Commodity-wise Domestic, International Prices and Arrivals at Different Centers

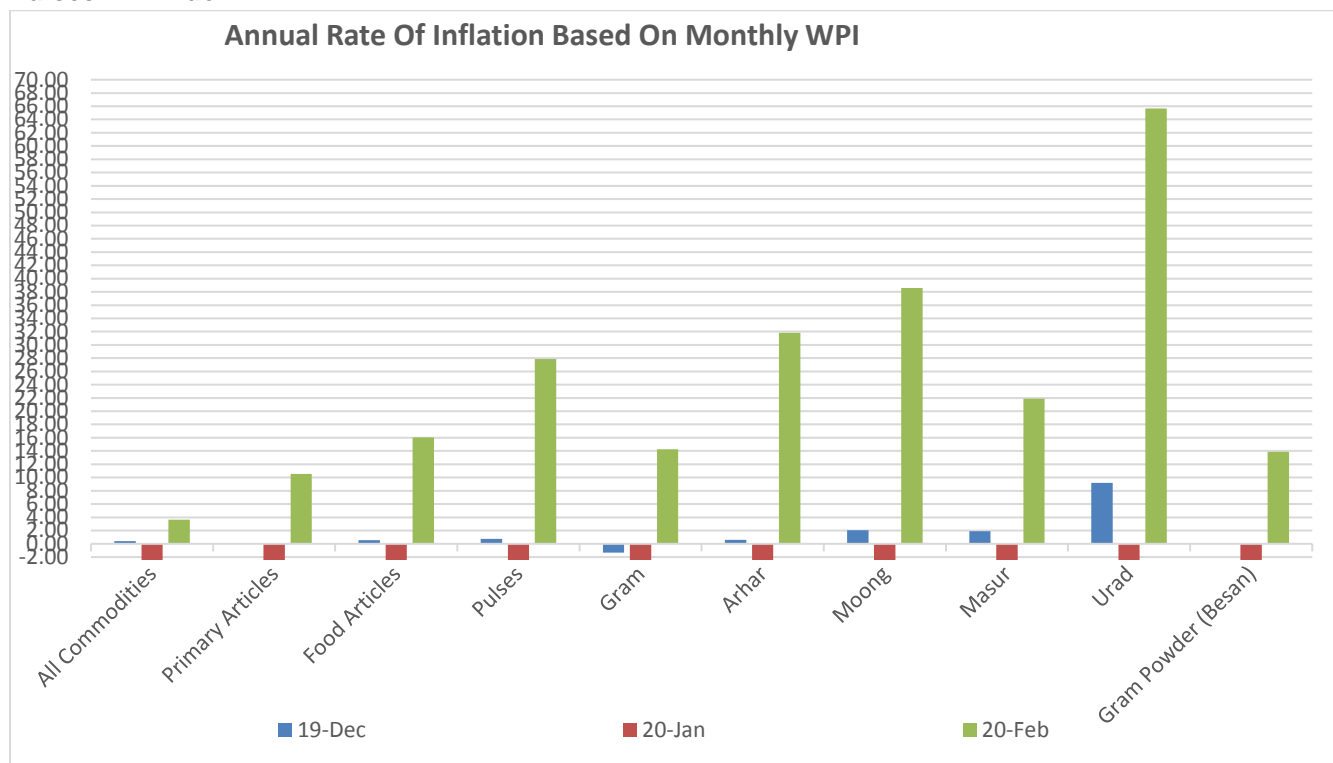

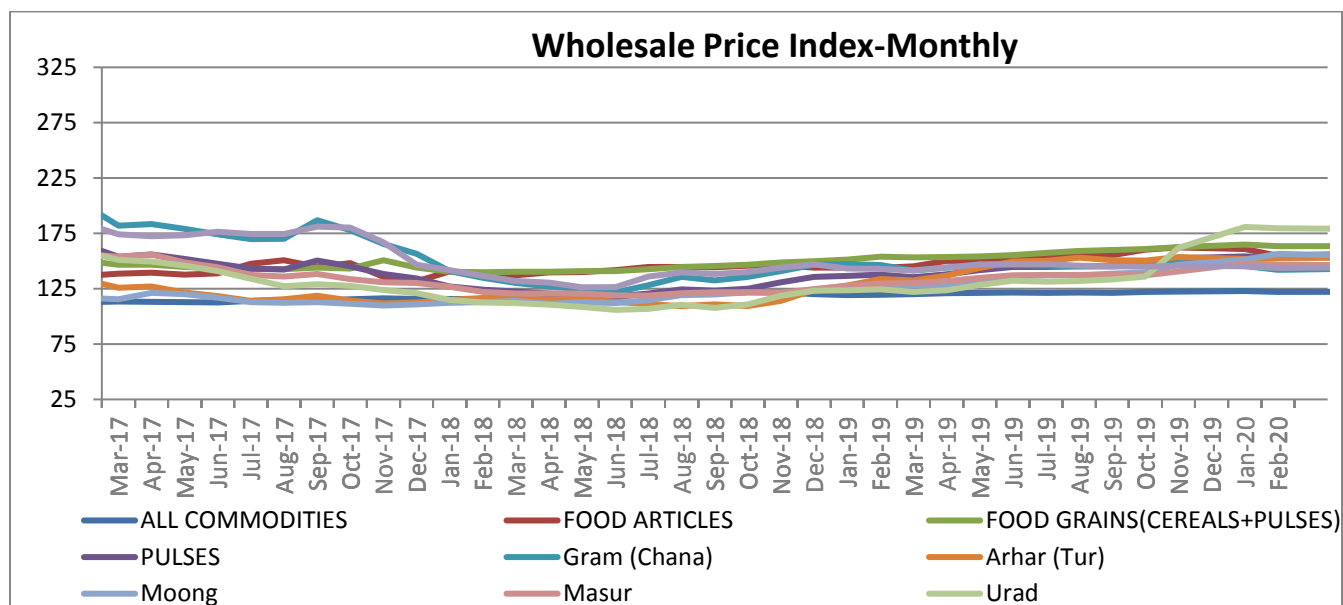

Highlights-Domestic Market:

- **Lock down due to COVID-19 from last week of March and further extension till 31st May-2020 have disrupted normal course of trading.** Disturbed supply chain, transportation and labour issues amid improved demand due to fear of longer duration lockdown have given much needed support to tur cash market. Even raw material supply to mills remains disturbed. Under prevailing condition any spike in tur cash market is unlikely as procurement process remains slow and free distribution of pulses (per ration card 1kg per month till June-2020) would continue to cap upward momentum in tur market in May-2020. Likely relaxation in stock movement would not help much as shortage of labour remains a major drawback for making supply smooth in May and June.
- **The DGFT increased urad import quota from 1.5 lakh MT to 4 lakh MT and timeline for import has been extended from 31st March to 30th April-2020.** Now considering the demand for millers the DGFT has extended the import timeline till 31st May. So supply is bound to increase in May too after April when 1.22 lakh MT urad was imported. Continuous extension in import timeline and higher volume of import have weighed on market fundamentals and the impact is being reflected on price once again. New arrivals from AP, UP and Tamil Nadu and likely higher import flow from Myanmar in May would continue to cap uptrend in urad cash market. However, it can confidently be maintained that prices would continue to rule above MSP in May.
- **Lockdown due to COVID-19 and continuous extension till 31st May-2020 continued to disrupt supply chain in the market and millers did not get raw pulses at regular interval in April.** However, situation seems changing in the second part of May with commencement of arrival of summer moong from M.P., Odisha and Bengal. The area under summer moong is higher this year and crop condition is excellent so far. Delay in dal processing, struck movement of transport due to labour problems and stocking tendency of consumers continued to drive moong price up during April too. It traded firm till mid-May. However, new arrival, lower offtake at higher level and free distribution of 1kg pulses per family/per month free of cost till June -2020 have capped uptrend and pressure seems on cash market now.
- **There is no respite for chana as prices are coming down with increasing supply pressure with limited buying at MSP in various growing states.** Lock down too have affected procurement activities negatively. Labour/transportation issues and decreasing private participation have pressurized chana price once again. Futures contracts are trading low while millers are buying based on their immediate needs. Besides, free distribution of dal too has affected demand from maximum no. of consumers and it would continue till June. Apart from this availability of mango is going to increase this year. So demand for dal is expected to be poor till June-July. So any major improvement in chana price is unlikely. Even buyer's buying capacity has decreased. So steady to weak tone may prevail in chana cash market. Chana is being traded at 4250-4300 in Delhi market. It may decrease further by Rs 100-150.
- **DES (Directorate of Economic Statistic) has released 3rd Adv. estimate of foodgrains on 15th May-2020.** It has projected slightly higher production for 2019-20. Total kharif and rabi pulses production has been pegged at 23.01 MMT against 22.08 MMT in 2018-19. Total pulses production target for 2019-20 was set at 26.30 MMT. It is almost 40 lakh MT lower than 2018-19. Tur production has been pegged at 3.75 against set target of 4.6 MMT and 3.32 MMT last year. In case of chana production has been pegged at 10.90 against 11.60 MMT set target and 9.94 MMT production last year. Total kharif and rabi production has been pegged at 8.05 and 14.97 MMT against target of 10.10 & 16.20 MMT.
- **Millers are facing shortage of masur as supply chain remains disrupted from producing regions.** Stock with mills too is decreasing. Loading of imported stock at ports is unexpectedly lower while availability of old stock is decreasing fast. All these fundamentals supported masur market and it traded at Rs 5500-5600 in various markets. At higher level stockiest resorted to offload some stock. So some downward correction was seen too. Under prevailing condition masur cash market may improve once again. As prices are ruling higher than MSP, so govt.s agencies would not be able to procure 1.21 lakh MT, set target for the year..
- **Outlook for the week:** Cash pulses market may continue to trade steady to weak due to extended period of lock down and weak demand..

International Market Update:

- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard.** Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **As per agri food Canada area seeded under lentils in Canada is expected to remain unchanged at 1.53 Mh,** due to higher expected returns relative to other crops. With higher yields, production is forecast to rise marginally to 2.2 Mt but supply is expected to decrease to 2.6 Mt due to a fall in carry-in stocks. Exports are forecast to be lower at 2.0 Mt. Carry-out stocks are expected to decrease which will be supportive for prices. The average price for all grades is forecast to rise from 2019-20. The USDA March Prospective Planting report showed that US area seeded to lentils is expected to decrease marginally from last year to 0.47 million acres. Area seeded is expected to fall in North Dakota but rise in Montana.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **As per latest update by NASS lentil area may be down by 2-3% this year in US.** Farmers may plant total 474,000 acres in crop year 2020, down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year.** Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.
- **As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019.** In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT.
- **As per latest report by The Canadian Grain Commission Canada has exported 1,382,600 MT peas in ongoing MY so far till Jan-2020.** It is up by 45% from last year till Jan 2019. In Jan alone, total 1,34,300 MT has been exported. Canada has exported 1,036,800 MT last year till January-2019.
- **As per latest update by Australia Bureau of Statistics Australia exported 76,395 metric tons (MT) lentils in Dec-2019.** It is up from 62,178 MT in Nov-2019. Total shipment in current MY reached at 138,573 MT, it is higher by 227 % from last season till Dec-2019. B, desh brought 31188 MT, India brought 17623 MT and Sri Lanka purchased 8,658 MT in Dec. Pace of Lentil import is likely to be up in Jan -2020 too, as shipment continues, despite new crop at hand in India.
- **Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21 is slightly higher at 43 lakh MT.** During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60 lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 0.9 points from 154.1 in Dec to 153.2 in Feb-202

Note: Due to closure of markets charts remains un-updated. Lock down has been extended from 3rd to 31st May with some conditional relaxation.

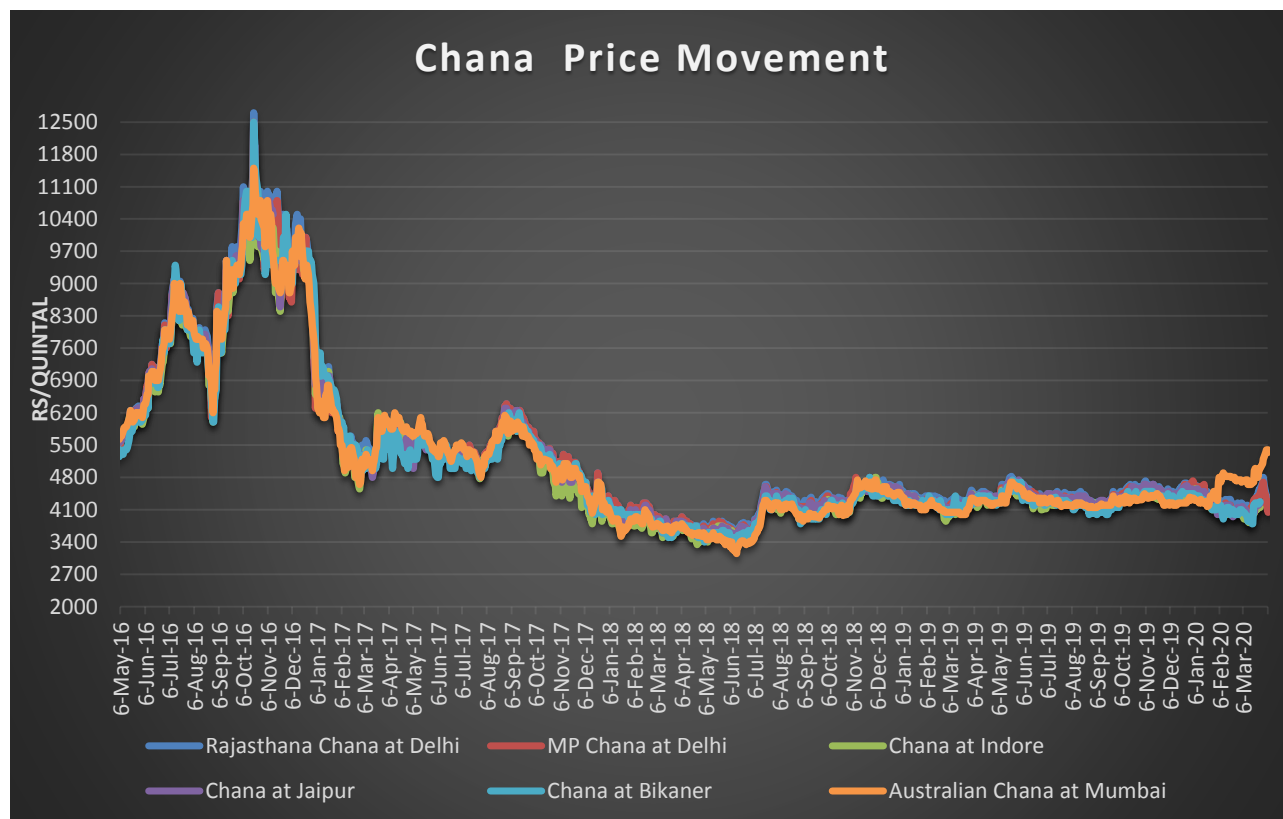

Pulses-Wise Scenario:

Chana

Current Scenario:

Trading activities remains halted due to Covid-19 and normal trading activities are expected not before mid April-2020 if lock down period is relaxed..Harvesting got disturbed due to recent rains and is likely to get momentum with opening of weather once again in Andhra Pradesh, Madhya Pradesh and Gujrata and is likely to start in Maharashtra and Rajasthan soon. Procurement target for MP and MH is yet to be fixed. In other states 9.25 lakh MT chana would be procured this year. Some losses have been reported in MP, Raj and UP. As area of chana crop is around 107.5 lakh ha this year, production may exceed to 101 lakh MT. Recent minor loss may be compensated by higher yield in other states. Supply pressure would increase now and it may pressurize chana price further..Market has started reflecting the pressure. Govt has yet to decide procurement quantity for MP and MH..Emerging condition hints chana to rule steady to slightly firm from current level..There is plenty of old stock left and new one has started hitting the market..Even Nafed has started selling old chana at Rs 3800-3900. It would continue to pressurize cash market in the short to medium term. Nafed still has 15 lakh MT old chana in its stock.

All India average price for Chana increased by 5.43 percent from Rs 4298 to 4532 per qtl. during review week. Even Australian Chana (imported) price increased to Rs 4950 per 100kg due to halted harvesting activities in domestic market. Following graph illustrates the chana price movement in different markets:

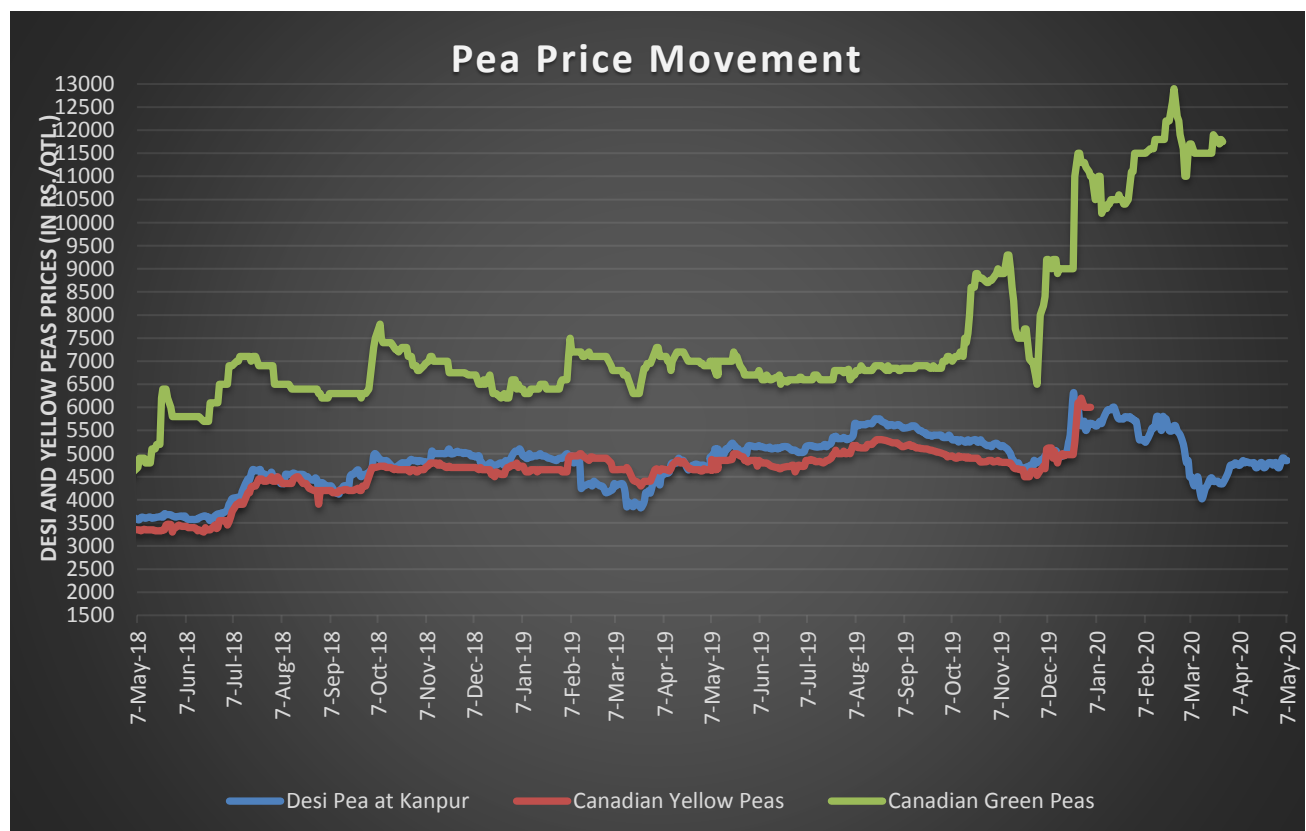

Market Outlook: Pressure might be seen in chana cash market this week too due to slower pace of procurement and restricted demand amid commencement of new arrival. Futures remain un-supportive. Nafed has started selling old stock near market price and it is affecting market sentiments. Distribution of 1 k.g. dal per family/per ration card would affect direct demand from cash market.

Note: Charts have not been updated due to unavailability of price due to lock down

Peas (Matar): Market Recap:

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. However, in some markets it traded up due to supply disturbance. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and kaspa) and changed its status in the third week of Dec. It has affected importers badly. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl. Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

Pea in Kanpur market traded firm at Rs.4700-4800 due to halted arrival in domestic market. Stockists too are unwilling to release old stock despite bumper chana production prospects. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Green peas have started hitting the local market but in limited quantity. As supply side is tight, it would continue to trade up.

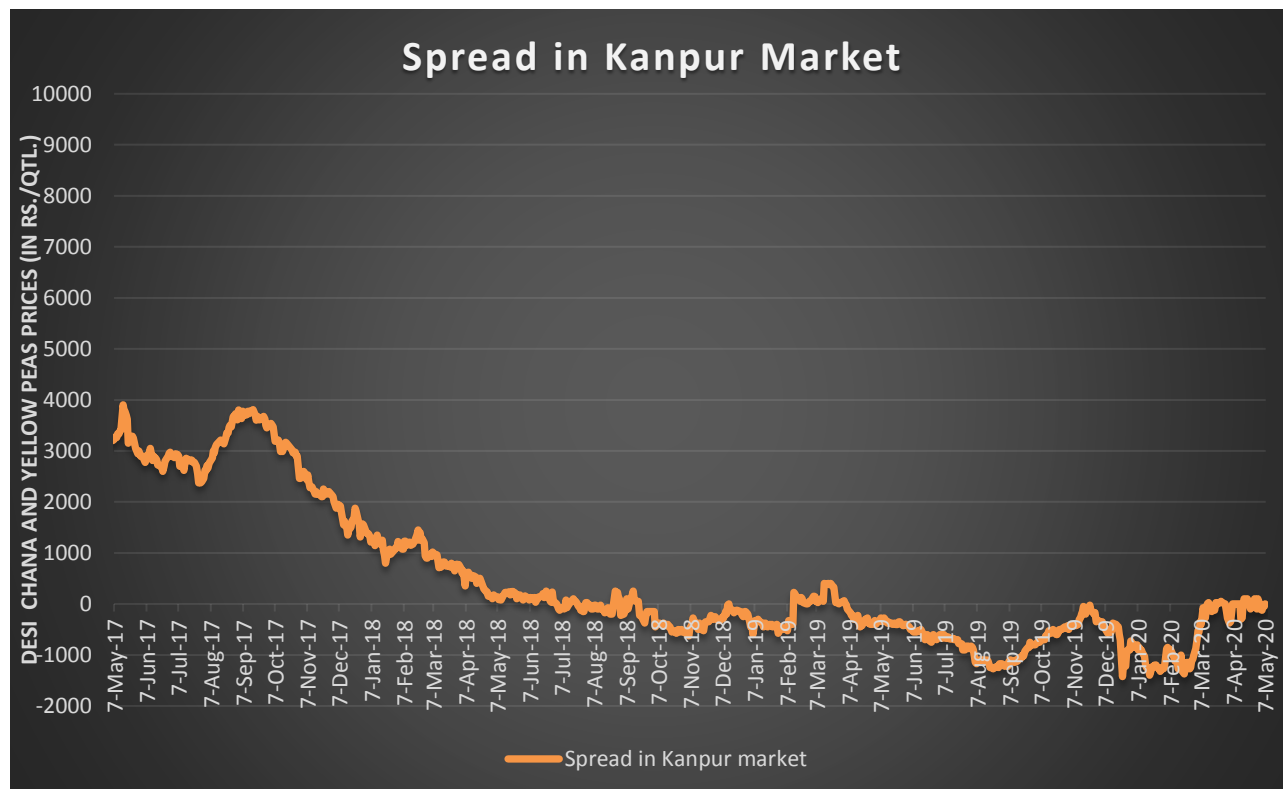

Current Market Dynamics & Outlook:

Peas market traded slightly firm due to halted pace of arrival in domestic market and restricted selling by stockists. Kanpur market traded firm at Rs 4700-4800 per qtl. New local crop has started hitting the market.

So any major spike is unlikely in April. Overall, all India average price was up by 1.5% to Rs 4700-4750 per qtl in the first week of April. In Mumbai market, there was no quote for yellow peas as stock was exhausted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 250 due to decreased chana price and peas price too. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

Market Outlook: Outlook remains steady to slightly firm in the short term.

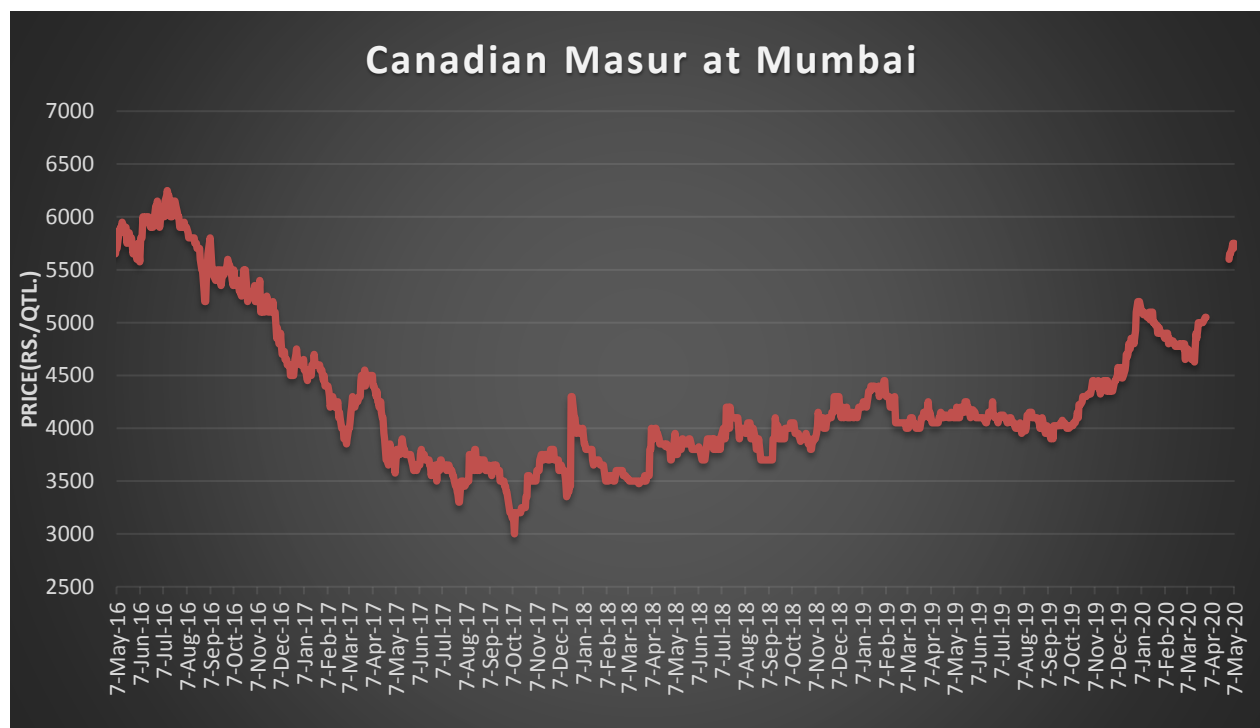

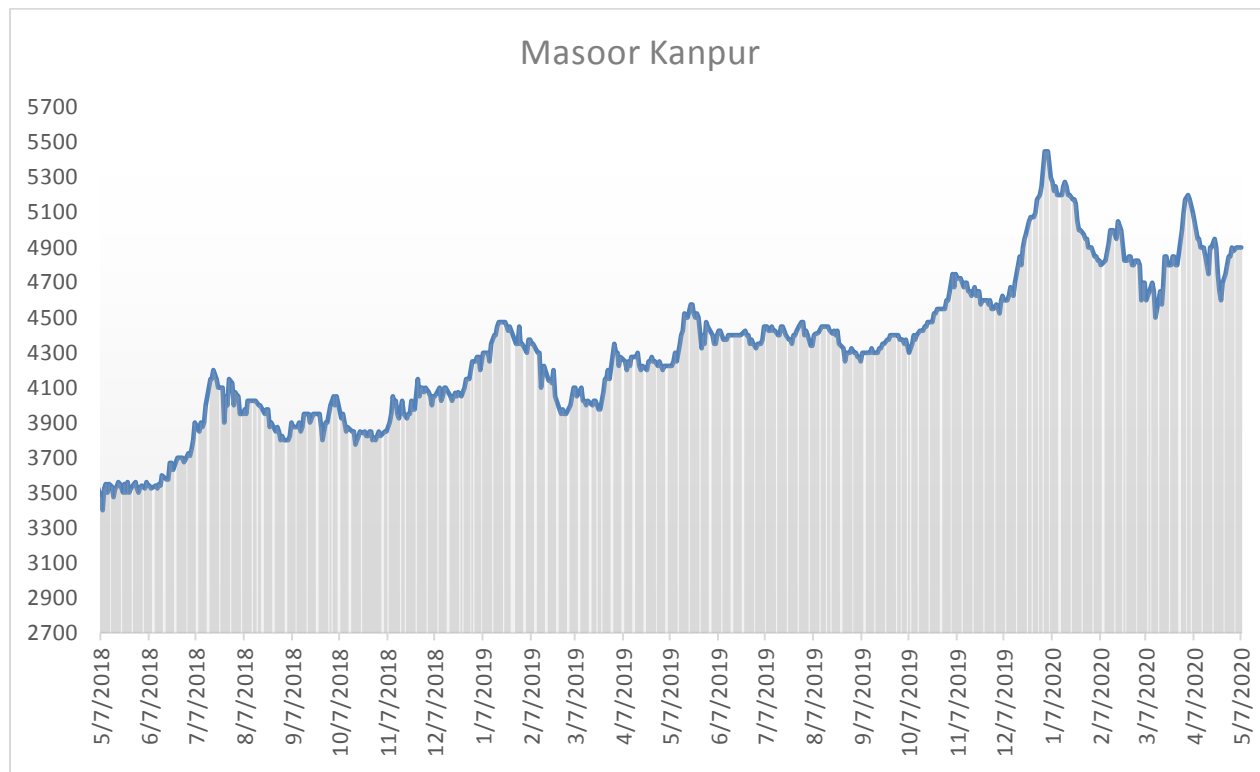

Lentils (Masoor):

Market Recap:

New arrival has started now and govt would procure 1.21 lakh MT on MSP from mid April. Indian farmers have covered 16.5 lakh ha this year. As supply remains disrupted prices are moving up. However a correction is expected now. It was lower by 4.01% from last year. Even late sown crop is now attaining maturity and harvesting is expected to commence in the second week of March. Recent rains in growing regions like Uttar Pradesh, MP, Bihar and West Bengal have benefitted standing crop and crop condition is good so far. However, in some fields of west Bengal. Insects like stem cutters have been seen affecting the crop. Now it has been contained successfully. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in the rest of March is very crucial for the final size of the crop. In normal condition production is likely to exceed 13.5 lakh MT in 2019-20, to be marketed in 2020-21. Pressure on price might be seen.

Current Scenario:

In the 1st week of April-2020, average price in key market of Kanpur was up by 6 % to Rs 4700-4750per qtl. Prices are likely to trade steady to slightly firm in the 1st week of April, due commencement of procurement. Even govt may start selling stock from central pool. New crop starts hitting the market.

Market Outlook: Prices are likely to stay steady to slightly firm due to good demand prospects. Improved demand from mills and restricted ofloading by stockiest too remains supportive to cash market. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm.

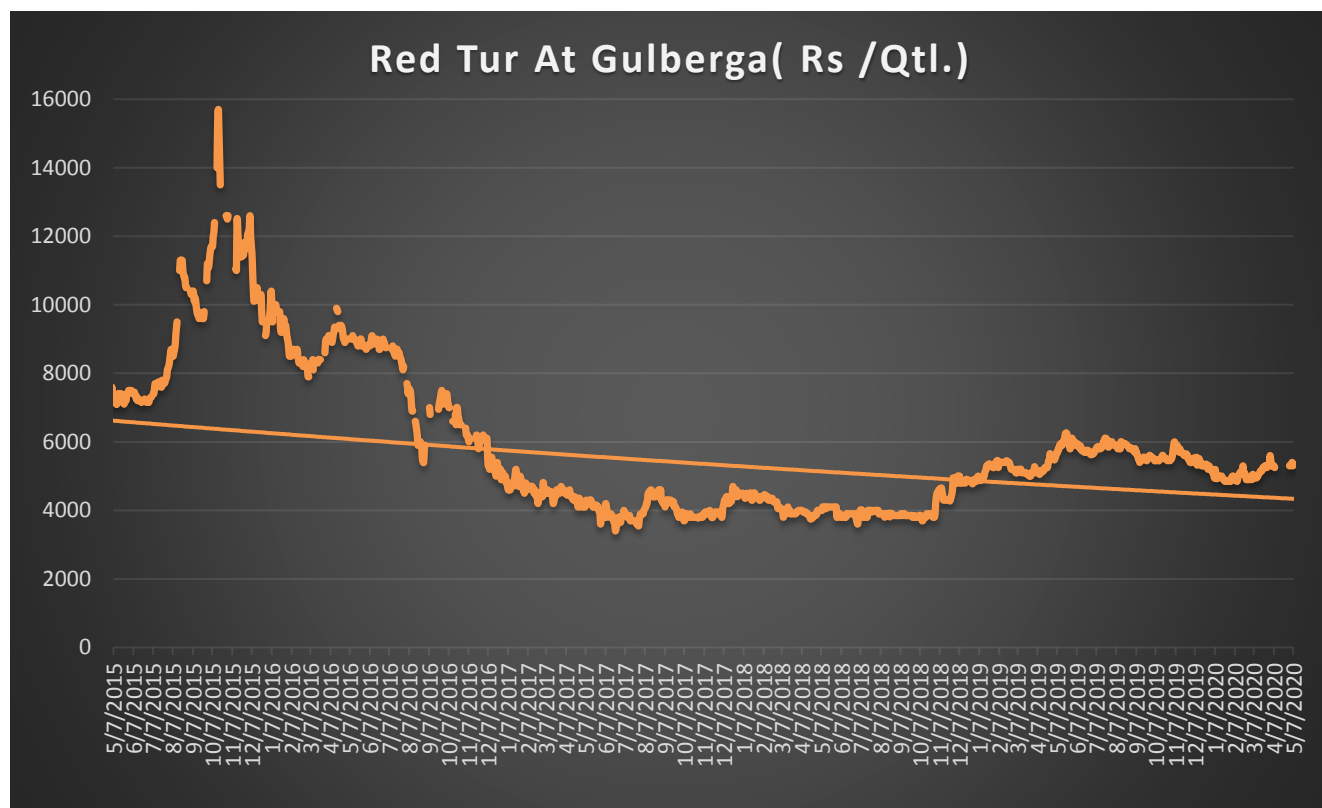

Pigeon Pea (Tur/Toor):

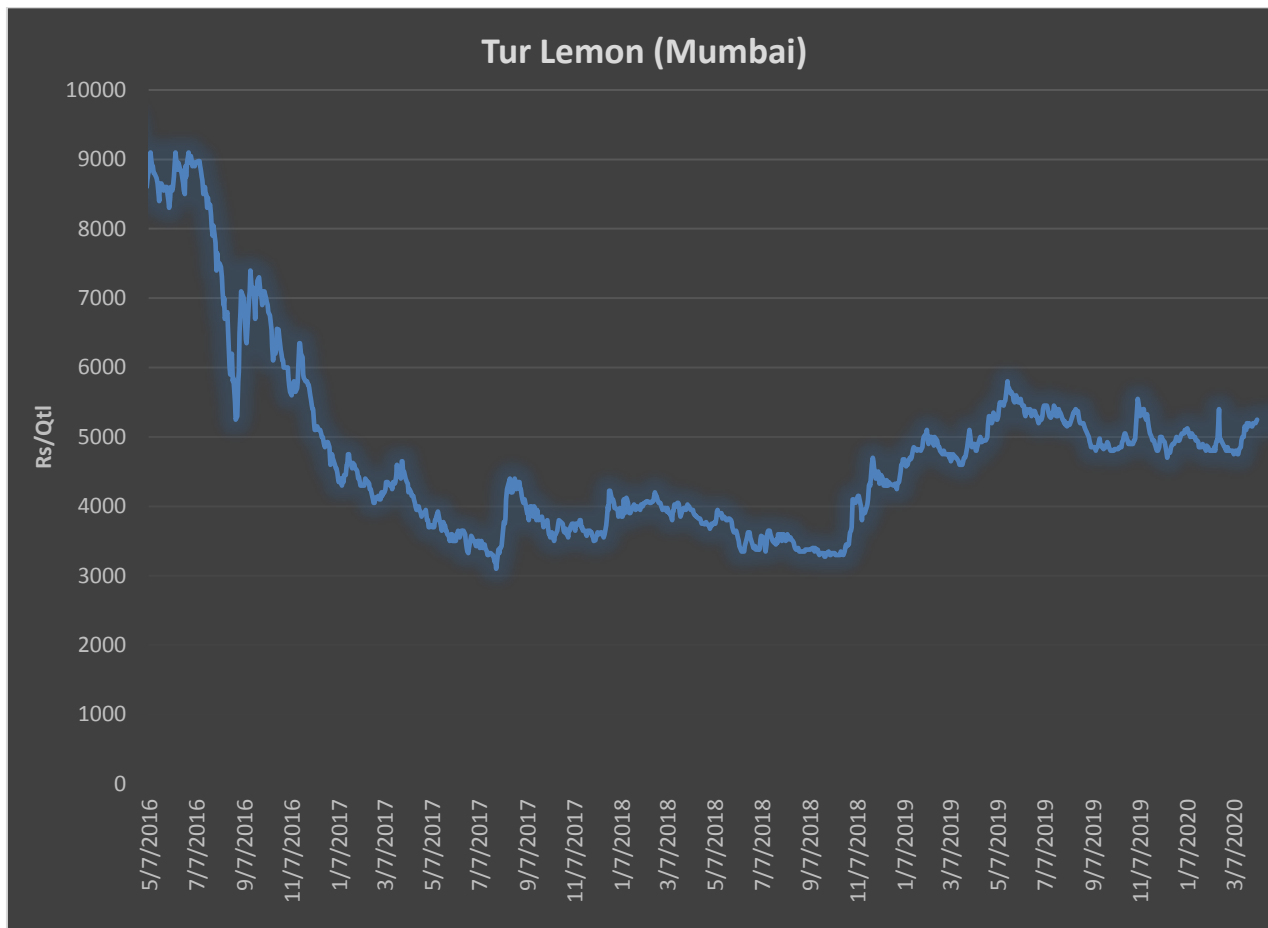

Market Recap:

Despite lockdown and limited movement tur may trade at Rs 5200-5500 in Gulbarga market in coming weeks. Procurement drive is expected now in bulk volume after 15th of April, if lockdown time line is relaxed, it may push market up again. In state like Uttar Pradesh, Rajasthan, Bihar and Gujarat late shown crop condition is very good and recent rains have benefitted more than loss by recent rains for harvested crops in Karnataka and MH. Agriwatch is still strict with 37.19 lakh MT production estimate. If weather remains favourable, production size may improve to 37.5 to 38 lakh MT. Quality of new crop coming into market is good so far.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. As of now around 3.70 lakh MT has been procured. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during current March. Steady to slightly firm movement may prevail.

Market Outlook:

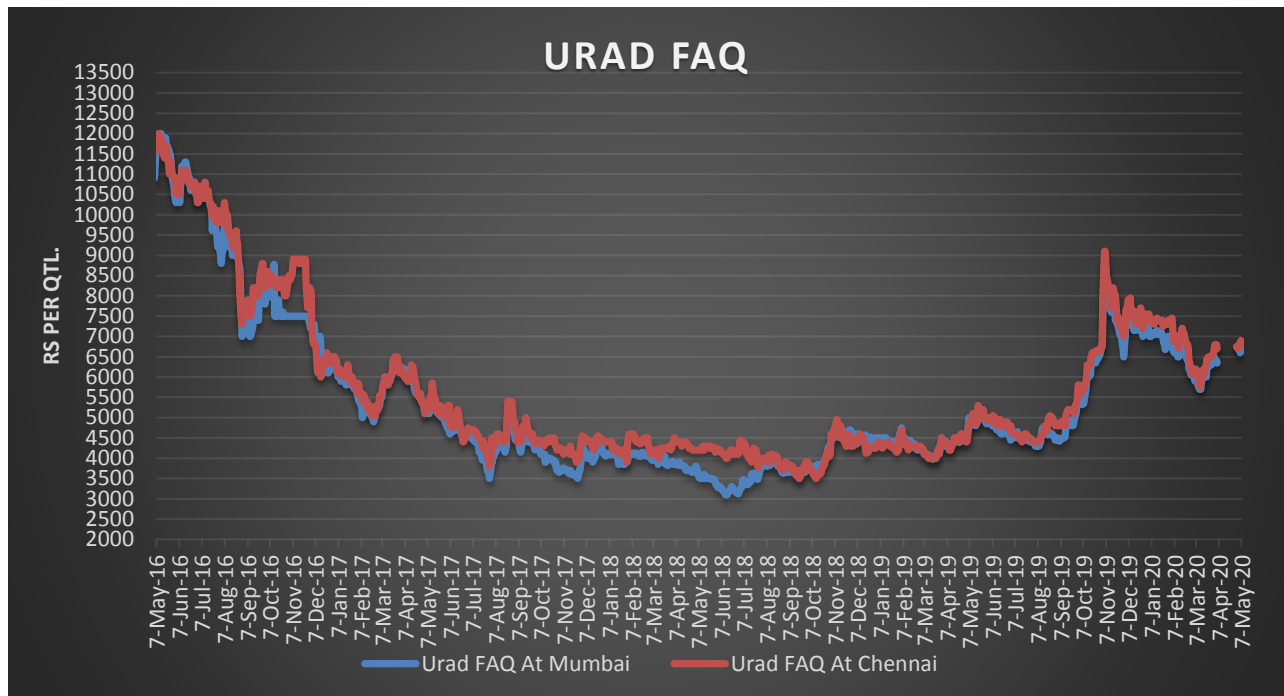

In the 2nd week of May-2020, average price in Gulberga market was up by Rs 150 to Rs 5200-5400, due to higher pace of procurement from new crop and private buying. Apart from this weak demand too are supportive to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started increasing now. Moisture level is decreasing with good sunshine in producing region. It may move up by Rs 200 per qtl. from current level to Rs 5500.

Black Matpe (Urad):

Market sources say that urad stock in Myanmar is around 3.5 lakh MT. Out of this old stock is said to be around 50,000 MT. Exporters in Myanmar are unwilling to sell urad at lower price as they are well aware of 4 lakh MT import quota approved by India for MY 2020-21. Vessels are expected by the third week of this month, coming from Myanmar via Singapore. As demand for India is higher than availability in Myanmar, price of urad is unlikely to decrease from current level. Under prevailing condition urad may trade steady to slightly firm.

Current Market Dynamics & Outlook:

Nafed has started intervening into the market with govt.'s consent as it has around 1.75 lakh MT old stock. It too may cap spike in the market. New Rabi crop would be available in March. Area under urad is expected to increase slightly in rabi season. However, it would be unable to compensate the loss seen in kharif season.

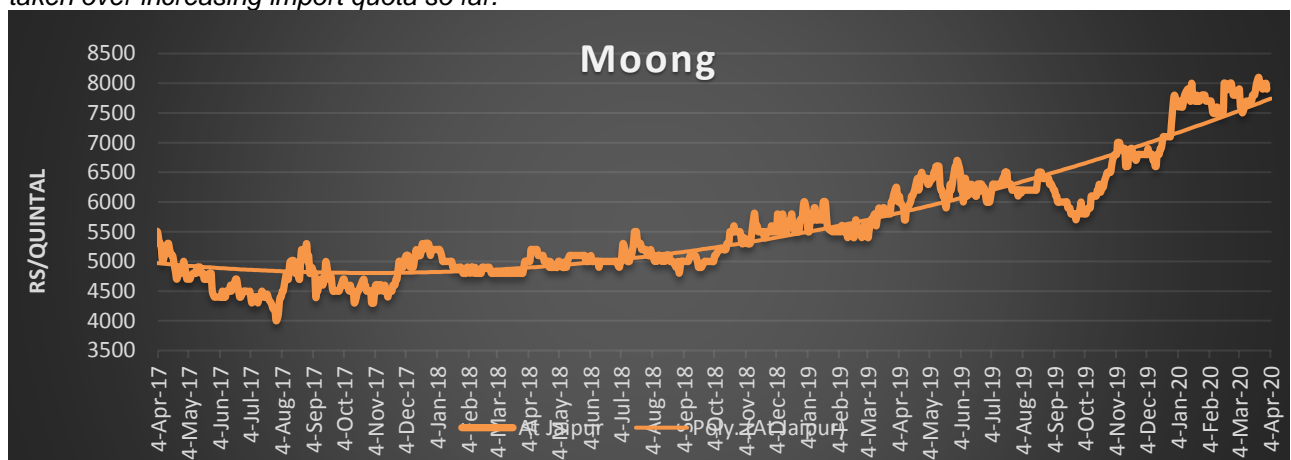

Market Outlook: Urad Prices are likely to show steady to firm momentum.

Green Gram (Moong):

Market Recap:

Moong cash market traded steady to slightly weak amid firm inner tone. Despite shortage of quality moong demand at higher level got affected and stockists are preferring to release stock slowly at higher level. In Jaipur market moong is being traded at Rs 7600-7650 and may decrease by Rs 200 in coming weeks. If prices continue to move up and govt. may interfere in the market. New crop from rabi season is not expected before mid-March. This week some downward pressure might be seen on cash moong market. Nafed and other agencies have procured 139908.41 MT moong so far. Procurement is over in all states except Karnataka and Rajasthan. Old stock is around 92916.54 MT. This means total availability with Nafed and other agencies is 232,884.95 MT now. Govt may use this stock to cool down prices in domestic market. No decision has been taken over increasing import quota so far.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Note : No update due to unavailability of price for various market

Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in March.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4000 to 4400 for this week.

Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4200 and second target 4100 with stop loss at 4450 level.

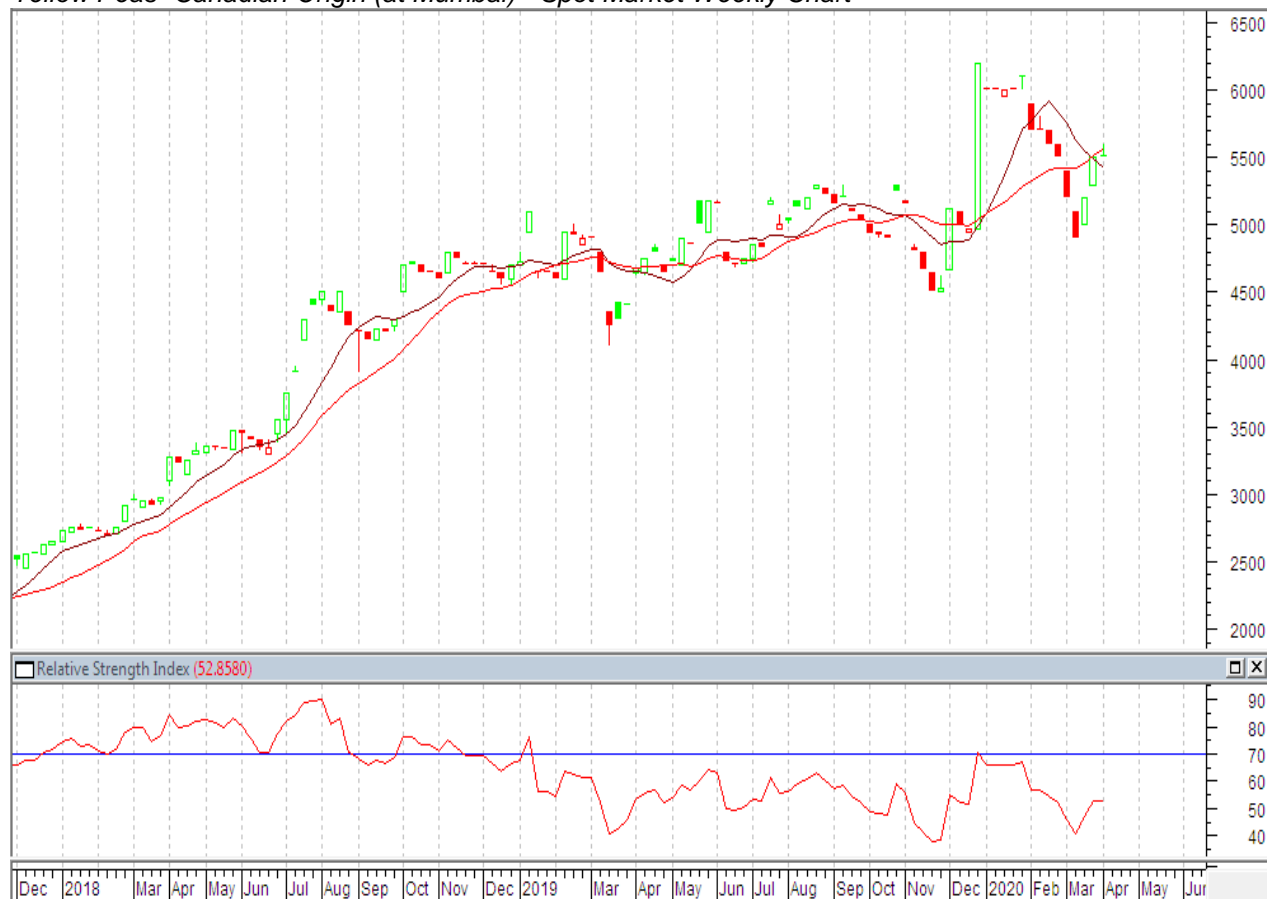

Delhi Chana Physical:

Support & Resistance				
S1	S1	PCP	R1	R2
3900	4000	4275	4450	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Note : Prices are not available,so no update

Outlook –Downward correction may be seen in pea market as chana may move down again and pressurize pea market. If chana trades weak .it may drag down peas price too..

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700-5000 in this week

Strategy: **Sell on rise**

Trade Recommendations: Go short around 4950 with the first target of 4800 and second target 4700 with stop loss at 5050 level.
