Commodity-wise Domestic, International Prices and Arrivals at Different Centers

Highlights-Domestic Market:

- **Kharif Pulses area coverage has increased by 32.33% to 81.65 lakh ha. in the ongoing season so far.** It was 61.70 lakh ha last year as on 17th July-2020..The reason behind higher area coverage is mainly attributed to good monsoon rains and an encouraging MSP.Higher MSP for kharif pulses, good rains and smooth procurement drive have encouraged farmers to grow more pulses this season.As weather is favourable, kharif area is bound to increase by 10 to 15% this year.Farmers have covered 30.84 against 22.39 lakh ha under tur,25.43 against 17.77 lakh ha under urad, 20.98 against 16.10 lakh ha under moong and 4.37 against 5.39 lakh ha under other pulses.See details at page no -14.
- **Tur cash market stayed steady this week after trading up by Rs 100 to Rs 5850-5900 in Gulberga market.** Two vessels having 40 to 45000 MT tur from Myanmar are expected to hit Indian ports by the end of this month. It has capped uptrend in the short term. Even stockists in domestic market have started releasing stock in parts now. Apart from this, area under tur is increasing and farmers have covered 30.84 against 22.39 lakh ha under tur so far, up by 37.74 % from last year. Despite lower availability currently, pressure seems building up on stockists as area is continuously increasing amid favourable planting condition throughout the growing states. Good production prospects, likely higher import in coming months and weak demand from millers have capped uptrend this week. Tur is being traded at Rs 5800-5950 in Gulberga market.
- **Pressure on urad cash market continues and it may trade lower by Rs 200-250 more from current level.** Urad demand at higher level got disrupted amid increasing possibility of higher import in coming months. Around 25,000-30,000 MT is lying at various ports too. Govt. has fixed import quota of urad at 4 lakh MT for 2020-21 and higher volume is expected in July and August as govt has changed import time line from Mar-2021 to Aug-2020 now. So higher volume in next two months is expected. Apart from this, increasing kharif urad area may also drag down prices in coming weeks. Even stockists may prefer to offload stock in July and Aug. New crop would hit market by end August. So overall, sentiments remain weak in July-Aug. Demand is normal and south Indian millers are waiting for bulk import. Traders are buying urad in Chennai for Delhi market at Rs 6000-6100. Cash market is expected to decline below new MSP level of Rs 6000.
- **Increasing kharif area under moong, higher arrival from summer crop and selling intention of Nafed, FCI and stockists before new crop starts hitting the market by end Aug have weakened inner tone in the market.** Moong is hitting various markets from MP, Rajasthan, Uttar Pradesh, Bihar and Ranchi region. Weak demand, arrival of light quality moong may drag down moong price by a further Rs100 to 200. Apart from this, kharif moong area is bound to increase and it may cross 33 lakh ha against normal of 27.50 lakh ha. Before this maximum area has been covered in 2016- 17(Over 35 lakh ha). Weather conditions are favourable and good rains fall and higher MSP in growing region are encouraging farmers to grow more moong this kharif season. Under normal conditions, Agriwatch expects 14.25 to 14.50 lakh MT kharif production as per preliminary estimates.
- **There was no respite to the chana cash market despite the beginning of festive season. Bears still seem to be in the driver's seat, in futures market.** Demand in physical market is weak. However, stockists have slowed down selling at lower level. Sluggish demand, weak futures, commencement of selling by Nafed from 1st July-2020, higher availability of chana in central pool and free distribution of 1kg chana per family per month till November would not help to push cash chana market up in the near to medium term. Dal mills are selling dal at discounted price as fundamental remains weak. Chana traded at Rs 4150-4175 in Delhi market. It may decrease by Rs100 more.
- **Importers have restricted buying of lentils (masur) from Canada from the third week of June. Likely lower import volume in July and decreasing arrival flow from Mungawali, Ganjvasoda, Sagar and Bhopal in domestic market may push up masur prices in coming weeks.** Around 30 to 40 thousand MT is expected in July while demand is hovering around 50000-60000MT supporting the masur market fundamentals. Even NAFED is unable to buy masur this year as prices are ruling above MSP. Import duty reduction of 20 % has not been able to cool down prices as suppliers' countries like Canada and Australia had increased their quotes accordingly on the same date. There is a shortage of masur at ports like Mumbai and Mundra.
- **Peas market continues to trade steady to slightly weak.Traders are selling peas at Rs 5550 in Kolkatta while yellow peas in Mumbai are being traded at Rs 5400 per qtl.** Demand at higher level is weak as chana dal and chana are available at lower prices. Govt .is not going to relax import quota beyond 1.5 lakh MT as availability of other pulses is ample and govt is eager to encourage pulses consumption at all costs.

International Market Update:

- **For 2020-21, Canadian lentil seeded area rose by 12% to 1.7 Mha, due to good forecasted returns published by Canadian statistics** compared to other crops. By province, Saskatchewan accounts for 90% of the lentil area, with the remainder seeded in Alberta and Manitoba. Production is forecast to increase to 2.48 Mt, with supply lower due to smaller carry-in stocks. Exports are forecast to be lower at 2.1 Mt. Carry-out stocks are forecast to rise to nearly 0.2 Mt. The average price for all grades and types is forecast to rise from 2019-20, with higher prices from large green and red types. There is an expectation that import demand in the Indian subcontinent will continue to be similar to higher in 2020-21.
- **Chickpea markets maintained its firm tone during the past week, helped by reports on the seeded area in Argentina** being down substantially this year. Shortages of large caliber product is expected to remain an issue until the first half of 2021 because of lower availability of supplies from Mexico and India. This has added some support to medium caliber markets, which are also looking a reduction in total area in Canada and the United States. The USDA and Statistics Canada pegging combined area at 602,000 acres, down from 843,000 last year and the record 1.3 million sown in 2018.
- **As per latest report by Canada stats MY 2019-20 may end up with 3 lakh MT masur stock.** Sowing in new season i.e 2020-21 is almost over and under prevailing condition 21.5 lakh MT production is expected. If we assume 50,000 MT import in new season, it hints that total availability would be around 25 lakh MT. New crop is expected to hit market in Sep. As India has slashed duty by 20 % to 10%, Exporters in Canada have increased quotes accordingly. So, Indian importers are unlikely to benefit through imports. Emerging situation is not favorable for import and Indian importers would not be able to import much masur till August. New quotes in Canada is \$660 per MT. Higher price has eroded benefit of duty slash in India.
- **Dry peas export from Canada is expected to increase from 32.70 lakh MT to 36.50 lakh MT** in 2019-20 and it may decrease to 34.00 lakh MT in 2020-21. For 2020-21, it is preliminary estimate as crop sowing has just ended in mid June-2020. China, India and Bangladesh have been top buyers of dry peas in 2019-20 Imports were up from 62 to 72 thousand tons in 2019-20. It may decrease to 60 thousand MT in 2020-21.
- **Dry peas production in Canada increased from 35.81 lakh MT in 2018-19 to 42.37 lakh MT** in 2019-20. Based on preliminary area and yield estimate production in 2020-21 may increase slightly from 42.37 to 42.75 lakh MT. Seeded area in 2020-21 is 1732 thousand ha in 2020-21 against 1753 thousand ha in 2019-20. The yield of dry peas is expected to increase this year from 2.48 to 2.51 tonne per ha in 2020-21.
- **Lentils stock in Australia is decreasing fast as bulk shipment to Bangladesh has continued and there is news of a three months forward deal also.** Old crop of lentils would no longer be available by the beginning of the new season. Forward quotes have been heard at \$700-800 per MT, but limited quantities being available limits the deal size. Bangladesh has been buying 20,000 MT red small lentils per month. It may continue for the next three months. Australia exported 80,000 MT lentils in March and big volume export continued in April and May too. So old stock is depleting fast. As prices are moving up, area under lentils may increase by 10% this year. New lentils quotes are \$650-700.
- **Australia is going to plant its biggest chickpeas crop in comparison to last three years.** Planting continues in Queensland and NSW. As moisture level in the field is good, farmers are increasing area under chickpeas. As top level soil moisture is lower, farmers are using wheat land for chickpeas planting. Forward delivery for October onward has been heard at \$ 630 per MT. New chickpeas crop may attract higher value. Value of new crop may be affected by any further hiccups caused by COVID-19. It may pressurize Chickpeas price.
- **As per latest update by NASS, dry pea acreage may be down by 12-13% this year in US peas producing regions.** Farmers may plant 971,000 acres against 11,03,000 acres last year. Intended plantings are down from a year ago in Idaho, Montana, Nebraska, North Dakota, and South Dakota. However, area in Washington may increase by 19% this year.
- **Weekly Outlook: -Pulses are likely to trade steady to weak.**

Pulses WPI Index:

Index Numbers of Wholesale Price in India (Base: 2011-12=100)

Pulses WPI increased by 4 points from 158.8 in May to 159.2 in June-2020

Pulses-Wise Scenario:
Chana
Current Scenario:

Chana cash market could not maintain its firm momentum taking clue from weak futures and commencement of sale by Nafed from 1st of July-2020. Auction continues in MP Raj and Mah. Nafed has procured around 21.43 lakh MT chana so far against the target of 22.5 lakh MT this season. Procurement is expected to continue till 29th July-2020 in MP while in other states it is heading towards an end. In Delhi, Chana is being traded at Rs 4100-4200 and may move down by Rs 50-100 from current levels. Demand for chana is expected to improve from mid-July and it may help market to recover to a certain extent. Prices may move up beyond MSP level if import from LDC countries remains restricted and Nafed stops selling in July and Aug. Nafed has ample old stock and there is a possibility of over 2.25 MMT procurement from new crop too. As of now around 21.75 lakh MT chana has been procured. Overall sentiments seem weak for chana cash market this week. In Delhi it may trade at Rs 4000.

All India average price for Chana decreased by 1.14 percent from Rs 4191 to 4150 per qtl. during review week. Even Australian Chana (imported) price decreased by 1.24% from Rs 5590 to Rs 5500 per 100kg due to higher availability of desi chana in domestic market. Following graph illustrates chana price movement in different markets:

Market Outlook: Weak tone might prevail in chana cash market this week too due to commencement of selling by Nafed and weak demand from mills amid higher import from LDC countries despite festive season being round the corner. Futures remain un-supportive too. Apart from this free distribution of pulses is affecting market sentiments. Distribution of 1 k.g. dal per family/ per ration card would continue to affect direct demand from cash market till Nov.

Peas (Matar):

Market Recap:

No major change was seen in peas markets like Kanpur, MH, Kolkatta and Indore as trade mostly remained suspended due to disruption in major markets due to covid-19. Demand is weak at higher levels. No import is taking place right now as import limit of 1.5 lakh MT has already been exhausted. With changed status from the free to restricted category and hefty levy imposed on peas, no import is likely in the coming months too. The commerce ministry issued a separate harmonized system (HS code) for all peas (including yellow, green dun and kaspia) and changed its status in the third week of Dec. Now import deals are not taking place given these changes aimed at increasing consumption of chana which is abundantly available in domestic market. Under prevailing conditions govt. is unlikely to allow green peas import. So price of yellow peas will also stay steady to slightly weak at current levels.

Peas in Kanpur market traded flat at Rs.4800-4900 due to halted arrivals in domestic market. Stockists too are unwilling to release old stock because of the bumper chana production this year. It has impacted price of peas in Kanpur market to some extent. As demand at higher level is down, prices may rule range bound. Green peas have started hitting the local market but in limited quantities. As supply side is tight, it would continue to trade firm. Demand for green pea is normal.

Current Market Dynamics & Outlook:

Peas market traded flat due to normal arrival from stock in domestic market and chana selling by stockists and Nafed. Kanpur market traded flat at Rs 4900-5000 per qtl. Any major spike is unlikely in July. Overall, all India average price was up by 0.25% to Rs 4950-5000 per qtl. In Mumbai market, there was no quote for yellow peas as stock was exhausted. Demand and supply side is balanced right now.

Spread With Chana:

Spread between Chana and Peas, at Kanpur market remained in negative zone. Gap has increased from Rs 925 to Rs 1100 due to decreased chana price. Spread is expected to remain in the negative zone in July too on relative movement in Chana prices. Overall outlook seems steady this week too.

MarketOutlook: Outlook remains steady to slightly weak in the short to medium term.

Lentils (Masoor):

Market Recap:

As prices are ruling higher than MSP in cash market, procurement agencies could not procure much against set target of 1.21 lakh MT. Nafed and other agencies have been able to procure only 3000 MT so far. Import pace is slow so prices in domestic market are moving up. It may move up further by Rs100-150. Crop harvesting is over. Yield realization is expected to be better from last year. Production this year has been pegged at 12.73 lakh MT.

Current Scenario:

In the third week of July-2020, average price in key market of Kanpur was down by 2.0% to Rs 5740-5850 per qtl. Prices are likely to trade steady to slightly weak in the 4th week of July as two vessels having 1lakh MT lentils are expected by end July and Aug.

Market Outlook: Prices are likely to stay steady to slightly weak due to higher supply prospects in coming weeks. Sluggish demand from mills and good pace of offloading by stockists remains unsupportive to cash market in the medium term. Nafed may start selling old crop too. It has 21,000 MT old stock. Import is likely to continue in limited volume ahead of festive season. Overall tone in masur market remains weak in the short term.

Pigeon Pea (Tur/Toor):
Market Recap:

Tur cash market could not sustain its firm momentum and it decreased by Rs 100 due to weak demand from mills and expectation of higher flow of imports in coming months. Increasing area and good weather condition are hinting towards better crop size this year. Overall, area may increase by 10 % from last year to 48 lakh ha this year. Arrival in Latur market was reported at 2200-2200 bags while it was higher in Gulberga. As prices are under pressure now, stockists are willing to sell tur at prevailing price. Tur price may move further down by Rs100- from current levels. Right now in Gulberga market it is trading at Rs 5700-5850.

Current Market Dynamics & Outlook:

Tur procurement target had been fixed at 545,573 MT, lower than last year owing to lower kharif crop size. As of now around 5.44 lakhMT has been procured and it is almost over now. Now agencies are planning to offload it in domestic market before kharif procurement starts again. Crop size is expected to be around 39 lakh MT with prevailing good weather condition. Cash market is expected to trade in the range of Rs 5500-6000 during the rest week of July. Steady to slightly weak movement may prevail.

Market Outlook:

In the third week of Jul-2020, average price in Gulberga market was down by Rs 100 to Rs 5800-5850, due to halted procurement from new crop and restricted buying by private trades. Apart from this increasing kharif area too areun- supportive to cash market. Import volume are likely to increase in July-Aug. Tur price is likely to trade down despite lower arrivals in markets.

Black Matpe (Urad):

The DGFT has decreased the time line for 4 lakh MT urad import quota from 31st March-2021 to 31 August-2020. As time frame for import has been reduced, the DGFT is expected to issue licenses soon. When the licenses are issued, it would impact the market sentiments and cash market could trade down by Rs200 to 300 from current levels.. Besides, new kharif crop would be available from Aug amid increasing kharif area. So pressure seems building on urad price. Demand remains depressed at higher level.

Current Market Dynamics & Outlook:

Nafed has started intervening in the market with govt.'s consent as it has around 1.74 lakh MT old stock. Import would increase supply into the market and price is bound to decrease in coming days. Even kharif area is expected to increase by 10% this year due to higher MSP. Sowing has already begun and kharif area is running higher by 70 % right now. Early start of monsoon rains are beneficial for kharif sowing and early arrival is expected this year.

Market Outlook: Urad Prices are likely to show steady to weak momentum.

Green Gram (Moong):

Market Recap:

Moong arrivals in Harda and Gulberga market was seen decreasing. Farmers continued to bring moong uncleaned and thus they received lower than expected price in markets. Superior quality moong was traded at Rs 6300 to 6500 per qtl. As arrival pressure is likely to continue, prices may decrease further by Rs200 from current level. Kharif moong sowing has started now in MP, Rajasthan while in other states it may commence by the end of this month. Better crop size in summer crop and good prospects in kharif would likely not allow moong market to move beyond MSP level. Demand too has weakened at higher level. Moong in MP is being traded at Rs 6300-6500 per qtl. Demand for dal dhoya and chilka is weak while brokers and stockists are avoiding visiting mandis due to Covid-19.

Market Outlook: Moong prices are likely to trade steady to slightly weak in the near term.
