Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Rabi pulses sowing area is lagging behind by 15.88 % to 45.60 lakh ha as on 15th November'19.** Chana area was registered at 32.48 against 37.42 lakh ha. Masur area was registered at 3.71 against 4.91 lakh ha, peas area was recorded at 2.33 against 3.38 lakh ha. Even Urad and Moong area was recorded at 1.54 against 1.69 and 0.37 against 0.45 lakh ha respectively. Sowing is lagging behind slightly due to unfavorable weather conditions during October.
- **There is a gossip in the market that import would increase in new year and it has started** casting its impact on pulses market. Govt has option to increase import to curb prices if rabi crops suffer. As of now situation seems under control but if weather in Jan and Feb turns rough, import might be increased to control inflation. So, month of Dec, Jan & Feb would remain crucial from import and price point of view. Untimely rains in Nov has increased fear.
- **Tur market traded under pressure due to higher availability of old stock and around one lakh MT** is available at various ports. As new crop is hardly one month away, stockiest are willing to offload stock as soon as new crop hits the market. Besides, govt.'s agencies are willing to offload stock at regular intervals. In November, import quantity is expected to be higher to around 50,000 MT due to extension given to importers from 31st Oct to 15th of Nov-2019. All these factors would cap uptrend in tur market in the near to medium term. Tur is likely to trade in the range of Rs 5400-5800 this week. If arrival is delayed due to rains in growing regions, it may move up to Rs 6000. At this level selling may start again and cash market would come down. Myanmar is offering lemon tur at Rs 5150-5250 at Mumbai port. In AP market it is being traded at Rs 5250-5550, depending on quality. Steady to slightly firm trend may prevail.
- **There was mixed trade in urad cash market. Higher prices slowed down urad dal buying. However,** millers are active to buy whole urad at decreased level. They are well aware of the fact that domestic stock crop is lower by 40% this year. Arrival in various markets are 50 to 60% lower in south Indian markets. Even major producing states like MP, Raj and MH, it is lower by 30 to 40 % at this point of time. Imported Urad from Myanmar are being cleared at Chennai ports. As prices are ruling higher, carry forward stock might be defaulted. With this background stockiest may cover their short position once again and it may support cash market again. As soon as demand for dal improves, urad may move up again. At present urad FAQ is being traded at Rs 7900-8100 and SQ at Rs 8600-8800 in Chennai whole sale market. In Mumbai it is being traded at Rs 7700-7900 per qtl. Nafed has around two lakh MT urad stock and it would continue to release stock at regular intervals. However, there is a short supply in the market it would push up urad price once again.
- **Despite availability of old stock farmers are not releasing stock sensing uptrend to continue.** So procurement process remains slow in all states. Demand for dal is weak so moong is almost stable at 6500-6800 in various market. Market is awaiting for demand and once it starts, prices of moong is bound to move up again. It may cross MSP in Dec. However, there is stock with Nafed (1.16 lakh MT), it would release stock and uptrend may be curbed. From Jan end/Feb new crop would be available. So, trade in cash market is expected at Rs 6500-7200 in Nov-Dec. Supply side might be tight due to loss in kharif moong. Millers buying remains slow at higher level due to slackness in dal demand. Overall tone in moong cash market remains firm. In Jaipur market moong is being traded at Rs 6700-6900 per qtl. In south Indian market it is being traded at Rs 6500-7000, depending on quality.
- **Chana cash market traded steady to slightly weak as area is expected higher for this year as moisture level in the field** is sufficient to grow it in barren land too. Farmers in Raj, MP, Guj and Mh may increase area by 3 to 5 % as per initial sowing intention. Besides, Nafed has ample stock and it would continue to release stock. Demand is normal. So any spike in chana market is unlikely. It would continue to move in the range of Rs 4500-4700 in Delhi market while it may trade at Rs 4800 to 4900 in south Indian markets. Higher MSP too may encourage farmers to grow more chana. Despite restriction on import availability of chana is higher. New crop would be available by mid Feb and domestic market has ample stock to take care of dal demand. So steady to slightly firm tone may prevail in chana cash market.
- **Masur traded lower due to release by stockiest at higher level. However, it may trade firm once again** as new crop is far away and stock with Nafed is limited. Even stock at port has reduced to 50% despite import flow. In Dec –Jan masur may

move up by Rs200 to 300. If sowing area decreases it may move up by 500. As on 15 Nov-2019 Indian farmers have covered 3.71 lakh Ha against 4.91 lakh ha last year, lower by 24.51%. Normal area under masur is 14.19 lakh ha.

International Market:

- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting.** Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now.** Dry pea harvesting is over in 98% area while it is 90% for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far..
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT.** Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Lentils production in Canada is expected to increase from 20.92 (2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303 (2018-19) to 370 thousand ha in 2019-20.** Even production is expected to increase by 29.79% to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20.** However, production is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher Level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 10 points from 145.3 in Sep to 146.3 in Oct-2019

Pulses-Wise Scenario:

Chana

Current Scenario:

Steady to firm sentiments may in cash chana market. This year area under chana is likely to increase as water availability is higher and farmers in Rajasthan MP & Gujarat would prefer to sow chana in barren land too. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level in Nov-Dec. Demand from bulk users has improved taking clue from firm futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. After setting aside reserve stock of 1278453 MT, there is an availability of 1132136 MT with Nafed for sale. In Delhi market chana is being traded at Rs 4500-4650. If demand improves and Nafed decides not to sell stock, it may move to 4750-4850 maximum. Demand for chana dal is improving. Agriwatch expects chana to trade in the range of Rs 4400-4750 in Nov. Stake holders should buy after downward correction and prefer buy & sell trade instead holding it for a longer period.

All India average price for Chana decreased by 0.73 percent from Rs 4600 to 4566 per qtl. in last week. However, Australian Chana (imported) price too increased by 1.49 percent to Rs 4400 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Slight recovery might be seen in chana cash market this week too as demand started improving with futures trading firm.

Peas (Matar):
Market Recap:

Slight recovery is expected in pea price in coming weeks. Supply continues through illegal channel from B'desh and Nepal and it has eased availability of peas in domestic market. However, firmness in other pulses may help pea market to recover. Despite higher prevailing prices in domestic market, the farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses except urad are still ruling below MSP. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices continue to move up, govt may consider relaxing quota norm in last quarter. However, availability of green peas is almost negligible and it may continue to move up. Sowing of pea is about to begin.

Pea in Mumbai market is being traded down at Rs. 4810, while in Kanpur market it is being traded at Rs 5150-5200 per qtl. As chana price has started increasing, pea too might recover a little bit. Arrival in local mandis has decreased. As, supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Nov as demand for seed would increase. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly firm trend may prevail this week. As stock of green pea is at negligible level, prices are increasing.

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction and lower availability of imported stock. Kanpur market traded steady at Rs 5100 per qtl due to sale at discounted price by importers and increasing illegal flow of peas. Overall, all India average price decreased by 0.26% to Rs 5620 per qtl in the last week of Oct. In Mumbai market, pea traded at Rs 4810, down from Rs 4900. More downward trend seems limited. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 425 to Rs 25 due to decreased pea price and improved chana price.. Spread is expected to remain in the negative zone in Nov too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too..

MarketOutlook: Outlook remains steady to slightly firm this week.

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. However, proposed higher MSP (4800) may support cash market in the third quarter of the year. Nafed still has 2.01 lakh MT old and new stock. So, supply side seems balanced. However, if govt impose higher duty, it may move up to proposed MSP level. Prices of other pulses too may support lentil market as firmness starts with help of improved demand.. However, prices in global market is lower, so import duty remains ineffective. So any major spike is unlikely in Oct. Lentil vessel is being quoted at Rs 4300-4350 per quintal and container is being quoted at Rs 4400-4450 per quintal. In Kanpur market it is being traded at Rs 4650-4700 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs 4500-4850 in Nov.

Current Scenario:

In the second week of Nov-2019, average price in key market Kanpur was up slightly by 0.45 % from Rs 4550 to Rs 4600-4650 per qtl.. Prices are likely to trade steady to slightly firm in the last week of Nov .

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand for seed and mills. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it may limit one-way utrend.

Pigeon Pea (Tur/Toor):

Market Recap:

As extension of import timeline has been given only for 15 days, so import volume would remain restricted. It would support tur price at current level. New arrival is expected to be delayed by 15 days in prevailing condition and if rains (likely) in major growing states continue for a week, new crop would hit market by end Dec. It would help market to cross MSP. In Myanmar too new crop would not be available before mid January. So govt.'s decision on import timeline and timing of arrivals in domestic market would be a price directing factor. Crop condition is average this year. Govt has fixed private import at 4 lakh MT. The figure might match by end Nov. Besides, govt has option to import 1.75 lakh MT through G2G basis. As of now no import has taken place through this channel. Possibility of G2G basis import is poor as availability of tur in international market is less. New crop would be available in Jan. So, any price decline in domestic market seems a remote possibility.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly firm on the back of improved demand and visible lower stock in physical market. However, availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, slight recovery is expected. New crop would hit Indian market in end Dec and govt has enough stock to handle next three months demand. Tur is getting support from firmness in other market too.

Markt Outlook: In the first week of Nov-2019, average price in Gulberga market was up by Rs 150 to Rs 5750, due to lower import volume, shorter duration of time line for import and decision of not selling from buffer stock immediately. Tur price is likely to improve to a certain extent due to fresh demand and likely delay in new arrivals..

Black Matpe (Urad):

Punters and stockiest are active in cash urad market and sellers/importers have restricted selling sensing uptrend to continue due to heavy loss of kharif urad. Higher price may encourage govt to increase import quota from 1.5 to 2.5 lakh MT in the latter period of this CY. There is no seller of urad at ports. If quota is not increased and bulk selling from central pool is not started, urad may move further by Rs 500 per qtl more after a correction of Rs 200-300 more. Large portion of stock is with private trades and they are unwilling to sell it. Availability in global market too is lower and exporters are continuously increasing quotes. New rabi crop would not be available before Feb-2020. So prices continue to move up. Nafed should start selling urad crop at this stage to curb increasing price in domestic market. Import quota must be increased from 1.5 lakh MT to 2.5 lakh MT immediately.

Current Market Dynamics & Outlook:

Urad cash market jumped suddenly as sellers restricted release of old stock and buyers remained active at higher price. Import remained restricted while govt. did not increase quota for urad from 1.5 lakh MT to 2.5 lakh MT. Despite stock in private hands and with Nafed, there is a short supply in cash market as stockiest are not releasing stock sensing uptrend to continue. Even importers are not ready to offer urad at current prevailing price. So cash urad market may move further up by Rs 300-400. If import quota is not increased and

bulk volume is not offered by Nafed, uptrend may continue. new rabi crop would not be available before Feb-2020. In Chennai and Mumbai markets urad prices are ruling in the range of Rs8200-8300 per qtl, may cross 8800 again if govt. remains inactive.

Market Outlook: Urad Prices are likely to show steady to slightly firm momentum after current phase of correction.

Green Gram (Moong):

Market Recap:

Procurement drive and lower arrival is lending support to cash moong market. Steady to slightly firm tone prevail. Rajasthan govt would procure 3 lakh MT moong on MSP this season from kharif crop. It would push moong market further up by 300 to 400 per qtl. In Jaipur market moong is being traded at Rs6600-6800 per qtl. As quality loss is higher and traders have restricted selling sensing firmness in coming weeks, cash market price is bound to go up. Besides, there is no parity for import as availability in Myanmar is lower and prices continue to rule higher. Lower crop size, quality loss is likely to remain supportive for moong in coming weeks. Nafed still have 1.16 lakh MT moong. To keep price under check Nafed would continue to release old stock at regular intervals. This year water availability is good so Agriwatch expects higher acreage in Rabi season.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Nov.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4500 to 4800 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4500 with the first target of 4650 and second target 4750 with stop loss at 4450 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4400	4450	4575	4750	4850

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook - We expect prices to recover slightly in coming weeks due to firm chana. Govt has delayed decision over import quantity. It may be increased to 2 lakh MT. Stock at port is exhausting fast decreasing flow of import. So pea may move further up but not before a downward correction. It may lend support to pea market if chana starts improving and illegal import flow is restricted.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4800-5250 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4600 with the first target of 4750 and second target 4850 with stop loss at 4550 level.
