**Commodity-wise Domestic, International Prices and Arrivals at Different Centers**

**Highlights-Domestic Market:**

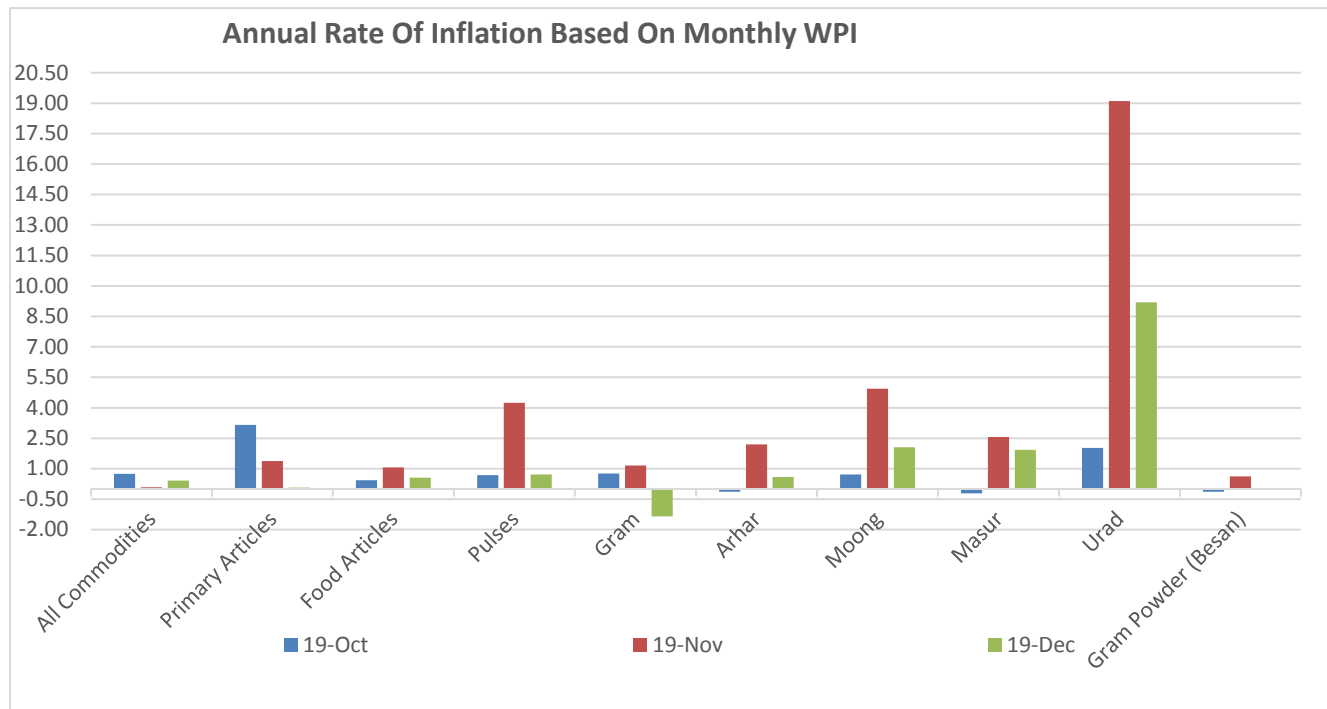

- Indian Indian farmers have covered 157.33 lakh ha, up by 5.22 % from last year (149.53 lakh ha).** Farmers have covered 10.38 % higher area under Chana to 105.35 lakh ha against 95.244lakh ha. last year as on 16th Jan 2020. Lentils area is down by 5.34 % to 15.94 lakh ha. Farmers had covered 16.84 lakh ha last year. Peas area has been reported at 9.54 lakh ha against 10.40 lakh ha, down by 8.23%. Farmers have covered 7.08 lakh ha under Urad, up by 2.15 % from last year. Moong area is running down by 3.46 % to 5.36 lakh ha. Normal area under Moong is 10.10 lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 4.45, 0.45 and 1.54% so far. Only Chana, Urad and Peas area has been reported up. Overall rabi area is up by 5.22% so far.
- Considering the demand of The Indian Pulses and Grains Association for removal of quantitative curbs** on urad, the govt. may extend dead line for urad imports till June instead of March-2020. Urad import quota has already been raised from 1.5lakh MT to 4 lakh MT and it can be imported only by millers /refiners. In current MY around 2lakh MT urad has been imported, till Dec. for more 2 lakh MT import, time frame can be extended till June-2020. This year urad production is down by 50% from normal years. Apart from it the government has decided to offload 5 lakh tonne pulses from its buffer stock to both state governments as well as in the open market. Out of 5 lakh MT 2 lakh MT would be sold at MSP and above MSP to state govt. and in the open market. It might be urad and moong. Besides, Nafed too is planning to sell pulses from the buffer stock to institutional buyers like hotels and big retail stores. Total pulses import has touch at 21.4 lakh MT and is touch 30lakh MT by March end.
- Sowing of lentils has entered at last phase and season is expected to end with covering over 16.5 lakh ha this year too.** It is lagging behind 3% from last year. Early shown crop is now 30-35 days old and is about to enter in flowering stage. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal. insects like stem cutters have been seen affecting the crop. Right now it is not widely spread and would be contained soon. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in Feb month is very crucial for the final size of the crop. In normal condition production is likely to exceed 13 lakh MT in 2019-20, to be marketed in 2020-21.
- Chana crop is nearing at maturity stages in the region of Bhopal, Gwalior, Beenaganj and Indore of MP.** However, recent rains and cold wave may encourage infestation in the standing crop. If weather opens next week, bumper production seems on the card. As area of chana crop is expected to cross 110 lakh ha this year, supply pressure would increase from mid Feb and it would pressurize chana price once again. Market has started reflecting the pressure. Govt has yet to decide procurement quantity. Emerging condition hints chana to decrease below 4000 in peak arrival season. There is plenty of old stock left and new one would start hitting the market from mid Feb.
- Area under moong in Rabi season is lower by 10% and crop condition is not as good as expected so far.** rains and cold wave have affected the standing crop and yield might be lower than normal expectation. New crop would be available by end March. Even import remains restricted. So, there is tight availability in the market. It would keep market well supported at current level. Moong in Jaipur market is being traded at Rs 7600-7700, may move towards Rs 8000-8500 per qtl. Nafed may start releasing stock to check the increasing price. Nafed has around 2 lakh MT stock including new.
- Arrival of new tur in Maharashtra is expected by the end of this month. It is delayed by 20-25 days this year.** Normally, it comes in December. Rains in end Dec and first fortnight in Jan have delayed crop harvesting. Some quality loss is feared in Karnataka too due to rains. Moisture content in the crop is higher up to 18 % right now. It should be 10 to 12% in normal condition. Market experts say that arrival from Gulberga would not last long this year. Pressure might be felt in Feb and prices may decrease to Rs 4700-4800. At this level, investors may be active. Stake holders can stock it for two months and may sell it at good profit. May onward pressure from import might be seen. It may restrict uptrend in the market. Crop condition is good in Myanmar. Tur in Gulberga market is being traded at Rs 5000-5150.
- If govt extends time frame for urad import from March to June-2020, it would have a cooling impact on urad price on domestic market.** Right now urad is being traded at Rs 7000-7700 per qtl. Demand is weak at higher level. In normal condition range bound movement is expected in urad cash market. Rabi sowing has improved and crop condition is

ingood shape.Any major spikeinurad market is unlikely at this point of time. Govt. 's strategy regarding import and selling from the central pool would be a price driving factors.

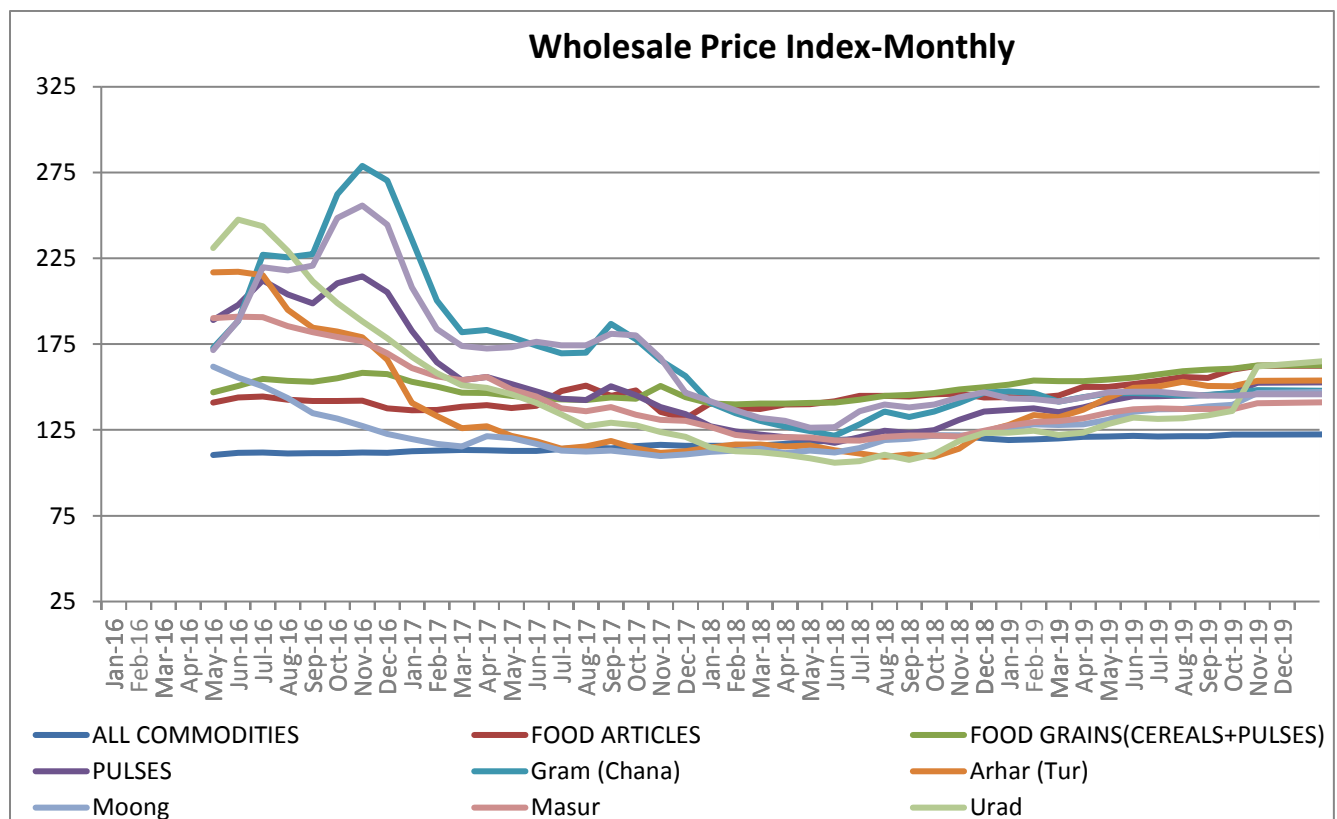

#### **International Market Update:**

- **As per The Canadian Grain Commission latest reports Canada has exported 47,700 metric tons lentils in November-2019.**It was 31,000 MT last year in Nov.Canada had exported 32100 MT in Oct.Thus total shipment during ongoing marketing year reached at 256,500 MT against 156,400 MT last year till Nov.
- **The newyear started with firm tone in global lentil markets on improved demand frombulkbuyers. As per market source, average discount for No 2 Canada large green lentils versus No 1 grade has jumped 41% to CDN \$1.14 per 100 pounds so far this marketing year. The Extra 3 discount has risen 32% to average \$6.14, while the No 3 Canada discount to No 1 grade product has risen 25% to \$9.52 per 100 pounds.**
- **Dry peas production in Canada increased by 18% to42 lakh MT in 2019-20.the reason behind** higher production is mainly attributed to higher area in Saskatchewan and Alberta despite lower yield in comparison to last year. Out of totalyellow peas production is 35 lakh MT while green pea is 6 lakh MT.The rest are other varieties.Supply has increased to only 4.6 Mt, due to lower carry-in stocks. Export is expected to touch at 34 lakh MT.Carryout is expected to be higher due to higher supply in 2019-20.
- **US dry peas area is expected to increase to 11lakh acres in 2019-20.Acreage has increased in Montana.**Production in US is expected to be around 10 lakh MT US dry peas are expected to compete, on a smaller scale, in Canadian export markets such as China and the Philippines.
- **Lentils production in Canada is expected to increase by 4% to 22 lakh MT in 2019-20** due to higher yield. Large green lentil production isestimated to have fallen from last year to 0.5 Mtwhile red lentil production rose to about 1.4 Mt Production of the other remaining lentil types isestimated to have fallen below 0.3 Mt.
- **Chana production in Canada may decrease by 19% to 2.52lakh MT in 2019-20. Crop quality** is expected to be below average when compared to theprevious year. Supply is forecast to rise as higher carry-in stocks more than offset the lower production.
- **Chickpeas production In US is expected to decrease sharply to 3.0 lakh MT in 2019-20 as area coverage** declined to 4.5lakh acres despite higher yield realization this year in the initial stages of harvesting. Demand from main export market like India, the EU and Canada is decreasing. Global chickpeas price is expected to decrease due to large world chickpea supply this year.
- **As per the latest report from dry pea & lentils council harvesting activities of pulses in US is coming to an end now.** Dry pea harvesting is over in 98% area while it is 90 % for lentils. Small Chickpeas harvest is over in 80% while it is 77% for large chickpeas. Total pulses harvesting on an average comes to 93% so far.
- **Dry peas production has been pegged at 856163 MT, lentil production at 2.47lakh MT, total chickpeas production** has been pegged at 1.79 lakh MT. Total pulses production has been pegged at 12.82 lakh MT this year against 15 lakh MT last year. Due to rains generated issues, yield has been down this year for all pulses in US.
- **Lentil area in Australia is expected to decrease by 5.84% from 303.to 285 thousand ha in 2019-20. However, production** is expected to increase by 18.89 % from 3.23 to 3.84 lakh MT due to likely better yield in growing regions.

**Pulses WPI Index:**

*Index Numbers of Wholesale Price in India (Base: 2011-12=100)*

*Pulses WPI increased by 6.2 points from 152.5 in Nov to 153.6 in Dec-2019*

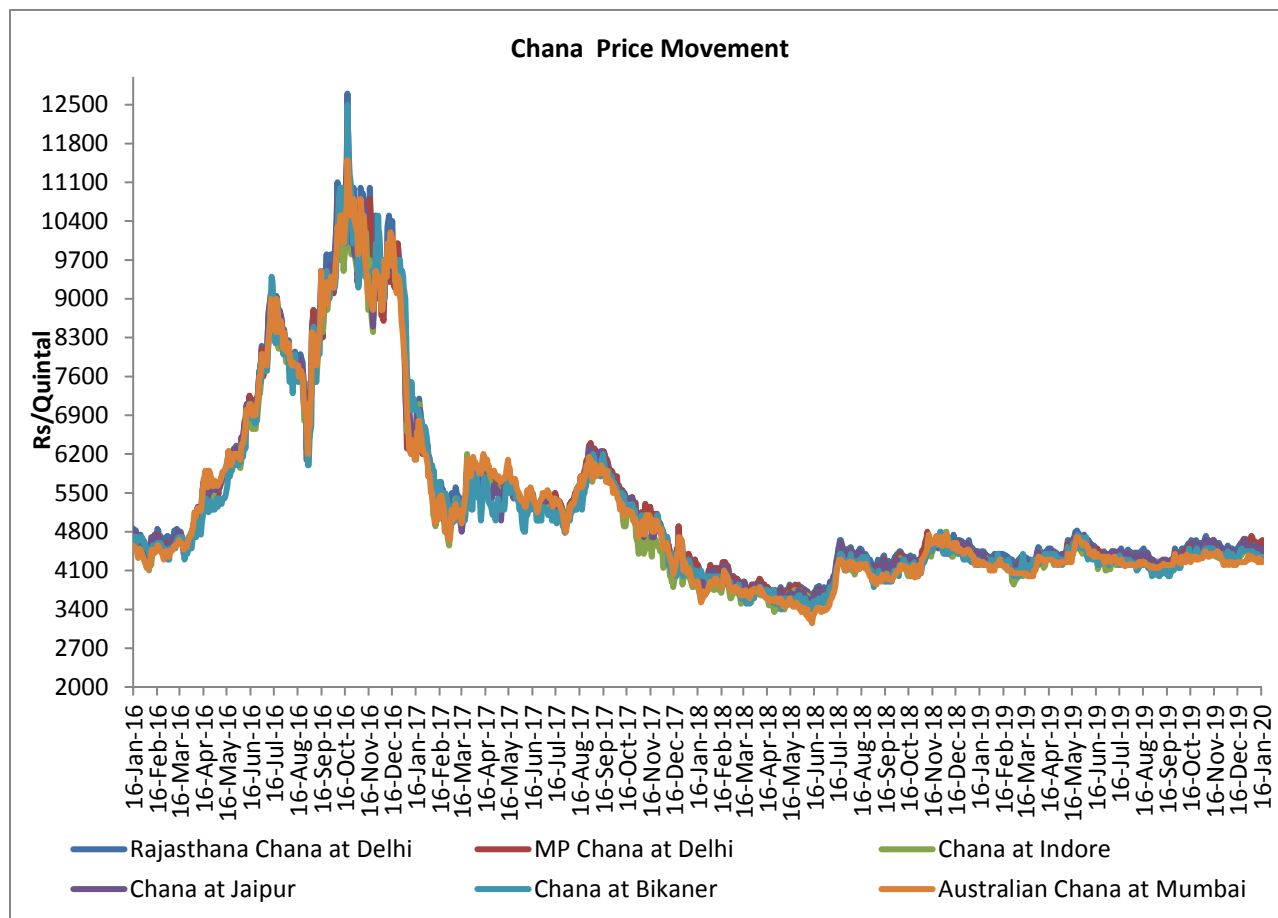

## Pulses-Wise Scenario:

### Chana

#### Current Scenario:

Farmers have covered 105.35 lakh ha area so far, up by over 10% % from last year till date. Weather condition for chana plant growing remains favorable and farmers may increase area further under chana in coming weeks despite it being at last phase of sowing. Recent rains are beneficial to the standing crops. Chana crop is nearing at maturity stages in the region of Bhopal, Gwalior, Beenaganj and Indore of MP. However, recent rains and cold wave may encourage infestation in the standing crop. If weather opens next week, bumper production seemson the card. As area of chana crop is expected to cross 110 lakh ha this year, supply pressure would increase from mid Feb and it would pressurize chana price once again. Market has started reflecting the pressure. Govt has yet to decide procurement quantity. Emerging condition hints chana to decrease below 4000 in peak arrival season. There is plenty of old stock left and new one would start hitting the market from mid Feb. For chana market Nafed is on driver's seat. Weather condition in Jan and Feb too would play a crucial role as price driver. As of now condition for better growth for plant may pressurize cash market. At peak arrival season it may move below 4,000 per qtl.

All India average price for Chana decreased by 1.16 percent from Rs 4495 to 4442 per qtl. during review week. Even Australian Chana (imported) price decreased by 0.37 percent from Rs 4291 to Rs 4275 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

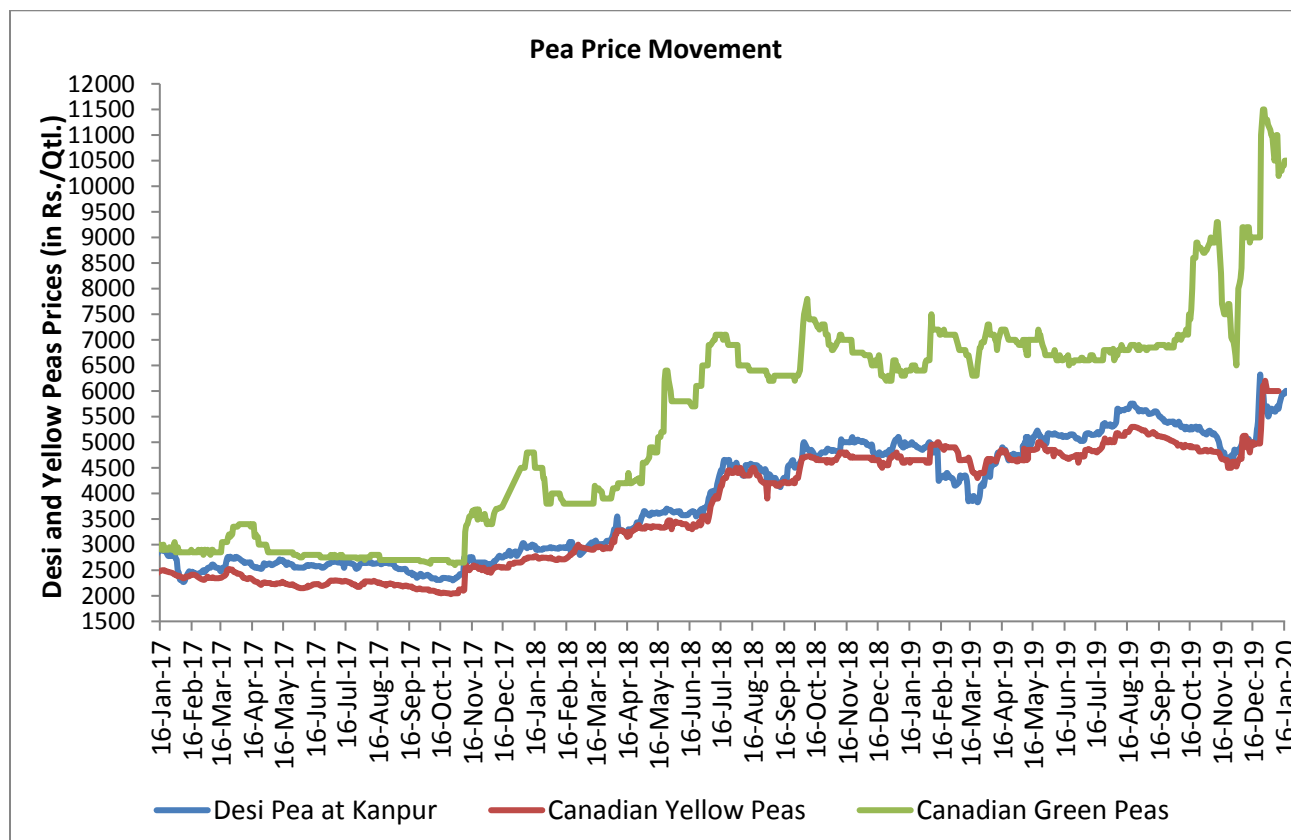

**Market Outlook:** Pressure is likely to continue in chana cash market this week due to higher area coverage and ample old stock. Futures remain un-supportive.

**Peas (Matar):**  
**Market Recap:**

With changed status from the free to restricted category and hefty levy imposed on peas, its import has halted completely now. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and kaspas) and changed its status in the third week of Dec. It has affected importers badly whose consignment is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 10500-11,000 per qtl from 6000 per qtl a week ago. Against the quota of 1.5 lakh MT over 5.6 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. Soprice may move down slightly from current level.

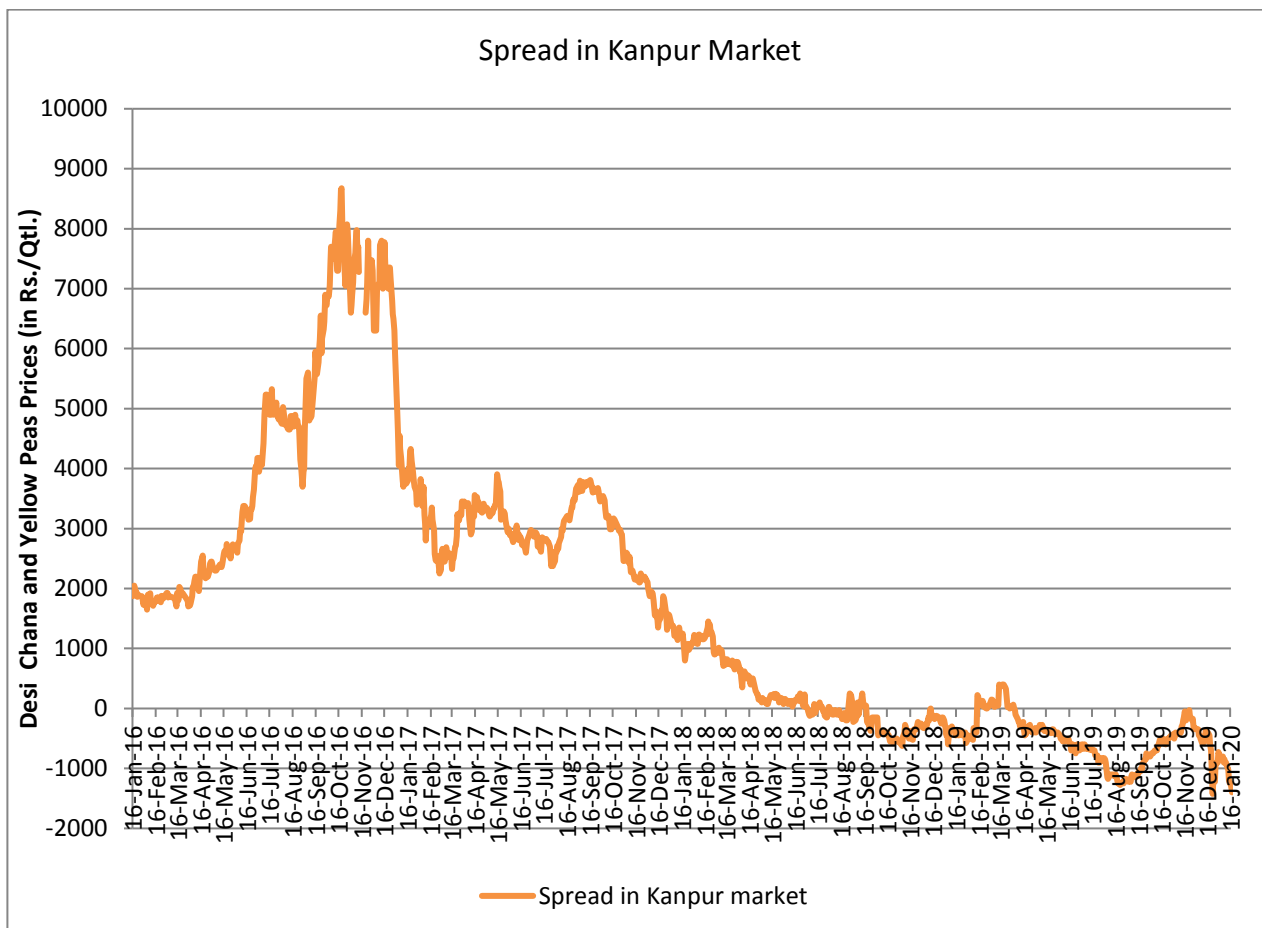

Pea in Mumbai market traded steady at Rs.5900-6000 with closing the import window completely. It has impacted price of peas in Kanpur market too and traded at Rs 5850-5950 per qtl. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Ew arrival in local markets would increase too.

**Current Market Dynamics & Outlook:**

Pea market recovered due to halted pace of import and lower availability of imported stock. Kanpur market traded steady at Rs 5900-5950 per qtl due to restriction at import. New local crop has started hitting the market. So any major spike is unlikely. Overall, all India average price stayed steady at Rs 6000 per qtl in the third week of Jan. In Mumbai market, pea traded at Rs 5900-6000. Stake holders should sell stock in parts.

**Spread With Chana:**

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 825 to Rs 1400 due to decreased chana price. Spread is expected to remain in the negative zone in Jan too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week.

**Market Outlook:** Outlook remains steady to slightly weak this week too.

#### Lentils (Masoor):

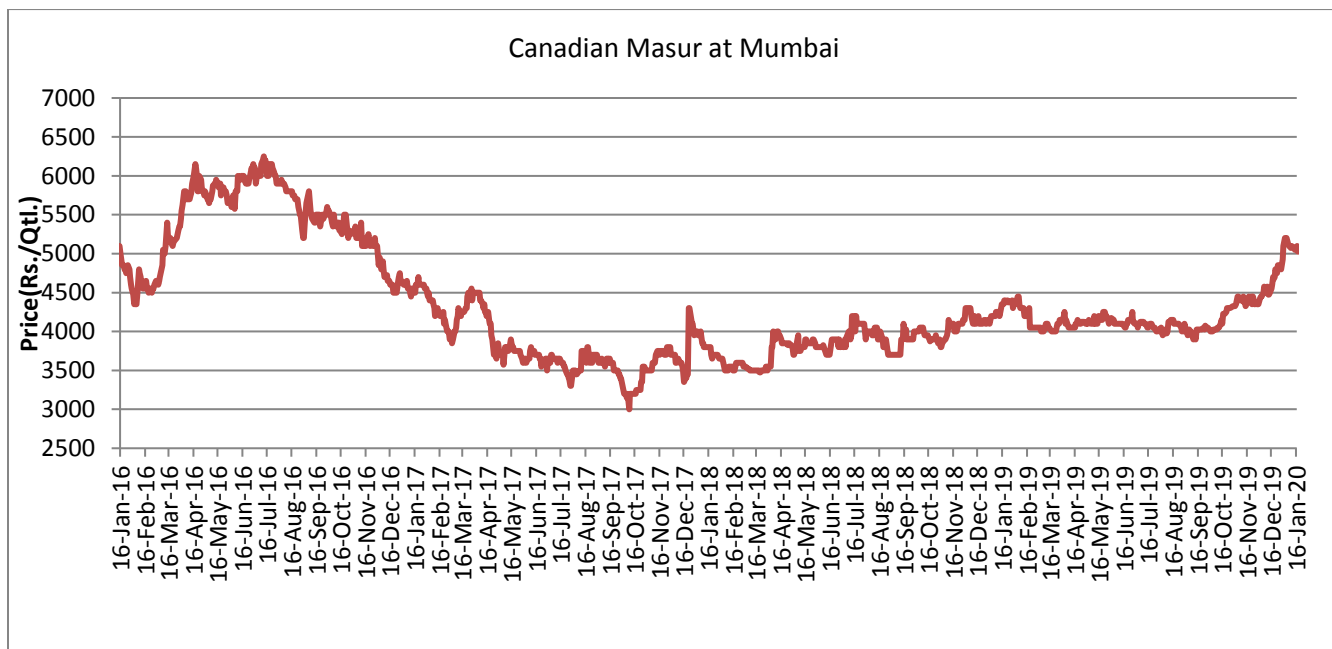

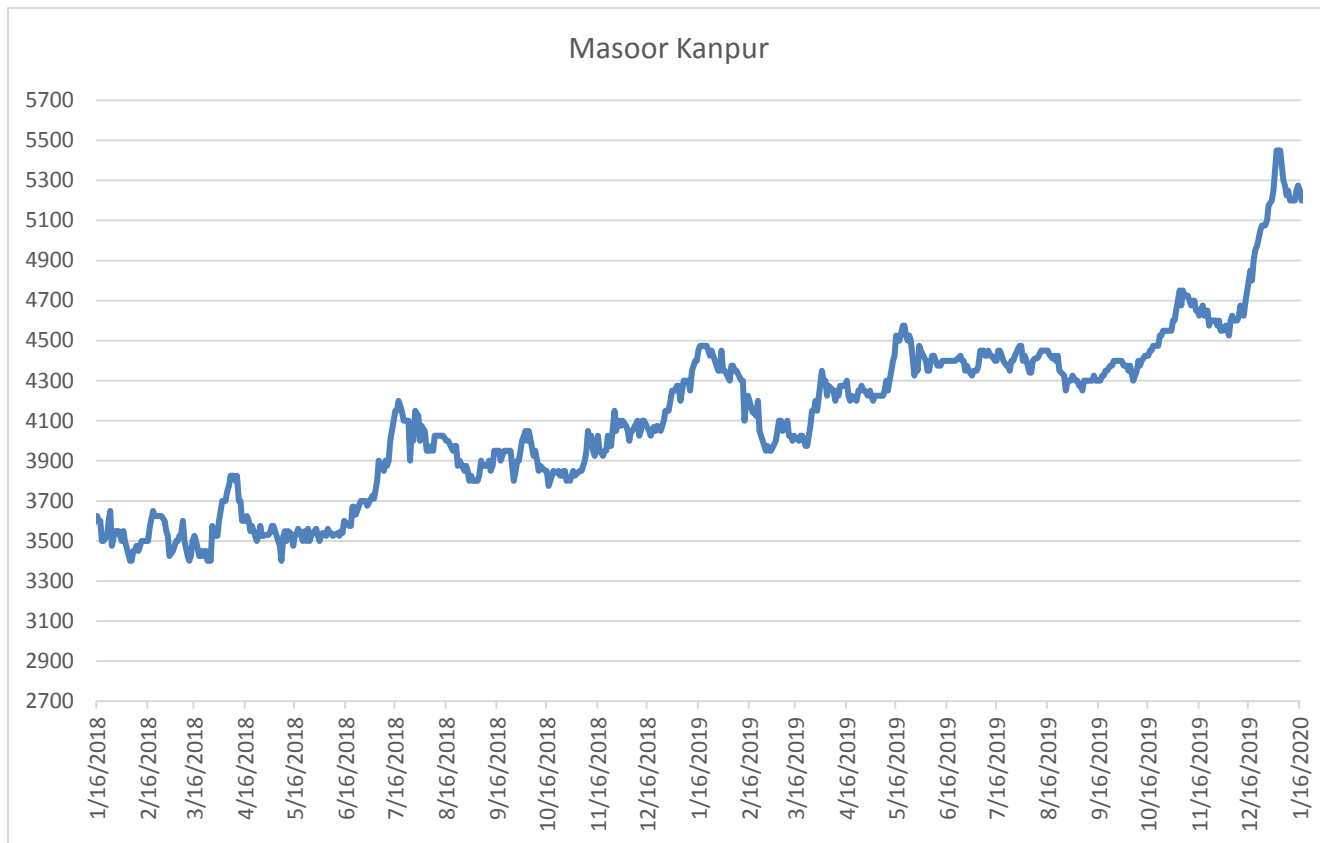

#### Market Recap:

Sowing of lentils has entered at last phase and season is expected to end with covering over 16.5 lakh ha this year too. It is lagging behind 3% from last year. Early shown crop is now 30-35 days old and is about to enter in flowering stage. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal, insects like stem cutters have been seen affecting the crop. Right now it is not widely spread and would be contained soon. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in Feb month is very crucial for the final size of the crop. In normal condition production is likely to exceed 13 lakh MT in 2019-20, to be marketed in 2020-21.

#### Current Scenario:

In the 3<sup>rd</sup> week of Jan-2019, average price in key market Kanpur was up slightly down by 0.4 % from Rs 5250 to Rs 52.29 per qtl.. Prices are likely to trade steady to slightly weak in the 4<sup>th</sup> week of Jan, due to improved plant growth and expectation of higher yield this year. Even govt may start selling stock from central pool as new crops hardly one month away now. It would start hitting market by Feb end.

**Market Outlook:** Prices are likely to stay steady to slightly weak due to good crop prospects. Poor demand from mills and beginning of ofloading by stockiests. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way utrend.

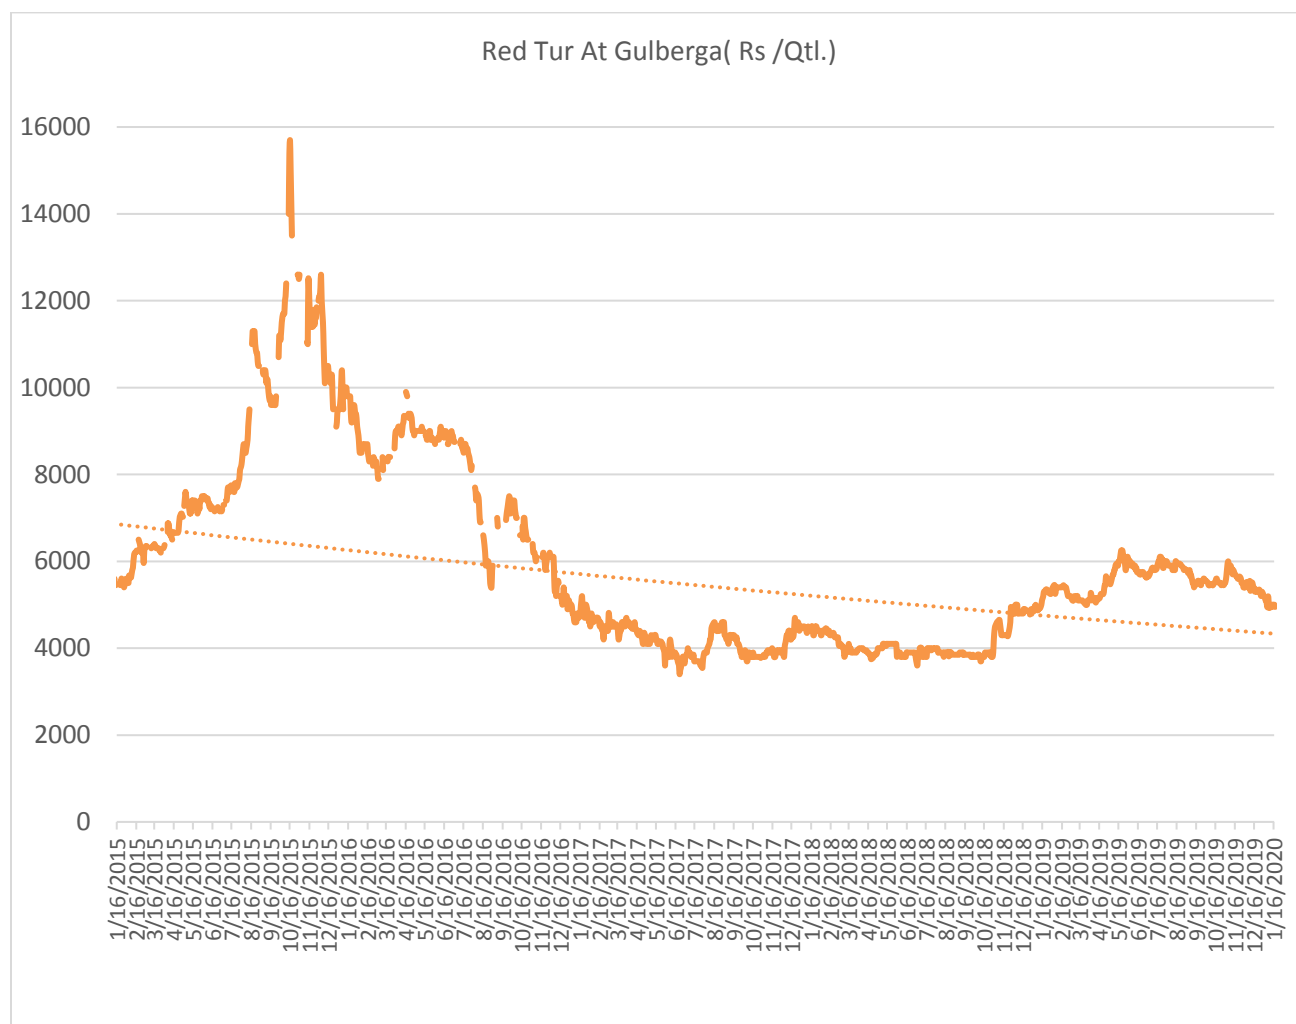

## Pigeon Pea (Tur/Toor):

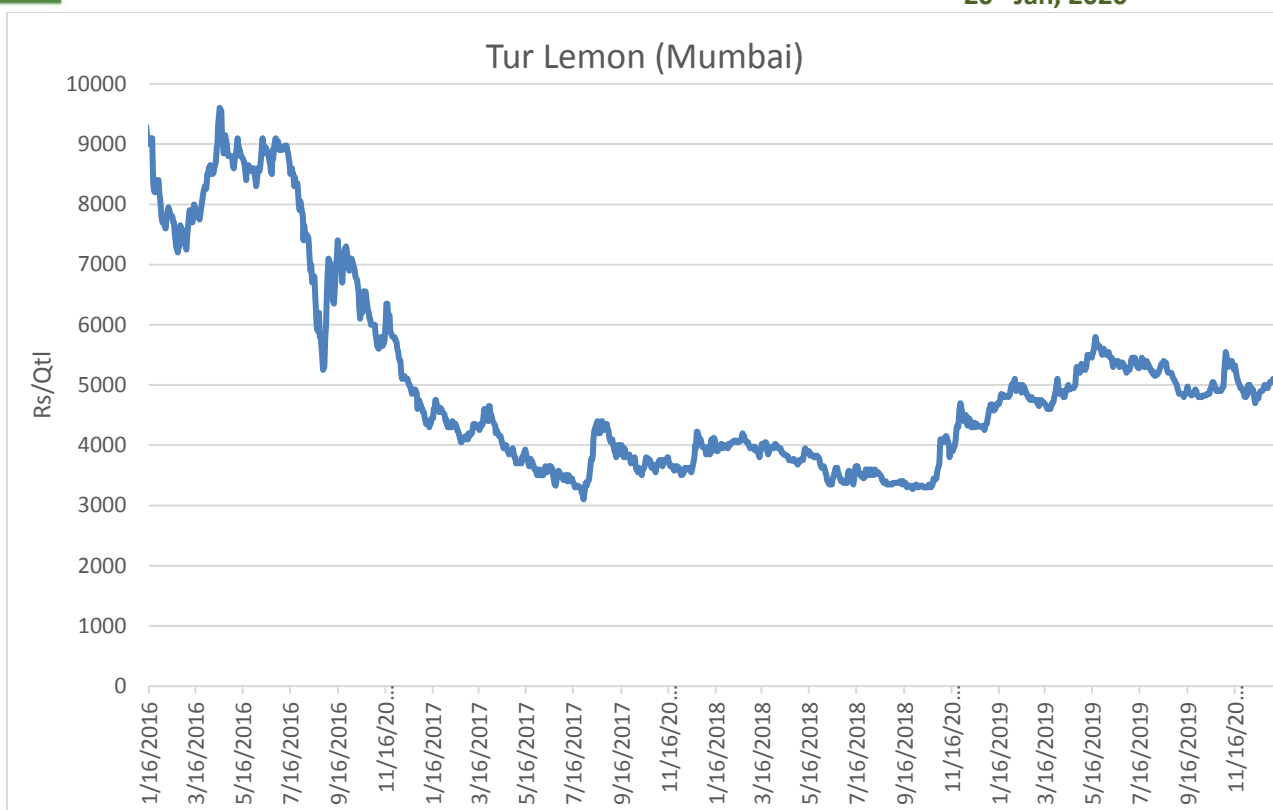

### Market Recap:

Arrival of new tur in Maharashtra is expected by the end of this month. It is delayed by 20-25 days this year. Normally, it comes in December. Rains during end Dec and first fortnight in Jan have delayed crop harvesting. Some quality loss is feared in Karnataka too due to rains. Moisture content in the crops is higher up to 18% right now. It should be 10 to 12% in normal condition. Market experts say that arrival from Gulberga would not last long this year. Pressure might be felt in Feb and prices may decrease to Rs 4700-4800. At this level, investors may be active. Stake holders can stock it for two months and may sell it at good profit. May onward pressure from import might be seen. It may restrict uptrend in the market. Crop condition is good in Myanmar. Tur in Gulberga market is being traded at Rs 5000-5150. It may decrease by Rs 100 more from current level.

### Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573 MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 4800-5400 during current week. Weak trend may prevail.

#### **Market Outlook:**

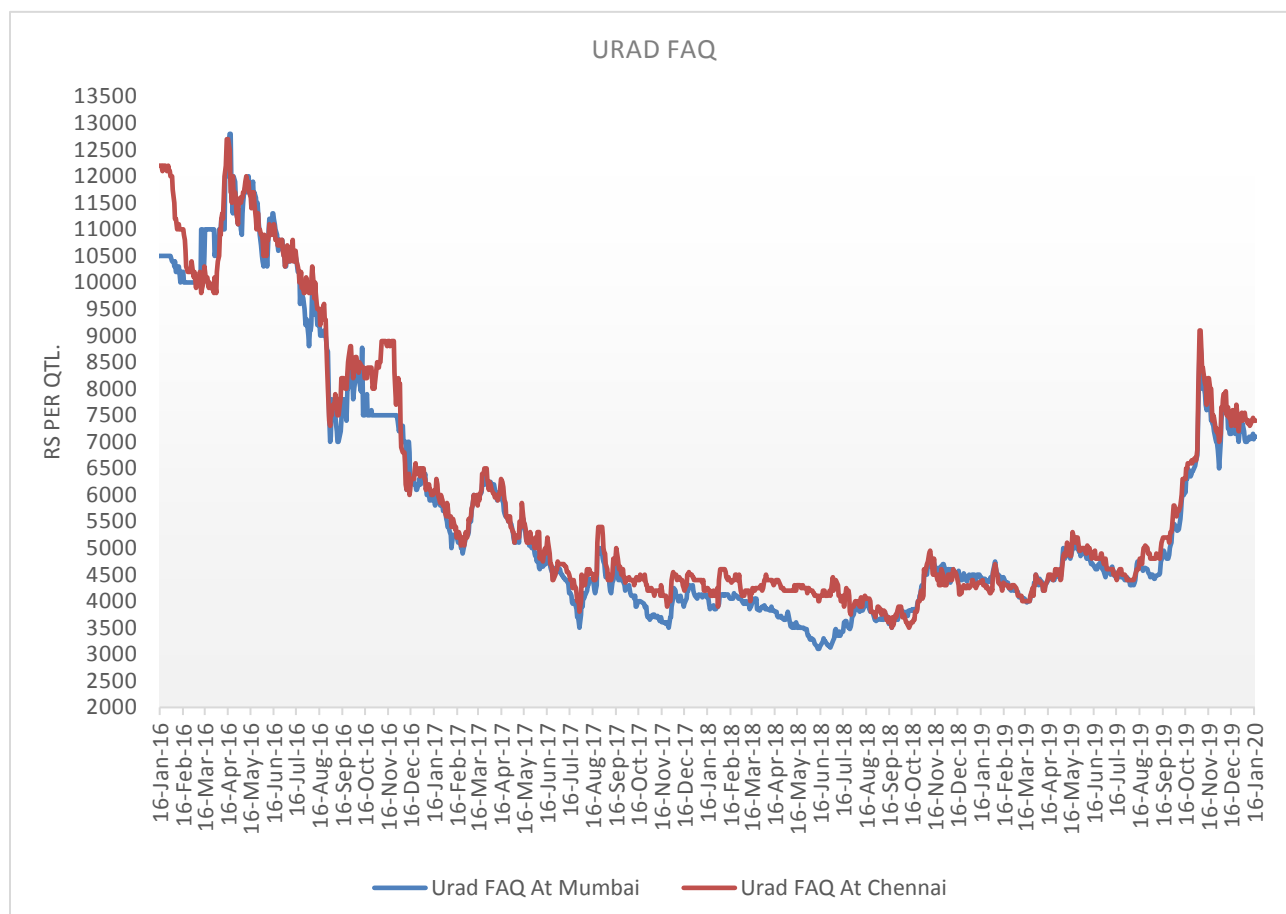

*In the 3<sup>rd</sup> week of Jan-2020, average price in Gulberga market was down by Rs 100 to Rs 5000, due to higher availability from new crop and moisture level in new tur., Apart from this selling of imported stock at lower price and fear of Nafed selling too are price impacting factors.. Tur price is likely to decrease further as demand remains weak. New arrival started now. Moisture level is high.*

#### **Black Matpe (Urad):**

*DGFT has given additional import quota of 2.5 lakh MT for urad over and above 1.5 lakh MT. Importers can apply for importing urad till 31st Dec-2019. Market sources say that old crop available in Myanmar is around 1 lakh MT while new crop would be available in mid Feb. Right now urad lying at ports are not accepted. Even in local market new urad would be available in Feb end –March. So any spike is unlikely. For fulfilling the shortage gap, Nafed may continue to release stock to control price. In local market urad may continue to trade in the range of Rs 6800-7500. Demand from mills is weak at higher level. Urad in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6700-6800. In Chennai market it is being offered at Rs 7400 and SQ at Rs 7950 per qtl.*

#### **Current Market Dynamics & Outlook:**

*Nafed too can intervene into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season. Govt may extend time frame for import from March-2020 to June-2020.*

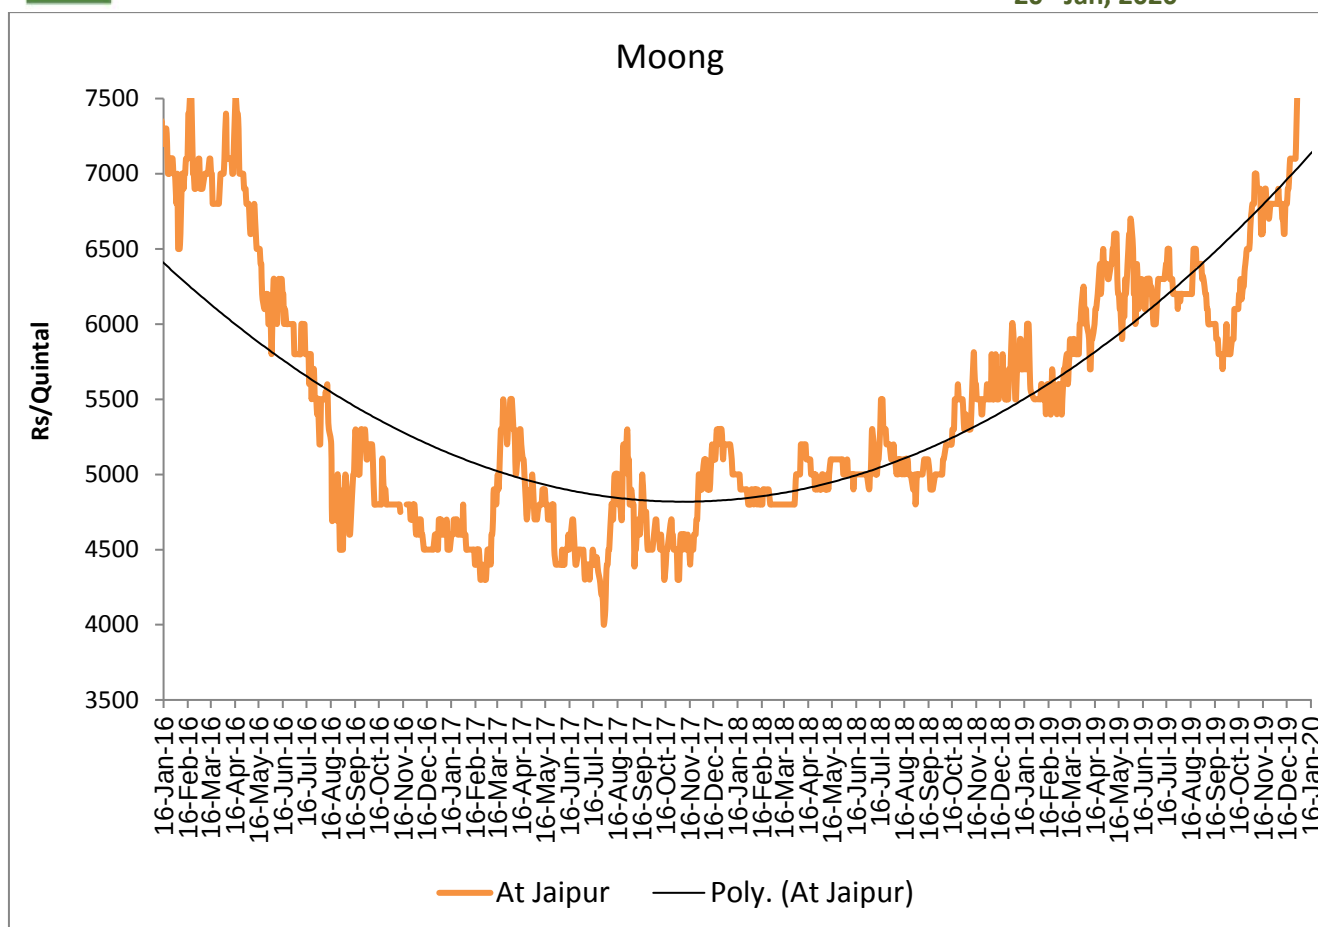

**Market Outlook:** Urad Prices are likely to show range bound momentum.

### **Green Gram (Moong):**

#### **Market Recap:**

With viewing shortage of moong in physical market and higher prevailing price govt may increase moong import quota from 1.5 lakh MT to 2lakh MT for 2019-20. Kharif moong crop was affected due to rains and flooding in Sept. Besides, lower acherage in rabi season encouraged cash market price and it is ruling above MSP(Rs7050 per qtl.). In Jaipur market millers are buying moong at Rs7600-7700. There is a short supply of quality moong. Moong output in the 2019-20 (Jul-Jun) kharif season has been pegged at 1.42 MMT, against 1.84 MMT last season, according to the farm ministry's first advance estimates. Total kharif pulses output has been estimated at 8.23 mln tn, compared with 8.59 mln tn a year ago. India imported 67,541 MT moong in during Apr to Nov. It is 13.8 % lower than last year. If govt. increases moong import quota, it may cool down current market price as Nafed too would prefer to sell stock from central pool. Under prevailing condition moong is likely to trade firm and may cross Rs8600-8800 in in coming months

**Market Outlook:** Moong prices are likely to trade steady to slightly firm in the near term.

#### Import- Export & Average Monthly CiF:

| Pulses Import | Chickpea    |            | Tur         |            | Green Peas  |            | Lentil      |            |
