Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- Indian farmers have covered 146.22 lakh ha , up by 2.42% from last year(142.22 lakh ha).** Farmers have covered 5.72 % higher area under chana to 98.52lakh ha against 93.19 lakh ha. Last year as on 3rd Jan -2020. Lentils area is down by 4.33 % to 15.46 lakh ha. Farmers had covered 16.33 lakh ha last year. Peas area has been reported at 9.27 lakh ha against 9.08 lakh ha. Farmers have covered 6.42 lakh ha under urad, up by 4.22 % from last year. Moong area is running down by 9.32% to 3.31 lakh ha. Normal area under moong is 10.10lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 4.23,2.27 and 5.07% so far. Only chana,urad and peas area has been reported up. Overall rabi area is up by 2.81% so far.
- Rains in some parts of Maharashtra and Karnataka have affected harvesting activities in both states.** If rains continues, it may affect quality of matured crop. There is rumour in the market that standing crop got affected. There are some damage of harvested crop. Weather has already opened and sunshine is considered to be beneficial to the standing crop. Arrival in markets has decreased due to weather disturbance. As procurement is expected from mid Jan, prices are expected to improve from current level. Prices are ruling lower due to higher moisture level in new crop. Moisture level is still above 14/15. If sunshine continues, bulk buyers would return to market and it would support market once again. Tur is being traded at Rs 5100-5200 in Gulberga market. It may decrease by Rs 100 more on arrival pressure. At this level good buying is expected and it would push up market to wards MSP level.
- Urad cash market traded almost steady and demand from mills got affected at higher level.** Offtake of dal in retail market too is weak. Besides, additional quota of 2.5 lakh MT (total 4 lakh MT) has weakened inner tone in the market. Stockiest are unwilling to hold stock for longer period. So supply in market is normal. As Nafed too may decide to offload old stock, market may continue to trade steady. In Chennai market urad is being traded at Rs 7400-7450 while in Mumbai market it was quoted at Rs 7100-7200. Rabi area is likely to be same as last year. Yield might be improve if weather in south India opens up (likely). So steady trend may prevail in cash urad market this week. It may continue to trade in the range of Rs 7000-7500.
- Decreased arrivals in major markets and improvement in other pulses price helped moong cash market** to move up again. Moong cash market moved up by Rs 200-300 last week. Quality of 40 % kharif crop is discoloured and stock in pipeline is decreasing fast. Besides, millers have started purchasing quality crop. It has created shortfall in quality crop. New crop is expected in March from Bihar and UP, after that summer season crop would be available in May. So moong price is likely to trade in the range of Rs 7000-8000. In Jaipur market FAQ quality is being traded at Rs 7100-7200 while superior quality has touched 7500. At this level some selling by private trade is expected. Besides, Nafed too would prefer to release stock to contain market price. Overall scenario seems steady to firm in coming weeks.
- Chana market traded steady to slightly weak during the week under review.** Improved sowing status and good prevailing weather condition for chana crop remain restrictive for any major spike. New crop is hardly 2.5 months away while there is ample stock in central pool. Stock in private hands is decreasing now. Arrivals in major markets like Rajasthan and Madhya Pradesh have also decreased. With restriction on peas import prices of chana improved and traded at Rs 4500-4600 per qtl. However, uptrend could not sustain and it decreased once again. In normal condition chana is likely to trade steady in the range of Rs 4500-4600. Weather condition in Jan and Feb would be crucial. If it disturbs standing crop, price may cross new MSP. Right now supply and demand side is normal. Stake holders should continue to release stock at every hike of Rs 75-100.
- Stock of lentils in local markets has decreased considerably against ongoing demand from mills.** Besides, import prices have gone up in recent weeks. It has pushed up masur price in local market by Rs 100-150 per qtl. In local market built price of masur was registered at Rs 5350-5400. Even imported masur from Canada was quoted at Rs 5200-5250. As area is lagging by 5.33 % to 15.46 lakh ha, crop size might be similar as last year. It may help market to move further up by Rs 100-200. Stockiest are unwilling to sell stock sensing uptrend to continue. Australia and Canada are quoting higher price.

- *Weak demand at higher level pressurized peas market and it decreased once again. As chana price is moving up, so more decrease in pea price is unlikely.*

International Market Update:

- ***As per The Canadian Grain Commission latest reports Canada has exported 47,700 metric tons lentils in November-2019. It was 31,000 MT last year in Nov. Canada had exported 32100 MT in Oct. Thus total shipment during ongoing marketing year reached at 256,500 MT against 156,400 MT last year till Nov.***
- ***The new year started with firm tone in global lentil markets on improved demand from bulk buyers. As per market source, average discount for No 2 Canada large green lentils versus No 1 grade has jumped 41% to CDN \$1.14 per 100 pounds so far this marketing year. The Extra 3 discount has risen 32% to average \$6.14, while the No 3 Canada discount to No 1 grade product has risen 25% to \$9.52 per 100 pounds.***
- ***Dry peas production in Canada increased by 18% to 42 lakh MT in 2019-20. The reason behind higher production is mainly attributed to higher area in Saskatchewan and Alberta despite lower yield in comparison to last year. Out of total yellow peas production is 35 lakh MT while green pea is 6 lakh MT. The rest are other varieties. Supply has increased to only 4.6 Mt, due to lower carry-in stocks. Export is expected to touch at 34 lakh MT. Carryout is expected to be higher due to higher supply in 2019-20.***
- ***US dry peas area is expected to increase to 11 lakh acres in 2019-20. Acreage has increased in Montana. Production in US is expected to be around 10 lakh MT. US dry peas are expected to compete, on a smaller scale, in Canadian export markets such as China and the Philippines.***
- ***Lentils production in Canada is expected to increase by 4% to 22 lakh MT in 2019-20 due to higher yield. Large green lentil production is estimated to have fallen from last year to 0.5 Mt while red lentil production rose to about 1.4 Mt. Production of the other remaining lentil types is estimated to have fallen below 0.3 Mt.***
- ***Chana production in Canada may decrease by 19% to 2.52 lakh MT in 2019-20. Crop quality is expected to be below average when compared to the previous year. Supply is forecast to rise as higher carry-in stocks more than offset the lower production.***
- ***Chickpeas production in US is expected to decrease sharply to 3.0 lakh MT in 2019-20 as area coverage declined to 4.5 lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.***
- ***As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now. Dry pea harvesting is over in 98% area while it is 90% for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far.***
- ***Dry peas production has been pegged at 856163 MT, lentil production at 2.47 lakh MT, total chickpeas production has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues, yield has been down this year for all pulses in US.***
- ***Lentil area in Australia is expected to decrease by 5.84% from 303 to 285 thousand ha in 2019-20. However, production is expected to increase by 18.89% from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.***

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 6.2 points from 146.3 in Oct to 152.5 in Nov-201

Pulses-Wise Scenario:

Chana

Current Scenario:

Farmers have covered 98.52 lakh ha area so far, up by 5.72 % from last year till date. Weather condition for chana sowing remains favorable and farmers may increase area further under chana in coming weeks. Recent rains are beneficial to the standing crops. Despite lower price in domestic market area under chana would cross 105 lakh ha as farmers in Rajasthan, M.P and Maharashtra have used even barren land this year due to good moisture level in the field and higher MSP (Rs 4875 per qtl.). Cash market has recovered as demand from mills improved in recent days. However, recovery would not sustain as there is plenty of stock. Future may decrease to 4350-4400 in coming weeks. At this level stake holders should buy again. Nafed still has around 15 lakh MT chana stock, including reserve stock. New crop would be available from Feb end so, the quantity with Nafed may easily take care of chana demand for next three months. Besides, private trades too would prefer to lighten its stock before new crop. In Delhi market chana is being traded at Rs 4400-4450. If demand continues to improve and Nafed decides not to sell stock below 4400, it may recover again move up to 4500-4650. For chana market Nafed is on driver's seat. Weather condition in Jan and Feb too would play a crucial role as price driver. As of now condition for better growth for plant may pressurize cash market.

All India average price for Chana decreased by 0.80 percent from Rs 4525 to 4538 per qtl. during review week. Australian Chana (imported) price increased by 1.87 percent from Rs 4280 to Rs 4347 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Slight recovery might be seen in chana cash market this week despite higher area coverage. Futures remain un-supportive. Stake holders should buy on correction of Rs75-100 from current level.

Peas (Matar):

Market Recap:

With changed status from the free to restricted category and hefty levy imposed on peas, its import has halted completely now. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and desi) and changed its status in the third week of Dec. It has affected importers badly whose consignment is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 10500-11,000 per qtl from 6000 per qtl a week ago. Against the quota of 1.5 lakh MT over 5.6 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now.

Pea in Mumbai market traded sharply at Rs.6000-6100 with closing the import window completely. It impacted price of peas in Kanpur market too and traded at Rs 5550-5600 per qtl. As chana price has declined, pea too may stay steady in tandem with chana price. Arrival in local markets has decreased and it may support pea market to some extent. However, demand at higher level got affected and a downward correction of Rs 200-300 is expected in coming weeks.

Current Market Dynamics & Outlook:

Pea market recovered due to halted pace of import and lower availability of imported stock. Kanpur market traded steady at Rs 5500-5600 per qtl due to restriction at import. New local crop would hit market in Jan end-Feb. So any major spike is unlikely. Overall, all India average price decreased by 1.34% to Rs 6000 per qtl in the first week of Jan. In Mumbai market, pea traded at Rs 6000. Stake holders should retain stock as stock at port is dwindling and demand for festive season begins. At higher level it is advisable to sell old stock.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 925 to Rs 825 due to decreased pea price. Spread is expected to remain in the negative zone in Jan too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week.

Market Outlook: Outlook remains steady to slightly weak this week.

Lentils (Masoor):

Market Recap:

Lentil cash market traded up by 5.20 % to Rs 5360 and may move up further by Rs 200 as demand from mills increased while illegal entry from Nepal and B, desh remains restricted. Stockiest too have restricted selling. New crop is expected in Feb end – March. Besides, import flow has decreased from 91 thousand MT to 49500 MT in Nov. Supply side seems tight at this point of time. Even area coverage is down by 4.33 % to 15.46 lakh ha. Apart from this lentil price is getting support from other pulses as prices of other pulses have improved. Buyers in Kolkata are active and sourcing it from Patna and MP. Prices have already crossed MSP and would sustain above MSP till new crop hits the market. Lentil vessel is being quoted at Rs 5200 per quintal and container is being quoted at Rs 5300-5350 per quintal. In Kanpur market it is being traded at Rs 5450 per qtl. Nafed selling would remain crucial apart from import flow and weather condition in Jan. Feb

Current Scenario:

In the 1st week of Jan-2019, average price in key market Kanpur was up slightly up 5.20 % from Rs 5080 to Rs 5370 per qtl.. Prices are likely to trade steady to slightly firm in the 2nd week of Jan, due to improved demand and restricted selling by stockiest amid decreased import flow.

Market Outlook: Prices are likely to stay steady to slightly firm due to improved demand from mills and restricted selling by stockiests. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way utrend.

Pigeon Pea (Tur/Toor):

Market Recap:

Tur crop condition is good and new arrival commenced in parts of M.P. Karnataka and U.P. Pressure is likely to build up y mid Jan in Karnataka.. Private trades have started offloading stock and pressure is seen on the cash market right now. Any spike in cash tur market is unlikely as G2G import continues. In Gulberga market tur is being traded at Rs 5200-5300 per qtl. As there is delay in procurement drive, pressure may continue on tur market. It may decrease by Rs 100-200 more in coming weeks. There is ample stock in central pool and Nafed may start selling old crop. Overall outlook for tur market seems weak with commencement of new arrival.Recovery might be seen once procurement starts.Higher moisture level in the new crop is affecting price for tur.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up.Actually procurement target has been decreased this year due to lower kharif crop size,so that supply in open market continues. Crop size may cross 37lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5500 during current week.

Market Outlook:

In the 1st week of Jan-2020, average price in Gulberga market was down by Rs 50 to Rs 5250, due to higher import volume, selling of imported stock at lower price and fear of Nafed selling. Tur price is likely to decrease further as demand remains weak. New arrival started now. Moisture level is high.

Black Matpe (Urad):

DGFT has given additional import quota of 2.5 lakh MT for urad over and above 1.5 lakh MT. Importers can apply for importing urad till 31st Dec-2019. Market sources say that old crop available in Myanmar is around 1 lakh MT while new crop would be available in mid Feb. Right now urad lying at ports are not accepted. Even in local market new urad would be available in Feb end –March. So any spike is unlikely. For fulfilling the shortage gap, Nafed may continue to release stock to control price. In local market urad may continue to trade in the range of Rs 6800-7200. Demand from mills is weak at higher level. Urad in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6500-6600. In Chennai market it is being offered at Rs 7500 and SQ at Rs 8050 per qtl.

Current Market Dynamics & Outlook:

Nafed too can intervene into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season.

Market Outlook: Urad Prices are likely to show range bound momentum.

Green Gram (Moong):
Market Recap:

Higher availability of green vegetable in the month of Dec and weak demand for dhoya and chilka dal pressurized monng cash market last week. Mills too had restricted buying at higher price. Resultantly, moong in Rajasthan decreased to rs6700 after touching MSP level in local markets. Now no new crop is at hand. Kharif production size has been lower and there is no import parity. All these developments shows shortage of quality moong in coming weeks. Around 80 % moong from UP, Bihar, MP and Jharkhand moved from farmers hands to stockiest. Mills hands now. Apart from it moong harvested in Shekhavati, Merta, Kishangarh, Kekri, Nagore, Dausa and Khatu line in Oct was lower than normal expectation. It hints moong price to go up by Rs 500 from current level in coming weeks. Right now demand is weak. As soon as pressure from green vegetable decreases, moong is bound to move up again.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.
 Chart depicts steady to slightly weak movement in Jan.

RSI is moving up in neutral region.

Expected price band for Chana in Delhi is 4400 to 4700 for this week.

Strategy: Buy on dip

Trade Recommendations: Go long around 4450 with the first target of 4550 and second target 4650 with stop loss at 4400 level.

Delhi Chana Physical:

Support & Resistance				
S2	S1	PCP	R1	R2
4300	4350	4500	4650	4750

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook – Improvement may be seen in pea market as chana may move up again and support pea market. If chana trades firm, it may recover. However, at higher level a downward correction is expected.

Technical Analysis:

- Candle stick chart denotes firm movement in the market.
- RSI is moving up in neutral region.
- Expected price band for pea is 5900-6250 in this week

Strategy: Buy on dip

Trade Recommendations: Go long around 5900 with the first target of 6200 and second target 6300 with stop loss at 5800 level.

Support & Resistance				
S2	S1	PCP	R1	R2
5600	5850	6000	6550	6650

Masoor:
Desi Masoor (at Kanpur) Spot Market Weekly Chart:

Outlook –Steady to slightly firm movement is likely to be noticed in coming week.

Technical analysis:

Chart depicts steady to firm movement in the market.

RSI oscillator is moving up in neutral region.

Expected price range is 5250-5550

Strategy: Buy on dip:

Trade Recommendations: Buy around 5350 with the first target of 5550 and second target 5650 with stop loss at 5250 level.
