Commodity-wise Domestic, International Prices and Arrivals at Different Centers**Highlights-Domestic Market:**

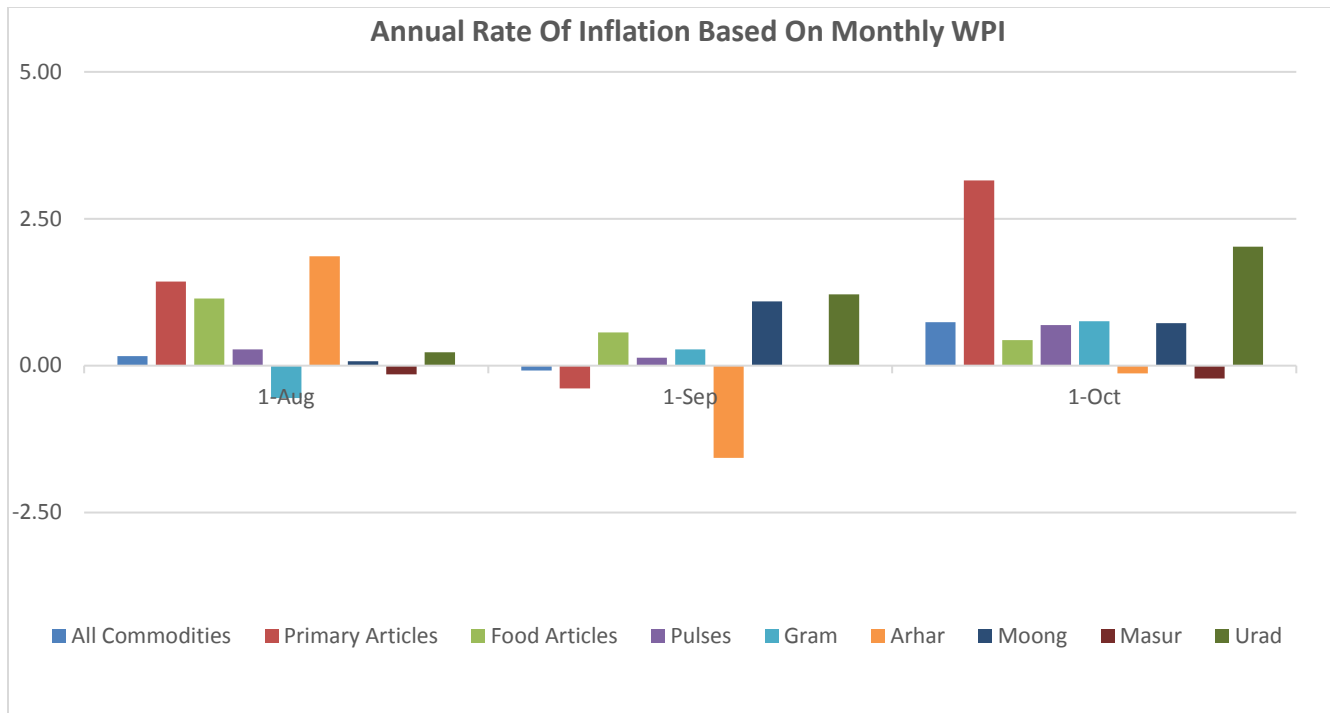

- **Rabi pulses sowing area is lagging behind by 19.28 % to 71.25 lakh ha as on 22nd November'19.** Chana area was registered at 48.35 against 61.91 lakh ha. Masur area was registered at 8.44 against 10.13 lakh ha, pea area was recorded at 5.53 against 5.88 lakh ha. Even Urad and Moong area was recorded at 1.87 against 1.96 and 0.65 against 0.62 lakh ha respectively. Sowing is lagging behind slightly due to unfavorable weather conditions in Nov. so far.
- **Officials from central govt were on 3days visit to Maharashtra to analyse the loss of kharif crop** in three regions like Amrawati, Aurangabad and Nasik. Unseasonal rains have affected kharif crops in the region. The five member team talked directly to farm community and tried to assess the actual loss. The team will submit its report to central govt. The central govt. would take decision regarding financial aids for farmers based on the report. Lower area under rabi pulses in the initial stage too is causing concern for central govt.
- **There is a gossip in the market that import would increase in new year and it has started** casting its impact on pulses market. Govt has option to increase import to curb prices if rabi crops suffer. As of now situation seems under control but if weather in Jan and Feb turns rough, import might be increased to control inflation. So, month of Dec, Jan & Feb would remain crucial from import and price point of view. Untimely rains in Nov has increased fear.
- **Unseasonal rains in Karnataka and south India may delay harvesting of tur crop by 15teen days.** Pressure continues on tur market due to higher volume of import in Oct and mid Nov. New crop is hardly one month away. So stockiest too are intending to release stock before mid Dec. So any spike in tur market is unlikely. It may recover if demand improves. Nafed still has 8 lakh MT tur in its stock. Crop condition is good as of now. However, if rains continues for next two weeks, it may damage quality of matured crop. In Gulberga market tur is being traded at Rs5500-5600 per qtl. It may come down to Rs5300-5400. New crop in UP is expected by the end of this month.
- **Pressure on urad market too continues as old stock is being released by private trades.** Demand in retail market remains slackened. Recovery is expected once again as arrival is lower by 60 % from kharif crop. Import remains restricted. Rabi sowing has picked up pace now and there is good sowing conditions in urad growing states. Area coverage is expected to be slightly higher due to higher prevailing price. In south Indian market urad SQ is being traded at Rs 8200 & FAQ at Rs 7350. It may decrease by Rs 200-300 more from current level. At lower level demand is expected to improve and it may support cash market once again. In Chennai cash market may touch Rs7000 level. Demand for dal has affected at higher level. Downward correction is expected this week too.
- **Moong procurement is on and it remains supportive to moong market. However, millers are** unwilling to buy at higher level as they have fears that govt would release stock below MSP in the first quarter of new year. In Jaipur market moong is being traded at Rs 6600-6700 per qtl. In south Indian market it traded at Rs 6300-6700 per qtl. Steady tone may prevail in moong market. There is a fear in the market that govt may relax import quantity if prices continue to move up. If rabi crops fail, relaxation might be seen. Consumer and food ministry has already advised concern ministry to consider relaxation on import quota. All these developments are distorting sentiments in the market. Procurement is on and Nafed has procured around 30,000 MT so far. Import quantity is expected to remain restricted due to disparity and fixed quota for import.
- **Pressure seems to continue on chana cash market. Ample stock with Nafed and unexpectedly lower** demand for dal and besan would continue to cap uptrend in chana market. As Nafed has maximum stock, its selling strategy would impact cash market. As sowing is running behind at this point of time, cash market is expected to improve slightly in coming weeks. Nafed may decide to sell chana in bulk volume from mid-November. It may restrict uptrend in Chana market. As Nafed is on driver's seat, its selling decision would remain crucial for chana price in Nov, Dec and Jan-20. Chana in Delhi market is being traded at Rs4475-4550. It may move up to Rs 4650-4700.
- **Masur traded lower due to release by stockiest at higher level. However, it may trade firmer again** as new crop is far away and stock with Nafed is limited. Even stock at port has reduced to 50% despite import flow. In Dec –Jan masur may move up by Rs200 to 300. If sowing area decreases it may move up by 500. As on 15 Nov-2019 Indian farmers have covered 3.71 lakh Ha against 4.91 lakh ha last year, lower by 24.51%.

Normal area under masur is 14.19 lakh ha. Pea cash market traded weak and is trading at chana price now. If chana improves, it would follow chana trend. In Mumbai market pea is being traded at Rs4500.

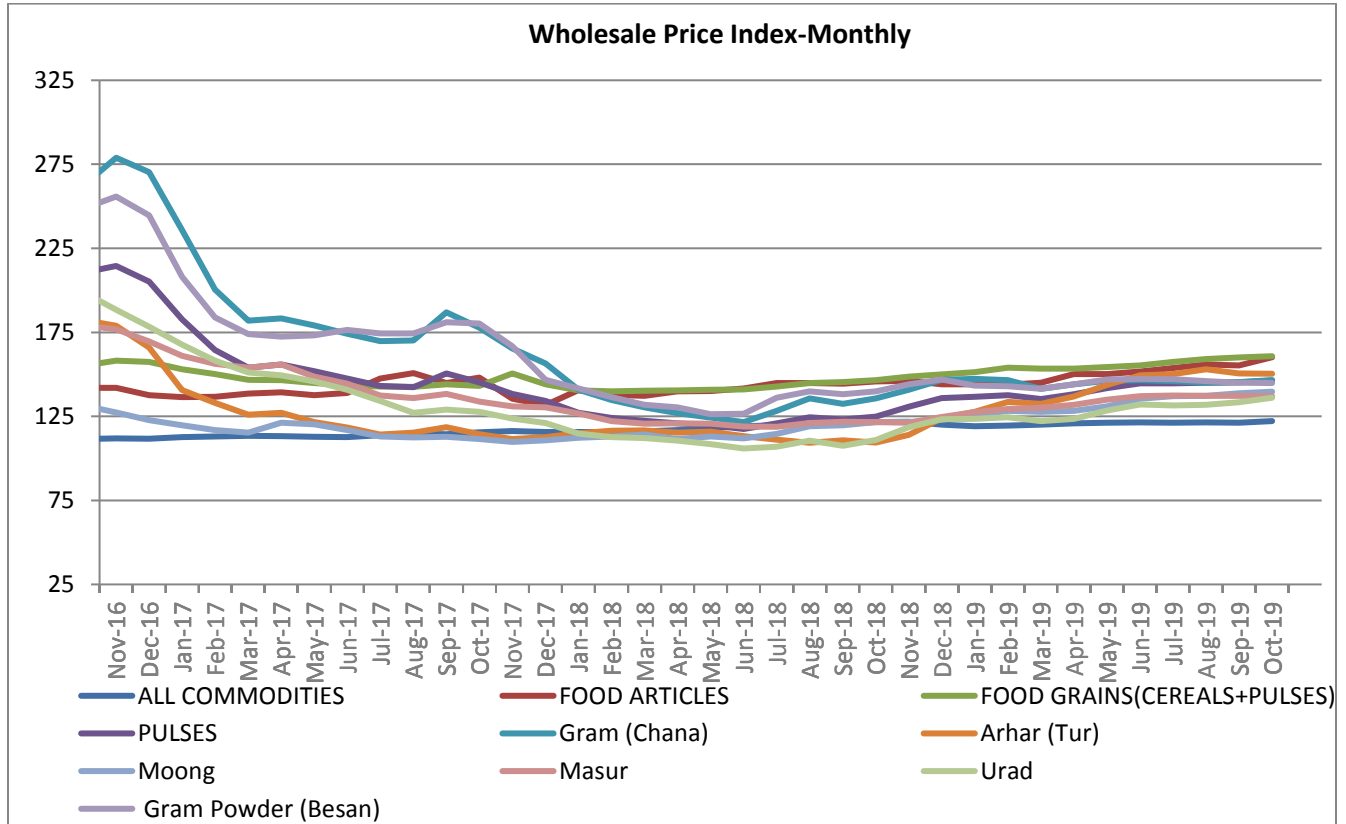

International Market:

- **Chickpeas production In US is expected to decrease sharply to 3.3 lakh MT in 2019-20 as area coverage** declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming** to an end now. Dry pea harvesting is over in 98% area while it is 90% for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far..
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas** production has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues yield has been down this year for all pulses in US.
- **Dry peas production in Canada is expected to increase by 30% from last year to 46.73 lakh MT in 2019-20.** It would be the second highest production. The rise in production is mainly attributed to higher area and yield this year. Main growing states like Saskatchewan and Alberta contribute 51 & 44% in total production in Canada. Manitoba contributes 3% in total production. Despite 30% increase in production, total supply is expected to increase only by 18% due to lower carryin stock. Export is expected to increase to 34 lakh MT. Canada had produced 35.81 lakh MT dry peas in 2018-19. Yield is expected to increase from 2.5 to 2.71 tonne per ha. Canada had exported 32.50 lakh MT last year. Carryout stock is expected to increase from 3.88 to 6 lakh MT in 2019-20. Average price would continue to hover in the range of \$245 to 275 per MT in 2019-20.
- **Lentils production in Canada is expected to increase from 20.92 (2018-19) to 25.20 lakh MT in 2019-20** due to higher yield. Yield has increased from 1.40 to 1.68 tonne per ha this year. Despite higher production total supply is expected to increase slightly from 30 to 31.94 lakh MT due to higher domestic usage. It would increase from 3.14 to 5.94 lakh MT this year. Carry out stock would increase slightly from 6.54 to 7 lakh MT in 2019-20. However import and export is expected to decrease slightly this year. Average price is expected to rule \$375 to 405 per MT in 2019-20.
- **Chickpea production in Canada is expected to decrease this year from 3.11 to 2.63 lakh MT** due to lower area coverage. Farmers in Canada had covered 1.59 lakh Ha in 2019-20 against 1.79 lakh Ha last year. Despite lower production total supply would increase slightly from 3.71 to 3.81 lakh MT in 2019-20. Canada consumes 1.26 lakh MT locally. Carryout is expected to stay steady at 1.05 lakh MT. Average price of chickpea may rule at around \$ 425 to 455 per MT.
- **Chickpea area in Australia is expected to increase 22.11% from 303 (2018-19) to 370 thousand ha** in 2019-20. Even production is expected to increase by 29.79% to 3.66 lakh MT in 2019-20. It was 2.82 lakh MT in 2018-19.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha** in 2019-20. However, production is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.
- **NASS reports that US chickpea acreage for the 2019 crop year will decline by 35% to 559,500 acres.** The breakdown shows that small chickpea planted acreage will be down by 44% from last year at 125,000 acres, while large chickpeas will decline by 32% at 434,500 acres. Given that chickpea acreage had increased substantially in the years following the International Year of Pulses, a decline is not unexpected.
- **Chickpeas export from Australia increased sharply by over 90% to 43962 MT in April-2019.** It was 23,066 MT in March. It has lifted total export in ongoing M to 208,707 MT. However, it is lower by 64% from last year till April 2018. The biggest buyer was B'desh, buying 28,220 MT, followed by UAE buying 8,663 MT & Pakistan at 2,189 MT. Demand is weak right now. Stock in most exporting countries remain at higher level in relation to prospective demand. So, Buyers are in no hurry to buy.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 10 points from 145.3 in Sep to 146.3 in Oct-2019

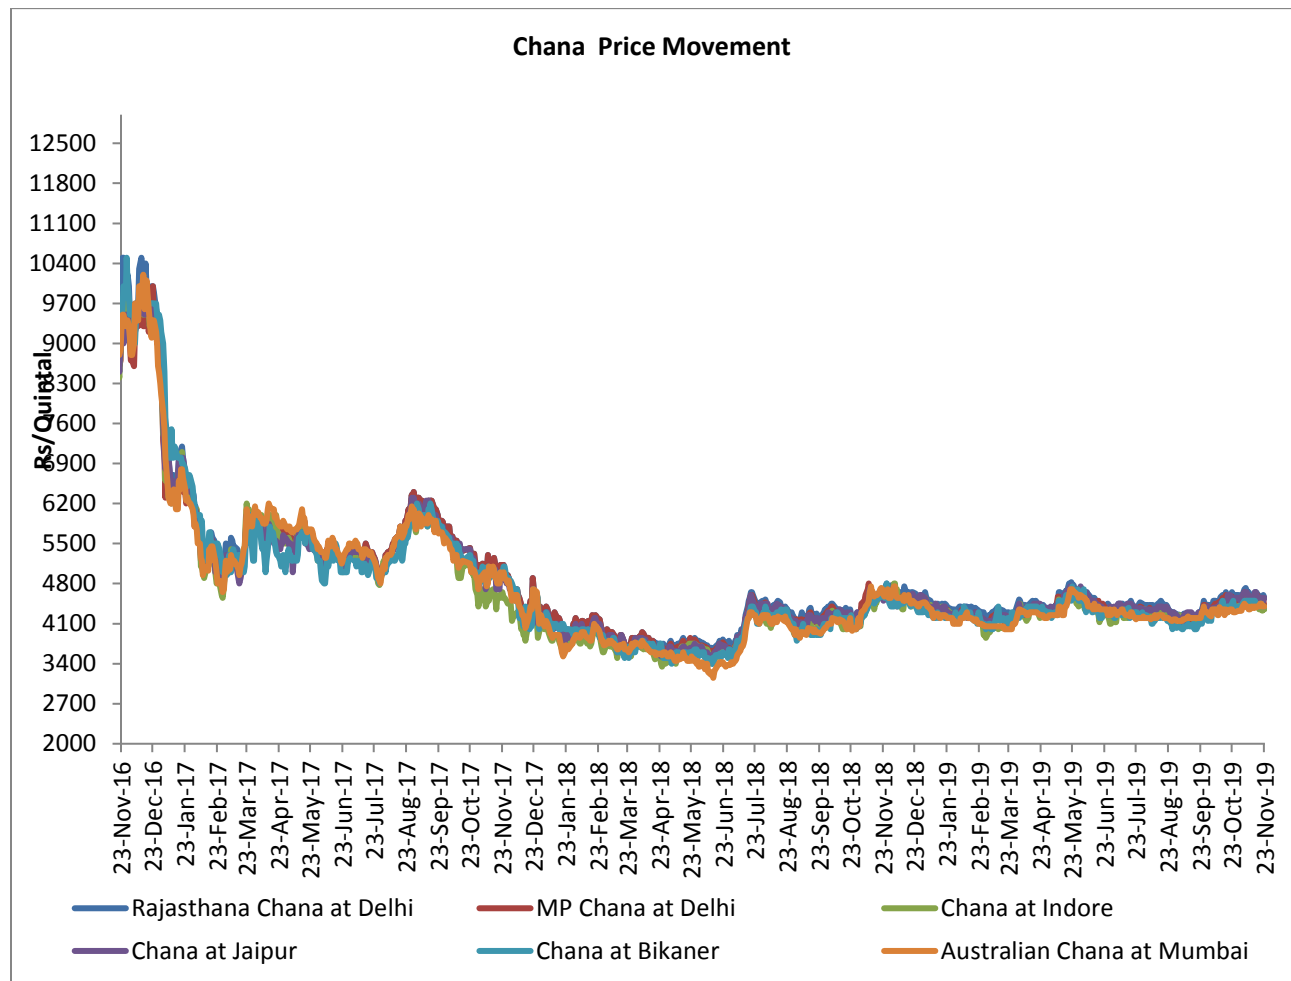

Pulses-Wise Scenario:

Chana

Current Scenario:

Steady tone prevailed in cash chana market during review week and it may continue to trade stable. Chana area is lagging behind by 21.90 % to 48.45 lakh ha as on 22nd Nov-2019. However, next two weeks are very crucial from sowing point of view. If weather remains favorable, farmers may cover remaining short area. Despite some improvement seen in futures, chana market is unlikely to sustain at higher level in Nov-Dec. Demand from bulk users has been stable despite improvement in futures. However, once Nafed starts selling chana in bulk volume it would come down again. Market is aware of ample availability of chana in central pool as well as in private hands. In Delhi market chana is being traded at Rs 4500-4600. If demand improves and Nafed decides not to sell stock, it may move to 4750-4850 maximum. Demand for chana dal is improving. Agriwatch expects chana to trade in the range of Rs 4400-4700 in Nov. Stake holders should buy after downward correction and prefer buy & sell trade instead of holding it for a longer period.

All India average price for Chana decreased by 3.97 percent from Rs 4566 to 4465 per qtl. in last week. However, Australian Chana (imported) price too increased by 0.56 percent to Rs 4416 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

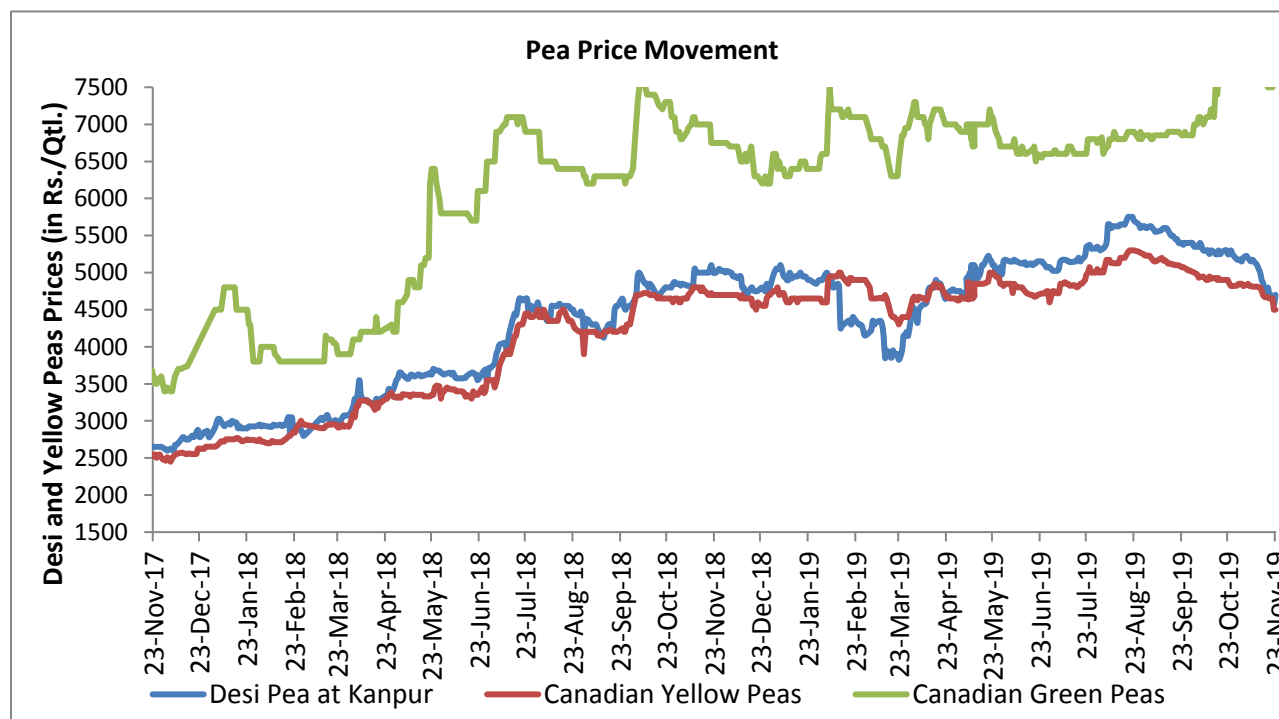

Market Outlook: Slight recovery might be seen in chana cash market next week as sowing area is much lower than expectation so far.

Peas (Matar):

Market Recap:

Slight recovery is expected in pea price in coming weeks. Chana price too remains affecting factor for pea price. Supply continues through illegal channel from B'desh and Nepal and it has eased availability of peas in domestic market. Weakness in other pulses too has affected pea market. The farm ministry is unwilling to relax quantitative restriction on yellow peas import as pulses availability in domestic market is ample and prices of other pulses except urad are still ruling below MSP. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 30.7 MMT for 2019-20. It hints that peas import quantity is unlikely to be increased further even in third and fourth quarters. If prices move up, govt may consider relaxing quota norm in last quarter. However, availability of green peas is almost negligible and it may continue to move up. Sowing of pea has begun.

Pea in Mumbai market is being traded down at Rs. 4500-4550, while in Kanpur market it is being traded at Rs 4700-4750 per qtl. As chana price is almost stable, pea too might trade with tandem with chana. Arrival in local mandis has decreased. As supply side is at comfortable level due to illegal flow of peas. It would keep market price under check. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again in Dec as chana is likely to increase due to lower area coverage. Under emerging scenario steady tone may prevail this week. As stock of green pea is at negligible level, prices are increasing.

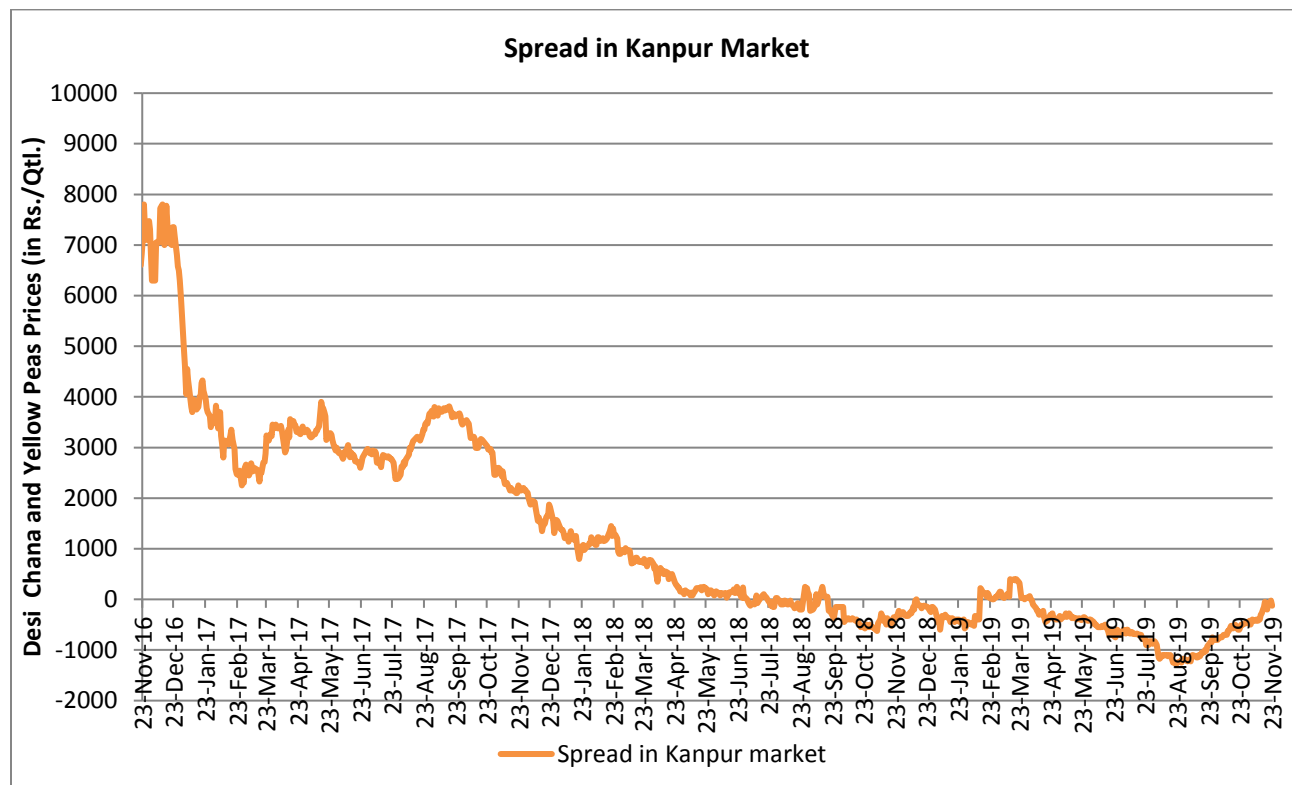

Current Market Dynamics & Outlook:

Pea market traded weak due to import flow despite restriction and lower availability of imported stock. Kanpur market traded steady at Rs 4700 per qtl due to sale at discounted price by importers and increasing illegal flow of peas. Overall, all India average price decreased by 2.26% to Rs 5410 per qtl in the last week of Nov. In

Mumbai market, pea traded at Rs 4500-4550. More down ward trend seems limited. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 125 due to decreased pea price and improved chana price. Spread is expected to remain in the negative zone in Nov too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Market Outlook: Outlook remains steady to slightly weak this week.

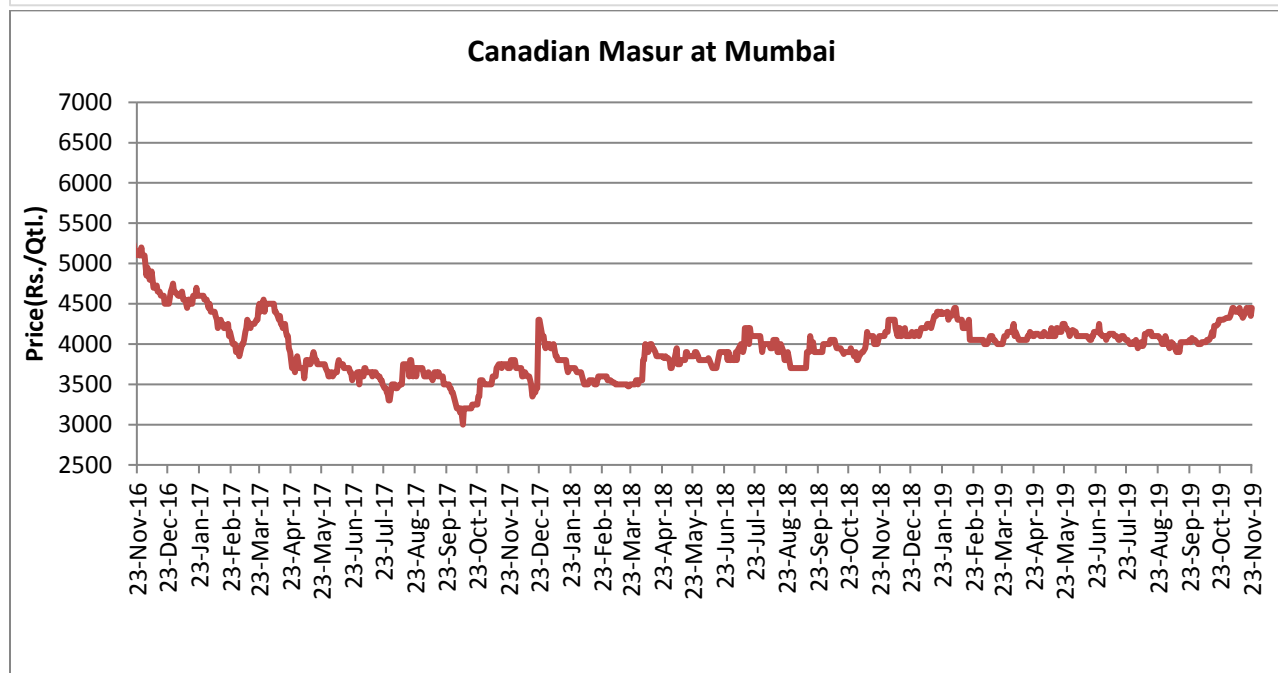

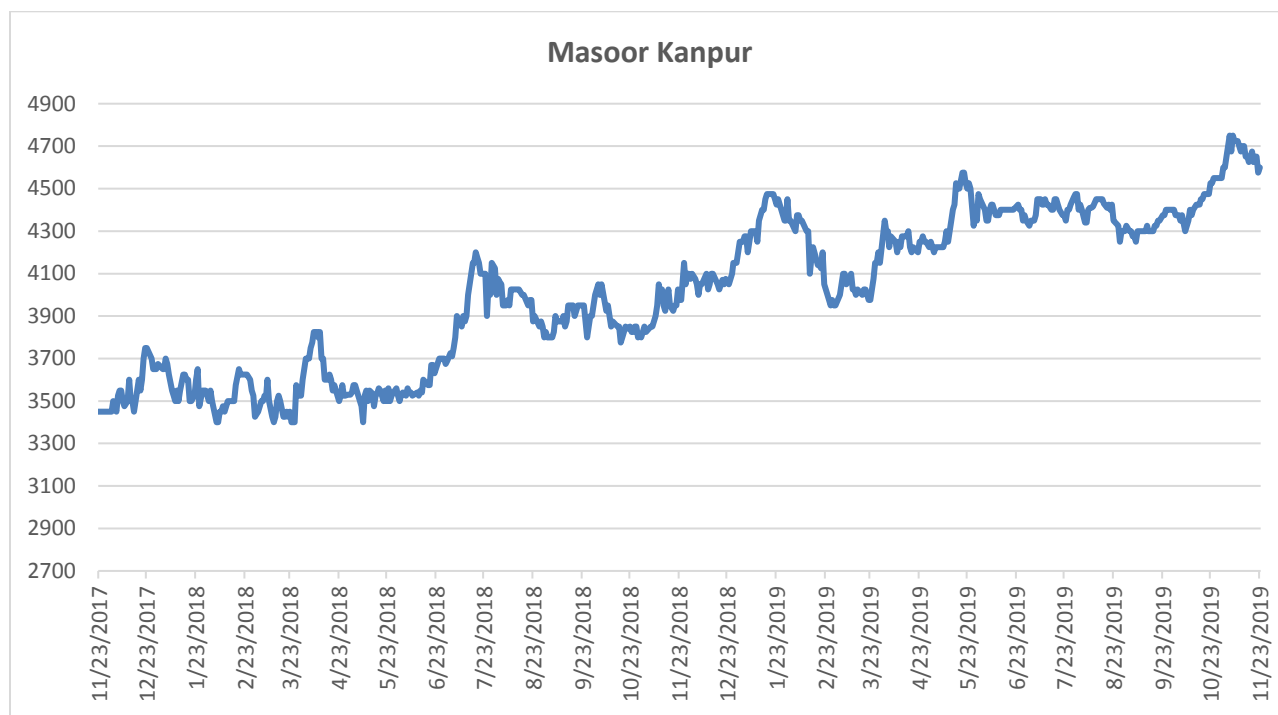

Lentils (Masoor):

Market Recap:

No major spike in lentil market is expected at this point of time due to weak demand and ample stock with Nafed and increasing import volume. However, proposed higher MSP (4800) may support cash market in the third quarter of the year. Nafed still has 2.01 lakh MT old and new stock. So, supply side seems balanced. However, if govt impose higher duty, it may move up to proposed MSP level. Prices of other pulses too may support lentil market as firmness starts with help of improved demand. However, prices in global market is lower, so import duty remains ineffective. So any major spike is unlikely in Nov. Lentil vessel is being quoted at Rs 4300-4350 per quintal and container is being quoted at Rs 4400-4450 per quintal. In Kanpur market it is being traded at Rs 4500-4600 per qtl. If Nafed starts selling through auction, it may pressurize lentil market by Rs 100-150 more from current level. Improvement in demand from Nepal and B'desh, may lend some required support to lentil cash market. Cash market may trade in the range of Rs 4400-4750 in Nov.

Current Scenario:

In the third week of Nov-2019, average price in key market Kanpur was up slightly down 0.55 % from Rs 4600 to Rs 4500-per qtl.. Prices are likely to trade steady to slightly weak in the last week of Nov due to sluggish demand.

Market Outlook: Prices are likely to stay steady to slightly weak due to sluggish demand for mills. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way trend.

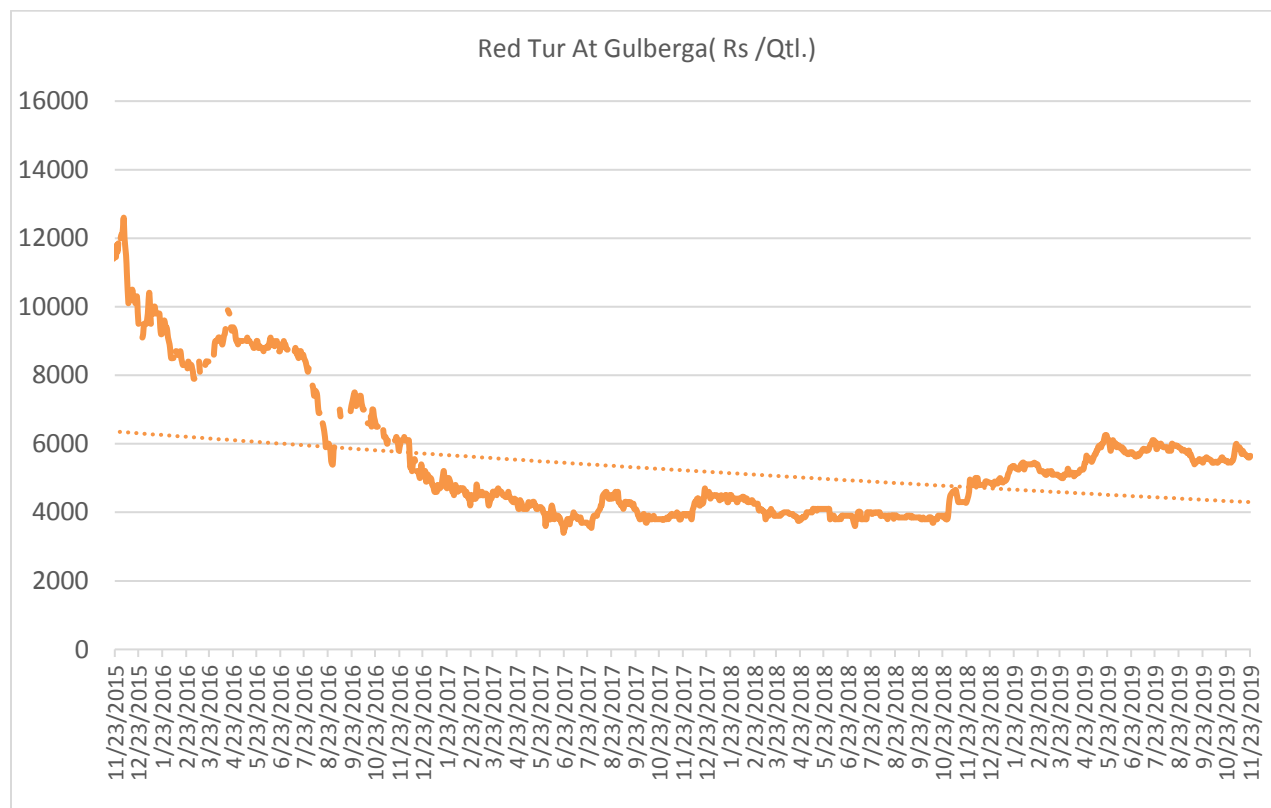

Pigeon Pea (Tur/Toor):

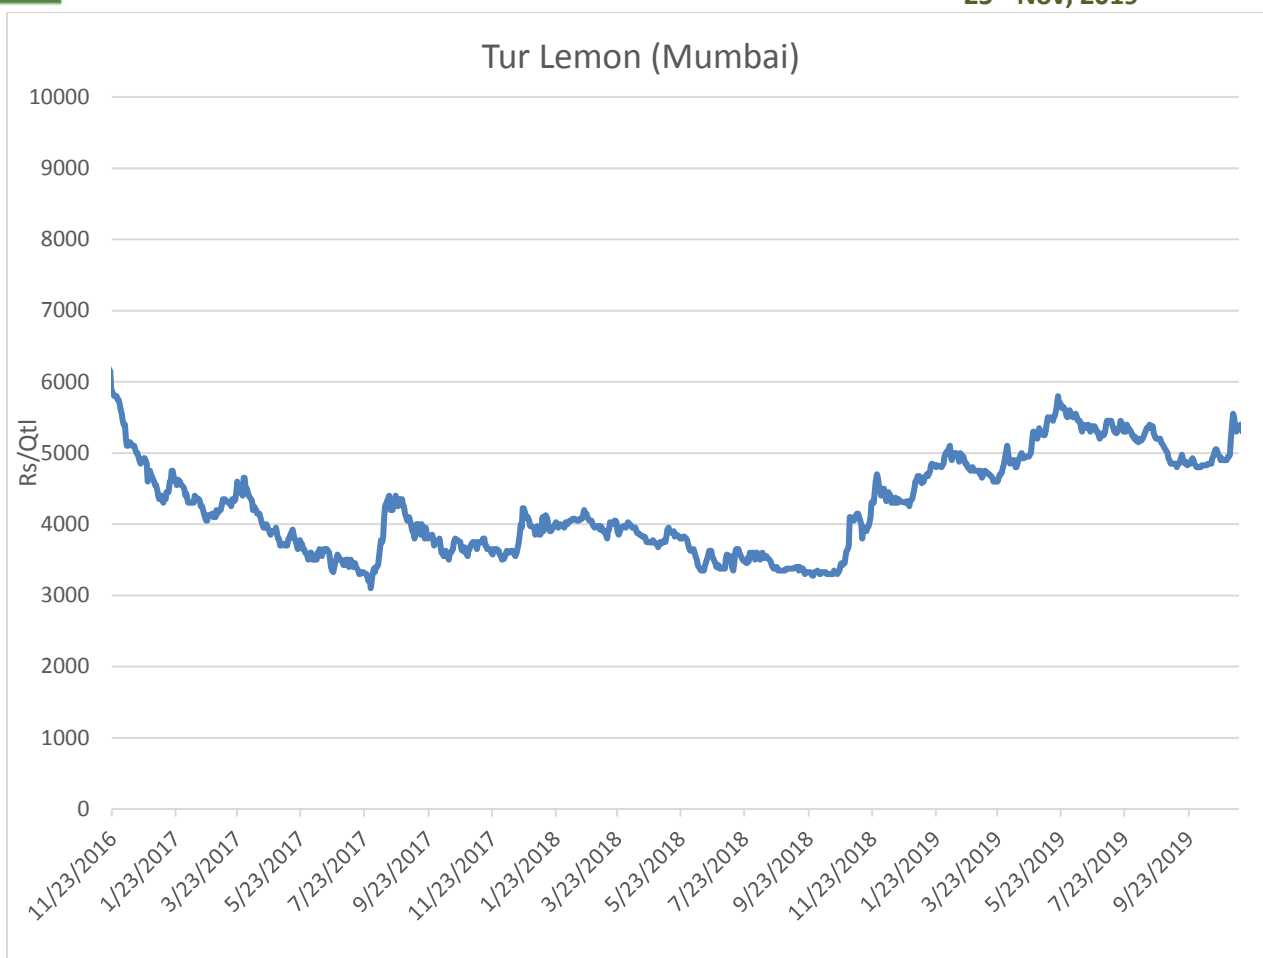

Market Recap:

New crop started trickling in in UP and is being traded at Rs 5500. Moisture content is higher in new crop. As extension of import timeline has been given only for 15 days, so import volume would remain restricted. It would support tur price at current level. New arrival is expected to be delayed by 15 days in prevailing condition and if rains (likely) in major growing states continues for a week, new crop would hit market by end Dec. It would help market to cross MSP. In Myanmar too new crop would not be available before mid January. So govt.'s decision on import timeline and timing of arrivals in domestic market would be a price directing factor.. Crop condition is average this year. Govt has fixed private import at 4 lakh MT. The figure might match by end Nov. Besides, govt has option to import 1.75 lakh MT through G2G basis. As of now no import has taken place through this channel. Possibility of G2G basis import is poor as availability of tur in international market is less. New crop would be available in Jan. So, any major price decline in domestic market seems a remote possibility.

Current Market Dynamics & Outlook:

Tur market is expected to stay steady to slightly weak on the back of sluggish demand and offering of imported tur at lower price. However, availability would increase due to enhanced import quota from 2 to 4 lakh MT and increasing volume of import. Besides, 2 lakh MT would be supplied from buffer stock. However, arrival in markets has decreased. So, slight recovery is expected. New crop would hit Indian market in end Dec and govt has enough stock to handle next three months demand.

Markt Outlook: In the third week of Nov-2019, average price in Gulberga market was down by Rs 150 to Rs 5600, due to higher import volume, selling of imported stock at lower price and fear of Nafed selling. Tur price is likely to decrease further as demand remains weak. New crops hardly one month away.

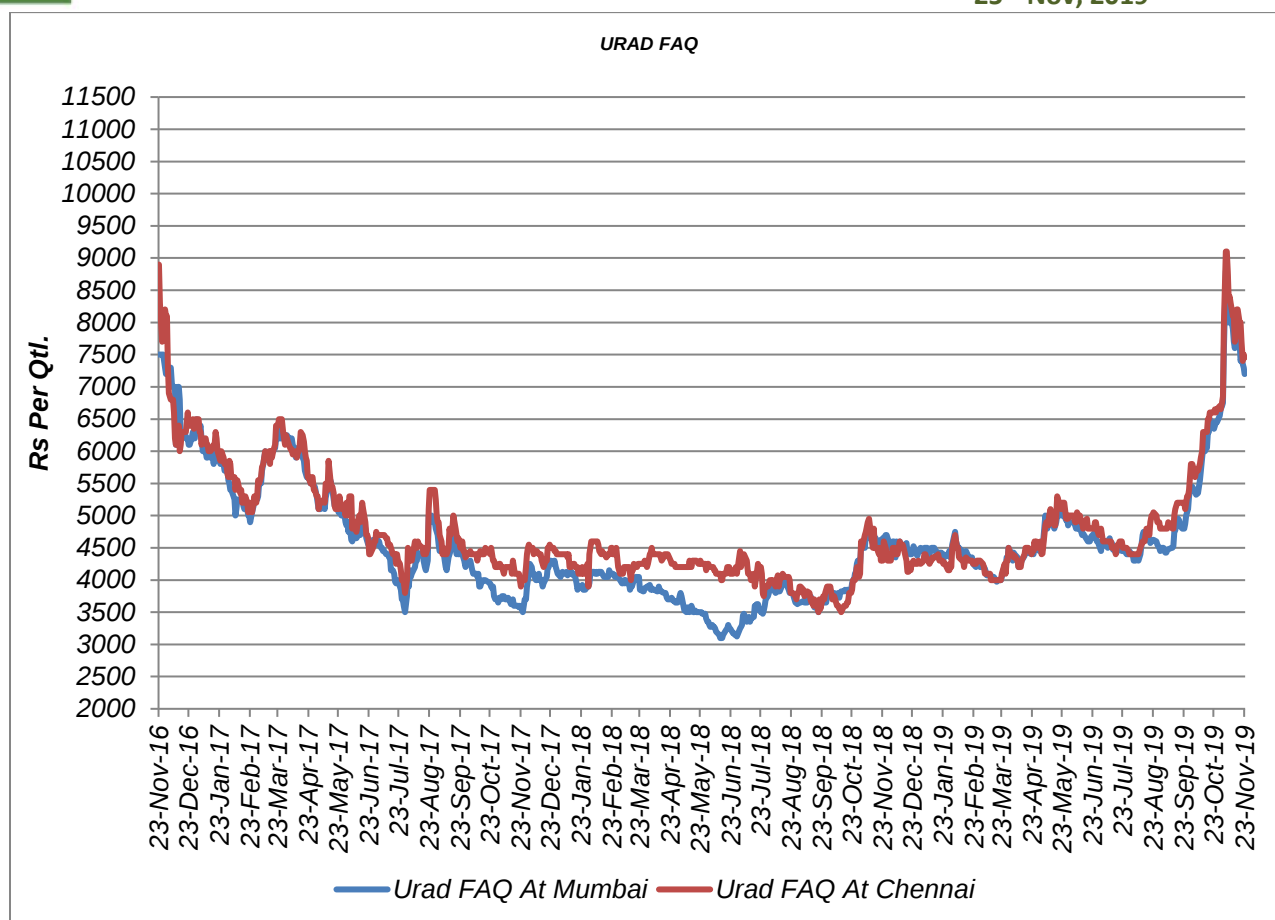

Black Matpe (Urad):

Pressure on urad market too continues as old stock is being released by private trades. Demand in retail market remains slackened. Recovery is expected once again as arrival is lower by 60 % from kharif crop. Import remains restricted. Rabi sowing has picked up pace now and there is good sowing conditions in urad growing states. Area coverage is expected to be slightly higher due to higher prevailing price. In south Indian market urad SQ is being traded at Rs 8200 & FAQ at Rs 7350. It may decrease by Rs 200-300 more from current level. At lower level demand is expected to improve and it may support cash market once again. In Chennai cash market may touch Rs7000 level. Demand for dal has affected at higher level. Downward correction is expected this week too

Nafed should start selling urad crop at this stage to curb increasing price in domestic market. Import quota must be increased from 1.5 lakh MT to 2.5 lakh MT immediately.

Current Market Dynamics & Outlook:

Weak demand at higher level, mills restricted buying and stockiest's resorting to offload old stock have pressurized urad market despite lower rabi area coverage. Cash urad market may trade lower by Rs 200-300 from current level. Market is awaiting demand, that may support urad once again.

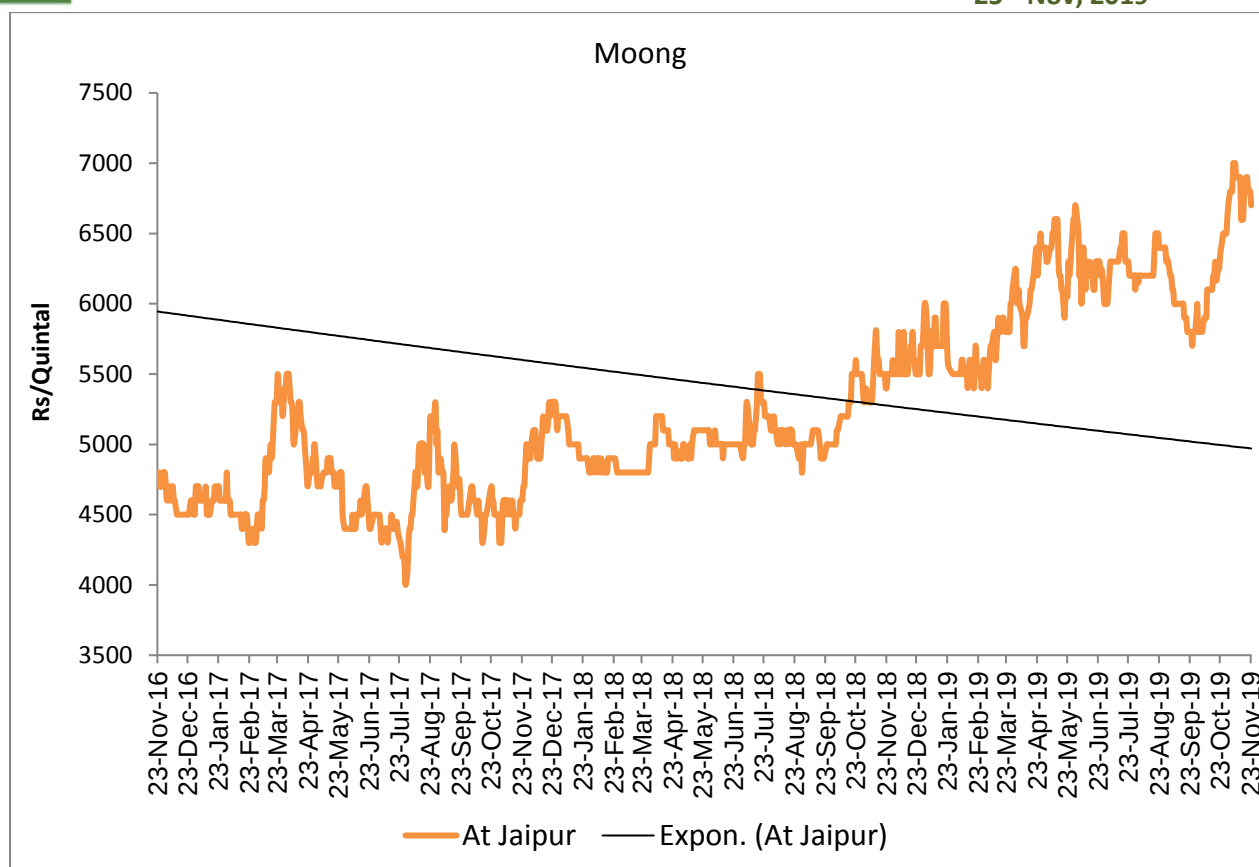

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum.

Green Gram (Moong):

Market Recap:

Moong procurement is on and it remains supportive to moong market. However, millers are unwilling to buy at higher level as they have fears that govt would release stock below MSP in the first quarter of new year. In Jaipur market moong is being traded at Rs 6600-6700 per qtl. In south Indian market it traded at Rs 6300-6700 per qtl. Steady tone may prevail in moong market.

There is a fear in the market that govt may relax import quantity if prices continue to move up. If rabi crops fail, relaxation might be seen. Consumer and food ministry has already advised concern ministry to consider relaxation on import quota. All these developments are distorting sentiments in the market. Procurement is on and Nafed has procured around 30,000 MT so far. Import quantity is expected to remain restricted disparity and fixed quota for import.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.

Import- Export & Average Monthly CiF:

Pulses Wise Technical Outlook For The Week:-

Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Nov.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4400 to 4700 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4650 and second target 4700 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4400	4500	4750	4850

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook – Weakness may prevail in pea market as chana remains unsupportive for pea. Import flow is pressurizing cash market. If chana trades firm, it may recover.

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4400-4650 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4400 with the first target of 4600 and second target 4700 with stop loss at 4350 level.

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4400	4500	4650	4750

Masoor:

Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly weak movement is likely to be noticed in coming week.

Technical analysis:

Chart depicts steady to weak movement in the market.

RSI oscillator is moving down in neutral region.

Expected price range is 4400-4750

Strategy: Buy on dip:

Trade Recommendations: Buy around 4400 with the first target of 4550 and second target 4600 with stop loss at 4350 level.
