Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

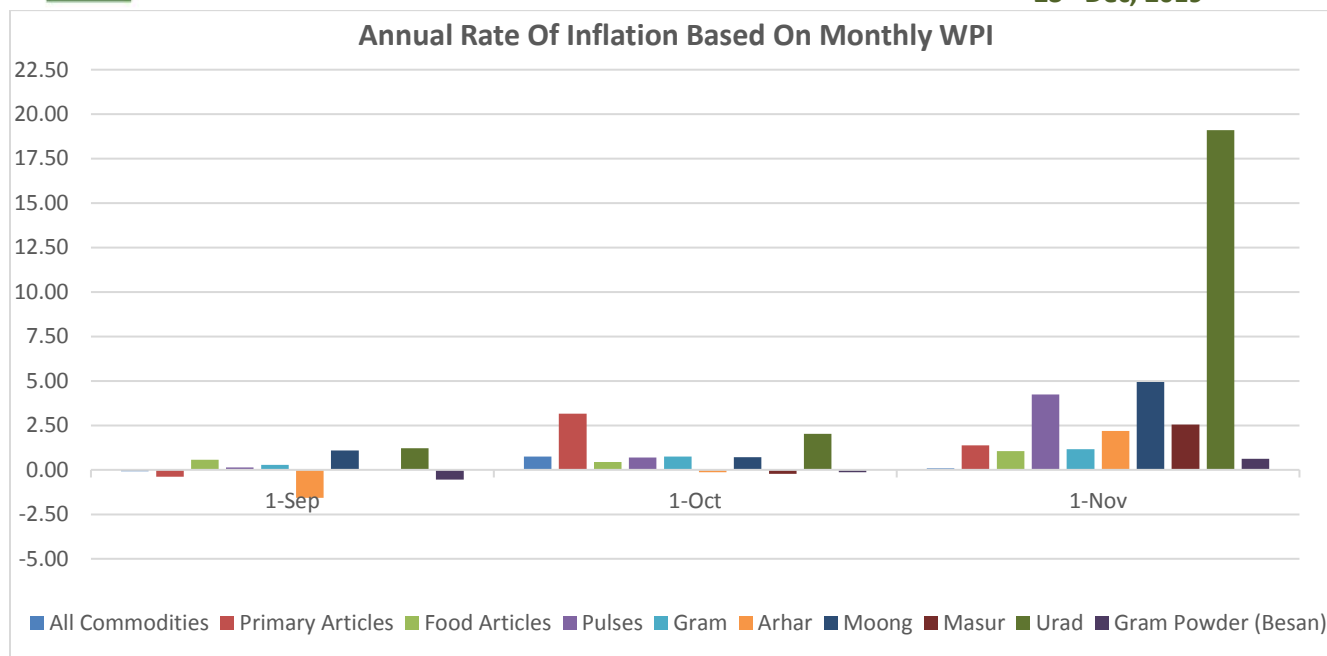

- **Indian farmers have covered 131.46 lakh ha , up by 0.6% from last year(131.38 lakh ha).** Farmers have covered 2.97 % higher area under chana to 89.28lakh ha against 86.70 lakh ha. Lentils area is down by 7.26 % to 14.49 lakh ha. Farmers have covered 15.62 lakh ha last year. Peas area has been reported at 8.73 lakh ha against 8.50 lakh ha. Farmers have covered 5.01 lakh ha, down by 4.48 % from last year. Moong area is running down by 29.38% to 1.83 lakh ha. Normal area under moong is 10.10lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 0.99,7.87%and 6.84% so far. Only chana and peas area has been reported up.
- **Central govt has allocated 8.47 lakh MT pulses on subsidized rates to various states.** Under this allocation 3.2lakhMT tur,2 lakh MT urad,1.2 lakh MT chana,1.5 lakh MT mung and 0.57 lakh MT masur have been offered. It may have a cooling impact of cash pulses market.
- **Clearing all gossips over urad import quota running into the market the DGFT has issued notification** of increasing import quota from 1.5 lakh MT to 4.0 lakh MT for a year. Almost 1.5lakh MT has already been imported and 1.5 to 2 lakh MT is expected now in Jan ,Feb and Mar-2020. Immediate import is not possible. It would take atleast one month time from registration to striking deal and shipping it into India. However, this decision would impact urad cash market and stockiest may prefer to offload stock now. Cash market has already decreased by Rs300 and it would decrease further by 300-400 per qtl. in coming weeks. At higher level demand for dal is weak right now. Availability of green vegetable is higher. So pressure may continue on urad market. Urar in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6500-6600. In Chennai market it is being offered at Rs 7500 and SQ at Rs8050 per qtl.
- **Higher availability of green vegetable in the month of Dec and weak demand for dhoya and chilka dal** pressurized moong cash market last week. Mills too had restricted buying at higher price. Resultantly, moong in Rajasthan decreased to Rs6700 after touching MSP level in local markets. Now no new crop is at hand. Kharif production size has been lower and there is no import parity. All these developments show shortage of quality moong in coming weeks. Around 80 % moong from UP, Bihar, MP and Jharkhand moved from farmers hands to stockiest. Mills hands now. Apart from moong harvested in Shekhavati, Merta, Kishangarh ,Kekri, Nagore, Dausa and Khatu line in Oct was lower than normal expectation. It hints moong price to go up by Rs 500 from current level in coming weeks. Right now demand is weak. As soon as pressure from green vegetable decreases, moong is bound to move up again.
- **Central govt. has offered 8.47 lakh MT pulses to state govts. from buffer stock.** Out of total 3.2 lakh MT tur has been offered. It would ensure better supply side in coming months. As arrival of new tur is increasing week on week basis, pressure seems on tur market. Another reason for lower price of new tur is higher moisture content ranging from 14 to 18 %. In Gulberga market new tur is being traded at Rs 5350-5400. It may move further up once dry crop starts coming into markets. Some support is expected from procurement drive too when Nafed and FCI would start procuring tur on MSP. Target for tur procurement has been fixed at 5,45,573 MT. Besides, FCI too would procure during peak arrival season in Karnataka, Maharashtra, Gujarat and AP. All these developments hint market to improve in new year. Apart from this Karnataka state govt. is planning to offer bonus of Rs 350-450 per qtl. over and above MSP. It may lend support to cash market. As crop size is lower despite improvement in standing crop, cash market seems to improve from current level.
- **Lentils cash market traded up taking clue from firm international market and 7.26% lower area** coverage in local market. Farmers in India have covered 11.49 lakh ha against 15.62 lakh ha last year so far. With improving demand in domestic market and restricted selling by local stockiest have started pushing up cash market price. It may move further towards MSP level as new crop is still two months away from now. Even importers have started quoting higher price at ports. Govt. has not changed its import policy and import would continue at 30 % (applicable 33%) import duty. As B, desh, Pakistan and Nepal are buying aggressively amid active buying by Indian importers, lentils price in global market is bound to go up. It would lend support domestic market too.
- **Restriction continues on peas import at 1.5 lakh MT and import is possible now only through Kolkata port.** So prices of peas moved up and it supported chana market too. New crop is almost two and a half months away. Import volume is

limited. So supply in the rest of the month is possible through central pool. Nafed has plan to sell 6 lakh MT chana during Jan and Feb. Consumption is expected to be 16 lakh MT by Feb end. Even private trades too would prefer to release their stock during the period. It is expected to be around 5 to 6 lakh MT. So total supply would be around 12 lakh MT, excluding reserve stock of 10 lakh MT held in central pool. It would support chana market to some extent in coming weeks. In Delhi market it may trade at Rs 4500-4700. Even futures too trades firm. It would not move beyond MSP as area is bound to cross 105 lakh ha this year as bumper crop seems very much on the card.

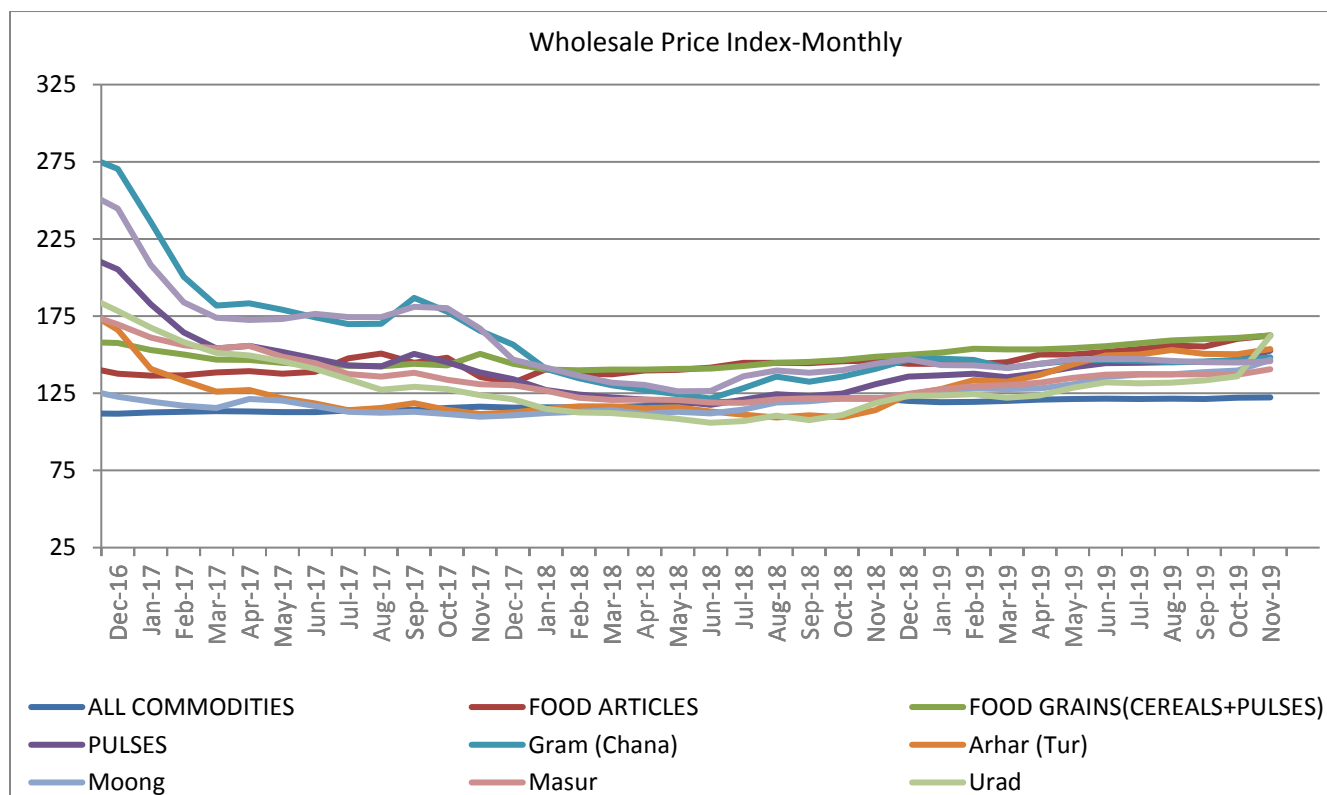

International Market Update:

- **Dry peas production in Canada increased by 18% to 42 lakh MT in 2019-20.** The reason behind higher production is mainly attributed to higher area in Saskatchewan and Alberta despite lower yield in comparison to last year. Out of total yellow peas production is 35 lakh MT while green pea is 6 lakh MT. The rest are other varieties. Supply has increased to only 4.6 Mt, due to lower carry-in stocks. Export is expected to touch at 34 lakh MT. Carryout is expected to be higher due to higher supply in 2019-20.
- **US dry peas area is expected to increase to 11 lakh acres in 2019-20. Acreage has increased in Montana.** Production in US is expected to be around 10 lakh MT. US dry peas are expected to compete, on a smaller scale, in Canadian export markets such as China and the Philippines.
- **Lentils production in Canada is expected to increase by 4% to 22 lakh MT in 2019-20** due to higher yield. Large green lentil production is estimated to have fallen from last year to 0.5 Mt while red lentil production rose to about 1.4 Mt. Production of the other remaining lentil types is estimated to have fallen below 0.3 Mt.
- **Chana production in Canada may decrease by 19% to 2.52 lakh MT in 2019-20. Crop quality** is expected to be below average when compared to the previous year. Supply is forecast to rise as higher carry-in stocks more than offset the lower production.
- **Chickpeas production in US is expected to decrease sharply to 3.0 lakh MT in 2019-20 as area coverage** declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now.** Dry pea harvesting is over in 98% area while it is 90% for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production** has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues, yield has been down this year for all pulses in US.
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20. However, production** is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

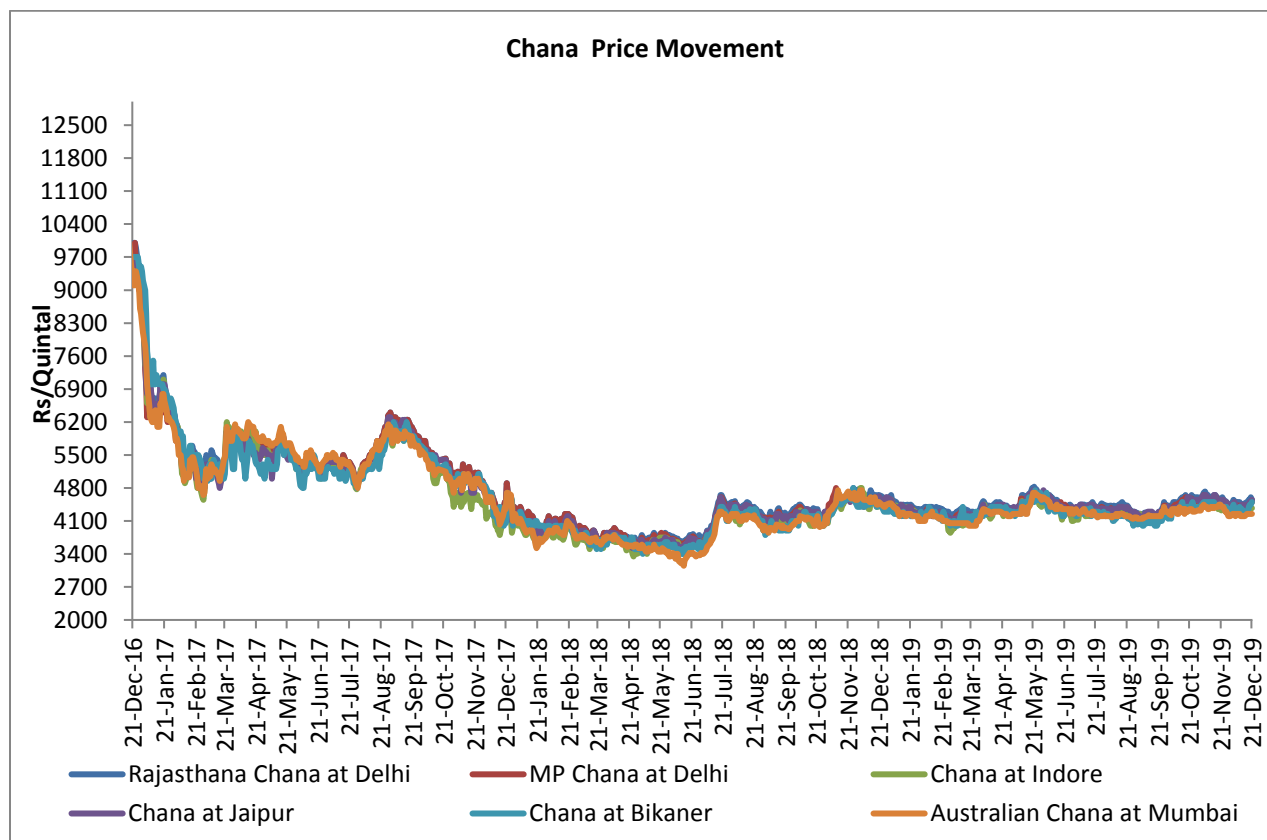

Pulses WPI increased by 6.2 points from 146.3 in Oct to 152.5 in Nov-2019

Pulses-Wise Scenario:
Chana

Current Scenario:

Farmers have covered 89.28 lakh ha area so far, up by 2.97 % from last year till date. Weather condition for chana sowing remains favorable and farmers may cover higher area under chana in coming weeks. Despite lower price in domestic market area under chana would cross 105 lakh ha as farmers in Rajasthan, M.P, are using even unfertile land this year due to good moisture level in the field and higher MSP (Rs 4875 per qtl.). Cash market has recovered as demand from mills improved in recent days. However, recovery would not sustain as there is plenty of stock. Futures remain supportive and may move up further. Future may touch 4525-30 in coming weeks. Nafed still has around 15 lakh MT chana stock, including reserve stock. New crop would be available from Feb end so, the quantity with Nafed may easily take care of chana demand for next three months. Besides, private trades too would prefer to lighten its stock before new crop. In Delhi market chana is being traded at Rs 4450-4550. If demand continues to improve and Nafed decides not to sell stock below 4400, it may move up to 4650-4750. Otherwise it would come down again. For chana market Nafed is on driver's seat. Weather condition in Jan and Feb too would play a crucial role as price driver.

All India average price for Chana increased by 1.46 percent from Rs 4374 to 4447 per qtl. during review week. Australian Chana (imported) price too increased by 0.98 percent from Rs 4208 to Rs 4250 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Slight recovery might be seen in chana cash market this week despite higher area coverage. Futures remain supportive. Stake holders should buy on correction of Rs75-100 from current level.

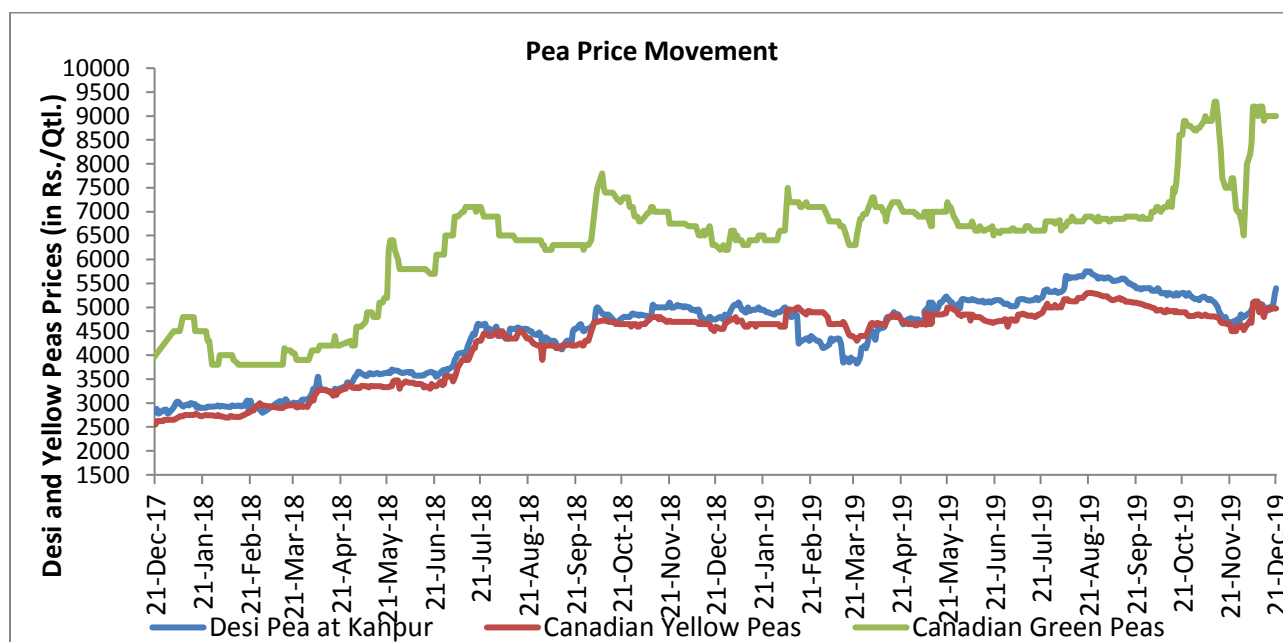

Peas (Matar):

Market Recap:

Now import has been allowed only through Kolkata port. Import quantity has not been increased and it is still fixed at 1.5 lakh MT. After decline in cash peas market slight recovery is expected this month as stock in private hands is dwindling with restriction of import. Area coverage too is 2.80 % to 8.73 lakh ha so far against normal of 9.45 lakh ha for the whole

season. However, illegal import from B'desh and Nepal continues to affect price in major consuming markets. Higher availability of chana too have capped uptrend in peas market. Under emerging scenario range bound movement is expected in Dec. Despite higher prevailing prices in comparison to chana in domestic market, the farm ministry is unwilling to relax quantitative restriction on imports of yellow peas as other pulses availability except urad in domestic market is ample and prices of these pulses are ruling lower. Earlier the farm ministry in June had suggested to increase import volume from 1.5 to 2 lakh MT. Earlier in March -2019, the pea import quantity was increased from 1 to 1.5 lakh MT. Now, food minister has said that availability of pulses is ample at 2.5 MMT for 2019-20 in central pool any short fall can easily be met till March-2020..It hints that peas import quantity is unlikely to be increased further even in the fourth quarters.

Pea in Mumbai market is being traded down at Rs. 4900-4925, while in Kanpur market it is being traded at Rs 5350-5400 per qtl. As chana price has started increasing, pea too may recover slightly in tandem with chana price. Arrival in local markets has decreased and it may support pea market to some extent. Stake holders should buy after downward correction. Restriction on pea import at 1.5 lakh tonne till March-2020 and lower availability of imported stock may support pea market once again from mid Dec as demand starts improving at this point of time. If chana continues to trade firm, pea price might recover too. Under emerging scenario steady to slightly firm tone may prevail.

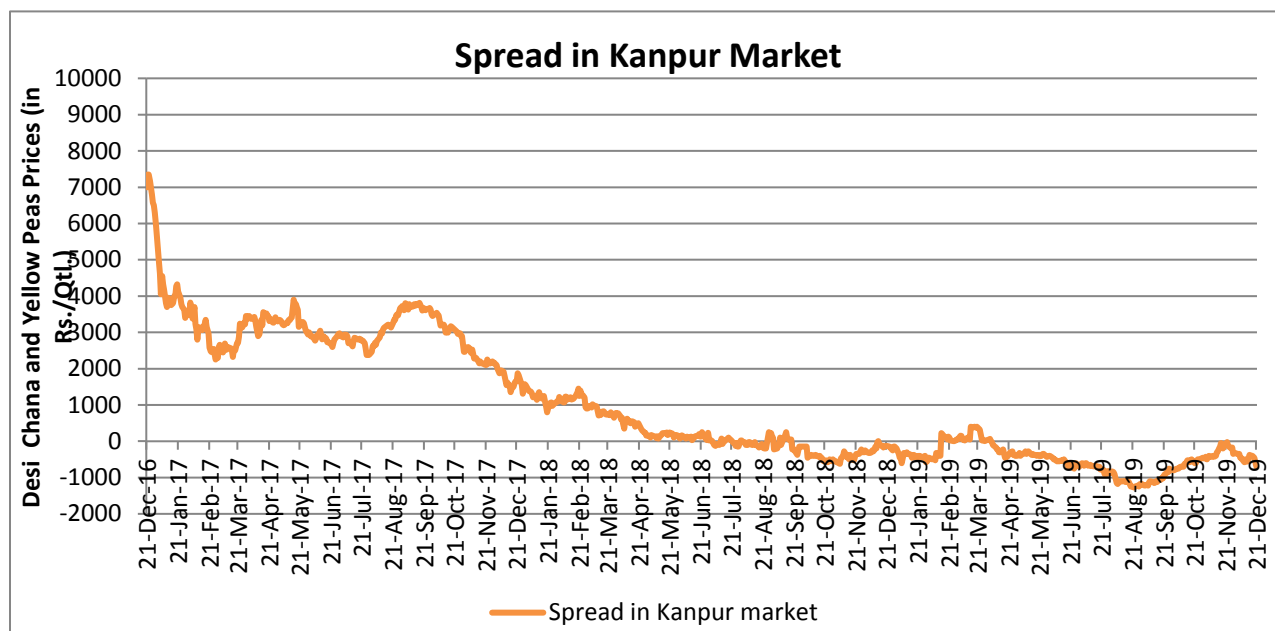

Current Market Dynamics & Outlook:

Pea market recovered due to slower pace of import flow, quantity restriction and lower availability of imported stock. Kanpur market traded up by Rs400 at Rs 5300-5450 per qtl due to restriction at import . Overall, all India average price decreased b0.34% to Rs 5350 per qtl in the thir week of Dec. In Mumbai market, pea traded at Rs 4920.. Stake holders should retain stock as stock at port is dwindling now and demand for festive season begins. Firmness may continue with increasing chana price.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 525 to Rs 725 due to increased pea and decreased chana price. Spread is expected to remain in the negative zone in Dec too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week.

MarketOutlook: Outlook remains steady to slightly firm this week.

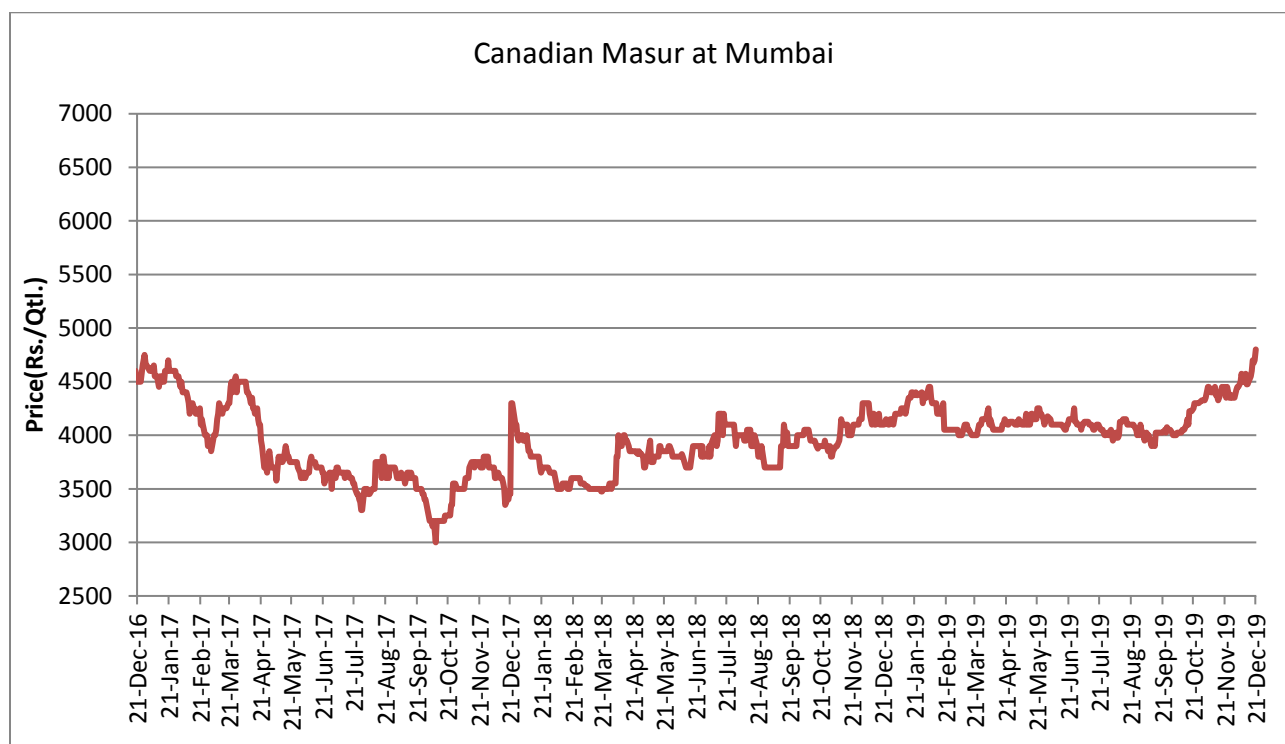

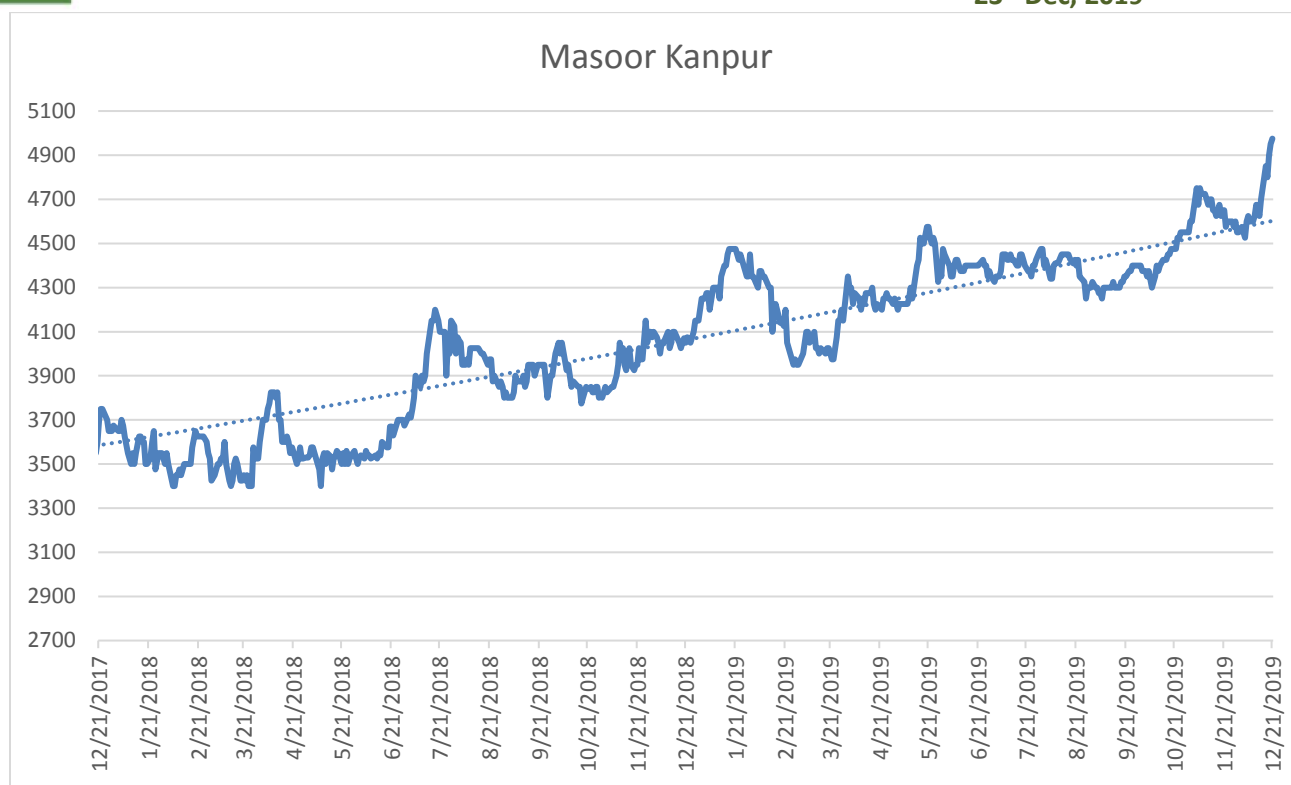

Lentils (Masoor):

Market Recap:

Lentils cash market traded up taking clue from firm international market and 7.26% lower area coverage in local market. Farmers in India have covered 11.49 lakh ha against 15.62 lakh ha last year so far. With improving demand in domestic market and restricted selling by local stockiest have started pushing up cash market price. It may move further towards MSP level as new crop is still two months away from now. Even importers have started quoting higher price at ports. Govt. has not changed its import policy and import would continue at 30% (applicable 33%) import duty. As B, desh, Pakistan and Nepal are buying aggressively amid active buying by Indian importers, lentils price in global market is bound to go up. It would lend support domestic market too. Lentil vessel is being quoted at Rs 4550-4650 per quintal and container is being quoted at Rs 4750-4850 per quintal. In Kanpur market it is being traded at Rs 4850-4900 per qtl. Nafed selling would remain crucial apart from import flow and weather condition in Dec-Jan.

Current Scenario:

In the 3rd week of Dec-2019, average price in key market Kanpur was up slightly up 1.45 % from Rs 4700 to Rs 4800-4850-per qtl.. Prices are likely to trade steady to slightly firm in the 4th week of Dec, due to improved demand and restricted selling by stockiest.

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand from mills and restricted selling by stockiests. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way utrend.

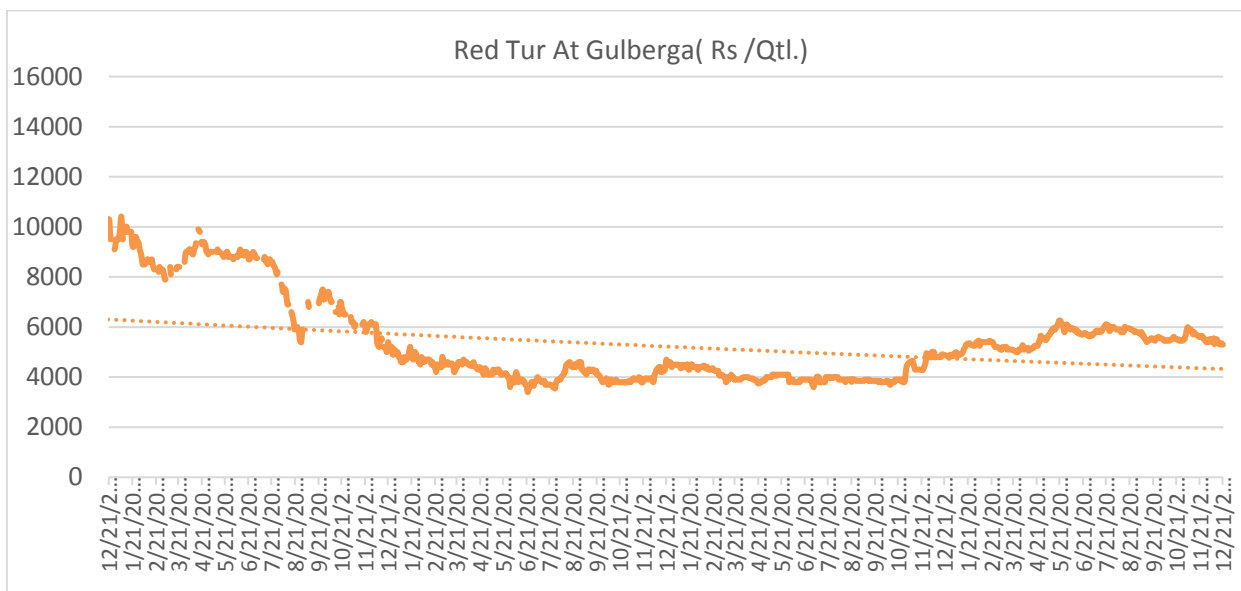

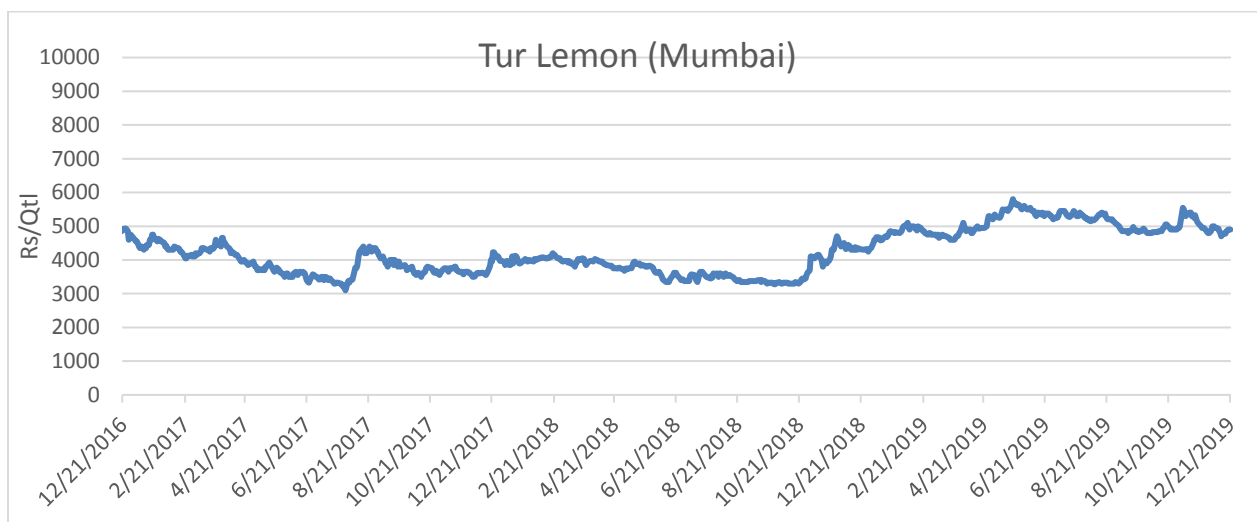

Pigeon Pea (Tur/Toor):

Market Recap:

Tur crop condition is good and new arrival commenced in parts of M.P. Karnataka and U.P. Pressure is likely to build up by end Dec in Karnataka.. Private trades have started offloading stock and pressure is seen on the cash market right now. Any spike in cash tur market is unlikely as G2G import continues. In Gulberga market tur is being traded at Rs 5350-5450 per qtl. As there is delay in procurement drive, pressure may continue on tur market. It may decrease by Rs 100-200 more in coming weeks. There is ample stock in central pool and Nafed may start selling old crop. Overall outlook for tur market seems weak with commencement of new arrival. Pressure may build up by the end of this month.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. Crop size may cross 37lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5200-5600 during current week.

Market Outlook:

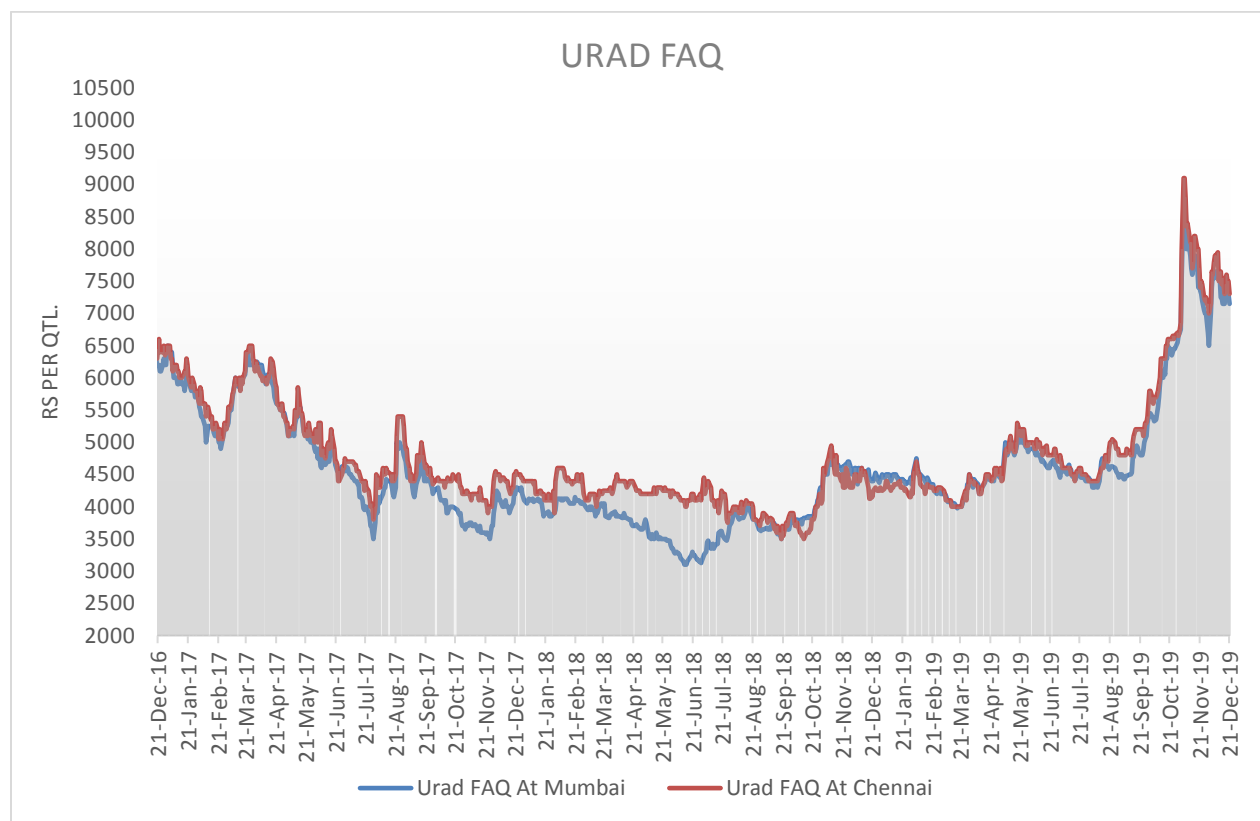

In the 3rd week of Dec-2019, average price in Gulberga market was down by Rs 50 to Rs 5350, due to higher import volume, selling of imported stock at lower price and fear of Nafed selling. Tur price is likely to decrease further as demand remains weak. New arrival started now.

Black Matpe (Urad):

Clearing all gossips over urad import quota running into the market the DGFT has issued notification of increasing import quota from 1.5 lakh MT to 4.0 lakh MT for a year. Almost 1.5 lakh MT has already been imported and 1.5 to 2 lakh MT is expected now in Jan, Feb and Mar-2020. Immediate import is not possible. It would take at least one month time from registration to striking deal and shipping it into India. However, this decision would impact urad cash market and stockiest may prefer to offload stock now. Cash market has already decreased by Rs 300 and it would decrease further by 300-400 per qtl. in coming weeks. At higher level demand for dal is weak right now. Availability of green vegetable is higher. So pressure may continue on urad market. Urad in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6500-6600. In Chennai market it is being offered at Rs 7500 and SQ at Rs 8050 per qtl.

Current Market Dynamics & Outlook:

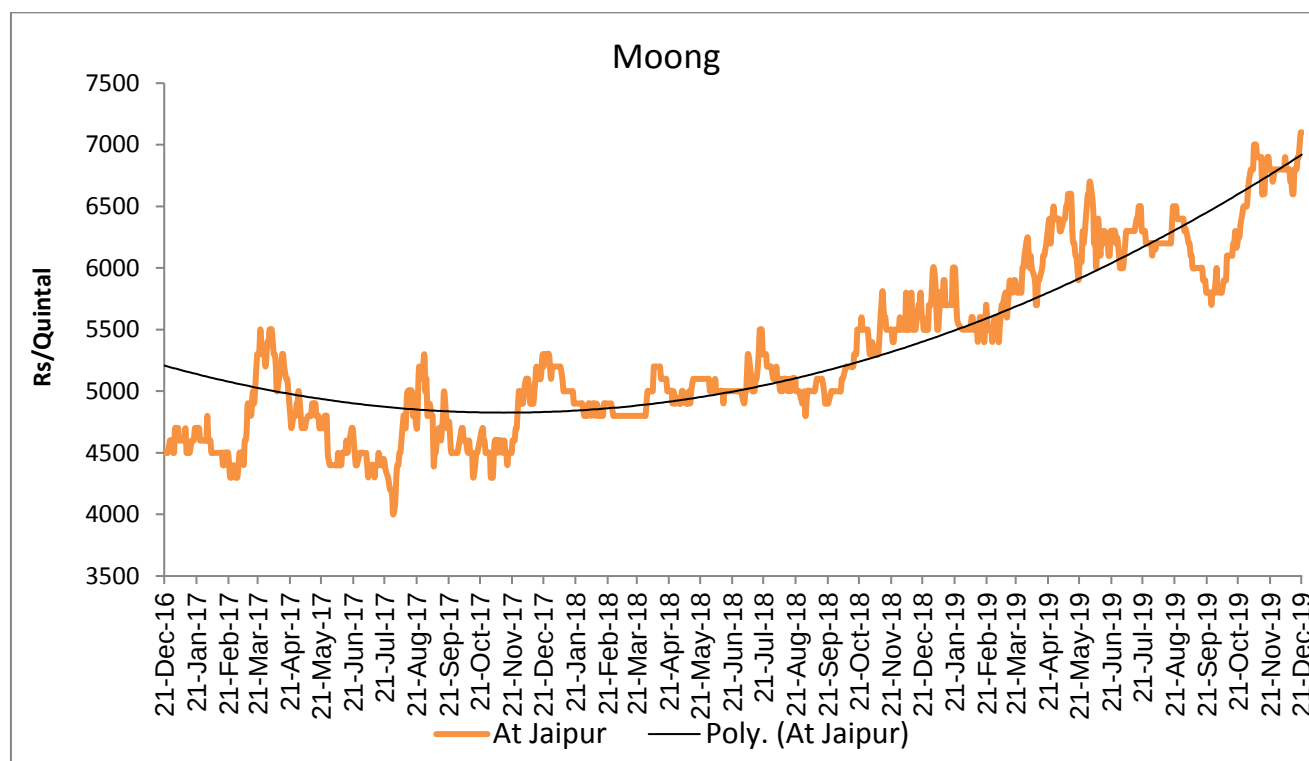

Nafed too can intervene into the market with govt.'s consent as it has around 2 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season. Right now in Chennai market urad is being traded at RS 7300 and may come down to Rs 7100.

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum.

Green Gram (Moong):
Market Recap:

Higher availability of green vegetable in the month of Dec and weak demand for dhoya and chilka dal pressurized monng cash market last week. Mills too had restricted buying at higher price. Resultantly, moong in Rajasthan decreased to rs6700 after touching MSP level in local markets. Now no new crop is at hand. Kharif production size has been lower and there is no import parity. All these developments shows shortage of quality moong in coming weeks. Around 80 % moong from UP, Bihar, MP and Jharkhand moved from farmers hands to stockiest. Mills hands now. Apart from it moong harvested in Shekhavati, Merta, Kishangarh, Kekri, Nagore, Dausa and Khatu line in Oct was lower than normal expectation. It hints moong price to go up by Rs 500 from current level in coming weeks. Right now demand is weak. As soon as pressure from green vegetable decreases, moong is bound to move up again.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Nov.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4400 to 4700 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4550 and second target 4650 with stop loss at 4400 level.

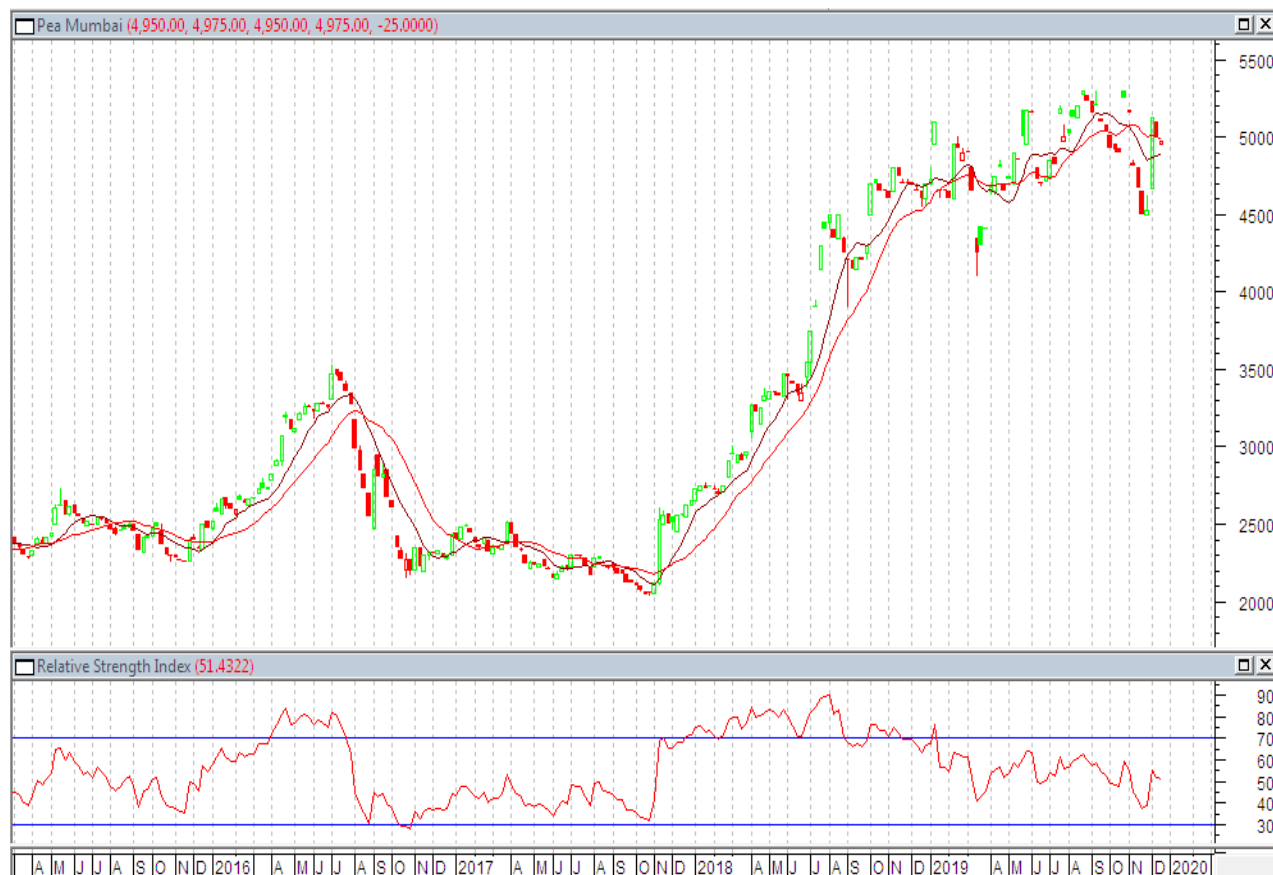

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4350	4500	4750	4850

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook – Improvement may be seen in pea market as chana may move up and support pea market. If chana trades firm.it may recover.

Technical Analysis:

- Candle stick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 4900-5350 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 4900 with the first target of 5200 and second target 5300 with stop loss at 4850 level.

Support & Resistance
