**Commodity-wise Domestic, International Prices and Arrivals at Different Centers**

**Highlights-Domestic Market:**

- Pulses procurement under price support scheme in rabi season 2020-21 is under way** In states like Karnataka, Andhra Pradesh, Telangana, Rajasthan, MH, Uttar Pradesh and Haryana. Nafed and FCI have collectively procured 1.33 lakh MT pulses till the first fortnight of April-2020. Toor procurement is underway in the States of Maharashtra, Tamil Nadu, Gujarat, Andhra Pradesh and Karnataka and Telangana. Total 5.32 lakh MT has been procured so far against set target of 5.45 lakh MT. During lockdown period 29,000 MT has been procured. Masur and gram procurement would begin soon in MP while in Kota region of Rajasthan it would begin from first week of May.
- Global pulses market is getting firmer due to higher demand expected in May when lockdown** in various countries is expected to be relaxed. Myanmar is offering urad FAQ at \$780 while SQ at \$880 per MT basis Indian ports. New lemon tur is being offered at \$650, old at \$590 & likely at \$585 per MT. Moong is being offered at \$950 for pokago, \$940 for anni seva and \$1050 for pedi basis Indian ports. Chana is offered at \$650. Moong moga is being offered at \$1290 at Indian ports.
- Lockdown has been extended till 3rd May-2020. However, some relaxation might be given to farmers/traders and transportation.** Supply chain is likely to be disrupted for next two-three weeks and it would drive pulses price up in coming days. As maximum markets are not open, prices reflected in some markets don't represent the actual price. Actual price might be seen when lockdown is completely relaxed.
- Lockdown due to COVID-19 from last week of March and further extension till 3rd May-2020 have disrupted normal course of trading.** Disturbed supply chain, improved demand due to fear of longer duration lockdown have given much needed support to tur cash market. Ongoing procurement drive too remains supportive. Stock from old crop is nearing to an end now. Mills are expected to be active once again as demand in physical market have improved while raw stock with mills is decreasing fast. Farmers are selling good quality tur on MSP to govt.'s agencies. Under prevailing condition cash market is expected to improve continuously in April/May. Right now it is being traded at Rs 5300-5400 per qtl in Gulbarga market. It may move towards MSP level until lockdown is fully relaxed.
- The DGFT increased urad import quota from 1.5 lakh MT to 4 lakh MT and timeline for import has been extended from 31st March to 30th April-2020.** Now due to lockdown millers have demanded to extend timeline for application and import till 15th of May. So supply side would increase in April and May. Sudden change in import timeline and likely extension have weighed on market fundamentals and the impact was reflected on price. New arrivals from AP and Tamil Nadu and higher import flow from Myanmar in April-May would continue to cap uptrend in urad cash market. However, it can confidently be maintained that prices would continue to rule above MSP in April/May.
- Lockdown due to COVID-19 and 2nd time extension till 3rd May-2020 disrupted supply chain in the market and millers did not get raw pulses at regular interval.** Decreased processed stock, higher demand from consuming markets drove moong price up in last week of March. It continued to move up till mid-April. However, it could not sustain at higher level as govt. announced 1kg pulses per family/per month for every card holders free of cost till next three months. It pressurized moong cash market and down trend may continue in April/May too. Overall trend in moong market seems weak.
- Chana cash markets start trading up and may improve further with opening of markets with slower pace.** Supply side remained restricted due to lockdown and now when markets start opening, buyers seem active in various markets. There is good demand in market and it may continue until complete lockdown is relaxed. Almost all pulses markets have improved. Chana in Delhi market traded at Rs 4200-4350 amid 30-35 motors arrival. Farmers have harvested 70 to 80% Chana crop throughout India and the rest is likely to be harvested in next 10 days. It would take at least 15 days to normalized common trade practice. If procurement drive is increased with opening of markets, prices of chana may improve, otherwise decrease.
- Procurement of masur in MP is likely to start from 1st week of May. As prices are ruling higher,** agencies would not get desired quantity. All India procurement target has been fixed at 1,21,000 MT. MSP for masur is Rs 4800 while prices are ruling over 5200-5400. Import vessels are due. So, some downward movement is expected in May.

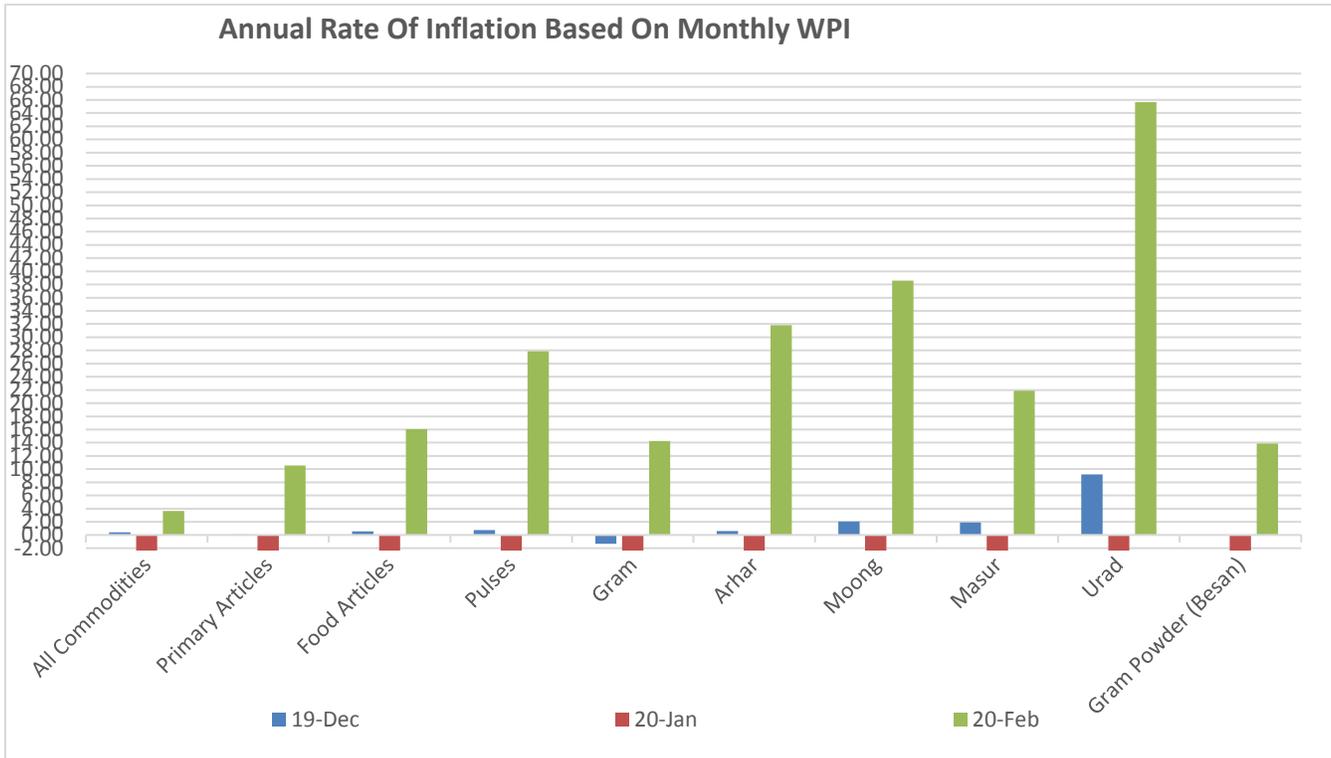

**Outlook for the week:** Cash pulses market may trade firm due to lock down.

**International Market Update:**

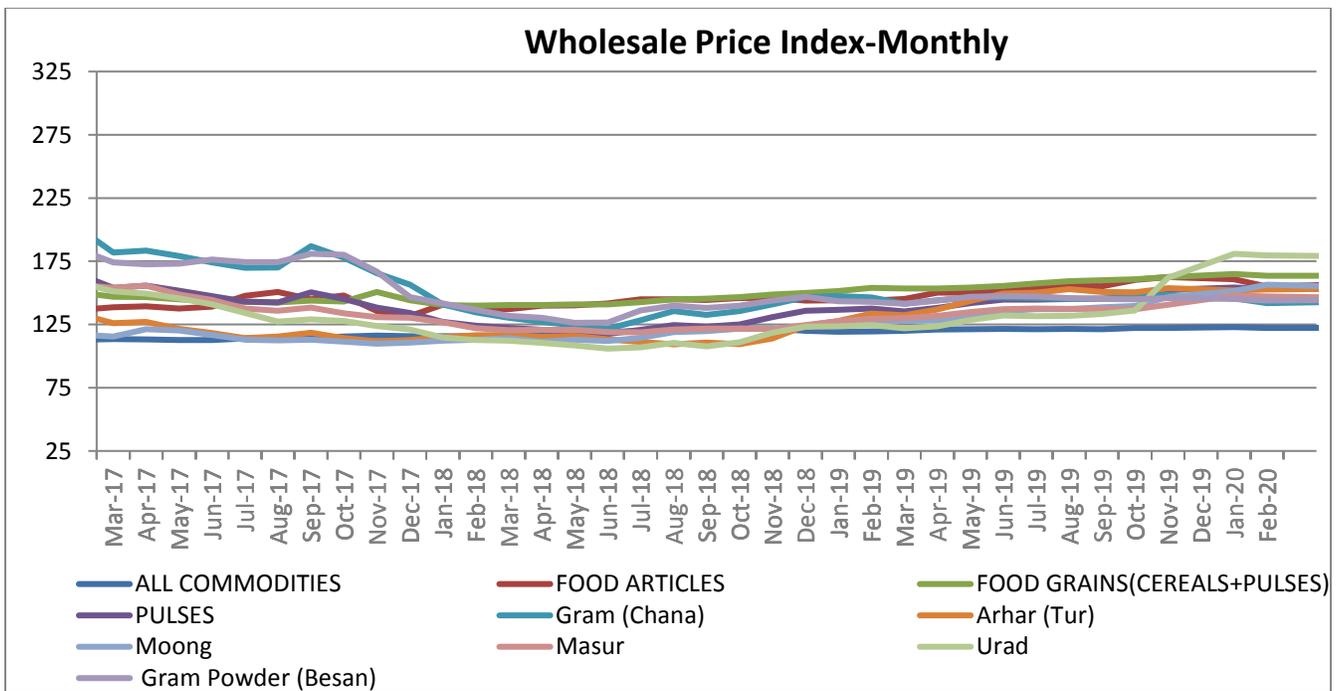

- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions.** Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **As per latest update by NASS lentil area may be down by 2-3% this year in US. Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019.** Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41% .It is really a big surprise this year.**
- **Dry peas production in Canada is expected to increase by 1.34 % to 43 lakh MT in 2020-21.** Harvested area has been considered at 1720 thousand ha with likely yield at 2500 kg per ha. In 2019-20 production forecast was 42.43 lakh MT. Thus total supply is expected to increase from 46.19 to 47.85 lakh MT in 2020-21. Despite higher production estimate export figure has been decreased from 35 to 33 lakh MT in 2020-21. However domestic use would increase from 6.94 to 8.60 lakh MT. Carryout too would increase from 4.24 to 6.25 lakh MT this year. Stock to use ratio would increase from 10 to 15 % ,while average price might be rule in the range of \$ 245-275 per MT as per Agriculture and agri food Canada.
- **Dry peas area in Canada is likely to be same in Canada as was seen in 2019-20. It may be 1.75 million ha. in 2020-21.** The reason behind it is likely good returns and better export demand. Dry peas production may touch at 43 lakh MT. Supply is expected to rise marginally due to higher carry-in stocks. Exports are expected to be lower than the current crop year and carry-out stocks are expected to rise. The average price in 2020-21 is expected to be unchanged (\$245-275) from the previous year.
- **Lentils production in Canada is likely to increase by 1.43 % to 22 lakh MT in 2020-21 as per the latest update by agriculture & agri food Canada.** Here harvested area has been considered at 15 lakh ha ,slightly higher than last year (14.89 lakh ha). Yield has been considered slightly up from 1460 to 1470 kg per ha. Production has been pegged at 22 lakh MT in 2020-21. It was 21.67 in 2019-20. Total supply would decrease slightly from 28.78 to 26 lakh MT in 2020 - 21. Even domestic use would decrease from 4.28 to 3.25 lakh MT. Carryout would decline from 3.5 to 2.75 lakh MT Percentage stock to use ratio would decline from 14 to 12 %. Average price might be rule in the range of 4.40 to 4.70 lakh MT in 2020-21
- **Chickpeas production in Canada is likely to decrease from 2.52 lakh MT to 2.0 lakh MT in 2020-21.** Area is expected to decrease from 156 to 117 thousand ha. Export may increase slightly from 1.3 to 1.35 lakh MT in 2020-21. Prices may hinge in the range of \$465-485/per MT.
- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019.** In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.
- **Chickpeas production in Canada in 2019-20 has been pegged at 2.52 lakh MT .It would decrease to 2 lakh MT in 2020-21.** Average price is expected to hover in the range of 455-485 per MT during 2020-21. Import too would decline from 53 to 50 thousand MT in 2020-21.
- **Area coverage under chickpeas in Australia in 2019-20 is expected to decline by 15% to 1.7 lakh ha.** Production has been pegged at 1.7 lakh MT this year, down by 11 % from last year. Decrease in area and production is mainly attributed to lower demand from India and weak price in global market. Slight increase in yield has been seen as mostly chickpeas are grown in central Queensland, where weather condition improved in comparison to last year.

**Weekly Outlook:** -Pulses are likely to trade steady to slightly weak.

**Pulses WPI Index:**

*Index Numbers of Wholesale Price in India (Base: 2011-12=100)*

*Pulses WPI decreased by 0.9 points from 154.1 in Dec to 153.2 in Feb-202*

**Note: Due to closure of markets charts remains un-updated. Lock down has been extended u to 3<sup>rd</sup> May with some conditional relaxation.**

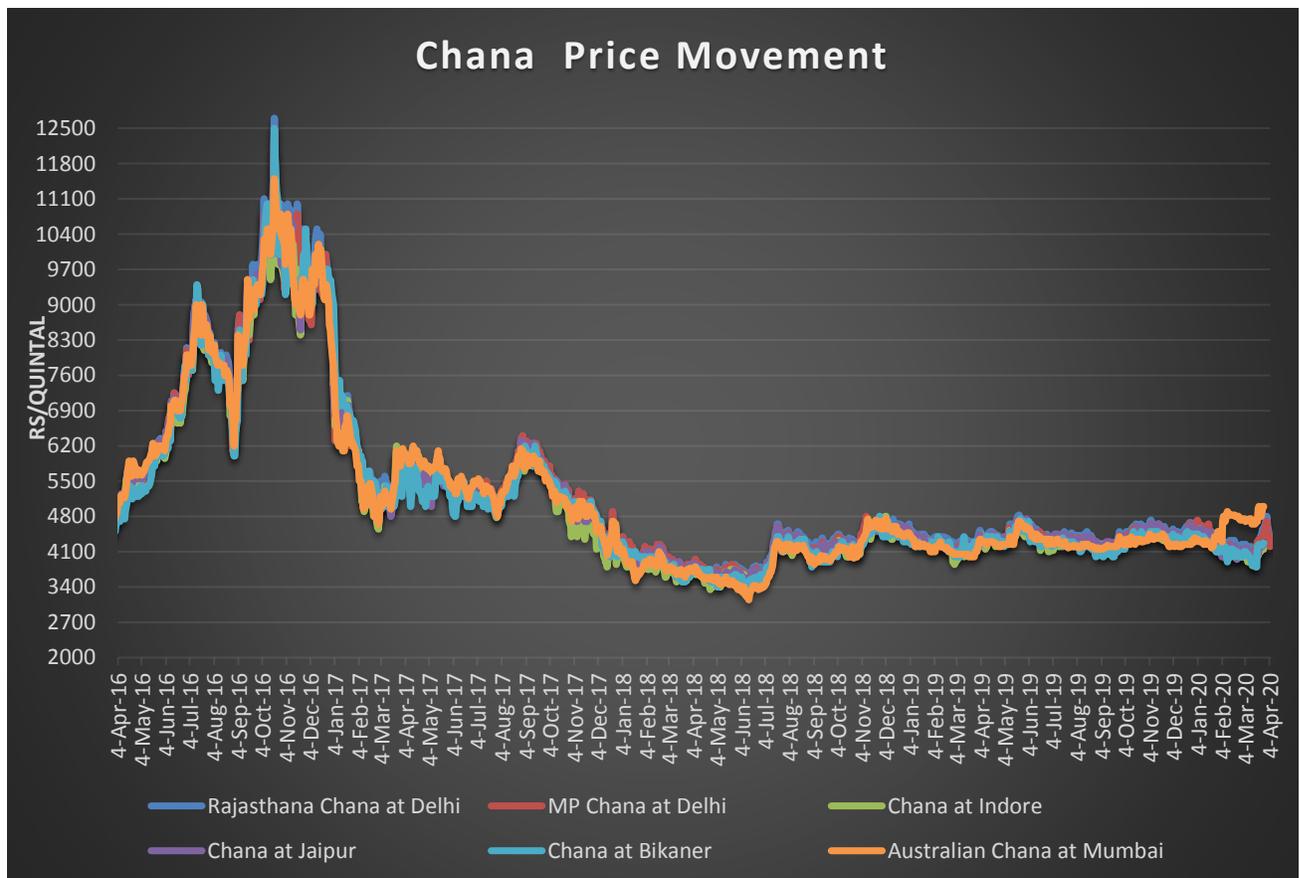

**Pulses-Wise Scenario:**

**Chana**

**Current Scenario:**

Trading activities remains halted due to Covid-19 and normal trading activities are expected not before mid April-2020 if lock down period is relaxed..Harvesting got disturbed due to recent rains and is likely to get momentum with opening of weather once again in Andhra Pradesh, Madhya Pradesh and Gujrata and is likely to start in Maharashtra and Rajasthan soon. Procurement target for MP and MH is yet to be fixed.In other states 9.25 lakhMT chana would be procured this year. Some losses have been reported in MP,Raj and UP.As area of chana crop is around 107.5 lakh ha this year, production may exceed to 101 lakhMT. Recent minor loss may be compensated by higher yield in other states. Supply pressure would increase now and it may pressurize chana price further..Market has started reflecting the pressure.Govt has yet to decide procurement quantity for MP and MH..Emerging condition hints chana to rule steady to slightly firm from current level.. There is plenty of old stock left and new one has started hitting the market..Even Nafed has started selling old chana at Rs 3800-3900. It would continue to pressurize cash market in the short to medium term. Nafed still has 15 lakh MT old chana in its stock.

All India average price for Chana increased by 5.43 percent from Rs 4298 to 4532 per qtl.during review week. Even Australian Chana (imported) price increased to Rs 4950 per 100kg due to halted harvesting activities. in domestic market. Following graph illustrates the chana price movement in different markets:

**Market Outlook:** Pressure might be seen in chana cash market this week too due to slower pace of procurement and restricted demand amid commencement of new arrival. Futures remain un-supportive.Nafed has started selling old

stock near market price and it is affecting market sentiments. Distribution of 1 k.g. dal per family/per ration card would affect direct demand from cash market.

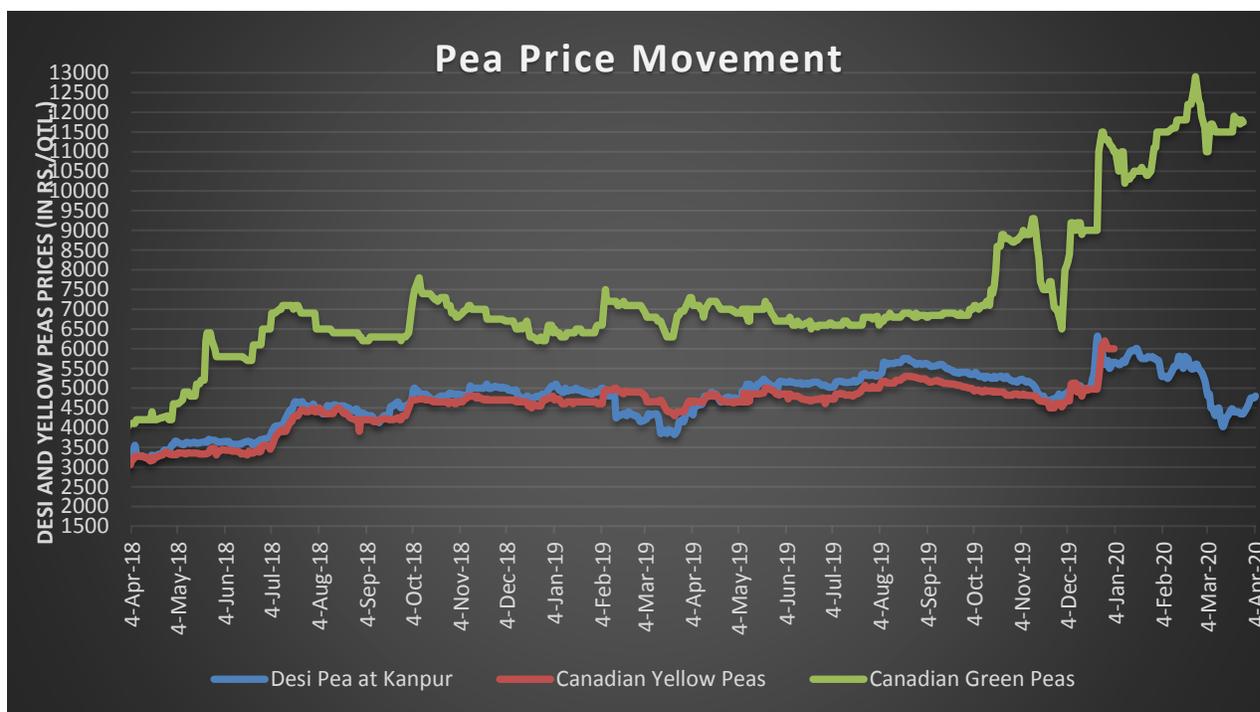

**Note: Charts have not been updated due to unavailability of price due to lockdown**

**Peas (Matar):**

**Market Recap:**

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. However, in some markets it traded up due to supply disturbance. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and kaspas) and changed its status in the third week of Dec. It has affected importers badly. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl. Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

Pea in Kanpur market traded firm at Rs.4700-4800 due to halted arrival in domestic market. Stockiest too are unwilling to release old stock despite bumper chana production prospects. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Green peas have started hitting the local market but in limited quantity. As supply side is tight, it would continue to trade up.

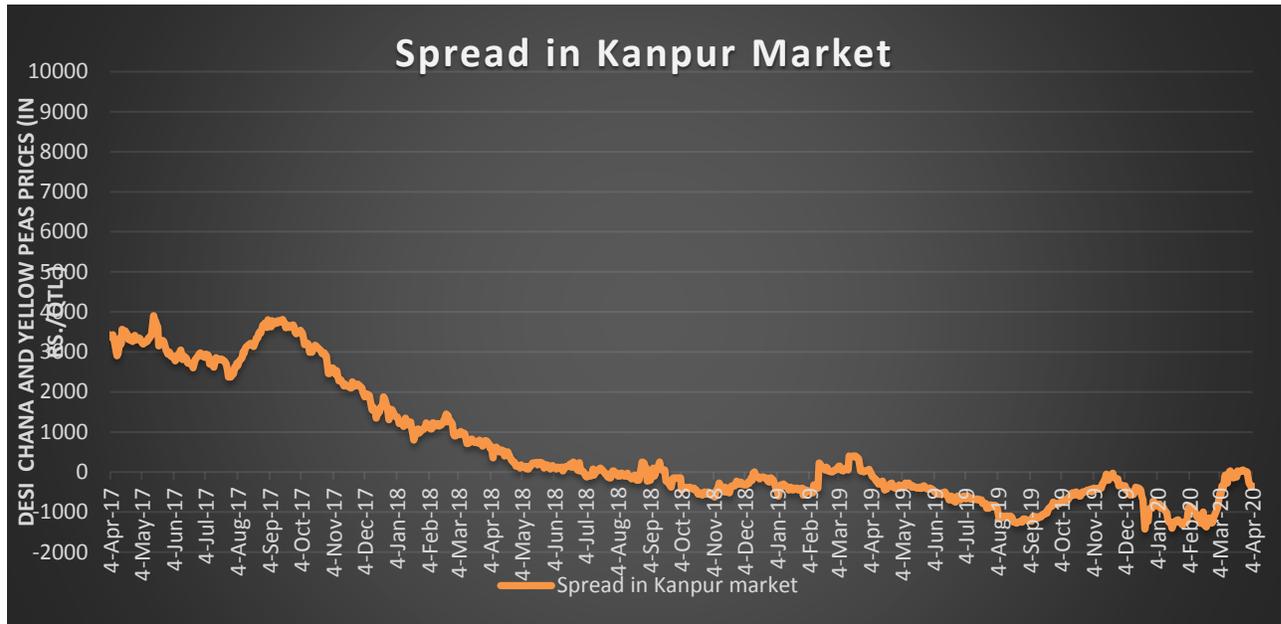

**Current Market Dynamics & Outlook:**

Peas market traded slightly firm due to halted pace of arrival in domestic market and restricted selling by stockists. Kanpur market traded firm at Rs 4700-4800 per qtl. New local crop has started hitting the market. So any major spike is unlikely in April. Overall, all India average price was up by 1.5% to Rs 4700-4750 per qtl in the first week of April. In Mumbai market, there was no quote for yellow peas as stock was exhausted.

**Spread With Chana:**

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 250 due to decreased chana price and peas price too. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

**MarketOutlook:** Outlook remains steady to slightly firm in the short term.

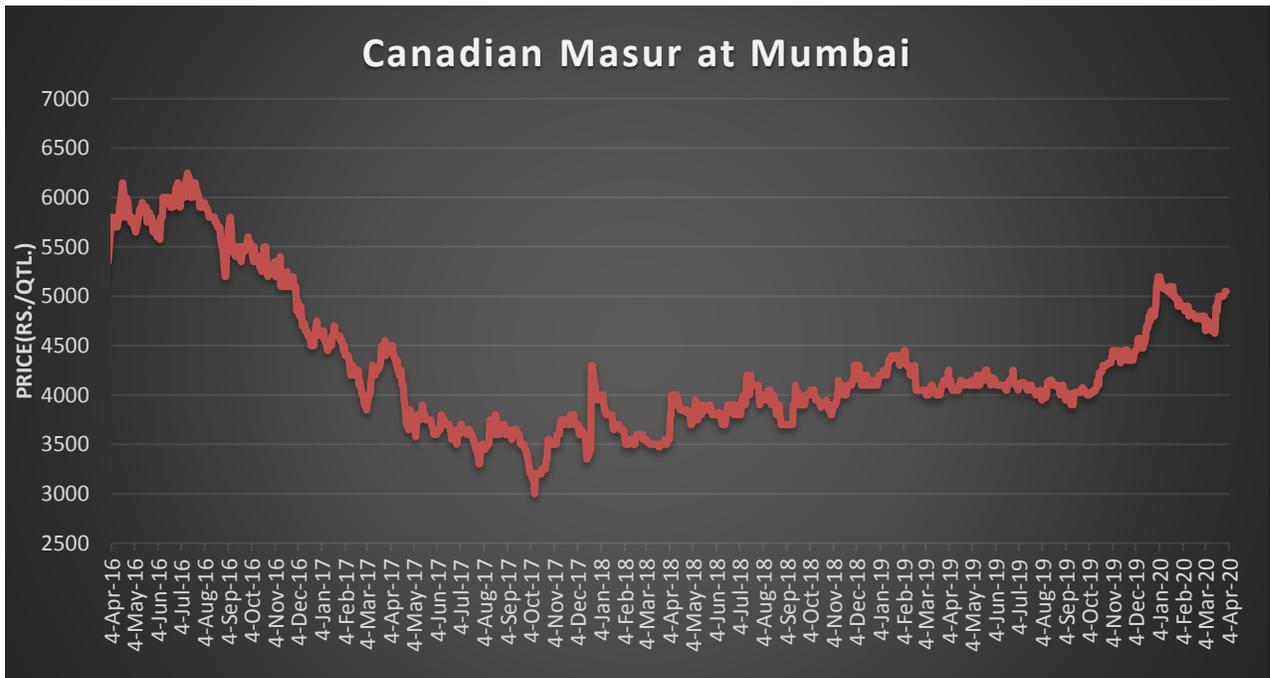

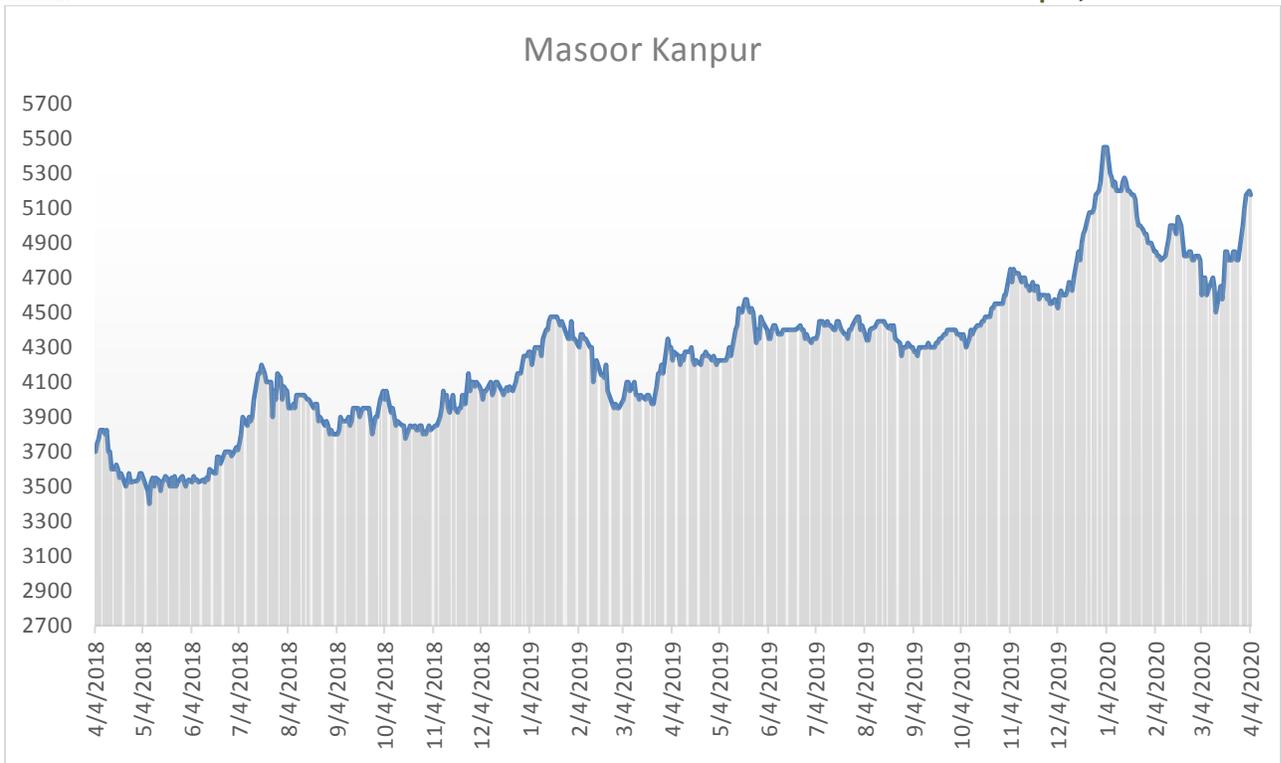

**Lentils (Masoor):**

**Market Recap:**

New arrival has started now and govt would procure 1.21 lakhMT on MSP from mid April..Indian farmers have covered 16.5 lakh ha this year. As supply remains disrupted prices are moving up. However a correction is expeted now..It was lower by 4.01% from last year. Even late shown crop is now attaining maturity and harvesting is expected to commence in the second week of March. .Recent rains in growing regions like Uttar Pradesh,MP,Bihar and West Bengal have benefitted standing crop and crop condition is good so far.However,in some fields of west Bengal. Insects like stem cutters have been seen affecting the crop.Now it has been contained successfully..In other regions crop condition is good to cxcellent.Yield is expected to be better from last year.Weather condition in the rest of March is very crucial for the final size of the crop.In normal condition production is likely to exceed 13.5 lakh MT in 2019-20,to be marketed in 2020-21.Pressure on price might be seen.

**Current Scenario:**

In the 1st week of April-2020, average price in key market of Kanpur was up by 6 % to Rs 4700-4750per qtl. Prices are likely to trade steady to slightly firm in the 1st week of April, due commencement of procurement. Even govt may start selling stock from central pool. New crop starts hitting the market.

**Market Outlook:** Prices are likely to stay steady to slightly firm due to good demand prospects. Improved demand from mills and restricted ofloading by stockiests too remains supportive to cash market. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm..

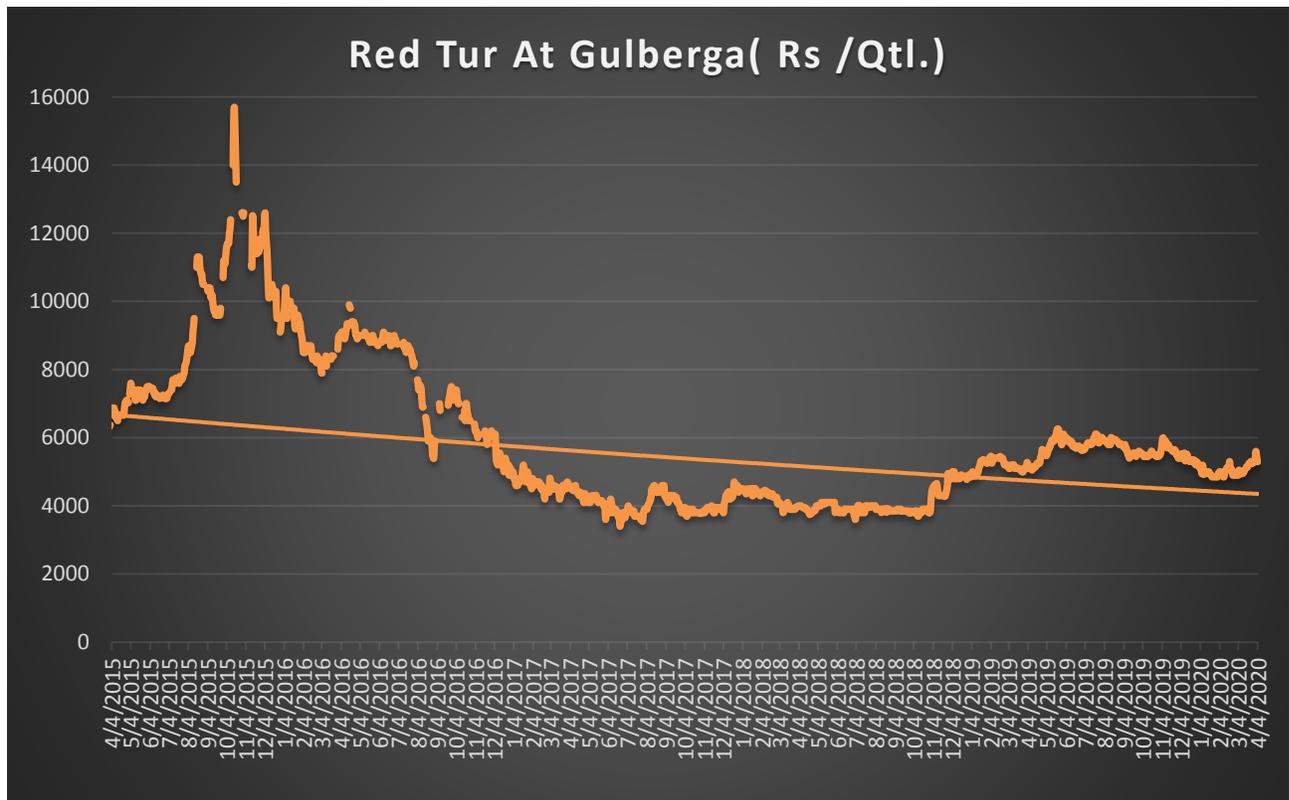

**Pigeon Pea (Tur/Toor):**

**Market Recap:**

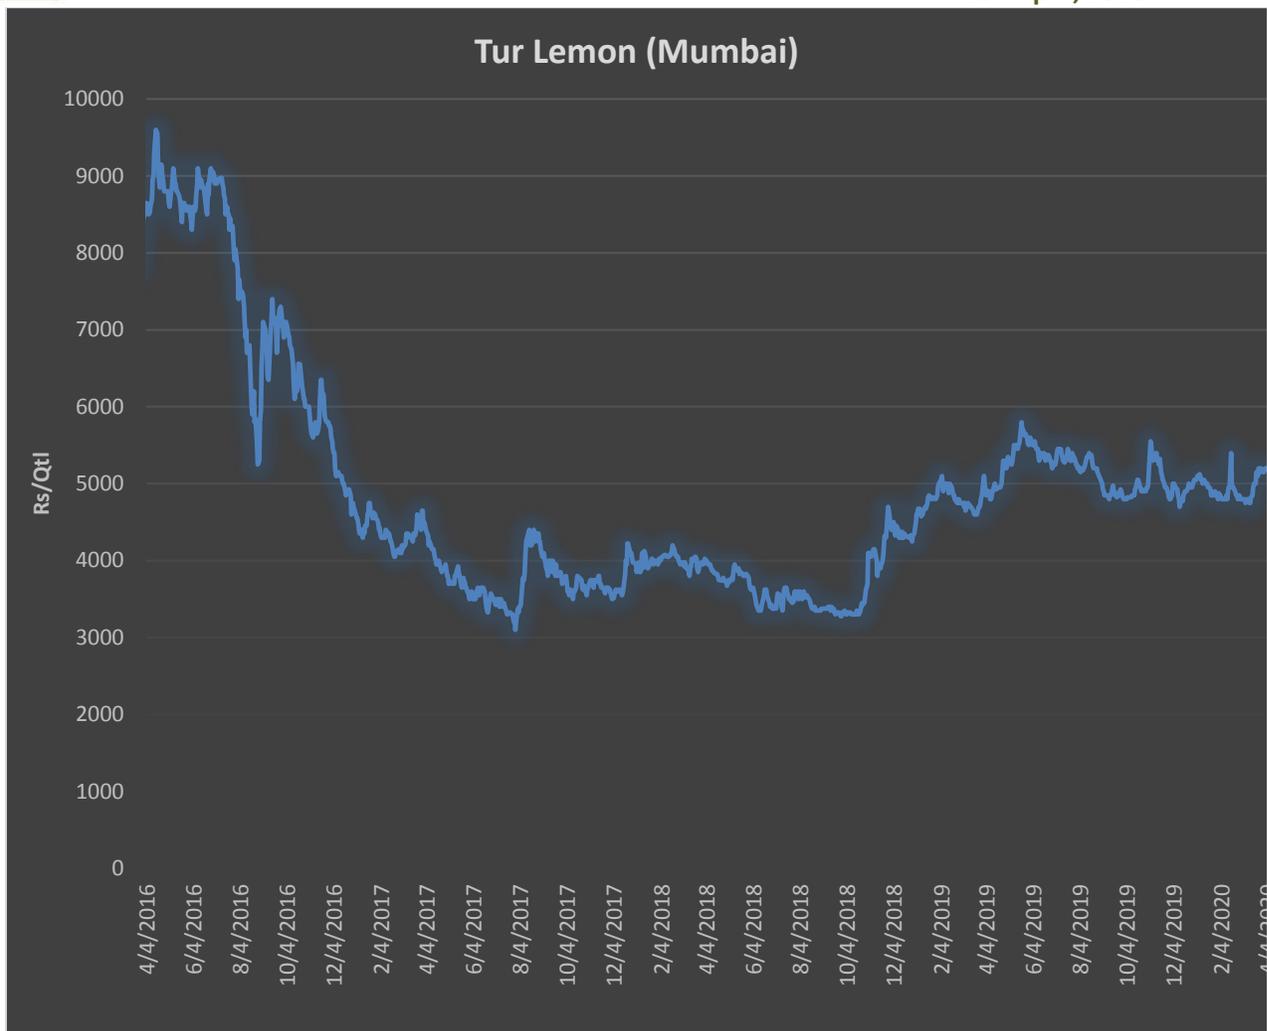

Despite lockdown ad limited movementtur may trade at Rs 5200-5500 in Gulberga market in coming weeks. Procurement drive is expected now in bulk volume after 15th of April,if lockdown time line is relaxed, it may push market up again. In state like Uttar Pradesh, Rajasthan, Bihar and Gujarat late shown crop condition is very good and recent rains have benefitted more than loss by recent rains for harvested crops in Karnataka and MH. Agriwatch is still strict with 37.19 lakh MT production estimate. If weather remains favourable, production size may improve to 37.5 to 38 lakh MT. Quality of new crop coming into market is good so far.

**Current Market Dynamics & Outlook:**

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up.Actually procurement target has been decreased this year due to lower kharif crop size,so that supply in open market continues. As ofnow around 3.70 lakhMT has been procured.Crop size may cross 37lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during current March. Steady to slightly firm movement may prevail.

**Market Outlook:**

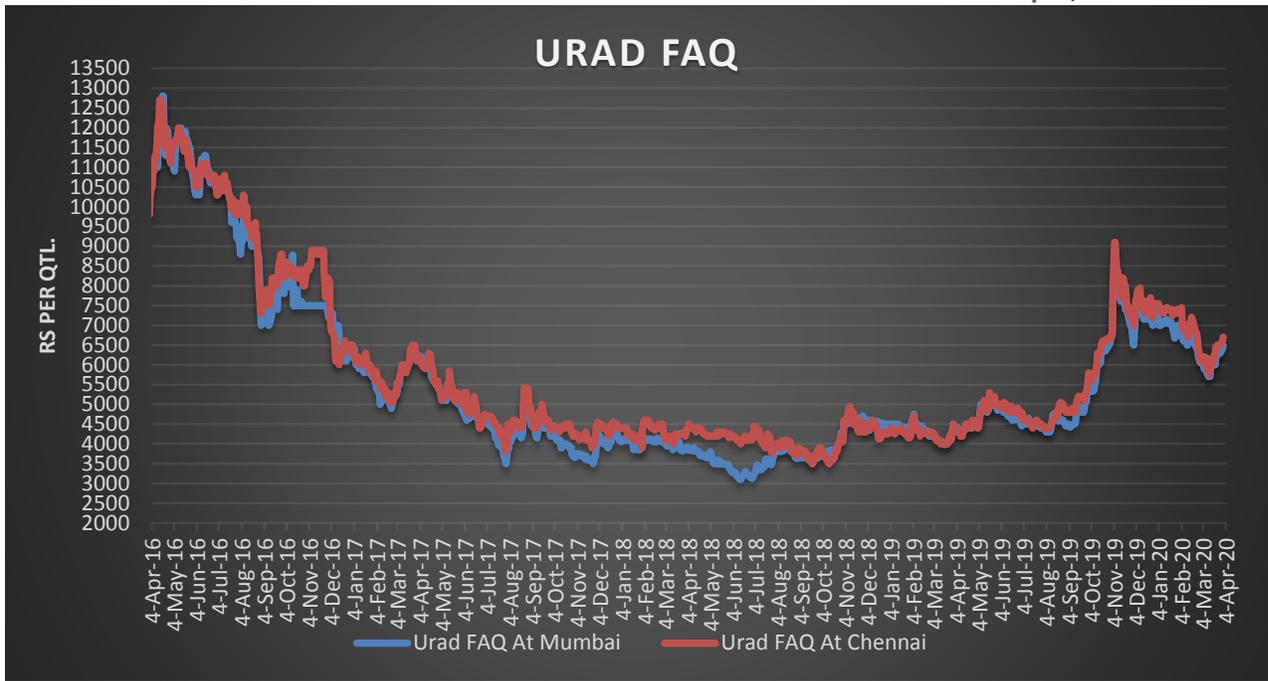

In the 1st week of April-2020, average price in Gulberga market was up by Rs 150 to Rs 5200-5400, due to higher pace of procurement from new crop and private buying. Apart from this weak demand too are supportive to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started increasing now. Moisture level is decreasing with good sunshine in producing region. It may move up by Rs 200 per qtl. from current level to Rs 5500.

**Black Matpe (Urad):**

Market sources say that urad stock in Myanmar is around 3.5 lakh MT. Out of this old stock is said to be around 50,000MT. Exporters in Myanmar are unwilling to sell urad at lower price as they are well aware of 4 lakh MT import quota approved by India for MY 2020-21. Vessels are expected by the third week of this month, coming from Myanmar via Singapore. As demand for India is higher than availability in Myanmar, price of urad is unlikely to decrease from current level. Under prevailing condition urad may trade steady to slightly firm.

**Current Market Dynamics & Outlook:**

Nafed has started intervening into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season.

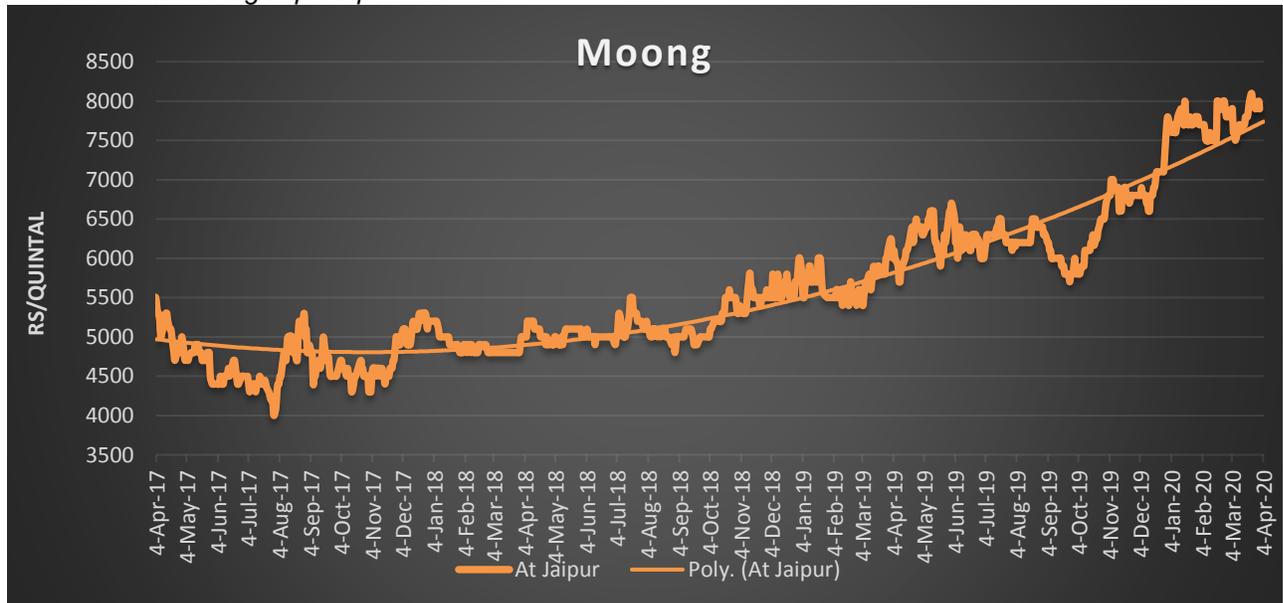

**Market Outlook:** Urad Prices are likely to show steady to firm momentum.

**Green Gram (Moong):**

**Market Recap:**

Moong cash market traded steady to slightly weak amid firm inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7650 and may decrease by Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

**Market Outlook:** Moong prices are likely to trade steady to slightly firm in the near term.

**Impot & Average Monthly CiF:**

| Pulses Import | Chickpea    |            | Tur         |            | Green Peas  |            | Lentil      |            |
