Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Indian Indian farmers have covered 19.18lakh ha, up by 5.69 % from last year (150.60 lakh ha).** Farmers have covered 10.96 % higher area under Chana to 106.40 lakh ha against 95.89lakh ha. last year as on 24th th Jan 2020. Lentils area is down by 5.08 % to 16.02 lakh ha. Farmers had covered 16.88 lakh ha last year. Peas area has been reported at 9.57 lakh ha against 10.41 lakh ha, down by 8.11%. Farmers have covered 7.42 lakh ha under Urad, up by 2.15 % from last year. Moong area is running down by 1.82 % to 5.57 lakh ha. Normal area under Moong is 10.10 lakh ha. Kulthi, Lythyrus and other rabi pulses area too is running down by 4.44 and 2.58% so far. Only Chana, Urad and Peas area has been reported up. Overall rabi area is up by 5.69% so far. Seed details in table.
- **Farmers registration regarding tur procurement in Maharashtra is on and will continue till 15th Feb-2020.** Over four thousand farmers got registered so far. Procurement is expected to commence once govt. fixes procurement quantity per ha. Nafed, state agencies and FCI would procure tur in Maharashtra. Even in Karnataka registration begins. State govt. has decided to offer Rs 300 per qtl bonus over and above MSP in Karnataka. MSP of Tur is Rs 5800. All India target for tur procurement has been fixed at around 5.5lakh MT. This year tur from Maharashtra may enter in Karnataka. Nafed has purchased 4402.05 MT tur on MSP in Telangana. Tur seems under pressure in open market. However, once procurement starts, improvement is expected in coming weeks. In Gulberga market Tur is being traded at Rs 5050-5100 per qtl.
- **Urad traded almost steady at Rs 6800-7400 in various markets. With higher import quota (4 lakh MY now) and possibility to extend timeline beyond March-2020 at least for three months would not allow market to trade firm.** Demand at higher level is weak right now while new Rabi crop is expected to hit market from end Feb. Millers have submitted application for import and license is being given to them. So, import volume is expected to increase by Feb end-March. Govt still has 198431.88 MT urad in stock despite negligible procurement from kharif season. Maximum stock is in MP (134297.62 MT). Sale from central pool is likely to commence soon. It would cap any unexpected upsurge in urad market. In Chennai market urad is being traded at Rs 7200-7400. Steady tone may prevail until new crop starts and import commences.
- **Masur cash market stayed steady at Rs 5200-5300 despite lower stock in domestic market and poor import volume.** Crop condition in U.P., Bihar, M.P. and west Bengal is good and yield is likely to increase this year under prevailing weather condition. Production is expected to cross 13 lakh MT. If it happens, pressure on global market would increase and price may decrease from current level. Nafed still has 29269.33 MT stock in central pool and it may start selling as new crop is now hardly one month away. Demand in market is normal and it may decrease ahead of new crop. So, steady tone may prevail in lentil market in coming weeks. Right now market is ruling above MSP (Rs 4800 per qtl.)
- **Moong cash market traded steady amid weak inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level.** In Jaipur market moong is being traded at Rs 7600-7700 and may decrease to Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41 MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.
- **Chana crop in major growing region is in good condition and weather remains favourable so far.** Bumper production seems on the card. Under prevailing condition chana production may cross 96 lakh MT this year. Weak demand, uncertainty over procurement quantity and ample availability of old crop continue to weigh on market fundamental. In Delhi market chana is being traded at Rs 4300-4400. Futures too trade weak. Bulk buyers have limited their buying under weak inner tone. Even Nafed has to offload its stock. If it gets permission to sell around 4000, it may pressurize cash market further. Feb month is very crucial for chana crop. If it faces weather generated disturbance, it may recover, otherwise weak tone may prevail until procurement starts.

Outlook for the week: Cash pulses market may trade under pressure.

International Market Update:

- **Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21 is slightly higher at 43 lakh MT.** During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60 lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.
- **Production of lentils in Canada has been pegged at 21.67 lakh MT in 2019-20 and for 2020-21 production forecast is slightly higher at 22 lakh MT.** Import would decrease from 80 to 50 thousand MT while export too would decrease from 21 to 20 lakh MT in 2020-21. Carryout would decrease from 4.5 to 3.75 lakh MT in 2020-21.
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT .It would decrease to 2 lakh MT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Firm tone was recorded in North American lentils cash market during last week.** Market sources say that millers and exporters are buying for near terms needs. However, growers and other stake holders are still gauging price direction and new crops prospects. Overall export volume has been up from last year and it hints towards fundamental support on demand side. Export and overall domestic demand may exceed last year. Market expects firmness to continue.
- **Commerce ministry of Myanmar has changed exim policy. All importers and exporters have to get registered till 31st Dec-2019.** With this new changes importers and exporters would get new 9 digit digital taxation identification no from 5th Jan-2020. Without new registration no import and export would not be possible. It may delay shipment to some extent.
- **Peas export from France increased to 25750 MT in Oct-2019. It is higher by 3550 MT from Sep.** France had exported 22200 MT in Sept-2019. Export increased despite India being out of global market due to quantity restriction.
- **Demand for peas improved from China. It has helped peas price to improve further. It would push up import parity in India too.** Peas production in Canada declined during last two years. However, This year production is up by 18% from last year to 42 lakh MT. Peas import volume in China is expected to cross 18 lakh MT this season. Cattle feed industry is using pea in bulk volume while in India it is used for human consumption.
- **Turkey import volume for lentils from Canada improved in the month of Oct-2019. It has imported 25211 MT from Canada, 20440 Mt from Kazakhstan and 1627 MT from Russia.** Total import by Turkey in Oct was registered at 48783 MT. Total import for Turkey touched at 274,328 MT in this calendar year. It is down by 7% from last year till Oct-2019.
- **Dry pea stock in US is likely to increase by 0.02 % to 203983 MT in 2019. It was 199628 MT in 2018.** Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.
- **Weekly Outlook: -Pulses are likely to trade steady to slightly weak .**

Annual Rate Of Inflation Based On Monthly WPI

This bar chart displays the annual rate of inflation for various commodities based on the Monthly WPI for October, November, and December 2019. The Y-axis represents the inflation rate, ranging from -2.00 to 20.50. The X-axis lists the commodities. The legend indicates that blue bars represent 19-Oct, red bars represent 19-Nov, and green bars represent 19-Dec.

Commodity	19-Oct	19-Nov	19-Dec
All Commodities	0.75	-0.25	0.50
Primary Articles	3.25	1.25	-0.25
Food Articles	0.50	1.00	0.50
Pulses	0.75	4.25	0.75
Gram	0.75	1.00	-0.75
Arhar	-0.25	2.25	0.75
Moong	0.75	4.75	2.25
Masur	-0.25	2.50	1.75
Urad	1.75	19.00	8.75
Gram Powder (Besan)	-0.25	0.75	0.00

Wholesale Price Index-Monthly

The chart displays the monthly Wholesale Price Index (WPI) for various commodities from January 2016 to December 2019. The Y-axis represents the WPI index, ranging from 25 to 325 in increments of 50. The X-axis shows the months from Jan-16 to Dec-19. The chart includes lines for ALL COMMODITIES, FOOD ARTICLES, FOOD GRAINS (CEREALS+PULSES), PULSES, Gram (Chana), Arhar (Tur), Moong, Masur, and Urad. Most commodities show a peak in late 2016 followed by a decline and then a gradual recovery.

Pulses WPI increased by 6.2 points from 152.5 in Nov to 153.6 in Dec-2019

Pulses-Wise Scenario:
Chana
Current Scenario:

Farmers have covered 106.40 lakh ha area so far, up by over 10.96% from last year till date. Weather condition for chana crop remains favorable and farmers may increase area further under chana in coming weeks despite it being at last phase of sowing. Recent rains are beneficial to the standing crops. Chana crop is nearing at maturity stages in the region of Bhopal, Gwalior, Beenaganj and Indore of MP. However, recent rains and cold wave may encourage infestation in the standing crop. If weather opens next week, bumper production seems on the card. As area of chana crop is expected to touch 108-110 lakh ha this year, supply pressure would increase from mid Feb and it would pressurize chana price once again. Market has started reflecting the pressure. Govt has yet to decide procurement quantity. Emerging condition hints chana to decrease below 4000 in peak arrival season. There is plenty of old stock left and new one would start hitting the market from mid Feb. For chana market Nafed is on driver's seat. Weather condition in Feb and March too would play a crucial role as price driver. As of now condition for better growth for plant may pressurize cash market. At peak arrival season it may move below 4,000 per qtl. If Nafed is allowed to sell chana at market price, Chana may touch Rs3800-3850 level in March

All India average price for Chana decreased by 2.98 percent from Rs 4442 to 4310 per qtl. during review week. Even Australian Chana (imported) price decreased by 0.39 percent from Rs 4275 to Rs 4258 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Market Outlook: Pressure is likely to continue in chana cash market this week due to higher area coverage and ample old stock. Futures remain un-supportive. Nafed may get permission to sell old stock near market price.

Peas (Matar):
Market Recap:

With changed status from the free to restricted category and hefty levy imposed on peas, its import has halted completely now. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and mung) and changed its status in the third week of Dec. It has affected importers badly whose consignment is on port or in way to India. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas have increased to Rs 10400-10,500 per qtl from 10300 per qtl a week ago. Against the quota of 1.5 lakh MT over 4.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price may move down slightly from current level.

Pea in Mumbai market traded steady at Rs.5900-6000 with closing the import window completely. It has impacted price of peas in Kanpur market too and it traded at Rs 5800-5850 per qtl. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Even arrival in local markets would increase too. Green peas have started hitting the local market

Current Market Dynamics & Outlook:

Pea market stayed almost steady due to new arrival in domestic market and stockists selling of old imported stock. Kanpur market traded steady at Rs 5800-5850 per qtl due to restriction at import. New local crop has started hitting the market. So any major spike is unlikely. Overall, all India average price stayed steady at Rs 6000 per qtl in the fourth week of Jan. In Mumbai market, pea traded at Rs 5900-6000. Stake holders should sell stock in parts.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 1400 to Rs 1250 due to decreased chana price. Spread is expected to remain in the negative zone in Jan too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week.

MarketOutlook: Outlook remains steady to slightly weak this week too.

Lentils (Masoor):

Market Recap:

Sowing of lentils has entered at last phase and season is expected to end with covering over 16.5 lakh ha this year too. It is lagging behind 5.02% from last year. Early shown crop is now 40-55 days old and is about to enter in flowering stage. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal, insects like stem cutters have been seen affecting the crop. Right now it is not widely spread and would be contained soon. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in Feb month is very crucial for the final size of the crop. In normal condition production is likely to exceed 13 lakh MT in 2019-20, to be marketed in 2020-21.

Current Scenario:

In the 4th week of Jan-2019, average price in key market Kanpur was down slightly down by 2.10 % from Rs 5250 to Rs 5050-5100 per qtl. Prices are likely to trade steady to slightly weak in the 1st week of Feb, due to improved plant growth and expectation of higher yield this year. Even govt may start selling stock from central pool as new crop is hardly one month away now. It would start hitting market by Feb end.

Market Outlook: Prices are likely to stay steady to slightly weak due to good crop prospects. Poor demand from mills and beginning of ofloading by stockiests. Nafed would intervene when prices move beyond MSP level. Import is likely to continue, and it would continue to limit one-way uptrend.

Pigeon Pea (Tur/Toor):

Market Recap:

Arrival of new tur in Maharashtra is expected by the end of this month. It is delayed by 20-25 days this year. Normally, it comes in December. Rains during end Dec and first fortnight in Jan have delayed crop harvesting. Some quality loss is feared in Karnataka too due to rains. Moisture content in the crop is higher up to 14-15 % right now. It should be 12 to 13% in normal condition. Market experts say that arrival from Gulberga would not last long this year. Pressure might be felt in Feb and prices may decrease to Rs 4700-4800. At this level, investors may be active. Stake holders can stock it for two months and may sell it at good profit. May onward pressure from import might be seen. It may restrict uptrend in the market. Crop condition is good in Myanmar. Tur in Gulberga market is being traded at Rs 4900-5000. It may decrease by Rs 100 more from current level.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 4800-5400 during current week. Weak trend may prevail. Commencement of procurement may help market to recover again.

Market Outlook:

In the 4th week of Jan-2020, average price in Gulberga market was down by Rs 100 to Rs 4900, due to higher availability from new crop and moisture level in new tur., Apart from this selling of imported stock at lower price too are price impacting factors.. Tur price is likely to decrease further as demand remains weak. New arrival started now. Moisture level is still high.

Black Matpe (Urad):

License is being given to importers as DGFT has given additional import quota of 2.5 lakh MT for urad over and above 1.5 lakh MT..Market sources say that old crop available in Myanmar is around 1 lakh MT while new crop would be available from mid Feb. Right now urad lying at ports are not accepted. Even in local market new urad would be available in Feb end –March. So any spike is unlikely. For fulfilling the shortage gap, Nafed may continue to release stock to control price. In local market urad may continue to trade in the range of Rs 6500-7400. Demand from mills is weak at higher level. Urad in Mumbai market traded at Rs 7000-7100 and may decrease to Rs 6500-6600. In Chennai market it is being offered at Rs 7300 and SQ at Rs 7800 per qtl.

Current Market Dynamics & Outlook:

Nafed too can intervene into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season. Govt may extend time frame for import from March-2020 to June-2020.

Market Outlook: Urad Prices are likely to show range bound momentum.

Green Gram (Moong):

Market Recap:

Moong cash market traded steady amid weak inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7700 and may decrease to Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41 MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Import- Export & Average Monthly CiF:
