**Commodity-wise Domestic, International Prices and Arrivals at Different Centers**

**Highlights-Domestic Market:**

- **Lockdown has been extended till 3rd May-2020.** However, some relaxation might be given to farmers/traders and transportation. Supply chain is likely to be disrupted for next two-three weeks and it would drive pulses price up in coming days. As maximum markets are not open, prices reflected in some markets don't represent the actual price. Actual price might be seen when lockdown is completely relaxed.
- **Maximum stock of Moong is with Nafed and supply from major producing region** Nagore remains restricted due to lockdown. Consumption of moong dal has increased considerably due to Corona virus threat. As supply is not smooth from Nagore, moong price is continuously increasing. Even Nafed is selling moong at higher price. Supply side is expected to be tight until lockdown is relaxed for some particular area/sectors. MP govt. would allow farmers to sell their crops outside markets on MSP. More relaxations regarding mandi tax, trading markets might be considered.
- **Masur cash market** would continue to trade firm due to supply disruption in domestic market and delayed vessels. Farmers are unable to sell their crops in markets while stock in mills is diminishing fast. Mills are unable to get whole lentils for processing. So prices are increasing in domestic market. It would continue to trade firm until lockdown is not relaxed. In global market quotes for ready shipment has increased by \$50 to \$625 per MT. There is good demand from B, desh and Pakistan.
- **The IPGA has requested the DGFT to extend time line for urad import to 60 days.** It was extended for 30 days from 31st March to 30th April-2020. As import could not take place in March end /April due to lock down and 2.5 lakh MT import is not possible within 30th April time frame. Ports, markets remained closed and there was no availability of labour during last 10 days. Besides, demand has been made for change in applying date for 4 lakh MT urad import for 2020-21. Applying date should be 15 of May now.
- **Cash tur market traded up on supply disruption due to lockdown till 14th of April.** Goods movement remains disturbed due to shortage of labours, transportation. It has pushed dal price up in the market. Even stock in the mills is decreasing. Prices may move further up if supply chain is not set on right track this week. Tur in Gulberga market was being traded at Rs 5350-5450 and may move further up due to sudden increase in demand. Even procurement pace has slowed down and is unlikely to return to normal track before mid April.
- **Lockdown, non-availability of labours and transport have disrupted supply chain in the market.** Mills are unable to get raw materials for processing. Due to lock down demand for urad dal was seen increasing while supply was decreasing. It has helped urad price to move up in south Indian markets. However, if supply chain is restored, it may decrease again. Urad price moved up last week from Rs 6500 to Rs 6900 in Chennai market. Lock down of Markets due to Covid-19 continues and if situation does not improve, it may be extended further after 15th April-2020 too. . Even procurement drive is not taking place. So inner tone in the market remains weak. As govt. would distribute pulses among the poor, demand for dal would remain weak for next three months. It would not allow market to improve even if lock down period is over. In various market it would continue to move in the range of Rs 6500-7000. Overall trend seems range bound this week.
- **Mostly cash markets remained closed due to increasing fear of Covid-19. It would remain closed till 14th Apr-2020.** Lower arrival, restricted trading activities helped market to recover this week despite restricted trade in some markets in the first week of April. As bulk trading activities remain halted and sudden sprut in demand due to lockdown helped market to recover this week by Rs 300 to Rs 400. No moong crop is due in next two months amid negligible import volume. So, cash market is likely to trade range steady to slightly firm in April. . In Vijayawada market new moong is being traded at Rs 7300-7400, up by Rs 400-200 from previous week.
- **Yellow peas market traded weak as arrival from new crop is continuously increasing.** However, supply side of green peas is tight and it may move further up. In Kanpur market yellow peas is being traded at Rs 4400-4500 while white Canadian peas is being traded at Rs 5000-5100. Green peas in Mumbai market is being traded at Rs 11600 per qtl. It may continue to rule firm. Pressure might be seen on yellow peas.

**Outlook for the week:** Cash pulses market may trade firm due to lock down..

**International Market Update:**

- **Dry peas production in Canada is expected to increase by 1.34 % to 43 lakh MT in 2020-21.**Harvested area has been considered at 1720 thousand ha with likely yield at 2500 kg per ha. In 2019-20 production forecast was 42.43 lakh MT. Thus total supply is expected to increase from 46.19 to 47.85 lakh MT in 2020-21. Despite higher production estimate export figure has been decreased from 35 to 33 lakh MT in 2020-21. However domestic use would increase from 6.94 to 8.60 lakh MT. Carryout too would increase from 4.24 to 6.25 lakh MT this year. Stock to use ratio would increase from 10 to 15 %, while average price might be rule in the range of \$ 245-275 per MT as per Agriculture and Agri Food Canada.
- **Dry peas area in Canada is likely to be same in Canada as was seen in 2019-20. It may be 1.75 million ha.** in 2020-21. The reason behind it is likely good returns and better export demand. Dry peas production may touch at 43 lakh MT. Supply is expected to rise marginally due to higher carry-in stocks. Exports are expected to be lower than the current crop year and carry-out stocks are expected to rise. The average price in 2020-21 is expected to be unchanged (\$245-275) from the previous year.
- **Lentils production in Canada is likely to increase by 1.43 % to 22 lakh MT in 2020-21 as per the latest update by Agriculture & Agri Food Canada.** Here harvested area has been considered at 15 lakh ha, slightly higher than last year (14.89 lakh ha). Yield has been considered slightly up from 1460 to 1470 kg per ha. Production has been pegged at 22 lakh MT in 2020-21. It was 21.67 in 2019-20. Total supply would decrease slightly from 28.78 to 26 lakh MT in 2020-21. Even domestic use would decrease from 4.28 to 3.25 lakh MT. Carryout would decline from 3.5 to 2.75 lakh MT. Percentage stock to use ratio would decline from 14 to 12 %. Average price might be rule in the range of 4.40 to 4.70 lakh MT in 2020-21.
- **Chickpeas production in Canada is likely to decrease from 2.52 lakh MT to 2.0 lakh MT in 2020-21.** Area is expected to decrease from 156 to 117 thousand ha. Export may increase slightly from 1.3 to 1.35 lakh MT in 2020-21. Prices may hinge in the range of \$465-485/per MT.
- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019.** In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.
- 
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT .It would decrease to 2 lakh MT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Area coverage under chickpeas in Australia in 2019-20 is expected to decline by 15% to 1.7 lakh ha.** Production has been pegged at 1.7 lakh MT this year, down by 11 % from last year. Decrease in area and production is mainly attributed to lower demand from India and weak price in global market. Slight increase in yield has been seen as mostly chickpeas are grown in central Queensland, where weather condition improved in comparison to last year.

**Weekly Outlook: -Pulses are likely to trade steady to slightly weak.**

**Annual Rate Of Inflation Based On Monthly WPI**

Commodity	19-Dec	20-Jan	20-Feb
All Commodities	0.10	-0.50	0.50

**Wholesale Price Index-Monthly**

The chart displays the monthly Wholesale Price Index (WPI) for various commodities from March 2017 to February 2020. The Y-axis represents the index value, ranging from 25 to 325 in increments of 50. The X-axis shows the months from Mar-17 to Feb-20. The commodities tracked are:

- ALL COMMODITIES (Dark Blue)
- PULSES (Purple)
- Moong (Light Blue)
- Gram Powder (Besan) (Light Purple)
- FOOD ARTICLES (Red)
- Gram (Chana) (Teal)
- Masur (Pink)
- FOOD GRAINS(CEREALS+PULSES) (Green)
- Arhar (Tur) (Orange)
- Urad (Light Green)

The index generally shows a downward trend from 2017 to 2018, followed by a period of relative stability and a slight upward trend towards the end of 2019 and early 2020. The 'ALL COMMODITIES' index starts around 125 in March 2017, drops to a low of approximately 115 in late 2017, and then fluctuates between 120 and 135 through 2019, ending at approximately 125 in February 2020. The 'FOOD GRAINS(CEREALS+PULSES)' index starts around 140, drops to a low of approximately 110 in late 2017, and then rises to approximately 175 by February 2020. The 'FOOD ARTICLES' index starts around 130, drops to a low of approximately 115 in late 2017, and then rises to approximately 165 by February 2020.

Pulses WPI decreased by 0.9 points from 154.1 in Dec to 153.2 in Feb-202

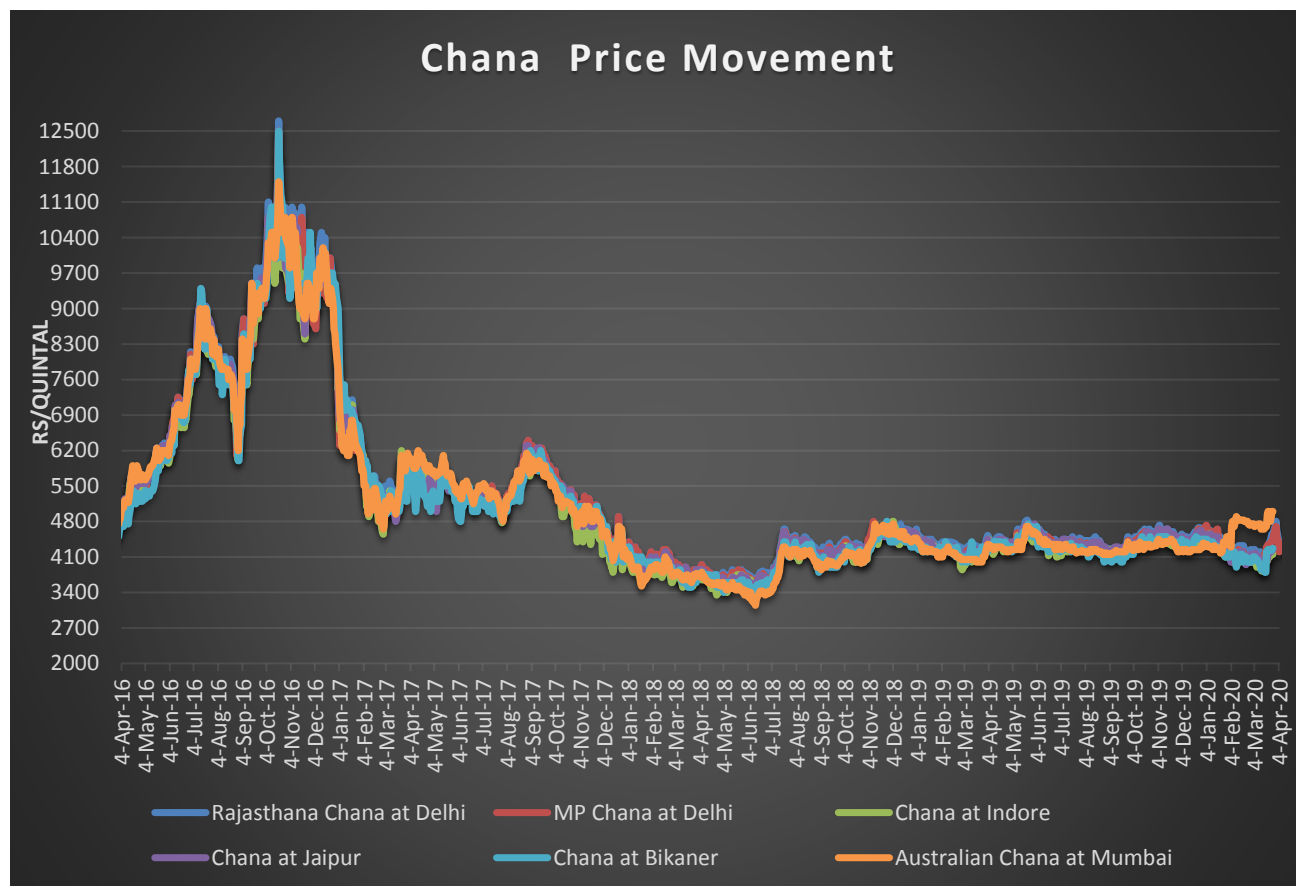

### Pulses-Wise Scenario:

#### Chana

##### Current Scenario:

Trading activities remains halted due to Covid-19 and normal trading activities are expected not before mid April-2020 if lock down period is relaxed..Harvesting got disturbed due to recent rains and is likely to get momentum with opening of weather once again in Andhra Pradesh, Madhya Pradesh and Gujrata and is likely to start in Maharashtra and Rajasthan soon. Procurement target for MP and MH is yet to be fixed.In other states 9.25 lakhMT chana would be procured this year.Some losses have been reported in MP,Raj and UP.As area of chana crop is around 107.5 lakh ha this year, production may exceed to 101 lakhMT. Recent minor loss may be compensated by higher yield in other states. Supply pressure would increase now and it may pressurize chana price further..Market has started reflecting the pressure.Govt has yet to decide procurement quantity for MP and MH..Emerging condition hints chana to rule steady to slightly firm from current level..There is plenty of old stock left and new one has started hitting the market..Even Nafed has started selling old chana at Rs 3800-3900. It would continue to pressurize cash market in the short to medium term. Nafed still has 15 lakh MT old chana in its stock.

All India average price for Chana increased by 5.43 percent from Rs 4298 to 4532 per qtl.during review week. Even Australian Chana (imported) price increased to Rs 4950 per 100kg due to halted harvesting activities. in domestic market. Following graph illustrates the chana price movement in different markets:

**Market Outlook:** Pressure might be seen in chana cash market this week too due to slower pace of procurement and restricted demand amid commencement of new arrival. Futures remain un-supportive.Nafed has started selling old

stock near market price and it is affecting market sentiments. Distribution of 1 k.g. dal per family/per ration card would affect direct demand from cash market.

**Note: Charts have not been updated due to unavailability of price due to lockdown**

**Peas (Matar):**

**Market Recap:**

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. However, in some markets it traded up due to supply disturbance. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and kaspas) and changed its status in the third week of Dec. It has affected importers badly. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl. Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

Pea in Kanpur market traded firm at Rs.4700-4800 due to halted arrival in domestic market. Stockists too are unwilling to release old stock despite bumper chana production prospects. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Green peas have started hitting the local market but in limited quantity. As supply side is tight, it would continue to trade up.

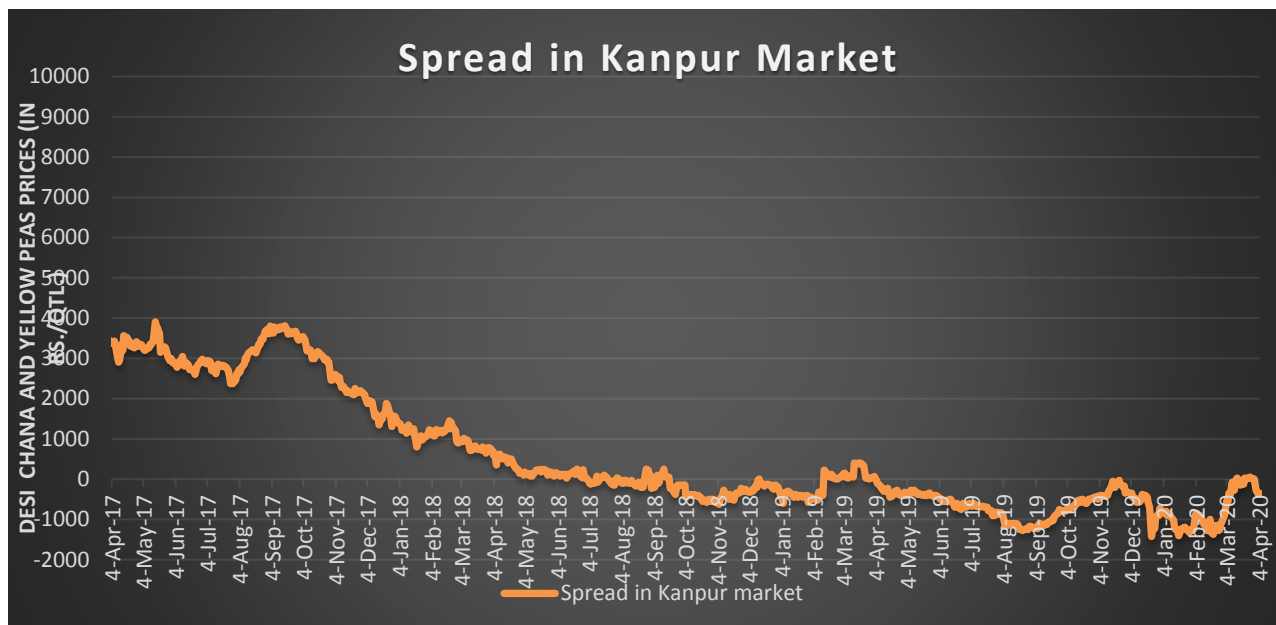

#### Current Market Dynamics & Outlook:

Peas market traded slightly firm due to halted pace of arrival in domestic market and restricted selling by stockists. Kanpur market traded firm at Rs 4700-4800 per qtl. New local crop has started hitting the market. So any major spike is unlikely in April. Overall, all India average price was up by 1.5% to Rs 4700-4750 per qtl in the first week of April. In Mumbai market, there was no quote for yellow peas as stock was exhausted.

### Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 250 due to decreased chana price and peas price too. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

**MarketOutlook:** Outlook remains steady to slightly firm in the short term.

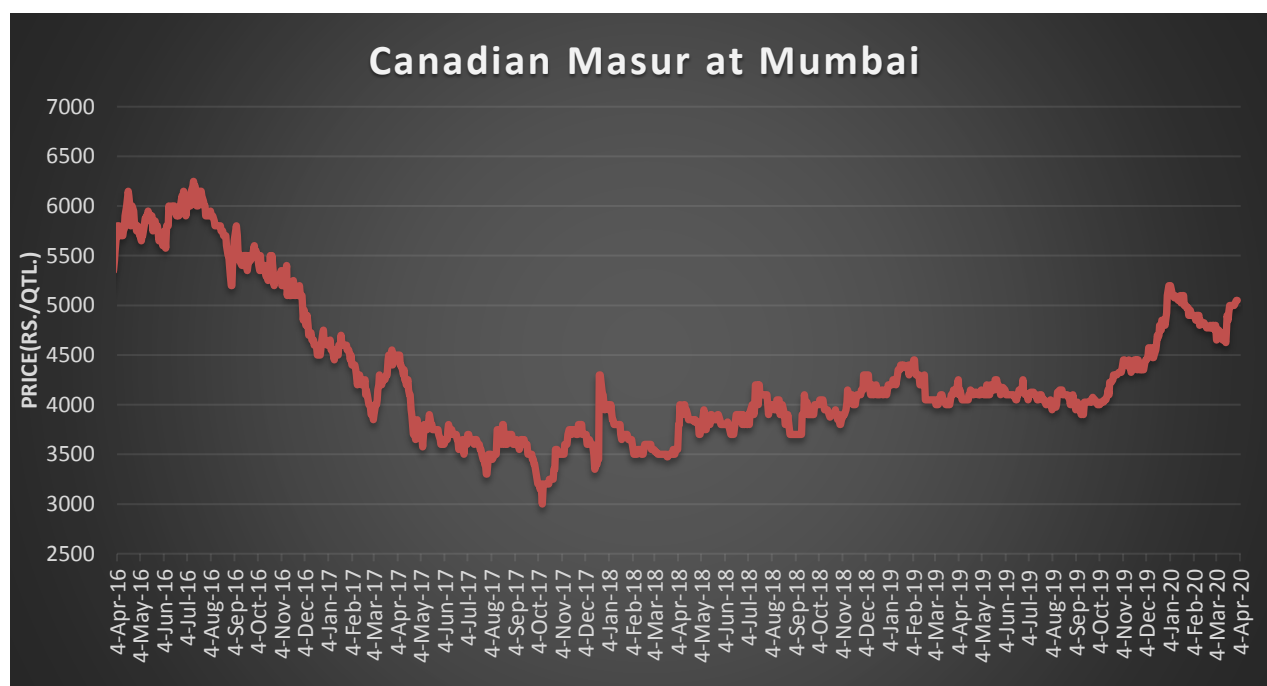

### Lentils (Masoor):

#### Market Recap:

New arrival has started now and govt would procure 1.21 lakhMT on MSP from mid April..Indian farmers have covered 16.5 lakh ha this year. As supply remains disrupted prices are moving up. However a correction is expected now..It was lower by 4.01% from last year. Even late shown crop is now attaining maturity and harvesting is expected to commence in the second week of March. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal. Insects like stem cutters have been seen affecting the crop. Now it has been contained successfully..In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in the rest of March is very crucial for the final size of the crop. In normal condition production is likely to exceed 13.5 lakh MT in 2019-20, to be marketed in 2020-21. Pressure on price might be seen.

#### Current Scenario:

In the 1st week of April-2020, average price in key market of Kanpur was up by 6 % to Rs 4700-4750 per qtl. Prices are likely to trade steady to slightly firm in the 1st week of April, due to commencement of procurement. Even govt may start selling stock from central pool. New crop starts hitting the market.

**Market Outlook:** Prices are likely to stay steady to slightly firm due to good demand prospects. Improved demand from mills and restricted offloading by stockiests too remains supportive to cash market. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm..

**Pigeon Pea (Tur/Toor):**

### Market Recap:

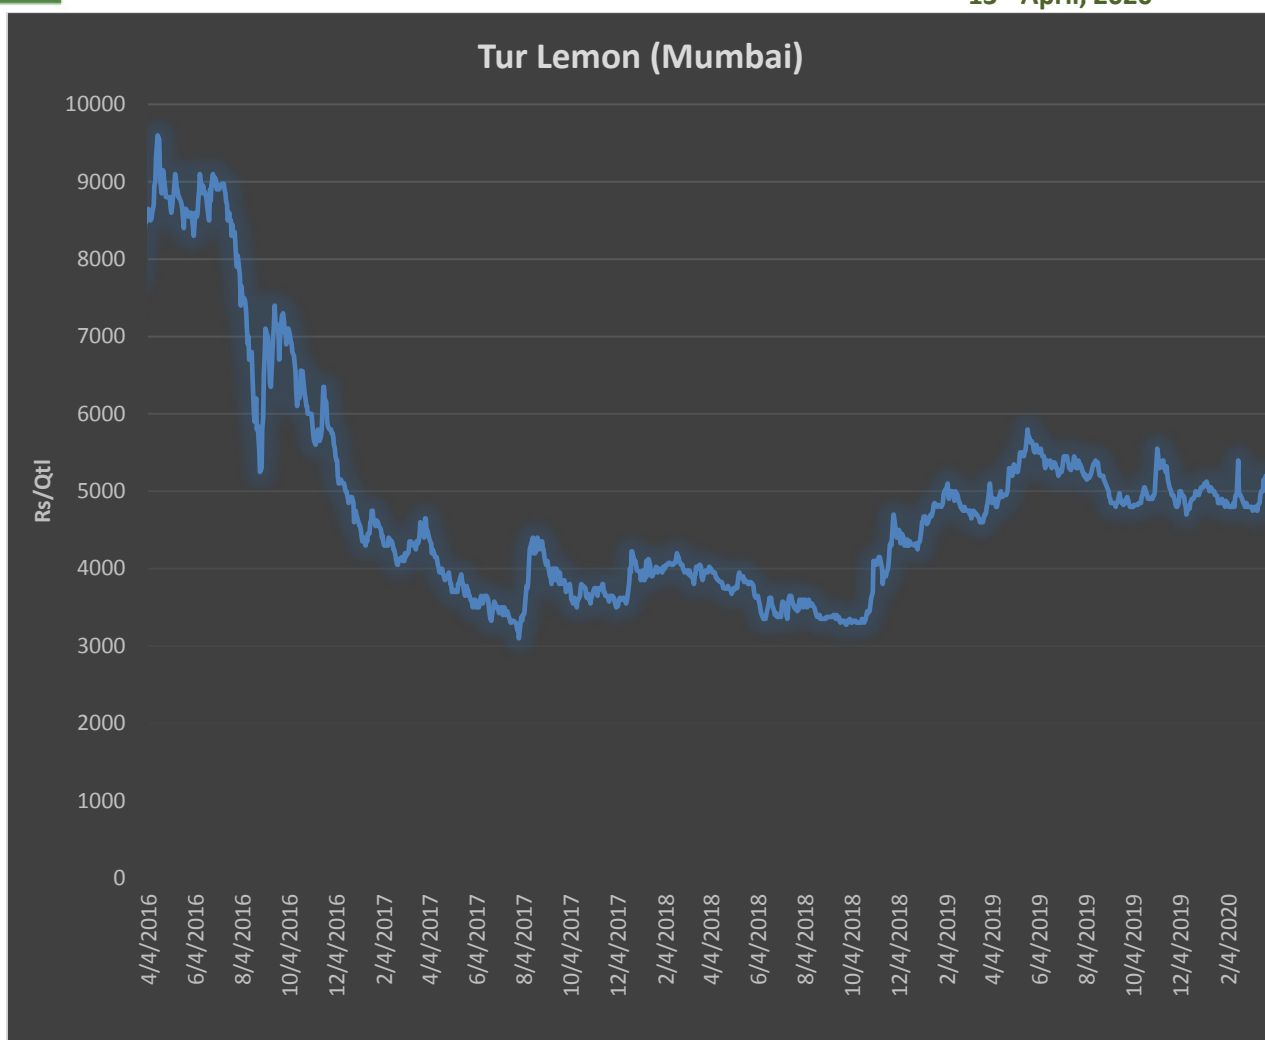

Despite lockdown and limited movement, tur may trade at Rs 5200-5500 in Gulbarga market in coming weeks. Procurement drive is expected now in bulk volume after 15th of April, if lockdown time line is relaxed, it may push market up again. In state like Uttar Pradesh, Rajasthan, Bihar and Gujarat late shown crop condition is very good and recent rains have benefitted more than loss by recent rains for harvested crops in Karnataka and MH. Agriwatch is still strict with 37.19 lakh MT production estimate. If weather remains favourable, production size may improve to 37.5 to 38 lakh MT. Quality of new crop coming into market is good so far.

### Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. As of now around 3.70 lakh MT has been procured. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during current March. Steady to slightly firm movement may prevail.

### Market Outlook:

In the 1st week of April-2020, average price in Gulberga market was up by Rs 150 to Rs 5200-5400, due to higher pace of procurement from new crop and private buying. Apart from this weak demand too are supportive to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started increasing now. Moisture level is decreasing with good sunshine in producing region. It may move up by Rs 200 per qtl. from current level to Rs 5500.

#### **Black Matpe (Urad):**

Market sources say that urad stock in Myanmar is around 3.5 lakh MT. Out of this old stock is said to be around 50,000 MT. Exporters in Myanmar are unwilling to sell urad at lower price as they are well aware of 4 lakh MT import quota approved by India for MY 2020-21. Vessels are expected by the third week of this month, coming from Myanmar via Singapore. As demand for India is higher than availability in Myanmar, price of urad is unlikely to decrease from current level. Under prevailing condition urad may trade steady to slightly firm.

#### **Current Market Dynamics & Outlook:**

Nafed has started intervening into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season.

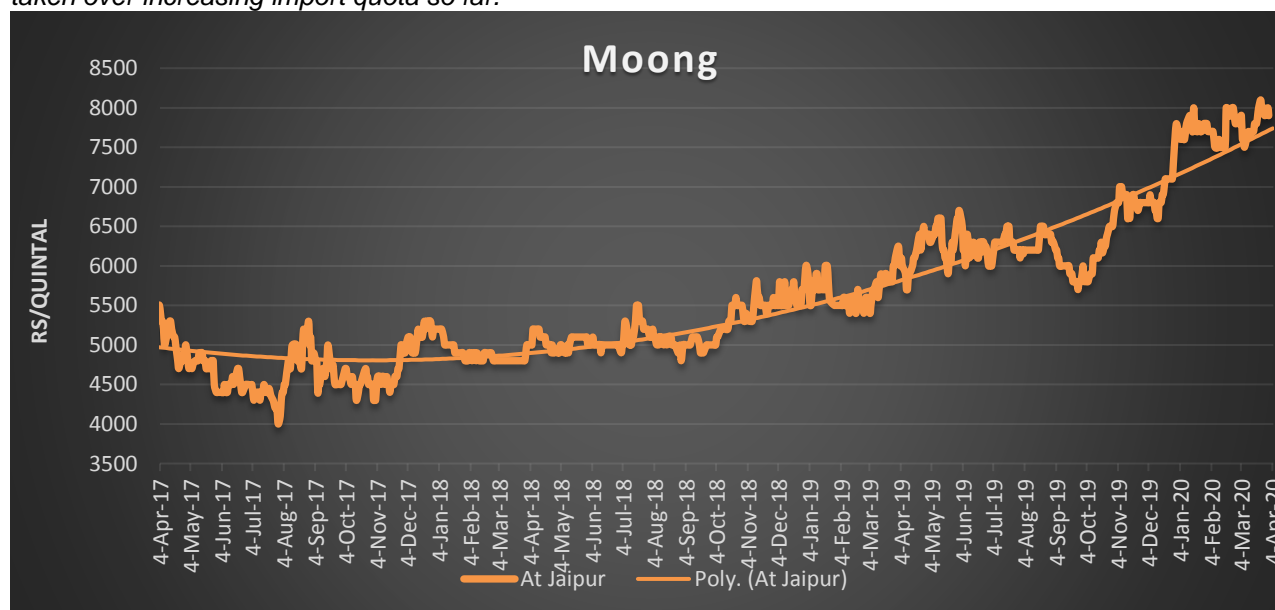

**Market Outlook:** Urad Prices are likely to show steady to firm momentum.

#### **Green Gram (Moong):**

##### **Market Recap:**

Moong cash market traded steady to slightly weak amid firm inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7650 and may decrease by Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41 MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

**Market Outlook:** Moong prices are likely to trade steady to slightly firm in the near term.

**Impot & Average Monthly CiF:**

### Pulses Wise Technical Outlook For The Week:-

#### Chana:

#### Technical Analysis:

**Outlook:** –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in March.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 3700 to 4100 for this week.

**Strategy:** Sell on rise

**Trade Recommendations:** Go short around 3950 with the first target of 3850 and second target 3750 with stop loss at 4050 level.

#### Delhi Chana Physical:

Support & Resistance				
S1	S1	PCP	R1	R2
3700	3800	3900	4150	4250

**Spot Market outlook:** Chana prices are likely to show steady to slightly weak movement this week

**Peas:**
**Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart**

**Outlook** –Downward correction may be seen in pea market as chana may move down again and pressurize pea market. If chana trades weak .it may drag down peas price too..

**Technical Analysis:**

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700-5000 in this week

**Strategy:** **Sell on rise**

**Trade Recommendations:** Go short around 4950 with the first target of 4800 and second target 4700 with stop loss at 5050 level.

Support & Resistance
