 - Canada
 - US

**Domestic Market Fundamentals:**

- **Indian farmers have covered 161.17 lakh ha, up by 6.19 % from last year (151.78 lakh ha) as on 31.01.2020..Farmers** have covered 11.45 % higher area under chana to 107.21 lakh ha against 96.19 lakh ha. Lentils area is down by 4.98 % to 16.07 lakh ha. Farmers had covered 16.91 lakh ha last year. Pea's area has been reported at 9.64 lakh ha against 10.46 lakh ha. Farmers have covered 7.63 lakh ha under urad, up by 1.35 % against 7.53 lakh ha last year. Moong area is running up by 1.35 % to 6.19 lakh ha. Normal area under moong is 10.10 lakh ha. Kulthi and other rabi pulses area too is running down by 5.07 and 1.76% so far. Lathyrus area is up by 6.88% to 3.31 lakh ha. Overall, rabi area is up by 6.19 % so far. Rabi season is now about to over, especially chana, masur and peas. Moong and urad sowing would continue till Feb end
- **Sowing area under chana is increasing continuously and may cross 108-109 lakh ha this year.** Sporadic rains in major growing region is said to be beneficial and if weather opens this week and growing region receives good sunshine production may cross 11 million MT. However, weather in Feb month is very crucial. Besides, there is ample stock in central pool and govt./state agencies have yet to set procurement target. As crop size estimate is higher so far, lower target than 3million MT would not help market to recover. Cash market may decrease to 3800-3900. Futures may even trade lower. In Delhi market chana is being traded at Rs 4250-4300. Weak tone may prevail.
- **Masur cash market traded steady in domestic market despite weak global market.** New crop is expected in end Feb/March. Sowing delayed by 20 to 25 days this year, so arrival is expected to be delayed at least by three weeks. At Indian ports flow of masur import is slow and no bulk vessels are expected in next two weeks. It has affected availability at ports .So slight recovery in domestic market is expected before new crop hits the market. In Kanpur market masur is being traded at Rs 4900.In Mumbai container price is being traded at Rs 4900. Sellers may start offloading stock from mid Feb. Crop condition is good so far and yield may improve further under prevailing weather condition
- **Urad cash market traded lower despite lower availability from kharif crop this year.** Govt. has increased import quota from 1.5 lakh MT to 4lakh MT and import flow is expected from new financial year i.e from April. New winter season crop too would be available from end Feb/March. So, availability is likely to improve amid selling from central pool stock at market price. Gov.t still has 198431.88 MT urad in stock despite negligible procurement from kharif season. Maximum stock is in MP (134297.62MT).Sale from central pool is likely to commence soon. It would cap any unexpected upsurge in urad market. Even stockiest too would prefer to offload stock before new crop hits the market. Under prevailing condition pressure seems on cash urad market. However, it can be confidently maintained that it would continue to trade above MSP (Rs5700 per 100 kg). Cash market in Chennai may decrease to 6400-6500. Currently,it is being traded at Rs 6800-6900 per qtl.
- **Slight recovery is expected in moong cash market in coming weeks as arrival in Nagore,Harda,Gulberga and Vijaywara is declining fast.** Even Prices stayed steady to slightly weak as demand for FAQ varieties weakened. Market is waiting for fresh demand. As supply side is weak, fresh demand from market may support moong market. Import remains restricted despite demand for import quota increase. It may help market to recover once again. As Nafed has 139908.41MT stock, intervention is expected in the event of any spike. New crop would be available in March while there is a short supply of quality grade moong in the market. So, it may trade slight up in Feb. Currently, moong is being traded at Rs 7600-7700 per qtl in Jaipur market while in other markets it is being quoted at Rs 7400-7500.In better demand condition it may move up to Rs8000-8100 in Feb.
- **Procurement drive in Maharashtra is expected to begin from 20th Feb in bulk volume.** Nafed, FCI and other state agencies would start procurement once registration for tur procurement gets over on 15th Feb-2020.It may start a little bit earlier in Karnataka. Karnataka state govt. would provide Rs 300 bonus over and above MSP (Rs5800). All India procurement target has been fixed at 5.5 lakh MT.The major chunk is expected to be procured in Karnataka and Maharashtra. As crop harvesting activities has been delayed by un-seasonal rains, arrival

pressure is expected from mid Feb. As buyers are not active right now due to higher moisture level in new crop, recovery is not expected before the commencement of buying drive by govt.'s agencies as well as private trades. Under present scenario tur may decrease further by Rs 100-150 this week. As stockiest are selling old stock, availability is ample amid new arrival. So, procurement support is necessary to support market from mid Feb. Overall tone remains weak right now.

- **As chana price is coming down in local market ahead of new crop, pressure might be seen on peas market too.** New crop in local market has started hitting the local markets. However, green peas would continue to trade higher.

International Market Update:

- **Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21 is slightly higher at 43lakh MT. During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60 lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.**
- **Production of lentils in Canada has been pegged at 21.67 lakh MT in 2019-20 and for 2020-21 production forecast is slightly higher at 22lakhMT. Import would decrease from 80 to 50 thousand MT while export too would decrease from 21 to 20lakhMT in 2020-21. Carryout would decrease from 4.5 to 3.75 lakh MT in 2020-21.**
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT . It would decrease to 2lakhMT in 2020-21. Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.**
- **Firm tone was recorded in North American lentils cash market during last week. Market sources say that millers and exporters are buying for near terms needs. However, growers and other stakeholders are still gauging price direction and new crops prospects. Overall export volume has been up from last year and it hints towards fundamental support on demand side. Export and overall domestic demand may exceed last year. Market expects firmness to continue.**
- **Commerce ministry of Myanmar has changed exim policy. All importers and exporters have to get registered till 31st Dec-2019. With this new changes importers and exporters would get new 9 digit digital taxation identification no from 5th Jan-2020. Without new registration no import and export would not be possible. It may delay shipment to some extent.**
- **Peas export from France increased to 25750 MT in Oct-2019. It is higher by 3550 MT from Sep. France had exported 22200 MT in Sept-2019. Export increased despite India being out of global market due to quantity restriction.**
- **Demand for peas improved from China. It has helped peas price to improve further. It would push up import parity in India too. Peas production in Canada declined during last two years. However, This year production is up by 18% from last year to 42 lakh MT. Peas import volume in China is expected to cross 18 lakh MT this season. Cattle feed industry is using pea in bulk volume while in India it is used for human consumption.**
- **Turkey import volume for lentils from Canada improved in the month of Oct-2019. It has imported 25211 MT from Canada, 20440 Mt from Kazakhstan and 1627 MT from Russia. Total import by Turkey in Oct was registered at 48783 MT. Total import for Turkey touched at 274,328 MT in this calendar year. It is down by 7% from last year till Oct-2019.**
- **Dry pea stock in US is likely to increase by 0.02 % tp 203983 MT in 2019. It was 199628 MT in 2018. Even lentils stock is expected to be higher by 81% to 144,425 MT in 2019 against 79833 MT in 2018. All chickpeas stock is 294% higher to 157262 MT against 39916 MT in 2018. Out of total small chickpeas stock increase from 12156 to 43318 MT in 2019. It is higher by 256% from last year. Large chickpeas stock is expected to increase by 310% to 113,943 MT in 2019.**
- **Weekly Outlook: -Pulses are likely to trade steady to slightly weak.**

Note: Agriwatch 3rd Adv Estimate For 2019-20 for Urad ,Moong & Tur & preliminary estimate for Chana and Masur for crop year 2019-20, to be marketed in 2020-21.* represents AW estimate.

Urad: Urad production is likely to decrease by 22 % from 24.58 to 19.17 lakh tonne in MY -2019-20. Import is expected to decrease by 0.75 lakh tonne to 2.25 lakh tonne despite quantitative restriction. Import took place illegally through various channels. Total supply would decrease slightly from 36.55 to 30.17 lakh tonne in 2019-20. Export would decrease from 0.3 to 0.2 lakh tonne due to disparity. Consumption would increase from 27.5 to 28 lakh tonne in 2019-20. So, carryout out would decrease from 8.75 to 1.97 lakh tonne. As carryout has declined drastically, supply side is expected to be tight this year. Lower crop size is reflecting on price. It is likely to rule at higher level in new year-2020.

Moong: Moong production is likely to decrease by 9.18 % from 20.26 to 18.40 lakh tonne in 2019-20. Import is expected to stay steady at 1.5 lakh MT in 2020 too. Total supply is expected to decrease from 29.02 to 25.42 lakh tonne in MY 2019-20. As there is no demand from overseas market due to disparity, export is likely to decrease from 1 to 0.75 lakh tonne in the new season. Consumption would decrease from 22.5 to 21.5 lakh tonne due to higher prevailing prices in domestic market. Total usage is expected to touch 22.25 lakh tonne. Despite decrease in consumption carry out would decline from 5.52 to 3.17 lakh tonne. So, any major decline in moong price is unlikely in 2020.

Tur: Tur production is likely to increase by 2.7 % from 36.21 to 37.19 lakh tonne, in the new season (2019-20). Import is expected to increase by 3.5 to 4.0 lakh tonne due to eased restriction on quantity and G 2 G basis import. Total supply would decrease slightly from 48.02 to 49.6 lakh tonne due to improved crop condition. Export may decline to 0.25 lakh tonne due to lower availability in domestic market. Consumption may increase from 40. to 42 lakh tonne in 2020. With export, total consumption has been pegged at 42.25 lakh tonne. Due to lower production and import, carry out would decrease from 7.87 to 6.81 lakh tonne in 2020. Market is expected to find balance and no major spike is expected at this point of time amid commencement of new arrival. Procurement drive may help market to move up.

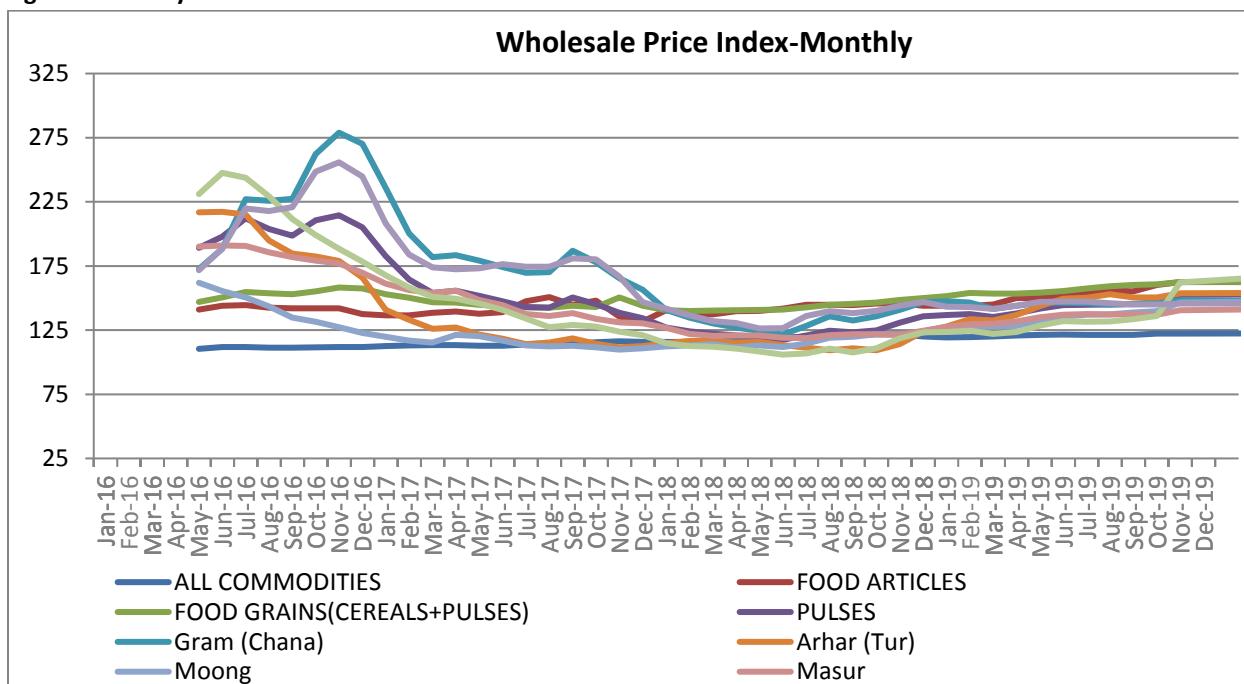

Chana: Chana production is likely to increase from 91.93 to 96.66 lakh tonne for MY 2020-21(preliminary estimate). Sowing is on right now and more than 70% area has been covered so far. As new year is likely to start with hefty carry in of 11.73 lakh tonne, starting from March, supply side seems to be at ease despite lower production size of 91.93 lakh tonne. Total availability would remain almost same as last year at 111.4 lakh tonne including 3 lakh tonne expected import. Consumption with import would remain same at 98.5 lakh MT. Consumption of chana increased due to higher usage for besan Pea prices remained higher from last two years so mixing in besan is almost halted.

Masur: MY 2020-21 is likely to start with 2.84 lakh tonne carry out amid expected production estimate of 13lakh MT. lakh tonne MT. Sowing is on and area would be same as last year. Import is likely to decrease by 1lakh MT as crop is expected to be higher this year as weather condition is normal for lentils. Higher production estimate would keep availability almost at same level at 21.34 lakh tonne. Export would increase slightly from 0.1 to 0.2 lakh tonne this year. Consumption has been

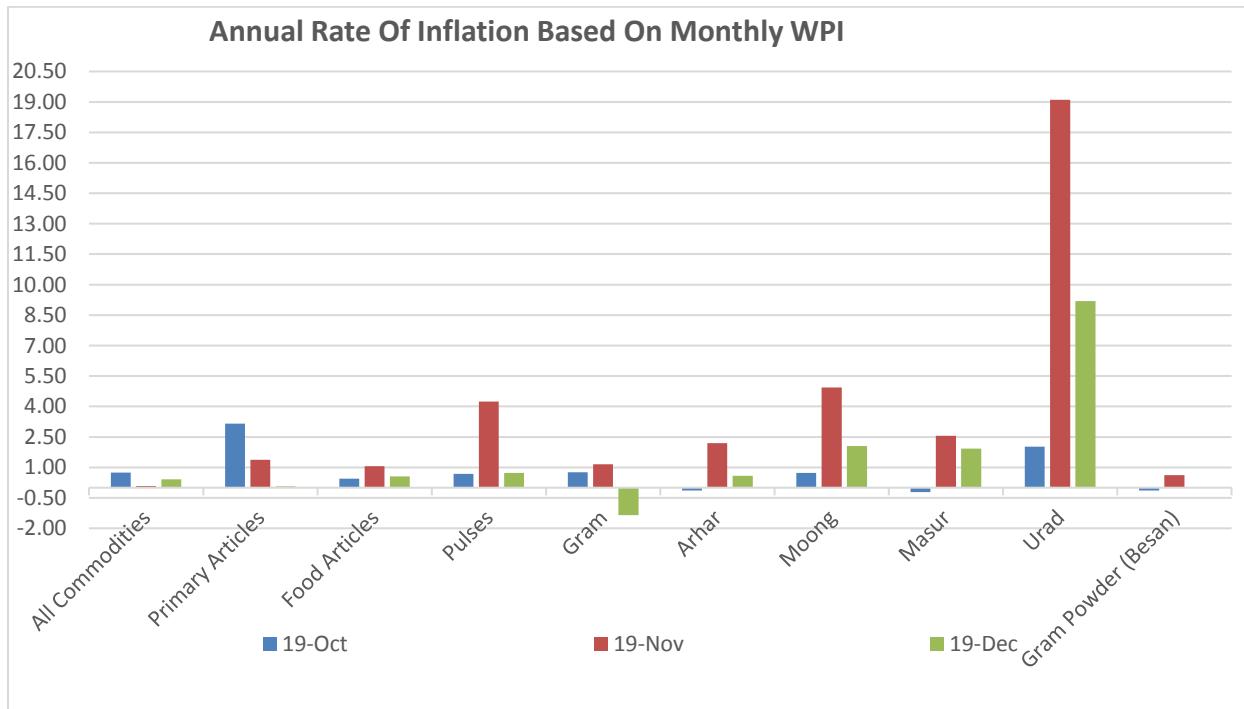

pegged , at 19.2 tonne in the new season. If prices continue to move up, stock from central pool may be released. Nafed has around 2.0 lakh MT stock.

Agri Commodity Indices –Dec -2019:

Pulses WPI: Pulses WPI increased by 6.2 points from 152.5 in Nov to 153.6 in Dec-2019

Source: DES govt. of India (Rabi Sowing is at last phase now)

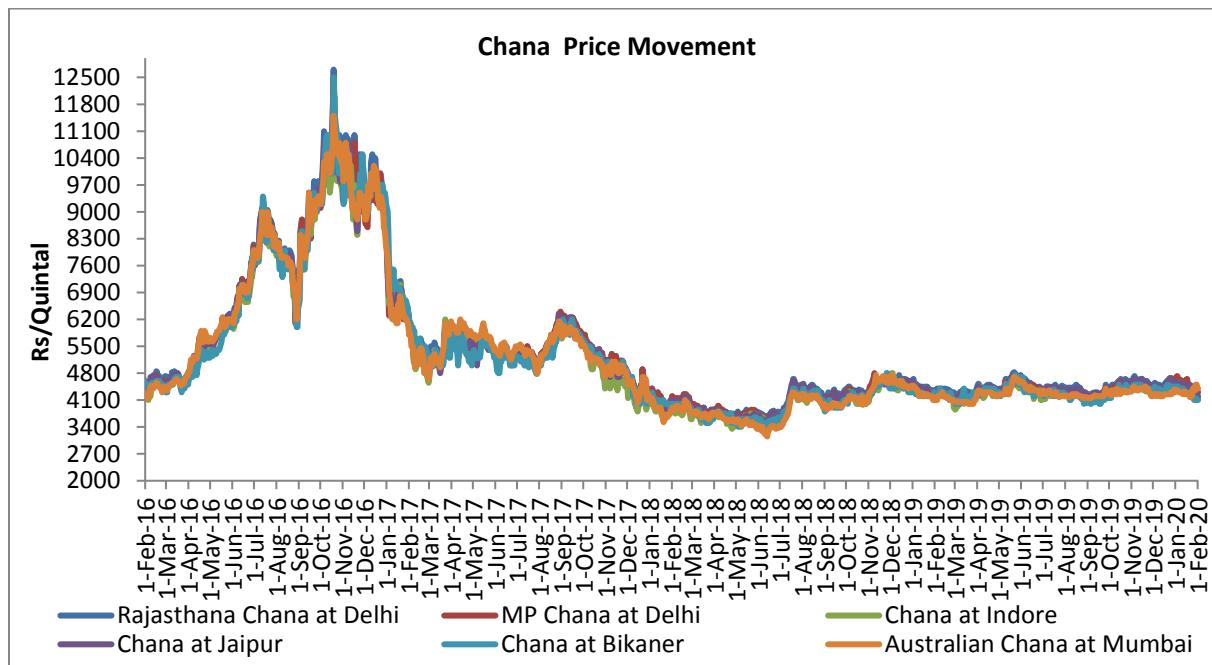

Chana (Chickpeas /Bengal Gram):

Fundamental Analysis and Outlook:

Market Recap:

Farmers have covered 107.21 lakh ha area so far, up by over 11.45 % from last year as on 31.01.2020.. Weather condition for chana crop remains favorable and farmers may increase area further under chana in coming weeks despite it being at last phase of sowing. Recent rains are beneficial to the standing crops. Chana crop is nearing at maturity stages in the region of Bhopal, Gwalior, Beena Ganj basoda and Indore of MP. However, recent rains and cold wave may encourage infestation in the standing crop. If weather opens next week, bumper production seems on the card. As area of chana crop is expected to touch 108- 110 lakh ha this year, supply pressure would increase from mid Feb and it would pressurize chana price once again. Market has started reflecting the pressure. Govt has yet to decide procurement quantity. Emerging condition hints chana to decrease below 4000 in peak arrival season. There is plenty of old stock left and new one would start hitting the market from mid Feb. For chana market Nafed is on driver's seat. Weather condition in Feb and March too would play a crucial role as price driver. As of now condition for better growth for plant may pressurize cash market. At peak arrival season it may move below 4,000 per qtl. If Nafed is allowed to sell chana at market price, Chana may touch Rs3800-3850 level in March

All India average price for Chana decreased by 1.16 percent from Rs 4444 in Dec to 4392 per qtl. in Jan-2020. Australian Chana (imported) price too increased by 1.49 percent from Rs 4248 to Rs 4311 per 100kg during the same period. Following graph illustrates the chana price movement in different markets:

Price Dynamics: Prices are likely to stay steady to slightly weak in Feb due to

- Near record area coverage and favorable weather condition
- Availability of higher stock with Nafed and private hands
- Stockiest are active to release stock as new crop is hardly one month away.
- Weak futures
- Sluggish demand from millers and retailers ahead of new crop..

Seasonality Index: hints weak movement for spot market in Feb-2020.

Chana Future Market Analysis:

Technical Commentary:

- *Decreasing price & OI hint market to trade weak in coming weeks.*
 - *RSI is moving down in neutral region, hints caution to bulls.*
 - *Prices closed below 9 and 18 days EMAs*

Strategy: Sell On Rise

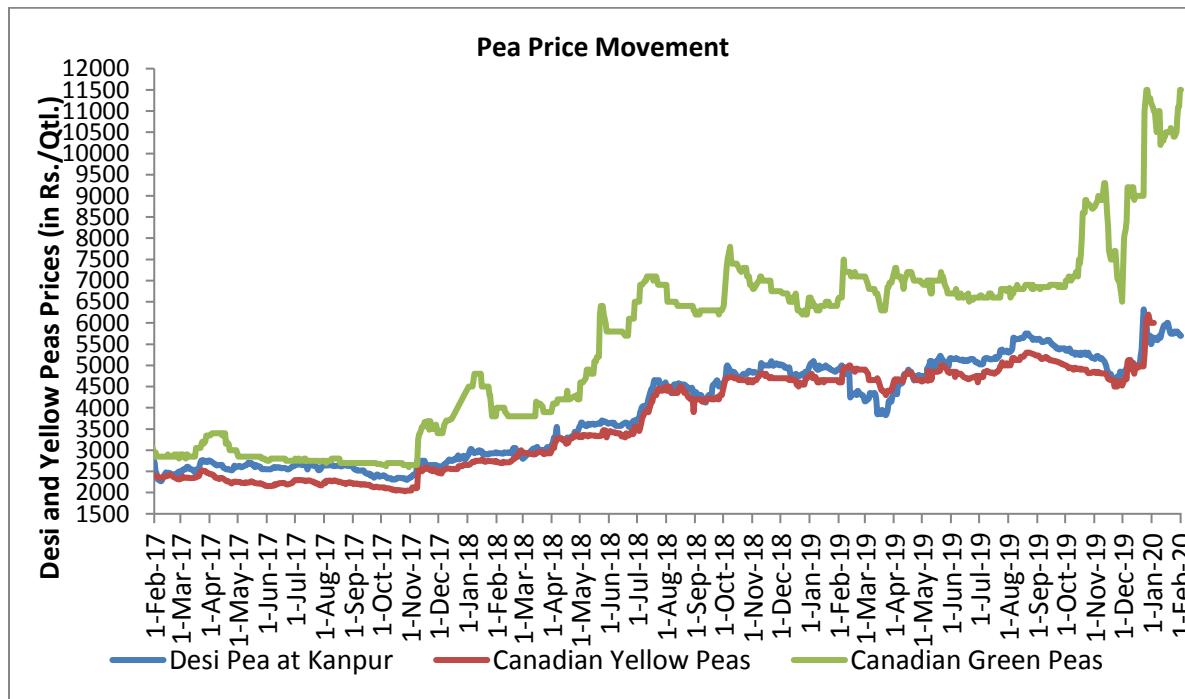

Supports & Resistances			S1	S2	PCP	R1	R2
Chana	NCDEX	March	3850	3800	3990	4115	4153
Monthly Trade Call*			Call	Entry	T1	T2	SL
Chana	NCDEX	March	Sell below	4050	3900	3850	4140

Field Pea (Matar/Dry Pea):

Fundamental Analysis and Outlook:

Despite restricted import, lower availability of stock and meagre volume of import yellow peas cash market traded weak as chana price is ruling much below than normal expectation. Demand for besan is weak as chana is ruling lower. Besan Industries are using chana and not mixing peas. It has cut demand of peas by 20 to 25 lakh MT. The situation is likely to continue this year too. Consumer of peas too are preferring other pulses as it is cheaper. Apart from this new crop has started hitting the market and immediate needs of consumers are being met with it. In Kanpur market. Desi peas is available at Rs 5600-5700 and may come down to Rs 5300-5400 once the arrival increases. Imported stock of yellow peas is declining fast and its supply side would remain tight. The fixed quota of 1.5 lakh MT has already been completed. Actually govt. is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import. But no decision has been taken on it till now. Peas may trade weak due to new arrival in local market. Green peas market may rule steady under prevailing condition.

There is no price availability of yellow /white peas in Mumbai market as import is restricted. In Kanpur market yellow peas is being traded at RS 5600-5700. It has decreased from Rs 6000 to Rs 5650-5700 in last one month. Even green peas price has decreased slightly from 11600 to 11500 per qtl. It may stay steady in Feb-2020.

Market recap:

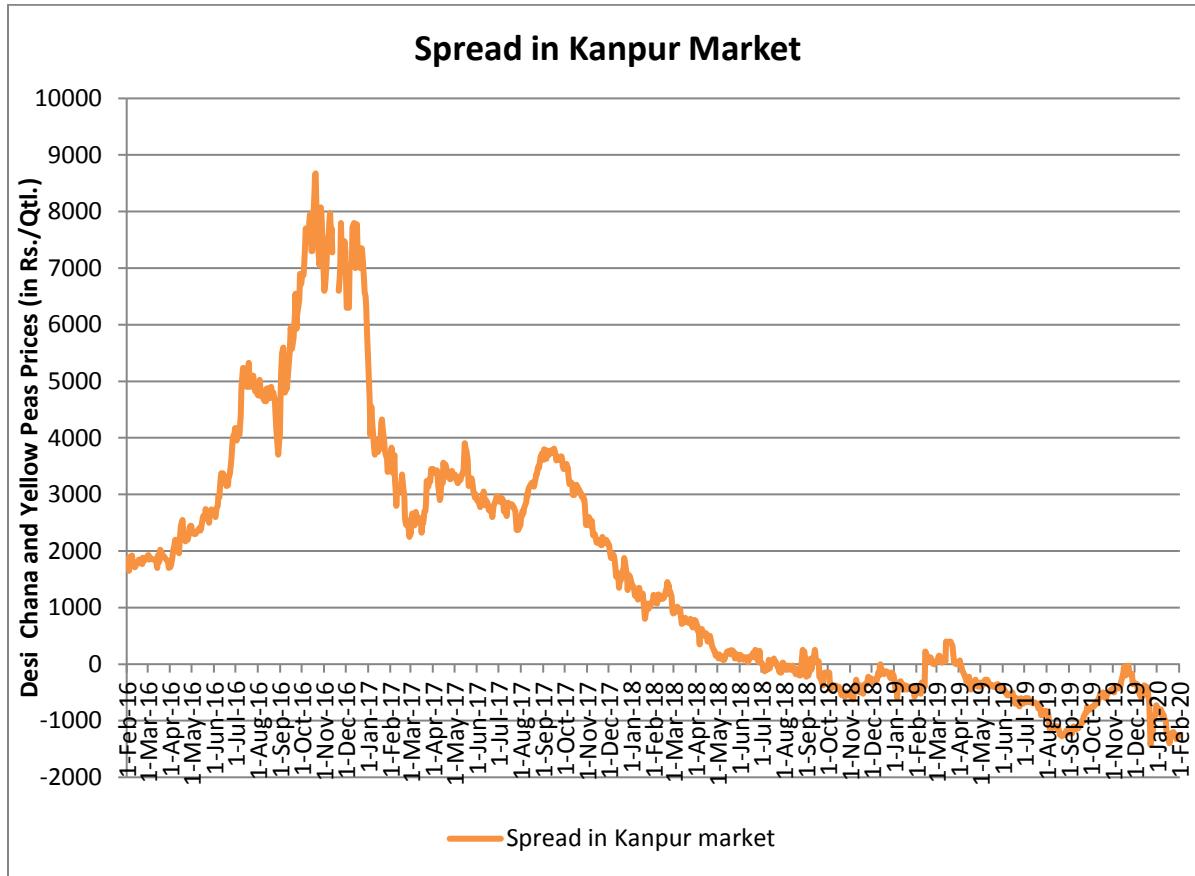

Area under pea in India is lower by 7.77% to 9.64 lakh ha till Jan end. Normal area under peas is 9.45 lakh ha. The year may end with 10 lakh ha. area coverage. However, yield is expected to be better due to good weather condition. So production would be slightly higher than last year. Other pulses prices are ruling lower and it would continue to cap up trend in peas market. Steady tone may prevail in green peas market. Demand has shifted to others pulses. There is no demand of yellow peas for mixing in chana for besan. It would be price restricting factor in coming months.

Price Dynamics: Pea market is expected to trade steady to slightly weak in Feb due to:-

- Good crop condition and new arrival
- Lower demand at higher level

- No demand for besan
- Cheaper availability of other pulses

Spread With Chana:

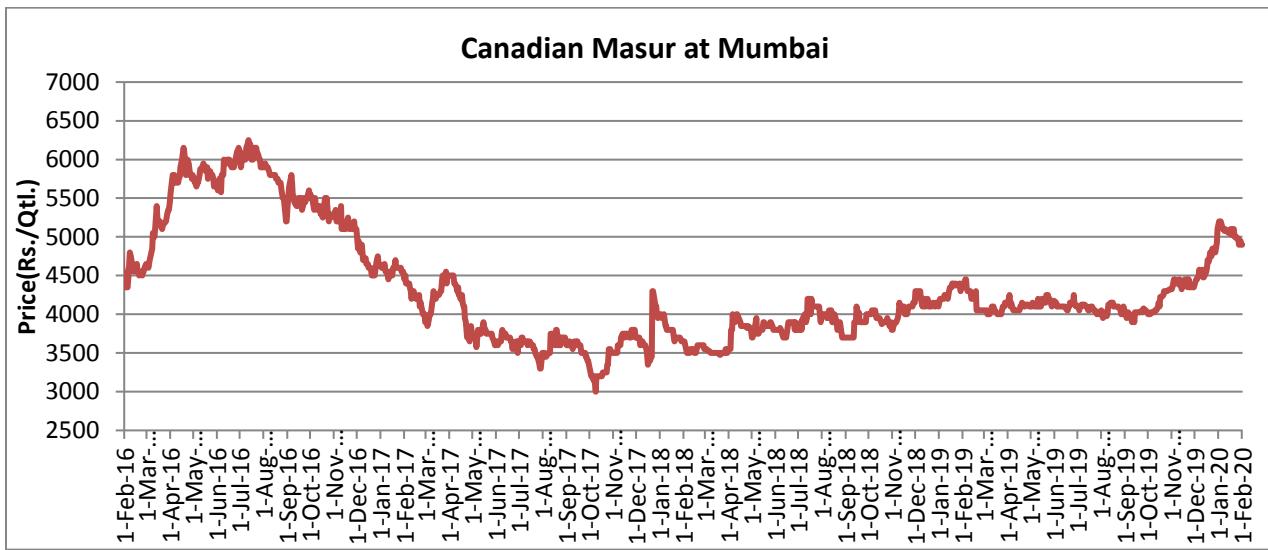

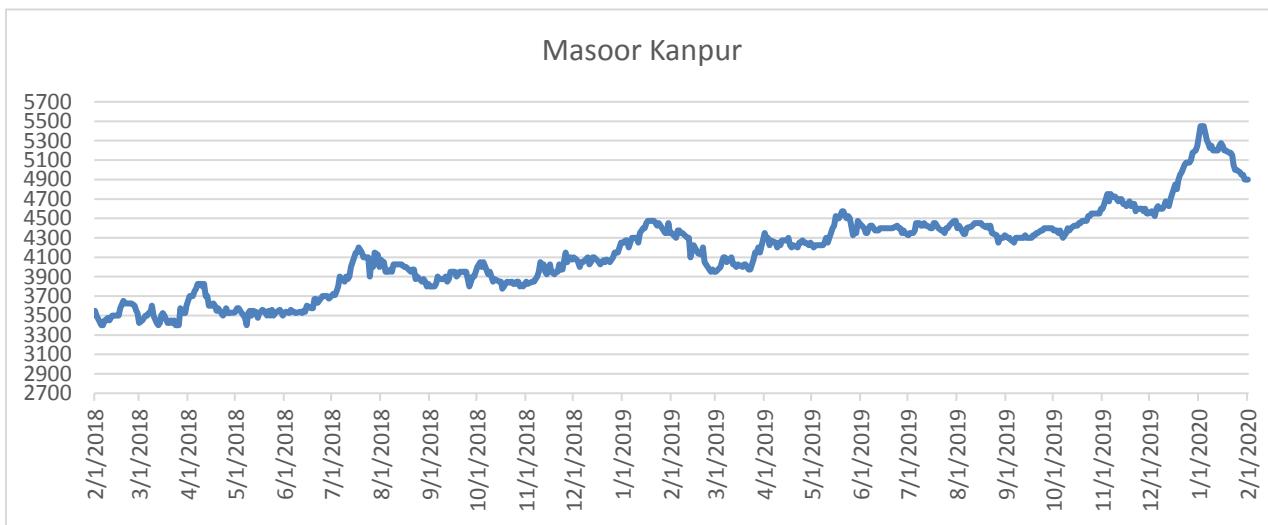

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 633 to Rs 1125 in last one month, based on monthly average of the price. Spread is expected to remain in the negative zone in Feb too on relative movement in Chana prices. Overall outlook seems steady to weak this month.

Seasonality Index depicts that pea prices are likely to notice slight decrease in Feb-2020.

Market Outlook For Feb: Steady to slightly weak movement is expected.

Masoor (Lentil/Masoor):

Stockiest may start releasing stock ahead of new crop passing through maturity stages now. Crop condition is good and higher yield is expected. Right now lentil in Kanpur market is being traded at Rs 4900 and may decrease to Rs 4600-4700 before new crop starts. Old and imported stock is available in the market while Nafed and other states agencies too have stock around 30,000MT. These agencies too would prefer to offload it in Feb and March. Area is down by 4.58 % to 16.08 lakh ha. However, higher yield will compensate area loss to a great extent this year. Weak tone may prevail until govt starts procurement at Rs 4800 per qtl. in March.

**Price Trend In Cash Market:****Price Dynamics:**

In Jan-2020s, average price in key market Kanpur was up by 7.17 % from Rs 4822 to Rs 5158 per qtl. MoM basis. Prices are likely to trade steady to slightly weak in Feb-2020.

Weak movement is expected due to:

- Selling by stockiest ahead of new crop
- Availability of stock with Nafed/Selling in open market
- Imported stock
- Weak demand from retail market ahead of new crop
- Good crop condition so far

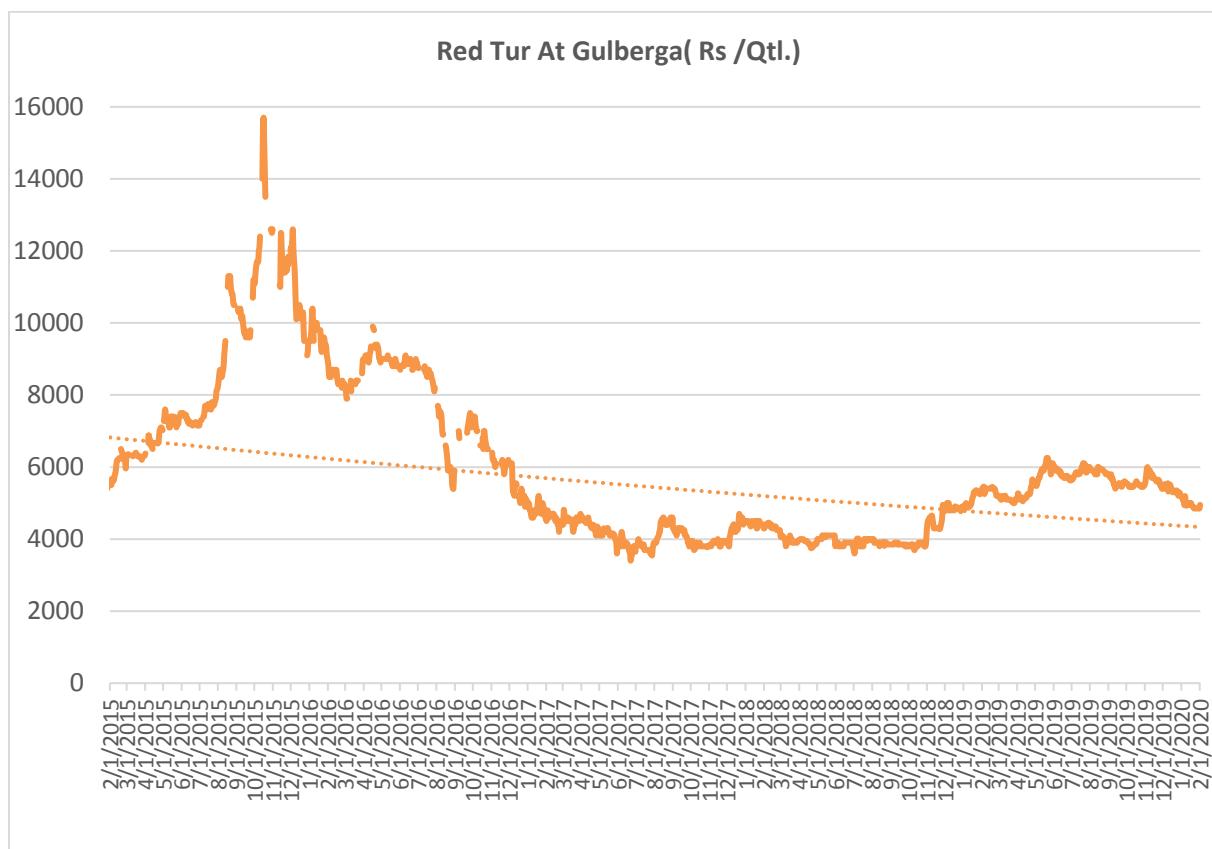

Seasonality Index depicts steady to slightly weak movement in Feb-2020.

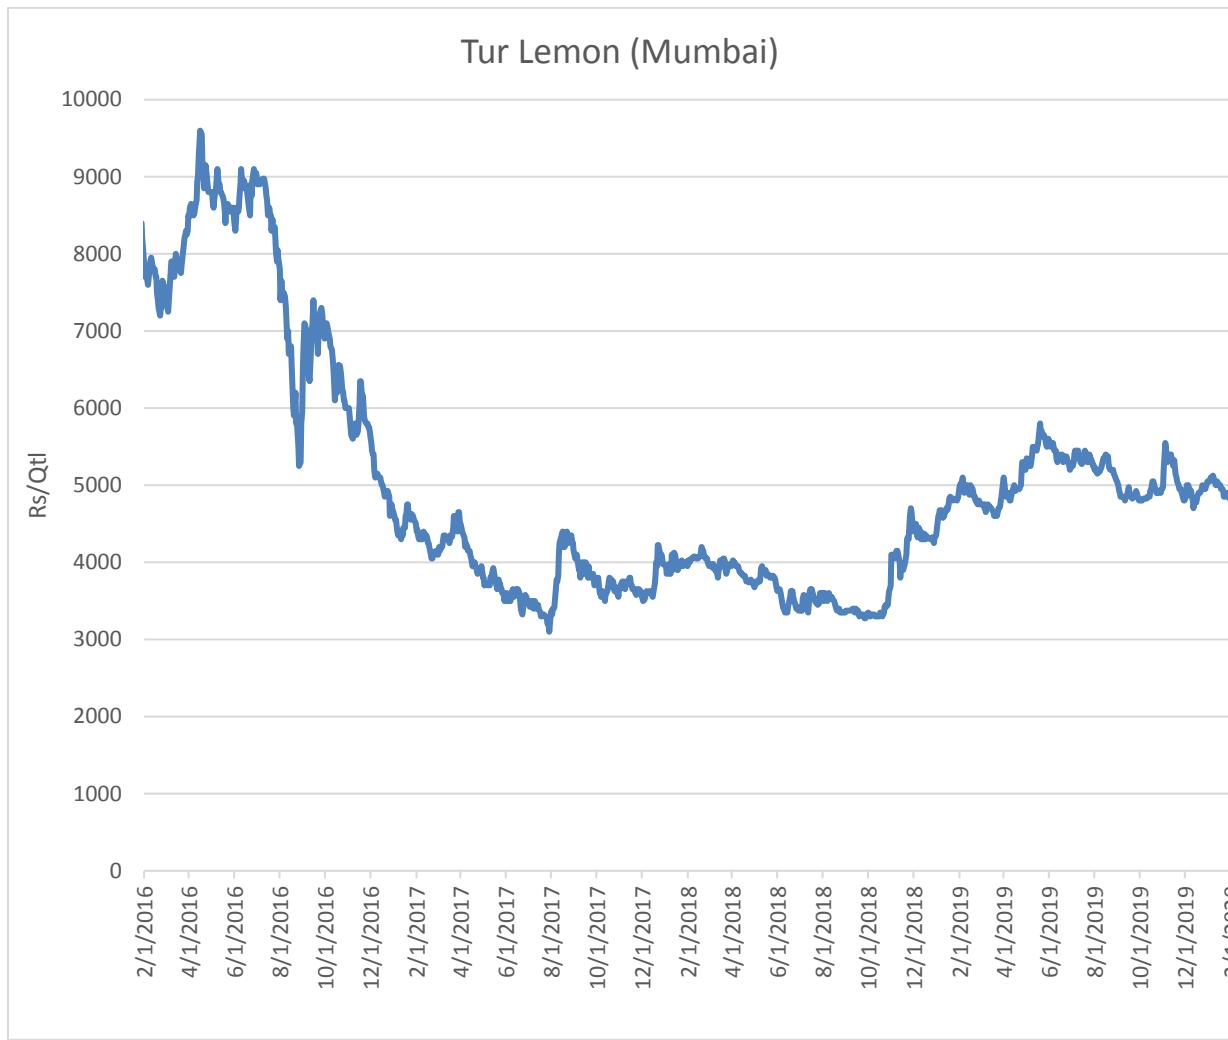

**Tur (Toor/Arhar/Red Gram/Pigeon Pea/Aware):****Fundamental Analysis and Outlook:**

Procurement drive in Maharashtra is expected to begin from 20th Feb in bulk volume. Nafed, FCI and other state agencies would start procurement once registration for tur procurement gets over on 15th Feb-2020. It may start a little bit earlier in Karnataka. Karnataka state govt. would provide Rs 300 bonus over and above MSP (Rs 5800). All India procurement target has been fixed at 5.5 lakh MT. The major chunk is expected to be procured in Karnataka and Maharashtra. As crop harvesting activities has been delayed by un-seasonal rains, arrival pressure is expected from mid Feb. As buyers are not active right now due to higher moisture level in new crop, recovery is not expected before the commencement of buying drive by govt.'s agencies as well as private trades. Under present scenario tur may decrease further by Rs 100-150 this week. As stockiest are selling old stock, availability is ample amid new arrival. So, procurement support is necessary to support market from mid Feb. Overall tone remains weak right now.

Market Recap:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. Crop size may cross 37lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 4800-5500 during Feb-2020.

**Price Dynamics:**

In Jan-2020, average price in Gulberga market was down by 7.86% from 5372 to Rs 4950 per qtl. due to higher supply from old crop and weak demand amid improved crop condition. Tur price in Feb is likely to improve due to

- Commencement of procurement
- Continuous import through G2G basis
- Import by private trade may be delayed by one month
- Likely higher demand from retailers/mills and
- Below normal crop(average of 3 years is 40 lakh MT)

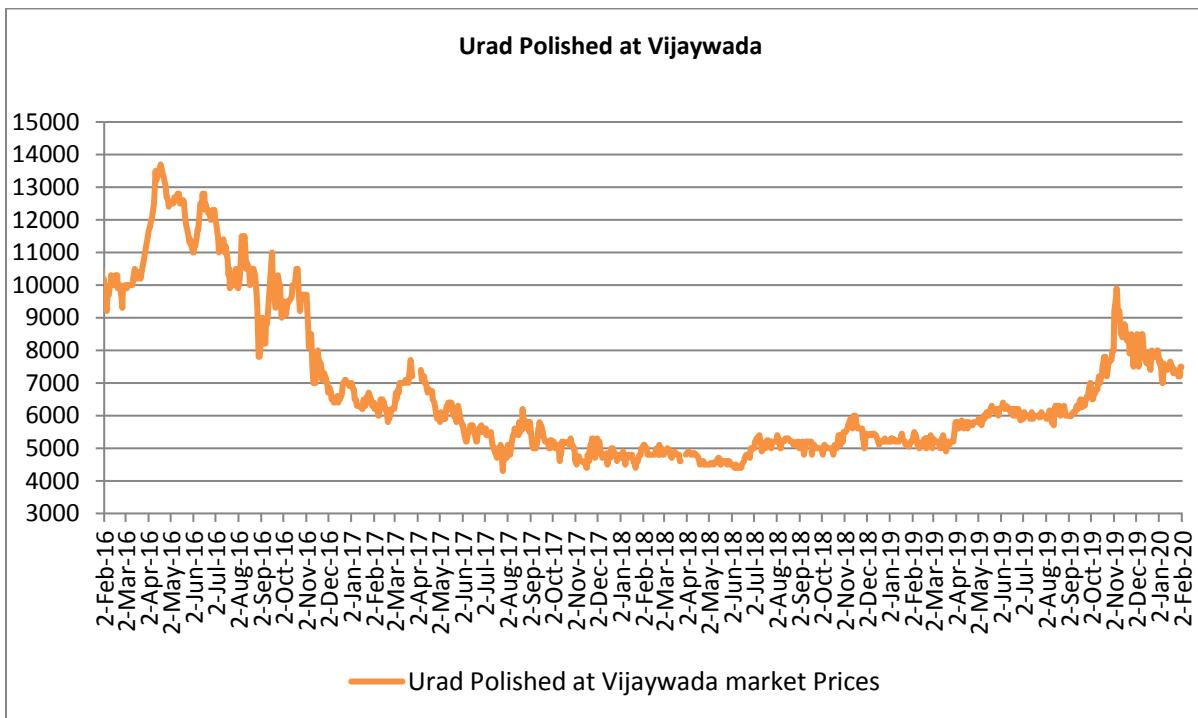

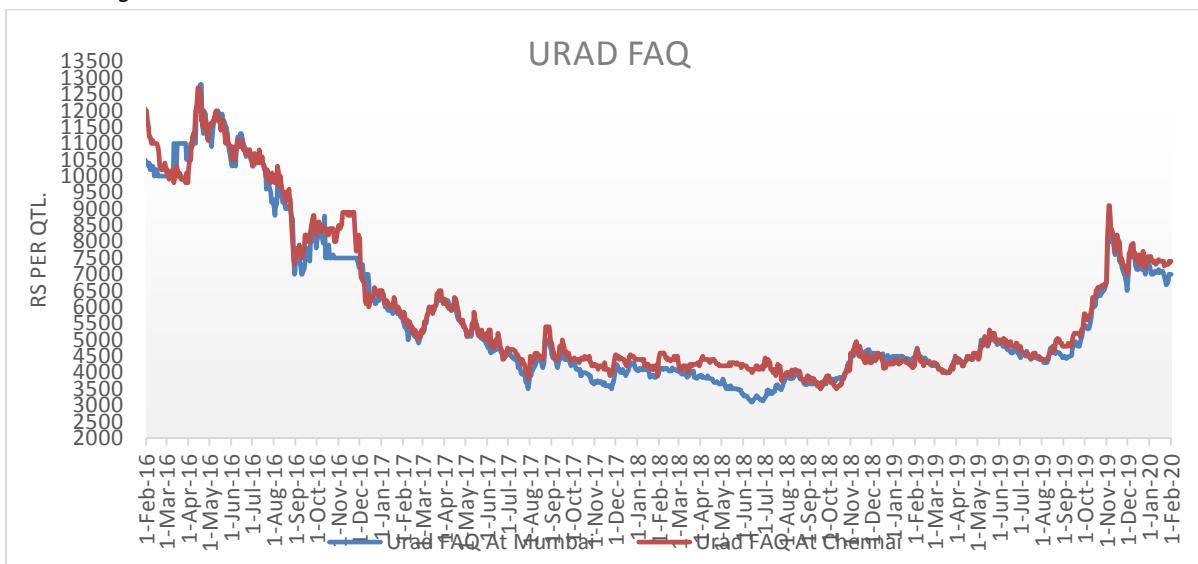

Seasonality Index-depicts steady to slightly firm movement.

Market Outlook for Feb:

Fundamental remains supportive for Tur cash market in the near term.

**Urad (Black Matpe/Black Gram)****Fundamental Analysis and Outlook:****Market Recap:**

Urad cash market traded slightly down as offtake from mills decreased as higher level. Apart from this millers are waiting for new arrival, expected to start from third-fourth week of Feb. As prices are ruling at higher level, it would be difficult to procure desired quantity by state agencies. Import is not possible before end March. Govt still has 198431.88 MT urad in stock despite negligible procurement from kharif season. Maximum stock is in MP (134297.62MT). Sale from central pool is likely to commence soon. It would cap any unexpected upsurge in urad market. In Chennai market urad is being traded at Rs 6900-7000. Steady to weak tone may prevail. Demand is weak at higher level

Seasonality Index depicts range steady to slightly weak tone in the near to medium term.

Price Dynamics:

In Jan, average prices in key markets including Mumbai/was down by 3.34 % percent from 7439 to 7190 per qtl. In Chennai it was down by 2% to 7000..Prices may stay steady to slightly weak in Feb due to

- Higher import quota and likely new arrival from Rabi crop(winter crop)
- Selling of old stock from central pool
- Weak demand at higher level
- Good crop condition so far and
- Cheaper availability of other pulses.

Market Outlook for Feb : Prices are likely to trade steady to slightly weak .

Fundamental Analysis and Outlook For Moong:

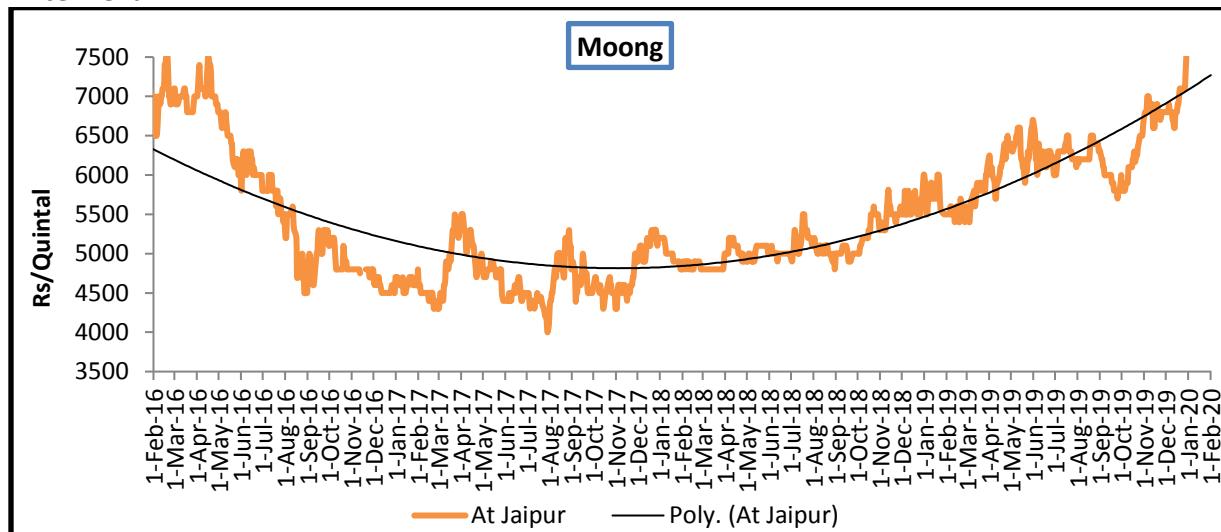

Market Recap:

Moong cash market traded steady amid weak inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7700 and may decrease to Rs 200 in coming weeks. if prices continues to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

Price Dynamics:

Moong arrivals have started decreasing and there is a shortage of quality crop. It would push prices up in cash market amid procurement drive. Average price increased by 575 % to 7700 in Jaipur market in Jan. Nafed still has 1.25 lakh MT stock to release and auction started in many states with procurement drive. Right now demand is weak.

Price Trend:

Market is expected to trade firm in Feb due to:

- Lower arrival in markets
- Shortage of quality crop
- Decreasing stock in central pool
- Increasing disparity for import
- Shortage of moong in global market and
- Rabi crop expected not before March

Seasonality Index depicts firm movement in the near term.

Market Outlook for Feb: Steady to slightly firm movement is expected.

Pulses Wise Technical Outlook for Feb -2020: -

Chana:

Outlook –We expect prices to notice steady to slightly weak movement in Feb-2020. Market may trade down due to:

- Higher area coverage
- Weak demand
- Likely bulk sale by Nafed
- Normal demand for besan
- Selling by private trades and weak futures
- Expected price band for Chana in Delhi is 3900 to 4250 levels in this month.

Trade Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4150 and second target 4050 with stop loss at 4400 level.

Support & Resistance				
S2	S1	PCP	R1	R2
3700	3900	4300	4350	4550

**Pea:****Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Monthly Chart**

Outlook - We expect prices to notice steady to slightly weak movement in this month.

Technical analysis:

- Candlestick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 5600- 6200 in this month.

Strategy: Sell On Rise

Trade Recommendations: Go short around 6050 with the first target of 5700 and second target 5600 with stop loss at 6100 level

Support & Resistance				
S2	S1	PCP	R1	R2
