Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

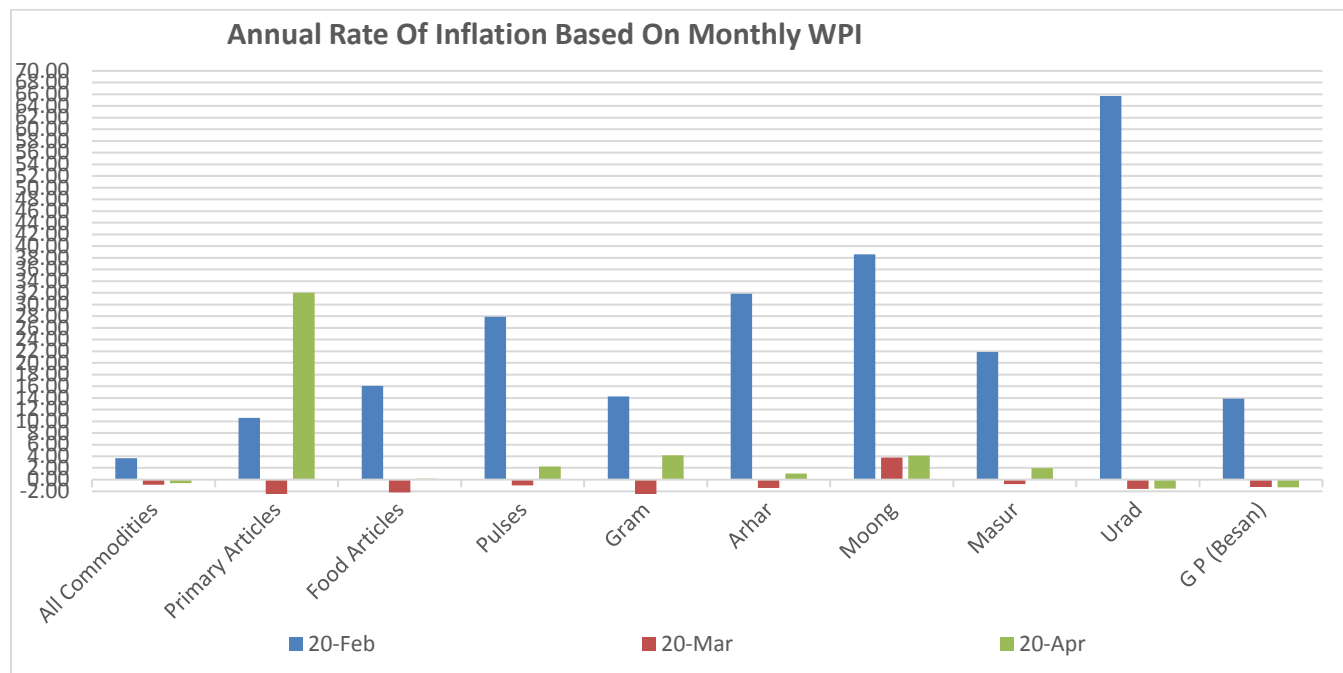

- **The pace of monsoon progress is getting slower now and rains in some major kharif growing states may delay sowing activities.** Rains in Maharashtra may disturb for a week and sowing of moong and urad may be delayed by a week. Start was good. If it picks up after a week, farmers would cover the short fall. If it delays by 10 days, it may disturb the crop sowing pattern in Maharashtra. If it happens, firmness in pulses market may get support once again.
- **Tur market started trading firm in domestic market due to stockiest active buying sensing uptrend to continue in coming months.** Market is well aware that stock of imported tur is lower at ports and demand is likely to improve in coming weeks due to commencement of festive season. Apart from it, Millers from Katni are buying Tur from Karnataka and MH. As supply side is getting tighter, stockiest have increased their buying throughout India. Demand for dal is normal right now, but will bound to improve. MH tur in Katni is being quoted at Rs 6250 while Kar tur at Rs 6325.
- **Despite import flow price of urad improved by Rs200 to 300 in south Indian cash market. It may move further up by Rs100-200 more as there is shortage of urad in cash market.** Traders are buying urad in Chennai for Delhi market at Rs 6450. It drove urad price in Delhi market by Rs 300 from Rs 6100 to Rs 6400. However, firm tone may be limited due to weak demand caused by COVID-19. Millers are active in a limited way and buying is based on actual needs. Brokers and buyers both have restricted themselves coming into markets. Despite good start of kharif sowing, new crop would be available after 3 months. So, firmer tone might be seen in coming weeks.
- **New arrival of summer moong from U.P., Bihar & Jharkhand started hitting Delhi market. It is being traded at Rs 6600 to 6800 per qtl. depending on quality of the crop.** Arrival from M.P. too continues. However, quality is not as good as expected. As prices were ruling higher, so production size is bigger for summer moong this year. Light dis-coloured moong in MP is being trade at Rs 6500-6700 per qtl. Demand for dal dhoya and chilka is weak while brokers and sellers are avoiding to visit market at this point of time due to COVID-19. Mills buy in bulk and decides price on sample. Under prevailing condition firmness in moong market seems difficult. After three months bigger kharif crop would be available in bulk volume.
- **Chana arrival in various markets are comparatively lower by 20% at this point of time. Chana is being traded at Rs 4000-4050 in markets of M.P. while it is being traded at Rs 4200-4250 in Delhi.** Procurement is on in MP, Raj and MH while it is getting slower in other states. Nafed and other agencies have brought 18.01 lakh MT chana, so far against target of 22.5 lakh MT for the ongoing MY. Maximum has been procured and the rest target is likely to meet by the end of the June. As stock with mills has started declining now amid 45% lower stock with private hands in comparison to last year. It would support chana at current level. Festive demand is about to start and consumption of besan would increase. So it is better to buy at dip for stake holders.
- **Masur import parity is higher as quotes in Canada and Australia were higher. Consumption of desi masur in Indian market has started improving now while import flow is lower than normal expectation.** Arrivals in markets too are decreasing. All these factors are pushing masur price up in domestic market. Masur vessels is being quoted at Rs 5550-5575 while container is quoted at Rs 5600-5650 in Mumbai market. Masur at Kolkatta and Hazira were quoted at Rs 570-5750 and Hazira at 5575. Mundara was quoted at Rs 5500. Under prevailing condition prices of masur is expected to move up from current level. Millers in Delhi, Kanpur and MP have increased buying. It would continue to support market in coming days. Before duty slash masur was quoted in Canada at \$530, with duty slash exporters increased their quotes at \$650-555 per MT. Buyers of west Bengal are active in Bihar and they are buying in bulk volume.
- **Peas market traded steady to slightly firm despite negligible import volume in May and lower stock in domestic market.** Stockiests have started retaining stock sensing uptrend to continue. However, depressed chana price may cap uptrend to a certain extent. In Karpur market peas is being traded at Rs 5200-5300 per qtl.

International Market Update:

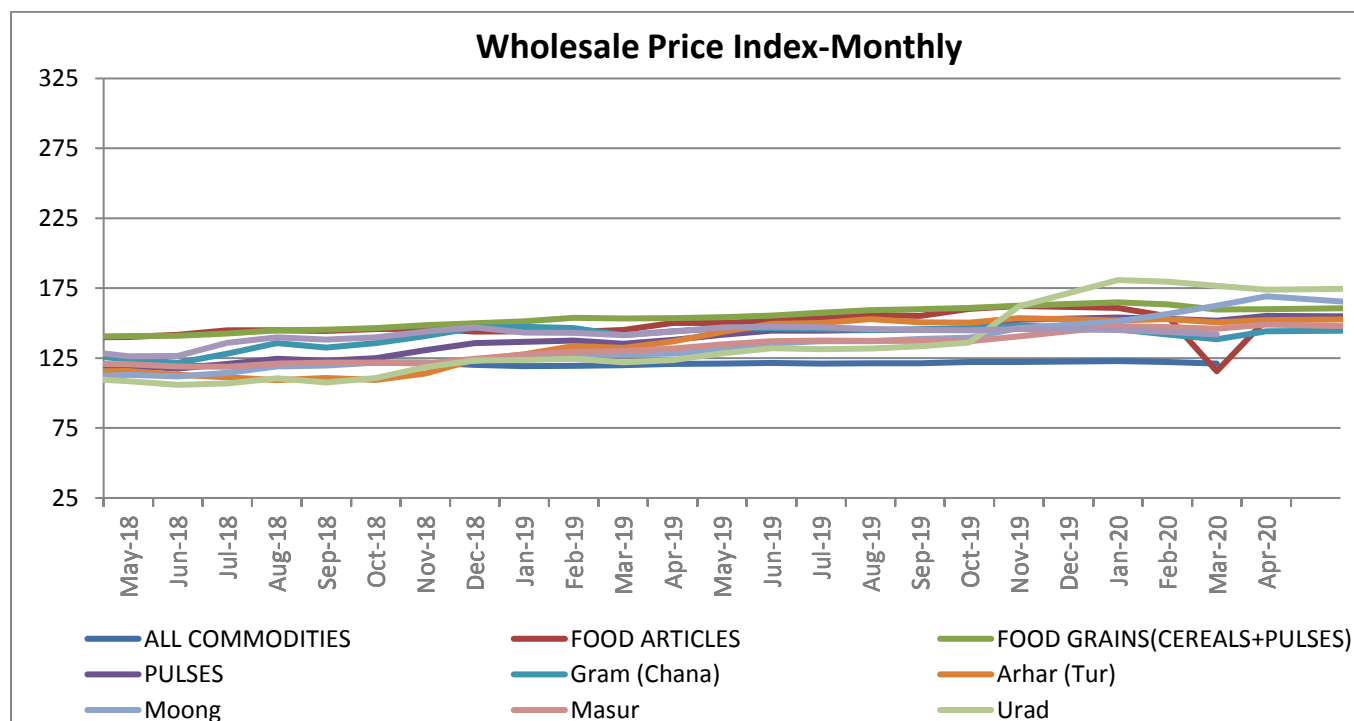

- **Lentils area is expected to decline slightly from 1530 thousand ha to 1501 thousand ha** in 2020-21. the decline is nominal so production size is estimated to be similar as seen in 2019-20. Canada had produced 21.67 lakh MT lentils in 2019-20. the fig for 2020-21 has been pegged at 21.50 lakh MT. Yield is similar for both years at 1.46 tonne per ha. import and export fig too may decline in 2020-21 and it may come down from 85 to 50 and from 2200 to 2000 thousand MT respectively. Price is expected to hover in the range of \$500-530 per MT.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT** in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and B, desh have been top buyers of dry peas in 2019-20 and the increased volume of total export shows the same. Even import figure is up from 62 to 72 thousand tonnes in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada is expected to increase from 35.81 lakh MT in 2018-19 to 42.37 lakh MT** in 2019-20. Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to B, desh continues with next three months forward deal** was heard. Old crop of lentils would not be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantity limits the deal too. B, desh has been buying 20,000 MT red small lentils per month. It may continue next three months. Australia exported 80,000 MT lentils in March and big volume export continues in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20% to 10%, Exporters in Canada has increased quotes accordingly. So, Indian importers are unlikely to gain benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$670 per MT. Actually Canadian fig is doubtful and it seems manipulation here. So, exporters always take advantage of change in duty structure.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant total 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **As per latest update by NASS lentil area may be down by 2-3% this year in US.** Farmers may plant total 474,000 acres in crop year 2020., down 2 percent from 2019. Lower area coverage is expected in Idaho, North Dakota, and Washington from last year, while planting intentions are above last year in Montana (7% increase).
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%.** It is really a big surprise this year.

Weekly Outlook: -Pulses are likely to trade steady to slightly weak.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI decreased by 4.1 points from 151.7 in Mar to 155.1 in Apr-2020

Pulses-Wise Scenario:

Chana

Current Scenario:

Chana cash market traded up taking clue from firm futures and increasing possibility of higher procurement (11 lakh MT) in MP. Procurement timing might be extended to 30th June due to disturbance caused by lock down. In Delhi Chana is being traded at Rs 4000-4100 and may move up by Rs 100-200 from current level. Demand for chana is expected to improve June onward and it may help market to push up towards Rs4500. Prices may move up beyond this level if import from LDC countries remains restricted. Nafed has ample old stock and there is a possibility of over 2 MMT procurement from new crop too. It would not allow market to have any unexpected spike in the near to medium term.

All India average price for Chana increased by 2.11 percent from Rs 4098 to 4201 per qtl. during review week. Even Australian Chana (imported) price increased to Rs 5600 per 100kg due to lower availability of imported chana in domestic market. Following graph illustrates the chana price movement in different markets:

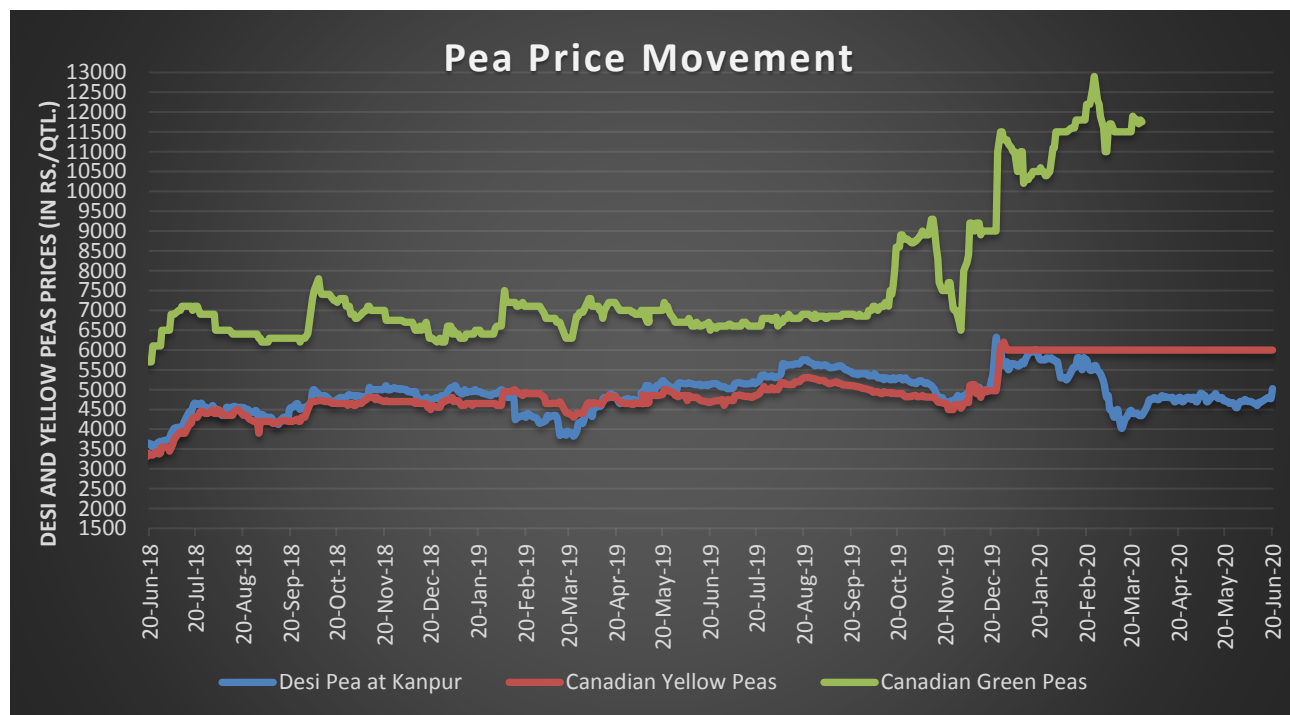

Market Outlook: Improvement might be seen in chana cash market this week too due to increased pace of procurement and renewed demand amid restricted arrival. Futures remain un-supportive. Nafed has stopped selling old stock near market price. However free distribution of pulses is affecting market sentiments. Distribution of 1 k.g. dal per family/per ration card would continue to affect direct demand from cash market.

Peas (Matar):
Market Recap:

No major change was seen in peas market as maximum trade remain suspended due to disruption in major market due to covid-19. However, in some markets it traded up due to supply disturbance. With changed status from the free to restricted category and hefty levy imposed on peas, its import remains almost halted. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green and kaspas) and changed its status in the third week of Dec. It has affected importers badly. Now import deals are not taking place. The fixed quota of 1.5 lakh MT has already been completed. Actually govt is trying to increase consumption of chana as it is abundantly available in domestic market. Importers have requested govt to allow green peas import as prices of green peas ruling higher at Rs-11,800 per qtl. Against the quota of 1.5 lakh MT over 5.78 lakh MT has been imported so far. Under prevailing condition govt. is unlikely to allow green peas import. New crop in local market started hitting mandis now. So price of yellow peas may move down from current level. With new arrival in domestic market supply side seems at ease.

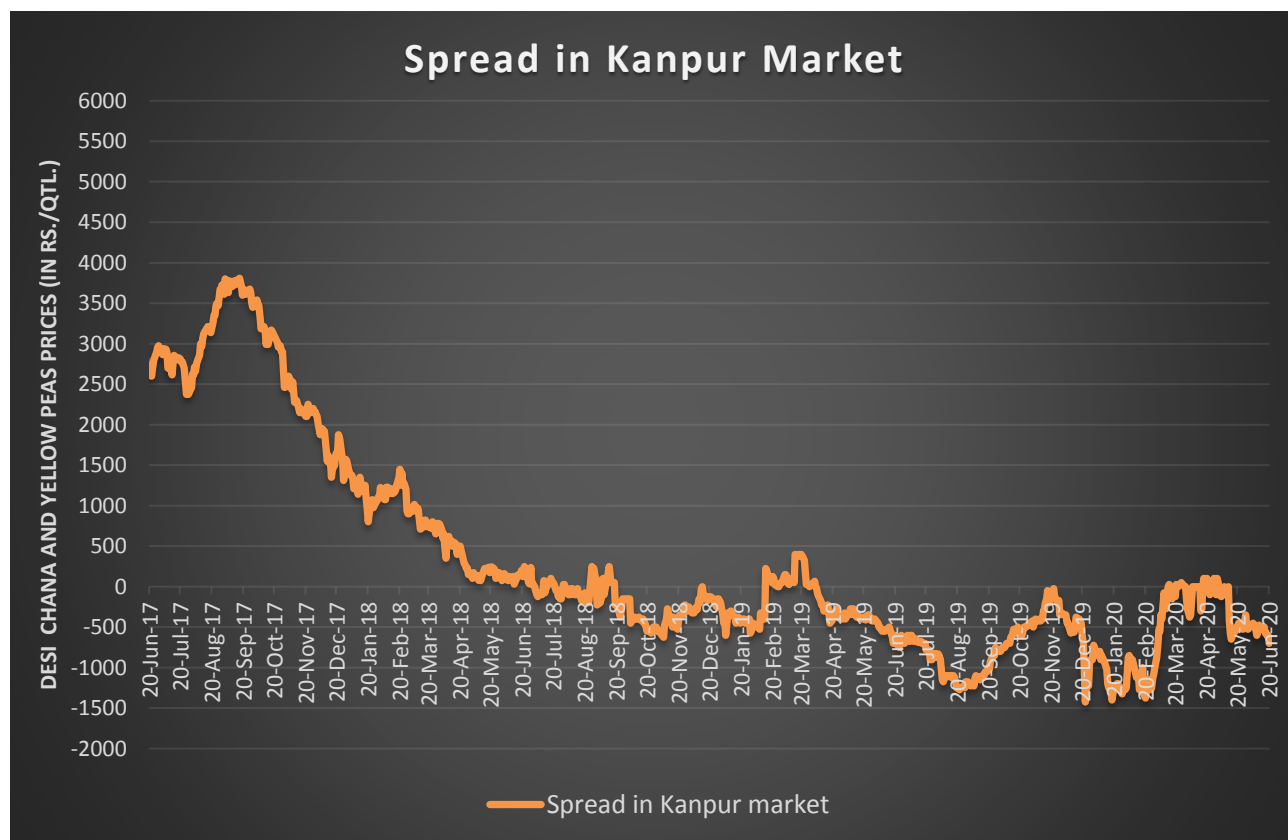

Pea in Kanpur market traded firm at Rs.4650-4700 due to halted arrival in domestic market. Stockists too are unwilling to release old stock despite bumper chana production prospects. It has impacted price of peas in Kanpur market too despite exhausting stock of imported peas in Mumbai. As chana price has declined, pea too may not be able to move up. Availability of chana would increase. And it would cap peas price too. Green peas have started hitting the local market but in limited quantity. As supply side is tight, it would continue to trade up.

Current Market Dynamics & Outlook:

Peas market traded slightly firm due to halted pace of arrival in domestic market and restricted selling by stockists. Kanpur market traded firm at Rs 4700-4800 per qtl. New local crop has started hitting the market. So any major spike is unlikely in April. Overall, all India average price was up by 1.5% to Rs 4700-4750 per qtl in the first week of April. In Mumbai market, there was no quote for yellow peas as stock was exhausted.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. However, gap has increased from Rs 25 to Rs 250 due to decreased chana price and peas price too. Spread is expected to remain in the negative zone in April too on relative movement in Chana prices. Overall outlook seems steady to slightly weak this week too.

MarketOutlook: Outlook remains steady to slightly weak in the short term.

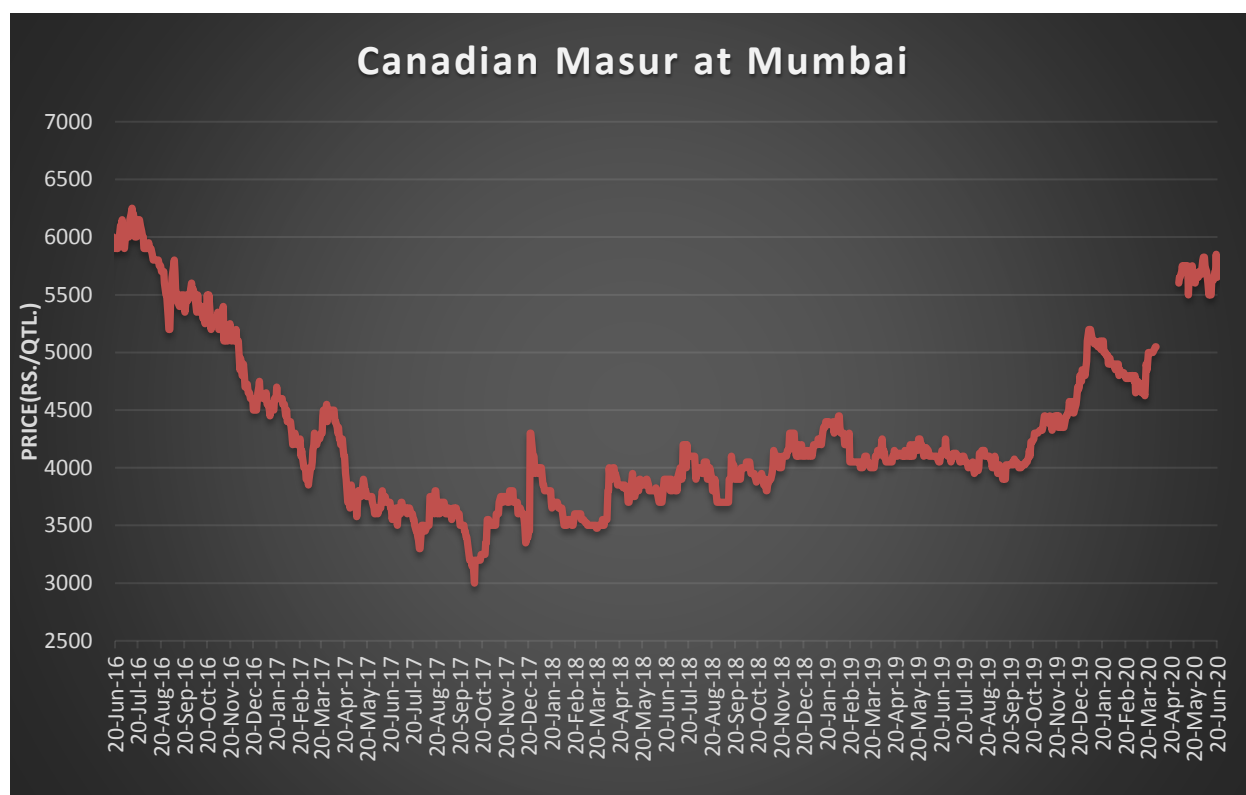

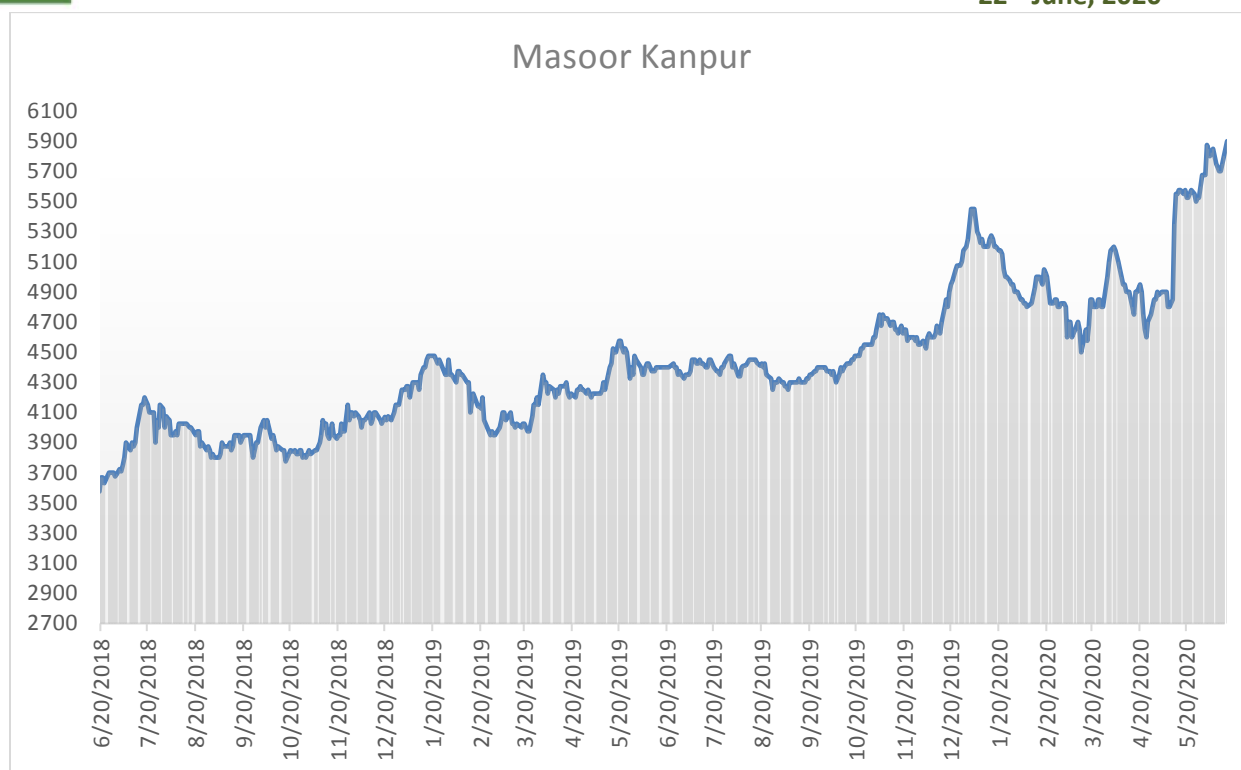

Lentils (Masoor):

Market Recap:

New arrival pace has decreased now and govt. has fixed 1.21 lakh MT target for procurement on MSP from mid April. Nafed and other agencies have been able to procure only 775 MT so far. The quantity is lower as prices in the market are ruling higher in cash market. Import pace is slow so prices in domestic market are moving up. It may move up further by Rs100-150 more. As harvesting is over, no threat is being seen from locusts attack. In other regions crop condition is good to excellent. Yield is expected to be better from last year. Weather condition in the rest of March is very crucial for the final size of the crop. In normal condition production is likely to exceed 13.5 lakh MT in 2019-20, to be marketed in 2020-21. Pressure on price might be seen.

Current Scenario:

In the 5th week of May-2020, average price in key market of Kanpur was up by 6.5 % to Rs 5400-5650 per qtl. Prices are likely to trade steady to slightly firm in the 1st week of June. There is good demand for masur in cash market.

Market Outlook: Prices are likely to stay steady to slightly weak due to higher supply prospects in coming weeks. Sluggish demand from mills and good pace of ofloading by stockiests remains unsupportive to cash market in the medium term. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of new crop. Overall tone in masur market remains firm in the short term.

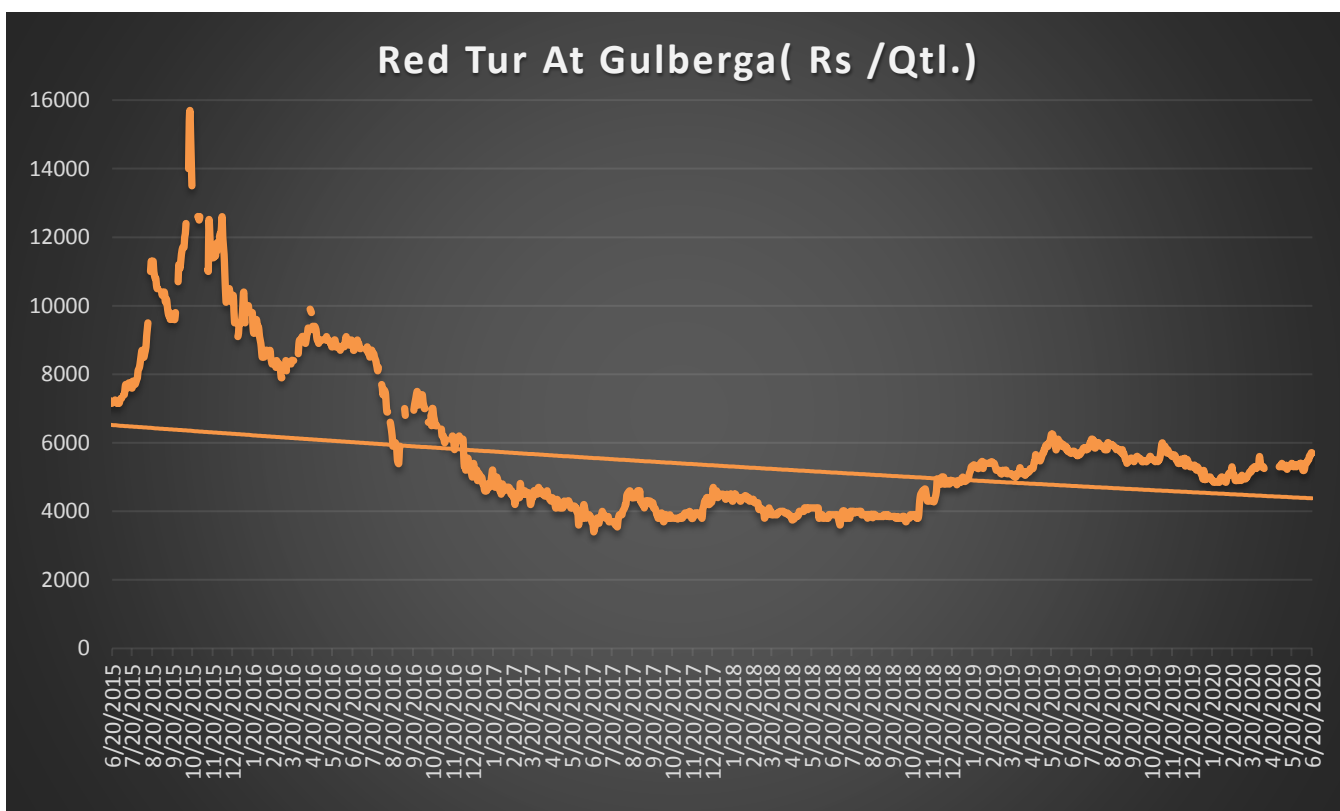

Pigeon Pea (Tur/Toor):

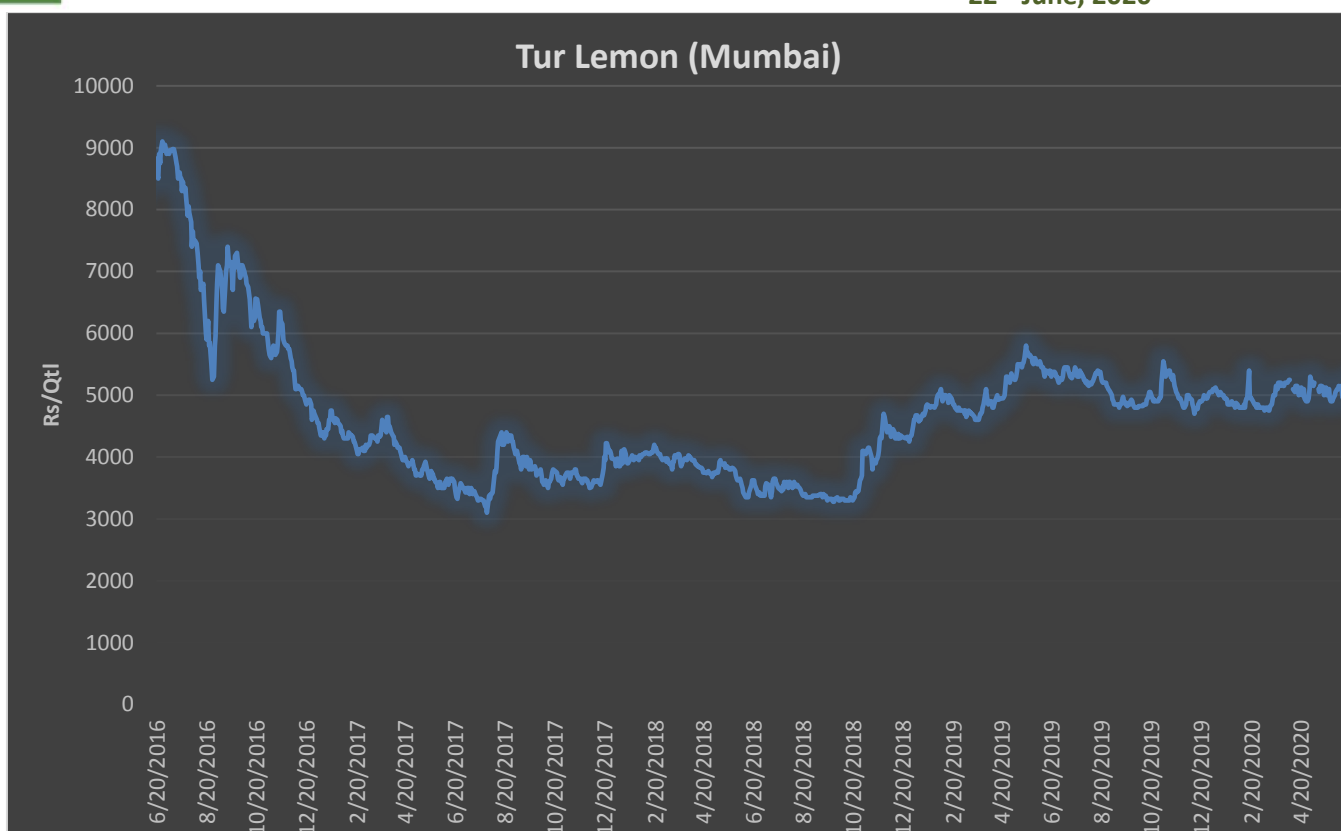

Market Recap:

Tur cash market improved due to fresh demand from mills and slower pace of arrivals. Supply from Karnataka, MH continues for other states. In Latur market it traded Rs 200 up and may continue to trade firm in coming weeks. Arrival in Latur market was reported at 1000-1200 bags while it was higher in Gulberga. As prices are ruling lower stockists are unwilling to sell tur at lower price right now. Tur price may move further up by Rs 200-300 from current level. Right now in Gulberga market it is being traded at Rs 5300-5400. Import is due in this month and quantity is higher. So any spike is unlikely in June.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545573MT. As a nodal agencies Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival would start picking up. Actually procurement target has been decreased this year due to lower kharif crop size, so that supply in open market continues. As of now around 5.05 lakh MT has been procured. Crop size may cross 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5000-5400 during June. Steady to slightly firm movement may prevail.

Market Outlook:

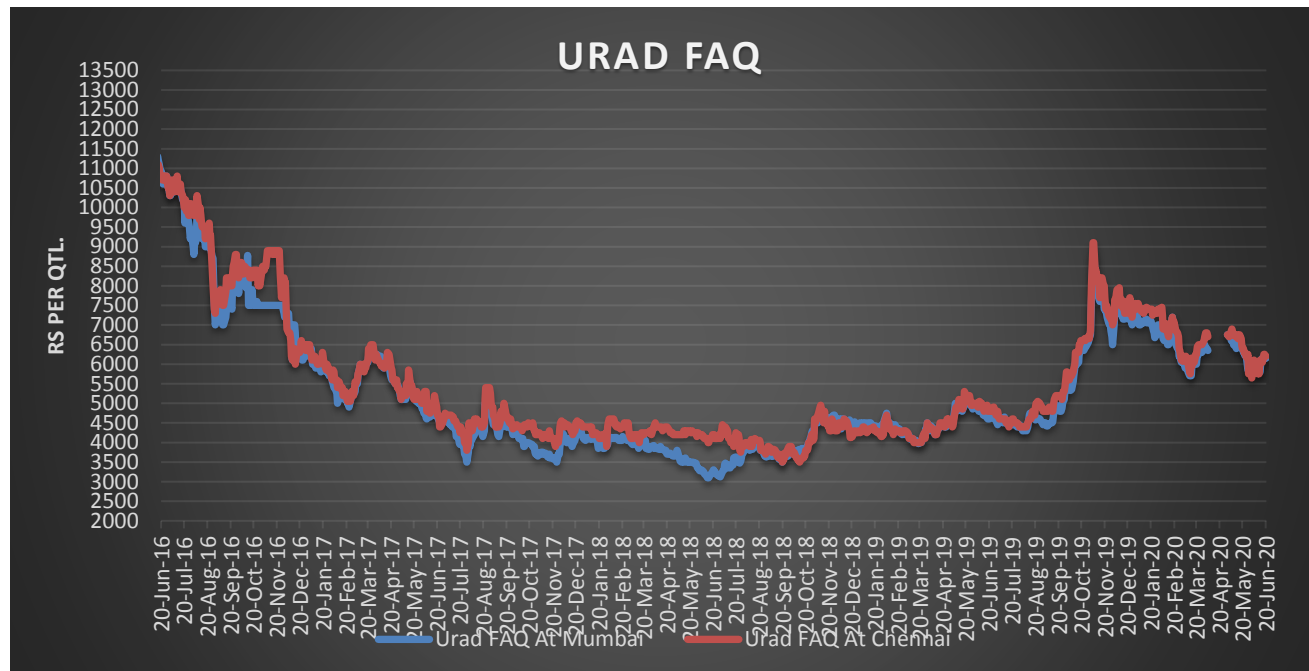

In the 5th week of May-2020, average price in Gulberga market was up by Rs 100 to Rs 5300-5400, due to higher pace of procurement from new crop and private buying. Apart from this fresh demand too are supportive to cash market. Tur price is likely to recover as procurement commences in bulk volume. New arrival started decreasing now.

Black Matpe (Urad):

The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020. As time frame for import has been reduced, The DGFT would issue license soon (June). It would impact the market sentiments and cash market would trade down by Rs 200 to 300 from current level. Notably, import of back log is yet to hit Indian ports. The time line for back log import for ongoing MY has been extended till 31st May-2020. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price.

Current Market Dynamics & Outlook:

Nafed has started intervening into the market with govt.'s consent as it has around 1.82 lakh MT old stock. Import would increase supply into the market and price is bound to decrease in coming days. Even kharif area would increase by 10% this year due to higher MSP.

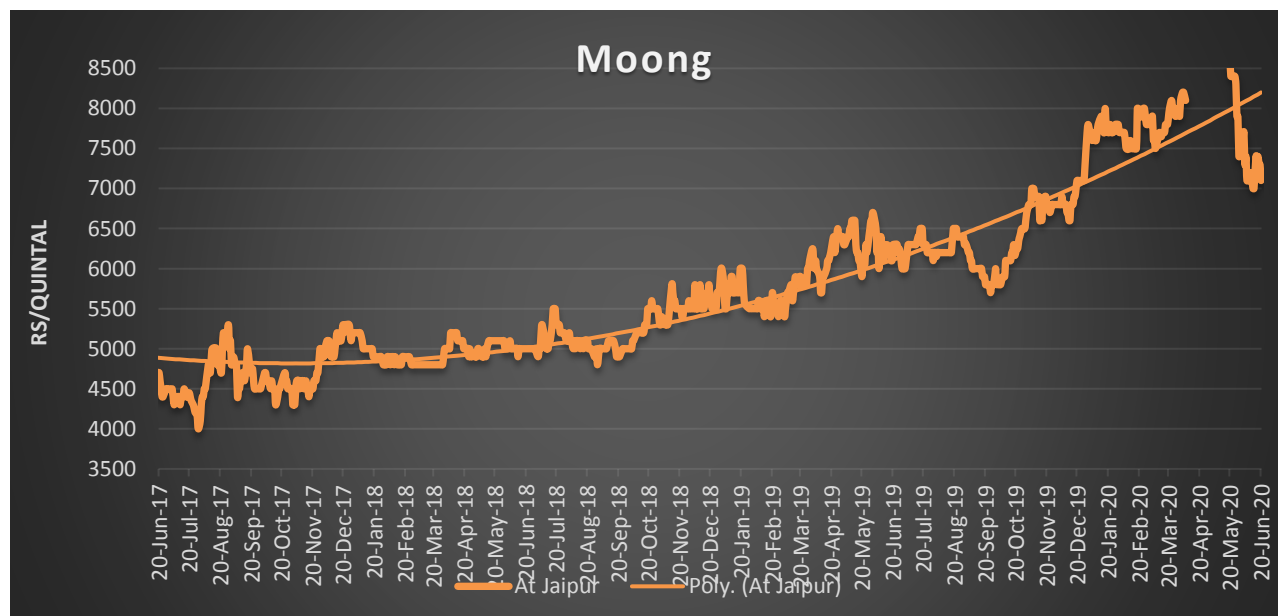

Market Outlook: Urad Prices are likely to show steady to firm momentum.

Green Gram (Moong):

Market Recap:

Arrival of new moong from Madhya Pradesh, Gujarat, UP and Bihar is continuously increasing while demand decreased after three days Holiday. Right now arrival of around 35000 bags from Narmada Patti and Nimar are being reported per day. In nearby Markets it is being traded at Rs 6500-7000 per qtl. It may slip by Rs 200 more in coming weeks despite Hike in MSP last week. Moong from Nimar is being delivered to Delhi at Rs 7500, Indore at Rs 7100 and Gujarat at Rs 7600. Overall tone remains weak.

Market Outlook: Moong prices are likely to trade steady to slightly firm in the near term.

Pulses Wise Technical Outlook For The Week:-
Chana:

Technical Analysis:

Outlook: –We expect prices to move steady to slightly weak in the coming days.

Chart depicts steady to slightly weak movement in March.

RSI is moving down in neutral region.

Expected price band for Chana in Delhi is 4000 to 4400 for this week.

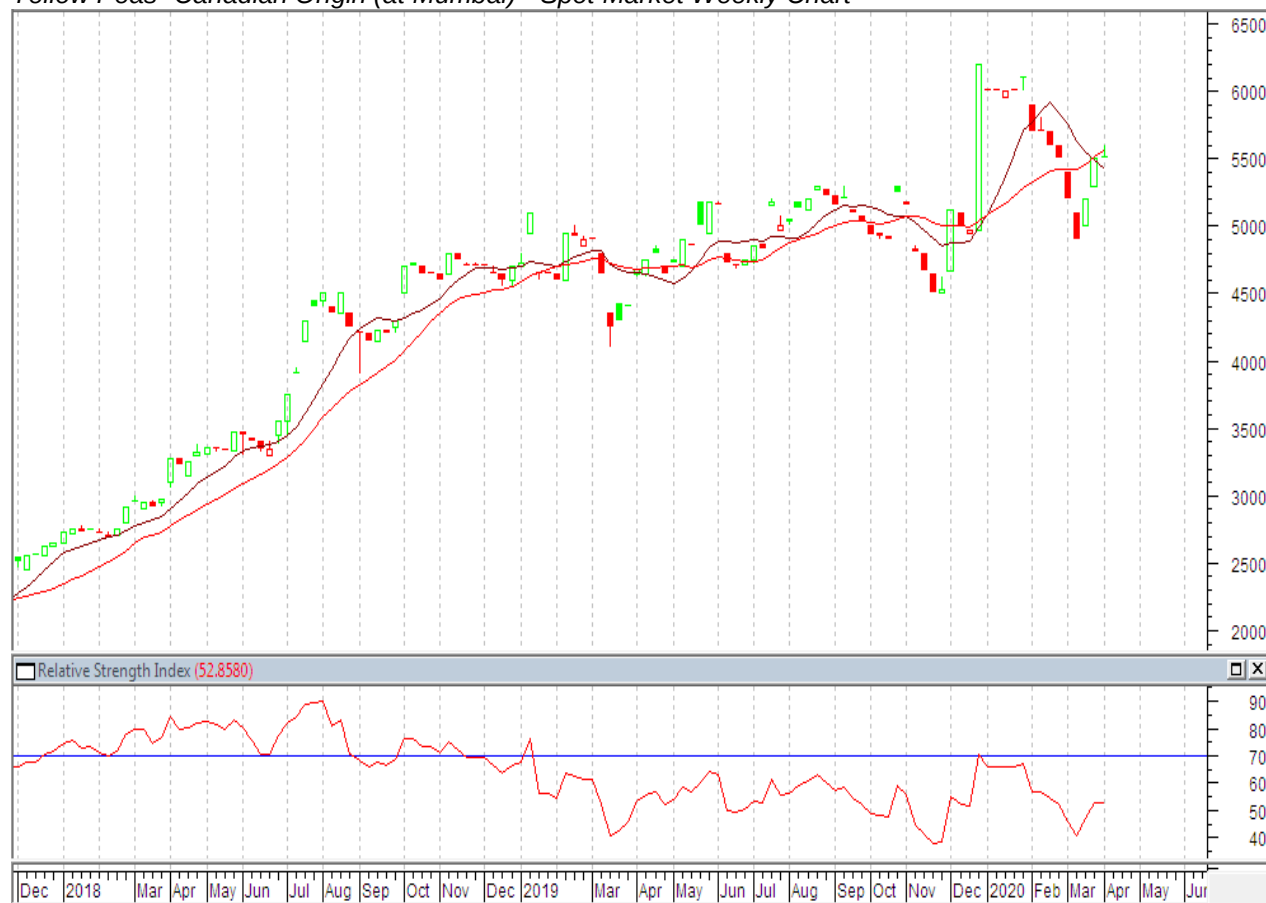

Strategy: Sell on rise

Trade Recommendations: Go short around 4350 with the first target of 4200 and second target 4100 with stop loss at 4450 level.

Delhi Chana Physical:

Support & Resistance				
S1	S1	PCP	R1	R2
3900	4000	4200	4450	4650

Spot Market outlook: Chana prices are likely to show steady to slightly weak movement this week

Peas:
Yellow Peas -Canadian Origin (at Mumbai) - Spot Market Weekly Chart

Note : Prices are not available, virtually no import from Mid March.

Outlook –Downward correction may be seen in pea market as chana may move down again and pressurize pea market. If chana trades weak .it may drag down peas price too..

Technical Analysis:

- Candle stick chart denotes weak movement in the market.
- RSI is moving down in neutral region.
- Expected price band for pea is 4700-5000 in this week

Strategy: **Sell on rise**

Trade Recommendations: Go short around 4950 with the first target of 4800 and second target 4700 with stop loss at 5050 level.

Support & Resistance
