Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Indian farmers have covered 140.13 lakh ha , up by 2.42% from last year(136.82 lakh ha).** Farmers have covered 5.64 % higher area under chana to 94.96lakh ha against 89.89 lakh ha. Last year as on 27th Dec-2019. Lentils area is down by 4.53 % to 15.18 lakh ha. Farmers had covered 15.90 lakh ha last year. Peas area has been reported at 9.08 lakh ha against 8.81 lakh ha. Farmers have covered 5.70 lakh ha under urad, down by 2.23 % from last year. Moong area is running down by 16.67% to 2.55 lakh ha. Normal area under moong is 10.10lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 2.67, 5.57 % and 6.31% so far. Only chana and peas area has been reported up. Overall rabi area is up so far.
- **Indian importers imported total 2.83 lakh MT pulses in Nov-2019.** out of total yellow peas quantity was 74401.71 MT. Green peas quantity was 6384.57 MT. In Nov India imported 49685.34 MT. Urad import was registered at 43978.87 MT. Tur import was registered at 42195.15 MT in Nov-2019. Moong, Kidney bean and green peas import was limited.
- **New crop of tur has started trickling in in markets of Karnataka & Maharashtra and pressure is likely to build from the second week of January.** Moisture level in new crop is higher and is expected to decrease from mid –Jan. There is no import at this point of time. Higher arrival may pressurize tur market to a certain extent. However, with procurement drive expected from first week of Jan may support market at lower level. Import licence would be issued from April-2020 and it would continue till May. So, crop from Myanmar is expected in June. Quota for tur import for private trade is 4 lakh MT, besides, G2G basis import would continue. So any major spike is unlikely. In Gulberga market tur is being traded at Rs 5400-5450. In Jan market is likely to trade in the range of Rs 5200-5700. Govt has fixed tur procurement target at 545573 MT.
- **DGFT has given additional import quota of 2.5 lakh MT for urad over and above 1.5 lakh MT.** Importers can apply for importing urad till 31st Dec-2019. Market sources say that old crop available in Myanmar is around 1 lakh MT while new crop would be available in mid Feb. Right now urad lying at ports are not accepted. Even in local market new urad would be available in Feb end –March. So any spike is unlikely. For fulfilling the shortage gap, Nafed may continue to release stock to control price. In local market urad may continue to trade in the range of Rs 6800-7200. Demand from mills is weak at higher level.
- **Nafed has procured 43.50 MT urad from kharif -2019 so far. As prices are ruling higher procured quantity has been lower as expected.** Urad procurement target has been fixed at 235550 MT for the whole year starting from Oct-2019-Sep 2020. New rabi crop would be available from March. Target is unlikely to match as prices are ruling higher and would continue to rule above MSP
- **Steady to slightly firm trend may prevail in cash moong market.** Arrival is decreasing while procurement is on. Millers are engaged in need based buying. Demand at higher level is weak at this point of time. However, quality crop would continue to rule higher as availability is lower. In Jaipur market moong chamki is being traded at Rs 6850-6950. New rabi crop would be available in March. If prices of other pulses move up, it may support moong market to a certain extent. Moong in cash market may continue to trade at Rs 6500-7000 in various markets, depending on quality.
- **Improved sowing status and good prevailing weather condition for chana crop remain restrictive** for any major spike. New crop is hardly 2.5 months away while there is ample stock in central pool. Stock in private hands is decreasing now. Arrival in major markets like Rajasthan and Madhya Pradesh too have decreased. With restriction on peas import prices of chana improved and traded at Rs 4500-4600 per qtl. However, uptrend could not sustain and it decreased once again. In normal condition chana is likely to trade steady in the range of Rs 4450-4650. Weather condition in Jan and Feb would be crucial. If it disturbs standing crop, price may cross new MSP. Right now supply and demand side is normal. Stake holders should continue to release stock at every hike of Rs 75-100.
- **With changed status from the free to restricted category and hefty levy imposed on peas its import has halted completely now.** The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green, dun and kaspia) and changed its status in the third week of Dec. It has affected importers badly whose consignment

is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 8500-8800 per qtl from 5600 per qtl a week ago. Against the quota of 1.5 lakh MT over 5.5 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now.

- **Lentil cash market traded up by 4.08 % to Rs 5095 and may move up further by Rs 200 as demand from mills increased while illegal entry from Nepal and B, desh remains restricted. Stockiest too have restricted selling. New crops expected in Feb end –March. Besides, import flow has decreased from 91 thousand MT to 49500 MT in Nov. Supply side seems tight at this point of time. Even area coverage is down by 4.53 % to 15.18 lakh ha. Apart from this lentil price is getting support from other pulses as prices of other pulses have improved.**

International Market Update:

- **Dry peas production in Canada increased by 18% to 42 lakh MT in 2019-20. The reason behind higher production is mainly attributed to higher area in Saskatchewan and Alberta despite lower yield in comparison to last year. Out of total yellow peas production is 35 lakh MT while green pea is 6 lakh MT. The rest are other varieties. Supply has increased to only 4.6 Mt, due to lower carry-in stocks. Export is expected to touch at 34 lakh MT. Carryout is expected to be higher due to higher supply in 2019-20.**
- **US dry peas area is expected to increase to 11 lakh acres in 2019-20. Acreage has increased in Montana. Production in US is expected to be around 10 lakh MT. US dry peas are expected to compete, on a smaller scale, in Canadian export markets such as China and the Philippines.**
- **Lentils production in Canada is expected to increase by 4% to 22 lakh MT in 2019-20 due to higher yield. Large green lentil production is estimated to have fallen from last year to 0.5 Mt while red lentil production rose to about 1.4 Mt. Production of the other remaining lentil types is estimated to have fallen below 0.3 Mt.**
- **Chana production in Canada may decrease by 19% to 2.52 lakh MT in 2019-20. Crop quality is expected to be below average when compared to the previous year. Supply is forecast to rise as higher carry-in stocks more than offset the lower production.**
- **Chickpeas production in US is expected to decrease sharply to 3.0 lakh MT in 2019-20 as area coverage declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.**
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now. Dry pea harvesting is over in 98% area while it is 90 % for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far.**
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues, yield has been down this year for all pulses in US.**
- **Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20. However, production is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.**

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 6.2 points from 146.3 in Oct to 152.5 in Nov-201

Pulses-Wise Scenario:
Chana
Current Scenario:

Farmers have covered 94.96 lakh ha area so far, up by 5.64 % from last year till date. Weather condition for chana sowing remains favorable and farmers may increase area further under chana in coming weeks. Despite lower price in domestic market area under chana would cross 105 lakh ha as farmers in Rajasthan, M.P, are using even unfertile land this year due to good moisture level in the field and higher MSP (Rs 4875 per qtl.). Cash market has recovered as demand from mills improved in recent days. However, recovery would not sustain as there is plenty of stock. Futures remains supportive and may move up further. Future may touch 4550-4600 in coming weeks. Nafed still has around 15 lakh MT chana stock, including reserve stock. New crop would be available from Feb end so, the quantity with Nafed may easily take care of chana demand for next three months. Besides, private traders too would prefer to lighten its stock before new crop. In Delhi market chana is being traded at Rs 4500-4550. If demand continues to improve and Nafed decides not to sell stock below 4400, it may move up to 4650-4750. Otherwise it would come down again. For chana market Nafed is on driver's seat. Weather condition in Jan and Feb too would play a crucial role as price driver.

All India average price for Chana increased by 0.72 percent from Rs 4450 to 4525 per qtl. during review week. Australian Chana (imported) price too increased by 0.18 percent from Rs 4250 to Rs 4280 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Slight recovery might be seen in chana cash market this week despite higher area coverage. Futures remain supportive. Stake holders should buy on correction of Rs75-100 from current level.

**Peas (Matar):
Market Recap:**

With changed status from the free to restricted category and hefty levy imposed on peas, its import has halted completely now. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and mung) and changed its status in the third week of Dec. It has affected importers badly whose consignment is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 8500-8800 per qtl from 5600 per qtl a week ago. Against the quota of 1.5 lakh MT over 5.5 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now.

Pea in Mumbai market traded sharply up at Rs.6100-6200 with closing the import window completely. It impacted price of peas in Kanpur market too and traded at Rs 5550-5600 per qtl. As chana price has started increasing, pea too may recover slightly in tandem with chana price. Arrival in local markets has decreased and it may support pea market to some extent. However, demand at higher level got affected and a downward correction of Rs 300-400 is expected in coming weeks.

Current Market Dynamics & Outlook:

Pea market recovered due to halted pace of import and lower availability of imported stock. Kanpur market traded up by Rs300-400 at Rs 5600-5650 per qtl due to restriction at import. New local crop would hit market in Jan end-Feb. So any major decrease is unlikely. Overall, all India average price increased by 11% to Rs 6250 per qtl in the fourth week of Dec. In Mumbai market, pea traded at Rs 62000. Stake holders should retain stock as stock at port is dwindling and demand for festive season begins. Firmness may continue with increasing chana price, but not without a good correction.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 725 to Rs 925 due to increased pea and decreased chana price. Spread is expected to remain in the negative zone in Jan too on relative movement in Chana prices. Overall outlook seems steady to slightly firm this week.

MarketOutlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Lentil cash market traded up by 4.08 % to Rs 5095 and may move up further by Rs 200 as demand from mills increased while illegal entry from Nepal and B, desh remains restricted. Stockiest too have restricted selling. New crop is expected in Feb end – March. Besides, import flow has decreased from 91 thousand MT to 49500 MT in Nov. Supply side seems tight at this point of time. Even area coverage is down by 4.53 % to 15.18 lakh ha. Apart from this lentil price is getting support from other pulses as prices of other pulses have improved. Buyers in Kolkata are active and sourcing it from Patna and MP. Prices have already crossed MSP and would sustain above MSP till new crop hits the market. Lentil vessel is being quoted at Rs 4550-4650 per quintal and container is being quoted at Rs 4800-4850 per quintal. In Kanpur market it is being traded at Rs 5175 per qtl. Nafed selling would remain crucial apart from import flow and weather condition in Jan. Feb

Current Scenario:

In the 4th week of Dec-2019, average price in key market Kanpur was up slightly up 4.08 % from Rs 4850 to Rs 5095 per qtl.. Prices are likely to trade steady to slightly firm in the 1st week of Jan, due to improved demand and restricted selling by stockiest amid decreased import flow.

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand from mills and restricted selling by stockiests. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way utrend.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur crop condition is good and new arrival commenced in parts of M.P. Karnataka and U.P. Pressure is likely to build up by end Dec in Karnataka.. Private trades have started offloading stock and pressure is seen on the cash market right now. Any spike in cash tur market is unlikely as G2G import continues. In Gulberga market tur is being traded at Rs 5300-5400 per qtl. As there is delay in procurement drive, pressure may continue on tur market. It may decrease by Rs 100-200 more in coming weeks. There is ample stock in central pool and Nafed may start selling old crop. Overall outlook for tur market seems weak with commencement of new arrival. Pressure may build up by the end of this month.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. Crop size may cross 37lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5200-5600 during current week.

Market Outlook:

In the 4th week of Dec-2019, average price in Gulberga market was down by Rs 50 to Rs 5300, due to higher import volume, selling of imported stock at lower price and fear of Nafed selling. Tur price is likely to decrease further as demand remains weak. New arrival started now.

Black Matpe (Urad):

Clearing all gossips over urad import quota running into the market the DGFT has issued notification of increasing import quota from 1.5 lakh MT to 4.0 lakh MT for a year. Almost 1.5 lakh MT has already been imported and 1.5 to 2 lakh MT is expected now in Jan, Feb and Mar-2020. Immediate import is not possible. It would take at least one month time from registration to striking deal and shipping it into India. However, this decision would impact urad cash market and stockiest may prefer to offload stock now. Cash market has already decreased by Rs 300 and it would decrease further by 300-400 per qtl. in coming weeks. At higher level demand for dal is weak right now. Availability of green vegetable is higher. So pressure may continue on urad market. Urad in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6500-6600. In Chennai market it is being offered at Rs 7500 and SQ at Rs 8050 per qtl.

Current Market Dynamics & Outlook:

Nafed too can intervene into the market with govt.'s consent as it has around 2 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season. Right now in Chennai market urad is being traded at RS 7400 and may come down to Rs 7100.

Market Outlook: Urad Prices are likely to show steady to slightly weak momentum.

Green Gram (Moong):
Market Recap:

Higher availability of green vegetable in the month of Dec and weak demand for dhoya and chilka dal pressurized monng cash market last week. Mills too had restricted buying at higher price. Resultantly, moong in Rajasthan decreased to rs6700 after touching MSP level in local markets. Now no new crop is at hand. Kharif production size has been lower and there is no import parity. All these developments shows shortage of quality moong in coming weeks. Around 80 % moong from UP, Bihar, MP and Jharkhand moved from farmers hands to stockiest. Mills hands now. Apart from it moong harvested in Shekhavati, Merta, Kishangarh, Kekri, Nagore, Dausa and Khatu line in Oct was lower than normal expectation. It hints moong price to go up by Rs 500 from current level in coming weeks. Right now demand is weak. As soon as pressure from green vegetable decreases, moong is bound to move up again

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly firm in the coming days.

Chart depicts steady to slightly firm movement in Nov.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4400 to 4700 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4550 and second target 4650 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4350	4500	4750	4850

Spot Market outlook: Chana prices are likely to show steady to slightly firm movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook – Improvement may be seen in pea market as chana may move up and support pea market. If chana trades firm, it may recover. However, at higher level, a downward correction is expected.

Technical Analysis:

- Candle stick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 5800-6450 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 6000 with the first target of 6300 and second target 6400 with stop loss at 5850 level.
