Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- Pulses demand in domestic market seems to be improving as consumers are buying pulses under panic condition due to covid-19.** Even consumers are shifting now from non-veg to veg. It would push up demand of chana, masur and tur dal in coming weeks. Current demand would support price of chana, tur and lentils at current level to some extent.. It seems good for central pool stock too. Govt. can distribute it among poors if situation gets worse and govt. extends lockdown time for a couple of weeks. Other pulses like moong and urad may trade steady. Normal trade in market will remain disrupted till April. So price movement would depend on govt.'s strategy in coming weeks. No major changes were seen as mostly markets remained closed this week
- Ministry of Commerce and Industry vide Notification dated 17th March-2020 has allowed import of urad to an annual quota of 4 lakh MT during the fiscal year 2020-21.** The import shall be allowed only to the millers /refiners as per procedure to be notified by DGFT. Importers can apply online.
- Recent rains and bad weather during last week disrupted tur arrivals and harvesting activities in domestic market.** Cash market traded under pressure despite smooth procurement drive in various states. It is trading lower by 700-800 than MSP. Nafed and other agencies have procured more than 60% (3.23 lakh MT) of set target (5.45 lakh MT) so far. Import flow remains restricted during arrival time. There is still enough old stock in market and it is affecting market sentiments. Bulk demand from mills is limited. March onward demand is likely to improve. So, tur price is expected to stabilize near current level. Arrival is decreasing while quality of crop coming into market is poor. Farmers are selling good quality tur on MSP to govt.'s agencies. Under prevailing condition cash market is expected to improve from April. Right now it is being traded at Rs 5000-5100 per qtl. in Gulberga market. Moisture level has come down to normal level of 10-11% now. It would trade in the range of Rs 5000 to 5400 per qtl this week.
- Arrival from rabi crop, higher stock (1.82 lakh MT in central pool) and extension in time line (from 31st March to 30th April) for additional 2.5 lakh MT import have affected sentiments in cash market.** Import volume in March and April is going to increase considerably and sensing the emerging scenario private trades too started offloading stock. All these factors pressurized urad cash market and it decreased by Rs 800-1000 in two weeks. Pressure continues and it may stabilize near MSP under prevailing condition. New kharif crop is almost 4 months away. However, green signal for additional import of 2 to 2.5 lakh MT in two months, Nafed stock and intension to commence auction would continue to cap uptrend in the near term. Right now buyers are out of the market due to uncertainty in the market. Around 4.25 lakh MT supply discounting private stock in next 4 months seems sufficient to take care of demand. So, range bound movement is expected in urad market now.
- No major development was seen in cash chana market this week except delayed harvesting activities** due to recent rains and lower arrival. Pressure continues as expected. Expectation of higher chana production this year, higher carry out and commencement of arrival in south India and in some parts of MP have started weighing on market fundamental. Besides, NAFED selling chana at Rs 3900 in Rajasthan and Rs 3800 per qtl in MP have increased pressure further on chana cash market. Ahead of bumper crop futures too is trading weak. Procurement target for bigger states like MP and MH has not been fixed as yet. It has been set at 9,24,456 MT for states like Gujarat, Rajasthan, Telangana, Karnataka and AP. Total 6,15,750 MT would be procured in Rajasthan while it has been fixed at 14,330 MT for Karnataka. For Gujarat target is 57,248 MT, it is 47,600 MT for Telangana. AP would procure 60,468 MT this year. If 20-21 lakh MT is procured in MP and MH, total figure seems close to be 30 lakh MT. Production is likely to exceed 100 lakh MT.
- Masur harvesting started and it has pick up momentum with opening of weather in MP and Uttar Pradesh.** However, some losses have been reported due to hailstorm in some particular region of MP and UP. Loss is considered to be nominal. This year masur production has been pegged at 13.5 lakh MT. It may decrease to 13.25 lakh MT. As new arrival started, prices are decreasing continuously. It may come down to Rs 4400-4500 in peak arrival season. Stockiest are releasing old stock. Nafed has around 21000 MT old stock. This year around 1.75 lakh MT might be procured on MSP. Procurement is expected from 1st of April. Import continues. So overall trend seems weak.
- Yellow peas market traded weak as arrival from new crop is continuously increasing.** However, supply side of green peas is tight and it may move further up. In Kanpur market yellow peas is being traded at Rs 4400-4500 while white

Canadian peas is being traded at Rs-5000-5100. Green peas in Mumbai market is being traded at Rs11600 per qtl. It may continue to rule firm. Pressure might be seen on yellow peas.

Outlook for the week: Cash pulses market except tur and moong, may trade weak.

International Market Update:

- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased** in Jan-2020 in comparison to Dec-2019. In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.
- **Global lentils market traded weak during review week as import demand weakened due to seasonal slow down.** Weak Canadian \$ gave exporters some room to adjust prices and attract some fresh demand. It helped exporters to generate some demand for No 1 Canada large green lentils, No 2 Canada and Extra 3 Canada product.
- **Covid-19 impact is now being seen on global pulses market. The direct impact was seen with the** cancellation of the Global Pulse Confederation's conference in April in Dubai. The normal trade in international market too is being affected indirectly now. Consumption of pulses in other countries may decrease for a short term. If it is not contained world over, pulses market may face serious trouble. However, against it consumption of pulses in India may increase as people here are diverting from non-veg to pulses.
- **Dry peas production in Canada is expected to increase by 1.34 % to 43 lakh MT in 2020-21.** Harvested area has been considered at 1720 thousand ha with likely yield at 2500 kg per ha. In 2019-20 production forecast was 42.43 lakh MT. Thus total supply is expected to increase from 46.19 to 47.85 lakh MT in 2020-21. Despite higher production estimate export figure has been decreased from 35 to 33 lakh MT in 2020-21. However domestic use would increase from 6.94 to 8.60 lakh MT. Carryout too would increase from 4.24 to 6.25 lakh MT this year. Stock to use ratio would increase from 10 to 15 %, while average price might be rule in the range of \$ 245-275 per MT as per Agriculture and agri food Canada. Lentils production in Canada May Increase By 1.43% To 22 Lakh MT in 2020-21.
- **The pace of pea exports from France continued to slow in December, according to data from Eurostat and Terres Univia.** Export shipments during the month totaled 17,425 metric tons (MT), down 12% the 19,745 MT shipped the previous month, and down 2% from the 17,855 MT shipped the same month last year. This lifted season to date export shipments to 122,915 MT, up 20% from the 102,545 MT shipped during the same period last season. So far this marketing year, European Union destinations accounted for 97% of all pea exports, compared to 98.5% last season.
- **Lentils production in Canada is likely to increase by 1.43 % to 22 lakh MT in 2020-21 as per the latest update by agriculture & agri food Canada.** Here harvested area has been considered at 15 lakh ha, slightly higher than last year (14.89 lakh ha). Yield has been considered slightly up from 1460 to 1470 kg per ha. Production has been pegged at 22 lakh MT in 2020-21. It was 21.67 in 2019-20. Total supply would decrease slightly from 28.78 to 26 lakh MT in 2020-21. Even domestic use would decrease from 4.28 to 3.25 lakh MT. Carryout would decline from 3.5 to 2.75 lakh MT. Percentage stock to use ratio would decline from 14 to 12 %. Average price might be rule in the range of 4.40 to 4.70 lakh MT in 2020-21.
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT. It would decrease to 2 lakh MT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Area coverage under chickpeas in Australia in 2019-20 is expected to decline by 15% to 1.7 lakh ha.** Production has been pegged at 1.7 lakh MT this year, down by 11 % from last year. Decrease in area and production is mainly attributed to lower demand from India and weak price in global market. Slight increase in yield has been seen as mostly chickpeas are grown in central Queensland, where weather condition improved in comparison to last year.
- **As per latest update by Australia Bureau of Statistics Australia exported 76,395 metric tons (MT) lentils in Dec-2019.** It is up from 62,178 MT in Nov-2019. Total shipment in current MY reached at 138,573 MT, it is higher by 227 % from last

season till Dec-2019. B, desh brought 31188 MT, India brought 17623 MT and Sri Lanka purchased 8,658 MT in Dec. Pace of Lentil import is likely to be up in Jan -2020 too, as shipment continues, despite new crop at hands in India

- **Weekly Outlook: -Pulses are likely to trade steady to slightly weak.**

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 0.5 points from 153.6 in Dec to 154.1 in Jan-2020

Pulses-Wise Scenario:

Chana

Current Scenario:

Trading activities remains halted due to Covid-19 and normal trading activities are expected not before April-2020. Harvesting got disturbed due to recent rains and is likely to get momentum with opening of weather once again in Andhra Pradesh, Madhya Pradesh and Gujarat and is likely to start in Maharashtra and Rajasthan soon. Procurement target for MP and MH is yet to be fixed. In other states 9.25 lakh MT chana would be procured this year. Some losses have been reported in MP, Raj and UP. As area of chana crop is around 107.5 lakh ha this year, production may exceed to 101 lakh MT. Recent minor loss may be compensated by higher yield in other states. Supply pressure would increase from mid-March and it would pressurize chana price further. Market has started reflecting the pressure. Govt has yet to decide procurement quantity for MP and MH. Emerging condition hints chana to decrease below 3700 in peak arrival season. There is plenty of old stock left and new one has started hitting the market. Even Nafed has started selling old chana at Rs 3900. It would continue to pressurize cash market in the short to medium term. Nafed still has 15 lakh MT old chana in its stock.

All India average price for Chana decreased by 3.04 percent from Rs 4092 to 3968 per qtl. during review week. However, Australian Chana (imported) price decreased by 0.82 percent from Rs 4729 to Rs 4690 per 100kg due to higher availability in domestic market. Following graph illustrates the chana price movement in different markets:

Market Outlook: Pressure is likely to continue in chana cash market this week too due to higher area coverage and ample old stock amid commencement of new arrival. Futures remain un-supportive. Nafed has started selling new old stock near market price and it is affecting market sentiments. Consumers attraction to non veg may push up chana price in coming weeks.

Peas (Matar):
Market Recap:

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and mung) and changed its status in the third week of Dec. It has affected importers badly. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl. Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

Pea in Kanpur market traded weak at Rs.4500-4600 due to new arrival in domestic market. Stockiest too are releasing old stock as bumper chana crop is at hands. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Green peas have started hitting the local market but in limited quantity. As supply side is tight, it would continue to trade up.

Current Market Dynamics & Outlook:

Pea market, barring green peas, traded slightly weak due to increasing pace of new arrival in domestic market and continuous selling by stockists. Kanpur market traded weak at Rs 4500-4600 per qtl. New local crop has started hitting the market. So any major spike is unlikely. Overall, all India average price was down by 1.5% to Rs 4450-4500 per qtl in the first week of March. In Mumbai market, there was no quote for yellow peas as stock was exhausted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has decreased from Rs 400 to Rs 25 due to decreased chana price and peas price too. Spread is expected to remain in the

negative zone in March too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

MarketOutlook: Outlook remains steady to slightly weak in the short term.

Lentils (Masoor):

Market Recap:

New arrival is about to start now. Indian farmers have covered 16.5 lakh ha this year. It was lower by 4.01% from last year. Even late shown crop is now attaining maturity and harvesting is expected to commence in the second week of March. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal. Insects like stem cutters have been seen affecting the crop. Now it has been contained successfully. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in the rest of March is very crucial for the final size of the crop. In normal condition production is likely to exceed 13.5 lakh MT in 2019-20, to be marketed in 2020-21. Pressure on price might be seen.

Current Scenario:

In the 2nd week of March-2020, average price in key market of Kanpur was down by 1.5 % to Rs 4500-4550 per qtl. Prices are likely to trade steady to slightly weak in the 3rd week of March, due to harvesting about to commence and higher production prospects this year. Even govt may start selling stock from central pool as new crop is hardly 10 days away from now. It would start hitting market in the second week of Mar.

Market Outlook: Prices are likely to stay steady to slightly firm due to good demand prospects. Improved demand from mills and restricted offloading by stockiest too remains supportive to cash market. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm..

Pigeon Pea (Tur/Toor):

Market Recap:

Arrival of new tur in Maharashtra commences, While it is increasing in South Indian states, Karnataka, MP and Gujarat. This year It was delayed by 20-25 days this year. Normally, it comes in end December/Jan. Rains during end Dec and first fortnight in Jan have delayed crop harvesting. Some quality loss is feared in Karnataka too due to rains. Moisture content in the crop is still higher up to 11-12 % right now. It should be 10 to 11% in normal condition. Market experts say that arrival from Gulberga would not last long this year. Procurement on MSP has already crossed one lakh MT. With increasing procurement volume market is expected to improve in coming weeks. Investors are active. Stake holders can stock it for two months and may sell it at good profit, once procurement drive comes to an end. May onward pressure from import might be seen. It may restrict uptrend in the market. Crop condition is good in Myanmar. Tur in Gulberga market is being traded at Rs 5000-5050 per qtl., may move up to 5200-5300.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573 MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. As of now around 3.23 lakh MT has been procured. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during current March. Steady to slightly firm trend may prevail.

Market Outlook:

In the 3rd week of March-2020, average price in Gulberga market was up by Rs 100 to Rs 5150-5200, due to commencement of procurement from new crop and private buying. Apart from this decreasing old stock too are lending support to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started increasing now. Moisture level is decreasing with good sunshine in producing region. It may move up by Rs 200 per qtl. from current level.

Black Matpe (Urad):

Prices declined with commencement of sale by Nafed and increasing possibility of import by mills after March-2020. DGFT has extended timeline for 2.5 lakh MT import and now importers can import till April-2020. Nafed has enough old stock while rabi crop too started hitting the market. License is being given to importers as DGFT has given additional import quota of 2.5 lakh MT for urad over and above 1.5 lakh MT. Market sources say that old crop available in Myanmar is around 1 lakh MT while new crop would be available from mid March. Rabi Even in local market new urad would be available in March. So any spike is unlikely. For fulfilling the shortage gap, Nafed may continue to release stock to control price. In local market urad may continue to trade in the range of Rs 5700-6200. Demand from mills is weak at higher level. Urad in Mumbai market traded at Rs 6000-6100 and may decrease to Rs 5700-5800. In Chennai market it is being offered at Rs 5900 and SQ at Rs 6000 per qtl. Overall trend remains weak.

Current Market Dynamics & Outlook:

Nafed has started intervening into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season.

Market Outlook: Urad Prices are likely to show steady to firm momentum.

Green Gram (Moong):

Market Recap:

Moong cash market traded steady to slightly weak amid firm inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7650 and may decrease by Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41 MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in March.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 3700 to 4100 for this week.

Strategy: Sell on rise

Trade Recommendations: Go short around 3950 with the first target of 3850 and second target 3750 with stop loss at 4050 level.

Delhi Chana Physical:

Support & Resistance				
S1	S1	PCP	R1	R2
3700	3800	3900	4150	4250

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Outlook –Downward correction may be seen in pea market as chana may move down again and pressurize pea market. If chana trades weak .it may drag down peas price too..

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700-5000 in this week

Strategy: Sell on rise

Trade Recommendations: Go short around 4950 with the first target of 4800 and second target 4700 with stop loss at 5050 level.
