:

At planting front Indian farmers have covered 45.82 lakh ha as on 27th Sep-2019. It is up by 0.16% from last year. Normal area till date is 43.71 lakh ha and normal of the whole season is 43.00 lakh ha. Acreage in major growing state like Karnataka, Uttar Pradesh & Jharkhand so far is up by 2.02%, 0.04% and 0.02% respectively. Even A.P. area increased by 0.07 % to 2.27 lakh ha so far. However, area in Maharashtra and M.P. is lower by 0.27 and 1.19%. With good rainfall overall area is expected to touch 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. With good rainfall overall area is expected to touch of 46 lakh ha this year too. The season may end with 46 lakh ha, higher by 3 lakh ha from the normal. Import before 31st October might be over 2 lakh MT. It would restrict upward momentum in coming weeks. Besides govt has over 7.5 lakh MT stock, so any shortage in next four months is unlikely. Stakeholders should sell stock at every rise of 100 from current level.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of improved demand and visible lower stock in physical market. However, availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, slight recovery is expected. New crop would hit Indian market in Dec and govt has enough stock to handle next three months demand.

Markt Outlook: In the third week of Oct-2019, average price in Gulberga market was down by Rs 50 to Rs 5400, due to higher import quota, decision of selling from buffer stock and good monsoon rains in producing regions in Sep. Tur price in the last week of Oct is likely to improve to a certain extent due to fresh demand and likely delay in new arrivals..

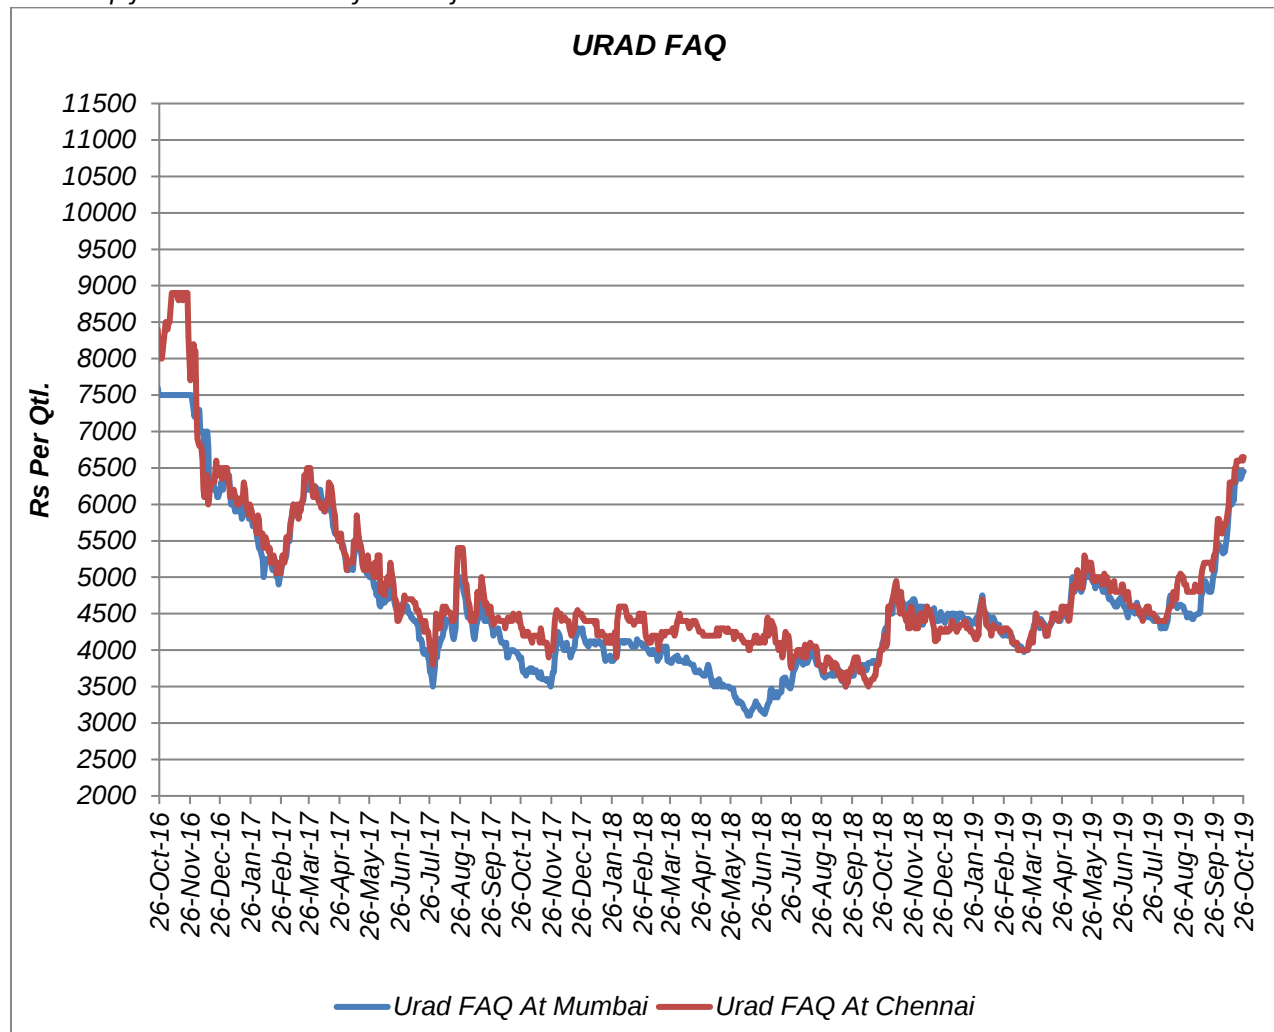

Black Matpe (Urad):

Recent loss and strong demand for stocking purpose amid sellers unwillingness to sell have lent support to cash urad market. Virtually, sellers have disappeared from market and farmers too have restricted selling. Besides, import flow is lower. So there is a short supply like situation in the market and it is pushing up cash market continuously. The largest producing state like MP have lost 15-20% crop while 30% quality of crop is of inferior quality. Arrival is 90 % lower than last year. Even in other states like Raj, U.P & MH, quality of crop is average. All these factors have lent massive support to cash urad market. If stockiest/farmers continue to restrict sale, urad may move up further by Rs300-400. However, at current level stockiest may prefer to release stock by end Oct as around 75-80 thousand MT urad is expected to hit Indian ports by the end of this month. If govt. allows additional 1 to 1.5 lakh MT, as has been demanded by dal mills associations/traders, it may decrease, otherwise it may move further up by Rs300-400.

Current Market Dynamics & Outlook:

Market has adjusted the impact of flood loss. Opening of weather in major growing region has pressurized cash urad market once again. Besides, private trades are releasing old stock. New crop is hardly one month away now. Import remains restricted so any major decline is unlikely. Governmentt would procure urad at Rs.5700. So Agriwatch expects market to stay steady to slightly weak this week. Besides, Nafed has started auction in MP, Raj and U.P. It would restrict market to move further up. Demand –supply side is expected to

be slightly tight. As sowing is delayed by 20-25 days, new crop would be available one month late i.e in Oct end. It may keep market well supported at current level in the medium term. At present urad Mumbai is being traded at Rs 5800, in Chennai it is being traded at Rs 6000 per qtl. Cash market may decrease first before it moves up further. New Urad from Gujarat and Maharashtra would hit market in Oct end.

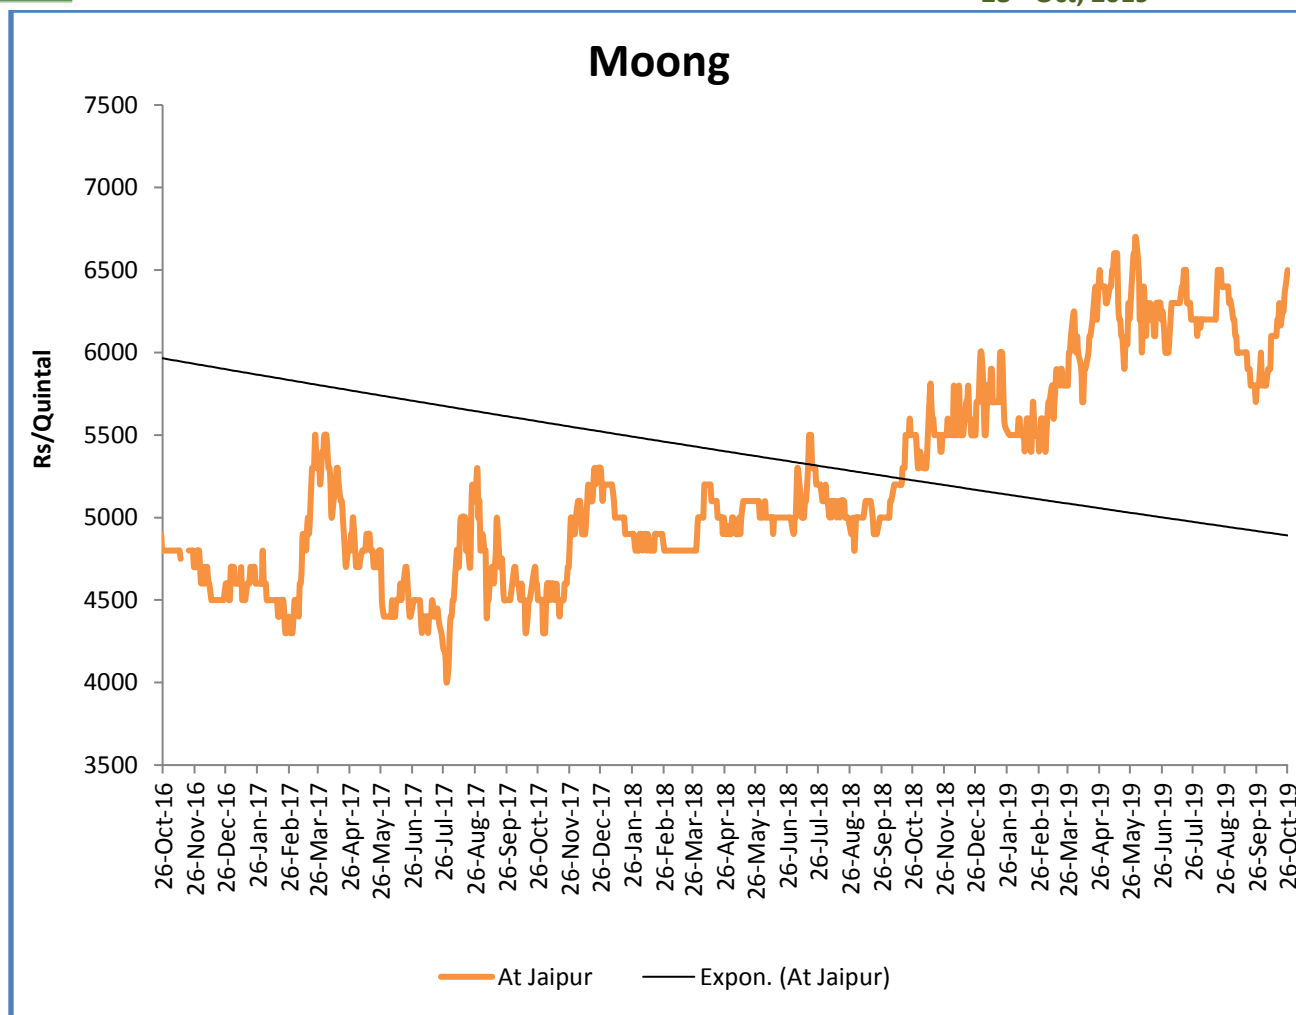

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum but not before a downward correction.

Green Gram (Moong):

Market Recap:

Despite some losses in some pockets of M.P. Mah & Raj crop condition in Merta, Shekhawati, Chhoti Khatu and Jayal line of Rajasthan is in excellent condition and is expected to hit market by third week of Sep. Quality old moong price would continue to trade higher until pressure from Raj builds up. Overall, crop size is larger in Rajasthan. In Maharashtra moong crop in Akola and Khamgaon line is in very good condition. Summer crop in UP, Bihar, Jharkhand and MP, was lower. So, moong price increased from normal expected level. Now stockiest have resorted to release light quality stock at Rs 5400-5600. Mills are buying moong at this level. It is good time for traders and stockiest to start offloading moong now. In Jaipur market moong is being traded at Rs 5800. It may move down further by Rs 100-200 from current level as arrival started increasing.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Oct.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4500 to 4750 for this week.

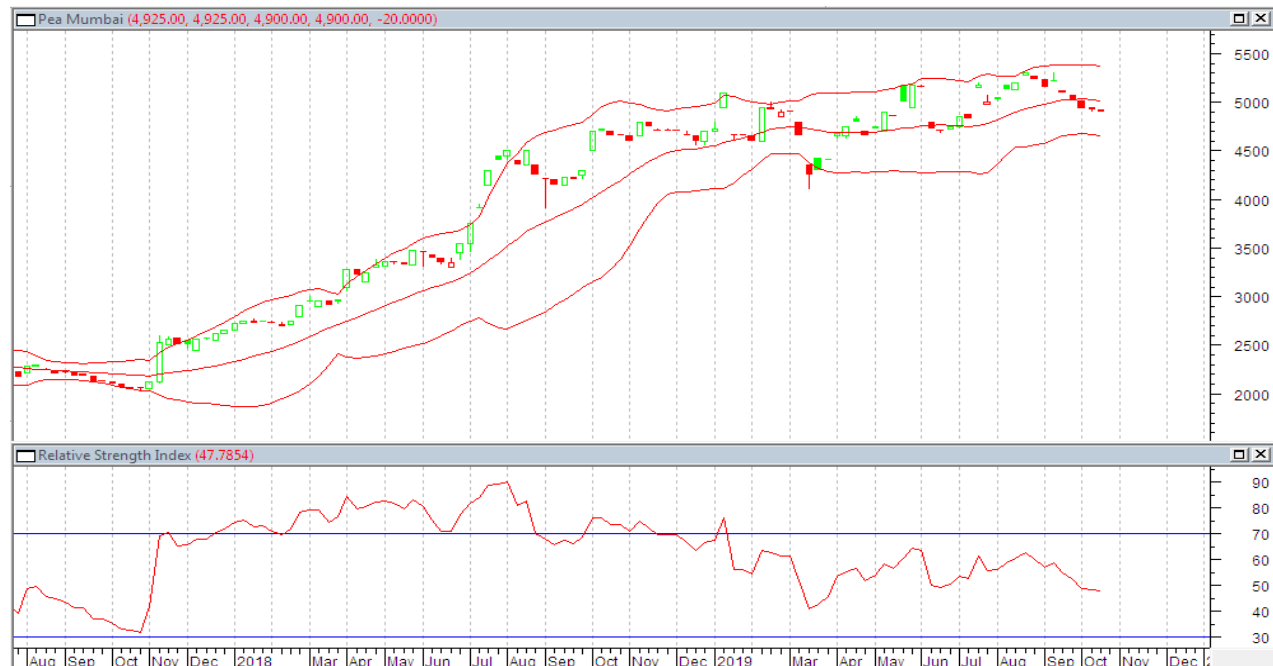

Strategy: Buy on dip

Trade Recommendations: Go long around 4500 with the first target of 4650 and second target 4750 with stop loss at 4450 level.

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to recover slightly in coming weeks due to firm chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. It may lend support to pea market if chana starts improving if illegal import flow is restricted.

Technical Analysis:

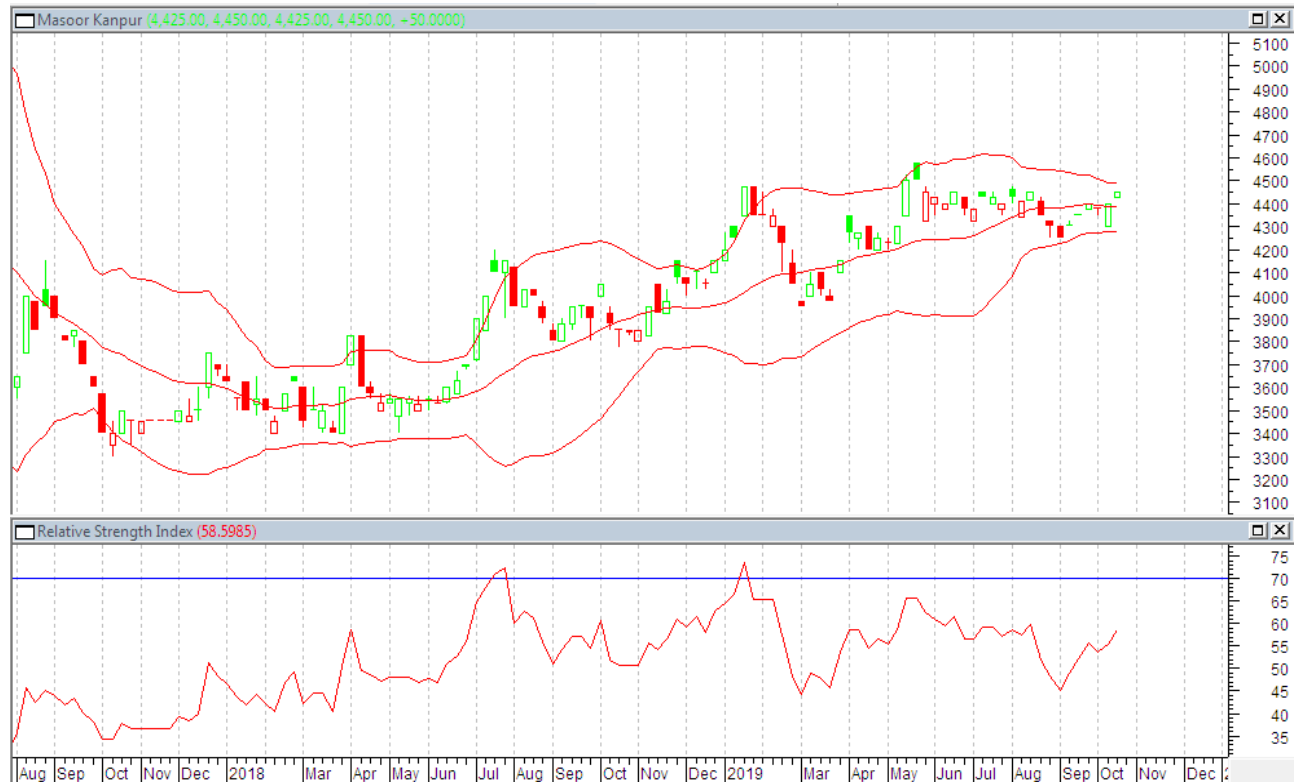

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4800-5250 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4800 with the first target of 5000 and second target 5050 with stop loss at 4700 level.
