Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

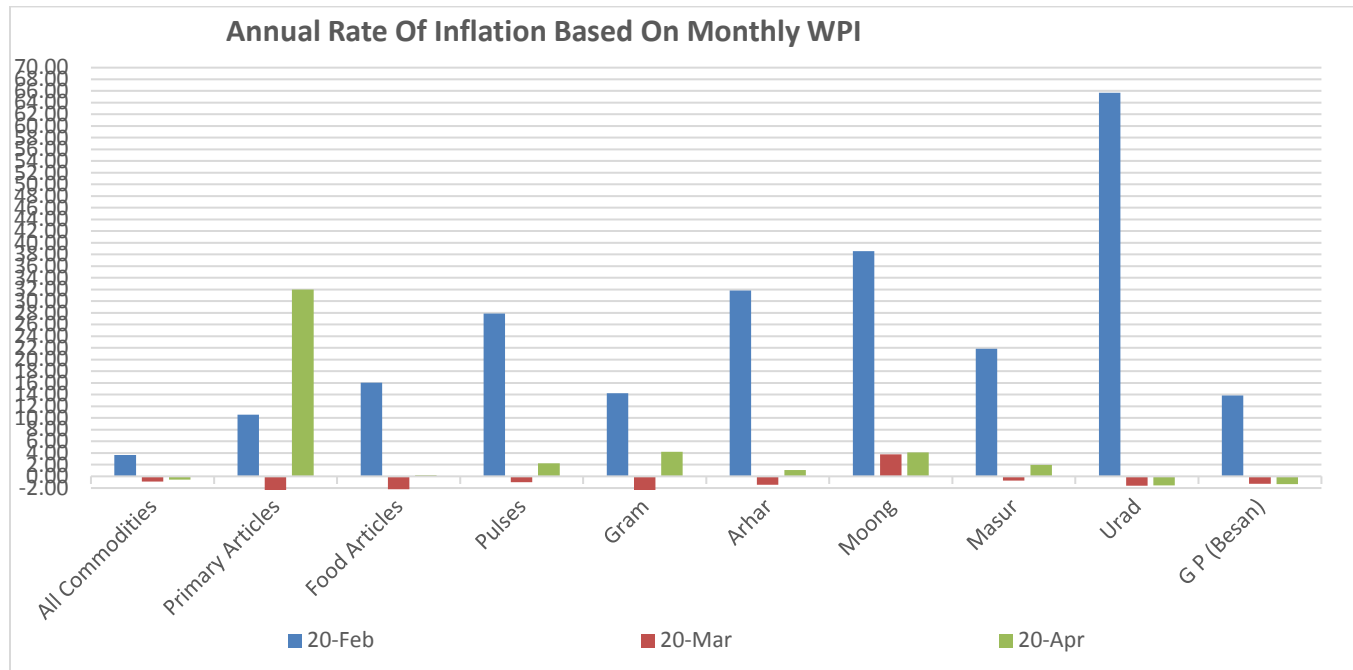

- **The southwest monsoon is heading faster than normal expectation. It has covered parts** of central and western India 15 days earlier than scheduled. It seems that India is heading towards bumper kharif crops this year. Sivananda Pai, head of long-range forecasting at the India Meteorological Department (IMD) says that a low pressure area near Andhra Pradesh accelerated the vital weather system, which will progress further in the next two days. After that monsoon may slow down for few days and again it would be active. Overall, rains fall condition looks positive so far. Kharif crop planting has already increased 13 per cent over last year's. In last 15days, rainfall has been 31 per cent above normal across the country, with central India alone receiving double its normal rainfall.
- **Normal course of trading is yet to pick up despite relaxed lock down norms in June. Impact of COVID-19** has continued to disturb all segments of trade. Expected higher import flow in May and around 40,000MT in June from Myanmar amid weak demand from bulk users like mills would continue to restrict tur price in local market. Apart from it, free distribution of pulses (per ration card 1kg per month till June-2020) would remain un-supportive to tur cash market in June-2020 too. Labour as well as transportation issues still remain a major bottleneck. Mrket is expected to move up from current level as short supply might be seen in coming months.
- **Myanmar is offering new lemon tur at \$620 and old at \$605 per MT. basis Indian ports.** There was no offer for linkely this month. Despite extended timeline for back log import, volume in May was unexpectedly lower at 1500.65MT. However, volume is expected to increase in June-2020.
- **The DGFT increased urad import quota from 1.5 lakh MT to 4 lakh MT and timeline for import has** been extended from 31st May - to 31st Aug-2020. So supply is bound to increase in coming months. It was recorded at 15000 and 5500 MT in April and May. Volume was lower due to lock down. . Continuous extension in import timeline and higher volume of import have weighed on market fundamentals and the impact is being reflected on price once again. Area under kharif crop is bound to increase from normal of 31 to 40.33 lakh ha. It is almost 3 percent higher than last year. New arrivals from AP, UP and Tamil Nadu and likely higher import flow from Myanmar in-Jun, Jul and Aug would continue to cap uptrend in urad market. However, it can confidently be maintained that prices would continue to rule above MSP in June and July. New season starts in Aug with new arrivals from Madhya Pradesh, Rajasthan, UP and MH-the major producing states in kharif season.
- **Moong arrival in Harda market was seen decreasing. Farmers continued to bring moong uncleaned** and thus they received lower than expected price in markets. Superior quality moong was traded at Rs 6500 to 6771 per qtl. As pressure is likely to continue, prices may decrease further by Rs200 from current level. Kharif moong sowing is likely to start from 20th June in MP, Rajasthan while in other states it may commence by the end of this month. Better crop size in summer crop and good prospects in kharif would not allow moong market to move beyond MSP level. Demand too has weakened at higher level. In nearby Markets it is being traded at Rs 6200-6800 per qtl. It may slip by Rs 200 more in coming weeks despite Hike in MSP last week. Moong from Nimar is being delivered to Delhi at Rs 7200, Indore at Rs 6900 and Gujarat at Rs7300. Overall tone remains weak. .In June moong market is likely to trade in the range of Rs 6000-7000, depending on quality of the crop coming into markets
- **Lentils cash market continued to trade firm on short supply in the market and stockists unwillingness** to sell their stock at prevailing price during past two weeks. Even pace of arrival has decreased and millers were seen active in the market. Lower than expected import in April and May have encouraged price to get firmer. However, at this level, some selling by stockists is expected. Besides, around 1lakhMT import is expected by the end of this month. It may cap uptrend in masur price. Nafed may resort to sell old stock too to check ongoing firmness.
- **Cash chana market trades steady to slightly weak despite better pace of procurement. Agencies have** procured around 16 lakh MT chana so far from various states against target of 22.5lakh MT. Situation is tricky on chana front. Some market men expects firmness while other sees range bound movement. Production and old stock hints ample supply side despite increased consumption in domestic market. Chana may trade slightly up from current level but would not touch MSP level in the near term.
- **Peas market traded steady despite negligible import and lower stock in domestic market. Bumper** chana crop are restricting upward momentum.. So any firm momentum is unlikely. Green peas would continue to trade firm as stock in pipe line is almost nil.

International Market Update:

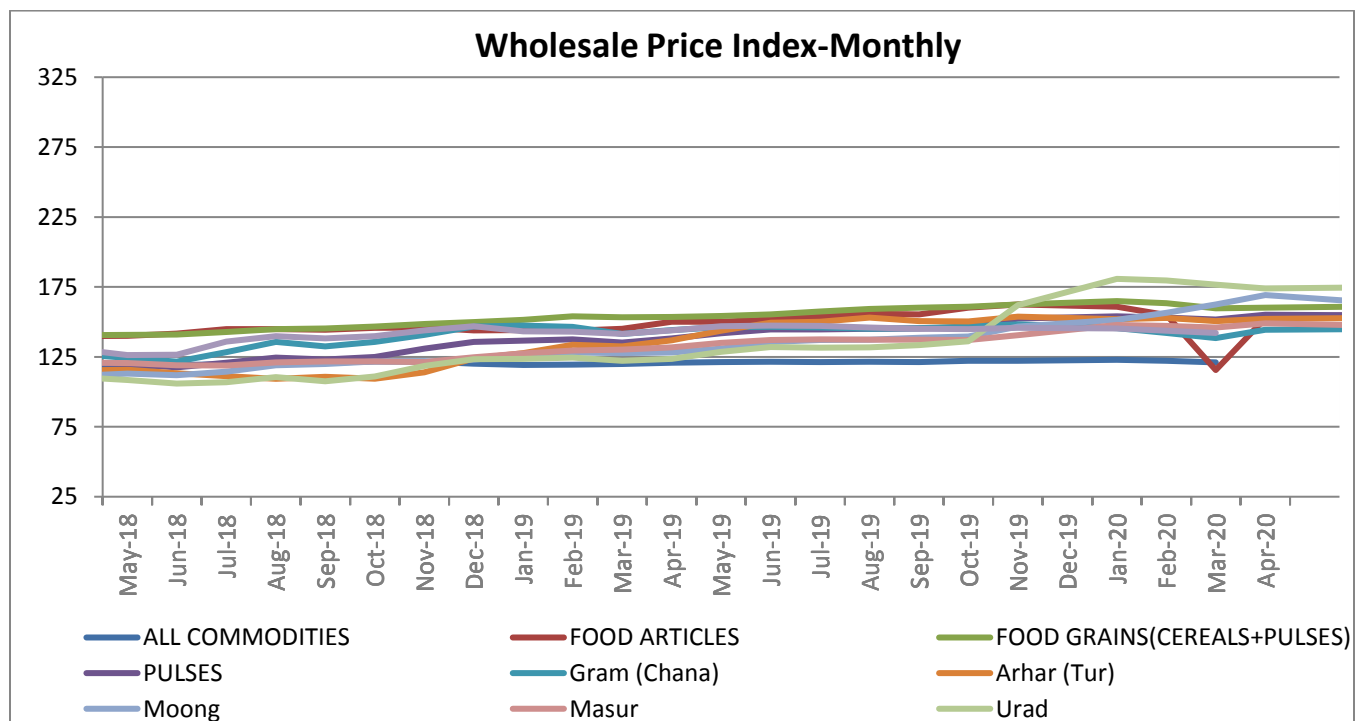

- Exporters and bulk buyers of field peas are now active in western Canada. As export continues with good pace, carryout stock may decrease to lower level. Govt. agency have estimated 41.80 lakh acres area under peas. Experts say that supply side may be tight even if yield remains at normal level. Lower carryin and higher demand from China would keep peas price well supported throughout the year. Domestic demand of peas too is increasing in Canada.
- Australia is going to plant biggest chickpeas crop in comparison to last three years. Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal was heard. Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW. Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade -1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- As per agri food Canada area seeded under lentils in Canada is expected to remain unchanged at 1.53 Mha, due to higher expected returns relative to other crops. With higher yields, production is forecast to rise marginally to 2.2 Mt but supply is expected to decrease to 2.6 Mt due to a fall in carry-in stocks. Exports are forecast to be lower at 2.0 Mt. Carry-out stocks are expected to decrease which will be supportive for prices. The average price for all grades is forecast to rise from 2019-20. The USDA March Prospective Planting report showed that US area seeded to lentils is expected to decrease marginally from last year to 0.47 million acres. Area seeded is expected to fall in North Dakota but rise in Montana.
- As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions. Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- As per latest update by NASS lentil area may be down by 2-3% this year in US. Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%. It is really a big surprise this year.
- As per the latest Australian Bureau of Statistics Chickpeas export volume from Australia increased in Jan-2020 in comparison to Dec-2019. In January -2020, Australia exported 56,502 MT, up 2% from 55,296 the previous month. Bangladesh purchased 36,801 MT. Pakistan was the second most important importer taking 13,073 MT, followed by United Arab Emirates at 3,939 MT..
- Production of peas in Canada has been pegged at 42.37 lakh MT in 2019-20 & production forecast for 2020-21 is slightly higher at 43 lakh MT. During the period import would decrease from 70 to 60 thousand MT while export too would decrease from 34 lakh MT to 33 lakh MT in 2020-21. Domestic use would increase slightly from 8.33 to 8.60 lakh MT during the same period. Average price is likely to hinge in the range of \$245-275 per MT, same range as was seen in 2019-20.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 4.1 points from 151.7 in Mar to 155.1 in Apr-2020

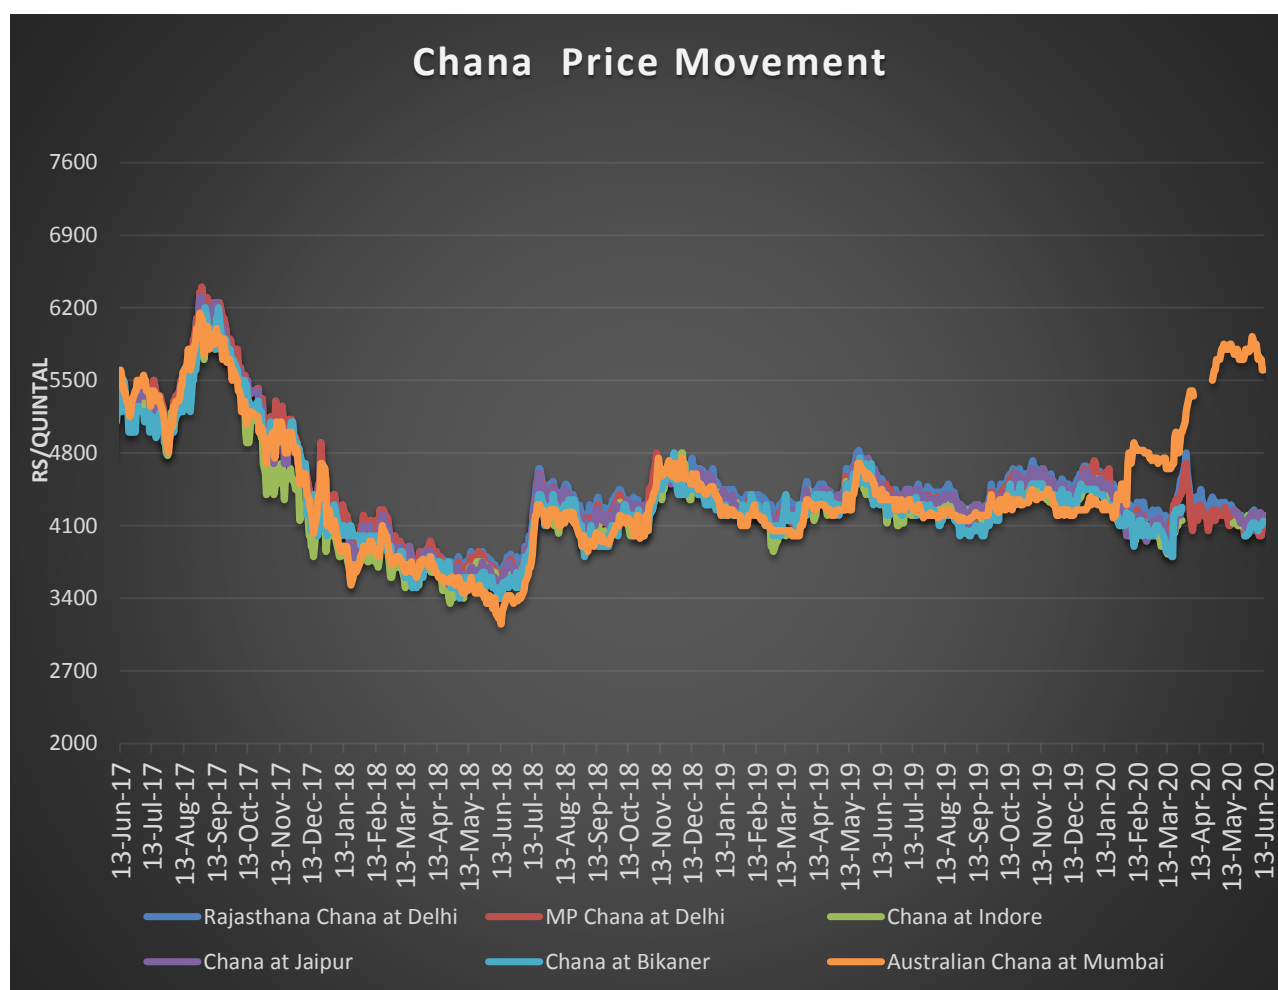

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded up taking clue from firm futures and increasing possibility of higher procurement (11 lakh MT) in MP. Procurement timing might be extended to 30th June due to disturbance caused by lock down. In Delhi Chana is being traded at Rs 4000-4100 and may move up by Rs 100-200 from current level. Demand for chana is expected to improve June onward and it may help market to push up towards Rs 4500. Prices may move up beyond this level if import from LDC countries remains restricted. Nafed has ample old stock and there is a possibility of over 2 MMT procurement from new crop too. It would not allow market to have any unexpected spike in the near to medium term.

All India average price for Chana increased by 2.11 percent from Rs 4098 to 4201 per qtl. during review week. Even Australian Chana (imported) price increased to Rs 5600 per 100kg due to lower availability of imported chana in domestic market. Following graph illustrates the chana price movement in different markets:

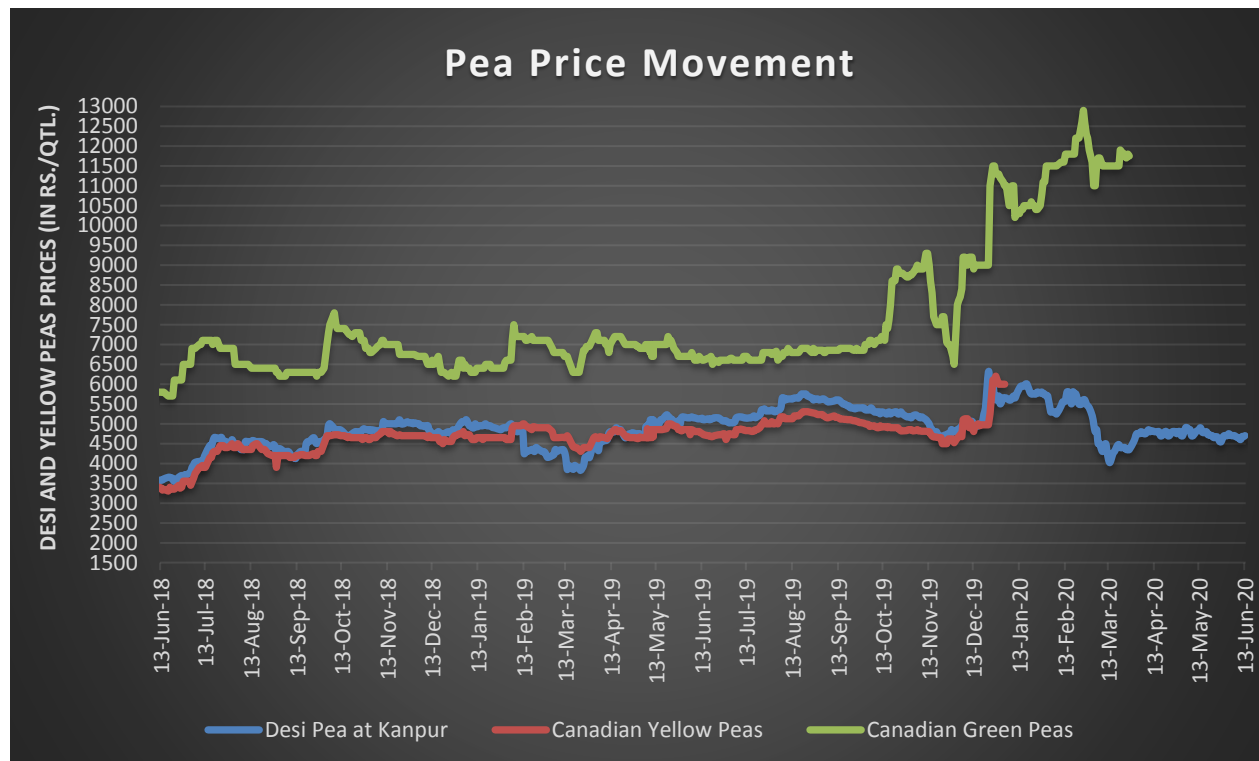

Market Outlook: Improvement might be seen in chana cash market this week too due to increased pace of procurement and renewed demand amid restricted arrival. Futures remain un-supportive. Nafed has stopped selling old stock near market price. However free distribution of pulses is affecting market sentiments. Distribution of 1 k.g. dal per family/per ration card would continue to affect direct demand from cash market.

Peas (Matar):
Market Recap:

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. However, in some markets it traded up due to supply disturbance. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted..The commerce ministry issued a seperate harmonized system(HS code) for all peas (including yellow, green dun and kaspera) and changed its status in the third week of Dec.It has affected importers badly.Now import deals are not taking place.The fixed quota of 1.5 lakh MT has already been completed.Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market.Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl..Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far.Under prevailing condition govt.is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

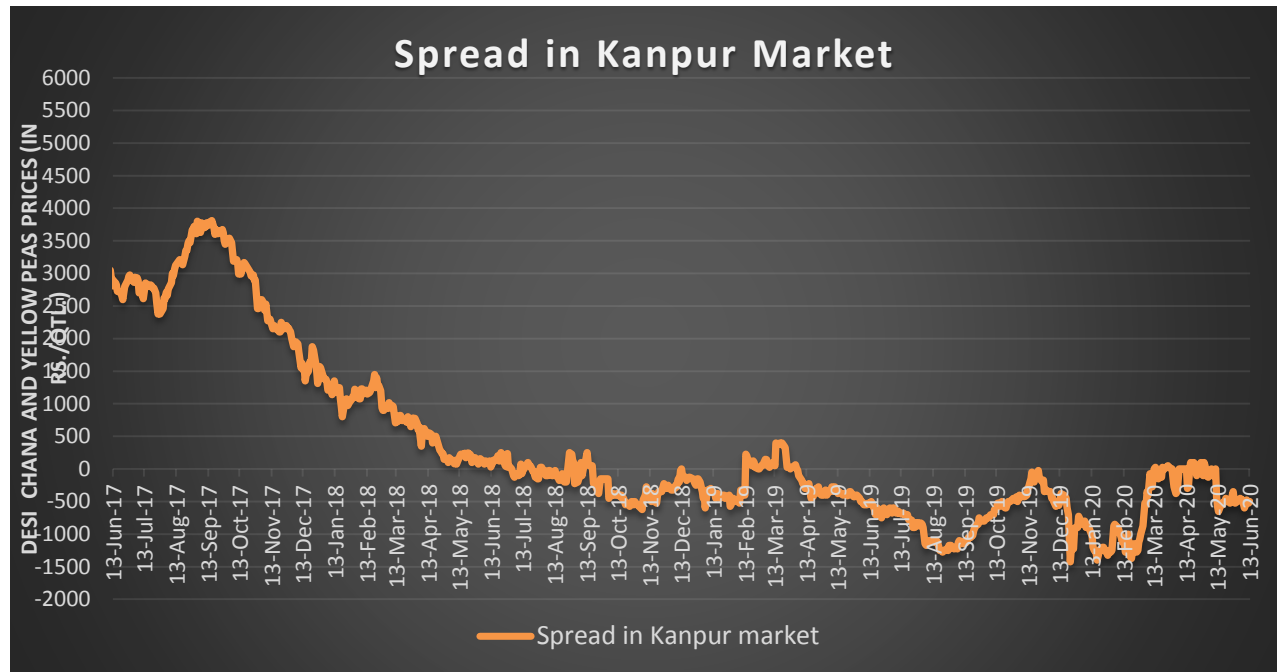

Pea in Kanpur market traded firm at Rs.4650-4700 due to halted arrival in domestic market.Stockiest too are unwilling to relase old stock despite bumper chana production prospects.. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai.. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too.Green peas have started hitting the local market but in limited quantity.As supply side is tight ,it would continue to trade up..

Current Market Dynamics & Outlook:

Peas market traded slightly firm due to halted pace of arrival in domestic market and restricted selling by stockists. Kanpur market traded firm at Rs 4700-4800 per qtl. New local crop has started hitting the market. So any major spike is unlikely in April .Overall, all India average price was up by 1.5% to Rs 4700-4750 per qtl in the first week of April.In Mumbai market, there was no quote for yellow peas as stock was exhausted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 250 due to decreased chana price and peas price too. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

MarketOutlook: Outlook remains steady to slightly weak in the short term.

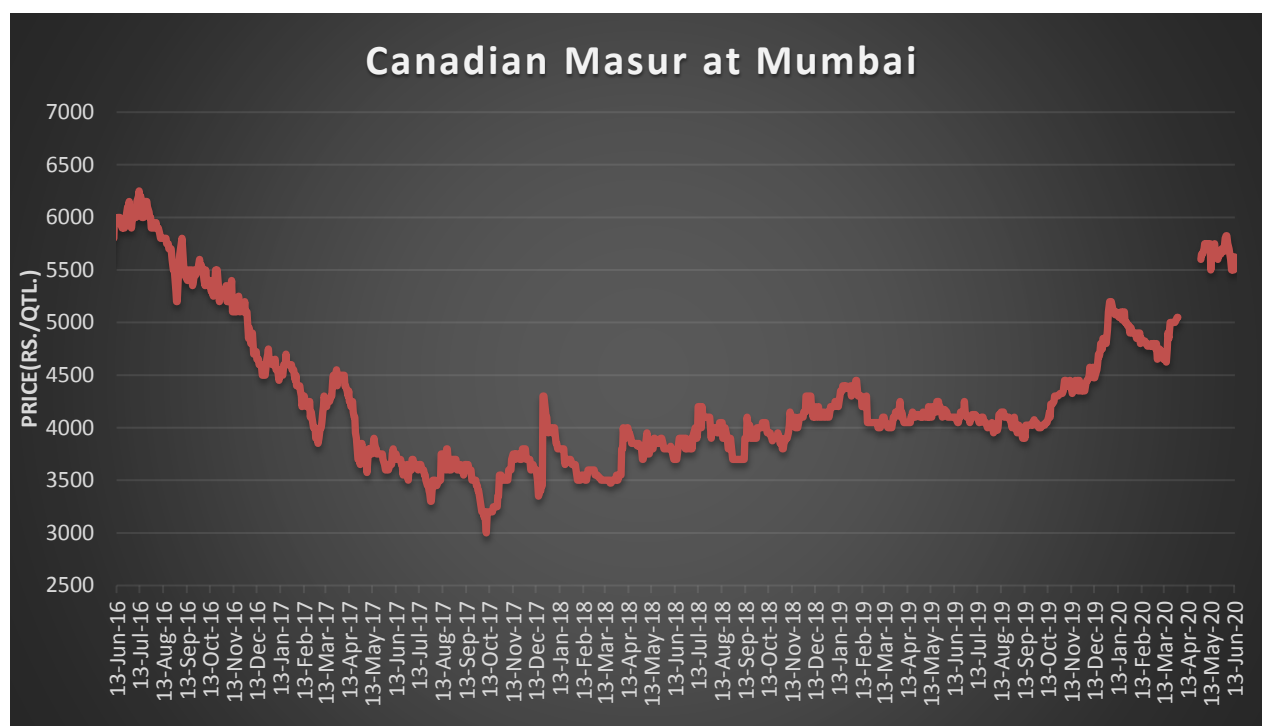

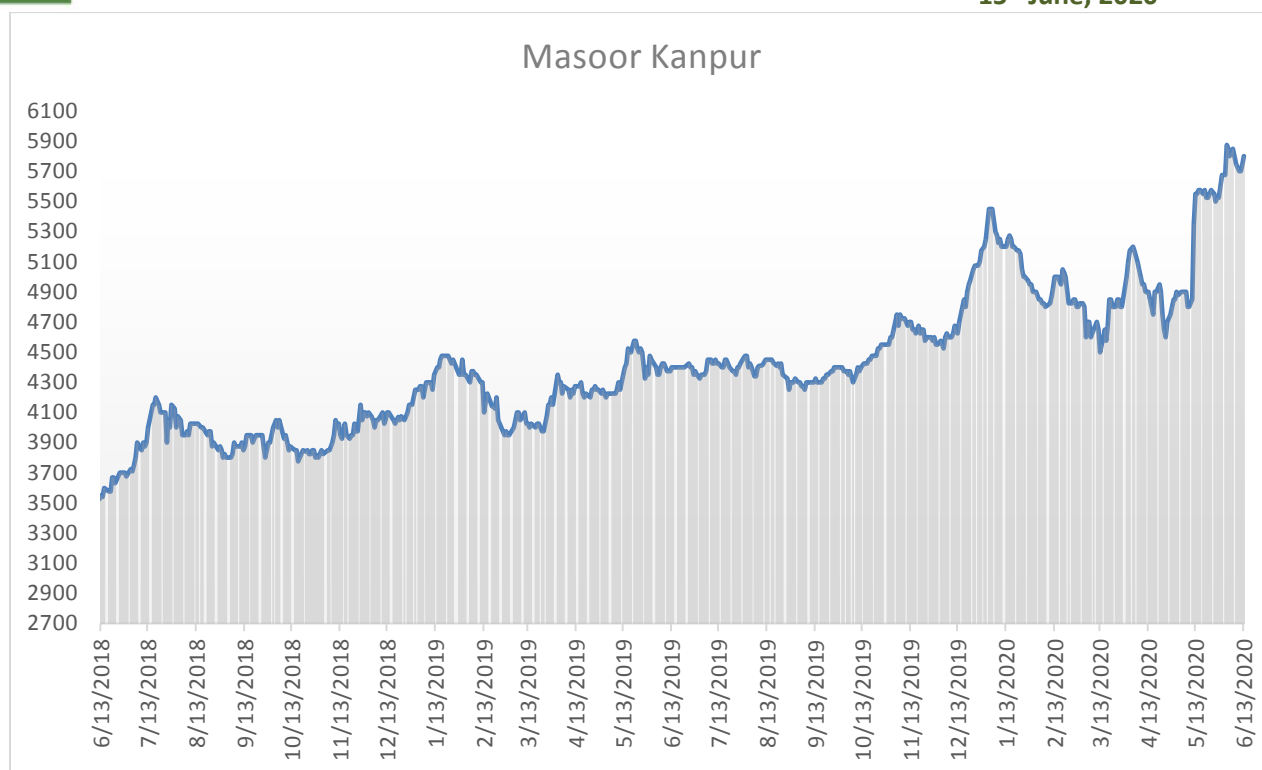

Lentils (Masoor):

Market Recap:

New arrival pace has decreased now and govt. has fixed 1.21 lakh MT target for procurement on MSP from mid April. Nafed and other agencies have been able to procure only 775 MT so far. The quantity is lower as prices in the market are ruling higher in cash market. Import pace is slow so prices in domestic market are moving up. It may move up further by Rs100-150 more. As harvesting is over, no threat is being seen from locusts attack. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in the rest of March is very crucial for the final size of the crop. In normal condition production is likely to exceed 13.5 lakh MT in 2019-20, to be marketed in 2020-21. Pressure on price might be seen.

Current Scenario:

In the 5th week of May-2020, average price in key market of Kanpur was up by 6.5 % to Rs 5400-5650 per qtl. Prices are likely to trade steady to slightly firm in the 1st week of June. There is good demand for masur in cash market.

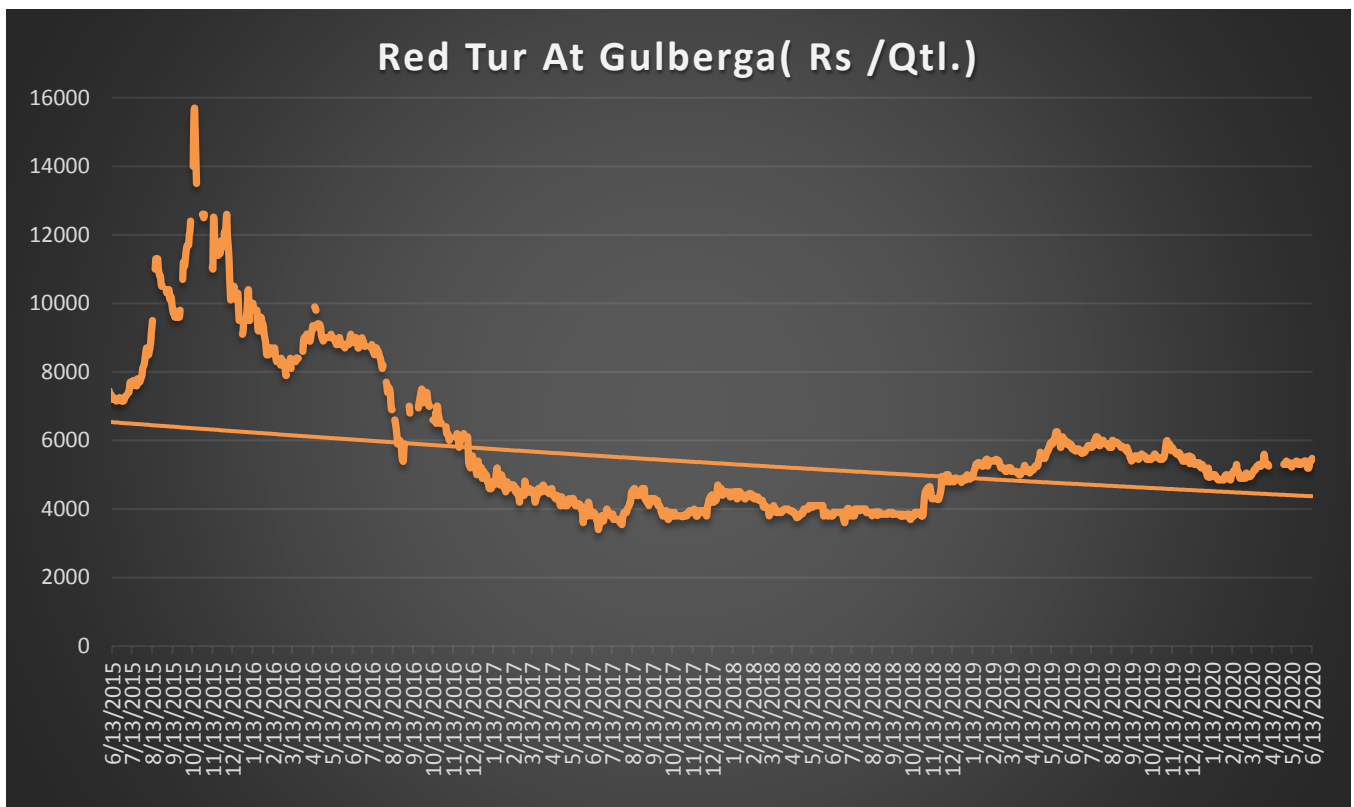

Market Outlook: Prices are likely to stay steady to slightly weak due to higher supply prospects in coming weeks. Sluggish demand from mills and good pace of offloading by stockiests remains unsupportive to cash market in the medium term. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm in the short term.

Pigeon Pea (Tur/Toor):
Market Recap:

Tur cash market improved due to fresh demand from mills and slower pace of arrivals. Supply from Karnataka, MH continues for other states. In Latur market it traded Rs 200 up and may continue to trade firm in coming weeks. Arrival in Latur market was reported at 1000-1200 bags while it was higher in Gulberga. As prices are ruling lower stockists are unwilling to sell tur at lower price right now. Tur price may move further up by Rs 200-300 from current level. Right now in Gulberga market it is being traded at Rs 5300-5400. Import is due in this month and quantity is higher. So any spike is unlikely in June.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. As of now around 5.05 lakh MT has been procured. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during June. Steady to slightly firm movement may prevail.

Market Outlook:

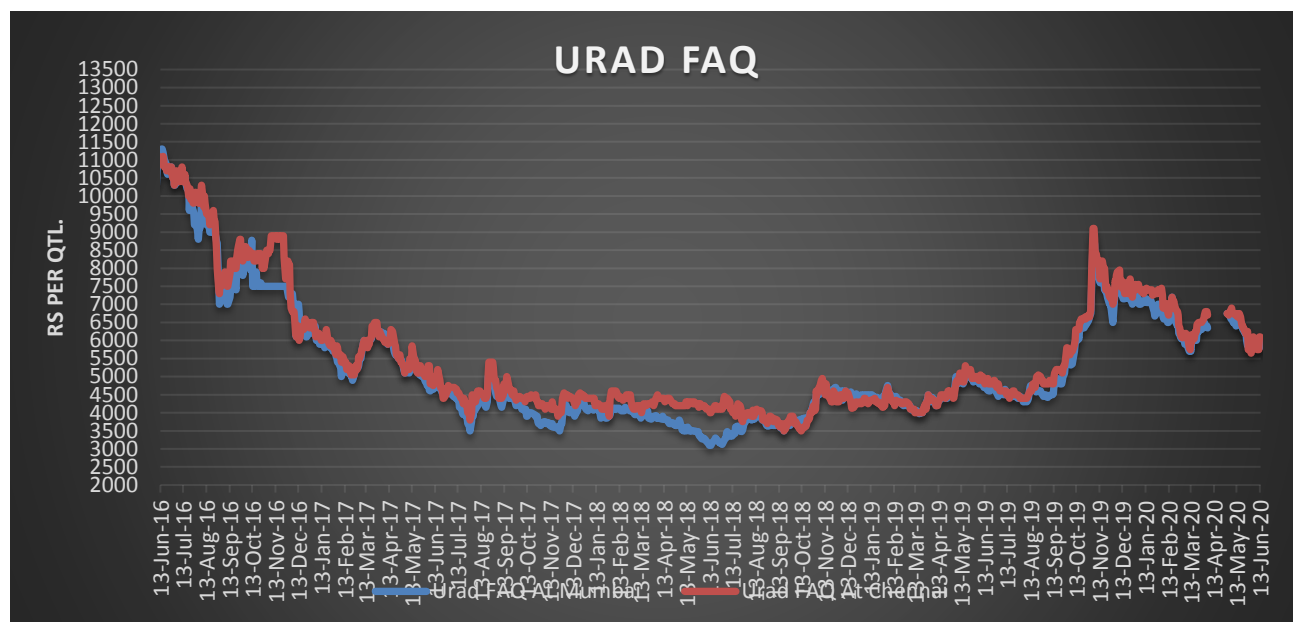

In the 5th week of May-2020, average price in Gulberga market was up by Rs 100 to Rs 5300-5400, due to higher pace of procurement from new crop and private buying. Apart from this fresh demand too are supportive to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started decreasing now.

Black Matpe (Urad):

The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31st August-2020. As time frame for import has been reduced, The DGFT would issue license soon (June). It would impact the market sentiments and cash market would trade down by Rs 200 to 300 from current level. Notably, import of back log is yet to hit Indian ports. The time line for back log import for ongoing MY has been extended till 31st May-2020. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price.

Current Market Dynamics & Outlook:

Nafed has started intervening into the market with govt.'s consent as it has around 1.82 lakh MT old stock. Import would increase supply into the market and price is bound to decrease in coming days. Even kharif area would increase by 10% this year due to higher MSP.

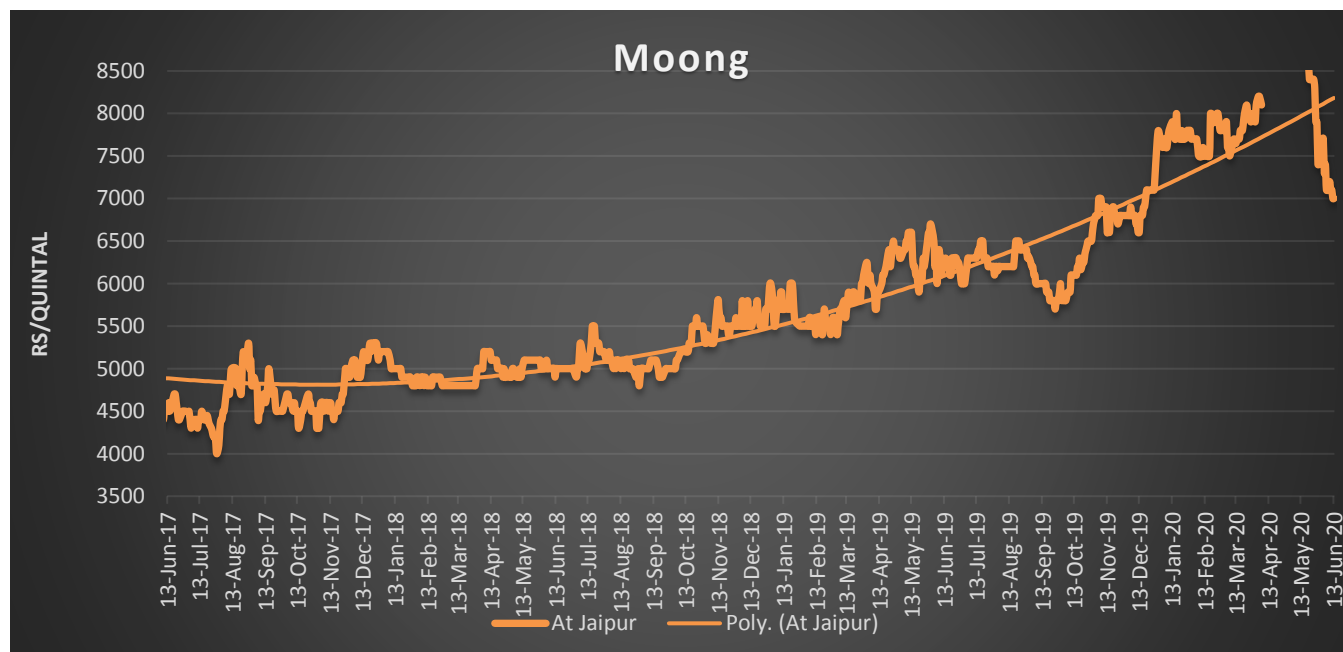

Market Outlook: Urad Prices are likely to show steady to firm momentum.

Green Gram (Moong):

Market Recap:

Arrival of new moong from Madhya Pradesh, Gujarat, UP and Bihar is continuously increasing while demand decreased after three days Holiday. Right now arrival of around 35000 bags from Narmada Patti and Nimar are being reported per day. In nearby Markets it is being traded at Rs 6500-7000 per qtl. It may slip by Rs 200 more in coming weeks despite Hike in MSP last week. Moong from Nimar is being delivered to Delhi at Rs 7500, Indore at Rs 7100 and Gujarat at Rs 7600. Overall tone remains weak.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-

Note : No update due to unavailability of price for various market

Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in March.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4000 to 4400 for this week.

Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4200 and second target 4100 with stop loss at 4450 level.

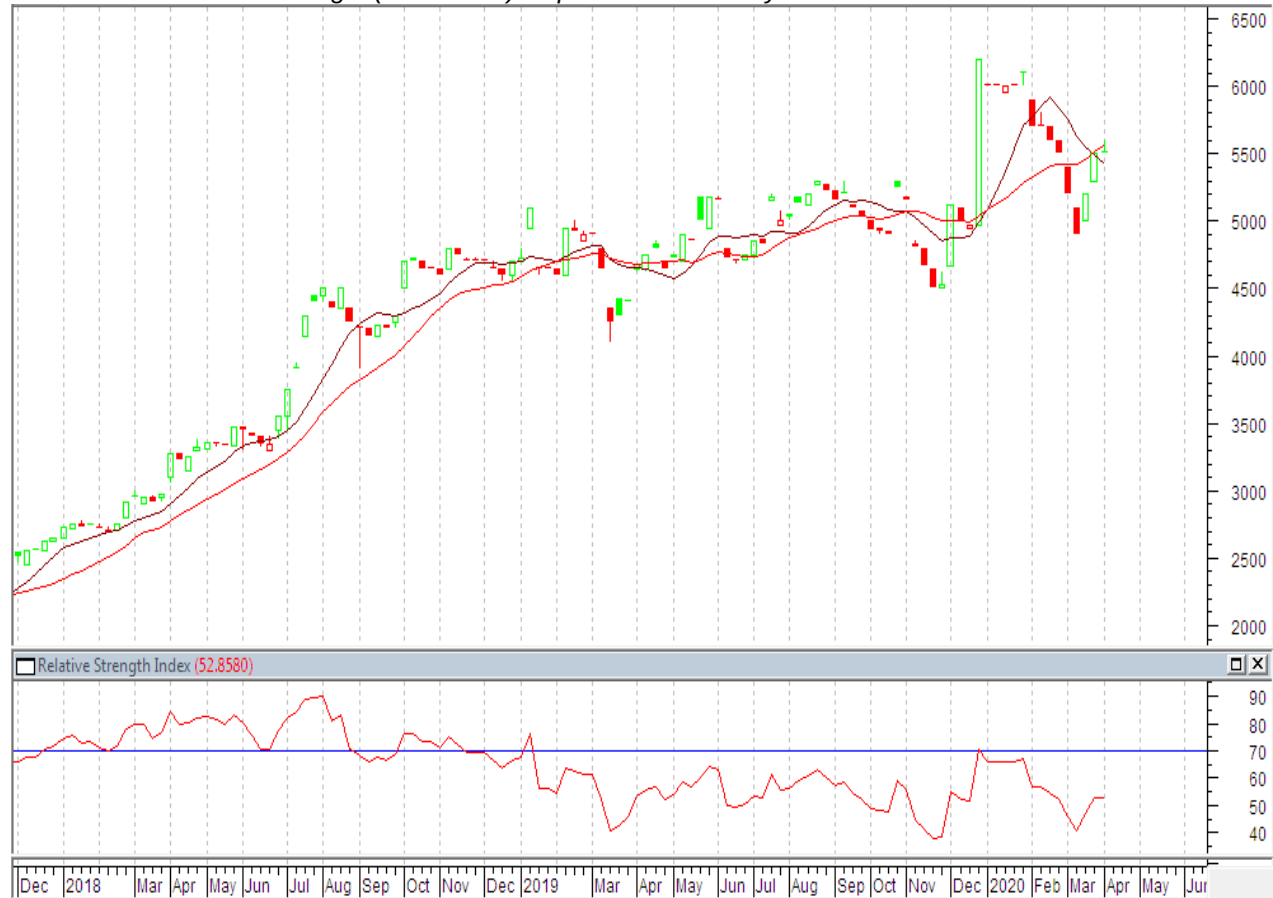

Delhi Chana Physical:

Support & Resistance				
S1	S1	PCP	R1	R2
3900	4000	4200	4450	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:

Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Note : Prices are not available, virtually no import from Mid March.

Outlook –Downward correction may be seen in pea market as chana may move down again and pressurize pea market. If chana trades weak .it may drag down peas price too..

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700-5000 in this week

Strategy: Sell on rise

Trade Recommendations: Go short around 4950 with the first target of 4800 and second target 4700 with stop loss at 5050 level.
