Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

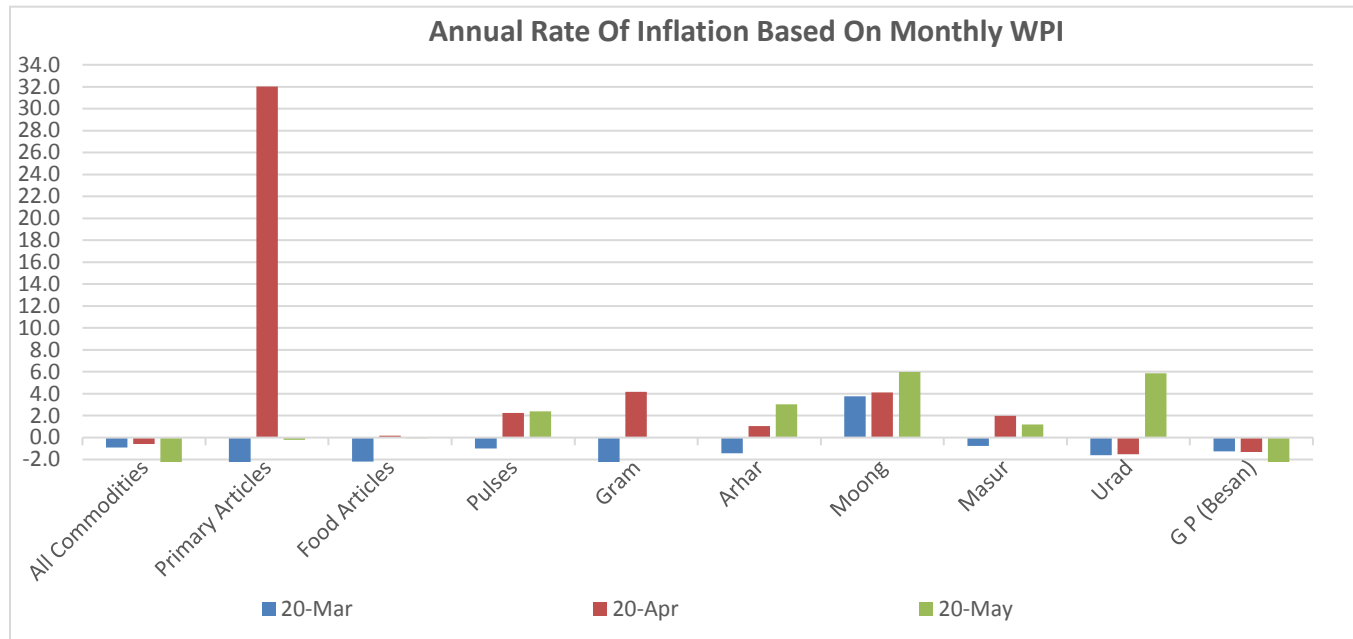

- **Kharif sowing of pulses is running smoothly and is much higher than normal area coverage** till date. Good rainfall, better prices for pulses like tur, urad and moong at the time of sowing and higher MSP has encouraged farmers to grow more pulses in this kharif season. Farmers have covered 36.84 lakh ha area under kharif pulses as on 1st July-2020. It is much higher than 9.47 lakh ha covered last year in the corresponding period. Farmers have covered 16.56 lakh ha area under tur against 2.79 lakh ha last year. Urad coverage area has been reported at 8.77 lakh ha against 1.88 lakh ha last year. Farmers have covered 9.41 lakh ha under moong against 3.14 lakh ha last year. Even other pulses area are running ahead of normal coverage. As the weather remains favorable, sowing will hopefully continue at this pace. Kharif area is bound to increase this year. See details in the table at page no-14.
- **Tur Mills and stockists remained active during the week under review taking clue from firm global market** and restricted sale by stockists in domestic market. Right now, stocks at ports are low and commencement of festive season may encourage demand for pulses. Tur millers located in Katni region are active and sourcing tur from Kar and MH right now. Tur import quantity for millers has not been allocated as yet despite applications having been received by DGFT in May-2020. This would end in delays in imports. It would make supply side tight and push prices up in domestic market. So overall sentiments seem firm. Tur is being traded at Rs 5700-5900 per qtl in Gulberga market while it is quoted at Rs 5650-5850 in Jalgaon and Akola market. Myanmar too has increased quotes from \$ 650 to \$ 675 per MT basis Indian ports.
- **Urad cash market stayed steady to slightly weak as demand at higher level got disrupted amid** increasing possibility of higher import in coming months. Around 25,000 MT is lying at various ports too. Govt. has fixed import quota of urad at 4 lakh MT for 2020-21 and higher volume is expected in July and August as govt has changed import time line from Mar-2021 to Aug-2020 now. So higher volume in next two months and increasing kharif urad area may drag down urad prices in coming weeks. Even stockists may prefer to offload stock in July and Aug. New crop would hit market by end August. So overall, sentiments seem weak in July-Aug. Demand is normal and south Indian millers are waiting for bulk import. Traders are buying urad in Chennai for Delhi market at Rs 6350. Current uptrend is unlikely to sustain and cash market is expected to decline near MSP level of Rs 5700-5800.
- **Importers have restricted buying of lentils (masur) from Canada from the third week of June. Likely lower import** volume in July and decreasing arrival flow from Mungawali, Ganjvasoda, Sagar and Bhopal in domestic market may push up masur prices in coming weeks. Around 30 to 40 thousand MT is expected in July while demand is hovering around 50000-60000 MT supporting the masur market fundamentals. Even NAFED is unable to buy masur this year as prices are ruling above MSP. Import duty reduction of 20 % has not been able to cool down prices as suppliers' countries like Canada and Australia had increased their quotes accordingly on the same date. There is a shortage of masur at ports like Mumbai and Mundra.
- **Pressure on cash moong market continues with increasing quantity from summer moong.** Buying support by mills was limited as quality of more than 50 % arrival was poor. Moong is hitting various markets from MP, Rajasthan, Uttar Pradesh, Bihar and Ranchi region. Weak demand, arrival of light quality moong may drag down moong price by a further Rs200 to 300. Apart from this, sowing of kharif moong is running ahead by 3.24 to 5.30 lakh ha. This year area is bound to increase and it may cross 33 lakh ha against normal of 27.50 lakh ha. Before this maximum area has been covered in 2016-17 (Over 35 lakh ha). Weather conditions are favorable and good rains fall and higher MSP in growing region are encouraging farmers to grow more moong this kharif season. Under normal conditions, Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimates.
- **Chana cash market could not sustain its upward momentum as Nafed started selling chana in various states through** auction from 1st of July-2020. Demand for chana dal in rainy season generally decreases. So pressure seems on chana cash market. As expected last week Nafed started selling chana earlier than normal expectation and it has weakened the inner tone now. Availability is higher this year. Some support from festive demand is expected. However, it would not help to push price up to the level of MSP in July. Higher stock in central pool, storage issues and obligation to procurement from kharif too may continue to force Nafed to continue auction. It may cap uptrend in Chana cash market.

International Market Update:

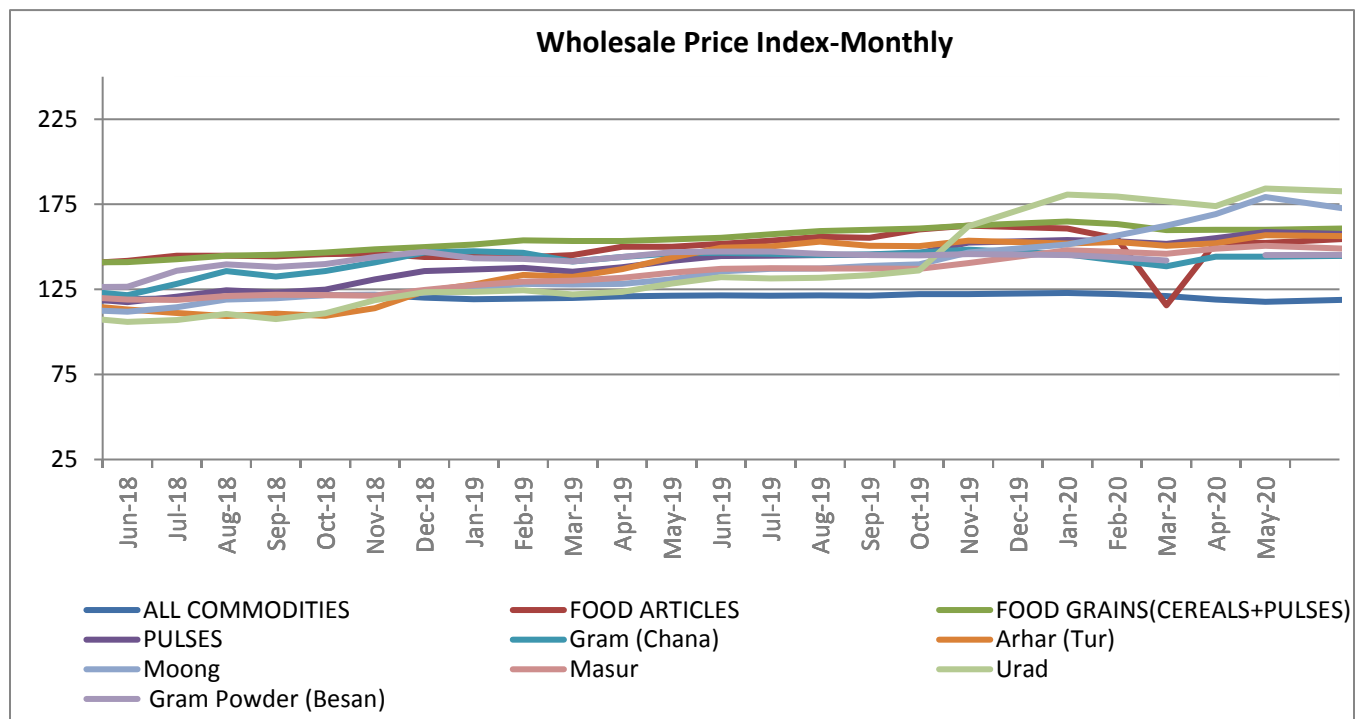

- **Chickpea markets maintained its firm tone during the past week, helped by report on the seeded area in Argentina** being down substantially this year. Shortages of large caliber product is expected to remain an issue until the first half of 2021 because of lower availability of supplies from Mexico and India. This has added some support to medium caliber markets, which are also looking a reduction in total area in Canada and the United States. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada have increased quotes accordingly. So, Indian importers are unlikely to benefit in import. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$660 per MT. Higher price has eroded benefit of duty slash.
- **Lentils area in Canada is expected to decline slightly from 1530 thousand ha to 1501 thousand ha in 2020-21.** the decline is nominal so production size is estimated to be similar as seen in 2019-20. Canada had produced 21.67 lakh MT lentils in 2019-20. the fig for 2020-21 has been pegged at 21.50 lakh MT. Yield is expected to be similar at 1.46 tonne per ha. though import and export may decline in 2020-21 from 85 to 50 and from 2200 to 2000 thousand MT respectively. Price is expected to hover in the range of \$500-530 per MT.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT in 2019-20** and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and Bangladesh have been top buyers of dry peas in 2019-20 Imports were up from 62 to 72 thousand tons in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada increased from 35.81 lakh MT in 2018-19 to 42.37 lakh MT in 2019-20.** Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to Bangladesh has continued and there is news of a three months forward deal being heard.** Old crop of lentils would no longer be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantities being available limits the deal size. Bangladesh has been buying 20,000 MT red small lentils per month. It may continue for the next three months. Australia exported 80,000 MT lentils in March and big volume export continued in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Moong harvesting is on in Australia. It is almost two third over in Queensland and northern NSW.** Quality of moong is said to be good. Mungbean values have steadied at \$1500/t for No. 1 grade, \$1400/t for manufacturing and \$1300/t for processing as per Central grain Asia report. Quantity of grade 1 moong is higher. China is the biggest buyer of Australian moong. Some buying interest from India too has been seen. Indian millers can also buy moong from Australia if they get license. The central Queensland mung bean harvest is well advanced, and will finish next month.
- **Australia is going to plant biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US** peas producing regions. Farmers may plant 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **Chickpeas area in the US is likely to decrease by 32% from last year. Small chickpea acreage shows a decline of only 5%, while large chickpea acreage is expected to decrease by 41%.** It is really a big surprise this year.

Weekly Outlook: -Pulses are likely to trade mixed this week.

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 3.7 points from 155.1 in Apr to 158.8 in May-2020

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market could not maintain its firm momentum taking clue from weak futures and commencement of sale by Nafed from 1st of July-2020. Nafed has procured around 21.75 lakh MT chana so far against the target of 22.5 lakh MT this season. Procurement is expected to continue till 29th July-2020 in MP while in other states it is heading towards the end. In Delhi, Chana is being traded at Rs 4200-4250 and may move down by Rs 50-100 from current levels. Demand for chana is expected to improve from mid- July and it may help market to recover slightly. Prices may move up beyond MSP level if import from LDC countries remains restricted and Nafed stops selling in July and Aug. Nafed has ample old stock and there is a possibility of over 2.25 MMT procurement from new crop too. As of now around 21.75 lakh MT chana has been procured. Overall sentiments seems weak for chana cash market this week.

All India average price for Chana decreased by 0.42 percent from Rs 42 58 to 4240 per qtl. during review week. Even Australian Chana (imported) price decreased by 0.85% from Rs 5650 to Rs 5604 per 100kg due to higher availability of desi chana in domestic market. Following graph illustrates chana price movement in different markets:

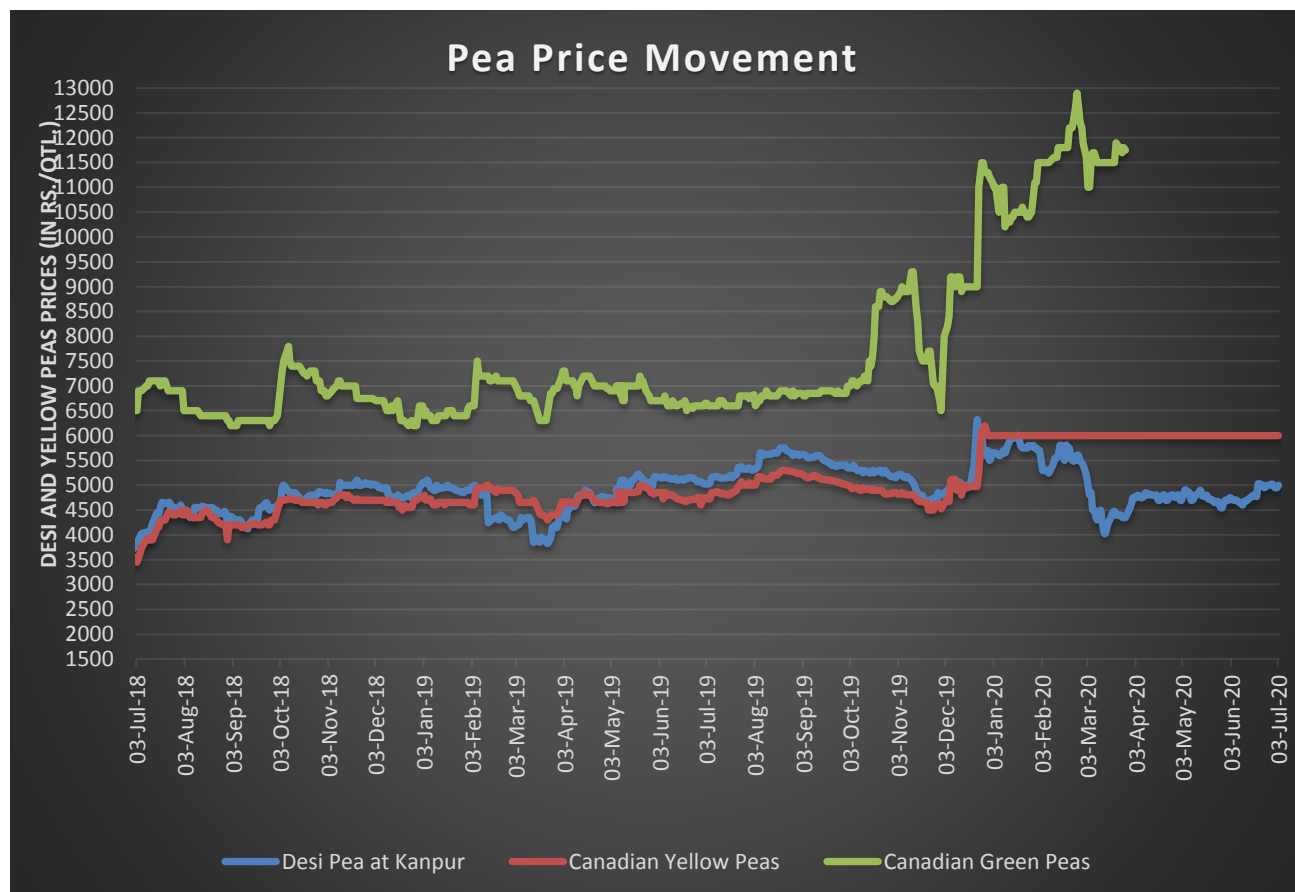

Market Outlook: Weak tone might prevail in chana cash market this week due to commencement of selling by Nafed and weak demand from mills amid higher import from LDC countries despite festive season being round the corner. Futures remain un-supportive too. Apart from this free distribution of pulses is affecting market sentiments. Distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov now.

Peas (Matar):
Market Recap:

No major change was seen in peas market as maximum trade remain suspended due to disruption in major markets due to covid-19. Demand is weak at higher level. No import is taking place right now as import limit of 1.5 lakh MT has already been exhausted. With changed status from the free to restricted category and hefty levy imposed on peas, its import would remain almost nil in coming months too. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green dun and kaspas) and changed its status in the third week of Dec. Now import deals are not taking place given these changes aimed at increasing consumption of chana which is abundantly available in domestic market. Under prevailing condition govt. is unlikely to allow green peas import. So price of yellow peas will also stay steady to slightly weak at current levels.

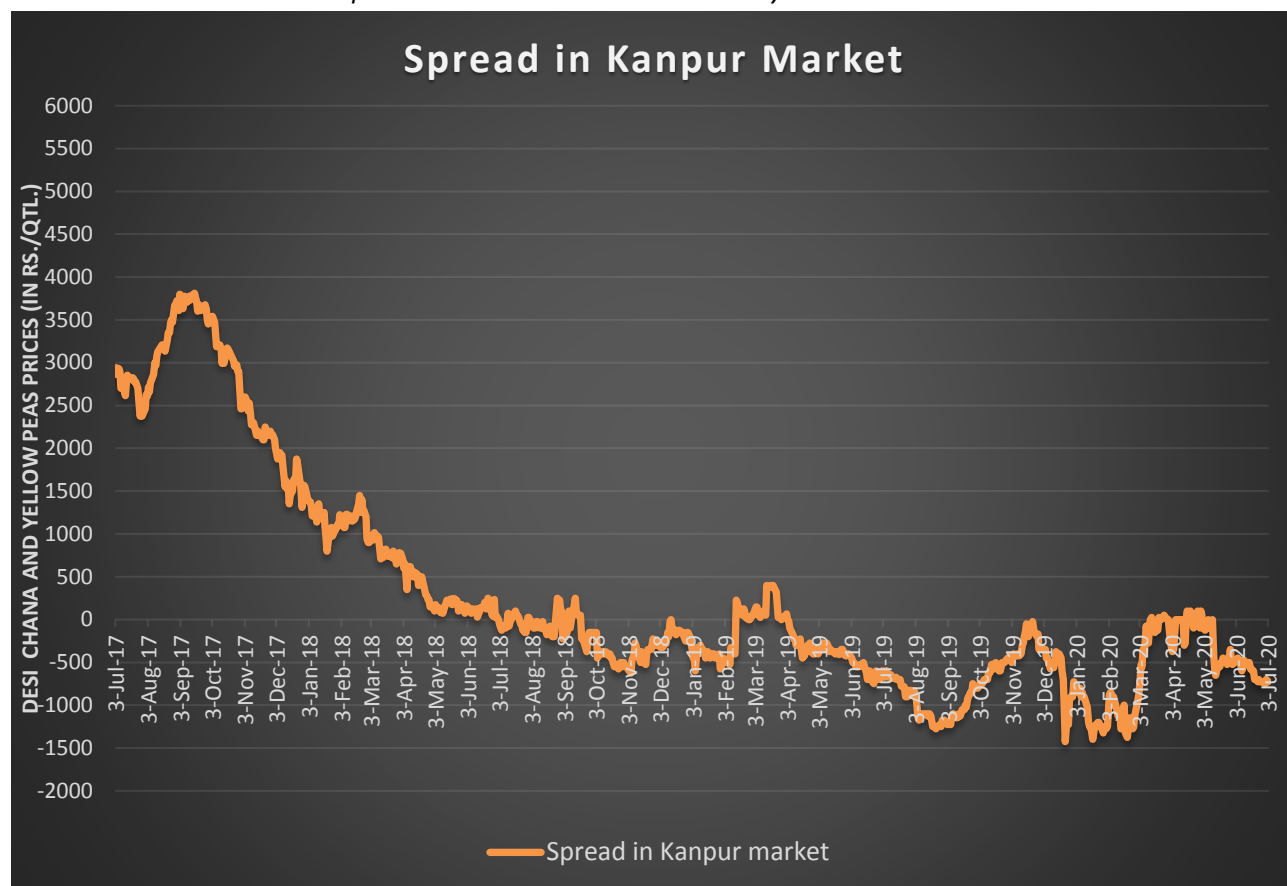

Peas in Kanpur market traded flat at Rs.4950-5000 due to halted arrival in domestic market. Stockists too are unwilling to release old stock because of the bumper chana production this year.. It has impacted price of peas in Kanpur market to some extent. As demand at higher level is down, prices may rule range bound.. Green peas have started hitting the local market but in limited quantities. As supply side is tight, it would continue to trade firm. Demand for green pea is normal.

Current Market Dynamics & Outlook:

Peas market traded flat due to normal arrival from stock in domestic market and chana selling by stockists and Nafed. Kanpur market traded flat at Rs 4950-5000 per qtl. Any major spike is unlikely in July. Overall, all India average price was up by 0.25% to Rs 4950-5000 per qtl.. In Mumbai market, there was no quote for yellow peas as stock was exhausted. Demand and supply side is balanced right now.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs 700 to Rs 725 due to decreased chana price. Spread is expected to remain in the negative zone in July too on relative movement in Chana prices. Overall outlook seems steady this week too.

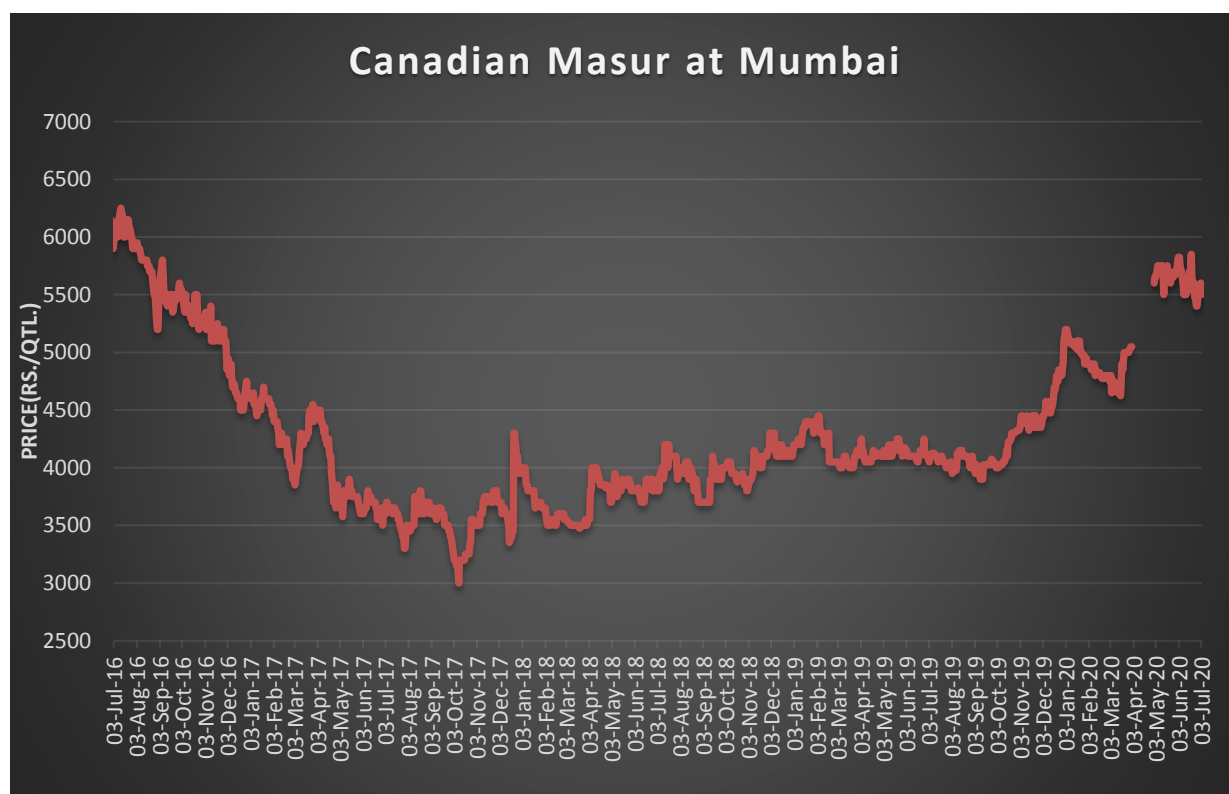

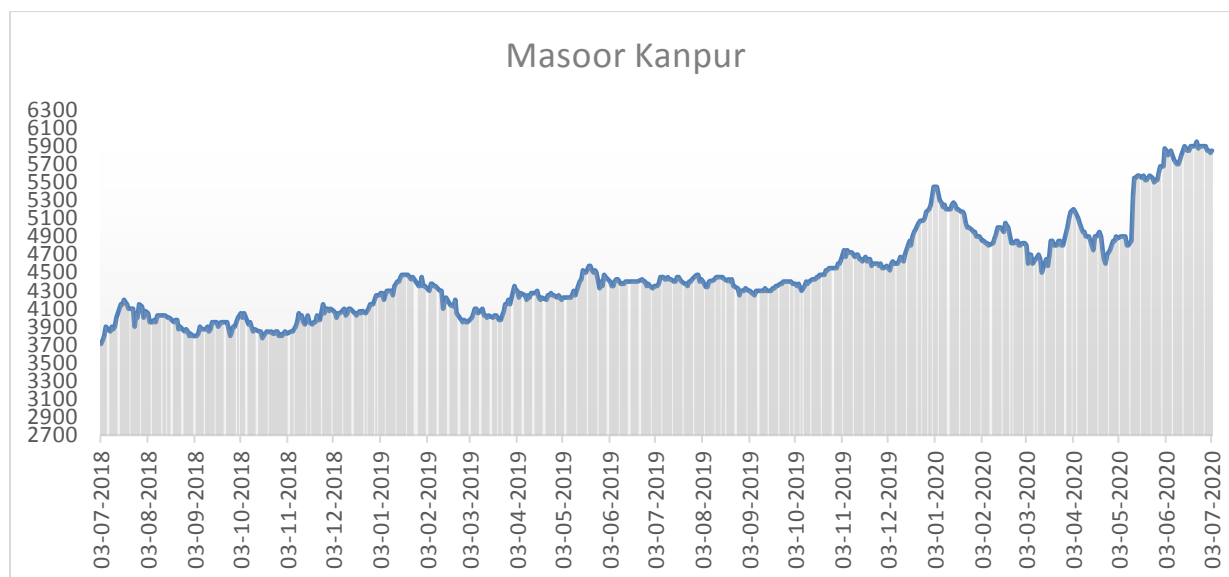

MarketOutlook: Outlook remains steady in the short to medium term.

Lentils (Masoor):
Market Recap:

Arrival pace of new crop has decreased now and govt. has fixed 1.21 lakh MT target for procurement on MSP. However, procurement quantity remains low as ruling price is higher than MSP. Nafed and other agencies have been able to procure only 2800 MT so far. Import pace is slow so prices in domestic market is moving up. It may move up further by Rs100-150. As harvesting is over, no threat has been seen from locusts attack. In other regions too crop harvesting is over. Yield is expected to be better from last year. Production this year has been pegged at 12.73 lakh MT.

Current Scenario:

In the first week of July-2020, average price in key market of Kanpur was up by 1.5 % to Rs 5950-6000 per qtl. Prices are likely to trade steady to slightly firm in the 2nd week of July too. There is good demand for masur in cash market. From third week price may decrease as imported masur would hit the market.

Market Outlook: Prices are likely to stay steady to slightly weak due to higher supply prospects in coming weeks. Sluggish demand from mills and good pace of offloading by stockists remains unsupportive to cash market in the medium term. Nafed may start selling old crop too. Import is likely to continue in limited volume ahead of festive season. Overall tone in masur market remains firm in the short term.

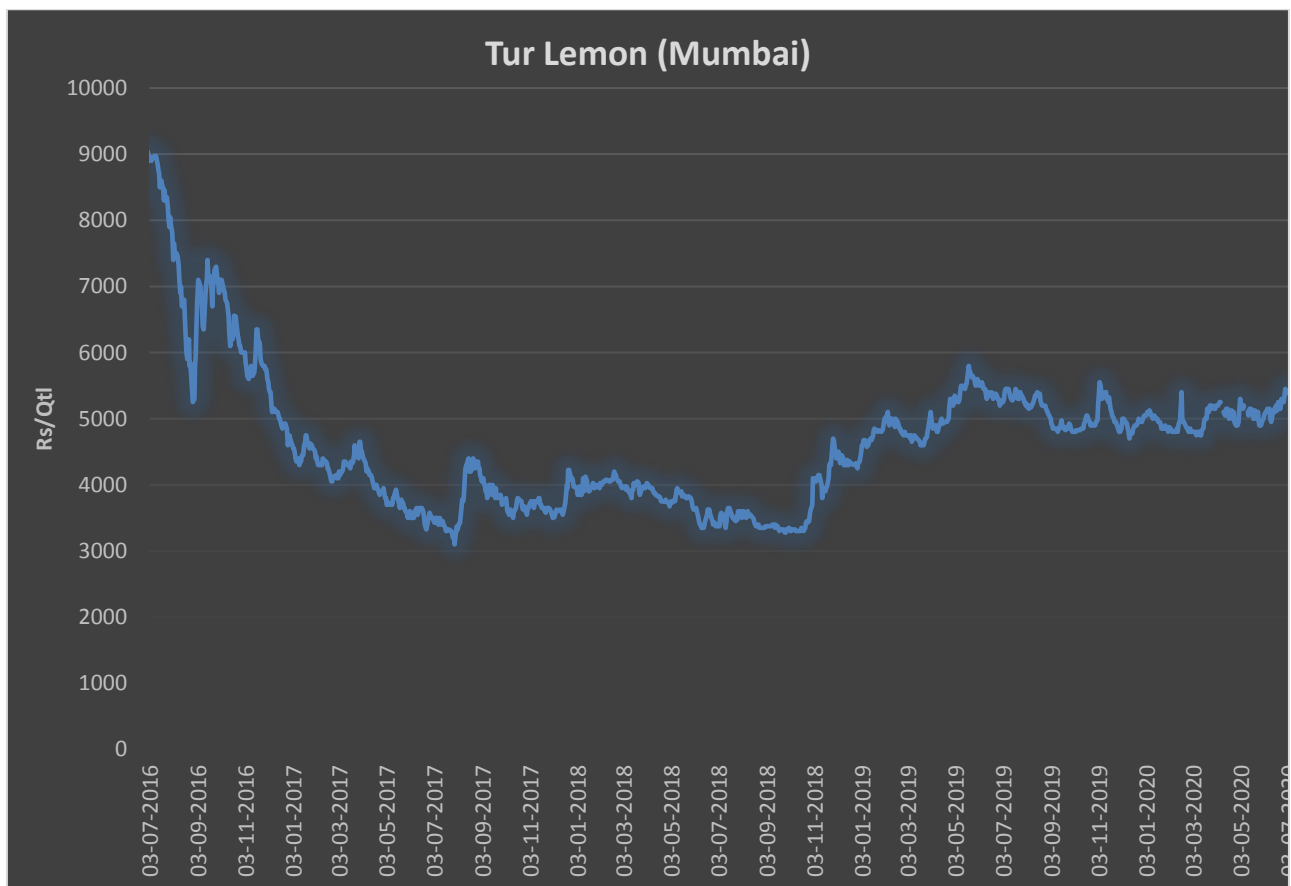

Pigeon Pea (Tur/Toor):

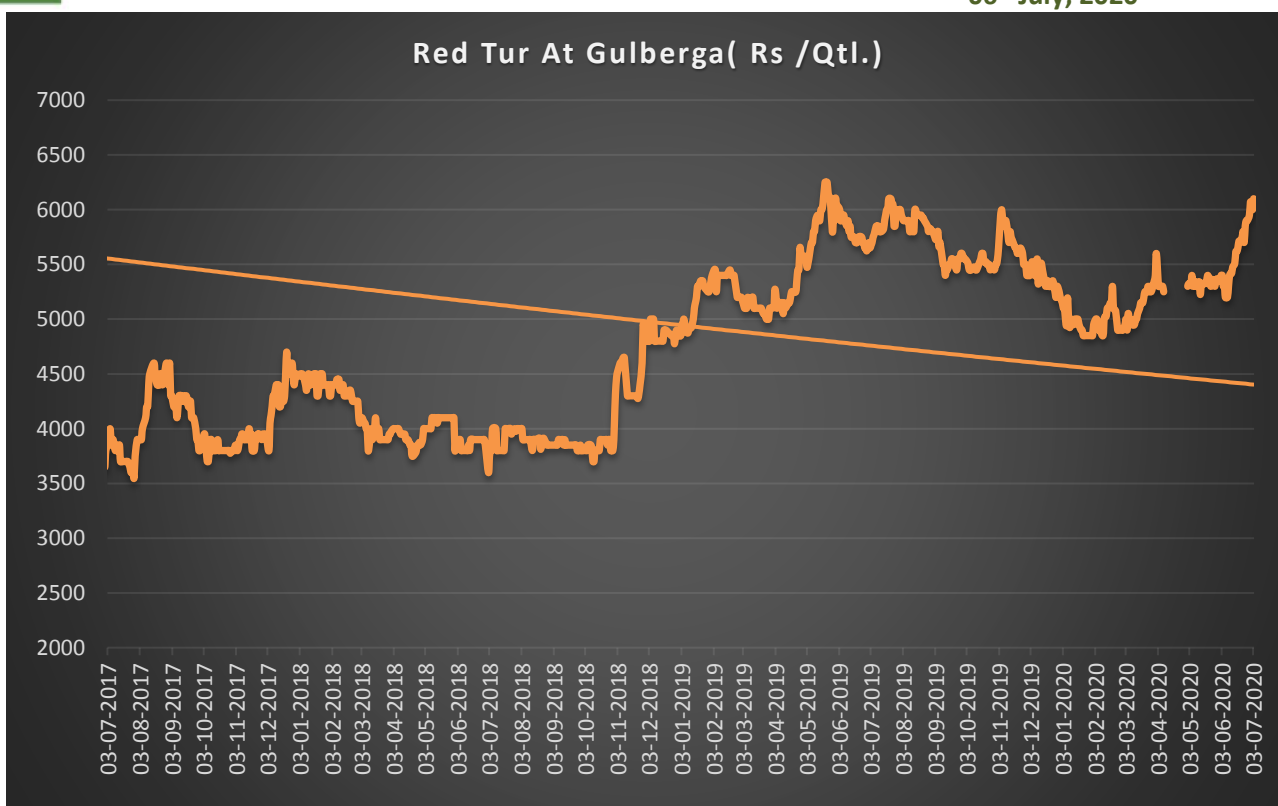

Market Recap:

Tur cash market improved due to fresh demand from mills and slower pace of arrivals. Supply from Karnataka, and Maharashtra continues for other states. In Latur market, it traded Rs 100 up and may continue to trade firm in coming weeks. Arrival in Latur market was reported at 1200-1500 bags while it was higher in Gulberga. As prices are ruling lower than normal expectation, stockists are unwilling to sell tur at lower price right now. Tur price may move further up by Rs100- from current levels. Right now in Gulberga market it is trading at Rs 5800-5950.

Current Market Dynamics & Outlook:

Tur procurement target has been fixed at 545,573 MT, lower than last year owing to lower kharif crop size. As a nodal agencies, Nafed and FCI would procure tur this year, supported by some state agencies too. FCI would procure tur in Karnataka when arrival starts picking up. As of now around 5.40 lakhMT has been procured. Crop size is expected to be around 37 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5700-6100 during July. Steady to slightly firm movement may prevail.

Market Outlook:

In the first week of Jul-2020, average price in Gulberga market was up by Rs 100 to Rs 5900-5950, due to higher pace of procurement from new crop and bulk buying by private trades. Apart from this fresh demand too are supportive to cash market. Import volume remains lower in June. Tur price is likely to recover as supply side is tight. Arrivals have started decreasing now.

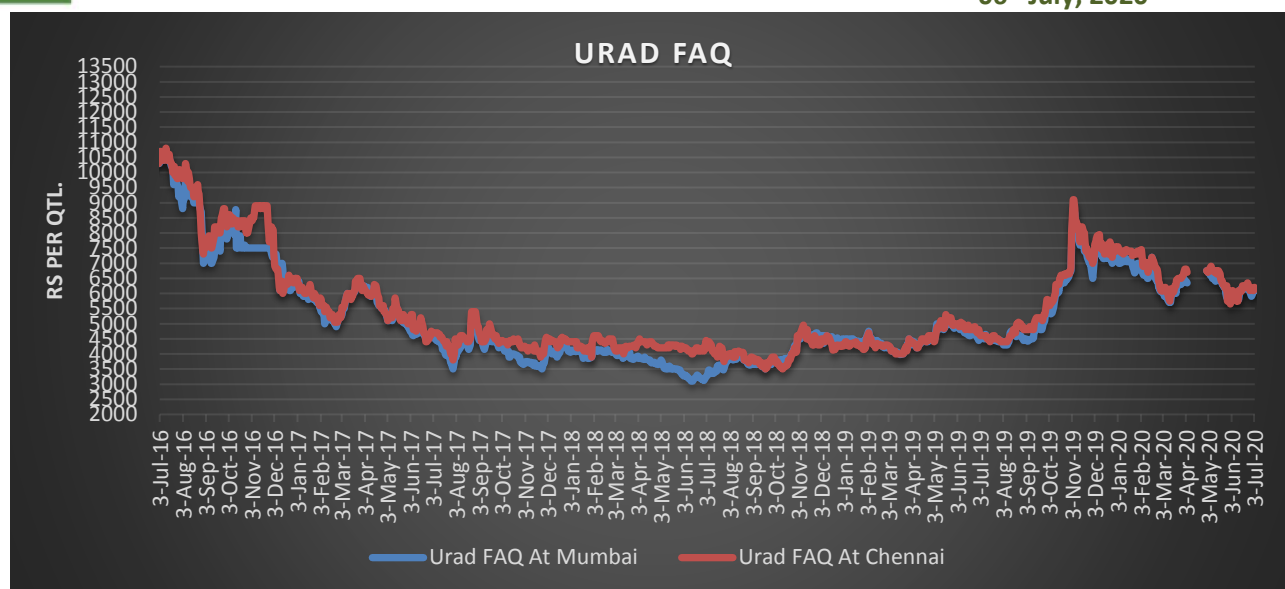

Black Matpe (Urad):

The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020. As time frame for import has been reduced, the DGFT is expected to issue licenses soon. When the licenses are issued, it would impact the market sentiments and cash market could trade down by Rs200 to 300 from current levels.. Besides, new kharif crop would be available from Aug. So pressure seems building on urad price. Demand remains depressed at higher level.

Current Market Dynamics & Outlook:

Nafed has started intervening in the market with govt.'s consent as it has around 1.74 lakh MT old stock. Import would increase supply into the market and price is bound to decrease in coming days. Even kharif area is expected to increase by 10% this year due to higher MSP. Sowing has already begun and kharif area is running higher by 70 % right now. Early start of monsoon rains are beneficial for kharif sowing and early arrival is expected this year.

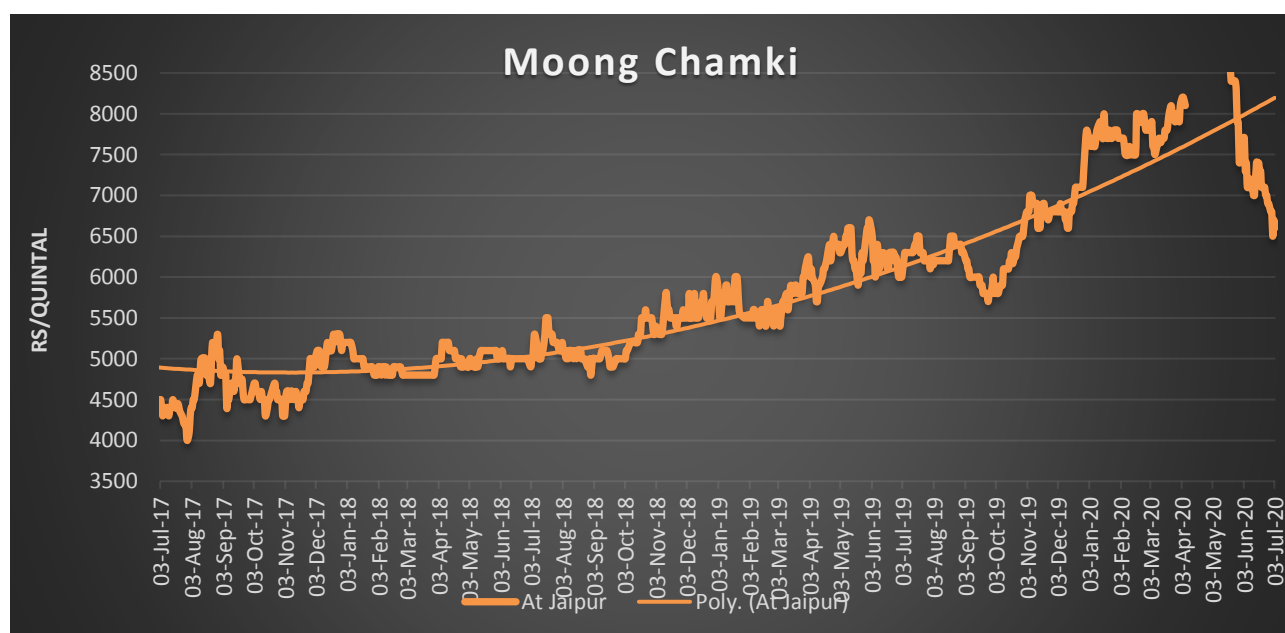

Market Outlook: Urad Prices are likely to show steady to weak momentum.

Green Gram (Moong):

Market Recap:

Moong arrival in Harda and Gulberga market was seen decreasing. Farmers continued to bring moong uncleaned and thus they received lower than expected price in markets. Superior quality moong was traded at Rs 6300 to 6500 per qtl. As arrival pressure is likely to continue, prices may decrease further by Rs200 from current level. Kharif moong sowing has started now in MP, Rajasthan while in other states it may commence by the end of this month. Better crop size in summer crop and good prospects in kharif would likely not allow moong market to move beyond MSP level. Demand too has weakened at higher level. Moong in MP is being traded at Rs 6300-6500 per qtl. Demand for dal dhoya and chilka is weak while brokers and stockists are avoiding visiting mandis due to Covid-19 impact.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
